manufactures and disapproving the use of imported articles, of which a long list is named, beginning with loaf-sugar. A committee reported a form of subscription, pledging those who signed to promote these objects. "The late regulations respecting Funerals" are specially emphasized, and the signers agree that they "will not use any Gloves but what are manufactured here, nor procure any new Garments upon such an occasion but what shall be absolutely necessary;" to all which the patriots of Billerica, it is quite certain, generally agreed. This non-importation action became very general, and produced no little effect on the popular mind.

In September, 1768, resolutions from Boston were responded to; and, "taking into Consideration the Critical State of our public affairs, more especially the present Precarious situation of our Invaluable Rights and privileges, Civil and Religious," the town voted to choose "one person a committee for s^d Town, to meet at Boston at Funel hall, the 22^d inst., to act for them in a Convention, with such as may be sent to join them from the several towns in this province, in order that such measures may be consulted and advised as his majesty's service and the peace and safety of his majesty's subjects in the province may require." William Stickney, Esq., was chosen delegate to this convention. In this way the towns furnished the basis for effective discussion and action on the vital problems which stirred the Colonies; and it is not strange that the English Ministry were alarmed and incensed at the activity of these miniature republics. They were, in fact, the palladium of our rising liberties. A town-meeting was held in 1773, February 1st, and its action took shape thus:

"The Inhabitants, having deliberately Considered the Critical and alarming Situation the Colonies upon this Continent are Reduced to, by reason of the unconstitutional proceedings of the British Ministry and parliament of late years; & also the expediency of their, as well as the Inhabitants of every other town, Adopting some method to Communicate their Sentiments in Regard to the Disputes Subsisting between Great Britain and the Colonies, more especially on account of the late change in the American Department, that his Lordship the present Secretary of State for the said Department may be Convinced that a General Uneasiness prevails throughout the Country in Consequence of the late measures of the British Administration, notwithstanding any Reports to the Contrary, & may thereby be Influenced to use his best Interest and endeavours to procure a Removal of the causes thereof, and a Restoration of that peace & Harmony which so long Subsisted Between the Mother Country & her Colonies, & are undoubtedly Necessary to the political Happiness and welfare of each: Unanimously Voted and Resolved—

"1. That the late Acts of Parliament for raising a Revenue in the Colonies; the establishing a Board of Commissioners with exorbitant powers; the granting of such extensive powers to the Court of Admiralty; the fixing a salary on the Governor of the province, and on the Justices of the Superior Courts, Independent of the Grants of the General Assembly; the extending to America the late Acts of parliament, Entitled an Act for better preserving his Majesty's Dock yards, &c.; the Stationing fleets and armies to enforce a Compliance with Ministerial & parliamentary measures, together with many other things that might be mentioned, are Repugnant to the principles of the British Constitution, Subversive of their Charter Rights and privileges, & therefore Intolerable Grievances.

"2. That those Reports which Represent the Inhabitants in General, in the Country, as acquiescing in and ready to Comply with the late measures of Administration, are, as far as they Respect them, false and groundless.

"3. That they will heartily Concur with and faithfully assist their brethren in the common cause, throughout the Continent, to all prudent, legal, and Constitutional measures that shall be Adopted, to obtain a Redress of their present Grievances & a Restoration of their Just Rights and privileges; and will also at all times Unite with them in Zealously and Strenuously Asserting their Rights and Vigorously maintaining their freedom.

"4. That they would take this Occasion publicly to Declare their Cordial Affection & unfeigned loyalty to his present majesty George the 3^d, and to express their Sincere wish that the Union Between Great Brit-in and her Colonies may never be broken, but be preserved upon Such an Equitable foundation as Shall Conduce to the prosperity & Advantage of both. Wherefore,

"5. That they Commit it trust to our Representative in the General Court, to use Such measures as his prudence & wisdom Shall Dictate, to obtain in a Constitutional way a Redress of all Grievances.

"6. That the foregoing votes be Recorded in the town Book, and that the town Clerk transmit a Copy of the same to the Committee of Correspondence of the town of Boston."

Billerica responded, 1774, June 6th, to an appeal from the Boston committee as follows:

"The Inhabitants, having taken into Consideration the oppressive Measures, adopted and prosecuted of late, by the British Ministry and Parliament against the Colonies; and more especially having Coosidered the very alarming and vindictive act passed for the Blocking up of the harbour of Boston and putting a stop to the trade, unanimously came into the following Resolves:

"1. That a Right in the British Parliament to Tax his Majesty's American Subjects and to make laws Binding upon them in all Cases, without their Consent by Representatives, effectually deprives them of those Rights and Privileges which as men and as British Subjects they have a Just Claim to; and has no better foundation in Reason & Equity than the unlimited Prerogative, contended for by those arbitrary and misguided Princes, Charles the first and James the second, for the which the one lost his life and the other his Kingdom.

"That the Colonies are as Justifiable in opposing this unrighteous Claim of the British Parliament & all Acts Resulting from it, with all the attempts to Carry the same into execution, as the people of England were in opposing Charles & James, & setting William, Prince of Orange, of ever Glorious Memory, upon the Throne in the Room of the latter, Since the measures of those Arbitrary Princes were not more Inconsistent with the Liberties of the People of England than the late measures of the British Parliament, in consequence of the above-mentioned claim, are with the Liberties of the People in America.

"3. That our Vigorous Contests for our Liberties, in Opposition to the said Claim of Parliament and the Oppressions with which we have been loaded in Consequence thereof, Cannot Consistently be Denominated Faction and Rebellion by any who are friendly to the Principles of the Revolution upon which his Present Majesty's Right to the Crown Depends; and therefore there is Reason to Suspect that those who call our manly Struggles for Liberty Opprobrious names are disaffected to the Hannoverian Succession, & aiming to Restore the Race of the Stuarts.

"4. That the act for Blocking up Boston Harbor is Hostile, Arbitrary & Cruel, and a Solemn Alarm, Sounded to all America, to Unite as one man and Stand more firm than ever in Defence of its Liberties, as it Discovers implacable Resentment in the British Ministry and a fixed Intention to treat these Colonies as Rebels, without even the formality of a trial, and to condemn & punish them unheard if they Do not yield a tame Submission to their Sov. reign Mandates, which is a mode of proceeding against Real offenders scarcely to be paralleled by any instance in the most arbitrary & tyrannical Reigns.

"5. That we consider the Blow Struck at Boston as aimed at the Province in General, and as a Prelude to something further, Equally Vindictive, yet to Store for this and the other Colonies, and as we have a fixed Reliance upon the Virtue of our Brethren in Boston to persevere in the noble Cause of Liberty, which they have hitherto maintained with Such laudable fortitude and Resolution, and, looking upon our Selves as Bound to animate and encourage them, we hereby promise & Declare our Readiness to Support and Strengthen them in the present conflict to the utmost of our power, and to joyu with them in any measures that shall be Judged expedient for our Common Safety and Defence, and for Defeating every veneful machination of those that would punish us for Shewing our Selves men, and Dragoon us into Slavery because we Disdain patiently to take the Yoak upon our Necks at their Bidding.

"6. That, if the Respectable Body of Merchants throughout the Colonies might come into an agreement to import no British Goods and carry on no foreign trade whereby the merchants in England should Receive any Greater Benefit or Emolument, we humbly Conceive that a plan would be laid for the Speedy Removal of our Difficulties; and that we should have nothing to Do but to Sit Still and See the Salvation of our Country. We therefore Ardently Recommend this measure to them, promising that nothing shall be wanting upon our part for the Encouragement of the Same.

"Lastly. That as it would be an Indelible Disgrace and a Violation of the Sacred Obligation we are under, to God, to our Country, to our Selves, and to Posterity, for us tamely and Pusillanimously to give up these Invaluable Liberties, which our worthy Ancestors purchased for us at Such Vast Expense of Blood & Treasure, We are Determined to use our utmost efforts to maintain them, and not part with them at a Cheaper Rate than they were at first obtained."

It was also voted to choose a Committee of Correspondence, which consisted of Mr. Ebenezer Bridge, Mr. Joshua Abbott, Capt. Josiah Bowers, Mr. Ralph Hill, Dr. Timothy Danforth, Mr. William Tompson and Mr. Solomon Pollard.

On June 27th, after considering two covenants sent from Boston "The Town, after Serious Deliberation upon the Difficulties & Distresses in which the Province, as well as the Colonies in General, are involved at the present Day; also upon what Method will have the greatest tendency to Cause a Suspension of all Commercial Intercourse with the Island of Great Britain (that being adjudged a Measure the most Salutary and Prudent that can be adopted, and most likely to effect the end proposed), Voted, That the Inhabitants of this Town come into an Agreement, faithfully and Religiously to be observed, that they will not buy, purchase or Consume, or suffer any person by, for, or under them, to purchase or Consume, in any way or manner whatsoever, any Goods, wares or merchandise that shall arrive in America from Great Britain aforesaid, from and after the 31 Day of August next ensuing, for and until such time as they shall have Received the Result of the Continental Congress, upon whose wisdom, Prudence and Integrity they Rely, & to whose Determination they shall Readily Conform. Voted, That if any person or persons shall Discover such a want of regard for the Interest and Good of the Country, as to import any kind of merchandise from Great Britain aforesaid, after the aforesaid 31 Day of August until the publication of the aforesaid result, they will not purchase of them any article of British goods whatever, when or howsoever imported. Voted, That a Covenant comprising the Spirit and intention of the foregoing Vote be forthwith Subscribed to by the Inhabitance of the Town," and a committee was appointed for the purpose.

September 12th it was "Voted, that the Town Justifie the Committee of Correspondence for their Going to Concord to join with the committees of the other towns of this County to Consult upon measures proper to be taken at the present important day," and "that the town fully accept of the Resolves passed at said meeting in Concord." At the same time the town voted to choose two persons "as a committee to attend at the Provincial Congress to be

held at Concord on the second Tuesday in October." William Stickney, Esq., and Mr. Ebenezer Bridge were chosen. Already the First Continental Congress was in session at Philadelphia, and the active union of the Colonies was taking practical form. Two weeks later Mr. Stickney was also elected Representative to the General Court, "to be held at Salem," October 5th; and he was instructed "to pay no Regard to the King's new mandamus Council, as a Council, nor proceed to act with them;" and, "if the Governor Should Dissolve, prorogue or adjourn the Court, that our Representative joine the House in forming themselves into a provincial Congress," and, in the latter case, Mr. Bridge was also to attend it.

The progress of sentiment and action was swift, but not unanimous. A vital step was taken when the constables were instructed, 1774, December 19th, to pay the Province tax to Henry Gardner, Esq., of Stowe, appointed receiver-general by the Provincial Congress. But, about the same time, the town says, in resolutions adopted: "It is with most painful Sensations we see the supineness and inattention to our Common Interest, that seems to prevail in the minds of many people in this town: we are sorry that there is so much uneasiness in the minds of some people in Regard to settling the militia." But the organizing and training of this militia was pushed to good purpose.

It was stimulated by an incident which a few days later occurred in Boston, and has made the name of a young man from Billerica famous in the history of these days. Thomas Ditson, Jun., being in Boston, was seized by the British troops, March 8th, on the pretence that he was urging a soldier to desert; without any examination kept a prisoner until the next day, when he was stripped, tarred and feathered, and dragged through the principal streets on a truck, attended by soldiers of the Forty-seventh Regiment, led by Colonel Nesbit, to the music of Yankee Doodle, the original words of which, it is said, were then first used. The outrage produced great indignation, and the selectmen of Boston sent a letter reporting the case to the selectmen of Billerica, who presented a remonstrance to General Gage, and submitted the case to a town-meeting, on March 20th. The town thanked them "for the wise and prudent measures" they had taken, expressed its dissatisfaction with the reply of General Gage, and instructed them to carry the case to the Provincial Congress.

Debates and events were becoming very serious, and the drilling of train-bands and minute-men foreshadowed the work before them. The stern resolve of the patriots expressed itself in a vote, the same day, "to look up the old Bayonets;" and, April 14th, four days before the Lexington and Concord alarm, they voted to "furnish the minute-men with Bayonets and Cartridge Boxes." It was also voted that "as every method ought to be pursued which may tend to promote the arts & manufactures of the

Country, especially that of wool, The Inhabitants of this town Shall not Kill any lambs for the market till after the first Day of August next; and also that no one ought to sell any to any Butcher or Petty Chapman, at any time whatever." "Voted, That the Inhabitants of this Town will, on the Death of a friend or Relative, Conform to the 8th article of the American Association, & go into no further mourning than such as is therein Recommended, and will entirely Discontinue the Giving of any Gloves whatever at Funerals."

To prevent the troops in Boston from being supplied with materials for hostile operations, the town voted not to permit any team "to Load in, or, after loaded, to pass through, the Town, with Timber, Boards, Spars, Pickets, Tent-poles, Canvas, Brick, Iron, Waggon, Carts, Carriages, Intrenching Tools, Oats," etc., without satisfactory certificate from the Committee of Correspondence, as to load, destination and abode.

When the day of Concord and Lexington came, Billerica was ready to do her part. The midnight riders spreading the alarm, probably reached this town by two o'clock. The Ditsons on the Woburn Road would be among the first to receive the summons, and very ready to respond to it after their recent experience. Colonel Thompson and Lieutenant Stickney, would be promptly notified; and Ebenezer Bridge, who was captain of the minute-men. There was hurrying to and fro, and in the early dawn, when the first encounter took place at Lexington, few families, if any, had not heard the call to arms. Muskets and accoutrements were hastily made ready and donned; the alarm-list no doubt turned out as well as the train-band and the minute-men; and gathering at the Common for muster and orders, they hurried off towards Concord. Meanwhile, the British had pushed on to Concord, and after the fight there found reason for hurrying back towards Boston. They had not gone far when, at Merriam's Corner, the Billerica troops came and joined in the assault and pursuit of the retreating foe. They came under the command of Colonel William Thompson. Some Billerica men were naturally in the Bedford company and arrived earlier, and when Captain Jonathan Wilson was killed, the command devolved upon his Billerica lieutenant, Edward Stearns. Nathaniel Wyman, of the same company, was killed, who was probably from Billerica, although his name is also credited to Lexington. No other man from this town was killed, but John Nickles and Timothy Blanchard were wounded.

The day of Lexington and Concord decided the issue of war, and in the rapid mustering of provincial forces, Billerica furnished her share of men.

The Committee of Correspondence was reconstructed, William Stickney, Esq., taking the place of Colonel Bridge, who was absent in the army. Other members were "Joshua Abbott, Col. W^m. Thompson, Capt. Daniel Stickney, Capt. Josiah Bowers, Dr.

Timothy Danforth, Dea. Joshua Davis, Lt. John Parker, Mr. Henry Jeffs, Mr. Isaac Foster, and Mr. Benjⁿ. Lewis." Powers and duties are fully defined and very extensive, and the exercise of them was by no means nominal. Very much was due to the vigilance and discretion with which these committees discharged their various and delicate functions.

At a meeting, May 23d, the town voted "to send another Representative this year," and chose Colonel Tompson. It then adds a resolution which showed the progress of public sentiment after a year in the school of war, and that they were finding out that loyalty to Great Britain could not much longer be made consistent with the defence of their rights. "The Question was put whether the Town will, in Conformity to a Resolve of the Hon^{ble} the House of Representatives of this Colony, advise our Representatives that, if the Hon^{ble} Congress Should for the Safety of the Colonies Declare them Independent of Great Britain, they the said Inhabitants will engage with their lives & fortunes to Support them, and it passed unanimously in the affirmative." They were patriotic men who were ready for this action. With such leaders as Dr. Cumings and William Stickney, we may be sure it was not taken without intelligent consideration of its significance and what it was likely to cost them.

The battle of Bunker Hill was fought on June 17th, and in that battle the company from Billerica served in the redoubt under Prescott. Its former captain was now Colonel Bridge, and Lieut. Jonathan Stickney was in command. Asa Pollard, whose home was near the "fordway," was the first soldier killed, and was buried on the field. Samuel Hill was also killed, and probably Benjamin Easte, who was reported as dead soon after; and Timothy Toothaker died a few days later of wounds received. Colonel Bridge was wounded on the head and neck by a sword-cut, and was one of the last to retreat. In the severe scrutiny which followed, he did not escape charges of misconduct, in seeking too cautiously the cover of the redoubt. He was tried, but acquitted on the ground of indisposition of body.¹

The town adopted, October 14th, resolutions urging the speedy erection of a State Government, and in 1777 sent Rev. Dr. Cumings delegate to the convention, which framed the first Constitution of Massachusetts. Until this was adopted, the towns acted on a theory of their semi-independence; for instance, "the Question was put whether the town will heartily Submit to the Regulating bill, & it passed in the affirmative."

As the war went on, and the calls for troops were repeated, the people found it more difficult to respond. The country was poor and the tax of maintaining the contest in both men and money was severe. 1777, March 10th, the town chose "a committee of five per-

¹ "Siege of Boston," p. 176.

sons to Indent with persons to Inlist into the Continental service," and the records abound in details, showing the activity and embarrassments of this and similar committees to the end.

The pecuniary embarrassments became more and more serious as the Continental currency depreciated, and persons with fixed incomes suffered most. This appears in a vote, 1777, December 1st, "that the selectmen make Mr. Jonathan Kidder, our schoolmaster, an adiqnate reward for his services in some measure, as things have risen." The extent of this inflation is illustrated in the salary of Dr. Cumings. This was £80. But for the year ending in July, 1779, he received £380; for the next half-year, £830; and for the year 1781, £9000. In other words, this "Continental currency" had fallen to less than one per cent. of its face value. It had become too attenuated to be reclaimed, and the unfortunate holders of it, soldiers as well as citizens, suffered greatly in its utter loss. In 1782 the taxes were raised in specie, and the pastor's salary was again £80.

In 1778 the proposals for the Confederation came before the town, January 23d; and they say, "although they apprehend some things therein Contained are not so agreeable, yet, considering the vast Importance of the whole for the well being & Happiness of the united States of America, Voted & agreed to the whole of s^d Confederation, and that Col. W^m. Tompson, our Representative, be and he is hereby Instructed to Joyne with the honorable house of Representatives in any measures they Judge best, in order to forward the same to Congress."

Another call for recruits, in 1778, was met by the town's offer of £30 to such able-bodied men "as shall Inlist themselves to Joyne Gen. Washington's army for the space of nine months, except sooner Discharged, in order to fill up the Continentall army;" and £60 to such persons "as shall Inlist themselves as militia-men to go to the North River for eight months." In October, 1778, we have a glimpse of the hopes which cheered them during these trying years in the report of a committee, appointed to estimate the back services in the war, who say: "That considering the many services done since our appointment and the Difficulty of estimating them Separately, and the hopeful prospect that this sumer's campaign will put a finall end to services of this sort, it is our oppinnion that one Committee Consider the whole." Whereupon the town appointed a committee of seven, "to estimate the back services since they went to Ticonderogue, since the war rate was made in 1777, having Reference to the former settlement Respecting some grievances that some persons sustained in said settlement, according to their Discretion." This committee made a report in December, which was adopted, 1779, January 4th, as follows:

" May, 1777.	Two months to Rhode Island, set at . . .	£2	0	0
July, 1777.	Six months to Rhode Island	6	0	0
August, 1777.	Three months and a half to Bennington	15	4	0

October, 1777.	Forty-one days to Saratoge	9	10	0
February, 1778.	Three months to Boston	9	10	0
April, 1778.	Three months to Cambridge	9	10	0
July, 1778.	To Rhode Island; all hired men			
July, 1778.	Six months to the Hill	16	10	0
August, 1778.	Six weeks to Rhode Island	11	0	0
September, 1778.	Three months to Boston	9	10	0

If we had the names of the men employed in these various services, the record would have greater interest; but it is safe to assume that the town was represented in all.

More men were needed in 1779, and, June 22d, a committee was appointed to secure the town's quota, "to go into the Continental army and to Rhode Island." July 5th, a tax was levied, of "thirteen thousand dollars," for the purpose of paying and securing the needed men—the first use of the word "dollar" in the records. As prices rose and the value of the currency became more doubtful, men had reasonable fears as to enlisting and trusting promises of future payments. A State Convention was held, and resolutions were passed "for the Retrieving the Credit of our Currency," which Billerica adopted, also appointing delegates to a County Convention, August 5th, at Concord, "to regulate the prices of produce and manufactures," whose proceedings were also adopted; and a committee of fifteen was "chosen of Observation to see that the Resolves and Recommendations of the State and County Convention be punctually complied with." But the task laid upon them was much more hopeless than that of finding men whose patriotism would respond to the call of Washington; and although a week later the selectmen and Committee of Correspondence were united with this one, and "Impowered and directed in the most Vigorous Manner to see that there be no breaking over or evading the doings of the said Convention, and that the breakers thereof be proceeded against according to their offences; and more especially to see that there be no bartering in Gold and Silver, to the Ingury of our paper Currency," prices continued to rise, the regulations could not be enforced, and the end came in the utter worthlessness of the paper currency they strove so resolutely to sustain.

CHAPTER XXXII.

BILLERICA—(Continued).

EDUCATION.

IN 1647 a free school was made compulsory in any town having fifty householders.

Billerica could not at once meet this requirement. But, "1, 5, 61. The Townsmen doe agree y^t Lieftenent Will ffrench and Ralph Hill, senior, doe take care and [examine] the seurll famelies in or Towne, whethr there children and servants are Taught in the precepts of relidione, in reding and Larning their

Catechism." How this duty was discharged is suggested in the record by the selectmen: "10, 9^m, 68. they apoint y^e next seconday to go y^e rounds to examine y^e teaching of children & youth, according to law." If we could accompany these selectmen on that annual examination, we should learn something of education under difficulties: and might gain respect for the fathers, with appreciation of the fact of progress in two centuries.

Mr. Whiting's name first appears in this record, "19 March, '74-5. In reference to the catechising of y^e youth of y^e towne and examining them concerning their reading, a duty imposed on y^e select^m by y^e Hon^d Court, to take care that children and youth be instructed in both. The selectmen doe order, that all children and youth, single psons from eight years old upward, their parente and masters shall send such their children and servants to y^e Reverend Mr. Samuel Whiting, at such times as shalbee afterward appointed by him, to be examined of both, as hoping this might be a good expedient for y^e encouragement of all superiours and youth."

We may well believe that such an examination, by the pastor, would be no small incentive to study on the part of the "youth" who must appear before him. But many of the parents could give but little instruction, and another step in advance greatly needed was taken when, "19, 11^m, 79, Ens. Tompson was chosen school-master, to teach such to read and to write as shall come to him to learn." Joseph Tompson, Billerica's first school-master, was the son of a minister, and, with the possible exception of Danforth, was the best educated man in town. He continued to be the school-master for more than thirty years. Of the studies pursued we are not informed, nor of the "times and seasons;" but the culture of the town owes much, we may be sure, to Ensign Tompson's school, and we may remember with interest the place to which the children of two hundred years ago wended their way for the instruction he had to give them. His house was in the southeast part of the village, at the end of the lane leading east from the Boston road. Whether the services of Mr. Tompson were gratuitous or he had a tuition fee does not appear; but no item is found among the town charges until 1710, when he received one pound as school-master, and another the next year.

About the same time the question of a new school-master was raised. We may hope that the reason was not because Captain Tompson found occasion in his age to charge something for his services. Perhaps after thirty years his methods had become too old-fashioned, and a younger man was called for. In the autumn of 1709 one object of a town-meeting was "to incoridg a schoole-master for Reading and Writing;" and, judging from the records of Mr. Needham, the new town clerk, there was need of a school-master. But four years later a master was still needed, and, November 16, 1713, "it was voted, that the se-

lectmen shall mak yous of their best descrastion in providing a scoull-master for a quarter of a yeare;" and, January 18th, the selectmen were instructed "to se out for a schoolmaster against March Court, and to provide a house." Towns were frequently complained of for neglect to provide good schools, and the last record implies that Billerica had been thus charged, as it had been at least once before, in 1692, "for want of a schole." Probably Mr. Tompson's labors were occasionally suspended and resumed. The same presentment was made in 1718, and answered by Captain Whiting, at Charlestown.

The first appearance of a successor to Mr. Tompson is in 1715, when Mr. Shattuck is paid £8 13s., and the town voted, that he "shall keep the school another half-year." In 1716 Mr. Isaac Branch was employed, receiving £10 for two quarters and £22 for the year 1717. The germ of the system of school districts then appears: "The Town Impowered the selectmen to order & appoint in what parts of the town the school shall be kept & how long at a place." In November, 1718, the town votes "to hire our present schoolmaster for another quarter, Provided he move to the several Quarters of the town;" also, "to give but four shillings p. week for the schoolmaster's board for the future." This master was John Graham, and he boarded with Mr. Ruggles. December 29, 1718, it was voted, that "for about five months the school should be moved to accommodate the outskirts of the Town, and the Rest of the year to be kept in the middle of the town;" and a committee of five was to order the places where it should be kept. It was also voted "to give Mr. Grimes, our present schoolmaster, forty pounds for one year, Provided that he board himself and keep a moving school." In March the selectmen gave leave to John Hartwell's wife "to keep a school to instruct children to Read." Mr. Joseph Houston was master for three or four years from 1719, and was succeeded by Benjamin Ruggles, the pastor's brother. Then for a short time the master was Jonathan Fry, of Andover, the ill-fated young chaplain of Lovewell's expedition. The next year the town paid Mr. William Smith for services, and also Nicholas Bowes, the future pastor of Bedford. Then comes Mr. Isaac Abbott, who was master for six years, who was also employed to copy the early volume of records of "Births, Marriages, and Deaths," in a new book. Benjamin Bowers follows, 1736-39; Jonathan Stedman, 1739; Joseph Manning, 1740; Robert Cutler, 1741-45, who found his wife here, and became pastor in Epping, New Hampshire; and John Chandler, in 1746, who was thus introduced to his future pastorate here. Joseph Bean succeeded, and then came Jonathan Kidder, in 1753, who served the town for a generation, and whose fame lingers still among the traditions of our older people.

The sections of the town where schools were kept were at first and long called squadrons; and a divi-

sion of the school money to the squadrons began to be made about 1760, with attending questions and jealousy as to the division. A school-house is mentioned in 1766, but had perhaps been built earlier, as the town in 1725 voted grants of land to the squadrons for school-houses, to be located by the selectmen. In 1742 a committee reported that the school be kept six months in the centre of the town, two in the east squadron (one of which should be east of the river), two on the west side, and one in the south squadron.

But the squadron school-houses were still wanting, and, 1791, September 12th, a committee on the location of such houses made a report which was adopted. Wards which chose not to build might draw the interest of the sum allowed the said ward, to hire places to keep their school; but the latter privilege was not to extend beyond two years; and the committee was to settle disputes as to locations not yet decided on. When the district system of schools displaced the earlier squadrons is not clear; but for two generations districts had charge of their own schools, locating and supporting as they pleased. Within a few years the town has reassumed the entire charge, seeking more harmonious and efficient management.

The employment of school "dames" is mentioned as early as 1680, and in March, 1718, John Hartwell's wife had leave "to keep a school to instruct children to Read;" but it is not clear to what extent females were thus employed, and it is only within a few years that most of the schools have passed into their hands. Before the Revolution, only English text-books were to be had, which were sometimes reprinted, but always costly and ill-adapted to use in this country. After that, improvement, sure if not rapid, was made, and has contributed much to the usefulness of the schools.

It was a notable day in the history of Billerica when Mr. Pemberton, who had been for eight years the first principal of Phillips Academy, at Andover, came from that position to Billerica, and in 1794 established a school, which is properly known as the Pemberton Academy. He was one of the notable teachers of his time, and counted such men as James Madison and Aaron Burr among his pupils. Here he conducted a school fourteen years, which was highly successful, numbering at times sixty pupils, many of whom graduated at Harvard College and became eminent. At first a training-school for boys, its scope was enlarged and girls were received; and Deacon Samuel Whiting assisted in the instruction.

After an interval of some years a private school was established by Mr. Bernard Whitman and his sister Bathsheba, their brother being the colleague pastor of the church. It was kept in a hall of the old hotel. But, in 1820, the Billerica Academy was established, and Mr. and Miss Whitman assumed the charge of it. The school was good and useful, but it lacked the pecuniary foundation needful for permanence, and its career closed in 1836. From that time, until 1852,

the only opportunity for higher instruction in the town was a private school, taught for some years by Reverend Mr. Stearns, in the vestry of the Congregational Church, of which he was the pastor.

Dr. Howe, near 1850, set about a more substantial foundation; and the results of his benevolent plans remain, and must long endure, in the Howe School. The design had occupied his thoughts before his death, in 1857, and the lot was selected and purchased by himself. By his will, a board of trustees, to be incorporated, received the bulk of his estate, and were charged with the duty of carrying his plans into execution. The building was erected in 1852, and dedicated with an address by Mr. Whitman, who remained until 1875, the diligent and faithful secretary of the trustees.

The school was opened at once under the charge of Mr. William C. Grant. He was succeeded, in 1855, by Mr. Stephen Gilman, and, in 1864, by Mr. Francis Gorman. The present principal, Mr. Samuel Tucker, assumed his charge in 1868. Tuition was free at the beginning, but in recent years the income of the fund, somewhat more than \$20,000, has not been sufficient alone for the support of the school, and a small tuition fee has been charged.

Early in 1879 Professor M. C. Mitchell removed his Boys' School from Elgartown to Billerica. For eight years he occupied the fine building on the corner of Main and Andover Streets, which was burned in January, 1888. A large stone building was promptly built on the Bedford road, and the school continues prosperous.

CHAPTER XXXIII.

BILLERICA (Continued).

RELIGIOUS HISTORY.

THE dismissal of Mr. Chandler left the church for the first time without a pastor; and the devout fathers set apart a day of fasting and prayer, 1760, October 2d, "to supplicate the throne of grace for divine direction in the choice of a minister." A town-meeting was held, 1762, November 18th, and this is the record: "The church of Christ in this town having at their meeting on the 25 Day of August, 1760, Voted to give up their Right and Privilege of Choosing a Gospel minister by themselves, and to act in conjunction with the Town in this Important affair; and the Church and Town Having mett together upon this occasion, . . . and the meeting being opened by a prayer to god for his Gracious Influence, guidance, & Direction, The question was put whether we would proceed at this Time To the Choice of a Gentleman to settle with us in the work of the Gospel ministry, and it was voted in the affirmative. Then

the members of the Church & the Inhabitants of the Town were desired by the Moderator to Bring in their votes conjunctly, in order to the choosing such a minister, which being done and the votes examined, it appeared that Mr. Henry Cumings was chosen by all the votes. Then the town voted to the said Mr. Henry Cumings, as an Incouragement to settle with us, for his settlement Two Hundred Pounds Lawfull money, one Hundred to be paid" at the time of his ordination, and the remainder a year later. His salary was to be eighty pounds, paid annually, and he was to have the use of the "Parsonage pasture." The question of acting on "the article of wood" passed "in the negative," and ministers have since been permitted to furnish their own wood. In paying Dr. Cumings the promised "settlement," the town appropriated £73 17s. 11d., which had been received from the State for the care of the French neutrals. The ordination took place, 1763, January 26th.

Henry Cumings was born in the part of Dunstable which soon became Hollis, New Hampshire, 1739, September 16th. He graduated from Harvard College 1760 and studied theology with his pastor, Rev. Daniel Emerson, who was a man of character and spiritual force, and a powerful preacher; and many young men went from Hollis under his influence to take high positions in the pulpit and at the bar. He had been in ardent sympathy with the Great Awakening and the labors of Edwards and Whitefield, and Mr. Cumings brought the tonic of this training to his ministry in Billerica. He brought also a fine physical manhood, a culture and a piety, which gave him good equipment for his office; and for almost two generations he led his people a good example of the old-time pastor, holding their respect and love with a rare force to the end. He was a diligent student, wrought out his sermons with great care, and preached them with effect. Then he was a man of the people. He had known in his own early experience what poverty and trial were, and was prepared to sympathize with the trials through which the people were passing. The testimony is abundant how heartily he shared in the patriotic discussions and action which bore fruit in the independence of the States and establishment of the Union. He was a leader in the patriot councils, and the action of the town was often shaped by him. His election as a delegate to the Convention which framed the Constitution of Massachusetts, in 1780, was only the proper and natural recognition of his standing among his townsmen. He was often called on councils, far and near, and to preach on public occasions, in a way to show that his merits were appreciated beyond the bounds of his rural parish. But if he was ever called, in the modern fashion, to leave his chosen field, the temptation did not move him, and he was content to live and to die among the people who gave him in youth unanimously their confidence and love, and continued it to the end.

A new and more commodious meeting-house was found necessary and was erected in 1797. It stood near, but a little southeast of, the place to which it has been moved, and then faced the north. By some accident the first steeple fell, and the builder received \$500 compensation from the town. The cost of this house was provided for by sale of the pews, the sum received being \$8504.50.

The church continued united and prosperous during the long pastorate of Dr. Cumings. A just estimate of his theological attitude, in relation to the questions on which the separation among the churches, about the time of his death, took place, is not easy to reach. A characteristic tendency of his preaching is to limit his statements of the doctrines of the trinity, of sin, of redemption and retribution to the language of the Scriptures, seldom interpreting them in phraseology of his own. His sympathies were with the Arminian, rather than with the high-Calvinistic opinions of his time; but when his colleague was ordained, in 1814, it was understood by the council that he held evangelical opinions. On the other hand, it is to be remembered that the church, with substantial unanimity, accepted the views of the "liberal" party, under the lead of Mr. Whitman, and that Dr. Cumings' influence, negative if not positive, must have contributed to this result. He is named with Unitarian ministers in the histories of the period; and whether any injustice is done to him in this classification is a question on which opinions will differ.

In February, 1813, Dr. Cumings preached his Half-Century Sermon. On account of his age and infirmity, he requested a colleague, and the church at once took measures which resulted in the ordination of Mr. Nathaniel Whitman, on the fifty-first anniversary of the day when Dr. Cumings had been himself ordained, 1814, January 26th. The life of Dr. Cumings was spared for almost ten years longer, and his pastorate extended to nearly sixty-one years, his death occurring 1823, September 6th.

To the last Dr. Cumings held the respect and love of the people, and, when the end came, he was buried by the town with reverent affection, the third and the last pastor to whom the town has rendered this service.

Mr. Whitman brought high character, scholarship and piety to his new position. He was two years an usher at Phillips Academy, Exeter, and there began the study of theology with Dr. Buckminster, of Portsmouth, completing his course at Cambridge. He was received with great cordiality and considerate kindness by his venerable colleague, and a warm friendship grew up between them. His ordination was attended by a multitude of people, and the hospitality of the town was full and generous. Mr. Whitman was a good preacher and active pastor. He established a Bible Society and a Peace Society, as well as the first Sunday-school in town, and he used his influence effectively in improving the common schools.

His pastorate, however, fell upon a period of agitation and disruption among the churches, when influences which had been gathering force, some of them for a hundred years, came to a head; and it is scarcely any fault of this worthy man that they culminated in his day and disturbed the peace of his ministry. The discussions which preceded and attended the separation of the Unitarian Churches were not the only and scarcely the most serious of the influences which threatened the peace of the local pastors. The practical union of Church and State, which had been naturally inherited from England, and illustrated in all our previous history, as the constable gathered the pastor's salary, was out of place in the free air of America. With independence the demand for a change grew stronger and stronger; but it involved considerations so serious and was so startling to good but conservative men, that the resistance was long, and many pastors were unsettled in the process. The age of Dr. Cumings and the honor in which he was held delayed its coming in Billerica, and the town collected the salary of Mr. Whitman until 1834. In that year the usual article in the warrant was "passed" by the town and was not again inserted. The parish was then called to meet, and raised somewhat less than the salary, \$700, which Mr. Whitman had received. He remained a year longer, and, in 1835, resigned and removed to Wilton, New Hampshire.

It may be doubted whether the doctrinal discussions and ecclesiastical separations had as much to do with terminating Mr. Whitman's pastorate; but they form a vital part of the history of that period. Here, too, Dr. Cumings' position, while he lived, held the restless spirit somewhat in check which broke forth so soon after his death. Theological questions were debated with great feeling and often with bitterness. Good men sometimes forgot the possible honesty of those who held opinions differing from their own and the charity to which they were entitled, and neighbors were at times estranged. The friends of the old order could not appreciate the force of the convictions which sought change, and those who were striving for change were not always considerate of the feelings or the reasons of those who wished to perpetuate the order of things they had inherited, and which had worked so satisfactorily for almost two centuries. The efforts to establish another church in the town were met by a protest, which Mr. Whitman embodied in a fast-day sermon, which was printed, and must win respect and sympathy for its author even from those who are not fully persuaded by its argument. He was contending with the inevitable; and, had he now the opportunity, he would not probably desire to replace the ecclesiastical order, which was giving way around him, to his discomfort and alarm.

Mr. Whitman was dismissed March 30, 1835, and was succeeded by Rev. William E. Abbot, who was ordained February 8, 1837, and dismissed February 10, 1839. Mr. Abbot was graduated at Bowdoin Col-

lege, 1830, and at Harvard Theological School in 1833. The next pastor was Rev. Theodore Haskell Dorr, a graduate of Harvard College in 1835, and Theological School in 1838. He was ordained May 28, 1839, and dismissed May 28, 1843. Succeeding ministers have with one exception received no formal installation. Their names and dates of service are as follows: James Thurston, November 15, 1844, to May 15, 1850; Samuel Pettes, June 16, 1850, to May 14, 1855; Nathaniel O. Chaffin, June 17, 1855, to May 10, 1857; Norwood Damon, 1857 to 1860; Livingston Stone, 1861 to 1862; James Gallaway, installed January 28, 1863, dismissed in 1865; Christopher Coffin Hussey, October 1, 1866, who is still in charge.

In 1844 the meeting-house was moved, and turned half around to face the east; but it was allowed to retain its primitive structure and graceful spire, which form a landmark visible from afar. The longer ministry of Mr. Hussey has witnessed improvement in several directions. In 1879 a fund of \$10,000 was contributed by several members of the society, the interest of which only can be used to support preaching. The conditions of the gift are that the minister's salary be kept at a specified rate, and that the preaching be distinctively Unitarian. In 1881 a house was bought for a parsonage, and so fully repaired as to make it substantially a new, as well as pleasant and convenient, home for the minister.

THE FIRST BAPTIST CHURCH was the earliest separate organization, after the First Church had for one hundred and sixty-five years existed alone in the town. There were Baptists here at an early day, William Hamlet at least and probably George Farley; and a letter from Hamlet relating to the early troubles is published by Backus, the Baptist historian. But the number did not increase until after the Revolution, when the tendency to resist payment of "minister's rates" had influence in increasing the number of Baptists. Not long after the death of Dr. Cumings they had become numerous and strong enough for organization. Meetings were first held in the school-house near the Fordway, in the spring of 1828. A church was organized, 1828, September 30th. It consisted of twenty members, of whom thirteen were dismissed from the South Chelmsford Church.

The list of its ministers is as follows, omitting students and others who served for shorter periods:

- Otis Wing, March, 1829, to March, 1830.
- Jedediah W. Sargent, ordained January 14, 1835, to January, 1837.
- Jonathan E. Forbush, March, 1837, to August, 1838.
- Warren Cooper, October, 1838, to October, 1839.
- Georgs W. Randall, ordained February 18, 1841, to May, 1842.
- Benjamin Knight, May, 1842, to April, 1849; and February, 1857, to January, 1860.
- Benjamin Putnam, June, 1845; died December 21, 1850, aged 62.
- Zenas P. Wilde, April, 1851, to April, 1853.
- Homer Sears, January, 1854, to January, 1856.
- Thomas C. Russell, August, 1860, to March, 1863.
- John D. Sweet, ordained October 21, 1863, to March, 1868.
- Clifton Fletcher, February, 1869, to July, 1875.
- William H. Fish, ordained December 30, 1875, to June, 1877.

Robert M. Neil (alias O'Neil or McNeil), October, 1877, to July, 1878.
 "Dismissed from the fellowship of the church and ministry."
 Edward T. Lyford, May, 1879 to 83.
 L. B. Lawton, 1884-1887.
 E. O. Taylor, 1887-89.

The first meeting-house stood on the east side of Concord River, very near the middle bridge. The frame was raised, 1830, November 30th, and the house was dedicated, 1831, September 14th. In the spring of 1844 it was removed to its present location in the village, on Bedford Street. A bell was procured in 1872, and in 1877 it received an addition of a convenient chapel.

THE CONGREGATIONAL CHURCH was organized, 1829, April 30th, a society having been formed January 17th. This was a more direct result of the theological controversy, and of the ecclesiastical separations, which were still agitating the Massachusetts churches; and the presence of Dr. Lyman Beecher, as moderator of the council which organized the church, was a significant expression of the general interest in this and similar movements. The unity and strength of the First Church was, however, less affected by the separation, in Billerica, than in many towns. The number of its members who did not sympathize with, or yield to, the Unitarian position of the church was small. Two women, Huldah Blake and Martha Bowers, entered a protest, 1820, October 8th. They affirm their belief in the true and proper deity of Jesus Christ, in the atonement, in the entire depravity of unregenerate men, and their need of supernatural grace to fit them for the happiness of heaven; and generally in the doctrines of the Westminster Confession and Catechism. With these views they believed their pastor and many of their brethren in the church did not agree; and they therefore asked the favor of a regular dismissal. This the church, affirming the right and duty of each individual to be guided by his own conscience, granted. No other dismissals for this reason are recorded, and not more than four or five members of the First Church ever joined the new Congregational Church, which began with twenty-five members. The meeting-house, on Andover Street, 60×40 feet, was raised October 28th, and dedicated, 1830, January 13th. It was extensively repaired in 1885. The record of its ministers has been as follows:

John Starkweather, ordained April 22, 1830; dismissed Aug. 2, 1831.
 Isaac Jones, acting pastor July, 1832; April, 1834.
 Joseph Haven, installed June 8, 1836; dismissed September 27, 1840.
 Benjamin Ela, ordained April 29, 1841; dismissed May, 1842.
 Jesse G. D. Stearns, ordained May 29, 1843; dismissed May 8, 1867.
 John P. Cleveland, D.D., acting pastor 1867-70.
 Everts B. Kent, acting pastor 1870-71.
 John M. Lord, acting pastor 1871-72.
 Henry A. Hazen, installed May 21, 1874; dismissed May 4, 1879.
 John Baskell, acting pastor May, 1879, to October, 1881.
 Charles C. Torrey, acting pastor November, 1881, to 1882.
 Frederick A. Wilson, ordained October 26, 1882; installed September 23, 1885; dismissed June 25, 1889.
 Augustus H. Fuller, acting pastor 1889.

The long and faithful pastorate of Mr. Stearns de-

serves especial recognition. A scholar of exceptional diligence and culture, modest and devout, and active in every good word and work, he commended himself to the citizens of the town as well as to his own charge.

A UNIVERSALIST SOCIETY was formed January 10, 1842, and a meeting-house erected the same year. It stood on the north side of West Street, where the school-house now stands. In 1868 it was sold to the Roman Catholics and removed to North Billerica, where it is still in use by that society. The ministers of this church were Rev. Varnum Lincoln, ordained September 8, 1843; Rev. L. P. Landers, of West Cambridge, 1845-47; Rev. George Proctor, 1847-53, and again, 1855-63; Rev. P. Harsey, 1853-55; and Rev. R. M. Ryram.

A ROMAN CATHOLIC SOCIETY was organized and purchased the Universalist meeting-house in 1868, removing it to North Billerica. It has prospered and the number of its communicants is large. The priests who have been in charge came from Lowell, and no record of their names or dates of service has been furnished.

The youngest church in the town is the Baptist Church at North Billerica, which was organized May 14, 1869, receiving twenty-two members from the Centre Church. Its pleasant meeting-house was a gift from the Hon. Thomas Talbot; built in 1870, and dedicated January 19, 1871. Its pastors have been William M. Ross, June 2, 1869; Nathaniel L. Colby, ordained July 2, 1872; and William A. Farren, ordained September 24, 1879-1887; J. B. Robinson, 1887.

CHAPTER XXXIV.

BILLERICA—(Continued).

MISCELLANEOUS.

THE early roads were often called paths, and the name describes them. Carts could pass over the better roads, but many were passable only on horseback or on foot. Wagons were unknown. The earliest chaise was owned in town not much, if any, before 1800, and marked the aristocracy of the few who could afford such luxury.¹ The first great improvement in the means of transportation was the Middlesex Canal. This first important canal in America passed through Billerica, and its path is still to be seen at many points. The company was incorporated in June, 1793, to connect the Merrimack with the Mystic and Charles Rivers, and save the trade of New Hampshire to Boston. The preliminary surveys consumed more than a year, and ground was first broken at Billerica

¹ See "Lowell Contributions," etc., vol. i. p. 254.

"Mills" in the spring of 1795. The canal was twenty-seven miles long, thirty feet wide, and three feet deep. It was navigable to the Charles River in 1803; but its income was absorbed for years in alterations and repairs, and no dividend was declared until 1819. The total cost of the canal was \$1,164,200. From 1819 to 1843, dividends were paid, amounting to \$504 per share. The receipts then fell below the expenses; in 1851 the charter was surrendered, and in 1852 the canal was sold in sections, owners of adjoining lands being generally the purchasers. The charter was farther declared forfeited in 1859.

The Middlesex Turnpike was an enterprise of significance in its day, chartered in June, 1805. Its route extended from Tyngsborough to Medford and Cambridge. The line at first was to pass Billerica meeting-house; but, in 1806, the route was changed, by permission of the General Court, from a point in Bedford, crossing Nutting's Pond, to Buisquet bridge in Tyngsborough. Some lack of friendly co-operation in Billerica may have influenced this change, and the managers were ambitious to make their great road as near an air-line as possible. Hills and ponds must not stand in their way, and they accordingly followed a route straight through the town, crossing Concord River a mile above the centre bridge, and leaving the village as far one side. This line would attract very little local travel and support, and experience soon proved that the visions of a great through travel and traffic were delusive. The canal and the railroad left little for the turnpike, and its charter was repealed in 1841.

The stages also entered largely into the life of that period. "The first stage-coach passed through Billerica about 1795. It was a two-horse, covered vehicle, owned and driven by Mr. Joseph Wheat, and ran from Amherst, N. H., to Boston and back again, once a week. It stopped at Billerica over-night, making the trip in about four days. The same team performed all the journey."¹ The business increased. In 1803 the stage from Boston to Amherst set off from King's Inn every Wednesday and Saturday, leaving at 5 A.M. and arriving at 7 P.M., returning Mondays and Thursdays at the same hours. For several years before the opening of the railroad from twelve to sixteen stages passed daily through Billerica, Sundays excepted. After work was begun on the new mills at East Chelmsford, in 1821, Mr. Richardson, who kept a hotel at the "Corner," sent a hack Mondays and Saturdays to accommodate gentlemen who wished to connect with the Amherst stage at that point. Lowell could hardly be served in that way now! All this staging and teaming made a demand for taverns, which were numerous and busy. There were two, and sometimes three, in the village: one or two at the Corner, and the Manning Tavern on the Chelmsford Road; and these were not all. Men and

beasts must be provided for, and this provision often suggests Falstaff's "intolerable deal of sack," as one reads the items in old ledgers.

But canal and turnpike gave way to a more revolutionary improvement. The Boston & Lowell Railroad was chartered in June, 1830, and opened June 25, 1835. But the benefit which the railroad brought to Billerica has been much less than it would have been if it had followed a more direct line, through Woburn, and passing between the village and Fox Hill. Such a route would have made the pleasant high lands on which the village is located a very accessible and attractive suburb of Boston, and with the growth of both Lowell and Boston, Billerica might have shared. But some feared and repelled the railroad; others, more sagacious, saw its benefits and sought its location on a more northerly route; and the growth of the village has been hindered by its distance from the stations. Relief for this difficulty was sought in 1876, by the building of a narrow-gauge railroad from Bedford to North Billerica. It was opened with its two-foot track and two locomotives, in the autumn of 1877. The novelty of its narrow track and cheap construction attracted much attention. For a few months the village had railroad connection with the cities. As a mechanical experiment the road was a success. But it soon struck financial rocks. Burdened with debt at the first, it was thrown into bankruptcy and sold out, its equipment being sold to a Maine company.

The roadway was secured in 1884 by the Boston & Lowell Railroad, which laid out a route with better grades west of the village, and re-opened the road of standard gauge, giving the town facilities more permanent and satisfactory, under the stimulus of which, business and population are increasing.

John Parker built the first mill in town, on Content Brook, about 1660, and the mill at the falls of the Shawshin is mentioned in 1707. But the water power at North Billerica was first granted in 1708, to Christopher Osgood, and all later owners get their title from him.

He built and maintained a grist-mill and saw-mill. Thomas Richardson was its owner after the Revolution, and the Middlesex Canal Company purchased of him, 1794, March 25th, the title, which was held for the use of the canal until 1851, September 22d, when it was sold for \$20,000 to Charles P. and Thomas Talbot. These gentlemen were released, by vote of the town, 1864, March 7th, from the obligation to maintain a grist-mill, contained in the Osgood grant, the town judging, no doubt correctly, that the use of the water-power in their extensive manufacturing would be a greater public benefit than the grist-mill.

Prior to this action the owners of the water-power had prosecuted successfully before the Legislature a contest with the towns of Wayland, Sudbury, Concord, Bedford and Carlisle, and the owners of meadows

¹ "Bi-Centennial," p. 152 (note).

above, on the river. The latter had petitioned the Legislature, in 1859, claiming that the dam had been raised and was maintained at a height which damaged the meadows and reduced their value, and they asked for redress. A joint committee heard both parties at length, and the petitions, arguments and documents were published in a report (*House Doc.*, No. 100, 1860). The general conclusion was that "the dam at North Billerica is not the only nor the chief cause of the wet state of the meadows above. The bars across the stream, especially the Fordway bar; the weeds filling the channel in many places, often for long distances; the discharge into the river during the summer of water stored in reservoirs and mill-ponds upon the Sudbury and Assabet and their tributaries, in their combined effect, do far more damage to the meadows than the Billerica dam." They say that the effect of the dam becomes appreciable at Robbins bar, and its entire removal would not affect the upper meadows; that effectual relief could come to the meadows only by reducing the dam thirty-three inches or more, cutting out the Fordway and other bars, deepening the shallow places, straightening the channel at some points, and keeping the river free from weeds. This programme was more extensive than the Legislature felt itself called upon to undertake, especially as it was proved that similar trouble and complaint had been chronic from the first settlement of the country.

In 1811 Francis Faulkner came from Acton and began the manufacture of woolen goods. It was the second enterprise of this class in New England, Abraham Marland being the pioneer, at Andover, in 1810. Mr. Faulkner soon purchased of the Canal Company the secondary water-privilege. He could draw water until it was "three-quarters of an inch below the top of the dam and flash-boards," when he must close his gates, under a penalty of one dollar for every half-hour they were left open. By his thrift, skill and enterprise Mr. Faulkner made his business very successful, and transmitted it to his sons. The firm-name is still J. R. Faulkner & Co., and his grandson, Mr. Richard Faulkner, is the agent now in charge of its business. From a modest beginning, with a single set of cards, the business has increased until the monthly pay-roll is about \$2500.

Charles P. Talbot came to Billerica in 1839 and was soon joined by his brother, Thomas, in laying the foundations of their extensive and successful enterprise. The dyewood-mill was their earliest undertaking, for which they hired a building of the Canal Company. In 1844 they bought the saw-mill of Nathaniel Stearns, on the northeast side, and used it for a dyewood business until it was burned, in 1853. They then sold this site to Mr. Faulkner, having purchased the prior and larger rights of the Canal Company on the other side of the stream. There they rebuilt the dyewood-mill, which is still in vigorous operation; and, in 1857, they built their woolen-mill.

This at first had eight sets of cards; six were added in 1870 and as many in 1880. Two hundred hands are now employed, and the monthly pay-roll is \$7000. In 1849 the Messrs. Talbot began their chemical works, which were at first in a building near the depot, but removed later to their present location, sixty rods farther east, by the railroad. These now employ sixteen hands, and produce a daily average of five tons oil of vitriol, one ton of blue vitriol and as much muriatic acid.

The next most important manufacturing enterprise was begun soon after 1830, in the south part of the town, by Jonathan Hill, Esq. Its specialty was, and still is, a useful machine for splitting leather, invented and patented by Samuel Parker. This machine has had a very wide sale in this and other countries, being almost indispensable in the manufacture of leather. The business was sold, in 1853, to Charles H. Hill, who continues it with much success. In 1875 the value of the work done was \$28,000.

In the east part of the town, where there had long been a saw-mill, on Content Brook, Theophilus Manning had also a grist-mill. He sold both, in 1825, to Dea. Aaron H. Patten, who began, in 1845, the manufacture of cabinet-work. The business grew to considerable proportions, and Pattenville became a definite local name in town. The business reached a value of \$20,000 to \$30,000 per year, and was continued by his sons; but, in the financial depression of 1874-78 it suffered, and the shops were sold, in 1879, to Walter J. Pettingell, who carried on business, making tanks, until the mill was burned, January, 1882.

Most recent is the growth of an extensive glue factory, which was commenced in 1867 by the Jaquith Brothers, near the old bridge of the Middlesex Turnpike. It has been quite prosperous, doing a business amounting to nearly \$15,000 annually. For many years the Winnings maintained a saw-mill on the brook running from Winning's Pond; and there has long been a saw-mill, now owned by Mr. John O. Richardson, on Content Brook, near the railroad station at East Billerica.

LIBRARIES.—Billerica instituted the first "Social Library" in 1772, one of the earliest in Massachusetts, and a second was incorporated in 1807.

But it had long been felt that the provision for the needs of the town in this respect was inadequate; and in 1880 the generous munificence of Mrs. Joshua Bennett laid the foundation for their better supply. A handsome building standing just north of the First Church, has been erected at her expense and deeded to the Bennett Public Library Association; and her daughters, Mrs. Holden and Mrs. Warren, have contributed \$2000 to its furnishing and the purchase of books. A fee of five dollars is received for membership, and twenty-five dollars constitutes a life member of the association; but the use of books, without other privilege, is granted for the annual payment of one

dollar. The building contains a library, with capacity for ten or twelve thousand volumes, which may be doubled by the use of alcoves; a reading-room, a committee room, and a handsome entrance hall and cloak-room. The reading-room is ornamented with a wide fireplace and beautiful mantel of unique design, contributed by William W. Warren, Esq., and the front of the building is enriched by a fine rose-window, the gift of Mr. Joshua Holden, Mr. William H. Osborn, of New York, also gave the lot on which the library stands. The town owes much to Mrs. Bennett and her family for this timely and good foundation. It must exert a stimulating influence, and give a most generous culture to the coming generations who shall enjoy its privileges; and will contribute much to the prosperity and attractiveness of the town.

A similar service has been rendered at North Billerica by the Messrs. Talbot; although the library which they have founded is intended primarily for their own employees, and its management is in their hands; but its use for a small fee is open to all. They erected, in 1880, a building connected with their factory, the second story of which is devoted to the library and reading-room. It is supplied with more than a 1000 volumes, a number which will be increased and well used under the judicious care of the Talbot Library Association.

It is proper that record be made here of two historical incidents. In 1855 the town formally and fitly celebrated the two hundredth anniversary of its foundation. The Rev. Joseph Richardson, of Hingham, a loyal son of the town, gave a historical oration, which was published, with other proceedings of the day, in a valuable pamphlet. The celebration had no little influence in awakening and stimulating the interest in the early life of the town, which has found expression in its repeated later action.

A similar event was the celebration held, 1876, July 4th. The centennial year of the United States naturally awakened renewed interest in historical subjects and led to many local commemorations. The Rev. Elias Nason responded effectively to an invitation of citizens to give a historical oration in Billerica; and the day will be long remembered by those who shared in the festivities in the beautiful grove southeast of the middle bridge. This oration also, with other record of the day, has been published.

That the contributions of Billerica to the population of the country have been large and valuable, is suggested by the fact that all families bearing the names of Farmer, Jefts, Kidder, Kittredge, Pollard, Shed and Toothaker, whose lines in this country go back to 1700, find their American progenitors in Billerica. Not less numerous or important are the branches here found of the Crosby, Danforth, Farley, French, Frost, Hill, Manning, Parker, Patten, Richardson, Rogers, Stearns and Whiting families; while to enumerate the significant names of families simply

less numerous would be to repeat most of the names from the pages of the Genealogical Register. Any just presentation of this subject would develop facts of which the town might be proud. She has never been populous; but her sons and daughters abroad are many.

The list of Billerica graduates from colleges and professional schools is as follows:

David Abbot, H. C., 1794; Henry Blanchard, M.D., H. C., 1834; Andrew Bowers, H. C., 1779; Rev. Benjamin Bowers, H. C., 1733; Benjamin F. Bowers, M.D., Y. C., 1819; Rev. James Bowers, H. C., 1794; Josiah Bowers, M.D., Y. C., 1816; Josiah Bowers, M.D., Philadelphia, 1854; William Bowers, M.D., H. C., 1769; Rev. Thaddeus H. Brown, Y. C., 1860; Oliver Crosby, H. C., 1795; William Crosby, H. C., 1794; Henry Cunnings, H. C., 1795; George Faulkner, M.D., H. C., 1844; Joseph F. Hill, H. C., M.D., 1830; Henry B. Judkins, Law Department H. C.; Jonathan Kidder, H. C., 1751; Rev. Joseph Kidder, Y. C., 1794; James Lewis, D. C., 1807; Daniel Parker, B. C., M.D., 1833; Frederic A. Parker, M.D., H. C., 1813; Rev. Abel Patten, D. C., 1827; George H. Preston, H. C., 1846; Rev. Joseph Richardson, D. C., 1802; Artemas Rogers, H. C., 1809; Micajah Rogers, H. C., 1817; Rev. Thomas Skilton, H. C., 1806; Rev. Benjamin A. Spaulding, H. C., 1840; Rev. Joshua Stearns, H. C., 1751; Rev. Timothy Stearns, A. C., 1833; Augustus Whiting, H. C., 1816; Rev. John Whiting, H. C., 1685; Joseph Whiting, H. C., 1690.

The record of the legal profession in Billerica is brief: William Crosby, 1800, Samuel Dexter, Timothy Farnham, Joseph Locke, 1801-33, Marshall Preston, about 1820-49, George H. Whitman, 1849. Of course, in the absence of lawyers who were such by profession, other well-informed citizens have often been called to aid their neighbors in legal matters. So much of this service devolved upon some of them that practically it would be just to mention, in this connection, such names as Jonathan Danforth, Joseph Tomson, Oliver Whiting, Joshua Abbott, William Stickney.

PHYSICIANS.—Benjamin Atherton, 1739; Josiah Batchelder; Hezekiah Bickford, 1851-61; William Bowers, 1820; Thaddeus Brown, 1829; Frank E. Brady, 1864-66; Timothy Danforth, 1792; Joseph Foster, 1810; Samuel Frost, 1717; William Grey; Joseph F. Hill, 1849; J. W. Hood; Charles E. Hosmer, 1874-89; Zadok Howe, 1877; Wm. H. Hubbard, 1877; Isaac Hurd 1778- (?), in Concord, 1844; Jacob Kittredge, 1800-15; John Kittredge, 1714; John Kittredge, 1756; Rufus Kittredge; Albert C. Lane, 1879; — Manning; Augustus Mason, 1844-54, in Brighton, 1882; George A. Munroe, 1866-77; Daniel Parker, 1810-89; Roger Toothaker, 1745; Roger Toothaker, 1759; William Wilkins, 1789-1807.

The first post-office in Billerica was established October 7, 1797. The postmasters, with date of their appointment, have been:

Jonathan Bowers, October 7, 1797; William Richardson, May 26, 1824; Marshall Preston, January 11, 1826; John Baldwin, Jr., October 16, 1849; William H. Blanchard, June 11, 1855; William Blanchard, April 4, 1857; Benjamin L. Judkins, April 27, 1859; Charles H. Parker, May 8, 1862; Bernard M. Cann, September 21, 1866; Franklin Jaquith, Jr., July 15, 1867; Charles H. Parker, June 5, 1873.

North Billerica.—Joseph A. Burt, January 26, 1852; James Faulkner, July 26, 1855; James Whittemore, May 25, 1866; Hiram C. Brown, March 25, 1878.

East Billerica.—Peter B. Bobonan, December 21, 1877.

South Billerica.—George W. Hill, March 4, 1878; Mary E. A. Libby, December 13, 1878.

The population of the town at different periods is a subject of interest, but the material for estimates at first is scanty. In 1659 there were twenty-five families;

four years later the number had nearly doubled; but for the next twelve years there was small increase, except as children multiplied in the homes already formed. The tax-list for 1679 has only forty-seven names, but that for 1688 has seventy-three names, showing that a new impulse had followed the anxieties of Philip's War, and, in spite of the Indian perils of the time, the progress continued, and, in 1707, the number of polls was 140.¹

The tax-list for 1733 includes 228 names, but, in 1735, when Tewksbury had been taken out, the number was only 187, which, in 1755, had increased to 206. In 1765 a careful enumeration was made, showing for the first time the exact population, when this town had 1330. Only seven towns in Middlesex County then exceeded Billerica. In 1776 a census gave Billerica a population of 1500, and the tax-list for the same year contained 273 names. In 1778 there were 286 polls, but, in 1781, they had fallen to 271 polls, a decrease more than explained by the loss of the Carlisle names, in 1780. Assuming an equal number of polls and names on tax-list, and that the proportion of this number to the whole population in 1776 was the same in 1687, 1733 and 1755, we reach this estimate for the periods named, the decades after 1790 being supplied by the United States Census, and the years 1855, 1865 and 1875 by the State Census.

1688, 401; 1707, 769; 1733, 1252; 1735, 1028; 1755, 1132; 1765, 1332; 1776, 1500; 1790, 1191; 1800, 1383; 1810, 1289; 1820, 1380; 1830, 1368; 1849, 1632; 1850, 1646; 1855, 1772; 1860, 1776; 1865, 1808; 1870, 1833; 1875, 1881; 1880, 2000; 1885, 2161; 1890, 2369.

The fact is significant that after 1800 there was no increase for more than thirty years; and it seems to confirm the opinion that the Middlesex Canal, by preventing the use of the water-power, exerted an unfavorable influence upon the progress of this town. A similar result has followed the deflection of the railroad line so far from the centre of the town.

A census taken in 1754 brings out the curious fact that Massachusetts had 2717 slaves. Of this number Billerica had eight, of whom five were females. In 1880 the census reports nine colored persons; but they are not slaves.

Other details of the census are interesting, and a summary of them follows. The details of the census for 1890 are not yet available.

The 2000 inhabitants of the town in June, 1880, were grouped in 449 families, who lived in 436 houses. There were 1662 over ten years of age, of whom 46 could not read and 56 could not write; of the latter, 51 were foreigners. The nativity stands thus: Native born, 1552; foreign, 448; born in Massachusetts, 1237; New Hampshire, 133; Maine, 73; Vermont, 56; other States, 53; British America, 67; Ireland, 226; England, 118; Scotland, 20; other countries, 17.

This sketch may fitly conclude with

BILLERICA IN THE REBELLION.—Of the part which this town took in the War of 1812, and in the Mexican War, the town and State archives contain no record. Probably Billerica had soldiers in both, but the number was small, and the scenes of action were too remote to leave any distinct impression. Far otherwise was it in the great Secession contest. When the life of the nation was assailed by the Southern uprising, the people all felt the blow and the danger, and the towns asserted their vital relations to the conflict as they did in the Revolutionary contest, to the disturbance of British councils. No one who experienced it can ever forget the thrill of patriotic emotion which went through the North when Sumter was assailed and President Lincoln called for seventy-five thousand volunteers to defend the Union. Public meetings, enlistments, and aid societies and labors engrossed the public mind. In Billerica the town hall was thrown open, the church bell, aided by the drum and an old ship-gun, sounding the call to meetings for action and organization. John A. Burrows and Charles N. Fletcher were the first soldiers mustered from Billerica. The number increased rapidly. Richardson's Light Infantry, of Lowell, afterwards the Seventh Light Battery, and the first three years' company in the field from Massachusetts visited the town for a reception and a drill; as did a rifle company. Albert E. Farmer, who was taken prisoner at Bull Run and died in Richmond, was the first soldier from Billerica to fall. In 1862, after the defeat of McClellan, the call for troops was responded to by a town-meeting and the offer of a bounty for enlistments. They were easily obtained, and the town's quota was mustered into the Thirty-third Regiment. An interesting meeting was held in the town hall the night before their departure. A call for nine months' men followed, and after the supposed quota had been filled it was found that more men were needed, and town-meetings and bounties were again called into requisition. In the summer of 1863 came the first draft, with but small results from this town. In the autumn efforts for volunteers were renewed, and a considerable number of veterans, whose three years' term would expire in 1864, re-enlisted "for the war." These brave men, who after so long and severe a term of service were ready to rededicate themselves to the great work, should be held in especial honor, and their names can be traced in the list below. In the summer of 1864 came a second draft quite as meagre in results as the first, for only two men from Billerica were accepted. Other calls were filled by such volunteers as could be secured in town or beyond, and large bounties were paid. The town was represented in army and navy by 173 men, whose names are recorded in the "History of Billerica."

The news of victory and peace filled the land with joy in the spring of 1865, and though a deep shadow followed with the assassination of the beloved Lincoln, the substantial fruits remained. The returning

¹ Collections: American Statistical Association, pp. 146, 150, etc.

veterans were welcomed on the Fourth of July at a picnic in the grove by Concord River, near the middle bridge. The exercises were hearty and impressive, including an address of welcome by Dr. Frank E. Bundy. In farther testimony to the valor of her soldiers and the memory of her dead, the town has erected an appropriate monument. It stands upon the Common, a shaft of white granite, six feet square at the base and twenty-five feet high. The shaft is crowned with the figure of a soldier, in easy position, with musket at rest. In raised letters are inscribed the names "Petersburg," "Gettysburg," "Newbern," "Lookout Mountain," "Bull Run," "Chancellorsville," "Baton Rouge" and "Cedar Mountain." A carved eagle surmounts a shield, and upon the pedestal is the inscription: "Billerica to her heroes, in grateful recognition of that steadfastness of purpose, devotion to principle, loyalty to country, and trust in God, which enabled men to die for Liberty and Union." On the east and west sides are the names of twenty dead soldiers:

"Edward A. Adams, Dennis Buckley, William S. Collins, James F. Edmonds, Albert E. Farmer, Charles N. Fletcher, George C. Gilman, Reuben J. Gilman, Franklin Hanaford, William Hayes, Edwin W. Huse, Ward Locke, Thomas H. Maxwell, Stephen H. Parker, Asa John Patten, Joseph F. Richardson, Charles A. Saunders, James Shields, Pollard R. Shumway, John C. Stewart."

Four other names would properly have been inscribed with their comrades' upon the monument. It is due to them that they be honorably mentioned here:

Hiram E. Davis, Henry Newbury, Edward H. Persons, Calvin G. Tuttle.

The monument was dedicated with appropriate ceremonies and in the presence of a vast assemblage, Wednesday, 8th October, 1873. Hon. Thomas Talbot presided; the prayer of dedication was offered by Rev. Mr. Hussey, and an oration given by Col. Russel H. Conwell, of Boston. Governor Washburn, Hon. E. R. Hoar, of Concord, ex-Gov. Onslow Stearns, of New Hampshire, a son of Billerica, and others participated in the exercises, which were held in a mammoth tent south of the monument.

The "History of Billerica" records the names of 173 soldiers and sailors who represented the patriotism and sacrifices of the town in this great contest for our national life.

BIOGRAPHICAL.

GOV. THOMAS TALBOT.

Thomas Talbot was born in Cambridge, Washington County, New York, Sept. 7, 1818. He was a lineal descendant of John Talbot, first Earl of Shrewsbury. His grandfather came from Ireland to America in 1807. His father, who was a practical woolen manufacturer, died when the son was only four years of age, leaving a family of eight children. In 1825 the

family removed to Northampton, Mass., where Thomas, at the age of twelve years, found employment in a woolen factory. At the age of seventeen years he became an employee in the broadcloth factory of his elder brother, Charles, in Williamsburg, Mass., and after a service of three years he was made an overseer in the establishment. It was while employed in the latter position that for two winters he attended the academy in Cummington, Mass. At the age of twenty-two years (in 1840) he entered into a partnership with his brother Charles in the dye-wood business in North Billerica, where he resided during the remainder of his life.

So rapid and so remarkable was the success which crowned their first enterprise that the firm, from time to time, greatly extended their operations. They became very largely engaged in the manufacture of woolen fabrics, and also of oil of vitriol and other chemicals used in the arts.

These various enterprises, conducted with the energy and skill which distinguished the men, brought them an ample fortune. Few manufactories in the State have been managed with so much ability, or have met with so great success, or have gained for their owners so honorable a name.

The flowage of the meadows along the Concord River, deemed by the owners to have been caused by the dam belonging to this firm, brought on a long and bitter contest before the Legislature of the State. In this protracted and perplexing altercation, in which the firm were the victors, Thomas Talbot displayed a mental power, a firmness and manliness of character and a knowledge of men and of business, which gave him a high reputation and laid the foundation of his subsequent political advancement. From this time he took rank among the foremost men of the State. Political honors came to him. He was repeatedly elected to the State Legislature. From 1864 to 1869 he was a member of the Governor's Council. In 1873 and 1874 he was Lieutenant-Governor of the State. In the latter year, Gov. Washburne having been elected United States Senator, Mr. Talbot became Governor of Massachusetts.

Governor Talbot was a firm supporter of the prohibitory liquor law of the State, and his veto of the legislative act repealing that law cost him the loss of many of his political supporters. On account of this veto and other similar acts of independence, he failed of re-election in the following year. But in 1878 popular favor returned and he was chosen Governor of the State by a large majority. After one year of highly honorable service he refused to accept further political honors.

But though Governor Talbot filled the chair of political office with dignity and grace, it was not in public life that the true nobleness of his character found its highest exhibition. It was as a high-minded man of business, as the liberal patron of enterprises of benevolence, as the benefactor of his

Amundson

town, as the generous friend of the poor and unfortunate, that his character shone most brightly. His treatment of the numerous workmen in his employ is above all praise. He took delight in making them happy. He paid them the highest rate of wages. He built for them convenient tenements, each with its garden for vegetables and flowers, and demanded for them only the lowest rent. Though not a Catholic, he generously aided the Catholics in his employ in securing a house of worship. He was so charitable as to believe that any Christian church was a blessing to the community. Though not a Baptist, he, at his own expense, erected for the small Baptist society of the village a very tasteful and commodious church. Though himself a Unitarian, he found in his generous heart a place for every Christian man.

There is something very touching and tender in the love with which the employees and neighbors of Governor Talbot cherish his memory. He has left a very honorable name on the roll of the statesmen of Massachusetts, but a far more precious record in the hearts of his fellow-men.

While in the enjoyment of vigorous health, having before him a fair prospect of a prolonged life and a cheerful old age, he was suddenly arrested by a painful disease, of which he died on October 6, 1885, at the age of sixty-seven years.

JOSHUA BENNETT.

Joshua Bennett was born in Billerica, Mass., Nov. 27, 1792, and was the son of James Bennett, a prosperous and respectable farmer of that town. He passed his boyhood upon his father's farm, obtaining his education in the common schools of the town and in the academy at Westford, Mass. When about twenty-four years of age he engaged in teaching a grammar school in Dorchester, Mass. Although always fond of books, he relinquished the work of teaching at the end of three years, and entered upon a business career in which few men have shown equal sagacity and few have met with equal success. Even while a teacher he devoted his evenings to trade.

As the leading partner of the firm of Bennett & Felton, in Boston, he early laid the foundations of his future success and fortune. His active mind found many sources of wealth. He became a very extensive dealer in hops, a business in which his father had preceded him. He had transactions with most of the hop-growers and brewers of the country. He became an exporter of hops and a distiller. It is told of him, as an interesting incident, that in 1849, being in London at a time when the hop trade was depressed, he actually purchased a large lot of hops which he had himself exported, and sent them back to America, thus making two profits upon the same goods.

It was by the skillful use of the property early acquired in trade, that Mr. Bennett amassed most of

his ample fortune. He was a very shrewd and a very successful dealer in real estate, making his investments with distinguished sagacity. He became the possessor of a large amount of property in the city of Lowell, and of a much larger in Boston.

Mr. Bennett was not a politician, and he only accepted those offices which his compeers in the business world bestowed upon him on account of his acknowledged ability to fill them with honor and success. He was a director of the Providence and Worcester Railroad, and was on the first board of directors of the Old Lowell Bank, the earliest of the discount banks of Lowell, having received its charter in 1828. This board consisted of men of high character, among whom were Kirk Boott and Samuel Batchelder, two of the most distinguished founders of American manufactures, and Josiah B. French and Nathaniel Wright, both of whom subsequently became mayors of the city. After a service of thirty-three years as director, Mr. Bennett was, in 1861, elected president of the bank. This office he filled with great ability through the entire period of the Civil War, resigning it on account of failing health, only a few months before his death. As a bank officer he was conservative and sagacious, and was esteemed the highest authority upon the question of investing the funds of the institution. An excellent portrait of Mr. Bennett, the gift of his grandson and namesake, Joshua Bennett Holden, Esq., of Boston, adorns the directors' room of this bank.

As a citizen Mr. Bennett gained his highest honor by his patriotic conduct in the early days of the Rebellion. When others faltered and held back he stepped boldly forward. Not only did he proffer to his country his own wealth, but he exerted his great influence as a financier to bring to the rescue the monied institutions with which he was connected. He had full faith in his country, and freely intrusted to her his wealth. It was the noble conduct of men like him who, in that hour of peril and alarm, inspired new hope and courage in the national heart. Throughout the war his patriotism never faltered. To every soldier who enlisted from his native town of Billerica he gave, from his own wealth, a special bounty.

Mr. Bennett resided in Boston in his early business life, but in his later years his favorite residence was upon his farm in Billerica. Notwithstanding his intense and life-long devotion to business he was wont to take due time for national recreation, having made one visit to Europe and being accustomed to spend several weeks of each summer at Saratoga and Sharon Springs. In the culture of his farm of fifty acres he also took a special pleasure.

In his will he gave \$25,000 to the Washingtonian Home in Boston, an institution in which he was greatly interested. He also gave \$3000 to each church of the various denominations in the town of Billerica, as well as small legacies to their respective pastors.

It is greatly to the credit of his heirs that, though this will was not signed, all the legacies for benevolent purposes were honorably paid in accordance with the known wishes of the testator.

On October 8, 1815, Mr. Bennett married Eleanor, daughter of Ebenezer Richardson, of Billerica. She still survives him at the great age of ninety-six years. Of his two children, Ellen, the older, became the wife of George Holden, Esq., of Boston, and Rebecca became the wife of William Wilkins Warren, Esq., of Boston. The widow of Mr. Bennett, in honor of her husband, has given a library to the town of Billerica, erecting for it a substantial brick edifice.

Mr. Bennett died August 6, 1865, in the seventy-third year of his age, and was buried at Mt. Auburn.

ALEXANDER COCHRANE.

Alexander Cochrane was born in Neilston Parish, Renfrewshire, Scotland, August 11, 1813, and died at Swampscott, Mass., August 11, 1865. He was the son of John Cochrane and Isabella Ramsey, of Glanderston House, and grandson of Hugh Cochrane and Bethia Douglas, daughter of Francis Douglas and Elizabeth Aucterlonie, of Inch Abbot. His family had been long settled in this country, and Crawford states in his "Description of the Shire of Renfrew," Edinburgh, 1710, that the name is of great antiquity in this shire. They had been among the earliest to engage in manufacturing in its infancy in this part of Scotland during the latter half of the last century, and it is stated by Taylor, in his "Levern Delineated," Glasgow, 1831, that Bailie Cochrane, owner of part of the lands of Ferguslie, and great-grandfather of the subject of our sketch, had built a flax or linen-mill called Fereneze, on the River Levern, in 1798. The name of this worthy Bailie appears on the fine monument in Paisley to the memory of the Covenanters, erected during his magistracy. About the same time, 1798, Hugh Cochrane, son of the latter, built Glanderston Bleachery, and planted additional trees about the house, and his son John, the father of Alexander, continued the business and died there in 1832.

Alexander lived with his mother and the family in Glanderston House until the failure of his elder brother, Robert, necessitated their giving up the place. There is a print of this ancient mansion in the "Levern Delineated" and it illustrates the tenacity of custom and the resistance to change even in modern Scotland, that although long in ruins, this house still carries with it the right to occupy one of the two cushioned pews which are permitted in Neilston Church.

Thrown upon his own resources for support, he, in company with one of his brothers, essayed the new process of making starch from potatoes, but this created great alarm and disturbance among the peasantry and poor people, who feared an advance in the price of one of their chief articles of food, and this

feeling resulted in an attack on and partial destruction of the works by a mob. With our ideas of to-day an occurrence of this kind seems to belong in the Middle Ages, but it only serves to show the rapid strides we have made since these beginnings of modern manufacture; the old has passed and the new has come, in hardly more than a short hundred years. He had opportunity to observe, and, it is apparent, early took an interest in such chemical changes as took place in his father's works, and it is related that the ancestor of the since famous Tennant family here made some of his early experiments with bleaching chemicals. He took advantage of all this to enlarge his knowledge of chemistry, then just coming forward as one of the most useful of the sciences, and he more especially investigated its practical application in the manufacture and decoration of textile fabrics. He subsequently mastered processes for making Muric acid, Nitric and Sulphuric acids, Aqua Ammonia, Sulphate of Copper, Extract of Indigo, Gum Substitutes, and learned the secret of making and using various mordants. Some of the information collected at this time and still extant among his papers is more curious than useful. Empirical and rule of thumb methods still had a firm hold, and the element of secrecy still lingered in chemical processes, allying them to Alchemy, their predecessor.

Amusing stories are told of the devices resorted to in getting knowledge of one work from another, much of which would excite only smiles of compassion from the well-instructed student of to-day.

He was in the neighborhood of Manchester, England, in 1846-47, in charge of a branch of textile fabrics, but while there still kept up his interest in and added to his knowledge of chemistry.

He was engaged to come from there to the United States to take charge of a similar industry, and arrived in New York September 27, 1847. He remained in charge of this work for rather more than a year, when he finally got an opportunity to put into practice what he had been so long preparing for. April 1, 1849, he entered into business with C. P. Talbot & Co., of which firm the late Governor Thomas Talbot was the junior partner. They wished to add chemicals to their manufacture of dye-stuffs, in North Billerica. He was to plan and build a chemical works, and take the conducting and management of manufacturing the chemical products, and for this he was to receive one-third of the net profits. He was in Billerica more than half the portion of his life spent in this country, and he entered fully into the life of the New England village, half farming, half manufacturing, in which his lot was cast. He assisted in the schools and in the church; being Scotch, he naturally took an interest in the religious life of the community, and although, like all his family, he belonged to the Church of Scotland, he here found himself acting with the sect that would best harmonize the somewhat scattered elements; the minister filling at

Abi Cochrane

times the double rôle of schoolmaster during the week and preacher on Sunday. His relations with his workmen were of the most friendly character even for those days of close contact between employer and employed, when he who gave the opportunity of work was looked upon for that very reason as the friend of the workman, and as a manifestation of interest which they valued more than money, he gave an entertainment for them once a year in his own house. He kept up his connection with Europe by correspondence and by occasional visits, which in those days were still an event, and when he landed from those early side-wheel Cunarders, the "Canada," "Asia" or "Africa," it was subject for congratulation no longer thought of in these days when the Atlantic has become a ferry. The relations with the Messrs. Talbot while he was with them were mutually satisfactory, and it does them both credit that their personal regard stood the strain unusually well when he afterward became their active competitor; as an evidence of this Governor Talbot offered one of his family a position of high trust on one of the State boards, which for personal reasons was declined.

During his residence in Billerica the business of manufacturing a general line of chemicals gradually increased, and the articles produced early obtained the highest rank for standard quality, including Muriatic, Nitric and other acids, Sulphate of Copper, Extract of Indigo, Aqua Ammonia and many other articles. When the Roxbury Chemical Works, whose tall chimney was so long a landmark in that part of Boston, gave up business, there was more room for competition, and in 1859 Mr. Cochrane erected works in Malden and began business for himself and laid the foundation for the business subsequently carried on by the corporation which bears his name. His business grew very slowly, as his products were largely the same as were already produced, but without going into the details of the hard work involved in building up a business, which is so much alike in general characteristics in all fields of enterprise and effort, suffice it to say that all these difficulties had been surmounted, and the business, which has since become the largest of its kind in New England, was successfully established before his death at the age of fifty-two, at Swampscott, where he was spending the summer with his family. An account of the events of a man's life is incomplete without some hint as to the personality that marked him. Mr. Cochrane was tall, of fine presence, unassuming in manner, and in character was simple, sincere and kindly, winning and retaining affection and esteem. His generosity was proverbial and laid him open to imposition on this side of his character.

Although genial in feeling, he always preserved a touch of austerity that did not invite undue familiarity, and was an inheritance of his early training in the atmosphere of the Kirk; as an instance of which he used to recall the line of children who, on Sunday,

walked from the house to Neilston Church under his father's eye, who always brought up the rear that no youthful escapades should interrupt the solemnity of the day. With no reading allowed on that day but the Bible and a few other books of religious character, it gives point to the observation that the Scotchman is the New Englander of Europe.

His life, like so many other lives, was spent in the day of small things, in sowing seed for others to reap; and the parable of the sower was selected as best illustrating his life, when his family placed a window to his memory in Trinity Church. In a somewhat trying battle with fortune both in the Old World and in the New, he did what his hands found to do with true Scotch courage and perseverance.

CHAPTER XXXV.

TYNGSBOROUGH.

BY CHARLES C. CHASE.

TYNGSBOROUGH is a small agricultural town, having for its northern boundary the State of New Hampshire, and upon the other sides the towns of Dracut, Chelmsford, Westford, Groton and Dunstable, and the city of Lowell. It is pleasantly situated on both sides of the Merrimack, and presents to the traveler, as he passes along the winding banks of the stream, an attractive panorama of rural beauty. The fertile soil, the well-tilled fields, the many signs of thrift and enterprise which meet his view, add to the natural charms of the scene, while the graceful iron bridge which spans the Merrimack completes a picture of no ordinary loveliness. The placid scene, however, which meets the eye in these latter days of peace and abounding prosperity, was, during the long years of Indian warfare, the theatre of many an act of bloodshed and cruelty, of dwellings from which the inmates have fled in terror, of households clothed in sackcloth for a father or a brother slain. When we add to these historic memories the fact that this rural town has been honored as the birthplace of many distinguished men of our country, its history becomes one of peculiar interest.

Its territory claims our attention. As the St. Lawrence is the outlet of a chain of magnificent lakes, so, in primeval ages, as geologists aver, the Merrimack bore to the ocean the waters of a series of lakes, only a few of which, like Lake Winnipiseogee, any longer remain. By some convulsion of the titanic forces of nature their barriers have been burst and their basins are now the fertile meadows which lie along the stream. One of these primeval lakes, in whose basin were the fruitful fields of Tyngsborough, found its outlet at Pawtucket Falls. Perhaps the same convulsion which rent asunder the barriers of

the lake also changed the course of the river; for geologists find clear indications that the Merrimack, after passing the towns of Tyngsborough and Chelmsford, instead of deflecting toward the east, as it now does, and reaching the ocean at Newburyport, continued to pursue its direct southerly course, and had its mouth at the harbor of the city of Lynn.

To what extent this town, before it was settled by civilized man, was the abode of the American Indian, it is impossible to tell. The nomadic character of those children of the forest, the facility with which they changed their frail and humble wigwams, the brief period which sufficed to obliterate every trace of their former habitation, and the utter absence of all written records, render it almost impossible to identify the place of their abode. And yet we are not wholly without testimony; for in certain places along the banks of the Merrimack, the rude implements of the Indians, their arrow-heads and gouges and tomahawks, found buried in the earth, often mark the spots which they most frequented. Such buried implements have, in greater numbers, been found near the Pawtucket Falls in Lowell, as well as upon Wicasuck Island, which is a part of the town of Tyngsborough. This island of sixty-five acres seems to have been a favorite possession of the red men; and it is a fact of sad and peculiar interest that it was the last abode in New England of the Pawtucket tribe, which had once occupied so conspicuous a position, and to which the apostle Eliot had once preached the Gospel on the Merrimack. From this island in the town of Tyngsborough the feeble remnant of the tribe, probably less than sixty in number, mostly women and children, took their sad journey to the north, and mingling with the St. Francis tribe, lost their honor and their name forever. Several years earlier Wanalancet, the powerless and disheartened chief, had gone before them. A few Indians, however, perhaps fifty in number, dispersed in various places among the white settlers, still lingered in New England.

Two causes served to make Wicasuck Island the favorite abode of the Indians. Here were the Wicasuck Falls in the Merrimack, at the foot of which the Indians found fish in abundance for their sustenance, and their crops of corn upon the island were safe from the inroads of bears and deer, being surrounded by the river.

It is an impressive proof of the humiliation of Wanalancet that about twenty years after his departure to Canada he wandered back once more to the spot where he once ruled as chief, and for two years, 1696 and 1697, lived in a condition not differing much from that of a public pauper. The General Court paid twenty pounds to Colonel Jonathan Tyng for "keeping him."

The record of the Pawtucket tribe, which for many years had mingled with the early settlers in the towns which lie along the Merrimack, is not without historic interest. The Pawtuckets embrace several other

subordinate tribes, having their headquarters far asunder—the Nashaways, in the fertile meadows of the town of Lancaster; the Nashobas, in the forests of Littleton; the Pennacooks, on the rich, alluvial soil of Concord, N. H.; the Naticooks, near the junction of the Souhegan River with the Merrimack, a few miles north of the town of Nashua, and the Wameaits around the Falls of the Concord, in Lowell; while the controlling tribe, the Pawtuckets, had their rendezvous near the Pawtucket Falls in the Merrimack, also within the precincts of Lowell. At this rendezvous were held the great councils of the tribe. Here every year they gathered to supply themselves with their annual quota of fish, and here, too, once a year, the devout apostle Eliot, of Roxbury, "spread the net of the gospel to fish for their souls."

So large is the space in history which this tribe has filled that one is surprised to learn upon investigation how very small was their number. The Pawtuckets, with all their subordinate tribes, numbered only about one thousand souls, a number which appears truly insignificant when we reflect that it equals only one-seventieth part of the present population of Lowell.

The mystery which hangs about the origin and early history of the American Indians, their wild, nomadic life, their humiliating retreat before the advancing hosts of civilized men, and the cruel wrongs which they have too often suffered, have aroused the sympathies of mankind and have been a fruitful theme of poetry and song. But this kindly sympathy has been too often undeserved. The Pawtuckets were an indolent and stolid people. They were very poor husbandmen; they were very poor Christians. The devout Eliot could never form among them a Christian church. The Bible translated by him in the Indian dialect with infinite labor, has had, for generations, probably not a solitary reader. They have left not a single monument, unless the rude implements exhumed from the soil and the few remaining indications of the ditch which once separated the village of the Indians at Pawtucket Falls from the possessions of the English settlers, may deserve the name of monuments.

The aversion of the American Indian to the arts and manners of civilized life, is one of the most remarkable phenomena in the history of the human race. The Caucasian presses forward with eager zeal to reach a higher plane of living, in which his intellect may be cultivated, his manners refined, and the comforts of home enjoyed; but the Indian has not only shown to all these blessings a stolid indifference, but has even rejected the proffered boon when presented by the hand of benevolence.

The Indians of the United States at the present time about equal in number the inhabitants of the single city of Boston. The country, with generous hand, has lavished upon them millions of money, and secured to them the possession of immense tracts of

laud. In an official report by the late General Sheridan, they are pronounced the richest people, *per capita*, in the Nation; faithful missionaries have been sent among them; poets have sung their praise; sentimental writers innumerable have proclaimed their wrongs and cursed the heartlessness of American statesmen, and yet a United States Senator, an advocate of the Indian's cause, has confessed that if farms should be allotted to the Indians in severalty, they are not yet sufficiently enlightened to cultivate them and maintain themselves without further aid. Another member of Congress, also an ardent friend of the Indian, recently, upon exhibiting at one of his lectures, some photographs of Indians taken on his visit among them, remarked to his audience that this method of looking at an Indian was far preferable to seeing him face to face, because the beholder was thus saved from the intolerable odor of the living specimen. Such is the American Indian after a contact with civilization of more than 200 years.

Doubtless the fertile lands of Tyngsborough, like those of other towns along the Merrimack, had from remote ages in the past been subject to the rude tillage of the Indian. What that tillage was history affords abundant testimony. I will quote here a brief extract from the writings of Jacques Cartier, who sailed up the St. Lawrence in 1535, as given by Hakluyt: "They digge their grounds with certaine peeces of wood as bigge as a halfe a sword, on which ground groweth their corn, which they call 'offici.' It is as bigge as our small peason (peas). They have also great store of Muskemillions, pompions, Gourds, cucumbers, Peason and Beanes of every colour, yet differing from ours." We are told by Cartier, in speaking of the tobacco-plant, that "they fill their bodies full of smoke till it cometh out of their mouth and nostrils, even as out of the Tonnell of a chimney. We ourselues have tried the same smoke, and having put it in our mouths it seemed almost as hot as pepper." Roger Williams also tells us that the Indians cultivated a vegetable called "Askutasquash." From this we derive (for short) the name of the squash. The vegetables cultivated by the Indians appear to have been of diminutive size, the seeds of some of which were brought, in a manner unknown to history, from southern climes.

But the earliest civilized settlers on the banks of the Merrimack belonged to the sturdy class of men brought to America by that remarkable movement of the English people in the early part of the reign of Charles I., known in history as the "Puritan Migration." Of this great enterprise John Winthrop, the first Governor of the Colony of Massachusetts Bay, was the truest and noblest exponent. To understand the character of the earliest settlers of Tyngsborough, it is important, first, to learn the principles which governed and the spirit which moved this remarkable movement of the English people. Before this migration two Colonies had been planted in America by

the English people. The first Colony, planted at Jamestown in 1607, consisted to a very large extent, of enthusiasts misguided by visions of untold wealth, of "broken men" who hoped to retrieve their fortunes, and of adventurers, who loved the excitement of this novel and untried enterprise. Religion was scarcely one of the impelling motives. Adventure was the most potent factor. To command success something better was required. To bear the inevitable hardships of this new life in the wilderness there were needed a firm religious faith, and an intelligent and heroic devotion to some great and sacred cause. These were wanting at Jamestown, and the enterprise failed.

The colony planted by the "Pilgrims of Plymouth," in 1620, possessed precisely what that at Jamestown wanted—a sublime, religious faith and a courage and self-denial which do eternal honor to the human race. But they did not come to colonize America. Their purpose and aim were almost purely religious. They came not with the aggressive spirit of those who dream of empire and renown. They sought a home for their faith, a refuge from persecution, a place to worship God. They were an isolated sect, Brownists or Separatists, not Puritans. Their object was a noble object, and it was nobly attained; but compared with the great Puritan migration of which we shall now speak, the Plymouth Colony was but a small factor in the settlement of the towns of the New England States.

The Puritan migration had its origin in the dissatisfaction and disgust of the middle class of Englishmen with the government of the Stuarts, and the corruption both in church and state which pervaded the kingdom. After the long and brilliant reign of Queen Elizabeth, the English people were not elated at the accession of James the First. It wounded their pride, that a pedantic Scotchman should fill the throne of their glorious Queen. His first appearance in London disgusted his new subjects.

The author of "The History of the English People," says of him: "His big head, his slobbering tongue, his quilted clothes, his rickety legs stood out in as grotesque a contrast with all that men recalled of Henry or Elizabeth, as his gabble and rodomontade, his want of personal dignity, his buffoonery, his coarseness of speech, his pedantry, his personal cowardice." King James and the English people never understood each other. The King had his merits, but the people could not see them; the people had their rights, but the King never acknowledged them. The King demanded higher prerogatives, the people demanded greater liberties. As time passed on the breach grew wider. The twenty-three years of his reign were years of comparative peace, but "the King occupied them industriously in rendering monarchy odious and contemptible." The King impoverished his exchequer to enrich his parasites and degrade the prerogatives of the Crown by the sale of titles. The ac-

cession of his son, as Charles the First, did not restore to the Crown the love or confidence of the people. There sprang up on every side among the men of the middle class, especially among the Puritans, a profound conviction that merit and worth were no longer rewarded in England. This sentiment pervaded the minds not alone of the poor men and artisans, but of the professional classes, "men of large landed estate, zealous clergymen, shrewd London lawyers, and young scholars from Oxford."

The leader of this great enterprise was John Winthrop, a man of whom it has been said: "He had more influence probably than any other man in forming the political institutions of the Northern States of America." He was born in Groton, Suffolk County, England, and was bred to the law. When only eighteen years of age he was commissioned justice of the peace. On account of the excellence and piety of his character he was elected Governor of the Company of Massachusetts Bay. This office he held by annual re-election for nineteen years. He died in Boston, in 1649, at the age of sixty-one years. His home was on Washington Street, in Boston, near the site of the Old South Church. The excellence and greatness of his character have been honored by the people of Boston, who have placed his statue in one of the public squares of the city.

Governor Winthrop was a man of no ordinary literary attainments. His numerous writings, still preserved, give us a clear insight into the motives which led to the great Puritan Emigration. A few extracts will suffice: "It will be a service to the church of great consequence to carry the Gospell into those parts of the world, to helpe on the cumminge of the fullnesse of the Gentiles." "This land [England] grows weary of its Inhabitants, soe as man, who is the most pretious of all creatures, is here more vile and base then the earth we treade upon, and of less prise among us then an horse or a sheepe." "We are grown to that height of Intemperance in all excesse of Riott, as noe man's estate almost will suffice to keepe saile with his equals; and he whoe failes herein must live in scorne and contempt." "Men straine at Knatts and swallowe camells, use all severity for mainetaynance of cappes and other accomplyments, but suffer all ruffianlike fashions and disorder in manners to passe uncontrolled."

Soon after his election in 1630, Governor Winthrop came to America with 800 colonists. A company of 200 had gone before, and before the close of the first year of his Governorship another company of 700 followed him. These colonists all landed at Salem. During the first eleven years of this emigration 200 emigrant ships had crossed the Atlantic, bringing with them 20,000 Englishmen, very many of whom were men of devout religious character, inspired with a high purpose of founding in America institutions free from the corruptions which had impelled them to leave the land of their birth.

Of these 20,000 colonists a very large portion settled in Charlestown and Boston. Boston soon became the residence of the Governor and the seat of government. It had its name from the English Boston (St. Bodolph's town), from which many of the colonists had come. Among the settlers in Boston there were men of wealth and enterprise. The rapidly increasing colony spread out into the neighboring country. Especially were the fertile meadows that lay along the rivers sought for new plantations. Haverhill was planted on the Merrimack, and the lands lying farther up the stream were eagerly sought for settlement. And at this point the history of the settlement of the town of Tyngsborough claims our attention.

In performing my task I am greatly aided by the valuable histories of the town of Dunstable by Charles J. Fox, Esq., and the Rev. Elias Nason, and by the article upon Tyngsborough written by Mr. Nason for Drake's "History of Middlesex County." I also am especially indebted to the Hon. William A. Richardson, chief justice of the Court of Claims at Washington, a native of Tyngsborough, who has generously put into my hands very valuable documents pertaining to the history of the town.

In August, 1652, the valley of the Merrimack, as far north as the outlet of Lake Winnipiseogee, was surveyed by Captain Simon Willard and Captain Edward Johnson. This survey was made by the order of the General Assembly of Massachusetts to determine the northern boundary of that Colony. The report of this survey brought to public notice a knowledge of the rich alluvial lands in the valleys of the Merrimack and Nashua Rivers. The Indians had already cultivated fields all along these valleys, and thus had invited the more enterprising white man to "go up also and possess the land." It was a time of peace between the two races, and no fear of hostile foes deterred the English settlers from pressing northward. In 1655 grants of land were made by the government of Massachusetts Bay to those who belonged to the exploring expedition of Willard and Johnson. In the next year a large tract including the greater part of the town of Litchfield, New Hampshire, was granted to William Brenton, which was known as Brenton's farm. Other grants rapidly followed, among which were large grants on the Souhegan River, the meadows in Amherst, New Hampshire, 500 acres to Captain William Davis, of Boston, and Captain Isaac Johnson, of Roxbury; 500 acres to Mrs. Anna Lane, 1000 acres in 1659 to Captain Thomas Savage; Captain Francis Norton, William Hudson and Jeremiah Houston, to each 250 acres; 300 acres to John Wilson, of Boston; 1000 acres on the Souhegan in Milford, to the town of Charlestown, Massachusetts, for a school farm; 500 acres "adjoining thereto" to Mrs. Anna Cole, and 400 acres, embracing a part of the village of Nashua, to John Whiting. In 1662, 500 acres in Litchfield

were granted to the town of Billerica for a school farm, and 300 acres adjoining to Phineas Pratt and others "for straights and hardships endured by them in planting at Plymouth of which he was one." Four hundred acres in the town of Pelham were granted to Governor Endicott. A large tract of land in Hudson and Pelham was granted to Henry Kimball, known afterwards as "Henry Kimball's Farm." Samuel Scarlet also had a farm on the north side of Merrimack River, perhaps in Tyngsborough.

In 1673 a tract of 1000 acres in Nashville was granted to "The Ancient and Honorable Artillery Company of Boston," embracing the village of Nashville and known as the "Artillery Farm," the little pond in it being since known as "Artillery Pond." As early as 1673 various individuals had received grants of 14,000 acres on both sides of the Merrimack and lying north of Chelmsford. These latter grants must have included a large part of the town of Tyngsborough.

So many separate and independent grants had now been made that it became evident that the common welfare demanded that they should be consolidated into a single plantation, thus securing to them all the advantages of mutual interest and reciprocal aid. To secure this end the proprietors of these grants and others who proposed to settle on adjacent lands, in 1673 addressed a petition to the General Assembly of Massachusetts, the closing clause of which and the names of the subscribers are here transcribed :

"Your Petitioners therefore humbly request the favour of the Honorable Court that they will please to grant the said tract of land to your Petitioners and to such as will join with them in the settlement of the lands here mentioned, so that those who have improved their farms there and others who speedily intend to do the same, may be in a way for the support of the public ordinances of God, for without which the greatest part of the year they will be deprived of, the farms lying so far remote from any towns; and further that the Honorable Court will please grant the like immunities to this plantation, as they in their favours have formerly granted to other new Plantations:—So shall your Petitioners be ever engaged to pray :

Thomas Brattle,	Thomas Edwards,
Jonathan Tyng,	Thomas Wheeler, Sen.
Joseph Wheeler,	Peter Bulkley,
James Parkerson,	Joseph Parker,
Robert Gibbs,	John Morse, Sen.
John Turner,	Samuel Combs,
Sampson Sheafe,	James Parker, Jr.,
Samuel Scarlet,	John Parker,
William Lakin,	Josiah Parker,
Abraham Parker,	Nathaniel Blood,
James Knapp,	Robert Parris,
Robert Proctor,	John Jolliffe,
Simon Willard, Jr.,	Zachariah Long."

A charter was granted containing in substance the following conditions: that a minister should be procured within three years; that there should be twenty or more actual settlers, who should build houses capable of defence, at least eighteen feet square; that the owners should live on and improve their lands, and that a meeting-house should be erected.

The closing clauses of the charter, which are not without obscurity, are these: "The court judgeth it meet to grant their request, provided a farme of 500

acres of up land and medow be laid out of this tract for the country's use, and that they shall in settling the plantation endeavor so to finish it once within three years, and procure an able and orthodox minister amongst them."

A large tract of land thus granted contained about 200 square miles, or 128,000 acres. The villages of Nashua and Nashville, N. H., are near the centre of the plantation, which included also the towns of Hudson, Hollis, Dunstable and Tyngsborough, as well as parts of Amherst, Milford, Merrimack, Litchfield, Londonderry, Pelham, Brookline, Pepperell and Townsend. The plantation received the name of Dunstable in honor of Mrs. Mary Tyng, wife of Hon. Edward Tyng, one of the magistrates of the State, who came from Dunstable in England.

The high character of many of the grantees of this plantation is worthy of especial notice. John Endicott was a man severe, devout and stern, a valiant leader in Indian warfare, and Governor of Massachusetts for fifteen years. Joseph Dudley was a graduate of Harvard, president of New England, having the noted Andros as his successor, Governor of Massachusetts and chief justice of the State of New York. Wm. Brenton was Governor of the State of Rhode Island, and once a noted fur-trader. Thomas Brattle was a graduate and treasurer of Harvard College, and a writer on Astronomy. Peter Bulkley was Speaker of the House of Deputies. Jonathan Tyng was a highly honored man, distinguished for his courage, and the man most renowned among the early settlers of Tyngsborough. Thomas Weld was the first minister of Dunstable, and Sampson Sheafe was a member of the Provincial Council of New Hampshire. Many of these grantees belonged to Boston, having among them "Assistants and Magistrates," and men who held honorable positions in life.

This large plantation, when it received its charter, was covered with a heavy growth of pine, oak, walnut, maple, birch and other kinds of timber. There were fertile valleys lying along the Merrimack, the Nashua and Souhegan Rivers and their many tributary streams. Wild fowl and fish abounded. The forests were tenanted by bears, wolves and catamounts. Here and there were Indian trails leading to their favorite waterfalls and fishing-grounds, around which were their scattered and humble wigwams. Also, far apart in the wilderness, a few trading-posts had been established by venturesome and enterprising men. Sixteen years before the plantation received its charter the General Court had sold the exclusive right of trading with the Indians to Mr. Simon Willard, Mr. Wm. Brenton, Ensign Thomas Wheeler and Major Thomas Henschman, for £25. These trading-posts reached out into the forests far in advance of the dwellings of the ordinary settlers. Of these four traders, Major Henschman, resided in Chelmsford. Eight years later came another "In-

dian trader," John Cromwell, who established his trading-post in Tyngsborough, and who thus became probably the earliest inhabitant of that town. Of this Cromwell there are sundry traditions more or less apocryphal. He was said to have been one of that numerous class of traffickers whose foot weighed just a pound. The Indians who sold him furs and accepted his method of weighing began at length, it was said, to suspect that his foot actually weighed considerably more than a pound, and so, to adjust matters, they drove him away and burned his house. Rev. Mr. Lawrence, in his account of Tyngsborough, as given in vol. iv, p. 192 of the second series of the Massachusetts Historical Collections, tells us that "the present owner of the place was plowing near the spot and found his plow moving over a flat stone which gave a hollow sound," and that "on removing the stone he discovered a hole stoned about six inches in diameter, from which he took a sum of money."

In more recent years a doubt has arisen in regard to the truth of the tradition of the burning of the house, and it is asserted that the inventory of Cromwell's property indicates that he had suffered no such disaster. But Daniel Perham, Esq., of Tyngsborough, a gentleman better versed in the history of Tyngsborough, probably, than any other person, assures the writer that the tradition of the house-burning is well founded, and has never till recently been questioned. He has often heard the story from his mother, whose ancestors were among the early settlers. The tradition is that a friendly Indian informed Cromwell of the proposed attack, and that Cromwell took care of his treasures, and escaped to a place of observation where he witnessed the burning of his house. The kettle which contained the buried silver was long kept and used in a family in Tyngsborough. It is somewhat difficult to see how the burning of a trader's log shanty, from which everything valuable had been removed, could so affect the trader's property as to show the effect of the disaster long afterwards. The tradition seems reliable.

What seems to be authentically known of John Cromwell, the fur-trader, is this, that he came from Boston to what is now Tyngsborough, prior to 1661, for the purpose of trading with the Indians; that he purchased of Captain Edward Johnson, of Woburn, 300 acres of land on the right bank of the Merrimack, and built a house and improved his farm; that he died in 1661, leaving a widow, and an estate valued at £608 2s. 8d. He had two servants, Thomas Williams and Walter Shepherd, who, more than forty years after, testified in respect to this estate. The estate subsequently fell into the possession of Henry Farwell, and afterwards into that of the Bancroft family. But in regard to Cromwell there is a discrepancy of dates; for while one author says that he died in 1661, another records that "about 1665"

he built a trading-house in the town of Merrimack, near the falls which have since, from him, been called "Cromwell's Falls."

The date of the first settlement of the plantation of Dunstable is not given in history. It is evident that there were settlers established at a period earlier than 1673, the year in which the charter was granted, for Farmer, in his "Catechism of the History of New Hampshire," says: "This town had been settled several years before the date of the charter." And in the charter, farms belonging to the plantation are mentioned and the names of farmers given. Two years after the date of charter, orchards are mentioned as already existing on the plantation. The house of Lieutenant Wheeler is designated as a place for the meeting of the proprietors of the plantation. Lieutenant Wheeler was a fur-trader and has been thought to be the earliest settler on the plantation. He was evidently a young man, for Captain Thomas Wheeler, of Groton, the noted Indian-fighter, was his father, and at one time resided with him.

The extensive plantation, chartered in 1673, with the name of Dunstable, and embracing a territory of about 200 square miles, included within its bounds several townships and parts of townships, which, subsequently, one by one, as their increasing population enabled them to do it, withdrew from the plantation and received charters of incorporation as independent towns. And here, perhaps, is the proper place to speak of these towns in the order of their incorporation. Hudson, N. H., was set off as a township by the General Assembly of Massachusetts, in 1732, under the name of Nottingham. In 1830 the Legislature of New Hampshire changed its name to "Hudson." It was settled thirty-seven years after the plantation was chartered, and became a township fifty-nine years after that date. The open fields lying on the banks of the Merrimack, which the Indians had cleared of the forest for their planting-grounds, were the first parts of the town to be settled. The town is mainly devoted to agriculture. In the Revolutionary War it took a patriotic part.

Litchfield, the intervale lands of which, along the Merrimack, were cultivated by the Penacook Indians, a tribe more warlike than the other Pawtucket Indians, was settled about 1720, and was incorporated as a township in 1734 by the General Assembly of Massachusetts. In the days of the Revolutionary War, out of fifty-seven men of age for military service, it furnished its quota of seven for the service of the country. Among the early inhabitants of the town Hon. Wiseman Claggett is mentioned with special honor. He was born in Bristol, England, his father being a wealthy barrister. He was bred to the law. After ten years spent in seeking his fortune in the West Indies, he came to New England, and, at the age of thirty-seven years, established himself at Portsmouth, N. H. At the age of fifty-four years he

was appointed by the British Government attorney-general of the Province of New Hampshire. Having, however, espoused the cause of the Colonies in the years preceding the Revolutionary War, he was removed from his office, and he settled upon a farm in Litchfield. Here he was a member of the Council and the Committee of Safety in the time of the war. He represented Litchfield and other towns in the New Hampshire Legislature. "He was a classical scholar, a good lawyer, a wit and a poet." The collections of the New Hampshire Historical Society contain an interesting biography of him written by the Hon. Charles H. Atherton.

The town of Merrimack was set off from the Dunstable grant in 1733, first under the name of "Souhegan East," afterwards "Rumford," and at length Merrimack. It was settled in 1722. John Cromwell, the Indian trader, heretofore mentioned, built a trading-house at Cromwell's Falls in this town about 1670. The Souhegan River, which runs through the town, affords a water-power. The mills which were erected at the water-fall in 1818 afterwards were consumed in succession by fire. The disaster seems to have long discouraged attempts to improve the water-power. The Hon. Matthew Thornton, one of the signers of the Declaration of Independence, was for many of the last years of his life a citizen of Merrimack. He was born in Ireland and came to America at an early age, practicing as a physician until the Revolutionary War. He held the military office of colonel, and in 1775 was president of the convention at Exeter, which assumed the government of the Colony. He was in 1776 a delegate in Congress at Philadelphia, and thus became one of the signers of the Declaration of Independence. He was subsequently a member of Congress, both as Representative and Senator from New Hampshire. He also held the office of judge of the Supreme Court of the State. He died at Newburyport, Mass., in 1803, while on a visit to that city. His age was eighty-eight years. His grandson, James B. Thornton, who died at the early age of thirty-eight years, was a young man of high promise, having been Speaker of the House of Representatives of New Hampshire, second comptroller of the United States Treasury and *charge d' affaires* of the United States at Callao, Peru.

The township of Hollis, whose Indian name was Nisitisset, was set off from the Dunstable grant as the West Parish of Dunstable in 1739, and was soon after incorporated as a town with the name of Hollis. The town was first settled in 1730 by Capt. Peter Powers, one of the soldiers, who under Capt. Lovewell fought that bloody battle with the Indians in Fryeburg, Maine, so well known in history and song. Two years after his marriage, the soldier, with his young wife, crossed the Nashua River from Dunstable, and built the first cabin in Hollis. The remains of the cabin were visible in 1830. Soon

followed other settlers, and in 1736 Hollis had nine families. Fox, the historian of Dunstable, gives us the muster-roll of a military company made up from Hollis, Nashua and vicinity, in the old French War. The company consisted of nearly sixty men, and had Peter Powers, of Hollis, for its captain. Hollis also had a company of seventy men at the battle of Bunker Hill under Capt. Reuben Dow. This company, under the command of Col. Stark and Col. Prescott, were in the thickest of the fight and lost seven men. The soldiers of Hollis also participated in the military operations at Ticonderoga and Bennington, the town having during the war furnished 250 men, of whom thirty died in the service. Up to 1823 thirty-five young men of Hollis had graduated from Harvard, Dartmouth and other colleges.

In 1740 "the broad and good plantation" of Old Dunstable was reduced to that portion only which is now embraced in the towns of Nashua, Nashville, Dunstable and Tyngsborough. But in 1741 it suffered a still further reduction, for in that year, after a long dispute, the boundary line between Massachusetts and New Hampshire was fixed. This line separated the already reduced plantation into two nearly equal parts. The part which fell to New Hampshire was called Nashua, which, 101 years afterwards (in 1842) was itself divided, the northern part taking the name of Nashville.

Of all the sub-divisions of the old Dunstable plantation Nashua has had by far the greatest prosperity and the most rapid growth. The vast hydraulic power afforded it by the fall of sixty-five feet in the Nashua River within the distance of two miles, has made the city of Nashua one of the most important manufacturing places in the nation.

Nashville, situated on the north side of the Nashua River, shares with Nashua the benefits of the water-power. The Jackson Manufacturing Company and other extensive works make it a thriving town.

In 1675, only two years after the plantation of Dunstable received its charter, began King Philip's War, in which the inhabitants of Tyngsborough bore a conspicuous part both in respect to the sufferings which they endured and the bravery with which they waged the conflict. This war demands our especial attention from the fact that while in other Indian wars the red men engaged in petty acts of cruelty and revenge, as local hostilities grew up between the two races, or else in subordination to the French participated in the wars which had arisen between the French and English people, in this bloody and fearful conflict almost all the Indian tribes of New England, impelled by one common impulse, acting upon one common plan, led on by one leader of consummate skill and undaunted courage, had united with the avowed purpose and firm resolve of exterminating by fire and the tomahawk every trace of the settlements of the white men throughout the land. The war was waged not for victory, but for annihilation. There

was to be no quarter and no mercy. The little child was not to be spared for his innocence, nor delicate woman for her loveliness. It was a war not of revenge alone, but of cold, settled, well-matured policy, whose success was to be secured not by open conflict, but by infamous treachery, not by a disciplined soldiery, but by fiends and "hell-hounds" of war. This war continued one year. The plantation of Dunstable, being on the frontier, being very sparsely settled having on the north the warlike Pennacooks and on the south the Wamesits, was specially exposed to attack. To add to the alarm the heretofore friendly Wannalancet withdrew from Wamesit. His flight betokened war.

Seven Narragansett Indians, who for seven weeks had worked for Jonathan Tyng, of Tyngsborough, having received their wages, stealthily departed. In their distress the settlers appeal for help from the Colony, and eighteen men are sent by Captain Moseley to protect them. In September Lieutenants Brattle and Henschman were ordered by the Governor to take measures to defend the settlement. Wannalancet was reached by scouts and urged to return, but he persistently refused. Captain Moseley, with a hundred men, marched to Pennacook (now Concord) and to Naticook (now Litchfield) to disperse the hostile Indians in those places. While in the forest they fell into an ambuscade in which they might easily have been cut off. Their escape has been attributed to the persuasion of the friendly Wannalancet, who, in his flight, forgot not his friendship to the white man. The dying speech of his father, the aged chief Passaconaway, in which he was implored "to take heed how he quarreled with the English," seems to have restrained him. Decisive proof that Wannalancet, in his flight and wanderings, did restrain the warlike Indians from destroying the whites is found in what he said, after the war, to the Rev. Mr. Fiske, the pastor of the Chelmsford Church. When Mr. Fiske remarked to Wannalancet that he desired to thank God that during the war his people had been so highly favored, the chief replied: "*Me next.*"

But although, by order of the Governor, garrisons were established and troops were sent for the defence of the settlers, every house on the plantation, with one exception, was deserted by its inmates. That exception is worthy of record among the grandest deeds of human bravery. Jonathan Tyng had established his home on the banks of the Merrimack near Wicasuck Island, about a mile below the present village of Tyngsborough. He was the son of the Hon. Edward and Mary Tyng, from the latter of whom the plantation of Dunstable received its name, she having come from Dunstable, England. The parents of Jonathan Tyng first settled in Boston, but had removed to the plantation, probably to Tyngsborough, where the father died in 1681, at the age of seventy-one years. His grave is in the old Tyng burying-ground, near the village of Tyngsborough. Jonathan Tyng, the son,

who was then thirty-three years of age, disdained to flee. Alone in the wilderness, while during the long and fearful winter the war waged around, he made his house his garrison, and held his ground. He believed it to be for the common good that the plantation should not be utterly deserted, and he bravely remained at the post where duty called him to stand. Well may the town of Tyngsborough and the honored Tyng family be forever proud of such a conspicuous example of bravery. Mr. Tyng having, during the winter of 1675, been the only white settler on the Dunstable grant, seems to give to Tyngsborough the honor of being permanently settled earliest of all the towns which composed the plantation.

Although Mr. Tyng, in his petition to the General Court, in the time of greatest peril, declares "there is never an inhabitant left in the town but myself," we cannot suppose that he was the only tenant of the house during those months of impending danger, for he was a man who largely employed the service of others. We have just told of seven Narragansett Indians who left his employ, and we read also of one Robert Parris "who is Mr. Tyng's vail." Moreover, in this petition he uses the word "we" instead of "I" in reference to the tenants of his garrison. This petition was dated February 3, 1676, and reads as follows:

"The petition of Jonathan Tyng Humbly sheweth: That ye Petitioner, living in the uppermost house on Merrimack river, lying open to the enemy, yet being so seated that it is, as it were, a watch-house to the neighboring towns, from whence we can easily give them notice of the approach of the enemy, and may also be of use to the publique in many respects; also are near to the place of the Indian's fishing, from which, in the season thereof, they have great supplies, which I doubt not we may be a great means of preventing them thereof; and there being never an inhabitant left in the town but myself:

"Wherefore your petitioner doth humbly request that your Honours would be pleased to order him *three or four* men to help garrison his said house, which he has been of great charge to fortify, and may be of service to the publique: Your favour therein shall further oblige me as in duty bound to pray for a blessing on your Councils, and remain your Honourables' humble servant,
JONATHAN TYNG."

This petition was dictated by discretion—not by cowardice, for the enemy was near. In this very month of February the Indians attacked the adjoining town of Chelmsford, burning several buildings, and in the following month made still another attack upon that place, wounding Joseph Parker, the constable of the town of Dunstable. In reply to the petition the General Court immediately dispatched to Mr. Tyng a guard of several men, who remained with him during the war.

It is a significant mark of the utter desolation of the plantation during that winter of terror that Mr. Tyng was compelled to send to Boston for the necessary provisions for supplying his little garrison. Mr. Tyng was not attacked during the winter, and in the spring, by order of the Governor and Council, a garrison was established at Pawtucket Falls, and this, together with a force stationed at Capt. Henschman's house in Chelmsford, secured the brave man from further danger.

The war soon closed. It was begun with much to flatter the red man with hopes of victory. It had for its leader a crafty, skillful and courageous chief, Philip, son of Massasoit, once the generous friend of the Pilgrims of Plymouth. The alliance with the Narragansetts, a powerful tribe, gave firmness and strength to the cause. Their fort, manned by 4000 warriors, was doubtless deemed impregnable, but, in December, 1675, one thousand troops under the leadership of Josiah Winslow, son of Governor Winslow, stormed the fort and utterly destroyed their village and all their stores. His allies being thus conquered, Philip retired to his home on Mount Hope, near Bristol, R. I., where he was attacked and slain in August, 1676, his head being sent to Plymouth, where it was fixed upon a gibbet for many years as a warning to his countrymen. This war, so short, yet so atrocious and bloody, fell mainly upon the two colonies of Massachusetts. When we consider how few in number and how feeble in resources these colonists were, the ruin caused by the war is almost appalling. Thirteen towns were burned, 600 buildings were laid in ashes, 600 colonists were slain, and a million of dollars expended.

Although in subsequent years Indians were employed in the fiendish work of treachery and murder in the wars of the white men, the war of King Philip was the last effort of the Indian tribes to blot out the settlements of the white man in New England.

After the war a party of the Praying Indians at Wamesit on the Concord River, about sixty in number, were removed to Tyngsborough, and placed in charge of Col. Jonathan Tyng. They occupied Wicasuck Island and its vicinity for about ten years, and then departed to St. Francis, in Canada. In 1686 this island was granted to Col. Tyng to compensate him for his care of them. It seems to have been the part of the town of Tyngsborough to have been the earliest home, in the Dunstable plantation, of the permanent white settlers, and the latest home of the sons of the forest. It was in this year (1686) that the Wamesit and Naticook Indians sold to Col. Tyng all their possessions in the neighborhood. This purchase, together with 3500 acres received of his father, Edward Tyng, in 1668, and 1800 acres granted by the proprietors of the township in discharge of a debt of about \$75, made Col. Tyng by far the largest landholder in the region. This land together with other large additions, extended six miles from the Merrimack River, the tract being one mile wide. Until recent years it remained in the possession of the Tyng and Brinley families. Upon this subject Mr. Nason remarks: "It is, perhaps, the only instance in Massachusetts where such an extensive territorial domain has remained so long undivided and under the control of the descendants of the original proprietor." This tract constituted a very large portion of the territory of Tyngsborough. It is questionable whether such a tenure of land has been favorable to the development and welfare of the town.

Having brought the valiant Col. Tyng so prominently before the reader's mind, it is here proper that we should give a brief sketch of what remains untold of the history of this distinguished man.

His father was Hon. Edward Tyng, who was born in Dunstable, England, in 1610, and at the age of twenty-nine years came to America and settled as a merchant in Boston, where he held, as a citizen, positions of honor. He represented Boston in the General Court in 1661 and 1662, was colonel of the Suffolk Regiment, and held the office of assistant from 1668 to 1681.

The opinion seems to have been entertained that the vast Tyng or Brinley estate in Tyngsborough, having an area of six square miles, had for its founder, not Edward Tyng, but his distinguished son, Col. Jonathan Tyng. This opinion has been controverted by the researches of Judge William A. Richardson, who has found that Edward Tyng, who was a merchant both in London and in Boston, purchased in 1660, thirteen years before the incorporation of the Dunstable plantation, a tract of land from James Parker, of Chelmsford, containing 3000 acres. This tract, together with 500 acres otherwise acquired, was given by deed to his son, Col. Jonathan Tyng, in 1668, and forms the foundation of the great Tyng estate.

The deed of this land, given by Parker to Edward Tyng, is written on parchment and is in the possession of Judge Richardson. This interesting document, written in fair and legible hand, was dated August 14, 1660, and is therefore 230 years old. The portion of this deed which gives the history of the transfer of the land by the Indians to James Parker has a unique interest, and I therefore give it here for the edification of the reader:

"To all people to whom this present shall come to be seen or read, James Parker, of Chelmsford, in the County of Middlesex, in New England, yeoman, and Elisabeth, his wife, sends Greeting: Whereas, the Honoured Generall Court of the Massachusetts Jurisdiction in new England, aforesayd, of their beneficent bounty did Give and Grant unto the Indians of Patuckett a parcell of land adjoining to the bounds of chelmsford Plantation, and Whereas, Puntalibun John Tobatowon Pamobotiquin Wonoit Nomphon Rnlinsad Peter and Wampamooou, chief Indians of said Pauhtuket, at a lawfull public meeting of theirs, the fourteenth of the third moeeth, 1660, with the approbation of John Elliott, sepr., teacher of the church of Christ in Roxbury, did Give and Grant unto the above Mentioned James Parker, a certain parcell of land part of the above mentioned Grant, lying and being at the west end of their sd Grant, out of the bounds both of the sayd Pauatukit and chelmsford, in relation of any exchanges by them made to each other, and that In Considerations of the great pains and costs, the sayd James Parker hath been at for the settling of the bounds according to Agreements with the Indians of sayd Pauatucket and Inhabitants of chelmsford, as in a deed bearing date the third of April, 1660, with the Records of the Generall Court concerning the same more amply appeareth. Now Know all meo by these presents, that the sayd James Parker and Elisabeth, his wife, in consideration of sixty pounds to him payd in hand by Edward Tyng, of Boston, &c., &c."

The following is a quotation from an article written by Judge Richardson for the *Lowell Daily Courier*, April 4, 1881:

"It is understood that his [Edward Tyng's] wife, Mary Sears, was

born in Dunstable, England, from which place the old township [of Dunstable] took its name in honor of her. Mr. Tyng was a benefactor of the college [Harvard], to a small extent, as early as 1658, according to President Quincy's 'History of Harvard University,' and Mr. Quincy refers to him as of 'one of the earliest, wealthiest and most influential families in the Colony.' His second daughter, Rebecca, married Joseph Dudley, who was the Colonial Governor of Massachusetts and New Hampshire, and Chief Justice of the Supreme Court of New York; his third daughter, Hannah, married Abijah Savage, a graduate of Harvard in 1659; his fourth daughter, Eunice, was the wife of Samuel Willard, who was vice-president and acting president of the college from 1701 to 1707. The landed estate of Edward was given to his only son Jonathan, who resided upon it and was a man of much distinction and influence."

Two years before his death, Edward Tyng, then sixty-nine years of age, came from Boston and settled probably near the residence of his son, in Tyngsborough. He died in 1681 and was buried in the old Tyng burial-ground, about one mile below the village of Tyngsborough. His grave is covered with a granite slab, on which is the following inscription: "Here lyeth the body of Mr. Edward Tyng, Esq. aged 71 years. Died December 17 Day 1681."

Edward Tyng left six children—Jonathan, who will be noticed elsewhere. 2. Edward, who was one of Sir Edmund Andros' Council and governor of Annapolis. 3. Hannah, who married Abijah Savage, son of the celebrated Major Thomas Savage, commander-in-chief in King Philip's War. 4. Eunice, who married Samuel Willard, pastor of Old South Church in Boston and vice-president and acting president of Harvard College. 5. Rebecca, wife of Joseph Dudley, Governor of Massachusetts and chief justice of New York. 6. A daughter who married a Searle, her son, Samuel Searle, being mentioned in Mr. Tyng's will.

The will of Edward Tyng, which is dated August 25, 1677, four years before his death, clearly indicates, when we consider the times and the high value of a pound sterling in those days, that he was a man of large estate. His oldest son, Jonathan, is not mentioned in this will for the obvious reason that his father had already given to him a very large estate. To his son Edward he gives 100 pounds, adding the words: "having given him a considerable estate already." He gives his daughter Eunice 500 pounds, and to each of his nine grandchildren 100 pounds, to be paid after the decease of his wife. His wife is made executrix and is to be assisted by the following four "overseers:" Hon. Edward Friend, John Leverett, Esq., Anthony Stoddard and Capt. Thomas Brattle. The number and rank of these "overseers" indicate that the widow was placed in charge of an estate whose settlement was a work of no ordinary responsibility. Indeed, it is highly probable that his widow had herself inherited an estate, and this estate may have constituted a portion of her husband's wealth. The fact that Dunstable received its name in compliment to her, and the other significant fact that so many of her daughters married men who occupied high social and political positions, seem to indicate that birth or wealth, or both, had given her a high claim to peculiar honor.

Col. Jonathan Tyng, son of Edward Tyng, was born in 1642, three years after his father had settled in Boston. Early in life he settled on the banks of the Merrimack, on lands in the Dunstable plantation, now belonging to the town of Tyngsborough, and, as already shown, was the first permanent settler of the plantation. The exalted character of the man is shown, not only by his own brave deeds, but by the offices of trust and honor bestowed upon him through life. He was made guardian of the Wamesit Indians; he was a member of the Council of Sir Edmund Andros, the royal Governor; he represented Dunstable in the General Court; he was for many years selectman of the town; he was colouel of the upper Middlesex regiment, and was entrusted with the care of all the garrisons within its bounds. He was always at the front. He held a high position in the church and was sternly orthodox. We must, however, be impartial. One act of the gallant colonel will hardly meet the approval of this liberal age. John Ather-ton, a soldier belonging to Col. Tyng's company, was fined forty shillings by the colonel for wetting a piece of an old hat on the Sabbath day for the sake of putting it into his shoe, which chafed his foot while on the march. To one who believes that a man of so noble a nature actually committed an act apparently so unjust, it is sufficient to say that the act was fully justified by the spirit of the age, and the punishment by fine was infinitely less severe than that inflicted by the Mosaic law, so much revered by our fathers. For the man who was found, as recorded in the book of Numbers, gathering sticks upon the Sabbath, was "stoned with stones" until he died. The fault of the good and brave colonel was that he was not a century in advance of his time. Indeed his act, when stated abstractly, does not appear so very severe. A small fine of less than seven dollars was imposed to prevent cobbling on the Sabbath day. Moreover, the act of the soldier may have been repeated in defiance of previous warnings and admonitions and under circumstances insulting to his commander and subversive of his authority.

An interesting incident in the life of Colonel Tyng is thus given by Mr. Nason: "Early in this year (1697), the celebrated heroine, Hannah Dustan, who, with her assistants, Mary Neff and the boy Leonardson, had taken the scalps of ten Indians at Contoocook, New Hampshire, was kindly entertained at the house of Col. Tyng, as she was on her way to her desolate home in Haverhill." Mr. Fox, however, relates that the first house reached by Mrs. Dustan was that of "old John Lovewell," which was on Salmon Brook. The two authors do not contradict each other, but Mr. Fox speaks only of "Old John Lovewell," and Mr. Nason only of Colonel Tyng. Lovewell lived several miles north of Tyng, and perhaps the brave woman, suffering from extreme weariness and weakness, sought rest at the homes of both. Joseph Neff, son of Mary Neff, in a petition to the General Court

in 1738, forty-one years after the exploit of Mrs. Dustan, in speaking of the sufferings endured by his mother and the others on their return home, declares that "they suffered distressing want, being almost starved."

It has been plausibly suggested that Colonel Tyng's motive in fixing his abode on the Merrimack was to take charge of his father's large estate in Dunstable (now Tyngsborough).

The first wife of Colonel Tyng was the daughter of Hezekiah Usher. She died in 1714. His second wife, Judith Fox, of Woburn, died in 1736, living, to the great age of ninety-nine years. His children who lived to mature age, were: 1, John, who graduated at Harvard College in 1691, and died in England. 2, William, whose birth is the first recorded in the records of the town, who was born in 1679, and was killed by the Indians in 1713 at the age of thirty-four years. 3, Eleazar, who graduated at Harvard College in 1712. 4, Mary, who became the wife of Rev. Nathaniel Prentice, minister of the town. Colonel Tyng died in 1723, at the age of eighty-one years, leaving to his family a very large estate and an honored name. The very name of Tyngsborough attests the honor in which the family is held, and will remain a perpetual monument of ancestral bravery and worth. Of the descendants of Colonel Tyng we shall speak more fully hereafter.

The death of King Philip, in August, 1676, put an end to the war, and the dispersed settlers returned to their deserted homes. While the towns of Lancaster, Groton and Chelmsford were destroyed during the war, the plantation of Dunstable suffered little loss. The fact is supposed to be due, in part at least, to the friendly offices of Wannalancet. Peace brought with it more extended settlements. The larger number of settlers seem to have found homes on Salmon Brook, near its junction with the Merrimack. This is indicated by the location of the first meeting-house, which was begun before the war and completed soon after it, for, according to Mr. Fox, it was located near the site of the present village of Nashua, not far south of Salmon Brook, and probably about six miles north of the village of Tyngsborough. However, the opinion of Mr. Nason is, that the meeting-house was on the river road, between the villages of Nashua and Tyngsborough, not far north of the line which separates the two towns. If this be the correct supposition, it would indicate that there were about as many settlers in Tyngsborough as in Nashua.

A very large portion of the land of Dunstable plantation was purchased by men of wealth upon speculation. The cheapness of the land invited speculation. Such, doubtless, was the purchase of 3000 acres by the elder Tyng. Henry Kimball purchased a large tract of land in Pelham and Hudson, known since as "Henry Kimball's Farm." While as yet few settlements had been made, 14,000 acres on both sides of the Merrimack had become the property of indi-

viduals. In 1682, six years after King Philip's War, Hezekiah Usher, father of the first wife of Colonel Tyng, purchased "Mine Islands," a few miles north of Tyngsborough village, so named because there was a rumor that there were mines upon them which the Indians had worked. Usher was a man of wealth. He seems to have indulged the belief, once so prevalent, that New England contained vast stores of mineral wealth. Lead in small quantities was found on Mine Islands, but so intermingled with rock spar that the working of the mine was not warranted. Though Usher failed in this enterprise, he still dreamed of treasures hidden among the hills of New England. In May, 1686, as we are told, "Mason, the proprietor of New Hampshire, farmed out to Hezekiah Usher and his heirs, all the *mines, minerals & ores* within the limits of New Hampshire, for the term of 1000 years, reserving to himself one-fourth of the royal ores and one-seventeenth of all the baser metals."

A very marked indication that the settlers upon the Dunstable plantation were not the principal owners of the soil is the fact that for thirty years after King Philip's War the town-meetings of the proprietors and settlers of the plantation were commonly, perhaps usually, held in the town of Woburn, which was doubtless conveniently situated between the wealthy owners residing in Boston and vicinity on the one hand, and the actual settlers on the other. The residence of the officers chosen at these meetings points in the same direction. At the earliest recorded town-meeting (which was held in Woburn), the selectmen chosen were Capt. Thomas Brattle, of Boston; Capt. Elisha Hutchinson, of Worcester; Capt. James Parker and Abraham Parker, of Groton, and Jonathan Tyng, of Tyngsborough (then Dunstable). Col. Tyng was the only one belonging to the Dunstable plantation.

Only three years after the close of the war the first minister of the plantation, the Rev. Thomas Weld, was settled. The early settlers were a devout and orthodox people, in full sympathy, probably, with the existing laws of the Colony, which forbade "dancing at weddings, wearing long hair or periwigs or superstitious ribands, keeping Christmas, turning the back on the preacher profanely before he had pronounced the blessing, and courting a girl without the leave of her parents."

Not alone for fear of the Indians did the good people of the plantation suffer, for one reason assigned by the Governor of the Colony for proclaiming a "general fast" was the appearance of the comet of 1680, "that awful, portentous, blazing star, usually foreboding some calamity to the beholders thereof."

The peace which reigned in the Dunstable plantation from 1676 to 1688 was attended with a rapid increase in the number of settlers. A church was formed, a pastor settled, new roads laid out, and there

were prospects of better days. But in 1688 another war-cloud cast its gloom over the infant colony. The English people, weary of the house of Stuart, and especially of the reigning prince, James the Second, had compelled his abdication of the Crown. He appealed to France. This nation, which, on account of both the birth and the religion of James, sympathized with his cause, took up arms in his defence. The war is known in history as "King William's War," because William, of Orange, husband of Mary, the daughter of James, sat upon the British throne, sharing it with Mary, his wife. The war fell with terrible effect upon the New England colonies. The French, being in possession of Canada, found in the Indian a most efficient ally. It was their favorite method of warfare to instigate the Indians to lay waste the English colonies, in violation of all the rules of civilized war. The peaceful farmer was butchered in the field, his humble home was laid in ashes, his wife and children murdered or carried into captivity. This barbarous war was waged for ten weary years. But only four years of peace followed the treaty of Ryswick in 1698. Upon the death of both William and Mary, Anne, the sister of Mary, came to the throne. Upon her accession the King of France renews the war, and ten more years of bloodshed and cruelty afflict the New England colonies. The war is known as "Queen Anne's War." Of the twenty-five years following 1688 less than five were years of peace. At length the treaty of Utrecht closed the protracted struggle.

In this long period of twenty years of Indian warfare the Dunstable plantation, being on the frontier, bore its full share of dangers and sufferings. In July, 1689, it petitioned the Governor and Council for "twenty foot-men for the space of a month to scout about the town, while we get our hay." In the homely language of this petition there is hidden a most painful suggestion of the terror which brooded over the humble cabins of the settlers. In regard to the actual sufferings of the plantation we have the following records: "Anno Domini, 1691, Joseph Hassell, Senior, Anna Hassell, his wife, Benjamin Hassell, their son, were slain by our Indian Enemies Sept. 2, in the evening. Mary Marks, the daughter of Peter Marks, was slain by the Indians also on Sept. 2^d day in the evening." "Obadiah Perry & Christopher Temple dyed by the hand of our Indian enemies on Sept. the 28th day in the morning." Eight years after the war began two-thirds of the settlers had left the plantation. But, as in King Philip's War, one man holds his position, the brave Col. Tyng, of Tyngsborough.

In 1702, the first year of Queen Anne's War, a new garrison was established having among its defenders Jonathan and Wm. Tyng. Robert Parris, who was denominated Col. Tyng's "vail," was slain by the Indians. His wife and oldest daughter shared the same fate. When the men sallied forth on expedi-

tions against the foe their wives took their places in the garrisons. In the winter of 1703, "Capt. Wm. Tyng, with a small company of snow-shoe men, made his way through the deep snows to Winnepiseogee Lake. Near this lake the Indian known as 'Old Harry,' who led the attack upon Lancaster, had his headquarters. Capt. Tyng made an attack upon him, killing 'O.d Harry' himself and five of his men. For this act of bravery the General Court granted to the heirs of those composing this company a tract of land, at first called 'Old Harry's Town,' then Tyngstown, and afterwards Manchester."

Capt. John Tyng, in 1704, on a like expedition to Pequawket, killed five of the enemy. Capt. Jonathan Tyng, the chosen commander of all the garrisons of the plantation, went to Lancaster to aid the inhabitants in repulsing the Indians. And here he met with a misfortune, which is thus quaintly told: [His] "horse was, by the Indians, taken out of the said pasture & driven into the woods, where they killed and ate the s^d horse."

In 1706 270 Indians attacked one of the garrisons commanded by Captain Pearson, and Mrs. John Cummings was killed and her husband taken captive. In the bloody fight which followed several were killed of both parties. Joe English, a friendly Indian, the grandson of Masconomo, Sagamore of Ipswich, was shot near Holden's Brook, in Tyngsborough. This faithful Indian was acting as a guard of Captain Butterfield and his wife. Captain Butterfield escaped, while his wife was taken captive. Joe English, to avoid a death by torture, provoked the Indians to murder him upon the spot. In 1711 the plantation had seven garrisons, one of which was the house of Colonel Tyng and another the house of Henry Farwell, also in Tyngsborough. In these seven garrisons were thirteen families and nineteen soldiers.

Near the beginning of Queen Anne's War the first and beloved pastor of the plantation, Rev. Thomas Weld, died at the age of fifty years. He was a native of Roxbury and the grandson of Rev. Thomas Weld, first minister of Roxbury. He was a graduate of Harvard College and was esteemed as a man of exemplary piety. He had preached in the plantation about twenty-three years. His first wife was Elizabeth, daughter of the Rev. John Wilson, of Medford, an eminent divine. She died at the age of thirty-one years, and was buried in the old burial-ground just north of the line which separates Tyngsborough from Nashua. Writers have heretofore asserted that the second wife of Mr. Weld was Hannah, the widow of Habijah Savage and sister of Colonel Jonathan Tyng, but Mr. J. B. Hill, author of "Reminiscences of Old Dunstable," controverts the statement, and Judge William A. Richardson, who is very high authority, concedes the correctness of Mr. Hill's assertion. The graves of Mr. Weld and his first wife are side by side in the old cemetery, each covered by a granite slab.

On that which lies above the grave of Mr. Weld there is no inscription.

During Queen Anne's War, which followed the death of Mr. Weld, the plantation was unable to support a minister. Indeed, from 1702 to 1720 there was no settled pastor. In 1720 Rev. Nathaniel Prentice, a graduate of Harvard College, was settled over the church, and remained in office until his death, a period of seventeen years. His wife was Mary, daughter of Colonel Jonathan Tyng. He died at the age of fifty-nine years, and was succeeded in 1738 by Rev. Josiah Swan, who remained in office eight years.

The treaty of Utrecht was followed by about eleven years of peace, but both Frenchman and Indian thirsted for revenge. The Marquis de Vaudreuil, Governor of Canada, and the celebrated Jesuit, Sebastian Rale, instigated the Indians, whose headquarters were in Norridgewock, on the Kennebec, in Maine, to begin anew the work of depredation and murder upon the frontier settlements. In August, 1724, the English made an attack upon Norridgewock and a large number of Indians were slain. Among the slain also was Father Rale. This attack did much to alarm and weaken the Eastern Indians, but it seems to have inaugurated a new Indian war, during which a band of Mohawks, on September 4, 1724, made an attack on the Dunstable plantation. Nathan Cross and Thomas Blanchard were taken captives, and Lieutenant Ebenezer French, Thomas Lund, Oliver Farwell and Ebenezer Cummings, of Dunstable, were slain. There were eight victims, and their burial-place is marked by a monument. A part of the inscription referring to Thomas Lund is in quaint language and reads as follows: "This man with seven more that lies in this grave, was slew all in a day by the Indians." This attack aroused the people of Dunstable to efficient and aggressive action. John Lovewell, Josiah Farwell and Jonathan Robins petitioned the General Assembly for leave to "raise a company and scout against the Indians." The petition was granted and a bounty of 100 pounds was offered for every Indian's scalp. John Lovewell organized the expedition, and the enterprise is known in history as "Lovewell's War." Especially has the bloody battle which closed the campaign, and which is known as "Lovewell's Fight," been the theme of poetry and song—a sad theme indeed, but one which has given to the brave actors immortal renown—

"With footsteps slow shall travelers go
Where Lovewell's pond shines clear and bright,
And mark the place where those are laid
Who fell in Lovewell's bloody fight.

Old men shall shake their heads and say:
'Sad was the hour and terrible,
When Lovewell brave 'gainst Paugus went
With fifty men from Dunstable.'"

The limits of this article will allow only the brief record of this expedition, so full of dramatic and tragic interest.

John Lovewell was a man who delighted in adventure. He was born in 1691, and was now in the prime of manhood, being nearly thirty-four years of age. He was the son of John Lovewell, whose house was on the north side of Salmon Brook, in Nashua, where its cellar is still to be seen. Tradition says that he, too, had been a soldier.

Late in the year 1724, Captain Lovewell, with his company of picked men, at one time eighty-eight in number, started upon an excursion into the Indian country. Success and victory everywhere attended him. His third and last expedition was in the spring of 1725 against the headquarters of the Pequawkets, on the Saco River. It was in the town of Fryeburg, Me., near what is known as "Lovewell's Pond," that the final and historic battle occurred on May 8, 1725. The Indians were defeated and their chief, Paugus, slain, but at a fearful cost. Captain Lovewell and eight more were killed upon the spot. Subsequently, Colonel Eleazer Tyng, with his company, visited the scene, and found the bodies of twelve men, whom they buried, carving their names upon the trees where the battle was fought. They also found the body of the Indian chieftain, Paugus. This battle, following the destruction of Norridgewock, so terrified the Indians, that they removed at a greater distance from the plantation, and from this time the inhabitants suffered very little from Indian depredations. Doubtless it was the happy results of the "Lovewell Fight" that made it, in subsequent years, the theme of so many ballads and songs. Rejoicing in the safety of their homes, the people loved to sing of the valor of those whose blood had purchased the blessing. Fifty long years of war and massacre had ended.

We will not, however, dismiss our notice of "Lovewell's Fight" without a brief mention of one of the heroic band who fell in the encounter. Jonathan Frye, of Andover, a young man of devout piety, the son of a clergyman and a graduate of Harvard College, was, though only twenty years of age, the chaplain of the company. He seems to have joined the expedition as a solemn religious duty. When he saw that death from the dangerous wound received in the battle was soon to come, he sent word to his father by his comrades, that he was not afraid to die. Hon. George B. Loring, who was a native of the same town with young Frye, thus gracefully speaks of him: "Many a time have I, when a boy, paused to rest beneath the shade of a graceful, sturdy and imposing elm-tree, which crowns one of the finest hills in my native town of North Andover, and I have mused there upon the sad and tragic story of that young man, Jonathan Frye, who, when he left his home to join Captain Lovewell's expedition, planted that tree, that he might, as he said, leave his monument behind, should he fall in the service." The beautiful town of Fryeburg, in which the battle was fought, perpetuates his name.

Upon the return of peace, the plantation, "so well

stored with timber and so rich in pasturage," invited new settlers from Chelmsford, Billerica, Woburn, Concord and other places. A settlement is begun on the east side of the Merrimack, which was first called Nottingham, and, in 1830, received the name of Hudson.

In 1734 an extensive tract called Naticook was set off from the plantation. This tract embraced the towns of Litchfield and Merrimack, N. H. Nissitissit, which now embraces the towns of Hollis and Brookline, was incorporated in 1739 as the "West Parish of Dunstable." The running of the divisional line, in 1741, between Massachusetts and New Hampshire, about which there had been a long and bitter dispute, still further curtails and subdivides the Dunstable plantation. The part which fell to New Hampshire became the towns of Nashua and Nashville, while Dunstable, including Tyngsborough, fell to Massachusetts. The easterly part of Dunstable, lying on both sides of the Merrimack, was known as the First Parish of Dunstable until 1789, when it was incorporated as a district under the name of Tyngsborough, which became an incorporated town in 1809.

The principal cause of the disintegration of the Dunstable plantation was that the new settlements, which rapidly increased in numbers after the return of peace, desired the control of their own civil affairs "for greater convenience of public worship." The modern reader is surprised at the importance which the question of public worship assumed in that early day. The choice of the minister, the location of the meeting-house aroused passions, and created hostilities and personal animosities, and violent prejudices between different sections of the plantations, the heat of which still sleeps in the embers. The Rev. Joseph Emerson, at the dedication of the second meeting-house in Pepperell, in referring to this bitter contention, declares that the devil was at the bottom of it, because he was a great enemy of settling ministers and building meeting-houses. We can hardly believe that these animosities were the fruit of that piety which suffereth long and is kind. Even the clergymen were not always profoundly devout. It is told of the Rev. Mr. Swan, the second settled minister, that once, having forgotten the day of the week, he compelled his hired men, in spite of earnest protest, to go to work on his farm on Sabbath morning, and was only undeceived when he saw "Old John Lovewell" coming up the hill on his way to church. The location of the meeting-house was the cause of much bitter feeling and of the final separation of the present town of Dunstable from Tyngsborough, and it is only a few years since a literary gentleman who proposed to write the history of Dunstable, was requested to say as little as possible about Tyngsborough.

In 1732, on the question whether the people "would build a decent meeting-house or rectify and mend the old one," it was decided not to rectify, but to build,

whereupon nineteen persons entered their dissent, the new location being four rods westward of the old one. When upon the division of the plantation it became necessary for the town of Dunstable (including Tyngsborough) to build a new church, no location proved satisfactory, and it was voted on June 20, 1746, "that the place of preaching the gospel this summer be at Ephraim Lund's barn."

The settlement in 1747 of Rev. Samuel Bird, who was a "New Light," was the occasion of great dissatisfaction on the part of orthodox men, and the people of Dunstable and Tyngsborough, with others, formed a separate church, worshipping in the old meeting-house just north of the Tyngsborough line.

It was voted in 1749 "to hire a school for 3 months," but soon the French War intervened, and there is no further record of a school till 1761. After this date money for schools was voted almost every year, and in 1775 the township was divided into five school districts, and in that year school-houses were first erected.

After long contention, a meeting-house was at length erected by the people of Dunstable and Tyngsborough on a rocky knoll upon the road leading from Dunstable to Tyngsborough, about one mile from the former place. The frame was raised on July 18, 1753. So dissatisfied were the people of the easterly part of the township (now Tyngsborough) with the location of the meeting-house, that in 1755 they formed themselves into a precinct called the First Parish of Dunstable. This was the initial act which resulted in the complete separation of the towns of Tyngsborough and Dunstable.

At a meeting of the First Parish in August, 1755, it was voted that "the Place for a Meeting House for the Publick worship of God in this precinct (Tyngsborough) be on the west of Merrimack River, near Mr. James Gordon's mills, where a fraim is erected for that purpose. Also Voted to accept the Fraim that is Now on the spot. Mes-rs. John Tyng & Jonathan Tyng came to the meeting & gave the Precinct Glass for the meeting-house." Eleazer Tyng was moderator.

The meeting-house was erected near the site of the present Unitarian Church. The new church seems to have been extravagantly decorated, having two porches and a tall steeple. Hon. John Pitts is said to have written of it:

"A very small meeting-house,
A very tall steeple,
A very proud parson,
A queer sort of people."

The members of the First Parish (now Tyngsborough) in 1762 were: Eleazer Tyng, John Tyng, John A. Tyng, James Tyng, Wm. H. Prentice, Wm. Gordon, Robert Fletcher, Samuel Gould, Joseph Butterfield, Reuben Butterfield, John Perham, Joseph Perham, James Perham, Jacob Fletcher, Elijah Fletcher, Zaccheus Spaulding, Thomas Jewell, Benoni

Jewell, John Ingles, Jonathan Perham, Samuel Fletcher, John Littlehale, Abraham Littlehale, Timothy Bancroft, Jonathan Butterfield, Jonathan Farwell, Joseph Winn, Eleazer Farwell, Benjamin Farwell, Simon Thompson, Ezra Thompson, Silas Thompson, Asa Thompson, John Alls, Thomas Esterbrook, Thomas Esterbrook, Jr., Timothy Barron, Wm. Barron, Robert Scott, Jacob Reed, John Scott, Willard Hale, John Lewis, Reuben Lewis, Archibald Robinson, Joseph French, Esq., Lieutenant John Varnum, James Littlehale, Daniel Fletcher, John Didson, Samuel Howard, Oliver Colburn, Ezra Colburn, John Ayres, John Haddock, John Hamblet. Seven of the above lived on the east side of the Merrimack. The town owned a ferry-boat which plied upon the river.

"The mill of Wm. Gordon, on Bridge Meadow Brook and the tavern were the general places of resort. Several slaves were held in easy bondage and some person was annually chosen to protect the deer, which were still occasionally found in the extensive forest."

Although the township was ecclesiastically divided into First and Second Parishes, still in civil affairs it was a single township. In 1760, for example, all the selectmen were chosen from the First Parish. They were Eleazer Tyng, Major John A. Tyng and Joseph Danforth.

Our narrow limits demand that we pass over the unimportant events of the next few years and come to the years which immediately precede the War of the Revolution.

Hon. John Tyng was in 1768 chosen to represent Dunstable (including Tyngsborough) in the convention held in Boston for the preservation of the public peace and safety, and in 1775, John Tyng and James Tyng represented the town in the Provincial Congress.

In the battle of Bunker Hill a Dunstable company having Ebenezer Bancroft for captain and Nathaniel Holden as lieutenant, both belonging to the precinct of Tyngsborough, performed effective service. Captain Bancroft, in 1825, then at the age of seventy-seven years, gave to J. B. Hill, Esq., interesting reminiscences of that battle, from which we quote the following. "Col. Prescott came to me and said if you can do anything with the cannon I wish you would. I give you charge of them . . . The British troops had begun their march. They were steadily and confidently advancing directly in our front—a veteran army marching on firmly to the attack directly in [our] front. It was an awful moment. The enemy had advanced perhaps half the way from their station towards us, and our men, seeing no reinforcements, began by a simultaneous movement to draw off from the east side of the redoubt. Col. Prescott hastened to them and I followed him. We represented with earnestness that they *must not go off*; that if they did *all* would go. They cheerfully took their places again. Our first fire was shockingly fatal. There was scarcely a shot but told. The enemy were thrown into confu-

sion and retreated a short distance. They formed again and advanced, and were a second time driven back. They formed a third time and flanked us. Our ammunition was now nearly expended. We were soon surrounded on all sides. The day was over, and we had nothing more but to retreat as well as we could. I soon lost my gun, a remarkably long one which I had taken from the French at Chamblée in the old French war."

Colonel Bancroft was at the battle of Bennington, and continued in the service during the war. He held many civil offices and lived on his farm in Tyngsborough to the age of seventy-nine years. Among the soldiers from Tyngsborough in this war were: "Sergeant Jonathan Bancroft, Captain Reuben Butterfield, Captain Nathaniel Holden (whose house is still standing on the left bank of Holden's Brook), Captain Jonathan Fletcher, Eleazer Farwell, Nathaniel Ingalls, Lieutenant John Farwell, Levi Butterfield, Salathiel Frost, Wm. Perham, Robbin Skinner, John Merrill, Daniel Jaques, Benjamin Swan, Asa Emerson, Noah M. Gould and Sergeant Reuben Butterfield, Jr., who was killed in the battle of White Plains, October 7, 1777." For this list I am indebted to Mr. Nason, as also for much else.

The sacrifices made by the town during the war are indicated by the fact that its number of inhabitants at the beginning (in 1775) was 705, but in 1783 only 578.

In 1776 the committee of the precinct of Tyngsborough were Captain Ebenezer Bancroft, Captain Reuben Butterfield and Lieutenant Nathaniel Holden. The parish voted in 1777 "to pay the soldiers for 8 months' service in the war at Cambridge eight pounds to each man who belonged to the parish."

Colonel Eleazer Tyng died in 1782, at the age of ninety-two years. He was the third son of Colonel Jonathan Tyng, and a graduate of Harvard College. He was buried in the old Tyng burial-ground, about a mile below Tyngsborough village. The horizontal tablet above his grave bears the following inscription:

"Underneath are entombed the remains of Eleazer Tyng, Esq., who died May 21, 1782, aged 92; Mrs. Sarah Tyng, who died May 23, 1753, aged 59; John Alford Tyng, Esq., who died Sept. 4, 1775, aged 44; John Winslow, Esq., who died Nov. 3, 1788, aged 88; Mrs. Sarah Winslow (the last surviving child of the said Eleazer Tyng & the truly liberal benefactress of the church of Christ & Grammar School in this place, in honor of whose name & family it is called Tyngsborough), who died Oct. 29, 1791, aged 72."

At the close of the Revolutionary War the town was divided into two parishes, each having its own house of worship. The First Parish in 1809 became the town of Tyngsborough, the second became the town of Dunstable. The two churches were both feeble, and for very much of the time were unable to support a settled minister.

In 1780 there arose a very earnest desire to unite

the two parishes and thus form one strong consolidated church. On November 20, 1786, it was voted by the Second Parish "to Joyn with the 1st parish in this Town in applying to the General Court to dissolve the Line between the two parishes and to erect a house for the publick worship of God at the place where Mr. Ezra Thompson's barn now stands & will give up our meeting house for the use of the Town upon Condition that the First Parish give their meeting house for the same use." In January, 1787, similar action was taken by the First Parish. But dissensions arose, and the union so much desired failed to be accomplished.

In January, 1789, an event occurred which rendered vain all further attempts at union and resulted in the complete separation of the two parishes into two independent municipalities.

Mrs. Sarah [Tyng] Winslow, widow of John Winslow, and daughter of Colonel Eleazer Tyng, shortly after the death of her husband, made a donation to the town upon conditions which, instead of "uniting the town in peace," as was her design, only tended to strengthen and confirm the spirit of dissension. She gave the income of 1333 pounds to the town "to promote learning and piety & to unite the town in peace." The offensive conditions were these (1). "That the town repair the East meeting-house, & that the meeting-house be forever upheld on the spot on which the said meeting-house now stands." 2. "That a convenient house for a Grammar School be built within one year as near the said meeting-house as the grounds will admit a house for said purpose."

These conditions locating both church and school in the First Parish could not be accepted by the Second Parish. Whereupon Mrs. Winslow tenders the donation to the First Parish instead of the town, and in order to possess the legal right to receive and appropriate the property thus donated, the First Parish procures, in June, 1789, an act of incorporation into a district under the name of Tyngsborough. Dunstable and Tyngsborough now became two distinct municipalities, and now for the first time the writer has the pleasure of using the name "Tyngsborough" in a strictly appropriate sense.

In regard to this separation it would be somewhat difficult to decide whether Tyngsborough was cut off from Dunstable or Dunstable from Tyngsborough. It was a question of precedence. In favor of Dunstable is the fact that she retained the old plantation name, while on the other hand Tyngsborough was the First Parish and Dunstable the Second. Perhaps also Tyngsborough had the larger population, for in an enumeration taken in the next year (1790) Tyngsborough had 382 inhabitants and Dunstable 380.

These towns continue to be among the smallest towns in the State; the population of Tyngsborough in 1885 being 604, and that of Dunstable, 431.

On January 6, 1790, one hundred years ago, a church was formed in Tyngsborough, and the Rev.

Nathaniel Lawrence, a young man who, two years before, had graduated from Harvard College, was settled as pastor. His pastorate was remarkable for having continued forty-nine years. At the age of seventy-two years, while apparently in good health, he died suddenly on the Sabbath when returning from church.

Rev. Mr. Lawrence, in 1815, wrote a brief account of the town of Tyngsborough, from which I take the following items: "The greatest length of Tyngsborough is 9 miles, the greatest breadth 5 miles. The Merrimack is here 35 to 40 rods wide. Tyng's Pond was named from Hon. John Tyng. The soil of the intervale lands of the town is luxurious. Few towns formerly contained more beautiful forests; yellow pine, various kind of oak and the walnut most prevail. Many farms produce annually from 100 to 200 barrels of cyder. The town has three saw-mills and one grist-mill, one woolen-carding machine, two taverns, two stores, one publick (grammar) school, usually taught by a student from Harvard or Dartmouth, on a salary of about \$300; also a library of 140 volumes well selected. The religious society enjoys much peace and harmony. The income from Mrs. Winslow's fund is about 80 pounds per year. Since the formation of the church, in 1790, eighty members have been added. Health has prevailed, though in 1813 there were 60 cases of spotted fever, none of which were fatal. Population at the last census 704. The oldest person of those who have died was Hon. John Tyng, who died in his 93d year. Mrs. Winslow died of a lethargy. She was esteemed in life, at her death embalmed with tears, and to this day her memory is precious."

The limited space of this article forbids a full chronological record of the town. The rest of its history must be very brief and confined to a few important topics somewhat independent of chronological order.

SONS OF TYNGSBOROUGH.—When we consider that the population of Tyngsborough is less than one hundredth of that of Lowell, it will be readily conceded that this small town has been the birth-place and residence of a remarkable number of distinguished men. Of these men a few deserve a special record: Edward Tyng, the founder of the Tyng family, his son, Col. Jonathan Tyng, and his grandson, Col. Eleazer Tyng, were all among the most distinguished men of New England in those early days. We have already given each of them especial notice. Judge John Tyng, grandson of Col. Jonathan Tyng, was chief justice of the Court of Common Pleas, and was a man "distinguished for his ability and force of character." Hon. John Pitts, son-in-law of Judge Tyng, was a graduate of Harvard and at one time Speaker of the Massachusetts House of Representatives. Dudley Atkins Tyng was a graduate of Harvard and received from that college the title of LL.D. Dr. Samuel L. Dana, a distinguished physi-

cian, chemist and author, was a graduate of Harvard and received the title of LL.D. Daniel S. Richardson, Wm. A. Richardson and Geo. F. Richardson, the three sons of Daniel Richardson, a lawyer in Tyngsborough, have conferred especial honor upon their native town. They are all graduates of Harvard, in the years 1836, 1843 and 1850, respectively; they all entered the profession of law and became prominent and honored residents of the city of Lowell, and, what is a most remarkable fact, which probably has no parallel in the history of the cities of America, each brother in succession had the honor of being elected to the presidency of the Common Council of the city of their adoption. Daniel S., who has been called the Nestor of the Lowell bar, recently died at the age of seventy-three years. Wm. A., now chief justice of the Court of Claims at Washington, has reached the highest official position among the sons of Tyngsborough, having been at one time Secretary of the United States Treasury. Geo. F., after ably and gracefully filling the positions of Senator in the General Court of Massachusetts, and mayor of the city of Lowell, has withdrawn from political life, and holds a distinguished position at the bar of Middlesex County.

Of other residents of Tyngsborough who have received a college education are, Francis Brinley, who graduated from Harvard in 1818, Charles Butterfield (Harvard, 1820), Dr. Augustus Peirce (Harvard, 1820), Lendall P. Cazeaux (Harvard, 1842), Roger B. Hildreth (Harvard, 1843), Joseph Danforth (Dartmouth, 1811), Geo. Bancroft (Dartmouth, 1839). This list does not include various pastors of the churches of Tyngsborough who have been graduates of colleges.

Of the above list of college graduates Dr. Augustus Peirce should receive special notice. He was born in New Salem, Mass., March 13, 1803, and graduated from Harvard in 1820. In college he was the wit of his class. In his junior year, when only seventeen years of age, he delivered before the "College Engine Club" a humorous poem entitled "Rebelliad," which was received by his comrades with unbounded applause, and which was far more acceptable to the students than complimentary to the members of the faculty. President Kirkland, having called young Peirce before him ostensibly to censure him for his habit of "cutting prayers," dismissed him with the following reproof: "I think, Peirce, you would be more regular in attending morning prayers if you retired earlier in the evening and did not sit up so late writing poor poetry." However, the popular estimate of the poem prevailed, and a copy of it is now preserved in the college library.

Dr. Peirce was a man of quick perceptions, agreeable manners, and of a cast of mind admirably adapted to the practice of his profession. After a practice of ten years in Tyngsborough, having, as was supposed, been poisoned from a lead pipe which entered his well, his health failed, and, in the prime of his manhood, he died in 1849, at the age of forty-seven

years. His son, Dr. Augustus F. Peirce, who succeeded his father in the medical practice in Tyngsborough, was greatly beloved as a man, and gave high promise as a physician. But his career was brief. He died of consumption in 1855, at the age of only twenty-eight years.

Dr. Calvin Thomas, the predecessor of Dr. Peirce, though not a graduate of Harvard, received, in 1824, the honorary degree of M.D. from that University, when at the age of fifty-nine years.

Dr. Thomas was born in Chesterfield, N. H., Dec. 22, 1765. Having lost his parents in his early years, he learned the trade of a carpenter, which, however, he soon relinquished on account of failing health. At the age of twenty-four years he commenced the study of medicine. At the age of twenty-eight years, being resolved to find an eligible field for the practice of his profession, he started on horseback from Putney, Vt., where he had studied medicine under Dr. Josiah Goodhue, and in his journey stopped overnight in the town of Tyngsborough. Something attracted him to the place, and he made it the field of his long professional practice of fifty-six years.

Dr. Thomas was no ordinary man. "He was over six feet in height, of a florid complexion and a large and compact frame. The day before his last sickness, being then almost eighty-seven years old, he successfully reduced a dislocated humerus with only the assistance of a neighbor." In one of his thirty large books of memoranda, which he diligently kept for many long years, he made the following record for December 22, 1849: "This day I am 84 years old, and crossed the Merrimack River in a canoe, walked one mile to visit a patient." He died in 1851 at the age of nearly eighty-seven years.

Dr. Charles Dutton, now the practicing physician of the town, keeps in his office the portrait of his revered predecessor, Dr. Thomas, while in his large and successful practice he follows the footsteps of the aged physician. Tyngsborough is the birth-place of John S. Sleeper, formerly mayor of Roxbury and author of "Salt Water Bubbles" and other pleasing literary works. Mr. Sleeper was for twenty years, from 1834 to 1854, the editor of the *Boston Journal*. He was born September 21, 1794.

The population of Tyngsborough in 1790 was 382; in 1800, 696; in 1840, 870; in 1870, 626; in 1880, 629; in 1885, 604.

From this statement it appears that there was a rapid increase of population following the incorporation as a district in 1789, and that for the last forty years there has been a gradual decline. The town has shared, with almost all other agricultural towns in New England, the depletion in population consequent upon the establishment of the great manufacturing enterprises of recent years in other localities.

In the War of the Rebellion Tyngsborough, though she sent forth no organized company, contributed of her sons to swell the ranks of companies elsewhere

formed. The following is a list, probably not complete, of the soldiers sent by this town :

Corporal Peter Littlehale and Corporal Solomon Spaulding, Company D, Sixth Regiment Infantry. M. V. M.; Charles A. Gordon, Erasmus Holmes, Geo. F. Laird were privates in the same company; Charles E. Andrews, Company A, Sixth Regiment; Francis O. Butterfield, Nathaniel Brinley, Jr., Samuel Burrows, Charles Burrows, Reuben O. Coburn, Samuel N. Young, James Murphy, Warren Pierce, Company K, First Regiment Heavy Artillery. Of these soldiers Brinley died in prison at Andersonville, Sept. 16, 1864; Samuel Burrows died in Baltimore, July 27, 1864, and Pierce was appointed hospital steward May 11, 1864.

In the same regiment was Daniel B. Lawrence, of Company L. In the Second Regiment of Heavy Artillery was Francis A. Sawyer, of Company E, and in the Third Regiment, Richard Feighely, of Company G.

Henry H. Babb, Michael Carney, Russell S. Horton, Lemuel B. Jones and James E. Moulton were in Fourth Regiment of Heavy Artillery.

Frank Wilson, Company E, Twenty-sixth Regiment Infantry; John F. Blodgett, corporal, Company C, Thirtieth Regiment, died at Carrolton, La., Oct. 12, 1862. Peter Butterfield, of the same regiment, died at New Orleans, Nov. 5, 1862. Andrew J. Cummings was in the same regiment. In the Thirty-third Regiment were Benj. Frost, Winfield S. Hunter, Josiah S. Jaquea, Martin Davis. In the Fifty-seventh Regiment, Jeremiah Dacy. In the Fifty-ninth, Charles R. Berry. In the Sixty-second; Geo. M. Kimball, Patrick Bryan, Company A, Ninth Regiment; John Burns, Company K, Ninth Regiment; Joseph E. Lewis, Company G, Seventeenth Regiment; John H. Hutchinson, Company C, Eighteenth Regiment; Geo. W. Butterfield, Company E, Twenty-fourth Regiment; J. A. Sargent, Twenty-sixth Regiment; John D. Littlehale, Company E, First Regiment Cavalry; Owen Clancey, Company E, Second Regiment Cavalry; Geo. Emerson Company I, Second Regiment Cavalry, killed at Opequan Creek, Va.

CHURCHES.—When Tyngsborough became a parish, in 1755, it acquired the authority for managing its religious affairs independently of Dunstable. The parish proceeded to erect a house of worship, but for many years possessed no organized church or settled pastor. On becoming a district, in 1789, it acquired the additional power of holding property in its own right. In 1800 it formed a regular church organization and settled a pastor, Rev. Nathaniel Lawrence, of whom we have already spoken. Mr. Lawrence was in sentiment an Orthodox Congregationalist. Upon the close of the service of Mr. Lawrence, in 1839, the church settled a Unitarian pastor, Rev. Horatio Wood, who officiated until 1844, when he became Minister at Large in Lowell, in which city he still resides. From 1844 to 1854 the pastor was Rev. Wm. Morse. Rev. Geo. Osgood was the pastor from 1854 to

1859. Rev. Nathaniel O. Chaffee followed Mr. Osgood in a brief pastorate. The Rev. Stillman Barbour held the pastoral office until 1868. The succeeding pastorate, that of Rev. Mr. Knowlton, was cut short almost at its beginning by the death of Mr. Knowlton. From 1869 to 1871 the pastor was Rev. Angus R. Kennedy, who was succeeded by Rev. John S. Smith in a pastorate of eight years. Rev. Wm. W. Tufts, afterwards a physician in Arlington, Mass., succeeded Mr. Smith. Rev. James Danforth was pastor of the church from 1884 to 1887, when Rev. Henry C. Parker, of Nashua, was employed to preach every Sabbath afternoon.

In 1888 the present pastor, Rev. J. M. W. Pratt, was settled.

Brief mention should also be made of a church in Tyngsborough which continued for about a quarter of a century, but has for more than a quarter of a century ceased to exist. Its records even have disappeared.

This was the Baptist Church of Tyngsborough which was probably organized as early as 1835. The church erected a house of worship and had a succession of settled pastors, among whom were Rev. Mr. Parkhurst and Rev. Mr. Herrick.

The church was abandoned more than twenty-five years ago, and in 1864 the house of worship was sold to the town. This house is now used for public purposes, the first story being devoted to the Winslow Grammar School, and the second story to a town hall and public library.

There is an interesting tradition respecting the piety and constancy of Deacon Thaddeus Davis, an honored officer of the Baptist Church. For twenty years he was in his place in church on every Sabbath day. At the end of this time a severe sickness confined him for a season to his house. On his recovery he resumed his habit of church-going, which, without the interruption, continued for fifteen additional years. The good deacon was equally constant in what he didn't do as in what he did do, for during his long residence in Tyngsborough he never once crossed the Merrimack River, which runs through the centre of the town.

The Universalist Church of Tyngsborough was organized about 1840. A small house of worship was erected and a succession of pastors was installed. Among these pastors were Rev. Josiah Gilman, who served about two years; Rev. Wm. Hooper, four or five years; Rev. J. V. Wilson, one year; Rev. Q. A. Shinn, one year; Rev. A. R. Wright, one year. Since Mr. Wright's pastorate (1882) no stated preaching has been held. Rev. J. M. Usher for two years occupied the pulpit one-half of the Sabbaths for about two years, giving to Dunstable one-half of his services. The house is now in the control of the "Universalist Convention," and is only occasionally used.

The Evangelical Church of Tyngsborough was established in 1868 mainly through the efforts of Miss Sarah Coburn and Miss Elizabeth Coburn. Henry

F. Durant, Esq., also rendered valuable pecuniary aid in giving success to the enterprise. The first preacher of this church was Rev. Samuel E. Lowry. The first settled pastor was Rev. Charles S. Brooks, who was succeeded by Rev. John Haley. The present pastor, Rev. Charles M. Carpenter, was ordained April 22, 1890. The church has erected a house of worship at the cost of \$7000.

PUBLIC SCHOOLS.—The town of Tyngsborough, during the school-year ending in March, 1890, sustained six public schools during the spring term, two during the summer term, five during the fall term, and three during the winter term, the entire expenditure for schools being \$1833.

The school founded by Mrs. Winslow had an average membership of twenty-one scholars. The income of the Winslow fund was \$120, which was between one-third and one-fourth of the entire sum expended for tuition in that school. The Winslow School, in which the studies appropriate both for a high school and a grammar school are taught, has never had a house erected especially for its permanent accommodation, but occupies the lower story of the town-house, which was constructed as a house of worship by the Baptist Society. The School Committee considered the room ill adapted to the wants of such a school. The School Committee, in their report prepared by Channing Whittaker, Esq., take high grounds in favor of the appointment of such teachers as have been especially trained to the performance of the duties of an instructor, and for appropriating the money justly demanded for securing such instructors.

MANUFACTURES.—The manufactures of Tyngsborough are limited by the want of sufficient water-power. Mill Brook and one or two other streams afford a small amount of power, and there are in the town two box manufactories in active operation, a brush manufactory, two grist-mills and two saw-mills.

The box manufactory and saw-mill of John G. Upton, dealer in lumber, are somewhat extensive, giving employment to about twenty men.

The brush manufactory of H. A. Washburn gives employment to about five men. The box manufactory of E. O. Fifield is on the Dunstable road.

On the east side of the Merrimack a saw-mill is operated by W. A. Sherburne.

The manufacture of boxes has been carried on in the town for twenty-five years or more.

THE SOCIAL LIBRARY OF TYNGSBOROUGH.—As early as 1794 a small library was started in the town, which in 1797 contained twenty-six volumes. In 1798 the libraries of Tyngsborough and Dunstable were united. The library thus formed was sustained until 1833, when the books were distributed among the proprietors. A new library was organized in 1831, called "The Social Library of Tyngsborough," having for its directors Dr. Calvin Thomas, Daniel Richardson, Esq., and Robert Brinley, Esq. In 1878 this library was donated by its proprietors to the town,

and it constitutes a part of the free public library, which is controlled by trustees. It now contains 3319 volumes. The librarian is Mrs. Lizzie T. Curtis. In 1880 Hon. Geo. F. Richardson, of Lowell, donated to this library 100 volumes.

THE BRINLEY MANSION.—As the traveler passes up the right bank of the Merrimack the most imposing object which meets his eye is the Brinley Mansion. It is a stately structure of three stories, towering aloft upon the summit of a high swell of land admirably adapted to such an edifice. On either side of the mansion are spacious verandahs two stories in height, and in the rear the various out-buildings are tastefully arranged. The mansion is about fifty rods from the street, having in front, covering the lawn, a grove of lofty elms, while across the river the banks are clothed with a forest of evergreen trees. The whole scene produces a fine effect, both for its grandeur and its æsthetic beauty. One thing only breaks the charm. On one of the elms near the gate-way is a placard on which, in large letters, is the very unpoetic legend: "FOR SALE."

So much interest attaches to this mansion, and the vast Tyng estate on which it stands, that a very brief history will be given. Edward Tyng, a merchant in London and afterwards in Boston, was, as has already been told, the founder of this estate. An account of Edward Tyng and of his son, Col. Jonathan Tyng, has already been given. William Tyng, the second son of Col. Jonathan Tyng, was the father of Judge John Tyng, chief justice of the Court of Common Pleas after the Revolution. Judge Tyng, being an only son, received the estate from his grandfather, Col. Jonathan Tyng. Mary, the only daughter of Judge Tyng, became the wife of John Pitts, of Boston, who graduated at Harvard in 1757, and, at one time, was Speaker of the Massachusetts House of Representatives. It was Mr. Pitts who erected the Brinley Mansion, just described, on the site of the old and rambling house in which his father-in-law, Judge Tyng, had lived.

Mrs. Pitts having become the inheritor of her father's large estate, she and her husband resided a part of the time in Tyngsborough, Mr. Pitts being the clerk of the district in 1789.

Having thus far traced the family of William Tyng, we return to trace that of his younger brother, Colonel Eleazer Tyng.

Colonel Eleazer Tyng was the third son of Colonel Jonathan Tyng. He graduated at Harvard in 1712, and was, in both civil and military affairs, one of the most important men of the town. Sarah, the only daughter of Colonel Eleazer Tyng, became the wife of John Winslow, of Boston. Having outlived her husband, and having no children, she persuaded Dudley Atkins, of Newbury, a distant relative, to assume the name of Tyng, and made him the heir of most of her large estate. The estate was sold by him to Nathaniel Brinley in 1779. Robert Brinley, son of

the purchaser, not only inherited from his father the Winslow estate, but, having married Elizabeth Pitts, a granddaughter of Judge John Tyng, he became the proprietor of most of the property left by Colonel Jonathan Tyng to his two sons, William and Eleazer. He was familiarly called *Sir* Robert Brinley, and was a highly honored gentleman of the old school. He took an active interest in the affairs of the town. His son Robert was never married. His son Nathaniel lived in Tyngsborough, occupying the Brinley mansion. Of the children of Nathaniel Brinley, William Brinley is a resident of Meredith, N. H.; Mary E. Kennedy, whose husband, the Rev. Angus R. Kennedy, was pastor of the Unitarian Church in Tyngsborough, resides in Lowell, and Nathaniel Brinley, Jr., died in prison at Andersonville in 1864.

Too often in recent years has the community been startled at the sudden downfall of men who have long held the highest positions of trust and honor in the religious and commercial world, a downfall which brings with it disaster and ruin to confiding bondmen and creditors. A conspicuous example of this class of men was Abraham Jackson, of Boston, by whose astounding defalcations the time-honored Brinley estate suffered irrevocable loss. The question is yet to be decided by the courts of law how much can be saved to the rightful owners from the general wreck.

THE TYNGSBOROUGH IRON BRIDGE.—In 1871, when the only public means of crossing the Merrimack River, between Lowell and Nashua, was a chain-ferry at Tyngsborough, a petition, very numerous signed by citizens of Tyngsborough and Lowell and adjacent towns, was presented to the Legislature, praying for the construction of a bridge across the Merrimack at Tyngsborough. The population of Tyngsborough being only 631, and its total property valuation being only \$321,000, this town was incapable of building the bridge or of even bearing a very large portion of the expense of its construction.

After considerable hesitation and delay the commissioners decided to construct the bridge. The work begun was twice swept away by the force of the current, but at length the graceful and beautiful iron bridge which now spans the river was completed. It is 600 feet long and twenty feet wide, and its cost was \$94,000. Of this sum \$14,000 was assessed upon Tyngsborough, together with the expense of maintaining the bridge.

After bearing the heavy burden of maintaining the bridge for ten years, through the persistent and earnest efforts of a committee of the town, consisting of Dr. Charles Dutton, J. H. D. Littlehale, Esq., and S. S. Sherman, Esq., this burden was transferred to Middlesex County. In this work of relieving the town of this unfair division of expense, the committee were aided by Hon. George F. Richardson, of Lowell, a member of the Massachusetts Senate.

TRADITIONS.—There are interesting traditions re-

specting various localities in the town of Tyngsborough. It is said that the Indians were wont to keep the higher lands about Tyng's Pond clear from trees and bushes by frequently burning over the surface of the ground, while the woods were allowed to grow in the marshes around the pond. By this device they were able to kill the deer when they emerged from the woods and crossed the cleared lands. Elisha's Brook is said to derive its name from the fact that a friendly Indian, whose name was Elisha, aroused the hate and jealousy of other Indians by entering the service of Col. Tyng. On one occasion, when bringing hay from Tyng's meadow, he was waylaid and killed. A brook and an apple-tree near the scene of the murder received, respectively, from this event, the names of "Elisha's Brook" and "Elisha's Sweeting." The apple, "Elisha's Sweeting," was long perpetuated in the vicinity by grafting. On the occasion of the murder of Elisha, the "alarm drum," kept at Col. Tyng's, was beaten and three guns were fired to warn the people of the presence of hostile Indians.

The "Haunted House," in Tyngsborough, so often referred to in the history of the town, was the old residence of the celebrated Col. Jonathan Tyng, who, when all the other inhabitants fled from the neighborhood in King Philip's War, fortified his home and remained alone at the post of danger. What gave to it the name of the "Haunted House" is matter of obscure tradition. It is said that Col. Tyng constructed underground a gallery which, in case of an attack by Indians, might afford the means of strategy or escape. The story is told of two girls who crossed the river from the eastern side. As they approached Col. Tyng's house, to visit at which they had come, one of them suddenly disappeared from human sight. The story is vaguely told, but there was something mysterious about that vanishing girl. What other girl would afterwards dare to pass the house in the dark? Col. Tyng's house stood upon a bold swell of land and the site was admirably selected for defence, having in plain view the shores of the Merrimack, both up and down the river, and overlooking Wicasuck Island. The cellar is still to be seen and the fine view from the spot well rewards the traveler for pausing on his way and climbing the hill.

IMPROVEMENTS.—Although the small agricultural towns are wont to fall far behind their more populous neighbors in the race of modern improvement and invention, yet in one respect Tyngsborough is far in advance of many of the cities of Massachusetts. It has an electric railroad. This road, four miles in length, which connects the town with the city of Lowell, was constructed by the Lowell and Dracut Street Railway Company. This company has erected on the borders of Tyng's Pond, on grounds lying partly in Tyngsborough and partly in Dracut, a dance-hall, a pavilion and various buildings, and have equipped them for a popular and elegant resort for parties of pleasure from the city and elsewhere. The

woods on the borders of the pleasant lake, where 200 years ago the Indian hunted the wild deer, will often now resound with the voice of merriment.

The town of Tyngsborough, with its excellent railroad facilities, affording easy access to the great cities of Lowell and Boston, with its beautiful river running through its centre and spanned at the village with a graceful bridge, with its charming scenery and rich historic memories, has before it a hopeful future and will ever be to its inhabitants a pleasing and attractive home.

CHAPTER XXXVI.

SUDBURY.

BY REV. ALFRED SERENO HUDSON.

THE town of Sudbury was settled in 1638, and received its name in 1639. It was the nineteenth town in the Massachusetts Bay Colony, and the second situated beyond the flow of the tide. Originally it was bounded on the east by that part of Watertown which is now Weston, on the north by Concord, and southerly and westerly by the wilderness, or the unclaimed lands of the Colony.

The Indian name of the river and country adjacent on the north was *Musketaquid*, or *Musketaquid*, and it is presumable that the same name was applied to this region. *Musketaquid* is supposed to be made up of two Indian words—*muskeht*, meaning "grass," and *akkeit*, which signifies "ground;" and if applied to the river, "grassy brook," or "meadow brook." The name formed by these words, it is stated, as nearly resembles *Musketaquid* as the Indian dialect will allow. (Shattuck.) As the same stream runs through Concord and Sudbury, and the meadows in these places are equally green and broad, it is not by any means unlikely that the same term was applied to each place and the river, as it runs through them both. This is rendered still more probable by the fact that Karte, the Indian owner of the land first granted at Sudbury, was also an owner, with others, of the territory at Concord; as the Colony records inform us that Karte, with Tahattawan, the sachem of that place, with some others, consented to the sale of territory to the English in 1637. As Karte lived in the territory that is now Sudbury, and his wigwam was not far from the river, it is presumable that he would call the stream, as it flowed near his home, by the same name that it was known by as it flowed through his domains a few miles farther north.

INDIANS.—The discovery of numerous relics indicates that the land was once considerably occupied by Indians, but at the time of the town's settlement probably but few lived there. The names of Karte,

Nataous, Peter Jethro, Old Jethro or Tantamous belonged to prominent natives, and of these some few facts are preserved. Karte was the Indian owner of that part of Sudbury which was first granted to the English. His home was at a hill a little south-east of Sudbury Centre, called Goodman's Hill. The name Goodman was given him by the English. It is said he was an attendant on the preaching of Rev. Edmund Brown, the first minister of Sudbury, and that by his preaching he was converted to Christianity. Nataous, also called Netus, and sometimes William of Sudbury, was prominently connected with the events of King Philip's War. In the destruction of the Eames homestead at Framingham, and the capture of the inmates, he took a conspicuous part by acting as leader. He was also present at the midnight encounter between the English and Indians near Sudbury, on the night of March 27, 1676, on which occasion he was slain. He was associated with the Nipnet Indians, who inhabited the interior of Massachusetts, and was sometimes called the Nipmuck Captain.

Tantamous, who was also called Jethro, and more commonly Old Jethro, to distinguish him from his son, Peter Jethro, or Jethro the Younger, lived at Nobscot during a portion of his later life. In his earlier years it is supposed he lived at Isabaeth, the country about the Assabet River, now Maynard. He was a prominent personage among the Indians, and known as a powwow, or medicine-man. Gookin says of him: "This man and his relations were not praying Indians;" that "they lived at a place near Sudbury, Nobscot Hill, and never submitted to the Christian profession (except his son, Peter), but separated from them."

Peter Jethro was also called Animatohu and Hantomush. In 1650 he lived at Natick, and was one of Rev. Mr. Eliot's converts. He had a good education for an Indian, and was held in high esteem. Gookin speaks of him as a "grave and pious Indian." He was sent to Washakin (Stirling) as teacher and preacher to the Indians. The indications are that the Indians had homes and favorite hunting-grounds, not only about Nobscot and Goodman's Hill, but also along the river course and about Cochituate Pond. Tradition says they had a burying-ground at what is now Wayland; and on West Brook, a little southerly of Sand Hill, was the Indian bridge. Probably the country was largely depopulated by the repeated plagues which devastated the region of Massachusetts Bay, about the time of its occupation by the English. As a general thing the whites and Indians lived on friendly terms in Sudbury prior to King Philip's War. And when that war began and the town was attacked, it was mostly by invaders, and not by parties who ever had a rightful claim to the soil.

The town was settled by Englishmen. The plan of settlement originated at Watertown, which was set-

tled a few years previous by Sir Richard Saltonstall and company, who came to America in the ship "Arbella."

To a large extent, the settlers came direct from England. Bond, the historian of that town, says: "Only a small proportion of the names of the early grantees of Sudbury are on the Watertown records; and some who went there returned. Some, whose names are on the records of both places, were either residents of Sudbury but a very short time, or, it may be, never lived there at all." The explanation of this may be, first, that the plantation was not proposed because *all* the petitioners designed to make it their permanent home, but that it might be an outlet to an over-populous place. Watertown, it was considered, had too many inhabitants. The emigrants of ship after ship, as they arrived at these shores, went to the older places; and this led to what was called "straitness of accommodation." New land would present greater allurements to the new comers, and the earlier settlers would thus be left undisturbed in their original estates. Secondly, speculative purposes may have led some to engage in the scheme for the Sudbury settlement. More or less, doubtless, enlisted in the enterprise designing to transfer their titles to others, as fresh emigrants came to the country. Sharing with the residents of the settlement the expense of the undertaking, they had a right to convey the lands that were allotted them, and receive such compensation therefor as their increased value might bring. Thus, while the plan of the settlement of Sudbury originated at Watertown, and some of the settlers came from there, yet largely, as we have said, it was settled by emigration direct from England. Most or all of the names of the earlier settlers have been preserved, and are repeatedly given in connection with land divisions prior to the close of 1640.

From the town records we have compiled the following list of the early grantees or settlers, who went to the Sudbury Plantation about 1638 or 1639:

Mr. William Pelham, Mr. Edmund Browne, Mr. Peter Noyse, Bryan Pendleton, Walter Haine, John Haine, John Blandford, Hugh Griffyo, Edmond Goodnowe, Robert Beast, Thomas Noyse, Thomas Browne, Robert Darnell, William Browne, Thomas Goodnow, John Freeman, Solomon Johnson, William Ward, Richard Newton, John Howe, George Munnings, Anthony Whyte, Andrew Belcher, John Goodnowe, John Reddock, Thomas Whyte, John Knight, William Parker, John Parmenter, Sr., Edmond Rice, Henry Rice, Wyddow Buffumhyte, Henry Curtis, John Stone, John Parmenter, Jr., John Rutter, John Toll, Henry Loker, John Wood, John Loker, Widow Wright, John Bent, Nathaniel Treadaway, Robert Hunt, Widow Hunt, John Maynard, Joseph Tainter, Robert Fordin, or Fordham, Thomas Joslyn, or Jalen, Richard Sanger, Richard Bildcome, Robert Davis, Henry Prentiss, William Kerley, Thomas Hoyte, Thomas Flynn.

The following are names of persons who were at the settlement soon after it began:

Thomas Axcell, Thomas Read, John Moore, Thomas Bishop, Thomas Plympton, Hugh Drury, Philemon Whale, William How, John Smith, Thomas Buckmaster, John Grout, Thomas Cakebread, John Reht, John Waterman, Goodman Wetherell, John George, Thomas King, Peter King, Jonas or James Pendleton, John Woodward, Shadrack Hapgood, Edward Wright.

Of the Sudbury settlers who once lived in Watertown, we have the following names: Robert Betts (Beast), Thomas Cakebread, Henry Curtis, Robert Daniel (Darnell), John Grout, Solomon Johnson, John Knight, George Munnings, William Parker, Bryan Pendleton, Richard Sanger, Joseph Tainter, Anthony White, Goodman (John) Wetherell, Nathaniel Treadaway, John Stone.

Some of these men were prominent and valuable citizens of Watertown. Bryan Pendleton was one of its early selectmen. Nathaniel Treadaway and John Stone were sons-in-law of Elder Edward How. Robert Betts had a share in the Great Dividend Allotment, and the Beaver Brook "plow lands." Of those who came direct from England, we have on a single ship's list of passengers the names of some of the most prominent persons in the Sudbury Plantation, namely:

"The list of the names of the Passengers Intended for New England in the good shipp the Confidence, of London, of C. C. tonnes, John Johnson M^r and thus by vertue of the Lord Treas^r warr^t of the xvjth of April, 1638. Southampton, 21^o April 1638.

It is not certain that the young men mentioned in this ship's list as "servants," or "hired men," ever came in that capacity. John Rutter was by trade a carpenter; Richard Sanger was a blacksmith; one had a family when he came; two others were afterward sons-in-law of the persons in whose employ they ostensibly came; and all of them took their place among the substantial men of the settlement.

It was a tradition among the descendants of John Rutter, without their having a knowledge that this ship's list was in existence, that their ancestor came to this country disguised as a servant.

The state of the times and the strictness of English laws at that period, with regard to snips and emigrants coming to America, might be a reason why some might come in disguise. If this was so in the case of one, it might have been so with regard to the rest.

In connection with the names of the settlers, it is appropriate to state something of their character. In attempting this, perhaps we can do no better than to say that they fitly represented the noble element that came to the New England shores at that period. They were Puritans both in theory and practice; and afar from the conveniences and luxuries of their native land, sought in a new country a home remote from ecclesiastical and political strife. They embarked for America at a time when England was in an unsettled condition, and when ship after ship was bringing to these shores some of her purest and staunchest citizens. The whole trend of their conduct is indicative of self-reliance, though they recognized all proper authority. What the common weal required they took hold of with zest; and in their adherence to what they thought suitable, they showed a perseverance truly commendable. Their proceedings in town-meeting, and the manner in which the records were kept, indicate that the education of a part of them at least was good for the times; and the measures enacted for the common convenience and welfare show common sense and sagacity.

As a religious people, they in no way lacked what we ascribe to the historic Puritan. Although compelled by circumstances to economize all their resources, and to make the most of time, talents and strength to meet the demands of every-day life, yet they found time to serve their Creator, and praise and adore Him in their forest home. Their Christianity manifested itself in their steadfast adherence to the Christian faith, in their reliance on God, and their love for His holy law.

Industry was a prominent characteristic. From the minister down to the humblest citizen, each had a share in the manual work of the settlement. Though the minister's salary was in part paid in produce,

yet he was assigned lands and attended to husbandry. Another characteristic trait of the settlers seems to have been their desire for territorial enlargement and possession, and for the pioneering of new places. To such an extent did this spirit prevail in Sudbury and its neighboring town, Concord, that the following law was passed by the Court in 1645:

"In regard of the great danger that Concord, Sudbury and Dedham will be exposed unto, being inland Townes and but thinly peopled, it is ordered that no man now inhabiting and settled in any of the said Townes (whether married or single) shall remove to any other Town without the allowance of the magistrates or the selectmen of the towne, until they shall obtain leave to settle again."

The settlers of Sudbury were young men, or in the prime of stirring manhood; they were not patriarchs near the close of their pilgrimage. Even those with whom, because of their prominence, we most associate dignity and gravity, were comparatively young men when the settlement began. By the passenger-list of the "Confidence" it will be noticed that only Walter Haine had reached the age of fifty-five, and John Rutter was only twenty-two; Robert Davis, thirty; John Blandford, twenty-seven; John Reddet, twenty-six; Peter Noyes, forty-seven; John Bent, thirty-five; John Goodenowe, forty-two; Edmond Goodenowe, twenty-seven; Thomas Goodenowe, thirty. These ages are doubtless correct, as we have in 1666 a deposition made by one of them, Edmond Goodenowe, in which he alleges that he is about fifty-five years old. Rev. Edmund Browne was in about the prime of life when he came to the plantation; and Edmund Rice was about thirty-four. In fact, we find in an old petition presented at the close of Philip's War, in 1676, from a dozen to a score or more of names that may have belonged to the early grantees. Probably from a quarter to a half century passed before there was a generation of old men in Sudbury.

LAND GRANTS.—The territory of Sudbury was in part granted to the people collectively who formed the plantation and established the town, and in part to individuals. The grants to the former were allowed at three different times, and were preceded by three different petitions. The first petition met with a response November 20, 1637, of which the following is a copy:

"Whereas a great part of the chief inhabitants of Watertown have petitioned this Court, that in regard to their straits of accommodation, and want of meadow, they might have leave to remove and settle a plantation upon the river, which runs to Concord, this Court, having respect to their necessity, hath granted their petition, and it is hereby ordered, that Lieut. (Simon) Willard, Mr. (William) Spencer, Mr. Joseph Weld and Mr. (Richard) Jackson shall take view of the places upon said river, and shall set out a place for them by marks and bounds sufficient for fifty or sixty families, taking care that it be so set out as it may not hinder the settling of some other plantation upon the same river, if there be meadow, and other accommodations sufficient for the same. And it is ordered, further, that if the said inhabitants of Watertown, or any of them, shall not have removed their dwellings to their said new plantation before one year after the plantation shall be set out, that then the interest of all such persons, not so removed to the said plantation, shall be void and cease, and it shall be lawful for such as are removed and settled there, or the greater part of them, being freedmen, to receive other persons to inhabit in their

rooms, in the said plantation; *provided*, that if there shall not be thirty families at least there settled before the said time limited, that then this Court, or the Court of Assistants, or two of the Council, shall dispose of the said plantation to any other. And it is further *ordered*, that after the place of the said plantation shall be set out, the said petitioners, or any such other freemen as shall join them, shall have power to order the situation of their town, and the proportioning of lots, and all other liberties as other towns have under the proviso aforesaid. And it is lastly *ordered*, that such of the said inhabitants of Watertown, as shall be accommodated in their new plantation, may sell their houses and improved grounds in Watertown; but all the rest of the land in Watertown, not improved, shall remain freely to the inhabitants, which shall remain behind and such others as shall come to them.

"And the said persons appointed to set out the said plantation, are directed so to set out the same, as there may be 1500 acres of meadow allowed to it, if it be there to be had, with any convenience, for the use of the town." ("Colony Records," vol. i. p. 210.)

The Court, having granted the request for a plantation at Sudbury, allowed the petitioners to go on with their work, and appointed a committee to establish the bounds and make an allotment of land.

The land first appropriated was supposed to comprise a tract about five miles square. It had for boundaries Concord on the north, Watertown (now Weston) on the east, and on the south a line running from a point a little east of Nobscot Hill along the present Framingham and Sudbury boundary direct to the Weston town bound, and on the west a line two miles east of the present western boundary.

The second grant was of an additional mile. This was allowed to make up a deficiency in the first grant, which deficiency was discovered on making a survey a few years after the settlement began, and it was petitioned for May 13, 1640. The petition was for a mile in length on the southeast and southwest sides of the town; and it was allowed on condition that it would not prevent the formation of another plantation, "or hinder Mrs. Glover's farm of six hundred acres formerly granted." (Colony Record, vol. i. p. 289)

The third tract was granted in 1649. It contained an area two miles wide, extending along the entire length of the western boundary. The Colony Record concerning this grant is: "That Sudberry is granted two miles westward next adjoining to them for their furth^r enlargement, provided it [prejudice] not W^m Browne in his 200 acres already granted." (Vol. ii. p. 273.)

Besides these three grants there were others made to individuals. One of these was to William Browne, of which the record is as follows: "In answer to the petition of W^m Browne for two hundred ac^s dew for twenty five pounds putt into the joynt stocke by M^{rs} Ann Harvey, his Aunt, from whom he made it appear to the Court he had sufficyent deputacōn to require it, his request was grannted; viz., 200 ac^s of land to be layed out to him wthout the west lyne of Sudbury, by Capt. Simon Willard & Seargeant Wheeler." All this land was probably in that part of Sudbury which is now Maynard. The first tract for the plantation was purchased in 1638 of Karte, the Indian proprietor, and it has been supposed that

a deed was given; but this is not essential as evidence of the purchase, since, in the deed given by Karte for land subsequently bought, he acknowledged the sale of the first tract in the statement that it was sold to "George Munnings and to the rest of the planters of Sudbury." In this first bargain of real estate it is supposed that Mr. Munnings acted as agent for the settlers, and that he, together with Brian Pendleton, advanced the money for payment.

The second tract was also purchased of Karte, who gave a deed, of which the following is a true copy:

INDIAN DEED.

"Bee it known vnto all men by these presents that I Cato otherwise Goodman for & in consideration of fyve pounds w^{ch} I have received in commodities & w^{ch}umpunge of Walter Hayne & Hugh Griffin of Sudbury in behalf of themselves & the rest of the planters of Sudbury; doe this my wite in give & grant bargain & sell vnto the said Walter Hayne —(Hayne)—& Hugh Griffio & the said planters of the town of Sudbury so much land southward & so much land westward next adjoining to a tract of land w^{ch} I said Cato formerly souled vnto George Munnings & the rest of the planters of Sudbury as may make the bounds of the said town to be full fyve miles square wth all meadows, brooks, liberties, privileges & appertennances thereto belouging wth all the said tract of land granted. And I grant vnto them for me & mine heirs & brethren that I & they shall & will at any tyme make any further assurance in writing for the more p^{er}fit assuring of the s^d land & all the premises wth the appertennances vnto the s^d Walter Hayne & Hugh Griffin & the s^d planters & their successors forever as they shall require.

"In witness whereof I herevnto put my hand & seal the twentieth day of the fourth month one thousand six hundred forty eight.

"Signed sealed and delivered in the presence of

"EMMANUEL DOWNING
 EPHRAIM CHILD
 CUTCHAMBERKIN [mark]
 JOJENNY [mark] } brothers of Cato

"This deed was sealed & acknowledged by the s^d Cato (who truly understood the contents of it the day & year above written) Before mee.

"JOHN WINTHROP, Governor.

"Registry of Deeds

"Suffolk Co. Mass."

The deed for the land last granted, or the two-mile tract to the westward, is on record at the Middlesex Registry of Deeds, Cambridge, and the following is a true copy of a portion of it:

"For as much as the Geo^d Court of the Massachusetts Colony in New England hath formerly granted to the Towne of Sudbury in the County of Middlesex in the same Colony, an addition of land of two miles westward of their former grant of five miles, which is also layd out & joynteth to it: and whereas the English occupiers, proprietors and possessors thereof have chosen Capt Edmond Goodenow, Leif^t Josiah Haynes, John Goodenow, John Brigham & Joseph Freeman to be a comittes for themselves & for all the rest of the English proprietors thereof, giving them their full power to treat wth & to purchase the same of the Indian proprietors of the s^d tract of land & to satisfy & pay them for their native, ancient & hereditary right title & interest thereunto.

"Know all People by these presents—That wee, Jehojnkinn, John Magus, John Muskqna & his two daughters Esther & Rachel, Benjamin Buhue, John Speen & Sarah his wife, James Speen, Dorothy Wenneetoo, & Humphrey Bohus her son, Mary Neppannun, Abigail the daughter of Josiah Hardiog, Peter Jethro, Peter Muskquamogh, John Boman, David Mannoan & Betty who are the ancient native & hereditary Indian proprietors of the s^d tract of two miles of land (for & in consideration of the just & full sum of twelve pounds of current mony of New England to them in hand well & truly paid at or before the ensealing & delivery hereof by the said Capt Edmond Goodenow, Leif^t Josiah Haynes, John Goodenow, John Brigham & Joseph Freeman in behalfe of themselves and of the rest of the English possessors, occupiers, proprietors & fellow-purchasers) the receipt whereof they do hereby acknowledge &

therwith to be fully satisfied, contented & paid & thereof and of every part & parcel thereof they do hereby for themselves & their heys Executors Administrators & assigns clearly fully & absolutely release, acquit exonerate & discharge them & all the English possessors, occupiers, proprietors & fellow-purchasers of the same & all & every one of their heys Executors, Administrators, Assigns & successors forever) Have given, granted, bargained, sold, aliened, enseoosed, made over & confirmed, & by these presents, do give, grant, bargain, sell, alien, enseoose, make over, confirme & deliver all that their s^d tract & parcell of lands of two miles (hee it more or less scituats lyiog & being) altogether in one entire parcell in the s^d Towne of Sudbury in the County of Middlesex afores^d & lyeth al along throughout on the western side of the old five miles of the s^d Towne & adjoyneth thereunto (together with the farme lands of the heys of William Browne that lyeth within the same tract, unto the s^d Capt. Edmond Goodenow, Leif Josiah Haines, John Goodenow, John Brigham & Joseph Freeman & unto all & every one of the rest of the English possessors, occupiers, proprietors & fellow-purchasers thereof as the same is limited, butted & bounded on the East by the old part of the s^d Towne of Sudbury (which was the five miles at first granted to the s^d Towne) & is butted & bounded northerly by the line or bounds of the Towne of Concord, Westerly by the line or bounds of the Towne of Stow & is bounded southerly & partly westerly by the lands of Mr Thomas Danforth.

"Furthermore wee the above named Indian Grantors do hereby oblige & engage ourselves all and every one of our heys executors Adm^{rs} assigns & successors unto the s^d English possessors occupiers & proprietors & fellow-purchasers & to all and every one of their heys executors administrators and assigns that wee and every one of us & ours as afores^d shall & will from time to time & at all times readily & effectually do (at our own propper costa and charge) or cause to be so done any other or further act or acts thing or things that the law doth or may require for more sure making and full confirming of all & singular the hereby granted premises unto the s^d Edmond Goodenow, Josiah Haines, John Goodenow, John Brigham & Joseph Freeman & unto all & every one of the rest of the English possessors, occupiers proprietors and fellow-purchasers of the premises & unto all & every one of their heys executors administrators and assigns for ever. *In Witness* whereof the above named Indian Grantors have hereunto each for themselves & altogether sett their hands and seals dated the 11th day of July in the year of our Lord God one thousand six hundred eighty & four. From lands thus allowed, the Plantation of Sudbury was formed. It required, however, more than the allowance and laying out of the land and the settlement of it to make it a town. A separate act of incorporation was necessary to complete the work. This was done September 4, 1639, when the Court ordered that "the newe Plantation by Concord shall be called Sudbury." (Colony Records, Vol. 1, p. 271.)

The name ordered by the Court is that of an old English town in the county of Suffolk, near the parish of Bury St. Edmunds, at or near which place it is supposed the Browns may have dwelt. It is not improbable that the name was given by Rev. Edmund Brown, the first minister of Sudbury, who sold lands in the district of Lanham to Thomas Read, his nephew, and who, it is supposed, may have also named that locality from Lavenham, Eng., a place between Sudbury and Bury St. Edmunds. The place, though spelled Lavenham, is pronounced Lannam in England (Waters). The proximity of Sudbury and Lavenham, Eng., to what was probably the original home of Mr. Browne, together with the fact that he was an early owner of the lands at Lanham, and a prominent man at the settlement, affords at least a strong presumption that Mr. Edmund Browne named both Sudbury and Lanham.

The settlement of the town began on the east side of the river. The first road or street, beginning at Watertown (now Weston), extended along a course of about two miles; and by this the house-lots of the settlers were laid out and their humble dwellings stood.

TOWN-MEETINGS.—Until as late as the nineteenth century the town-meetings were held in the meeting-house. After the meeting-house was built sometimes they were held in a private house or at the "ordinary." As for example, Jan. 10, 1685, and again Feb. 18, 1686, there was an adjournment of town-meeting to the house of Mr. Walker, "by reason of the extremity of the cold." In 1764 the town adjourned one of its meetings to the house of "William Rice, innholder." In 1782, "adjourned town-meeting to the house of Mr. Aaron Johnson, innholder in s^d town." After the division of the town into the East and West Precincts, the town-meetings alternated from the east to the west side.

In 1682-83 the time of meeting was changed from February to October, the day of the week to be Monday.

The reason of this change may be found in the fact that it was difficult at some seasons to make a journey to the east side meeting-house; the passage of the causeway was occasionally rough, and town action might be thereby delayed or obstructed. The meeting was for a period warned by the Board of Selectmen. At the date of the change just mentioned, it "was voted and ordered, that henceforth the selectmen every year for the time being shall appoint and seasonably warn the town-meeting;" but afterwards this became the work of the constables. In the warning of town-meetings at one period, the "Old Lancaster Road" was made use of as a partial line of division. A part of the constables were to warn the people on the north side of the road, and a part those on the south side.

The town-meeting was opened by prayer. There is a record of this about 1654, and presumably it was practiced from the very first. At an early date voting was sometimes done by "dividing the house," each party withdrawing to different sides of the room. An example of this is as follows: In 1654, at a public town-meeting, after "the paator by the desire of the town had sought the Lord for his blessing in the actings of the day, this following vote was made, You that judge the act of the selectmen in sizing the Commons to be a righteous act, discover it by drawing yourselves together in the one end of the meeting-house." After that was done, "It was then desired that those who are of a contrary mind would discover it by drawing themselves together in the other end of the meeting-house."

In these meetings, marked respect was usually had for order and law. We find records of protest or dissent when things were done in an irregular way, as for instance, in 1676, we have the following record: "We do hereby enter our Decent against the illegal proceedings of the inhabitants of the town . . . for the said proceedings have Ben Directly Contrary to law. First, That the Town Clerk did not Solemnly read the Laws against Intemperance and Immorality as the Laws Require." Mention is also made of

other irregularities, and to the paper is attached a list of names of prominent persons.

The town officers were mostly similar to those elected at the present time. At a meeting of the town in 1682-83, it was ordered that the town-meeting "shall be for the electing of Selectmen, Commissioners and Town Clerk." Names of officers not mentioned here were "Constables, Iovoice Takers, Highway Surveyors and Town Marshal." About 1643, the persons chosen to conduct the affairs of the town were first called selectmen. The number of these officers varied at different times. In 1646 there were seventeen selectmen.

The service expected of the selectmen, beside being custodians at large of the public good, and acting as the town's prudential committee, were, before the appointment of tithingmen (which occurred first in Sudbury, Jan. 18, 1679), expected to look after the morals of the community. This is indicated by the following order: At a meeting of the inhabitants, Jan. 18, 1679, "It is ordered, that the selectmen shall visit the families of the town, and speedily inspect the same, but especially to examine children and servants about their improvement in reading and the catechism. Captain Goodnow and Lieutenant Haines to inspect all families at Lanham and Nobscot and all others about there and in their way, . . . and these are to return an account of that matter at the next meeting of the selectmen, appointed to be on the 30th of this instant January." We infer from certain records that the selectmen's orders were to be audibly and deliberately read, that the people might take notice and observe them.

The officials known as "highway surveyors" had charge of repairs on town roads. This term was early applied, and has continued in use until now. As early in the records as 1639, Peter Noyes and John Parmenter are mentioned as surveyors.

The business of town clerk, or "clark," which office was first held in Sudbury by Hugh Griffin, is shown by the following extracts from the town-book: "He is to take charge of the records and discharge the duties of a faithful scribe." "To attend town-meeting, to write town orders for one year, . . . for which he was to have ten shillings for his labor." In 1643 he was "to take record of all births and marriages and [deaths], and return them to the recorder." "It is so agreed that the rate of eight pound 9 shillings [be] levied upon mens estate for the payment of the town debt due at the present, and to buy a constable's staff, to mend the stocks, and to buy a marking iron for the town, and it shall be forthwith gathered by Hugh Griffin, who is appointed by the town to receive rates, and to pay the town's debt." (Town-Book, p. 75.) Feb. 19, 1650, Hugh Griffin "was released from the service of the town." The work that he had to perform was "to attend town-meetings, to write town orders, to compare town rates, to gather them in, and pay them according to the town's appointment, and to

sweep the meeting-house, for which he is to have fifty shillings for his wages."

Other officers were "commissioners of rates," or "invoice-takers." These corresponded perhaps to "assessors," which term we find used in the town-book as early as the beginning of the eighteenth century. The office of marshal was the same as that of constable. There is the statement on page 34 "that there shall be a rate gathered of ten pounds for the finishing of the meeting-house, to be raised upon meadows and improved land, and all manner of cattle above a quarter old to be prized as they were formerly prized, the invoice to be taken by the marshal."

At an early period persons were appointed for the special purpose of hearing "small causes." In 1655, "Lieutenant Goodnow, Thomas Noyes and Sergeant Groute were chosen commissioners to hear, issue and end small causes in Sudbury, according to law, not exceeding forty shillings." In 1648 Peter Noyes was "to see people ioyne in marriage in Sudbury." (Colonial Records, p. 97.)

In the early times towns could send deputies to the General Court according to the number of their inhabitants. Those that had ten freemen and under twenty, could send one; those having between twenty and forty, not over two. (Palfrey's History.)

We infer that if a person was elected to any town office he was expected to serve. It is stated in the records of 1730, that David Rice was chosen constable, and "being called up [by] the moderator for to declare his exception, or non-exception, upon which David Rice refused for to serve as constable, and paid down five pounds money to s^d town, and so was discharged."

Having considered the nature of the town-meeting, the place where works of a public nature were discussed and decided upon, we will now notice some of the works themselves. First, Highways, the Causeway and Bridge.

HIGHWAYS.—In providing means for easy and rapid transit, it was important for the town to make haste. Indian trails and the paths of wild animals would not long suffice for their practical needs. Hay was to be drawn from the meadows, and for this a road was to be made. Another was to be made to Concord, and paths were to be opened to the outlying lands. The first highway work was done on the principal street, which was doubtless at first but a mere wood-path or trail. An early rule for this labor, as it is recorded on the Town Records, Feb. 20, 1639, is as follows: "Ordered by the commissioners of the town, that every inhabitant shall come forth to the mending of the highway upon a summons by the surveyors." In case of failure, five shillings were to be forfeited for every default. The amount of labor required was as follows:

"1st. The poorest man shall work one day.

"2nd. For every six acres of meadow land a man hath he shall work one day.

"3d. Every man who shall neglect to make all fences appertaining to his fields by the 24th of April shall forfeit five shillings (Nov. 19th, 1639)."

Highways and cart-paths were laid out on both sides of the meadows at an early date. The town records make mention of a highway "from below the upland of the meadow from the house-lot of Walter Haynes to the meadow of John Goodnow, which shall be four rods wide where it is not previously bounded already, and from the meadow of John Goodnow to the end of the town bound." Also of a highway on the west side of the river, "between the upland and the meadow six rods wide from one end of the meadow to the other." These roads, we conjecture, have not entirely disappeared. On either side the meadow margin, a hay-road, or "right of way," still exists. It is probable that the town way called "Water Row" may have been a part of those early roads.

BRIDGES.—In the work of bridge-building Sudbury has had fully its share from the first. Its original territory being divided by a wide, circuitous stream, which was subject to spring and fall floods, it was a matter of no small importance to the settlers to have a safe crossing. Ford-ways, on a river like this, were uncertain means of transit. Without a bridge the east and west side inhabitants might be separated sometimes for weeks, and travellers to the frontier beyond would be much hindered on their way. All this the people well knew, and they were early astir to the work. Two bridges are mentioned in the town-book as early as 1641. The record of one is as follows: "It was ordered from the beginning of the plantation, that there should be two rods wide left in the meadow from the bridge at Munning's Point to the hard upland at the head of Edmund Rice's meadow." The other record is of the same date, and states that there was to be a road "between the river meadow and the house-lot from the bridge at John Blandford's to Bridle Point." The bridge referred to in the former of these records may have been the "Old Indian Bridge," which is repeatedly mentioned in the town-book. From statements on the records we conclude it crossed the lower part of Lanham Brook—sometimes also called West Brook—at a point between Sand Hill and Heard's Pond. This bridge was probably found there by the settlers, and may have been nothing more than a fallen tree where but one person could pass at a time. It doubtless was of little use to the settlers, and may only have served them as a landmark or to designate a fording-place where at low water a person could go on foot. The bridge referred to in the latter record was probably the first one built by the English in Sudbury. It was doubtless situated at the locality since occupied by successive bridges, each of which was known as the "Old Town Bridge." The present one is called the Russell Bridge, after the name of the builder. The location is in Wayland, at the east end of the old cause-

way, near the house of Mr. William Baldwin. The first bridge at this place was probably a simple contrivance for foot-passengers only, and one which would cause little loss if swept away by a flood. The reason why this spot was selected as a crossing may be indicated by the lay of the land and the course of the river; at this point the stream winds so near the bank of the hard upland, that a causeway on the eastern side is unnecessary. These natural features doubtless led to the construction of the bridge at that particular spot, and the location of the bridge determined the course of the road. About the time of the erection of the first bridge a ferry is spoken of. In 1642 Thomas Noyes was "appointed to keep a ferry for one year, for which he was to have two pence for every single passenger, and if there be more to take two apiece." This ferry may have been used only at times when high water rendered the bridge or meadow impassable. As in the price fixed for transportation only "passengers" are mentioned, we infer that both the bridge and ferry were for foot-passengers alone. But a mere foot-path could not long suffice for the settlement. The west side was too important to remain isolated for want of a cart-bridge. About this time it was ordered by the town, "That Mr. Noyes, Mr. Pendleton, Walter Haynes, John Parmenter, Jr., and Thomas King shall have power to view the river at Thomas King's, and to agree with workmen to build a cart-bridge over the river according as they shall see just occasion." The following contract was soon made with Ambrose Leach:

"BRIDGE CONTRACT 1643.

"It is agreed betweene the inhabitants of the towne of Sudbury and Ambrose Leech, That the towne will give unto the said Ambrose 6 acres in Mr Pendleton's 2^d Addition of meadow wch shall run on the north side of his meadow lyinge on the west side of the river, & shall run from the river to the upland. Alsoe foure acres of meadowe more wch shall be wth convenient as may be. Alsoe twenty acres of upland lyinge on the west side of the river on the north side of the lands of Walter Haynes if he approve of it else so much upland where it may be convenient. For and in consideration whereof the said Ambrose doth propose to build a sufficient cart bridge over the river three feet above high water mark, twelve foot wyde from the one side of the river to the other, provided that the towne doe fell and cross cutt the timber and saw all the plank and carry it all to place, and when it is ready framed the towne doth promise to help him raise it, so that he and one man be at the charge of the sayd Ambrose, and he doth promise to accomplish the work by the last day of Aug. next. — Alsoe the towne doth admit of him as a townsman wth right to comonage and upland as more shall be laid out and alsoe ten acres of meadowe to be layed out which other meadowe is in first addition of meadowe.

"AMBROSE LEECH,
"BRIAN PENDLETON,
"WALTER HAYNES."

The next contract for building a bridge was with Timothy Hawkins, of Watertown, and is as follows:

"The 26th day of November, 16**.

"Agreed between the Inhabitants of Sudbury on the one part, and Timothy Hawkins, of Watertown, on the other part that the said Timothy shall build a sufficient cart bridge over the river, beginning at the west side of the river, running across the river, five rods long and twelve feet wide, one foot above high water mark, the arches to be . . . foot wide, all but the middle arch, which is to be 14 feet wide, the sills — inches square 26 feet long, the posts 16 inches square the cups — and 16, the braces 8 inches square, the bridge must have a rail on each side,

and the rails must be braced at every post, the plank must be two inches thick sawn, there must be 5 braces for the plank, — the bridge the bearers 12 inches square, the bridge is by him to be ready to raise by the last day of May next. For which work the Inhabitants do consent to pay unto the said Timothy for his work so done, the sum of 13 pounds to be paid in corn and cattle, the corn at the general price of the country, and the cattle at the price as two men shall judge them worth.

"The said Timothy is to fell all the timber and saw it, and then the town is to carry it to the place."

CAUSEWAY.—Westerly beyond the bridge was built a raised road or causeway, which was sometimes called the "Casey" or "Carsey." This is a memorable piece of highway. Repeatedly has it been raised to place it above the floods. At one time the work was apportioned by lot, and at another the Legislature allowed the town to issue tickets for a grand lottery, the avails of which were to be expended upon this causeway.

Stakes were formerly set as safeguards to the traveller, that he might not stray from the way.

CHURCH.—The town being laid out, and the necessary means for securing a livelihood provided, the people turned their attention to ecclesiastical matters. The church was of paramount importance to the early New England inhabitants. For its privileges they had in part embarked for these far-off shores. To preserve its purity they became pilgrims on earth, exiles from friends and their native land. Borne hither with such noble desires, we have evidence that when they arrived they acted in accordance with them. In 1640 a church was organized, which was Congregational in government and Calvinistic in creed or faith. A copy of its covenant is still preserved. The church called to its pastorate Rev. Edmund Brown, and elected Mr. William Brown deacon. It is supposed that the installation of Rev. Edmund Brown was at the time of the formation of the church. The town in selecting Mr. Brown for its minister secured the services of an energetic and devoted man. Edward Johnson says of him, in his "Wonder-Working Providence:" "The church in Sudbury called to the office of a pastor the reverend, godly and able minister of the word, Mr. Edmund Brown, whose labors in the doctrine of Christ Jesus hath hitherto abounded wading through this wilderness work with much cheerfulness of spirit."

The home of Mr. Brown was in the territory of Wayland, by the south bank of Mill Brook, on what was called "Timber Neck." Mr. Brown's salary the first year was to be £40, one-half to be paid in money, the other half in some or all of these commodities: "Wheate, pees, butter, cheese, porke, beefe, hemp and flax, at every quarters end." In the maintenance of the pastor and church the town acted as in secular matters. The church was for the town; its records were for a time town records. Civil and ecclesiastical matters were connected. If there was no state church, there was a town church, a minister and meeting-house, that was reached by and reached the masses. "Rates" were gathered no more surely for the "king's tax" than to maintain the ministry. To show the

manner of raising the money for the minister's salary shortly after his settlement, we insert the following: "The first day of the second month, 1643. It is agreed upon by the town that the Pastor shall [have] for this year, beginning the first day of the first month, thirty pound, to be gathered by rate and to be paid unto him at two several payments, the first payment to be made one month after midsummer, the other payment to be made one month after Michaelmas, for the gathering of which the town hath desired Mr. Pendleton and Walter Hayne to undertake it, and also the town hath discharged the pastor from all rates, for this year, and the rate to be levied according to the rate which was for the ——— meeting-house, the invoice being taken by John Freeman." Of the prosperity of this little church, Johnson says, in his "Wonder-Working Providence:" "This church hath hitherto been blessed with blessings of the right hand, even godly peace and unity; they are not above fifty or sixty families and about eighty souls in church fellowship, their Neat head about 300."

A meeting-house was built in 1642-43 by John Rutter. It was situated in what is now the old burying-ground in Wayland.

LAND DIVISIONS.—The settlers had little more than got fairly located at the plantation, when they began dividing their territory, and apportioning it in parcels to the inhabitants. Before these divisions were made there were no private estates, except such house-lots and few acres as were assigned at the outset for the settler's encouragement or help, or such land tracts as were obtained by special grant from the Colonial Court. But divisions soon came. Piece after piece was apportioned, and passed into private possession. Soon but little of the public domain was left, save small patches at the junction of roads, or some reservation for a school-house, meeting-house or pound, or plot for the village green.

From common land, which the undivided territory was called, has come the word "common" as applied to a town common, park or public square. And from the division of land by lot, the term "lot" has come into use, as "meadow-lot," "wood-lot," and "house-lot." The early land divisions were made, on permission of the Colonial Court, by such commissioners as the town or court might appoint.

Three divisions of meadow-land had been made by 1640. A record of these has been preserved, and the following are the preambles of two of them:

"A record of the names of the Inhabitants of Sudbury, with their several quantity of meadow to every one granted according to their estates or granted by gratulation for services granted by them, which meadow is ratable upon all common charges."

"It is ordered that all the inhabitants of this town shall have $\frac{2}{3}$ of their total meadows laid out this present year, viz.: the first divided according to discretion, and the second by lot."

Not only the meadows but the uplands were parceled out and apportioned, some for public use, some to the early grantees and some to individuals in return for value or service.

In 1642 an addition of upland was made "in acres according to the 1st and 2nd divisions of meadows granted unto them by the rule of their estate; and Peter Noyes, Bryan Pendleton, George Munnings, Edmund Rice and Edmund Goodenow were to have power to lay out the 3d division at their discretion."

While the early land divisions were being made, reservations were also made of lands for pasturage, which it was understood were to remain undivided. These lands were called "Cow Commons," and the record of them explains their use. The first was laid out or set apart the 26th of November, 1643, and was on the east side of the river.

The cow common on the west side was reserved in 1647, and is thus described in the Town Book:

"It is ordered by the town that there shall be a cow common laid out on the west side of the river to remain in perpetuity, with all the upland within these bounds, that is to say, all the upland that lies within the bound that goes from Bridle point through Hopp meadow, and so to the west line, in the meadow of Walter Hayne, and all the upland within the gulf and the pantre brook to the upper end of the meadow of Robert Darnill, and from thence to the west line, as it shall be bounded by some men appointed by the town, except it be such leads as are due to men already, and shall be laid out according to the time appointed by the town. Walter Hayne and John Groute are appointed to bound the common, from Goodman Darnill's meadow to the west line."

The territory which was comprised in this common may be outlined, very nearly, by the Massachusetts Central Railroad on the south, the Old Colony Railroad on the west, Pantry Brook on the north, and the river on the east. It will be noticed that these two commons included most of the hilly portions of the town, on both sides of the river; and it was doubtless the design of the settlers to reserve for common pasturage these lands, because less adapted to easy cultivation. But in process of time they ceased to be held in reserve. More or less controversy subsequently arose about what was known as "sizing the commons," and by the early part of the next century they were all divided up and apportioned to the inhabitants; and now over the broad acres of these ancient public domains are scattered pleasant homesteads and fertile farms, and a large portion of three considerable villages, namely, Sudbury, South Sudbury and Wayland Centre.

Besides the reservation of territory for common pasturage, lands were laid out "for the use of the ministry." Two such tracts were laid out on each side of the river, consisting of both meadow and upland, which were let out to individuals, the income derived therefrom going towards the minister's salary. The lands that were situated on the west side have passed from public to private possession, being sold in 1817 for \$3200.98.

Between 1650 and 1675 the west side had rapid development. Prior to the beginning of this period the pioneer spirit of the settlers had led to a thorough exploration of this part of the town, and they had located by its hills and along its meadows and valleys, as if undaunted by distance from the meeting-house

and mill, and indifferent to the perils of the wilderness. But although there was, to an extent, an occupation of the west part of the town from the very beginning of the settlement, yet the greater activity was for a time on the east side; in that part was the centralization of people, and things were more convenient and safe. Indeed, the settlers for a season may have regarded the west side as a wilderness country, destined long to remain in an unbroken state. The view westward from certain points along the first street was upon woody peaks and rocky hillsides. Beyond the valley of Lanham and Lowance towered Nobscot; its slope, thickly covered with forest, might look like an inhospitable waste; while the nearer eminence of Goodman's Hill, with its rough, rocky projections, may have had a broken and desolate aspect. It is no wonder, then, that in the earlier years of the settlement we read of so many corn-fields on the east side of the river, and find parties desirous of obtaining new farms seeking them in a southerly rather than a westerly direction. But when absolute wants were once met, and things essential to existence were provided; when the settlers had acquired a better knowledge of the country and of the character of its native inhabitants, and a substantial causeway was made,—then began a greater development of the west part of the town.

The indications are that these things were accomplished about the year 1650. At this time we begin to notice the mention of homesteads on the west side, and the construction of works for public convenience. The lands first occupied, probably, were those near Lanham and Partry, and along the meadows by the river course; while the more central portion, called, "Rocky Plain," was not taken till somewhat later. This is indicated, not only by the known locations of early homesteads, but by the locality of the west side cow common. These sections may have been first taken on account of the abundance of meadow land, and the existence of roads which had been made for the transportation of hay.

A prominent person who early located there was Walter Haynes. He had a house by the meadow margin, which, in 1676, was used as a garrison, and which early in town history was called "Mr. Haynes' old house." In 1646 he was granted liberty to run a fence "from his meadow, which lies on the west side of the river, across the highway to his fence of his upland at his new dwelling-house, provided that Walter Hayne do keep a gate at each side of his meadow for the passing of carts and the herds along the highway that his fence may not be prejudicial to the town." Both record and tradition indicate that John and Edmund Goodenow early had lands near the Gravel Pit, and also at or near the present Farr and Coolidge farms. By 1659, Thomas Noyes and Thomas Plympton had established houses on the west side,—the former on lands at Hop Brook, and the latter at Strawberry Bank. As early at least as

1654, Thomas Read was at Lanham; and by 1659 Peter Bent was there also.

Some public acts which indicate activity on the west side, as set forth by the records, are as follows: In 1654 it was ordered that Walter Hayne and John Stone "shall see to the fences of all the corn-fields on their side the river;" and in 1659 a committee was appointed to look after the highways there. The mention of bridges by 1641, the ferry of Mr. Noyes in 1642, and the contract for a cart-bridge in 1643, are all indications of early activity in the west part of the town. But the more important matters of a public nature were in connection with the laying out of new lands, the construction of important roads, and the erection of a mill.

LAYING OUT OF NEW LANDS.—In 1651, John Sberman and others were appointed to lay out the "New Grant Lands." After some delay the plan was adopted of dividing it into squadrons, the arrangement of which was as follows: "The south east was to be the first, the north east the second, the north west the third, and the south west the fourth." It was voted there should be a highway extending north and south, "30 rods wide in the new grant joining to the five miles first granted;" also, "Voted that there should be a highway 30 rods wide, from south to north, parallel with the other said highway in the middle of the remaining tract of land."

These squadrons were subdivided into parcels of equal size, each containing one hundred and thirty acres, and were apportioned to the people by lot. It was voted that "the first lot drawn was to begin at the south side of the first squadron running east and west betwixt our highways; the second lot to be in the north side of the first, and so every lot following successively as they are drawn till we come to Concord line and so the first and second squadron."

This land, laid out so regularly, was good property. Some of the most substantial homesteads of the town have been, and still are, upon it. Persons by the name of Howe, Parmenter, Woodward, Moore, Browne, Walker, Noyes, Balcom, and Rice, of the older inhabitants, and, later, of Fairbanks, Stone, Willis, Smith, Hayden, Maynard, Perry, Bowker, Vose, Brigham, and others,—all had residences there. The possession of this new grant territory, and its early apportionment, would serve naturally to keep the people in town. It opened new resources to the settlers by its timber lands; and the circuitous course of Wash Brook gave meadows and mill privileges which the people were not slow to improve. Probably the earlier settlers of this tract went from the east side of the river as into a new country or wilderness. There they erected garrisons; and that there were in this territory at least three of these houses indicates the exposed condition of the place at the time of its early occupation by the English. "Willis," the largest pond in town, a part of "Nobscot," the highest hill, and the most extensive tim-

ber tracts, are in this new grant. In it have been located no less than five saw or grist-mills. From this territory was taken part of the town of Maynard, and in it were located for years two out of five of the old-time district school-houses. The Wayside Inn and the Walker Garrison are still there; and although the stirring scenes of the old stage period, which gave liveliness to the one, and the dismal war days, which gave importance to the other, have passed away, yet there remains a thrift and prosperity about the substantial farms of the ancient new grant lots that make this locality one of importance and interest.

THE THIRTY-ROD HIGHWAY.—While these new lands proved so beneficial to the town, the "Thirty-Rod Highway" in time caused considerable trouble. It was laid out for the accommodation of the owners of lots, and, as the name indicates, was thirty rods wide. The unnecessary width may be accounted for as we account for other wide roads of that day: land was plentiful, and the timber of so large a tract would be serviceable to the town.

But the width tended to cause disturbance. The land was sought for by various parties,—by abutters on one or both sides, it may be; by those dwelling within the near neighborhood; and by such as desired it for an addition to their outlying lands, or a convenient annex to their farms. The result was that to protect it required considerable vigilance. Encroachments were made upon it, wood and timber were taken away, and at successive town-meetings what to do with this Thirty-Rod Highway was an important matter of business. But at length it largely ceased to be public property. Piece after piece had been disposed of. Some of it had been purchased by private parties, some of it exchanged for lands used for other highways, and some of it may have been gained by right of possession.

But though so much of this road has ceased to be used by the public, there are parts still retained by the town and open to public use. The Dudley Road, about a quarter of a mile from the William Stone place, and which passes a small pond called the Horse Pond, tradition says, is a part of this way. From near the junction of this with the county road, a part of the Thirty-Rod Way runs south, and is still used as a way to Nobscot. On it, tradition also says, is the Small-Pox Burying-Ground, at Nobscot. A part of this road, as it runs east and west, is probably the present Boston and Berlin Road, or what was the "Old Lancaster Road." Other parts of this way may be old wood-paths that the Sudbury farmers still use and speak of as being a part of this ancient landmark.

"OLD LANCASTER ROAD."—This road, which was at first called the "Road to Nashuway," probably followed an ancient trail. In 1653 it was "agreed by the town that Lieutenant Goodenow and Ensign Noyes shall lay out the way with Nashuway men so far as it goes within our town bound." A record of

this road is on the town-book, and just following is this statement:

"This is a true copy of the commissioners appointed by the town taken from the original and examined by me.

"HOOR GRIFIN."

This record which is among those for 1646, by the lapse of time has become so worn that parts are entirely gone. It is supposed, however, that some of the lost parts have been restored or supplied by the late Dr. Stearns. We will give the record, so far as it can be obtained from the town-book, and insert in brackets the words that have been supplied from other sources:

"We whose names are hereunto subscribed appoint[ed by] Sudbury and the town of Lancaster to lay out the high[way over the] river meadow in Sudbury near Lancaster to the [town] bound according to the Court order, have agreed as follows [viz] That the highway beginning at the great river meadow [at the gravel] pitt shall run from thence [to the northwest side of] Thomas Plympton's house, [and from thence] to timber swa[m]p as marked by us and so on to Hart Pond leaving the [rock] on the north side of the way and from thence to the extreme [Sudbury bounds] as we have now marked it the breadth of the way is to be the gravel pitt to the west end of Thomas Plympton's lot and . . . rods wide all the way to the utmost of Sudbury bound and thence upon the common highway towards Lancaster through Sud[bury] therefore we have hereunto set our hand the 22^d day of this pres[ent month]

Date 1653

"EDMUND GOODENOW

"THOMAS NOYES

"WILLIAM KERLEY"

This road has for many years been a landmark in Sudbury; but the oldest inhabitant cannot remember when, in its entire length, it was used as a highway. Parts of it were long since discontinued, and were either sold or reverted to the estates of former owners.

THE HOP-BROOK MILL.—In 1659 a mill was put up where the present Parmenter Mill stands in South Sudbury. This mill was erected by Thomas and Peter Noyes. In recognition of the serviceableness of their work to the community, the town made them a land grant, and favored them with such privileges as are set forth in the following record:

"Jan. 7th 1659. Granted unto Mr. Thomas Noyes and to Mr. Peter Noyes for and in consideration of building a mill at Hop brook laying and being on the west side of Sudbury great river below the cart way that leads to Ridge meadow viz: fifty acres of upland and fifteen acres of meadow without compoage to the said meadow four acres of the said fifteen acres of meadow lying and being within the demised tracts of uplands; Also granted to the above named parties timber of any of Sudbury's common land, to build and maintain the said mill. Also the said Thomas and Peter Noyes do covenant with the town for the foregoing consideration, to build a sufficient mill to grind the town of Sudbury's corn; the mill to be built below the cart way that now is leading to Ridge meadow, the said Grantees, their heirs and successors are to have nothing to do with the stream above four rods above the aforementioned cartway of said mill to be ready to grind the corn by the first of December next ensuing, and if the said grantees, their heirs or assigns shall damage the highway over the brook, by building the said mill, they are to make the way as good as now it is, from time to time, that is to say, the above specified way, over the Mill brook of said Thomas Noyes and Peter are also to leave a highway six rods wide joining to the brook from the east way that now is to the Widow Loker's meadow." (Town Records, vol. i.)

While the new mill was being built, a way was being made to it from the causeway, as we are in-

formed by the following record, dated February 7, 1659:

"We, the Selectmen of Sudbury, finding sundry inconveniences, by reason of bad and ill highways not being passable to meadow-lands and other towns, and finding the law doth commit the setting of the highways to the prudence of the selectmen of towns, we therefore, being met the day and year above written, on purpose to view the highways in the west side of Sudbury river, and having taken pains to view them, do we say, conclude and jointly agree that the highway from the Gravel pits shall go through the land newly purchased of Lieut. Goodnow to that end, and from thence down the brow of the hill the now passed highway, unto the place where the new mill is building, that is to say, the way that is now in occupation, we mean the way that goeth to the south and Mr. Beisbeich his house, we conclude and jointly agree, that the way to the meadows, as namely, the meadow of John Grout, Widow Goodnow, John Maynard, Lieut. Goodnow, shall go as now it doth, that is to say, in the hollow to the said meadows, the highway to be six rods wide all along by the side of the said meadows."

In 1652 a contract was made for a new house of worship. This contract is on the Town Records, but has become considerably worn and defaced, so that parts are almost or quite unintelligible. There is, however, a copy in the "Steains Collection," which, with some slight immaterial alterations, is as follows:

"The town agreed with Thomas Plympton Peter King & Hugh Griffin to build a new meeting house which was to be forty feet long & twenty feet wide measuring from outside to outside, the studs were to be 6 inches by 4 to stand for a four foot clapboard. There were to be 4 transom windows five feet wide & 6 feet high, and in each gable end a clear-story window, each window was to be 4 feet wide and 3 feet high. There were to be sufficient dorments across the house for galleries if there should afterward be a desire for galleries the beams to be 12 inches by 14 and the ground sills were to be of white oak 8 inches square. The posts were to be a foot square, and the 2 middle beams to be smoothed on three sides and the lower corners to be run with a *backell*. They the said Plympton King & Griffin are to find timber to fell, hew, saw, cart, frame, carry to place & they are to level the ground and to find them sufficient help to raise the house, they are to inclose the house with clap boards and to lyme the inside with cedar boards or otherwise with good spruce boards, & to be smoothed & over lapped and to be lyned up the windows, & they are to hang the doors so as to belt. One of the doors on the inside is to be sett with a lock. They are to lay the sleepers of the doors with white oak or good swamp pine, & to floor the house with plank. They are to finish all the works but the seats, for which the town do covenant to give them . . . 5 pound 20 to be paid in march next in Indyan [corn] or cattle, 30 more to be paid in Sep' next to be paid in wheat, butter, or money & the rest to be paid as soon as the work is done in Indyan corn or cattle the corn to [be] merchantable at the price current.

"Witness ERND, GOODNOW.
"THOMAS NOYES."

The new building was to be erected on the site of the old one. The town ordered "that the carpenters should provide 12 men to help them raise the meeting house," for which they were to be allowed half a crown a day. The roof was to be covered with thatch, and the workmen were to have "the meadow afterwards the minister's to get their thatch upon." In 1654 a committee was appointed "to agree with somebody to fill the walls of the meeting house with tempered clay provided they do not exceed the sum of 5 pounds 10 shillings." The parties who were to build the house were employed "to build seats after the same fashion as in the old meeting house." and they were to have for every seat one shilling eight pence. The seats were to be made of white oak, "both posts and rails and benches."

But while the town was growing and increasing in strength, a controversy occurred which was of a somewhat serious character. Questions arose relating to the division of the "two-mile grant," to the title of parties to certain lands, and to rights in the east side cow common. The controversy concerning this latter subject was in relation to "sizing" or "stinting" the common. It was specified when this land was reserved, that it "should never be ceded or laid down, without the consent of every inhabitant and townsman that bath right in commonage;" and the rule for pasturing cattle upon it was, "The inhabitants are to be limited in the putting in of cattle upon the said common, according to the quantity of meadow the said inhabitants are rated in upon the division of the meadows." The rule of allowance on this basis was as follows: "For every two acres of meadow one beast, that is either cow, ox, bull or steer, or heifer to go as one beast and a half, and every six sheep to go for one beast, and that all cattle under a year old shall go without sizing." The endeavor to define rights of commonage, or the relation of the individual to this piece of town property, proved a difficult task. As might be expected among a people of positive natures, strong opinions were entertained, and decided attitudes were taken concerning a matter of individual rights. The affair was not wholly confined to the town in its social and civil relations, but the church became connected with it. The result was that a council was called to adjust ecclesiastical matters, and advice was also sought and obtained of the General Court.

In 1675 King Philip's War set in; and Sudbury, on account of its frontier position, was badly harassed by the enemy. The principal means of defence in this war were the garrison-houses. Of these places we give the following information:

THE BROWN GARRISON.—This stood on the present estate of Luther Cutting, about a dozen rods southeasterly of his residence, or a few rods east of the Sudbury and Framingham road, and about a half mile from the town's southern boundary. It had a gable roof, was made of wood, and lined with brick. It was demolished about thirty-five years ago, when in the possession of Mr. Conant.

THE WALKER GARRISON.—The Walker garrison-house is in the west part of the town, a little south of the Massachusetts Central Railroad, on the Willard Walker estate. This building is a curious structure, with massive chimney, large rooms and heavy framework. It is lined within the walls with upright plank fastened with wooden pins.

THE GOODNOW GARRISON.—This garrison stood a little southeasterly of the present Coolidge house, or a few rods northeast to east of the East Sudbury Railroad Station, and perhaps twenty or thirty rods from the South Sudbury and Wayland highway. A lane formerly went from the road to a point near the garrison.

THE HAYNES GARRISON.—This garrison stood on the Water-Row Road, by the margin of the river meadow, a little northerly or northeasterly of the Luther Goodnow house. It was about an eighth of a mile from the Wayland and Sudbury Centre highway, two or three rods from the road, and fronted south. In later years it was painted red. In 1876 it was still standing, but has since been demolished.

One of the buildings which common tradition says was a garrison, but whose name is unknown, stood near the Adam How place, about twenty-five rods northwest of the house. It was one story high, and had a room at each end. For a time it was owned and occupied by Abel Parmenter, and was torn down years ago. It is stated by tradition that, when the Wayside Inn was built, the workmen repaired to this house at night for safety.

The garrisons previously mentioned were named from their early occupants. Parmenter was the name of the first occupant of this house of whom we have any knowledge; if he was the first, then doubtless this house was formerly known as the Parmenter Garrison.

The other garrison, the name of which is unknown, was north of the Gulf Meadows, and on or near the present Dwier Farm (Bent place). Tradition concerning this one is less positive than concerning the other. An old inhabitant, once pointing towards the old Bent house, said, "There is where the people used to go when the Indians were about." It is quite evident that the Bent house was not a garrison, for that was built about a century ago; but across the road southwesterly there are indications that some structure once stood, which may have been a garrison.

THE BLOCK-HOUSE.—A block-house stood in the north part of the town, on the Israel Haynes farm. It was situated, perhaps, from thirty to fifty rods southwest of the house of Leander Haynes, on a slight rise of ground. It was small, perhaps fifteen feet square, more or less, and so strongly built that it was with difficulty taken to pieces. It was demolished about three-quarters of a century ago, when owned by Mr. Moses Haynes. Mr. Reuben Rice, of Concord, a relative of Mr. Haynes, when over ninety years of age, informed the writer that when it was torn down he chanced to be passing by, and looked for bullet-marks, and believed he found some. He stated there was no mistake about the house being used as a garrison.

Besides the garrison-houses, the town had a small force of militia. Says "The Old Petition:" "The strength of Our towne upon y^e Enemy's approaching it, consisted of eighty fighting men." These men were able-bodied and strong for the work of war, liable to do duty for either country or town; while others, younger and less vigorous, could stand guard and do some light service. When the war was fairly begun, the town's force was replenished by outside

help. So that, with the people collected in garrisons, and the armed men able to fight in a sheltered place, a stout defence could be maintained against a considerably larger force.

At the beginning of the war the town of Sudbury was not attacked, as the Indians chiefly confined hostilities to the county of Plymouth, yet it was soon called upon to send aid to other places. November 22, 1675, a warrant came from Major Willard to John Grout, Josiah Haynes and Edmund Goodnow, who called themselves the "humble servants the militia of Sudbury," requiring the impressment of nine able men to the service of the country. They state to the Governor and Council that they have impressed the following men, namely: William Wade, Samuel Bush, John White, Jr., Thomas Rutter, Peter Noyes, Jr., James Smith, Dennis Headly, Mathew Gibbs, Jr., and Daniel Harrington; but that they wish to have them released. Joseph Graves, master of Harrington, states that his servant had not clothing fit for the service; that he was well clothed when he was impressed before, but that he wore his clothes out in that service, and could not get his wages to buy more. The service that he was formerly impressed for was the guarding of families in "Natick Bounds." One of those families is supposed to be that of Thomas Eames, which was attacked by the Indians near the outbreak of the war. A further reason for their release from this service is found in the following extracts from their petition: "Considering our condition as a frontier town, and several of our men being already in the service, our town being very much scattered;" furthermore, that, several families being sickly, no use could be made of them for "watching, warding, scouting or impress, whereby the burden lies very hard on a few persons."

It was not long after hostilities began before the foe approached Sudbury. The first blow that fell on the town that has been noted by historians of that day was on March 10, 1676. Says Mather, "Mischief was done and several lives cut off by the Indians."

While the prospect was thus threatening, the design of the Indians for a season was effectually stayed, and a disastrous invasion prevented by a bold move made by the inhabitants of the town. The event referred to occurred March 27, 1676. A force of savages, near three hundred in number, were within about a half mile of Sudbury's western boundary. The force was led by Neus, the Nipmuck captain. This band was intent on mischief. It was on the trail for prey. Flushed with the expectation of easy victory, they waited the dawn of day to begin their foul work, and seize such persons and spoil as were found outside the garrisons. On Sabbath night they made their encampment within half a mile of a garrison. Their mischievous course through the previous day had been so little opposed that they felt secure as if in a world of peace. But the English were on their track. Intelligence of their presence at Marlboro' had reached

Sudbury, and a movement was made to oppose them. A score of bold citizens set forth for the beleaguered place. On their arrival at Marlboro' they were reinforced by twenty soldiers, who were taken from the garrisons, and the two forces went in search of the enemy. Before daybreak they discovered them asleep about their fires. The English, in night's stillness, crept close upon the camp. Wrapped in slumber, and unsuspecting of what was so near, the Indians were suddenly startled by a destructive volley from an unexpected foe. The English took them by complete surprise. So effectually had they directed their fire that the Indians speedily fled. About thirty of their number were wounded, of whom it is said fourteen afterwards died. Not only were the Indians numerically weakened, but demoralized somewhat by such a bold and unlooked-for assault. Probably this act saved Sudbury for a time. Netus was slain, and for nearly a month there was a cessation of hostilities within and about the town.

That Sudbury people in this affair acted not simply in their own defence is implied in "The Old Petition," in which it is stated that "the Indians in their disastrous invasions were resolved by our ruine to revenge y^e reliefe which our Sudbury volunteers approached to distressed Marlborough, in slaying many of y^e enemy & repelling y^e rest."

ATTACK ON THE TOWN BY KING PHILIP.—Although this sudden assault on the savages may have checked their course for a time, they soon rallied for further mischief. In the following April a large force, headed by Philip in person, started for Sudbury. At the time of the invasion there was nothing west of Sudbury to obstruct his course. The last town was Marlboro', and this was devastated as by a close gleaner in the great field of war. The people had almost wholly abandoned the place; the dwellings were reduced to ash-heaps, and a few soldiers only were quartered there to guard the road to Brookfield and the Connecticut. Sudbury at this time was the objective point of King Philip. That he had a special purpose in assailing the place, other than what led him to conduct the war elsewhere, is implied in "The Old Petition," in the words before quoted, where the object of revenge is mentioned. Certain it is, he had a strong force, and fought hard and long to destroy the place.

DATE OF PHILIP'S ATTACK ON THE TOWN.—Before entering, however, on the details of the conflict, we will notice the time at which it occurred. Previous to the discovery of "The Old Petition," two dates had been assigned, namely, the 18th and the 21st of April. Various authorities were quoted in support of each. So important was the matter considered, that a committee was appointed to examine evidence on the subject. The committee reported in favor of the 21st. (Report of Kidder and Underwood.) Notwithstanding this decision, opinions still differed; but the discovery of "The Old Petition" has fully settled this

matter, and established beyond question that the date of Philip's attack on the town and the garrisons, and the "Sudbury Fight," was the 21st. We can understand how, before the discovery of this paper, opinions might vary; how an historian might mistake as to a date, and a monument might perpetuate the error. When President Wadsworth erected a slate-stone at the grave of Captain Wadsworth, the date inscribed might have been taken from the historian Hubbard, who might have received it from an unreliable source. But we can hardly suppose that a mistake could occur in the paper above referred to concerning the date of this event. This paper is a calm, deliberate document, signed by inhabitants of Sudbury, and sent to the Colonial Court less than six months after the invasion by Philip. It gives the date of the invasion in the following words: "An Account of Losse Sustained by Severall Inhabitants of y^e towne of Sudbury by y^e Indian Enemy 21st April 1676."

NUMBER OF THE ENEMY.—Philip arrived with his force at Marlboro' on or about the 18th of April, and soon started for Sudbury. The number of his warriors has been variously estimated. In the "Old Indian Chronicle" it is given as "about a thousand strong." Gookin states, in his history of the Christian Indians, "that upon the 21st of April about mid-day tidings came by many messengers that a great body of the enemy not less as was judged than fifteen hundred, for the enemy to make their force seem very large there were many women among them whom they had fitted with pieces of wood cut in the forms of guns, which these carried, and were placed in the centre, they had assaulted a place called Sudbury that morning, and set fire of sundry houses and barns of that town . . . giving an account that the people of the place were greatly distressed and earnestly desired succor."

THE ATTACK.—During the night of April 20th Philip advanced his force and took position for the coming day. It was early discovered by the inhabitants that during the night-time the Indians had gotten possession of everything in the west part of the town but the garrisons, and that they had become so scattered about in squads, and had so occupied various localities, that at a given signal they could strike a concerted blow. Says the "Old Indian Chronicle," "The houses were built very scatteringly, and the enemy divided themselves into small parties, which executed their design of firing at once." The smoke of dwellings curled upward on the morning air, the war-whoop rang out from the forest, and from the town's westerly limit to the Watertown boundary the destructive work was begun. It is said by tradition that the Indians even entered the Watertown territory, and set fire to a barn in what is now Weston.

About the time of firing the deserted houses the Indians made their attack on the garrisons. The detachments for this work were probably as specifically set apart as were those for burning the dwelling-

places; and doubtless hours before daybreak the foe lay concealed in their picked places, ready to pour their shot on the wall. The attack on the Haynes house was of great severity. The position of the building favored the near and concealed approach of the enemy. The small hill at the north afforded a natural rampart from which to direct his fire; behind it he could skulk to close range of the house and drive his shot with terrible force on the walls. There is a tradition that, by means of this hill, the Indians tried to set the building on fire. They filled a cart with flax, ignited, and started it down the hill towards the house; but before it reached its destination it upset, and the building was saved. Tradition also states that near the house was a barn, which the Indians burned: but that this proved advantageous to the inmates of the garrison, as it had afforded a shelter for the Indians to fire from. Probably this barn was burned with the expectation of setting fire to the house.

But it was not long that the Indians were to fight at close range; the bold defenders soon sallied forth, and commenced aggressive warfare. They fell on the foe, forced them back, and drove them from their "skulking approaches." The service at the other garrisons was probably all that was needed. That none of these houses were captured is enough to indicate a stout and manly defence. They were all coveted objects of the enemy, and plans for the capture of each had been carefully laid.

While the town's inhabitants were defending the garrisons, reinforcements were approaching the town from several directions. Men hastened from Concord and Watertown, and some were sent from the vicinity of Boston. The Concord company consisted of "twelve resolute young men," who endeavored to render assistance in the neighborhood of the Haynes garrison-house. Before they had reached it, however, they formed a junction with the citizens of the town, they were slain in a neighboring meadow. The men thus slain on the meadow were left where they fell until the following day, when their bodies were brought in boats to the foot of the old town bridge and buried. The reinforcements from Watertown were more fortunate than those from Concord, and were spared to assist in saving the town. They were led or sent by the gallant Hugh Mason, of Watertown, and assisted in driving a company of Indians to the west side of the river.

THE WADSWORTH FIGHT.—Another company of reinforcements were commanded by Samuel Wadsworth, of Milton, who was sent out for the assistance of Marlborough. The number in this company had been variously estimated. Mather sets it at seventy. "The Old Indian Chronicle" says, "Wadsworth being designed of a hundred men, to repair to Marlboro, to strengthen the garrison and remove the goods." Hubbard says, "That resolute, stout-hearted soldier, Capt. Wadsworth . . . being sent from

Boston with fifty soldiers to relieve Marlboro." It is not remarkable that estimates should differ with regard to the number in this company, since all the men who accompanied Wadsworth from Boston were not in the engagement at Sudbury. When Capt. Wadsworth reached Marlboro' he exchanged a part of his younger men, who were wearied with the march, for some at the garrison, and accompanied by Captain Brocklebank, the garrison commander, started back to Sudbury. Lieutenant Jacobs, who commanded the garrison in the absence of Brocklebank, in reporting to the authorities in regard to the number of men left with him, states as follows: "There is remaining in our company forty-six, several whereof are young soldiers left here by Captain Wadsworth, being unable to march. But though he left a part of his men he took some from the garrison at Marlboro." From what we know of the fate of a large part of this company, and the circumstances attendant upon the expedition, we conclude the number engaged in the Sudbury fight was not much over fifty. If twenty-nine men were found slain after the battle, and fourteen escaped, and about a half dozen were taken captive, the number would not be far from the foregoing estimate.

Captain Wadsworth arrived at Marlboro' some time during the night of the 20th. Upon ascertaining that the Indians had gone in the direction of Sudbury, he did not stop to take needed refreshment, but started upon the enemy's trail.

The English encountered no Indians until they had gone some distance into Sudbury territory, when they came upon a small party, who fled at their approach. Captain Wadsworth with his company pursued until they found themselves in an ambush, where the main body of Philip's forces lay concealed. The place of the ambush was at what is now South Sudbury, a little northeasterly of the village and on the westerly side of Green Hill.

The force that lay concealed is supposed to have been quite strong. Gookin speaks of "the enemy being numerous." "The Old Indian Chronicle" speaks of it as about a thousand. As the foe appeared, the English pursued, and followed hard as they withdrew. But the pursuit was fatal. The Indians retreated until the place of ambush was reached. Then suddenly the foe opened his fire from a chosen place of concealment, where each man had the opportunity of working to advantage.

But, though suddenly beset on all sides, they maintained a most manly defence. It may be doubtful if there is its equal in the annals of the early Indian wars. From five hundred to one thousand savages, with Philip himself to direct their manœuvres, pouring their fire from every direction, and this against about four-score of Englishmen, hard marched, in an unfamiliar locality, could do deadly work. Yet there is no evidence of undue confusion among the ranks of the English.

The sudden onslaught of the savages was attended, as usual, with shoutings and a horrible noise, which but increased the threatening aspect, and tended to indicate that things were worse than they were. In spite of all this, the brave company maintained their position, and more than held their own. Says Mather, "They fought like men and more than so." Says "The Old Indian Chronicle," "Not at all dismayed by their numbers, nor diemal shouts and horrid yellings, ours made a most courageous resistance." Not only was the foe kept at bay, and the English force mainly kept compact, but a movement was made to obtain a better position; hard by was the summit of Green Hill, and thitherward, fighting, Wadsworth directed his course. This he reached, and for hours he fought that furious host, with such success that it is said he lost but five men.

THE FOREST FIRE.—But a new element was to be introduced. The fight had doubtless been prolonged far beyond what Philip had at first supposed it would be. Desperate in his disappointment that the English had not surrendered, they again resorted to strategy to accomplish their work. The day was almost done. Philip's force had been decimated by Wadsworth's stubborn defence. Darkness was soon to set in, and under its friendly concealment the English might make their escape. New means must be employed, or the battle to the Indians was lost, and the fate of Philip's slain warriors would be unavenged. Wadsworth might form a junction with the soldiers at the east side of the town, or make his way to the Goodnow Garrison just beyond Green Hill. A crisis was at hand. Philip knew it, and made haste to meet it. The fight began with strategy, and he sought to close it with strategy. He set fire to the woods and the flames drove Wadsworth from his advantageous position.

THE RETREAT.—With this new combination of forces pressing hard upon them, nothing was left but retreat. But the results of the retreat were disastrous and exceedingly sad. There is something melancholy indeed attendant on that precipitous flight. For hours, shoulder to shoulder, these men had manfully stood. Inch by inch they had gained the hill-top. The wounded had likely been borne with them, and laid at their protectors' feet; and the brave company awaited night's friendly shades to bear them gently to a place of relief. But they were to leave them now in the hands of a foe less merciful than the flames from which they had been forced to retire. Their defenders had fired their last shot that would keep the foe at bay, and in hot haste were to make a rush for the Hop Brook Mill. It was a race for life; a gauntlet from which few would escape.

The flight of the men to the mill was doubtless attended with fearful loss. It was situated at what now is South Sudbury Village, on the site of the present Parmenter Mill. The distance from the top of Green Hill is from a quarter to half a mile. This

distance was enough to make the slaughter great. A break in the ranks and the foe could close in, and the tomahawk and war-club could do a terrible work.

LOSS OF THE ENGLISH.—As to the number of English slain, accounts somewhat differ. This is not strange, when men differ as to the number engaged. Mather says "that about fifty of the men were slain that day." Gookin speaks of "thirty-two besides the two captains." Hubbard says, "So as another captain and his fifty perished that time of as brave soldiers as any who were ever employed in the service." Lieut. Richard Jacobs, of the garrison at Marlboro', in his letter to the Council, dated April 22, 1676 (Vol. LXVIII., p. 223, State Archive-), says, "This morning, about sun two hours high, ye enemy alarmed us by firing and shouting toward ye government garrison house at Sudbury." He goes on to state that "soon after they gave a shout and came in great numbers on Indian Hill, and one, as their accustomed manner is after a fight, began to signify to us how many were slain; they whooped seventy-four times, which we hope was only to affright us, seeing we have had no intelligence of any such thing, yet we have reason to fear the worst, considering the numbers, which we apprehend to be five hundred at the most, others think a thousand."

Thus, according to the various accounts, by far the greater part were slain. There is one thing which goes to show, however, that Mather may not be far from correct,—that is, the evidence of the exhumed remains. When the grave was opened a few years ago, parts of the skeletons of twenty-nine men were found. We can hardly suppose, however, that these were all the slain. Some who were wounded may have crawled away to die. Others, disabled, may have been borne from the spot by the foe; and, in various ways, the wounded may have been removed, to perish near or remote from the field of battle.

THE CAPTURED.—But the sad story is not wholly told when we speak of the slain. The tragedy was not complete when the surviving few had left the field and taken refuge in the mill. Some were captured alive. These were subjected to such atrocious treatment as only a savage would be expected to give. Says Hubbard, "It is related by some that afterwards escaped how they cruelly tortured five or six of the English that night." Mather says, "They took five or six of the English and carried them away alive, but that night killed them in such a manner as none but savages would have done, . . . delighting to see the miserable torments of the wretched creatures. Thus are they the perfect children of the devil."

THE SURVIVORS.—The few English who escaped to the mill found it a place of safety. Says tradition, this was a fortified place, but it was then left in a defenceless condition. This latter fact the Indians were ignorant of, hence it was left unassailed. The escaped soldiers were rescued at night by Warren and Pierce, with some others, among whom was Captain

Prentis, "who coming in the day hastily though somewhat too late to the relief of Capt. Wadsworth having not six troopers that were able to keep way with him fell into a pound or place near Sudbury town end, where all passages were stopped by the Indians." Captain Cowell also gave assistance, and thus these weary, war-worn men, the remnant of the gallant company that fought on that memorable day, were conducted to a place of safety.

BURIAL OF THE DEAD.—The morning light of the 22d of April broke upon a sad scene in Sudbury. The noise of the battle had ceased, and the fires had faded away with the night-shadows. Philip had betaken himself from the field of his hard-earned and unfortunate victory, and nothing of life was left but the leafless woods, and these charred as if passed over by the shadow of death. It was a scene of loneliness and desolation. The dead, scalped and stripped, were left scattered as they fell; while their victors by the sun-rising were far on their way back over the track which they had made so desolate. This scene, however, was shortly to change. Warm hearts and stout hands were pushing their way to see what the case might demand, and, if possible render, relief.

Before nightfall of the 21st, so far as we have learned, little, if any intelligence was received by the parties who had rushed to the rescue, of the true state of things about Green Hill. Wadsworth and Brocklebank were encompassed about by the foe, so that no communication could be conveyed to the English, who anxiously awaited tidings of their condition. It was known at the easterly part of the town that hard fighting was in progress at or near Green Hill. The shouting, firing and smoke betokened that a battle was in progress, but how it would terminate none could tell. After the Sudbury and Watertown men had driven the Indians over the river, they strove hard to reach the force on the hill. Says Warren and Pierce, in their petition: "We who were with them can more largely inform this Honored Council that as it is said in the petition, that we drove two hundred Indians over the river and with some others went to see if we could relieve Capt. Wadsworth upon the hill, and there we had a fight with the Indians, but they being so many of them, and we stayed so long that we were almost encompassed by them, which caused us to retreat to Capt. Goodnow's garrison house, and there we stayed it being near night till it was dark."

But another force had also striven to reach the town, and join in the work of rescue. This was a company from Charlestown, commanded by Captain Hunting. Of this company, Gookin says ("History of Christian Indians"): "On the 21st of April, Capt. Hunting had drawn up and ready furnished his company of forty Indians at Charlestown. These had been ordered by the council to march to the Merrimac river near Chelmsford, and there to settle a garrison near the great fishing places where it was expected the enemy

would come to get fish for their necessary food." But, says Gookin, "Behold God's thoughts are not as ours, nor His ways as ours, for just as these soldiers were ready to march upon the 21st of April, about midday, tidings came by many messengers that a great body of the enemy . . . had assembled at a town called Sudbury that morning." He says "that just at the beginning of the lecture there, as soon as these tidings came, Major Gookin and Thomas Danforth, two of the magistrates who were there hearing the lecture sermon, being acquainted, he withdrew out of the meeting house, and immediately gave orders for a ply of horses belonging to Capt. Prentis's troop under conduct of Corporal Phippa, and the Indian company under Capt. Hunting, forthwith to march away for the relief of Sudbury; which order was accordingly put into execution. Capt. Hunting with his Indian company being on foot, got not into Sudbury until a little within night. The enemy, as is before [narrated], were all retreated unto the west side of the river of Sudbury, where also several English inhabited."

But though the rescuing parties were either repulsed or too late to render assistance at the fight, they were on hand to bury the dead. Says Warren and Pierce,—“After burying the bodies of the Concord men at the bridge's foot, we joined ourselves to Capt. Hunting and as many others as we could procure, and went over the river to look for Capt. Wadsworth and Capt. Broklebank, and we gathered them up and hurried them.”

The manner in which this burial scene proceeded is narrated thus by Mr. Gookin ("History of Christian Indians"): "Upon the 22nd of April, early in the morning, over forty Indians having stripped themselves and painted their faces like to the enemy, they passed over the bridge to the west side of the river, without any Englishmen in the company, to make discovery of the enemy (which was generally conceded quartered thereabout), but this did not at all discourage our Christian Indians from marching and discovering, and if they had met with them to beat up their quarters. But God had so ordered that the enemy were all withdrawn and were retreated in the night. Our Indian soldiers having made a thorough discovery and to their great relief (for some of them wept when they saw so many English lie dead on the place among the slain), some they knew, viz., those two worthy and pious Captains, Capt. Broklebank, of Rowley, and Capt. Wadsworth, of Milton, who, with about thirty-two private soldiers, were slain the day before. . . . As soon as they had made a full discovery, [they] returned to their Captains and the rest of the English, and gave them an account of their motions. Then it was concluded to march over to the place and bury the dead, and they did so. Shortly after, our Indians marching in two files upon the wings to secure those that went to bury the dead, God so ordered it that they met with no interruption in that work."

Thus were the slain soldiers buried on that April morning, in the stillness of the forest, far away from their kindred, friends and homes. Those who, through inability, had failed to defend them in the day of battle, now tenderly took them to their last, long resting-place. A single grave contained them. Though scattered, they were borne to one common place of burial, and a rough heap of stones was all that marked that lone, forest grave. Such was that soldiers' sepulchre—a mound in the woods, left to grow gray with the clustering moss of years, yet marking in its rustic simplicity one of the noblest and most heroic events known in the annals of King Philip's War. They sleep

"while the bells of autumn toll,
Or the murmuring song of spring flits by,
Till the crackling heavens in thunder roll,
To the bugle-blast on high."

PLACE OF BURIAL.—The grave was made on the westerly side of Green Hill, near its base, and was in the northeast corner of the South Sudbury Cemetery before its recent enlargement. In our recollection the grave was marked by a rude stone heap, at the head of which was a plain slate-stone slab. The heap was made of common loose stones, such as a man could easily lift, and was probably placed there when the grave was made. It was perhaps three or four feet high, and a dozen feet wide at the base. The slab was erected about 1730 by President Wadsworth, of Harvard College, son of Captain Wadsworth. As we remember the spot, it was barren and briar-grown; loose stones, fallen from the top and sides of the mound, were half concealed in the wild wood grass that grew in tufts about it. It remained in this condition for years, and the villagers from time to time visited it as a place of interest.

In the year 1851 the town agitated the matter of erecting a monument, and the Legislature was petitioned for aid, which was granted. But the monument does not mark the original grave. The committee who had the matter in charge located it about fifty feet to the north. The old grave was at or about the turn of the present avenue or path, at the northeast corner of the Adam Smith family lot in the present Wadsworth Cemetery. After it was decided to erect the monument in its present position, the remains of the soldiers were removed. The grave was opened without ceremony in the presence of a small company of villagers. It was the writer's privilege to be one of the number, and, according to our recollection, the grave was about six feet square, in which the bodies were placed in tiers at right angles to each other. Some of the skeletons were large and all well preserved.

The war with King Philip being ended, the way was open for renewed prosperity. New buildings went up on the old estates, garrisons again became quiet homesteads, and the fields smiled with plentiful harvests.

ERECTION OF SAW-MILL.—A movement that denotes the town's activity and recuperative power was the erection of a saw-mill. A town record dated March 26, 1677, informs us it was ordered that "Peter King, Thomas Read, Sen., John Goodenow, John Smith and Joseph Freeman have liberty granted them to build a saw-mill upon Hop Brook above Mr. Peter Noyes's mill, at the place viewed by the committee of this town chosen the last week, which if they do, they are to have twenty tons of timber of the common lands for the building thereof, and earth for their dam, and also they are to make a small dam or sufficient cause so as to keep the waters out of the swamp lands there, provided also that if Mr. Peter Noyes shall at any time throw up his corn-mill they do in room thereof set up a corn-mill as sufficient to grind the town's corn and grain as Mr. Noyes's present mill hath done and doth, and see to maintain the same, and whenever they or any of them their heirs, executors, administrators, Assigns, or successors, shall either throw up their said corn-mill or fail to grind the town's corn and grain as above said, the towns land hereby granted shall be forfeited and returned to the town's use again, and lastly the said persons are not to pen up the water, or saw at any time between the middle of April and the first of September, and they are also to make good all the highway that they shall damage thereby."

DEATH OF REV. EDMUND BROWNE.—The town had not moved far on the road to renewed prosperity before another calamity came. This was the death of its pastor, Rev. Edmund Browne, who died June 22, 1678.

Mr. Browne came from England in 1637, and, accordingly to Mather, was ordained and in actual service in that country before he came to America. He was a freeman of Massachusetts Bay Colony, May 13, 1640. He married, about 1645, Anne, widow of John Loveren, of Watertown, but left no children. He was a member of the synod that established "The Cambridge Platform," 1646-48; was on the council that met in 1657 to settle the difficulties in Rev. Mr. Stone's church, Hartford; preached the artillery election sermon in 1666; and his name is attached to the testimony of the seventeen ministers against the proceedings of the three elders of the First Church, Boston, about 1669.

Mr. Browne was quite a land-owner, his real estate as it is supposed, amounting to three hundred acres. His early homestead at Timber Neck had originally belonging to it seventy acres. He received from the General Court a grant of meadow land situated in the present territory of Framingham, and from time to time became possessed of various lands both within and without the town. Mr. Browne hunted and fished, and it is said was a good angler. He played on several musical instruments and was a noted musician. In his will he speaks of his "Base Voyal" and musical books and instruments. He was much interest-

ed in educating and Christianizing the Indians, and at one time had some of them under his special care. His library was for those times quite valuable, containing about one hundred and eighty volumes. He left fifty pounds to establish a grammar school in Sudbury; but by vote of the town, in 1724, it was diverted to another purpose. He also left one hundred pounds to Harvard College.

Soon after the death of Mr. Browne the town called the Rev. James Sherman to the pastorate, and bought for his use, of John Loker, "the east end of his house, standing before and near the meeting-house; and the reversion due to him of the western end of the house that his mother then dwelt in." The town also agreed to pay Mr. Sherman eighty pounds salary, part in money and part in produce.

NEW MEETING-HOUSE.—In 1685 the town made a contract for a new meeting-house which was to "stand upon the present burying-place of this town, and on the most convenient part thereof, or behind or about the old meeting-house that now is."

MILITARY MATTERS.—In the wars that occurred in the last of the seventeenth and the early part of the eighteenth centuries, Sudbury soldiers did valiant service. The town was represented in the ill-fated expedition of Sir William Phipps, in 1690, and in the expedition subsequently made against the eastern Indians. They also later did good service in and about Rutland, Mass. Repeatedly are the town's soldiers on the muster-rolls of a company of rangers who served in that vicinity. One of the commanding officers was William Brintnal, a Sudbury school-master.

SCHOOLS.—A prominent feature in the history of Sudbury at the beginning of the eighteenth century was the attention given to schools.

November 17, 1701, at a town-meeting, "it was voted to choose Mr. Joseph Noyes as a grammar school master for one year. . . . Also chose Mr. W^m Brawn and Mr. Thomas Plympton to present the said school master unto the Rev. ministers for their approbation of him, which are as followeth, Mr. James Sherman, Mr. Joseph Esterbrooks, Mr. Swift, of Frammingham." This reverend committee duly met, and examined the candidate, and reported as follows, Nov. 21, 1701: "We, the subscribers, being desired by the town of Sudbury to write what we could testify in concerning the justification of Mr. Joseph Noyes, of Sudbury, for a legall Grammar School master, having examined the said Mr. Joseph Noyes, we find that he hath been considerably versed in the Latin and Greek tongue, and do think that upon his diligent revisal and recollection of what he hath formerly learned, he may be qualified to initiate and instruct the youth in the Latin tongue.

"JOSEPH ESTERBROOKS, JOHN SWIFT."

On the strength of this careful approval and guarded recommendation the successful candidate went forth to his work. He did not, however, long

retain his position. For some cause not mentioned the place soon became vacant; and February of the same year Mr. Picher became Mr. Noyes' successor. The contract made with Mr. Picher was as follows: "It is agreed and concluded that the town will and doth grant to pay unto Mr. Nathaniel Picher six pounds in money in course hee doth accept of the Towne's choice as to be our Grammar scool master, also for one quarter of a yeare, and to begin ye third of March next ensuing, and to aerve in the place the full quarter of a yeare, one half of the time on the east side of the River, and the other half of the time on the west side of the river. This Grammar scool master chosen if he accepts and doth enter upon the work it is expected by the above said Towne, that he should teach all children sent to him to learn English and the Latin tongue, also writing and the art of Arithmatic." In 1703 it was voted to pay Mr. Picher for service done that year twenty-eight pounds, "he deducting a months pay . . . for his being absent one month in summer time from keeping of scool, which amounth to twelfth part of time;" "also voted and agreed, as a free will, to give unto Mr. Picher two days in every quarter of his year to visit his friends, if he see cause to take up with it." In 1711, Lieut. Thomas Frink and Quartermaster Brintnal were "to agree with some person who is well instructed in ye tongues to keep a scool." His pay was not to exceed thirty pounds.

The place of the school was changed from time to time. In 1702 it was voted "that the scool master should keep y^e scool on y^e west side of y^e river at y^e house of Thomas Briotnell, which is there parte of time belonging to y^e west side of y^e river." The custom of changing the place of the school was continued for many years; for we find the following record as late as 1722: "Voted by the town that y^e scool master shall keep scool one half of y^e time on y^e west side of y^e river in Sudbury, voted by y^e town, that y^e scool master shall keep y^e first quarter at y^e scool house at y^e gravel pitt, voted by y^e town that y^e second to bee kept on y^e east side y^e river as Near y^e water as may be convenient, voted by y^e town that y^e third quarter to be kept at y^e house of Insign John Moore, voted by y^e town that y^e fourth quarter to be kept at y^e house of Clark Gleason." In the year 1717 Samuel Paris was to keep school four months of the year at the school-house on the west side of the river, and at his own house the rest of the year. If he was away part of the time he was to make it up the next year.

In addition to these means for obtaining advanced instruction, there were schools of a simpler character. About the time that provision was made for a grammar school, we read of "masters who were to teach children to rede and wright and cast accounts." This was done in 1701, at which time the town "voted and chose John Long and John Balcom" for the purpose just stated, "and to pay them for one year thirty

shillings apiece." From this time repeated reference is made in the records to schools of a primary or mixed character.

Among the schoolmasters who served before 1750 are William Brintnal, Joseph Noyes, Nathaniel Picher, Jonathan Hoar, Samuel Paris, Nathaniel Trask, Jonathan Loring, John Long, John Balcom, John Melten, Samuel Kendall, Ephraim Curtis and Zachery Hicks. Some of these taught for a succession of terms or years. William Brintnal taught a grammar school as late as 1733-34, and receipts are found of Samuel Kendall in 1725 and 1736.

Prior to 1700, school-house accommodations were scant. There was no school building whatever. In 1702 "the town agreed that the school should be kept at the meeting-house half a quarter and the other half quarter at the house of Benjamin Moses." But it is a law of progress that improvement in one direction suggests improvement in another; so with better schools better accommodations were sought for. January 1, 1702, the "town voted and paste into an act, to have a convenient scool-hous;" also voted "that the scool-house that shall be built by the town shall be set and erected as near the centre of the town, as may be conveniently set upon the town's land;" also "that it be twenty feet in length, : : : eighteen feet in breadth, seven feet from the bottom of the cell to the top of the plate, a large chimney to be within the house, the house to be a log-house, made of pine, only the sides to be of white oak bord and shingles to be covered cells with. Also the chimney to be of stone to the mortling and finished with brick. This was paste into an act and vote Jan. 15th 1701-2." At another meeting it was decided "that there should be two scool-houses;" that they should be of the same dimensions; and "that the one on the east side should be set near to Enoch Cleavland's dwelling-house." It was afterwards voted that "the scool-houses should be builte by a general town acte and that the selectmen should make a rate of money of 20 pounds for their erection." One of the houses was to be placed "by Cleafflands and the other near unto Robert Mans." In 1711 the town voted to have but one school-house, and this school-house was to be built at "y^e gravel pitt." "Y^e scool-house" here mentioned was "to be 20 foot long, 16 foot wide, six foot studd, nine foot and a half sparrl. Ye sills to be white oak ye outside, to be borded, and ye bords to be feather-edge. Ye inside to be birch and borded with Ruff bords, lower and uper flower to be bord anda brick Chemne, and twu glass windows 18 Enches square pe^r window, and the Ruffe to be borded and shingled." It was to be ready for a school by the last of May, 1712. Joseph Parmenter was to make it, and have for pay fourteen pounds.

The evidence is that the desire for school privileges spread, and that the extremity of the town soon sought for increased advantages. April 17, 1719, the town was called upon "to see if it will grant the North west quarter of the towns petition, they desir-

ing the school master some part of the time with them."

DIVISION OF THE TOWN INTO TWO PRECINCTS.—As in educational matters, so in those pertaining to the church, we find the period prolific in change. Great and important events transpired relating to the meeting-house, the minister and the people. The first change was the dismissal of the pastor. On May 22, 1705, the pastoral relation between Rev. James Sherman and the people of Sudbury was dissolved. But not long was the church left pastorless. The same year of Mr. Sherman's removal a town-meeting was held, in which it was voted "y^t y^e town will chose a man to preach ye word of God unto us for a quarter of a year." The Rev. Israel Loring was chosen for the term mentioned. He began to preach in Sudbury, Sept. 16, 1705; and the result was he was ordained as pastor, Nov. 20, 1706.

After the settlement of Mr. Loring, ecclesiastical matters were not long in a quiet state. A new subject soon engrossed public attention. There was an attempt made to divide the town into two parochial precincts. The west side people doubtless loved the little hill-side meeting-house, about which were the graves of their friends, and whose history was associated with so much of their own. Their fondness for it had doubtless increased as the years passed by, and there clustered about it memories of things the sweetest and the saddest that had entered into their checkered experience. Here their children had been offered in baptism; here had been the bridal and the burial, the weekly greetings and partings, the exchange of intelligence of heart and home. It had been the place for prayer and the preached word; a place of watch and ward, and a place of resort in times of danger. But notwithstanding their fondness for the sacred spot, they were too practical a people to allow sentiment to interfere with their true progress, and what they believed to be their spiritual good.

With their extremely slow means of transit, and the rough roads of that period when at their best, it was a long and weary way they had to travel every Sabbath day; but when the roads became blocked with the drifting snow, or the river was swollen with floods, then it was sometimes a perilous undertaking to reach the east side meeting-house and return. In that primitive period the people of Sudbury did not desire even a good excuse to keep them from public worship; they were Puritanic in both precept and practice. They would allow no small obstacle to cheat their soul of its rights; but if there were hinderances in the way to their spiritual helps, they required their immediate removal.

Hence, a movement was inaugurated to divide the town, and make of it two precincts, in each of which there should be a church. A primary act for the accomplishment of this purpose was to obtain the consent of the General Court. To do this a petition was

presented, which, as it tells its own story, and sets forth the entire case, we will present :

"Petition of the West Side people of Sudbury to Governor Dudley and the General Assembly.

"The petition of us who are the subscribers living on ye west side of Sudbury great River Humbly sheweth that whereas ye All wise and over Ruling providences of ye great God, Lord of Heaven and Earth who is God blessed forever more, hath cast our lott to fall on that side of the River by Reason of the flud of watare, which for a very great part of the yeare doth very much incomode us, and often by extrenity of water and terrible and violent winds, and a great part of the wloter by ice, as it is at this present, so that wes are shut up and cannot come forth, and many times when wee doe atempt to git over our flud, we are forced for to seek our spiritual good with the peril of our Lives.

"Beside the extreme Travill that many of us are Exposed unto sum 3 : 4 : 5 : 6 : miles much more that a Sabbath days Journey, by Reason of these and many more objections, to many here to enumerate, whereby many of our children and little ones, ancient and weak persons, can very Barly attend the public worship. The consdered premises we truly pray your Excellency and ye Honorable Council and House of Representatives to consider and compassionate us in our Extreme suffering condition, and if we may obtain so much favor in your Eyes as to graunt us [our presents] as to appoint us a Comity to see and consider our circumstances and make report thereof to this honorable Court. And your pore petitioners shall ever pray.

"Sudbury, January 15th 1709.

"John Goodnow.

(State Archives, vol. ii., page 221.)

After repeated discussion of the subject, and years had elapsed, permission was given to the west side people to erect a meeting-house and maintain a minister. At a town-meeting, December 26, 1721, held at the house of Mr. George Pitts, it was agreed "to grant 24 pounds for preaching for the present on the westerly side of the river." It was also decided at that meeting to choose a committee to present a petition to the General Court, "that y^e west side inhabitants may have liberty to place their meeting-house on y^e rocky plaine;" which request was granted.

The preliminary work of forming two parochial precincts was now completed; it only remained to adjust ecclesiastical relations to the new order of things, and provide whatever was essential to its success. The church was to be divided, ministers secured and a meeting-house built. All these came about in due time. After the decision, in December, 1721, "to have the preaching of the word amongst us," and the granting of money to meet the expense, Rev. Mr. Minot was invited to preach six Sabbaths in

the West Precinct. It may be that about this time Mr. Loring preached some on the west side, since on the town debt, as recorded April 9, 1722, there stands this statement: "To Mr. Israel Loring to y^e supporting y^e ministry on both [sides] y^e river in Sudbury 80. 0. 0."

But more permanent arrangements were soon made. On the 6th of June, 1722, they extended a call to Rev. Israel Loring, and offered £100 for his settlement." July 10th Mr. Loring responded to the invitation in the following words: "To the Inhabitants of the west Precinct in Sudbury: I accept of the kind invitation you have given me to come over and settle and be the minister of the Westerly Precinct." A few days after the above invitation the east side invited him to remain with them, and took measures to provide for "their now settled minister, Mr. Israel Loring." The day after replying to the first invitation, he wrote to the east side people informing them of his decision to leave them and settle in the West Precinct. Mr. Loring moved to the west side, July 25, 1723. (Stearns Collection) He lived about a mile toward the north part of the town, in what was afterwards an old red house, on the William Hunt place, that was torn down some years since. He subsequently lived at the centre, on what is known as the Wheeler Haynes place.

The church records by Mr. Loring state as follows: "Feb. 11, 1723. The church met at my house, where, after the brethren on the east side had manifested their desire that the church might be divided into two churches, it was so voted by majority." At the time of the division of the church, the number of communicants on the west side was thirty-two males and forty-two females. (Stearns Collection.) The church records went into the possession of the West Parish.

While ecclesiastical matters were in process of adjustment on the west side, they were progressing towards a settlement on the east side also. It is stated that the East Precinct was organized June 25, 1722. When the effort to secure the services of Mr. Loring proved futile, a call was extended to Rev. William Cook, a native of Hadley, Mass., and a graduate of Harvard College. The call being accepted, Mr. Cook was ordained March 20, 1723, and continued their pastor until his death, November 12, 1760. The town granted eighty pounds to support preaching on both sides of the river for half a year.

NEW MEETING-HOUSES.—An important matter, in connection with the new order of things, was the erection of new meeting-houses. This work received prompt attention. "At a town-meeting, January 22 : 172 $\frac{3}{4}$ the town granted five hundred pounds to build a new meeting-house on the west side, and repair the old one on the east side, three hundred and eighty pounds for the new, and one hundred and twenty pounds for the repairing of the old on the east side." The sum for repairing the old house was at a

subsequent meeting made one hundred and fifty pounds.

The meeting-house in the West Precinct was placed on the site of the present Unitarian Church in Sudbury Centre. The location was probably selected because central to the inhabitants of the West Precinct.

THE FRENCH AND INDIAN WARS.—In the French and Indian Wars the town repeatedly sent soldiers to the field who did valiant service for their country. In the third French war it sent men for the capture of Cape Breton; and in the defence of No. 4, a fort on the Connecticut River, at what is now Charleston, N. H., Captain Phineas Stevens, a native of Sudbury, did conspicuous service. Mr. Stevens was born in Sudbury, February 20, 1700, and a few years later he went with his father to Rutland. About 1740, he went to the New Hampshire frontier, and after the construction of Fort No. 4, he became its commander, and assisted bravely in its defense. In the arduous task he was aided for a time, in 1746, by Captain Josiah Brown, who went from Sudbury with a troop of horse. In the fourth French and Indian War Sudbury soldiers were again at the front, and did service in the various expeditions of that period.

In 1755 a regiment was raised, and placed under command of Colonel Josiah Brown, of Sudbury, for the purpose of preventing the encroachments of the French about Crown Point and upon "Lake Iroquois, commonly called by the French, Lake Champlain." The regiment belonged to the command of William Johnson. The following is a list of the field and staff officers:

Josiah Brown, Col.	Samuel Brigham, Surgeon.
John Cummings, Lt. Col.	Benjamin Gott, Surgeon's Mate.
Steven Miller, Major.	David Mason, Commissary.
Samuel Dunbar, Chaplain.	Joseph Lovering, Adjutant.

Sept. 10, 1755, Samuel Dakin received a commission as captain of foot in this regiment. The muster-roll of his company contains forty-eight names, of which sixteen are supposed to be from Sudbury.

In a second list of Capt. Dakin's men eighteen are supposed to be from Sudbury; and in a third list are seventeen names supposed to be of Sudbury men. Besides these, there were some who served in other companies. Some were in Capt. Josiah Richardson's company, and some in Capt. John Nixon's.

In one of the expeditions of this war the town sustained the loss of Capt. Dakin and several others of its citizens, who were killed by the Indians at Half-Way Brook, near Fort Edward, July 20, 1758. At the time of this event Capt. Dakin and his company were connected with the expedition of General Amherst against Crown Point. The following brief account of the attendant circumstances are stated in a diary kept by Lieut. Samuel Thomson, of Woburn:

"July 20, Thursday in the morning, 10 men in a scout waylaid by the Indians and shot at and burned the fort and a number of our men went out to assist

them, and the enemy followed our men down to our Fort, and in their retreat Capt. Jones and Lieut. Godfrey were killed, and Capt. Lawrence and Capt. Dakin and Lieut. Curtis and Ens^a Davis, and two or three non-commissioned officers and privates, to the number of 14 men, who were brought into the Fort, all scalped but Ens^a Davis, who was killed within 30 or 40 rods from the Fort: and there was one grave dug, and all of them were buried together, the officers by themselves at one end, and the rest at the other end of the grave; and Mr. Morrill made a prayer at the grave, and it was a solemn funeral; and Nath^l Eaton died in the Fort and was buried; and we kept a very strong guard that night of 100 men. Haggitt [and] W^m Coggin wounded."

Then follows a list of the killed, beginning:

"Capt. Ebenezer Jones of Wilmington	
Capt.	Dakin of Sudbury
Lieut. Samuel	Curtice of Ditto
Private	Grant of do "

Samuel Dakin was a son of Deacon Joseph Dakin, whose father, Thomas, settled in Concord prior to 1650. In 1722 he married Mercy Minott, daughter of Col. Minott, who built the first framed house in Concord. The farm of Capt. Dakin was in the northern part of Sudbury, on the road running northerly to Concord, his house being very near the town boundary. As early as 1745 he was appointed ensign of the second company of foot in Sudbury, of which Josiah Richardson was captain and Joseph Buckminster was colonel. Sept. 10, 1755, he received the commission of captain in Col. Josiah Brown's regiment.

Capt. Dakin was a devout Christian. Just before going on this last expedition, he renewed a solemn covenant with God which he had made some years previous. This covenant is still extant.

Among other services rendered by the town was the maintenance of what were termed French Neutrals, the people whom Laugfellow has described in his poem "Evangeline."

One thousand of these French Neutrals arrived in the Massachusetts Bay Province, and were supported at public expense. Different towns, among which was Sudbury, had their quota to care for. Repeatedly is there a record of supplies furnished them by the town. The following is a general statement of some of these:

"An account of what hath been expended by s^d Town of Sudbury on Sundry French Persons sent from Nova Scotia to this province and by s^d government to town of Sudbury.

"The subsisting of Eighteen persons ten days—six persons three weeks, and four persons twenty-three weeks, the whole amounting to one hundred and twenty-seven weeks for one person charged at four shillings week for each person £25 — 8s.

Ephraim Curtis	Ebenezer Roby
Josiah Brown	Josiah Haynes
John Noyes	Samuel Dakin
Elijah Smith.	Selectmen.

"Some of them being sick a great many comers and goers to visit them made the expense the greater even thirteen or fourteen at a time for a week together."

THE WORK-HOUSE.—In 1753, a movement was made to establish a work-house in Sudbury. At the above-named date a vote was taken, when “it passed very fully in the affirmative, that it [the town] would provide a Work House in sd town, that Idle & Disorderly People may be properly Employed.”

As evidence of further modes of discipline employed in this period, we find that, in 1760, the town allowed payment to Col. Noyes for making stocks, and also for four staves for the tithingmen. In the warrant for a town-meeting in 1757, is the following article: “To see what the town will do with regard to Dido, a Negro woman who is now upon charge in this town.” With regard to this Dido the town ordered the selectmen “to make strict inquiries who brought Dido into town.”

Another institution introduced into the town in this period was the pest-house. Tradition points to several localities, which at that time were within the town limits, where pest-houses were situated. The site of one of these is at Nobscot Hill. On the eastern side of the hill, on land owned by Mr. Hubbard Brown, and a short distance from a small pond, are the graves of the small-pox victims. They are clustered together beneath a small growth of pines that are now scattered over that briar-grown spot; and the wind, as it sweeps through the branches of this little pine grove, and the occasional note of the wildwood bird, alone break the stillness and disturb the loneliness of that forest burial-place.

In 1760, Rev. William Cook died, and Nov. 4, 1761, Rev. Josiah Bridge was ordained his successor. On March 9, 1772, Rev. Israel Loring passed away, and Nov. 11, 1772, Rev. Jacob Bigelow was ordained for the pastorate.

SKETCH OF MR. LORING.—The service of Mr. Loring in the church at Sudbury was long and fruitful. He died in the ninetyeth year of his age and the sixty-sixth year of his ministry. It was said of him that “as he earnestly desired and prayed that he might be serviceable as long as he should live, so it pleased God to vouchsafe his request, for he continued to preach ’till the last Sabbath but one before his death, and the next day prayed in the town-meeting, which was on the 2nd day of the month. The night following he was taken ill, and on the 9th of March, 1772, he expired.” Mr. Loring had pious parentage. His father, Mr. John Loring, of Hull, came from England, December 22, 1634. It has been said of him that, like Obadiah, “he feared the Lord greatly.” His mother was also religious, and “prayed with her family in her husband’s absence.” Mr. Loring was born at Hull, Mass., April 6, 1682. It is supposed he was converted in his youth. He graduated at Harvard College in 1701. He began to preach at Scituate, Lower Parish, August 1, 1703, and preached first at Sudbury July 29, 1705. On the fidelity of Mr. Loring’s ministry we need offer no comments: his works are his memorials. At the time of his installa-

tion at Sudbury the church numbered one hundred and twenty,—forty-one males and seventy-nine females. During his ministry four hundred and fifty were added to it; of these, forty-two males and seventy-two females were added before the division of the church, and, after the division, there were added to the West Church one hundred and twenty-nine males and two hundred and seven females. The whole number of children baptized by Mr. Loring in Sudbury was fourteen hundred.

For a time preceding the Revolution, the West Side was divided into the North and South Wards. In 1765, Richard Heard offered to collect the taxes on the East Side the river for three pence per pound if they would appoint him collector and constable; and Aaron Haynes offered to collect them for the North Ward, West Side, and Jedediah Parmenter for the South Ward at the same rates.

In 1765, the town “voted to build a new stone pound between Lieut. Augustus Moors’ dwelling-house at the gravel pit, on Col. Noyes’ land which he promised to give the town to set a pound on by Dead.” The pound was to be “30 feet square from Endside to Endside, 6 ft. high with pieces of timber locked together round the top 8 inches square, for six pounds and the old pound.”

In 1771, the town voted to build a powder-house in which to keep the town’s stock of ammunition. It granted for this object “7 pounds 9 shillings and 4 pence, and agreed with Col. John Noyes to build it, and place it near or on W^m Baldwin’s land near Major Curtis’.” Another record of the same year states that “the town voted to erect the powder-house on the training field near Mr. Elisha Wheelers.” In 1773, it “voted to remove the powder-house to some suitable place on or near the gravel pit hill, and chose a committee to remove the same, if the committee should think the house will be sufficient for the use it was built for, and rough cast and underpin said building.”

REVOLUTIONARY WAR.—The period from 1775 to 1800, in this country, may truly be termed the period of the Revolution. It witnessed the commencement and close of armed opposition to the British Crown, and the establishment in America of a new nationality. In the work of overthrowing the old and establishing a new government, the several provincial towns had a common concern; each supplied its quota and each stood ready to respond to the country’s call. Sudbury, on account of its situation and size, bore a prominent part. It was the most populous town in Middlesex County; its territory was extensive, and for a time in close proximity to the seat of war; for these reasons much was expected of it, and its patriotism was equal to the demand.

The town was usually present, by delegates, in response to all calls, and her vote was staunch for the Continental cause. In 1770, the people manifested their hearty appreciation of the agreement of

merchants in Boston "to stop the importation of British goods, and engaged for themselves and all within their influence, to countenance and encourage the same." At an early day they chose a committee to prepare and present instructions to Peter Noyes, Representative to the General Court, in regard to the Stamp Act, which set forth their opinions very strongly concerning that petty piece of tyranny. Record after record appears on the town-book, of resolutions and acts that show how positive the people were in their patriotism, and how pronounced they were in declaring it. These are of such a character that to give a few of them will suffice.

"1773. The Town being met the committee appointed by the town to take into consideration the affair relating to the Teasent here by the East India Company, reported as follows, viz. :

"Taking into Consideration the late Conduct of administration, together with an act of Parliament enabling the East India Company to export their Teas unto America Free of all Duties and Customs, Regulations and penalties in America as are provided by the Revenue Act ; we are justly alarmed at this Detestable Craft and Policy of the Ministry to deprive us of our American Liberties Transmitted to us by our Worthy Ancestors, at no less expense than that of their Blood and Treasure. That price our Renowned Forefathers freely paid, that they might transmit those Glorious Liberties, as a free, full, and fair inheritance to Posterity, which liberties through the Indulgent Smiles of Heaven, we have possessed in peace and Quietness, till within a few years Past (Excepting in the reign of the Detestable Stewarts) but now Behold ! the pleasing scene is changed, the British ministry, assisted by the Inveterate Enemies to American Liberty on this as well as on the other side of the Atlantick, Combining together to Rob us of our dear bought freedom, have Brought us to this sad Dilemma, either to resolve like men in defense of our just Rights and Liberties, or sink under the weight of their Arbitrary and unconstitutional measures into a State of abject Slavery. Therefore as Freeborn Americans Intitled to all the Innumerable Liberties and Privileges of Freeborn Englishmen, we look upon ourselves under the Strongest Obligations to use our utmost Exertions in defense of our just Rights in every constitutional method within our power, Even though the Cost of the Defense should equal that of the purchase. Therefore resolved

"1st That as we are entitled to all the Privileges of British Subjects, we have an undoubted and exclusive Right to Grant our own monies for the support of Government and that no Power on Earth has a right to Tax or make Law binding us, without our consent.

"2^{dly} That the British Parliament laying a Duty on Tea Payable in America, for the Express purpose of Raising a Revenue, is in our opinion an unjust Taxation, and that the specious method of permitting the East India Company to export their Teas into the Colonies, has a direct tendency to rivet the Chain of Slavery upon us.

"3^{dly} That we will lend all the aid and assistance in our Power in every Rational Method, to hinder the Importations of Teas, so long as it is subject to a duty ; and that this Town are well pleased with and highly approve of that Resolution in particular entered into by the Town of Boston, viz. : that they will not suffer any Tea to be imported into that Town while subject to an unrighteous Duty ; and it is the desire and expectation of this Town that said resolution be not relaxed in any Degree ; which if it should it would much lessen that confidence (which we hope we may justly say) we have reason to place in that respectable metropolis.

"4^{thly} That the Persons appointed by the East India Company to receive and vend their Teas (by their obstinate refusal to resign their odious Commission) have shown a ready disposition to become the Tools of our Enemies, to oppress and enslave their Native Country, and have manifested such stupidity and wickedness to prefer private Interest to the good of their Country, and therefore can expect no favor or respect from us ; but we leave them to accumulate a load of Infamy, proportionate to their villainies.

"5 That whoever shall sell, buy, or otherwise use Tea, while subject to and poisoned with a duty, shall be deemed by us Enemies to their Country's welfare ; and shall be treated by us as such. The Town by their Vote Ordered the foregoing resolves to be recorded in the Town Book, and a Copy of the same to be forwarded to the Committee of Cor-

respondence at Boston, with our sincere thanks to that Respectable Town, for their Manly Opposition to every ministerial measure to enslave America.

"Thomas Plympton, Ezekiel Howe, John Maynard } Committee."
"Sampson Belcher, Phineas Glezen, Josiah Langdon }

Military Preparations.—November 14, 1774, "it was voted, that the town recommend to the several companies of militia to meet for the choice of officers for their respective companies, as recommended by the Provincial Congress. Also voted, that a company of militia on the East side, meet on Thursday next at twelve o'clock at the East meeting house in Sudbury, to choose their officers ; and that the companies on the West side to meet at the West meeting house at the same time and for the same purpose."

Besides looking after the militia, the town took measures to form companies of minute-men. These, as the name implies, were to hold themselves in readiness to act at a minute's warning. The officers received no commissions, but held their positions by vote of the men. Two such companies were formed, one on each side of the river. There was also a troop of horse composed of men from both precincts. Besides these companies of able-bodied men, there was an alarm company composed of men exempt from military service. The names of the companies were,—

North Militia Co., West Side, Capt. Aaron Haynes, 60 men.

East Militia Co., East Side, Capt. Joseph Smith, 75 men.

South Militia Co. (Lanham District), both sides, Capt. Moses Stone, 92 men.

Troop of Horse, both sides, Capt. Isaac Loker, 21 men.

Minute Co., West Side, Capt. John Nixon, 58 men.

Minute Co., East Side, Capt. Nathaniel Cudworth, 40 men.

These make, besides the alarm list of Jabez Puffer, six companies—348 men—in process of preparation for the coming struggle.

In 1776, the town "voted to pay each of the minute-men one shilling and sixpence for training one half day in a week, 4 hours to be esteemed a half day, after they were enlisted and until called into actual service or dismissed ; and the Captains 3 shillings and Lieutenants 2 shillings and six pence and the ensign 2 shillings."

The muster-rolls are preserved and represent about one-fifth of the entire population. The number in actual service at the Concord and Lexington fight, three hundred and two. The following report shows to what extent these companies were equipped :

"Sudbury, March 9th 1775 :

"The return of the Several Companies of Militia and Minute in S^d Town viz.

"Capt. Moses Stone's Company—92 men of them, 18 no guns. at Least one third part y^e forelocks unfit for Service others was in a quip.

"Capt. Aaron Haynes Company—60 men well provided With Arms the most of them provided with Bayonets or hatchets a boue one quarter Part with Cartrige Boxes.

"Capt. Joseph Smith's Company consisting of—75 able Bodied men forty well a quip twenty Promis to find and a quip themselves Emedetly fifteen no guns and other was no a quip.

"The Troop Capt. Isaac Loker (Loker)—21 Besides what are on the minut Role well a quip.

"Returned by Ezekiel How. Left^h Con^l" (Stearns Collection.)

It is not strange that, at the time this report was given, the troops had not been fully equipped. It was not easy to provide for so many at once, but the following record may indicate that the town had been endeavoring to supply the deficiency since the preceding fall, October 3, 1774:

To Capt. Ezekiel How for 20 guns and Bayonets 27-0-2
600 pounds Lead 8-16-0

Early on the morning of April 19th the Sudbury people were astir. The news of the march of the British proclaimed by Paul Revere came by a messenger from Concord to Thomas Plympton, Esq., who was a member of the Provincial Congress. In a little more than a half hour after, and between four and five o'clock in the morning, the bell rang and a musket was discharged as a signal for the soldiers to report for duty. The West Side companies arrived at the North Bridge about the time that the firing commenced there, and joined in the pursuit of the retreating British. In the memorable fight that followed the town lost two men, viz.: Deacon Josiah Haynes and Asahel Read. The former was eighty years old and was killed at Lexington by a musket bullet. His remains are hurried in the "Old Burying-Ground" at the centre. Asahel Read was son of Isaac Read and a member of Nixon's minute company.

It is said that he exposed himself rashly to the fire of the enemy, and although warned to exercise more caution, persisted in his venturesome conduct until he fell.

Sudbury was represented by three companies at the battle of Bunker Hill. These were commanded by Sudbury captains and made up mainly of Sudbury citizens. The town also furnished three regimental officers,—Col. John Nixon, Major Nathaniel Cudworth and Adj. Abel Holden, Jr. Capt. John Nixon of the minute-men was promoted to the rank of colonel, and was authorized, April 27th, to receive nine sets of beating papers. Capt. Nathaniel Cudworth was made major in the regiment of Col. Jonathan Brewer, who received enlistment papers April 24th, and Abel Holden, Jr., was made Colonel Nixon's adjutant.

The three Sudbury companies were commanded by Capt. Thaddeus Russell, Aaron Haynes and David Moore. The companies of Russell and Haynes were in Col. Brewer's regiment, and that of Moore in Col. Nixon's. The total number in these companies was one hundred and fifty-two. In the engagement of June 17th, these men were in a very exposed condition. The regiments of Nixon and Brewer were at the left of the American line, in the direction of the Mystic River. A part of the men had no breastwork whatever to protect them. An effort was made to form a slight breastwork of the newly-mown hay about there, but the British advanced and they were forced to desist. In their exposed position they held their ground, and fought till the order came for them to retreat. The ammunition of the men in the redoubt

had failed and it was useless to protect the flank. Both the colonels, Nixon and Brewer, were wounded and the regiment of the former was one of the last to leave the field. In Capt. Haynes' company, two men were killed, viz.: Corning Fairbanks, of Framingham, and Joshus Haynes, of Sudbury. In Capt. Russell's company, Leblaus Jenness, of Deerfield, was slain.

As the war progressed Sudbury soldiers were still in the service. Capt. Asahel Wheeler commanded a company in the Ticonderoga campaign, and Capt. Abel Holden, Caleb Clapp and Aaron Haynes had command of Sudbury soldiers elsewhere. In 1778, several companies were still in the field. Four of these had 327 men, and were commanded as follows: West Side men, Capt. Jonathan Rice and Capt. Asahel Wheeler; East Side men, Capt. Nathaniel Maynard and Capt. Isaac Cutting.

Government Storehouses.—Besides other responsibilities, the town had charge of some government storehouses containing munitions of war, which the Sudbury teamsters, from time to time, conveyed to the front. Various receipts are still preserved which were received by these teamsters. These buildings were situated on the northerly part of Sand Hill, east of the county road. Several squads of soldiers were employed to guard them, and at one time Captain Isaac Wood was commander of the guard. In 1777, the following soldiers did guard duty: "Corporal Robert Eames, Silas Goodenow Jr, Philemon Brown, Elisha Harrington, Jon^s Clark." A guard of the same number was there in 1778 and 79, but all the men were not the same. The field in or near which these buildings stood was used as a training-field in former years, and at one time a militia muster was held there. But now all trace even of the site has become obliterated, and for years it has been a quiet feeding place for cattle, and all is as successful there as if the slow pacing of the old Continental guard had never been heard at Sand Hill. The town had a population of 2160, with about 500 ratable polls; and it is supposed that, during the war, from 400 to 500 men had some service either in camp or field. Of these soldiers, one was brigadier-general, three were colonels, two were majors, two were adjutants, two were surgeons, twenty-four were captains and twenty-nine were lieutenants. That the soldiers were in places of peril is indicated by the following records of casualties:

CASUALTIES TO SUDBURY SOLDIERS.

Killed.—Deacon Josiah Haynes, Aged 80, April 19th 1775; Asahel Read April 19th 1775; Joshua Haynes Jr, of Capt Aaron Hayne's Company, June 2d 1775, at Bunker Hill; Sergeant Thaddeus Moore, 1777, at Saratoga; Benjamin Whitney,—By accident—

Wounded.—Gen. John Nixon and Nathan Maynard, at Bunker Hill; Lieut. Joshua Clapp, at Saratoga; Cornelius Wood, Nahm Haynes, Captain David Moore, Joshua Haynes; Benjamin Barry, lost an arm in Canada Expedition, 1776.

Died of Sickness.—Sergeant Major Jesse Moore; Sergeant Samuel Maynard, of the small pox at Quebec with Arnold, 1776; Sergeant Hopestill Brown, Sergeant Eljah Willis.

At Ticonderoga.—Ensign Timothy Underwood, Oliver Sanderson, Daniel Underwood, James Puffer, Phineas Gleason, Stephen Puffer, of

Capt Daniel Bowdler's Co., Col Webb's Regt died Oct 34; Solomon Rice, Timothy Rice, Josiah Cutter.

Taken Prisoner and Never Heard of—Thaddeus Harrington, Thomas Dalrimple, Thomas Moore, Daniel Haynes.

Lost Privateering—Isaac Moore, Silas Goodenow, Lemuel Goodenow, Peletiah Parmenter.

Persons Who Met With Casualties the Nature of which is Not Specified.—John Brewer, James Demander, John Bennis, Timothy Mossman.

In closing this account of Sudbury's military service we will give some facts in the life of General Nixon.

Sketch of General Nixon.—Gen. John Nixon, was a son of Christopher Nixon, who went to Framingham about 1724, where seven children were born, of whom John was the oldest. At an early age, being but a mere boy, he entered the army, and at the instigation of older persons he left unlawfully, but clemency was shown him and he was allowed to return to the ranks. His subsequent career proved him to be a true soldier.

In 1745, when he was but twenty years old, he was in the Pepperell Expedition to Louisburg, and lieutenant in Captain Newell's company at Crown Point in 1755. Later in the war he served as captain. At one time, when operating against the French forces, he was led into an ambuscade and only forced his way out with the loss of most of his men. As before noticed, at the beginning of the Revolutionary War he served as captain of a company of minute-men. April 24, 1775, he received the commission of colonel. He fought and was wounded at the battle of Bunker Hill. He went with the army under Washington to New York, and was promoted, August 9th, to brigadier-general. His promotion to the rank of general of brigade was on recommendation of Washington, who stated to Congress that Nixon's military talents and bravery entitled him to promotion. In his new position he had, for a time, command of two regiments and a force of artillery at Governor's Island, New York Harbor. August 27th he left there, and subsequently operated with the army in the northern campaign in New York State against Burgoyne. When it was decided to advance against the latter, General Gates ordered Nixon and two other commanders to make the attack. A cannon-ball passed so near his head that the sight and hearing on one side were impaired. After the surrender of Burgoyne, General Nixon and some others were detailed to escort the prisoners to Cambridge. About that time he had a furlough of several months, in which time he married his second wife. General Nixon was on the court-martial—with Generals Clinton, Wayne and Mublenburg, and of which Gen. Benjamin Lincoln was president—for the trial of General Schuyler for the neglect of duty in the campaign of 1777, by which Ticonderoga was surrendered. The trial was at the request of General Schuyler, and by it he was fully acquitted with the highest honors. In 1777, General Nixon's brigade had headquarters for a time at Peekskill, N. Y., and for a time in 1777, at Albany. On Sept. 12, 1780, he closed his military career by resigning his commission as general, and retired to private life.

In considering the military service of the town in the Revolutionary War, we have only considered a part of her history. During that time important civil transactions were taking place also. There were deprivations to be endured by those at home; the country was burdened with debt, the currency was in a very uncertain state, and, because of its depreciated condition, there was more or less confusion in commercial affairs. There was as much need of sagacity on the part of the civilian in council, as of military men in the field, to direct the affairs of State and town. The town-meetings of those days were very important occasions, and, unless the people met emergencies there in a prompt and efficient manner, the fighting element in the field could accomplish but little. In this respect the people of Sudbury were not deficient. We have heard of no instance where a Tory spirit was manifest nor where a patriotic purpose was wanting. During the war a large share of the town warrants set forth the needs of the county or town which were caused by the war; and the town-meeting that followed was about sure to result in a generous response to the demand.

Another man who was prominent in military matters was Col. Ezekiel Howe. He belonged to the old Howe family in Sudbury, and was a former proprietor of the Red Horse Tavern.

In 1780 the town was divided. The part set off was called East Sudbury, since Wayland.

In 1792 the town voted to sell the training-field in the southeast part of the town, and "the Committee formerly employed to sell the Work house" were appointed to attend to the work. The same year measures were taken for the prevention of the small-pox. The article concerning it in the warrant was "To see if the town would admit the Small-Pox into sd town by Inoculation." "It passed in the negative." The following year the selectmen were instructed "to take measures to prevent the spreading of the small-pox, and to prosecute the persons who transgressed the laws respecting the disease." Instructions were also given "to make diligent search to see if there were any persons who had been inoculated for small-pox contrary to law."

On Oct. 5, 1795, the town again voted "to build a new Meeting-House, that it should be erected on the common land near to the present meeting-house, and that the south and west cells of sd house should occupy the ground on which the south and west cells of the present meeting-house now stand upon, and that the enlargement of the meeting-house should extend North and East. Voted to accept a plan drawn by Capt. Thomson which plan is 60 feet by 52 with a porch at one end with a steeple or spear on the top of sd porch. Voted that the Committee for building the house should consist of nine persons, and that they should receive nothing for their services." In 1796 it was voted that a bell should be purchased for the meeting-house. October, 1798, the building com-

mittee presented to the town the summary of receipts and expenditures which was six thousand twenty-five dollars and ninety-three cents.

In 1812 the number of soldiers reported to be in readiness was eighteen. "Voted to give them \$1.25 per day while in service and doing actual duty." The following persons from Sudbury were in service a short time during the war: Aaron Hunt, Jonas Tower, James B. Puffer, Josiah Puffer, John Carr, Cyrus Willis, George Barker, Leonard Dutton, Otis Puffer, Jesse Puffer, John Sawyer. Warren Moor was in the naval service on a privateer, was taken prisoner and spent some time in Dartmoor Prison.

In 1814, the town settled a new pastor, Rev. Jacob Bigelow having become infirm. In 1810 Rev. Timothy Hillard had been invited to preach as a candidate, and June 1, 1814, he became colleague pastor at a salary of six hundred and fifty dollars and five hundred dollars to begin with.

Sept. 26, 1815, Mr. Hillard was dismissed. The next year Rev. Mr. Hurlbut was called to the pastorate. Sept. 12, 1816, Rev. Jacob Bigelow died. In 1823 a Methodist class was formed, which resulted in the formation of a Methodist Episcopal Church. A meeting-house was soon erected which was dedicated in 1836.

March 5, 1832, the town voted to buy a town-farm. In 1845, it voted to build a town-house.

In 1839, a new religious society was formed called the Sudbury Evangelical Union Society. The same year it voted to build a meeting house which was completed and dedicated Jan. 1, 1840.

May 11, 1839, Rev. Rufus Hurlbut died.

March 2, 1841, Rev. Josiah Ballard was installed his successor.

Jan. 5, 1845, Rev. Linus Shaw was installed as pastor of the old parish, which position he retained till his death, Jan. 5, 1866. Since his death the following ministers have acted as pastors for the First Parish: Revs. Bond, Dawes, Webber, Knowles, Willard, Sherman, E. J. Young and Gilman. For several years the church has had preaching but a small portion of each year.

In 1852 Rev. Josiah Ballard was dismissed from the Evangelical Union Church; and the following persons have been his successors: Reverends C. V. Spear, E. Dickinson, W. Patterson, P. Thurston, G. A. Oviatt, C. Fitts, D. W. Goodale, W. Richardson.

THE WADSWORTH MONUMENT.—An important event that occurred early in the last half of the present century was the erection of the Wadsworth Monument. February, 1852, a petition was presented to the Legislature of this Commonwealth, in which, after a brief rehearsal of the events in connection with the Wadsworth fight, the petitioners say "that a small, temporary monument was erected many years ago by the Rev. Benjamin Wadsworth, President of Harvard College, over the grave of his father, Captain Wadsworth, and his associates in arms. Said monument

being in a dilapidated condition, it is desirable that it be rebuilt in a more durable form. Wherefore, at a legal town-meeting held for that purpose, your petitioners were chosen for a committee and instructed to petition your Honorable body for aid in erecting a suitable monument to the memory of said officers and men."

Signed, "Drury Fairbank and thirteen others."

Accompanying this report is the resolve, "That a sum, not exceeding five hundred dollars in all, be and the same is hereby appropriated towards defraying the expense of repairing or rebuilding, in a substantial manner, the monument in the town of Sudbury, erected by President Wadsworth of Harvard College, about the year 1730, to the memory of Captain Samuel Wadsworth and a large number of other officers and soldiers and others in the service of the colony, who were slain upon the spot marked by the monument, . . . in the defence of that town against the Indians, the said sum to be expended under the direction of His Excellency the Governor, in connection with a committee of said town of Sudbury."

Agreeable to the foregoing resolve, at a legal town-meeting held June 14, 1852, it was voted that Nahum Thompson, Drury Fairbank, Ephraim Moore, Enoch Kidder and J. R. Vose be a committee to superintend the building of the Wadsworth Monument. It was then voted to appropriate a sum of money, sufficient to complete said monument and finish about the same, out of any unappropriated money in the treasury, said sum not to exceed five hundred dollars. His Excellency George S. Boutwell, then Governor of this Commonwealth, in connection with the committee of the town, "procured a handsome monument, consisting of three large square blocks of granite, one and one-half, two, and three feet thick, raised one above the other; from the upper one of which rises a granite shaft, tapering towards the top; the whole being twenty-one and one-half feet in height. On the front of the centre block appears the following inscription:

"This monument is erected by the Commonwealth of Massachusetts and the town of Sudbury, in grateful remembrance of the services and sufferings of the founders of the State, and especially in honor of

CAPT. SAMUEL WADSWORTH, OF MILTON;

CAPT. BROCKLEBANK, OF ROWLEY;

LIEUT. SHARP, OF BROOKLINE;

and twenty six others, men of their command, who fell near this spot, on the 18th of April, 1756, while defending the frontier settlements against the allied Indian forces of Philip of Pokanoket.

1852."

(The date of the fight as above given is incorrect, the true date being April 21st.)

SCHOOLS SINCE 1850.—*Wadsworth Academy.*—In 1856, measures were taken to establish an academy at South Sudbury. A corporation was formed, the object of which was to hold property, consisting of a building, land and suitable fixtures for educational and religious purposes. The design of the projectors of the enterprise was to erect a building, the upper part of

which could be used for a school, and the lower part for social and religious services.

The first meeting was held March 11, 1857, and the following officers were elected: President, Dr. Levi Goodenough; directors, Roland Cutler, Samuel Puffer; treasurer, Samuel D. Hunt. The land was purchased of Nichols B. Hunt, and the building was erected by Arthur Bowen, of South Sudbury. It was two stories high, had a colonnade in front and faced the west. It was named in honor of Captain Wadsworth.

The school flourished for some years, until the demand for its continuance ceased. The school-rooms in it were then used for one of the town's common schools. A few years later the building was destroyed by fire, and on its site was erected a Congregational chapel in 1880.

Important changes took place during this period in connection with the common schools. Old districts were divided, and new ones were formed; old school-houses were moved and new ones built. A large share of the territory of the Northwest District was taken from Sudbury by the incorporation of Maynard; but in the districts that remained, the schools and school-houses remained. The Centre School-house, that had stood on the common, was moved to its present location south of the Methodist meeting-house, and after its removal was fitted up for the use of two schools,—a primary and grammar. In 1868, the Lanham School-house was moved from the road corners by the Coolidge place to its present location, north of the Boston and Worcester highway, on land that once belonged to the Goodnow farm. In 1869, eight hundred dollars was granted for repairs on the Southwest School-house. In 1870, the town voted to build a new school-house in the Northeast District, to be located at or near the junction of Puffer Lane and the north road. The building was erected at a cost of \$2884.82. The same year measures were taken for the removal of the old Pantry School-house, and the result was that a new school-house was built in the southerly portion of the Northeast District, and the Pantry School-house was moved and became the depot of the Framingham & Lowell Railroad. The new school-house was located near the house of Alfred Thompson, and cost \$3825.23. About the same time the town voted to build a school-house in the west part of the town in a locality where, hitherto, there had been none. It was erected on the Boston and Berlin road, near the house of John Coughlin, at a cost of \$2508.77. The building committee rendered their report to the town March 4, 1872, and at the same meeting the committee appointed to number the school districts reported that plates had been procured, lettered, and numbered, at a cost of \$7.50, and that commencing with the Centre District, which they designated as number one, the committee next proceeded to the house in the Southwest District, which they numbered two. Thence, passing to the right of

the centre of the town, the remaining houses were numbered in their regular order, closing with the new house near the residence of John Coughlin, which was numbered six. The town opened a new school at South Sudbury, and March 1, 1875, "voted to allow the proprietors of Wadsworth Hall \$100 for rent of said hall for school purposes."

In 1881, a school-house was built in the Wadsworth District by C. O. Parmenter, at a cost of \$2560.61. It was placed on a lot containing a half acre of land, which was purchased of Walter Rogers, and situated on the south side of the Sudbury and Marlboro' road, about midway between the Massachusetts Central and Old Colony Railroads.

THE GOODNOW LIBRARY.—In 1862, the town received the means of establishing a public library through the generosity of John Goodnow, of Boston. The gift came in the form of a bequest, which was set forth in his will as follows:

"First: I give, devise, and bequeath unto my native Town of Sudbury, in the County of Middlesex, the sum of Twenty Thousand Dollars, to be appropriated for the purpose of purchasing and keeping in order a Public Library, for the benefit of the inhabitants of that town."

"Second: I also give, devise and bequeath to the said Town of Sudbury, three acres of land on the northerly part of the Sudbury Tavern Estate, adjoining the land of Howe Brown, beginning at the Meeting-house road, and running with equal width with Brown's line to the brook, for the purpose of erecting thereon a suitable building for a Library; and the further sum of Twenty-five Hundred Dollars for the erection of such building; and whatever portion of said land shall not be needed for the purposes of said Library building, the said Town of Sudbury shall have full power and authority to apply to any other Town purposes, but without any power of alienation."

"At a legal meeting held at Sudbury, on the seventh day of April, 1862, the Town voted to accept the bequest contained in the first and second clauses of the last Will and Testament of John Goodnow, late of Boston; and Messrs. James Moore, John H. Dakin, and George Parmenter, Selectmen of the Town, were appointed and authorized to receive and receipt for the said bequest." At the same meeting it was voted to adopt the following resolution: "Resolved by the inhabitants of Sudbury, in Town meeting assembled, that we accept with thankfulness the noble bequests given to the town by the late John Goodnow of Boston; and that, as an evidence of our gratitude, we pledge ourselves to endeavor to the utmost of our ability, honestly and honorably to carry out the benevolent intentions of the donor."

July 14th, the town instructed the committee to erect a building for the library given by John Goodnow, according to plan reported to them, the sum not to exceed \$2500. April 4, 1864, the committee reported the cost of the building, including \$32.43 for

setting out shade trees, to be \$2691.35. The building was enlarged several years ago by an addition on the west; and at present there is little, if any, unoccupied space. Four catalogues have been issued; the first, at the opening of the Library, when it contained less than 2300 volumes; the second in 1867; the third in 1874, when it contained nearly 5000 volumes; and the fourth in 1887, when it contained over 9700. The grounds about the library are ample, and tastefully laid out, consisting of a level lawn adorned with shade trees. The building is reached by a circular driveway extending from the county highway. In the rear the land extends to Hop Brook.

John Goodnow, the donor of this library fund, was a son of John and Persis Goodnow, who lived at Latham. He was born at Sudbury, Sept. 6, 1791, and died in Boston, Dec. 24, 1861. His remains were placed in his tomb at Sudbury Centre.

RAILROADS.—No railroad passed through the present limits of the town until about the beginning of the last period of the present century. About 1870 the Framingham & Lowell Railroad was begun, and in the fall of 1871 the cars began passing through the town. A station was built at North and South Sudbury and at the centre. The one at South Sudbury was built a little northerly of the junction of the Sudbury and Marlboro' and Framingham highways, and has since been moved.

July 22, 1870, it was voted "That the Town Treasurer be authorized and instructed to subscribe for, take and hold Capital Stock in the Framingham and Lowell Railroad Company to the amount of Thirty thousand dollars. . . . Provided said Railroad shall not be located in any place more than half a mile from the last survey in the Town of Sudbury."

The road has recently been leased to the "Old Colony" Company, and is now known as the "Northern Branch of the Old Colony Road." In 1887 every station of this road within the limits of Sudbury was burned. Recently new and more commodious ones have been built on or near the sites of the former ones.

Massachusetts Central Railroad—In October, 1880, the first rails were laid at South Sudbury on the track of the Massachusetts Central Railroad, beginning at its junction with the Framingham & Lowell road. During the following winter the road was continued towards Hudson on the west and Boston on the east; and July 22, 1881, nine car-loads of rails passed over the Central road, entering upon it at Waverly and going to Hudson. April 20, 1881, a train of cars passed over the road from Boston to Hudson; and October 1st, the same year, regular trains began to run. May 16, 1883, the cars atopped running, and commenced again Sept. 28, 1885, under the management of the Boston & Lowell Railroad. Recently the road was leased to the Boston & Maine Railroad corporation. The Junction Station is a fine one, and the town is now provided with excellent railroad facilities.

THE CIVIL WAR.—In the Civil War Sudbury was fully abreast of the average New England town in its promptness and zeal. The first war-meeting was a citizens' mass-meeting held in the Town Hall. The people did not wait for the slow call of a warrant. They assembled spontaneously to consult as to what was required of them, with full confidence that in a town-meeting to be subsequently called their acts would be ratified and made legal. This meeting was characterized by unanimity and enthusiasm. The spirit of the heroes of '75, when they were assembled on Sudbury Common, with arms in their hands as militia and minute-men, to start on their march to Concord, was evinced on this April evening nearly a century later, when the citizens of Sudbury were again met to defend their homes and native land.

The principal business of this meeting related to the fitting out of the "Wadsworth Rifle Guards." This was a company of State Militia which belonged to Sudbury, and was attached to the Second Battalion of Rifles, which was commanded by Major Ephraim Moore, of Sudbury, until his death, which occurred some years previous. The following record of a legal town-meeting, held April 29, 1861, sets forth the business that was transacted at the mass-meeting, and its ratification by the town:

"The town voted to furnish new uniforms for the members of the Wadsworth Rifle Guards, Company B, Second Battallion of Rifles, M. V. M., forthwith; also to furnish each member of said company with a revolver, in case said company is called into the service of the country, the revolvers to be returned to the selectmen of the town when the holders of them shall return home and be discharged from the service; also the uniforms to be returned to the town if the members of the company are not held in service more than three months. Voted also to pay to each member of said company, in case they are called into service, a sum of money in addition to their pay received from the government, which shall make the whole amount of their pay twenty dollars per month while they are in such service, and that ten dollars of the above sum be paid to each member whenever he shall enter such service. Voted also that the families of those who may leave shall be furnished with all necessary assistance at the expense of the town, and the business of those who may leave it shall be properly cared for by the town, and not allowed to suffer by their absence." "Voted, also, that each commissioned officer of the company belonging in town be presented with a suitable sword at the expense of the town, and that the other commissioned officers not belonging in town be furnished with the same, if they are not otherwise provided for." "Voted to grant the sum of one thousand dollars," for the purposes above mentioned.

The amount of money actually expended in fitting out this company was \$987. About the time of the holding of the first war-meeting there were enlist-

ments into the Sudbury company, with the expectation of soon being called into the service for three months, and the company for a time continued to drill. No call, however, came for this term of service. The emergency had been met, Washington for the time was safe, and it was at length discovered that the company as such would not be received into any existing regiment for the term of three months. The next demand was for soldiers to serve for three years or the war, and the "Wadsworth Rifle Guards" were soon ordered to Fort Independence that they might enlist in the Thirteenth Regiment for this length of time. Twenty-five of them enlisted, and July 30th the regiment left the State. This was the largest number of Sudbury men who enlisted at any one time, and they have the honor of being the first Sudbury soldiers who enlisted from the town.¹

From the time of the first enlistments there were repeated calls for troops. "Three hundred thousand more" became a familiar term, and at each new call the town took measures to fill its quota. July 4, 1862, the President issued a call for volunteers for three years, and July 28th the town "voted to pay a bounty of one hundred and twenty-five dollars to each volunteer who has enlisted or may enlist into the service of the U. S. . . . to the number of fourteen." Also, "Voted to instruct the selectmen to look after and provide for any sick or wounded volunteer belonging to the Town of Sudbury." In August of the same year a call came for soldiers for nine months' service; and Aug. 19, 1862, the town "voted to pay the sum of one hundred dollars to each person who voluntarily enlists into the service of the United States for the term of nine months, on or before the first day of September next, to a number not exceeding the quota of their town."

Dec. 17, 1862, the town voted to fill up their quota by paying one hundred and forty dollars bounty. December 22d the committee reported at a town-meeting held in the evening, "that they had procured sixteen men to fill up the town's quota for the military service of the United States, that said men had been accepted and sworn into the said service, and had been properly accredited to the town of Sudbury, and that said committee paid the sum of one hundred and thirty dollars for each man."

Oct. 17, 1863, the President issued another call for three hundred thousand men, and December 7th the town "voted to authorize the selectmen to use all proper and legal measures to fill up the town's quota of volunteers, agreeable to the call of the President of the United States for three hundred thousand volunteers, dated Oct. 17, 1863."

March 14, 1864, the President issued a call for two hundred thousand men, and March 22d the town appointed a committee "to take all proper and legal

measures to fill the quota of the town" under this call. June 9th the town voted to "raise money sufficient to pay one hundred and twenty-five dollars to each volunteer who shall enlist into the service of the United States and be duly accredited as a part of the quota of the Town of Sudbury in anticipation of a call from the President to recruit the armies now in the field, and that the selectmen be required to use all proper measures to procure said volunteers." It was voted also "that the selectmen be authorized to procure not less than seventeen men." At the same meeting "the committee appointed by the town at a meeting held March 22, 1864, to take all proper and legal measures to fill the quota of the town under the call of the President of the United States for two hundred thousand men, dated March 14, 1864, reported that the town's quota was ten men; that there had been seven men accredited to the town by volunteer enlistment at an expense of nine hundred and ten dollars, and that the remaining three were drafted and accepted."

Nov. 8, 1864, it was "voted to grant the free use of the Town Hall for the Soldiers' Aid Society." This was an organization formed in the war period for the purpose of assisting the soldiers. May 29, 1865, it was "voted to refund all money contributed by individuals to fill the quotas of the town of Sudbury in the year 1864."

LIST OF CASUALTIES.—The fatal casualties that occurred to persons who were accredited to or natives of Sudbury, as we have found them recorded in the town-book or the adjutant-general's printed report, are as follows:

Killed or mortally wounded in battle.—Horace Sanderson, John Forsyth, Edwin S. Parmenter.

Died in service of disease or hardship incident to army life.—John P. Hudson, Curtis Smith, George T. Dickey, Abel H. Dakin, Thomas Corcoran, Hartson D. Sinclair, Thomas Smith, Cyrus E. Barker.

SUMMARY OF SERVICE.—According to Schouler, in his "History of Massachusetts in the Civil War," Sudbury furnished 163 men, which was eleven over and above all demands. He states that "four were commissioned officers. The whole amount of money appropriated and expended by the town on account of the war, exclusive of State aid, was \$17,575. The amount of money raised and expended by the town during the war for State aid to soldiers' families, and repaid by the Commonwealth, was \$6,199.18."

"The population of Sudbury in 1860 was 1691; the valuation, \$1,043,091. The population in 1865 was 1703; the valuation, \$1,052,778. The selectmen in 1861 and 1862 were James Moore, John H. Dakin, George Parmenter; in 1863, A. B. Jones, George Goodnow, H. H. Goodnough; in 1864 and 1865, Thomas P. Hurlbut, Charles Hunt, Walter Rogers. The town clerk during all the years of the war was J. S. Hunt. The town treasurer during the years 1861, 1862 and 1863 was Edwin Harrington; in 1864 and 1865, S. A. Jones.

¹A sketch of Sudbury soldiers, and of the regiments in which they enlisted is given in Hudson's "History of Sudbury."

Shortly after the war Sudbury's rank among the towns of the county in population was the thirty-ninth. In 1776 it was the only town in Middlesex County having a population of 2000.

BI-CENTENNIAL.—April 18, 1876, the town celebrated what was supposed to be the two hundredth anniversary of Wadsworth's Fight at Green Hill. At early dawn a salute was fired, and a procession of "Antiques and Horribles" paraded, making a trip to South Sudbury. Later in the day a procession of the citizens, including the school children, was formed and marched to Wadsworth Monument, which was decorated with the national colors. Services were held at the Unitarian Church. The oration was delivered by Professor Edward A. Young, of Harvard College.

THE GEORGE GOODNOW BEQUEST.—In November, 1884, it was voted to "accept of a donation of Ten Thousand Dollars offered the Town of Sudbury, by George Goodnow, of Boston, for the purpose of establishing a fund, the income of which he desires to be used by the selectmen of said Town for the time being, to assist such citizens of the Town who are not, at the time of receiving the assistance, paupers, but who may for any cause be in need of temporary or private assistance. By motion of Rev. George A. Oviatt, the town voted that, "we do now as a town by vote express our hearty thanks to the donor of this generous Fund, assuring him of our appreciation of his love of his native town, and equally of his noble desire to render aid to the needy therein. And may his sunset of life be bright to the last, and terminate in the day of endless light and blessedness."

March, 1885, a committee consisting of Capt. James Moore, Jonas S. Hunt, Esq., and Horatio Hunt was appointed "to confer with Rev. A. S. Hudson in regard to a publication of the History of Sudbury." April 6th, of the same year, the committee reported to the town the result of their interview. This was in part that the work be devoted to the annals of the town, but not any part of it to genealogy as it is usually inserted in books of this kind.

April 2, 1888, the town "voted to publish not less than 750 copies of the History as written and compiled by Rev. A. S. Hudson, and to pay him \$1500 for his services in writing and superintending the publication of the work; and that the Trustees of the Goodnow Library be a committee associated with him to have charge of the publication of the work." The town also voted at the same meeting \$1500 for the publication.

ARRANGEMENTS FOR THE 250TH ANNIVERSARY CELEBRATION.—At a meeting held November, 1888, the town voted to petition the Legislature for permission to grant money to be expended in the observance of the 250th Anniversary of the Incorporation of Sudbury. Permission having been obtained, at a subsequent meeting the sum of \$300 was appropriated, and a committee was appointed to make and carry out such arrangements as would be appropriate to

the proposed celebration. The committee consisted of Jonas S. Hunt, Rufus H. Hurlbut and Edwin A. Powers, who were to co-operate with a committee from Wayland, and the joint committee were to act for the two towns.

The joint committee met at Sudbury and organized with J. S. Hunt for chairman, and R. T. Lombard, Esq., of Wayland for secretary. The following outline of a plan was proposed, and left open, subject to change if deemed expedient before the day arrived.

1. A gathering of the children of the two towns at Wayland on the morning of September 4th, when entertainment and a collation would be furnished.

2. A return by railroad at noon to South Sudbury, when a procession will form and march to Sudbury Centre.

3. Dinner in the Town Hall.

4. Speaking from a platform on the Common, if the day is fair, and if not, in the Unitarian Church.

5. Fireworks and music in both towns, with ringing of bells morning and night.

It was voted to extend an invitation to Hon. Homer Rogers, of Boston, to act as president of the day; to Richard T. Lombard, Esq., of Wayland, to serve as chief marshal, and to Rev. Alfred S. Hudson, of Ayer, to deliver the oration.

Ample opportunity was to be provided for addresses by speakers from abroad, who are expected to be present and assist at the celebration.

The programme as thus outlined was carried out. A large company gathered in the morning at Wayland, where the school children listened to addresses in the Town Hall by Rev. Robert Gordon and William Baldwin, Esq. A collation was then served to the children, after which a part of the large company went to South Sudbury, at which place a procession was formed which moved about one o'clock to Sudbury Centre. The following is a description of the exercises at Sudbury as given in a report by a Boston daily newspaper dated September 5, 1889:

The procession from South Sudbury to Sudbury Centre was quite an imposing one; in fact, the occasion quite outgrew the expectation of its originators. The houses all along the way and through the town generally were profusely decorated.

"R. T. Lombard, chief marshal; E. H. Atwood and A. D. Rogers, aids.

Drum Major, Cyrus Roak.

Fitchburg brass band, 23 pieces J. A. Patz leader

Detachment of the Grand Army Post, under E. A. Carter.

Boody Hook and Ladder Company of Cochituate, L. Dumphy commanding.

J. M. Bent Hose Company of Cochituate, D. W. Mitchell commanding.

Capt. D. W. Ricker, with 45 mounted men.

Mounted Pequot Indians from Wayland, "Spotted Thunder" commanding.

Carrriages containing invited guests, Hon. G. A. Marden, State Treasurer; Hon. Homer Rogers, President Boston Board of Aldermen and president of the day.

Ex-Gov. George S. Boutwell.

Rev. Alfred F. S. Hudson, historian of the town.

Hon. C. F. Gerry, Edward B. McIntyre, Hon. Levi Wallace, Judge

North, Middlesex District Court, Hon. E. Dana Bancroft, Hon. James T. Joslin of Hudson, Rev. Brooke Herford, Wadsworth Guards.

Thirty carriages containing citizens and guests."

Arriving at Sudbury, a half an hour was given for rest, the Unitarian Church being decorated very handsomely and turned over to the people as a resting and fraternizing spot.

The dinner was gotten up by Elgin R. James, of Waltham, who expected to feed about 500 people, but found 600 hungry ones demanding admission. The dinner was first-class in every respect, and after doing justice to it the party repaired to the green in front of the Town Hall, upon which seats had been arranged and a very tasty stage erected, covered with bunting and surmounted by banners and glory flags and bearing the inscription "1639 Quarter Millennial 1889."

On the desk was the original Bible presented to the First Church and printed at Edinburgh by James Watson, printer to the King's most excellent majesty, in the year MDCCXXII.

After music by the band, Rev. D. W. Richardson, of Sudbury, invoked divine blessing.

Jonas S. Hunt, chairman of the Executive Committee, welcomed fathers, mothers, sisters, brothers, not forgetting "cousins and aunts," and took great pleasure in introducing a Sudbury boy as president of the day—Hon. Homer Rogers, of Boston.

After some very appropriate remarks, Mr. Rogers introduced the orator of the day, Rev. A. S. Hudson. Following the oration a poem was read by a young lady, which was written for the occasion by James Sumner Draper, of Wayland. Short addresses followed by George A. Marden, of Lowell, the State Treasurer, who spoke for the United States and the Commonwealth of Massachusetts. Hon. William N. Davenport, of Marlboro'; James T. Joslin, of Hudson; Ex-Governor George S. Boutwell; Rev. Edward J. Young, formerly a professor at Harvard College, who spoke for the clergy of 1639; Rev. Brooke Herford, of Boston, who spoke for "Old England," and W. H. Baldwin, who spoke for Wayland. The day closed with a concert on the Common by the Maynard Brass Band, and fireworks in the evening.

BURYING-GROUNDS.—Sudbury has at present five cemeteries within its limits—one at South Sudbury, one at North Sudbury, and three at the centre. The oldest one is at the centre. It is situated in the northeasterly part of the village, along the Concord Road, east of the Methodist Church. In this old graveyard for more than a century and a half what was mortal of many of the west side inhabitants was laid. Here are the names of Haynes, Hunt, Parmenter, Goodenow, Browne, Moore, Howe, Bent, Rice, Richardson, Willis, Wheeler, Jones, Puffer, Hayden, Walker and a host of others long familiar in Sudbury. Unlike some other old graveyards, the stones here are numerous; but though many, they do not mark all the

graves, which nearly cover the entire space of that "thickly-peopled ground." The enclosure is encompassed by a substantial stone wall, which within a few years has been well repaired. The place has but little shrubbery and few trees. Just beyond the road was the pound, near by or on the site of which the hearse-house now stands. Within the past few years this yard has been but little used. Now and then the ground has been broken as the fragment of some ancient family has found its resting-place among a group of old graves; but these instances are fewer and farther between as time passes by, and it will probably soon cease to be used for new burials, but remain with unbroken turf until the morning of the resurrection. It is a place of sacred association, and as such has been regarded by the town's people; especially was it much visited by them during the intermission between the Sabbath services, when two sermons were preached in one day. Then they visited this quiet spot, read epitaphs, talked of the past, and derived, it may be, such lessons from the suggestive scenes as were a moral and spiritual help. Along the northerly side of the yard is the Sudbury and Concord highway; and ranged beside this are family tombs. One of these is that of Mr. John Goodnow, the donor of the Goodnow Library. Upon others are names of old Sudbury families. Within the yard is only one tomb and that is underground and about westerly of the Plympton monument, and surmounted with a small brick-work upon which lies a slate stone, with these words:

HOPESTILL BROWN, ESQ., TOMBE,
1731.

This tomb contains the remains of descendants of Dea. William Brown, an early grantee, who once resided near Nobscoot. The tomb was years ago nearly full, the last burial being about 1852. This burying-ground contains several marble monuments of some considerable size. The first one was erected in 1835, and is commemorative of the Plympton family.

Mount Wadsworth Cemetery.—This cemetery is at South Sudbury, and formerly belonged to the Israel Howe Browne estate. It was originally quite small, and has been enlarged several times. The entrance was formerly south of Dr. Levi Goodenough's house and joined his grounds, but it was changed about the time the Wadsworth monument was erected, and now leads from the avenue that goes to the monument.

The oldest graves are near the centre of the yard. Probably for the first few years after the lot was laid out burials were less numerous than a little later, as the associations connected with the more ancient church-yard in the east part of the town would naturally lead to its somewhat continued use by the west side inhabitants.

A few years ago there was a small growth of trees along the avenues and about more or less of the lots, but they were recently removed lest they should de-

face the stones. The arch at present over the east entrance to the cemetery was erected in 1879, by Mr. Israel H. Browne over the west entrance. It was completed July, 1879.

Soon after the death of Mr. Israel H. Browne, the former owner of the cemetery grounds, his heirs sold their interest in the property to five persons, who conveyed it to the present Mount Wadsworth Corporation soon after its organization.

In the northeasterly corner, as it was about 1850, was the original Wadsworth grave. Because of the former existence of that grave and the present Wadsworth monument, this cemetery is of more than ordinary importance, and will long be visited by those interested in the history of Captain Wadsworth and his men.

Mount Pleasant Cemetery.—The third cemetery laid out in Sudbury is at the Centre, and called Mount Pleasant. As its name suggests, it is pleasantly situated on a hill, and is just north of the Common. The original name was "Pine Hill," and later it took the name of "Pendleton Hill."

The New Cemetery.—Near Mount Pleasant is a new cemetery that is owned by the town. It was purchased a few years ago, and has an entrance on the south to the county road, near the tomb of John Goodnow.

North Sudbury Cemetery.—The North Sudbury Cemetery is situated upon a sunny knoll, and consists of one and six-tenths acres of land, formerly owned by Reuben Haynes, and purchased by a company for a cemetery in 1843. It is about one-eighth of a mile from North Sudbury Village, on the country road leading from Framingham to Concord.

The Wayside Inn.—On the Boston road through Sudbury is the old "Howe Tavern," or the famous "Wayside Inn" of Longfellow. It was built about the beginning of the eighteenth century by David Howe, who, in 1702, received of his father, Samuel Howe, a son of John, one of the early grantees, a tract of 130 acres in the "New Grant" territory. During the process of constructing the house, tradition says, the workmen resorted for safety at night to the Parmenter Garrison, a place about a half-mile away. The safety sought was probably from the raids of Indians, who, long after Philip's War closed, made occasional incursions upon the borders of the frontier towns. At or about the time of its erection it was opened as a public-house, and in 1846, Colonel Ezekiel Howe, of Revolutionary fame, put up the sign of the "Red Horse," which gave it the name that it went by for years, namely, the "Red Horse Tavern." In 1796, Colonel Ezekiel Howe died, and his son Adam took the place and kept the tavern for forty years. At the death of Adam it went into the hands of Lyman, who continued it as an inn until near 1866, about which time it passed out of the hands of an owner by the name of Howe. In the earlier times this house was of considerable consequence to travelers. It was quite capa-

cious for either the colonial or the provincial period, and was within about an easy day's journey to Massachusetts Bay. The road by it was a grand thoroughfare westward. Sudbury, in those years, was one of the foremost towns of Middlesex County in population, influence and wealth, while the Howe family took rank among the first families of the country about. The seclusion of this quiet spot to-day is not indicative of what it was in the days of the old stage period, and when places since made prominent by the passage of a railroad through them were almost wholly or quite unknown. In the times of the wars against the Indians and French it was a common halting-place for troops as they marched to the front or returned to their homes in the Bay towns. It was largely patronized by the up-country marketers, who, by their frequent coming and going, with their large, canvas-topped wagons, made the highway past this ordinary look like the outlet of a busy mart. Stages also enlivened the scene. The sound of the post-horn, as it announced the near approach of the coach, was the signal for the hostler and housemaid to prepare refreshment for man and beast. In short, few country taverns were better situated than this to gain patronage in the days when few towns of the province were better known than old Sudbury. This place, noted, capacious and thickly mantled with years, is thus fitly described by Mr. Longfellow,—

"As ancient is this hostelry
As any in the land may be,
Built in the old Colonial day,
When men lived in a grander way
With ampler hospitality;
A kind of old Hobgoblin Hall,
Now somewhat fallen to decay."

There is now about the place an aspect of vacancy, as if something mighty were gone, and very appropriate are still further words of the poet Longfellow:

"Round this old-fashioned, quaint abode
Deep silence reigned, save when a gust
Went rushing down the country road,
And skeletons of leaves and dust,
A moment quickened by its breath,
Shuddered, and danced their dance of death,
And, through the ancient oaks o'erhead,
Mysterious voices moaned and fled.
With weather-stains upon the wall,
And stairways worn, and crazy doors,
And creaking and uneven floors,
And chimneys huge and tiled and tall."

The region about this old ordinary corresponds to the building itself, reminding one of the Sleepy Hollow among the highlands of the Hudson described by Washington Irving. It is on the edge of the plain lands of the Peakham District, just at the foot of the northernmoat spur of Nobacot Hill. To the westward, a few rods, is the upper branch of Hop Brook, with its faint fringe of meadow lands, over which the county road gently curves. In the near neighborhood are patches of old forest growth, whose tall

trees tower upward like sentinels in the view of passers along the county road. Indeed, so aptly does Mr. Longfellow describe the place where the house is situated that we quote further from his beautiful verse:

"A region of repose it seems,
A place of slumber and of dreams,
Remote among the wooded hills!
For there no noisy railroad speeds
Its torch-race, scattering smoke and gleeds."

Along the highway to the eastward, in the direction of South Sudbury, which from this place is about two miles distant, are still standing several ancient oaks. These trees were, doubtless, standing and had considerable growth when lot number forty-eight was of the town's common land, and owned by Tantamous and others who signed the Indian deed in 1684, by which the new grant lands were conveyed. Beneath them Washington and his retinue passed, and perhaps Wadsworth and Brocklebank when they sped in haste to save Sudbury from Philip, and a long procession of travelers, since the opening of the way to Marlboro' from the Hop Brook mill, has passed under their venerable shade. Soldiers of Ticonderoga and Crown Point, and the various expeditions to the west and north in the Revolutionary and French and Indian Wars, have halted in their march as they approached this picket-line of ancient oaks that were deployed at the approach to the inn.

THE SUDBURY RIVER.—The Indian name of this stream was "Musketahquid," meaning grassy meadows or grassy brook. It was also called the "Great River." It takes its rise in Hopkinton and Westboro', the branch from the latter town having its source in a large cedar swamp. Passing through Framingham, it enters Sudbury on the southeast, and forms the boundary line between it and Wayland. After leaving the town, it runs through Concord and borders on Lincoln, Carlisle and Bedford, and empties into the Merrimack River at Lowell. It is made use of for mill purposes at Framingham and Billerica.

Within the present century iron ore dug in town was laden in boats at the Old Town Bridge and taken to Chelmsford.

The width of this river where it enters the town is about fifty feet; where it leaves the town it is about two hundred feet; at the latter place it is one hundred and fourteen feet above low water-mark at Boston. Its course is very crooked, seldom running far in one direction, but having many sharp curves. The banks are quite bare of shrubbery, except the occasional bunches of water brush that here and there assist in tracing its course. Fish abound in this river, of which the more useful and commonly sought are the pickerel (*Esox reticulatus*), perch (*Perca flavescens*), bream or sunfish (*Pomotis vulgaris*), horned (*Pime lotuscatus*), and common eel (*Anguilla tenuirostris*). The kind most sought for the sport in taking is the pickerel. Indeed, Sudbury River has become some-

what noted for the pastime it affords in pickerel fishing. Specimens weighing a half dozen pounds are sometimes caught.

There is an old tradition in connection with the river meadows given as follows by an old inhabitant:

"An old tinker used to go about the country with his *kit of tools*, mending brass and other wares, and was supposed to have accumulated some money, and, the saying was, *turned up missing*, and no one seemed to know what had become of him. Very soon afterwards persons passing near the meadows could distinctly hear the old tinker busy at his work tinkering, and the sound would follow along beside them in the evening, but would not pass beyond the meadows, and my grandmother used to tell many stories to the younger ones of the family how beves of young people would go down to the meadows to hear the old *tinker*—perhaps he would not be at work, and some one would say, 'I guess the old tinker isn't at work to-night,' and in an instant, very like, he would strike up, and then they would surround him—but no—he would strike up in another place and so forth and so on. Sometimes they would ask or suggest that he had got out of brass, and the sound would come as if he had thrown a whole apronful. This thing lasted for years, at last an old lady died near the meadows, and the sound followed along beside the funeral procession as long as it went beside the meadows, and this was the only instance of his working in the day-time, and no tinkering was heard afterward."

The horned pout may be caught almost at the rate of a peck in an evening, when the water and season are right. The fisherman simply ties his boat to a stake in a suitable place, perhaps some quiet, snug nook where the waters are still, and on a warm night in late spring or summer, between the mosquitoes and pouts his time will be fully occupied.

In early times the river abounded in fish now unknown in its waters. Of these were the alewives, salmon and shad. The obstructions caused by the dam at Billerica long ago prevented these valuable fishes from ascending the stream, and petitions were early presented to the General Court to have the obstruction removed on account of the fisheries. Shattuck informs us that at certain seasons fish officers of Concord went to the dam at Billerica to see that the sluiceways were properly opened to permit the fish to pass, and he states that the exclusive right to the fisheries was often sold by the town; the purchasing party having a right by his purchase to erect what is called a weir across the river to assist in fish-taking.

A chief characteristic of this river is its slow-moving current, which in places is scarcely perceptible at a casual glance. The slowness of the current is supposed to be occasioned by various causes, any one of which may, perhaps, be sufficient, but all of which at present doubtless contribute something to it. The chief reason is its very small fall, which may be occasioned by both natural and artificial causes.

John Gleason.

It is said to be but two inches to the mile for twenty-two miles. This slow current tends to keep the river from straightening its course, and to increase the water weeds that grow in the channel.

PHYSICIANS.—A prominent physician who lived in the original limits of Sudbury, and for years practiced in the town, was Dr. Ebenezer Roby. He lived on the east side of the river, and mention is made of him in the sketch of Wayland History.

Josiah Langdon, M.D.—Dr. Josiah Langdon was in Sudbury at the time of the Revolutionary War. He died in 1779, and was buried in the "Old Burying-Ground" at Sudbury Centre.

Moses Taft, M.D.—Dr. Moses Taft practiced medicine in Sudbury towards the close of the last century. He lived at the "Centre," in what has been known subsequently as the "Barker house," and where a grocery store was once kept. He was buried in the western part of the Old Burying-Ground.

Moses Mossman, M.D.—Dr. Moses Mossman was one of the old-time physicians of Sudbury. He practiced medicine there towards the close of the last and the early part of the present century. His professional work extended over quite a portion of the neighboring country, reaching to Stow, Acton, Concord and Marlboro'.

His home was in the northerly part of Sudbury, at the Mossman place, and it is said that, about the locality of his garden plot, the herbs still grow which the doctor used to cultivate. He was much beloved and respected as a citizen.

Thomas Stearns, M.D.—Dr. Thomas Stearns practiced medicine in Sudbury for some years previous to 1840, about which time he died. He lived at the Centre, in the second house west of the Unitarian meeting-house, on the north side of the road, and since used as a tavern. He was an active citizen of a positive nature, and energetic in the prosecution of his plans. He was interested in what pertained to the history of Sudbury, and gathered quite a collection of old documents, which, since his death, have been purchased by the town and are known as the "Stearns Collection." He was buried in Mount Pleasant Cemetery.

Levi Goodenough, M.D.—Dr. Levi Goodenough was born in Derby, Vt., Oct. 30, 1803. He received his diploma from the Medical School of the University of Vermont, Sept. 16, 1828, and settled in Sudbury Feb. 12, 1830, where he remained till his death. He was a typical country physician. As a citizen, Dr. Goodenough was public-spirited, a staunch advocate of reform, and in temperance his name stands among the pioneers. He was a professing Christian from early youth.

Ashbel Kidder, M.D.—Dr. Ashbel Kidder practiced medicine in Sudbury for about twenty-five years in the early part of the present century. He was born at Sutton in 1770, and studied medicine at Harvard College. He lived at Sudbury Centre in a house at

the corner of the roads, which was used for many years as a tavern and was burned near half a century ago.

Otis O. Johnson, M.D.—Dr. Otis O. Johnson practiced medicine in Sudbury for some years about the middle of the present century.

George A. Oviatt, M.D.—Dr. George A. Oviatt was born in Boston, March 30, 1849. He fitted for college at Hartford Latin School, and graduated at Yale in 1872. He received his medical diploma at the College of Physicians and Surgeons, New York, March, 1875. April of the same year he commenced the practice of medicine in Sudbury, where he still resides.

The following is a list of college graduates and professional men since 1800:

George H. Barton, Francis F. Brown, E. R. Cutler, Joseph Cutler, Charles F. Gerry, Adoniram J. Goodenough, George M. Howe, Alfred S. Hudson, Edward B. Hunt, Edwin Hunt, Otis E. Hunt, Sereno D. Hunt, Herbert S. Jones, Harriet M. Pratt, Luther Puffer, Homer Rogers, Henry Shaw, Joseph A. Shaw, Charles Thomson.

BIOGRAPHICAL.

JOHN GLEASON.

The subject of this sketch was a native of Ireland and was born March 2, 1833. His father was one of the celebrated Gleason family of Scotland, and his ancestors were among the leading politicians of their time, some of whom were members of Parliament. His early days were spent in his native land, where he acquired a good practical education. At the age of sixteen his parents moved to America and he accompanied them. He landed at Boston on the 17th of June, 1850, and one of the first sights that greeted his wondering eyes, upon his arrival in the "land of the free," was the enthusiastic celebration of the battle of Bunker Hill. His father settled in Boston and the boy went to learn the machinist's trade. He proved an apt scholar, and made good progress, but the confinement proving irksome, he started out in the spring of 1853 and found employment on the extensive market farm of Major Jonas Barker, of Carlisle, who finding the young man sober, industrious and fully trustworthy, soon gave him charge of his extensive business, which he conducted with great credit to himself and to the entire satisfaction of his employer.

As the years passed by, he became more and more identified with the place and came to be considered as a member of the family. Major Barker had but one child at home—a daughter, who had been a very successful teacher in the public schools, and what could be more natural than that these young persons should be attracted to each other. On April 11, 1858,

they were united in marriage, after which they resided for a short time in Framingham, but the major could not spare the strong arm upon which he had learned to lean in his advancing years, and, after a brief absence, at the earnest request of his bride's parents, the young people went back to Carlisle, where they lived until the death of Major and Mrs. Barker. An idea of the extent of the confidence which the major reposed in his son-in-law is found in the fact that he was one of the two executors of the will.

On November 23, 1872, Mr. Gleason removed with his wife to Sudbury, where he lived until his death, August 15, 1879. Conscientious in the discharge of his duties, strictly honest in his business dealings, of unimpeachable character and happy in his domestic surroundings, he lived respected by those with whom he came in contact and mourned by all who knew him.

CHARLES L. GOODNOW.

Mr. Goodnow is descended from a family which was prominent in the early settlement of Sudbury. Among the passengers who embarked from Southampton for New England April 24, 1638, in the "Confidence," John Jobson, master, were John Goodnow, of "Wilshier," husbandman, aged forty-two, with his wife Jane and children Lydia and Jane; Edmund Goodnow, of "Dunhead in Wilshire," husbandman, aged twenty-seven, with Ann, his wife, and two sons, John and Thoma; and Thomas Goodnow, of Shasbury, aged thirty, with Jane, his wife and two children, Thomas and Ursula. John, Edmund and Thomas Goodnow were evidently three brothers seeking their fortunes in the new world. John was made a freeman June 2, 1641, and in 1644 was one of the selectmen of Sudbury. He died March 28, 1654. Edmund was made a freeman May 13, 1640, and occupied the house in Sudbury known by tradition as the Goodnow garrison. He was a representative in the Colonial General Court, a captain in the militia and a regularly appointed surveyor to lay out granted lands. He died April 6, 1688. Thomas Goodnow, the third brother, was made a freeman in 1643, and afterwards removed from Sudbury to Marlboro' Plantation, where he had grants of land. In 1661-62 and 1664 he was one of the selectmen of Marlboro. He was married twice, and by his first wife, Jane, he had seven children, two of whom, Thomas and Mary, were born in Sudbury. The daughter Mary was killed and scalped by the Indians. Samuel, another child, occupied a house in Marlboro', which during the Indian trouble was made a garrison.

The great-grandfather of Charles L. Goodnow, the subject of this sketch, lived in Sudbury, and had a son Nahum, a farmer, who married Ruth Brown. The children of Nahum were Nahum, Susanna, Jonas, Martin, Joseph Warren, Eliot, Joanna and Jesse. Of these children Nahum married his cousin Betsey,

daughter of John and Persis Goodnow, and was the father of the subject of this sketch.

Charles L. Goodnow was born in Sudbury, Mass., and was educated in the public schools of the town. At the age of eighteen he went to Boston, and not long after associated himself with the late Charles Slack in the produce business, which he pursued twenty-five years and will be remembered by many readers as one of the prominent occupants of the Boylston Market. He remained in Boston seven or eight years after his retirement from business and then returned to Sudbury, where, during the last few years, he has lived. He was the owner of a large farm about a mile from the South Sudbury Railroad Station, on the road to Framingham, seventy acres of which were under his own management or that of his lessees, and the remainder under that of his son, Charles Frederick Goodnow, who carries on an extensive business in raising vegetables and flowers for the Boston market.

Mr. Goodnow married, first, Ruth Lapham, who was the mother of the son above-mentioned, and subsequently Harriet Brigham, of Boston, who has no children. At the present time the home farm is carried on by Mr. Cutting, a lessee with whom Mr. Goodnow made his home. With abundant means belated a retired life, somewhat feeble in health, though far from advanced in years.

In religion, though born in an orthodox family, Mr. Goodnow was a Universalist. In politics, brought up in the Whig faith, he was a Republican and actively interested in the welfare of his party. He held no office and neither sought nor consented to hold one, with its duties and responsibilities far outweighing in his opinion its profits and honors. Mr. Goodnow died August 8, 1890.

The family of Mr. Goodnow has always maintained its prominence in the town where it early found a permanent home. The Goodnow Library in South Sudbury was established in 1862 under a bequest made by John Goodnow, a brother of the mother of the subject of this sketch, who was born in Sudbury September 6, 1791, and who died in Boston December 24, 1861. At a later date George Goodnow, a brother of John, bequeathed, by his will, the sum of ten thousand dollars for the benefit of the poor of his native town. John B. Goodnow, a brother of Charles L. Goodnow, and Martin Goodnow, an uncle, are living in South Sudbury in substantial comfort,—the latter over eighty years of age,—and both enjoying the confidence and respect of the community of which they are members. Others bearing the name are scattered through the town and all are worthy descendants of the early settlers of 1639.

HON. HOMER ROGERS.

Homer Rogers, son of Walter and Emily Rogers, was born at South Sudbury October 11, 1840.

Homer Rogers.

C L Goodnow

He studied at Wadsworth Academy, entered Williams College in 1858, and graduated in 1862. Soon after leaving college he enlisted in Co. F, Forty-fifth Regiment M. V. M. At the expiration of his term of service he taught school one year in Douse Academy, Sherborn, and from 1864-66 in the Natick High School, since which time he has been engaged in business. Jan. 15, 1868, he married Ellen E. Perry, of South Natick, and had seven children. Mr. Rogers is a successful business man and has for years been connected with the firm of S. B. Rogers & Co., manufacturers of leather board. He is the president of the Allston Co-operative Bank in Allston, Mass., which he was instrumental in organizing, and is a director of the National Market Bank, of Brighton. In 1888 he was elected alderman of the Eleventh District of Boston and re-elected the following year, at which time he was chosen chairman of the board. He was largely instrumental in the formation of the Congregational Church of Allston, where he now resides.

CHAPTER XXXVII.

WAYLAND.

BY ALFRED SERENO HUDSON.

WAYLAND was formerly a part of Sudbury. It was set apart as a town in 1780, under the name of East Sudbury, and took its present name in 1835. It is situated on the Massachusetts Central Railroad, about fifteen miles from Boston, and lies mostly on the east side of Sudbury River. It is bounded on the north by Lincoln, east by Weston, south by Natick and west by Sudbury. It has two villages—Wayland Centre and Cochituate.

The town is pleasantly situated, and its rural quiet, beautiful drives and varied scenery render it peculiarly attractive as a summer residence. Here the settlers of Sudbury first located, and nearly two-thirds of the land first granted them by the General Court for the township of Sudbury was within the territory now Wayland. As the acts relative to the obtaining of the land have been given in connection with the history of Sudbury in another part of this work, it is only necessary to say that on petition of those proposing the settlement, the Court allowed them a grant of land, which was purchased of the aboriginal owners, and for which a deed was given in due form. Besides the large tract of land granted the settlers collectively, there were several smaller tracts allowed to individuals. This is true of some of the land about Cochituate Pond, which was a part of the tract granted the widow of Rev. Josse Glover. Another grant was that of the "Dunster Farm," sometimes called the "Pond Farm." This was a tract of 600 acres granted, in 1640, to Henry Dunster, the first president of Har-

vard College, who, in 1641, married Mrs. Elizabeth Glover. This land was situated southeast of the "Glover Farm," and had Cochituate Lake for its western boundary. Beyond this farm, easterly, was a tract of 200 acres extending towards the Weston town bound, and called the "Jennison Farm." This was granted, in 1638, to Capt. William Jennison, of Watertown, for service that he rendered in the Pequot War. It was laid out in 1646.

Another grant was to Mr. Herbert Pelham, Sept. 4, 1639. This land grant was situated in the present territory of Wayland, and was what is called "The Island." For many years it was mostly owned and occupied by the Heards. Mr. Pelham came to America in 1638, and for a time lived at Cambridge. Savage states that he was a gentleman from the county of Lincoln, and when in London, where he may have been a lawyer, was a friend of the colony.

The Indian owner of all these land tracts was Karto, *alias* Goodman, whose wigwam was at Goodman's Hill, about a mile west of Sudbury River. The territory was especially attractive to the settlers because of the broad meadow lands along the river. These in early times afforded bountiful crops of hay, which were so serviceable to the possessors that "they took in cattle for wintering." The uplands were more or less covered with heavy timber growth. "Pine Plain" and "Pine Brook," early names of localities east of Wayland Centre, probably derived their names from the heavy growth of pine forest about there; and "Timber Neck," just south of Mill Brook, is suggestive of what the soil there produced.

Notwithstanding these large forest tracts, however, the people were careful to guard against wastefulness in their woodland, and enacted laws relating to it, among which are the following: 1646. "Ordered, that no oak timber shall be fallen without leave from those that are appointed by the town to give leave to fell timber, that shall hew above eighteen inches at the butt end." Also, "That no man that hath timber of his own to supply his want, shall have any timber granted upon the Common." In 1647, "it was ordered that the people should have timber for that year to supply their wants, for every two shillings that they paid the ministry, one tree."

At the time of English occupation the Indian population was scant; there are, however, indications that at some time considerable numbers dwelt in the neighborhood of Cochituate Pond.

Tradition locates an Indian burial-place near the old graveyard westerly of the centre of the town. Probably the pestilence that occurred among the Massachusetts Bay tribes, in the early part of the seventeenth century, largely depopulated the country. A noted Indian trail, at the time of English occupation, passed through the southeasterly part of the territory. This was part of an ancient way to Connecticut. It passed from Watertown at what is now known as Wayland and Weston Corner, and passed into

what was then the wilderness land near Framingham on the north side of Cochituate Pond. The strip now in Wayland was called "the road from Watertown to the Dunster Farm." The town's early grantees were Englishmen. Some of them came to the place of settlement directly from England, and some after a brief sojourn at Watertown, which was then the town next adjacent on the east. These settlers probably arrived at the place of their future home by the fall of 1638. Some of those whose names appear upon the "records" at a very early date, and whose descendants long lived there, are Noyes, Griffin, Johnson, Ward, Parmenter, Rice, Curtis, Stone, Rutter, Loker, Bent, Maynard, Grout, King and Woodward.

The first dwellings were erected along three roads, which afterwards became the common highway. The principal one of these roads, called "the North" or "East Street," and also the "Old Watertown Trail," started at what is now "Weston and Wayland Corner," and probably followed the course of the present road over "The Plain" and Clay-pit Hill to a point near the Abel Gleason estate; from this place it is supposed to have made its way a little northerly of Mr. Gleason's house, and winding southwesterly, passed just south of Baldwin's Pond, and thence to the river at the bridge. The road originally called "Northwest Row," ran from this street to what is still called "Common Swamp," and by the spot designated as the house-lot of Walter Haynes. This spot still bears the traces of having, long years ago, been the site of a house. The cart-path which ran from it to the meadow is still used.

Along this road traces and traditions of homesteads are unmistakable; old building material has been unearthed, and depressions in the ground are still to be seen. Mr. Draper, a little east of his house, by the brook, unearthed the stones of a fire-place, with fragments of coals still upon them. Between this and Clay-pit Bridge (the second bridge or culvert from the mill-pond, or the first above "Whale's Bridge") there are, north of the road, several depressions indicating the sites of old houses. Just beyond Clay-pit Bridge the writer, with Mr. Draper, went to look for traces of houses on the lots assigned to Bryan Pendleton and Thomas Noyes; and there, in the exact locality, were distinct depressions, just where they were looked for. The Curtis homestead, until within a very few years, was standing in about the place assigned for the house-lot. Thus strong is the probability that the lots on this street were largely built upon.

Another of the principal streets was that which, starting from a point on the North Street near the town bridge, ran easterly along what is now the common highway, to the head of the mill-pond, and then to the mill. Upon this street was the first meeting-house, at a spot in the old burying-ground, and the Parmenter Tavern. The house-lots were mainly at the west end of this street, and the road was probably extended northeasterly to give access to the mill.

Here, again, tradition confirms the record of house-lots, and shows that the lots were more or less built upon. The John Maynard and John Loker estates were kept for years in their families, and the Parmenter estate is still retained in the family. In later years the descendants of John Rutter built on that street.

The third road was called the "Bridle Point Road." This started near the Parmenter Tavern, crossed the knoll at the Harry Reeves place, and ran along the ridge of "Braman's Hill" for about two-thirds of its length, when it turned southerly, and, crossing Mill Brook, ran towards the town's southern limits. While tradition positively locates this road, it points to but one homestead upon it, and that the residence of Rev. Edmund Brown, which it undoubtedly declares was at the spot designated by the house-lot data. Along this street are no visible marks of ancient dwelling-places north of Mill Brook; but beyond, various depressions in the ground, and remnants of building material, indicate that at one time this street had houses upon it. With the exception of those on the south street, the dwellings were about equally distant from the meeting-house, and all within easy access to the River Meadows and the mill. Probably they settled largely in groups, that they might more easily defend themselves in case of danger. They were in a new country, and as yet had had little experience with the Indians; hence we should not expect they would scatter very widely. In the early times so essential was it considered by the Colonial Court that the people should not widely scatter, that, three years before Sudbury was settled, it ordered that, for the greater safety of towns, "hereafter no dwelling-house should be built above half a mile from the meeting-house in any new plantation." (Colony Records, Vol. I.)

It will be noticed that the positions selected for these streets were, to an extent, where the shelter of upland could be obtained for the house. The sandy slope of Bridle Point Hill would afford a protection from the rough winds of winter; so of the uplands just north of South Street. It was also best to settle in groups, to lessen the amount of road-breaking in winter. It will, moreover, be noticed that these groups of house-lots were near, not only meadow land, but light upland, which would be easy of cultivation. Various things indicate that the most serviceable spots were selected for homesteads, that roads were constructed to connect them as best they could, and that afterwards the roads were extended to the mill. Probably the people on North Street made the short way to South Street, that now comes out at Mr. Jude Damon's, in order to shorten the way to church. Those midway of that street, for a short cut to the mill, the church and the tavern, would naturally open a path from the turn of the road by the clay-pits to the mill. To accommodate the people on "The Plain," a road was opened to the mill in a southwest-

erly course, which is in part the present highway, but has in part been abandoned—the latter part being that which formerly came out directly east of the mill.

These several sections of road probably formed what was called the "Highway." A large share of it is in use at the present time, and is very suggestive of historic reminiscences. By it the settlers went to the Cakebread Mill, to the little hillside meeting-house, and to the John Parmenter ordinary. By these ways came the messenger with fresh news from the seaboard settlements, or with tidings from the tribes of the woods. In short, these formed the one great road of the settlement, the one forest pathway along which every one more or less trod.

The erection of dwelling-places along these first streets probably began in 1638; but we have no tradition or record of the week or month when the inhabitants arrived at the spot, nor as to how many went at any one time. They may have gone in small companies at different dates; and the entire removal from Watertown may have occurred in the process of months. It is quite probable, however, that they went mainly together, or in considerable companies, for both the sake of convenience and safety; and that they were largely there by the autumn of 1638.

We have found no record of the dimensions of any of the first dwelling-places, but we may judge something of their size by that of the first house of worship, and by the specifications in a lease of a house to be built by Edmund Rice prior to the year 1655. This house was to be very small—"30 foot long, 10 foot high, 1 foot sill from the ground, 16 foot wide, with two rooms, both below or one above the other, all the doors, walls and staires with convenient fixtures, and well planked under foot and boored sufficiently to lay corn in the story above head." But it is doubtful if this small, low structure fitly represents the settler's first forest home; very likely that was a still more simple building, that would serve as a mere shelter for a few months or years, till a more serviceable one could be built.

Very early after their arrival, the people began to provide means for more easy and rapid transit. Indian trails and the paths of wild animals would not long suffice for their practical needs. Hay was to be drawn from the meadows, and for this a road must be made. Another was to be made to Concord, and paths were to be opened to the outlying lands. The first highway-work was done on the principal street, which was, doubtless, at first a mere wood-path or trail. An early rule for this labor, as it is recorded on the town records, February 20, 1639, is as follows: "Ordered by the commissioners of the town, that every inhabitant shall come forth to the mending of the highway upon a summons by the surveyors." In case of failure, five shillings were to be forfeited for every default. The amount of labor required was as follows:

"1st. The poorest man ehall work one day.

"2nd. For every six acres of meadow laud a man bath he shall work one day.

"3d. Every man who ehall neglect to make all feoces appertaining to his fields by the 24th of April shall forfeit five ehillings (Nov. 19th, 1639)."

An important road, laid out in 1648, was that from Watertown to the Dunster Farm, or, the "Old Connecticut path." The records state: "Edmund Rice and Edm^d Goodenow, John Bent and John Grout are appointed to lay out a way from Watertown bound to the Dunster Farm."

Another important road laid out in the first decade was that which went to Concord. In 1648, "Edmund Goodenowe is desired to treat with Concord men, and to agree with them about the laying out of the way between Concord and Sudbury." The term "laying out," as it was employed at that period, might not always imply the opening of a new path, but, perhaps, the acceptance or formal recognition of an old one, which hitherto had been only a bridle-way, or mere forest foot-trail, that had been used as the most available track to a town, hamlet or homestead.

Bridge-building was early attended to, and a contract was made with Ambrose Leech, and another with Timothy Hawkins, of Watertown, for structures to span the river at the site of the present stone bridge by the William Baldwin estate.

A grist-mill was erected by Thomas Cakebread in the spring of 1639. The following is the record concerning it:

"Granted to Thomas Cakebread, for and in consideration of building a mill, 40 a. of upland or thereabout now adjoining to the mill, and a little piece of meadow downwards, and a piece of meadow upwards, and which may be 16 or 20 a. or thereabout. Also, there is given for his accommodation for his estate 30 a. of meadow and 40 a. of upland."

Mr. Cakebread did not long live to make use of his mill. His widow married Sergeant John Grout, who took charge of the property. "In 1643 the Cranberry swamp, formerly granted to Antient Ensign Cakebread, was confirmed to John Grout, and there was granted to Sargent John Grout a swamp lying by the house of Philemon Whale, to pen water for the use of the mill, and of preparing it to remain for the use of the town."

Probably the house of Philemon Whale was not far from the present Concord Road, near Wayland Centre, and possibly stood on the old cellar-hole at the right of the road, north of the Dana Parmenter house. The bridge at the head of the mill-pond long bore the name of Whale's Bridge. This mill stood on the spot where the present grist-mill stands, and which has been known as Reeves', Grout's and, more recently, Wight's Mill. Some of the original timber of the Cakebread Mill is supposed to be in the present structure. The stream by which it is run is now small, but in early times it was probably somewhat larger. The dimensions of the mill are larger than formerly, it having been lengthened toward the west.

In 1640 a church was organized, which was Congregational in government and Calvinistic in creed. A

copy of its covenant is still preserved. The church called to its parsonate the Rev. Edmund Brown, and elected Mr. William Brown deacon. It is supposed that the installation of Rev. Mr. Brown was at the time of the formation of the church. The parsonage was by the south bank of Mill Brook, on what was called "Timber Neck." The house was called in the will of Mr. Brown "Brunswick," which means "maison by the stream," and stood near the junction of Mill Brook with the river, a little southeast of Farm Bridge, and nearly opposite the Richard Heard place. Nothing now visible marks the spot, but both record and undisputed tradition give its whereabouts. The salary of Mr. Brown the first year was to be £40, one half to be paid in money, the other half in some or all of these commodities, viz., "wheate, pees, butter, cheese, porke, beefe, hemp and flax at every quarter's end."

Shortly after the formation of the church and the settlement of a pastor a meeting-house was built. The spot selected was at what is now the "Old Burying-ground." The building stood in its westerly part, and the site is marked by a slight embankment and a row of evergreen trees set by Mr. J. S. Draper. The house was built by John Rutter, and the contract was as follows:

"FEBRUARY 7th, 1642.

"It is agreed between the townsmen of this town on the one part, and John Rutter on the other part, that the said John Rutter for his part shall fell, saw, hew and frame a house for a meeting-house, thirty foot long, twenty foot wide, eight foot between joint, three foot between sude, two cross dormants in the house, six clear story windows, two with four lights apiece, and four with three lights apiece, and to ententise between the stude, which frame is to be made ready to raise the first week in May next.

JOHN RUTTER."

"And the town for their part do covenant to draw all the timber to place, and to help to raise the house being framed, and also to pay to the said John Rutter for the said work six pounds; that is to say, three pound to be paid in corn at three shillings a bushel, or in money, in and upon this twenty seventh day of this present month, and the other three pounds to be paid in money, corn and cattle to be prized by two men of the town, one to be chosen by the town and the other to be chosen by John Rutter, and to be paid at the time that the frame is by the said John Rutter finished.

"PETER NOISE,
"BRIAN PENDLETON,
"WILLIAM WADD,
"WALTER HAYNES,
"JOHN HOW,
"THOMAS WHITE."

("Town Book," p. 27.)

An act relative to the raising and locating of the building is the following, dated May, 1643: The town "agreed that the meeting-house shall stand upon the hillside, before the house-lot of John Loker, on the other side of the way; also, that every inhabitant that hath a house-lot shall attend [the raising of] the new meeting-house, or send a sufficient man to help raise the meeting-house." The year after the contract was made a rate was ordered for the finishing of the house, to be raised on "meadow and upland and all manner of cattle above a quarter old, to be prized as they were formerly—Shoates at 6 shillings 8 pence apiece, kids at 4 shillings apiece."

A further record of the meeting-house is as follows:

"Nov. 5th, 1645.

"It is ordered that all those who are appointed to have seats in the meeting-house that they shall bring in their first payment for their seats to Hugh Griffin, or agree with him between this and the 14th day of this month, which is on Friday next week, and those that are (deficient) we do hereby give power to the Marshall to distrain both for their payment for their seats and also for the Marshall's own labor according to a former order twelve pence.

"WALTER HAYNE,
"EDMUND GOODNOW,
"WILLIAM WARDE,
"JOHN REDDICKE,
"HUGH GAIFFIN."

Considerable importance was attached in the early times to the seating of people in the meeting-house, and in the records of new houses of worship mention is made of this matter. Respect was had to social condition and circumstance; committees were chosen to adjust these matters in the payment of rates, and references are made in the records of town-meeting to the requests of parties about their seats in the meeting-house. A rule that was general was that the men should sit at one end of the pew and the women at the other. In the third meeting-house erected in Sudbury it was a part of the plan that the pews should be so arranged as to seat seven men on one side and seven women on the other. In this first meeting-house of Sudbury the people purchasing seats had a right to dispose of their purchase, in case they should leave the settlement; but the right was reserved by the town of seating the parties who purchased, as is declared by the following record, January 26, 1645; It was "ordered that all those that pay for seats in the meeting-house shall have leave to sell as many seats as they pay for, provided they leave the seating of the persons to whom they sell to the church officers, to seat them if they themselves go out of town." About this first meeting-house a burial-place was soon started.

In meeting public expense, rates were made on the meadow lauds, or in proportion as the people were possessed of them. These meadows were early divided among them, three apportionments having been made by 1640.

This division of meadow land was an important transaction. It was not only a disposal of common property of the proprietors, but it established a standard of rates, and in a certain sense of valuation. For example, money to pay for land purchased of Karte was to "be gathered according to such quantity of meadow as are granted to the inhabitants of the town." In the division of "uplands," the rule of receiving was according as a person was possessed of "meadow." In the pasturage of the extensive cow common, the people were to be limited in the number of cattle put in by their meadows, or their rates as based upon them.

In the erection of the meeting-house and pay of the minister, reference was had to rates paid on the

meadows. Perhaps the meadows thus assigned might properly be termed meadow-rights. As in some places the "acre-right" would procure lands or privileges in proportion to the part paid into the common venture by the proprietor, so in Sudbury the meadow-right might do likewise; and a person who possessed an original meadow-right might possess a right to subsequent land allotments, or the right of his cattle to commonage, so long as the town had undivided territory. Thus it might be said that the proprietors received values on their investment in the enterprise, not by monied divisions, but by land divisions. Hence, these divisions of land might be called the dividends of those early days, and the money raised by the town on the basis of these early divisions of meadow might be called assessments on the stock made to meet public expenses. We conclude that these meadow-rights or dividends were merchantable, to the extent that a person in selling them might or might not convey the right that belonged to them, as related to commonage and other allotments. The lands that were given by gratulation, for worthiness or work done for the public, might or might not have the privileges of an original meadow-right or dividend. In raising money to pay Karto for the land which the town last bought of him, it was ordered that "all meadow was to pay at one price, and that all meadow given by way of gratulation should have right of commonage."

That the original grantees, and those subsequently given the privilege of such, as a "gratulation" for services performed for the settlers, could transfer the right to subsequent divisions of the common and undivided land, is indicated by the records of the proceedings of the proprietors of these lands many years after the settlement of Sudbury. In the Proprietors' Book of Records, as will be noticed further along, are given repeated lists of the names of the early grantees, even after the most, if not all of them, had passed away. These lists are referred to as those possessing an original right to the town's undivided land, and may indicate that wherever or whenever one possessed that right as it had been conveyed through the years, in whatever way, that person could claim land when a division was made, or could vote on the disposal of the proprietors' undivided territory.

An early rule for the apportionment of meadow is the following:

"It was ordered and agreed that the meadows of the town of Sudbury shall be laid out and given to the present inhabitants as much as shall be thought meet, according to this rule following:

Imprimis,—

To every Mr. of a familie	6 akers
To every wife	6½ akers
To every child	1½ akers
To every mare, cow, ox, or any other cattle that may amount to 20£, or so much money	3 akers "

We conjecture that the meadow lands allotted by this rule were for encouragement, and to give the inhabitants at the outset a means of maintenance for

their flocks; and that other rules were made use of when the division became the basis of assessments of rates, as bestowal of meadow dividends.

A record of the divisions is presented in the town books, and the following is the preamble to one of them:

"A record of the names of the Inhabitants of Sudbury, with their several quantity of meadow to every one granted, according to their estates, or granted by gratulation for services granted by them, which meadow is ratable upon all common charges."

While land divisions were being made, reservations were also made of lands for pasturage, which it was understood were to remain undivided. These lands were called "Cow Commons," and the record of them explains their use. The first was laid out or set apart the 26th of November, 1643. The record concerning the location is as follows:

"It is concluded by the town that all the lands southward that lie from the southeast corner of the house-lot of Robert Darrell, unto the common cartbridge going to Edmund Goodow's meadow, and so upon a strait line to Watertown bound, which lands so granted, for a cow common, shall never be reserved or laid down without the consent of every Inhabitant that hath right in commonage. All the lands we say that are contained within these terms, that is between the houselot of Robert Darrell and the cartbridge before specified, southward within the five miles bound first granted, down to the great river, and bounded on the side which the extremity of our line bounding Watertown and Sudbury, all our land contained within these terms, except all such land as have been granted out in particular; that is to say, a neck of upland lying between Mill brook and Pine brook; also another neck of land, with the flat belonging to it, lying between the aforesaid neck and the great river on the other side; also another plat of land that lyeth westward from them, containing some 3 or 4 score acres, and granted out to particular men.

"The Inhabitants of the town are to be limited and sized, in the putting in of cattle upon the said common in proportion, according to the quantity of meadow the said Inhabitants are staid in upon the division of the meadow, or shall be incited in by purchase hereafter provided they buy with the meadow the liberty of commonage allotted to such a quantity of meadow as shall be purchased."

It is somewhat difficult to define the bounds of this cow common exactly from the description given in the records, but the following may be considered its general outline: From Weston bound direct to Wayland Centre, thence west of south to the river, and thence again direct to Weston bound.

The following are some of the early laws enacted by the town:

LAWS RELATING TO DOMESTIC ANIMALS.—In 1641 it was ordered that "every one that keeps any hogs more than his own within one fortnight after this day shall rid them out of this town only that for every hog that shall be taken in to be kept by any won more than his own for every week shall pay five shillings." In 1643 it was ordered "that every inhabitant should drive out his hog every morning into the wood, and when they come home at night to see them shut up safe, or else, if they be about the street, to ring and yoke them." In 1648 it was voted in town-meeting, "that every swine that shall be found of any man out of his own property, without a sufficient yoke and ring, after the first of March next, the owner thereof shall forfeit for every swine so taken one shilling, and if the swine be yoked and not ringed,

or ringed and not yoked, then six pence for any swine so taken, beside all the damage done by any such swine." It was also "agreed that all yokes should be under the throat of the swine, and so long as the swine was high and a rope go up on each side to be fastened above, and that swine should not be accounted sufficiently ringed if they could root."

In 1643 it was "ordered by the freemen of the town that all the cattle within this town shall this summer not be turned abroad without a keeper, and the keeper shall not keep any of the herd in any of the great river meadows, from Bridle Point downwards towards Concord, the intent of the order to preserve the river meadows." In 1655 it was ordered that "all young, new-weaned calves shall be herded all the summer time."

It was ordered that "every goat that is taken in any man's garden, orchard or green corn shall be impounded, and the owner shall pay for any such goat so taken 3 pence."

In 1754 it was voted "that a fine of two shillings be laid upon the owner of any dog or dogs that should cause and make any disturbance at either of the meeting-houses on the Lord's day, or Sabbath day, one-half of the fine was to go to complainant and the other half to the use of the town."

LAWS CONCERNING AMMUNITION AND FIRE-ARMS.—In 1653, "The town appointed Edmund Goodnow and Hugh Griffin to divide the shot and overplus of bullets to the inhabitants, what was wanting in shot to make up out of the overplus of bullets, and the shot and bullets to be divided to each man his due by proportion according to what every man paid so near as they can."

In 1669, "Edmund Goodnow, John Parmenter, Jr., and John Stone were to see to the barrel of powder, to the trial of it, to the heading it up again, and to take some course for the safe bestowing of it."

The same year the selectmen not only ordered for the providing of a barrel of powder, but a hundred pounds and a half of musket bullets, and a quarter of a hundred of matches. When the third meeting-house was built, it was ordered that there should be in it "a convenient place for the storing of the ammunition of the town over the window in the southwest gable." About that time the town's stock of ammunition was divided and intrusted to persons who would "engage to respond for the same" in case that it was "not spent in real service in the resistance of the enemy."

The Colonial Court at an early date ordered that "the town's men in every town shall order that every house, or some two or more houses ioyned together for the breeding of salt peeter in some out house used for poultry or the like." The duty of looking after this matter for Sudbury was assigned to Ensign Cakebread. The saltpetre thus obtained was for the manufacture of gunpowder. In 1645 Sudbury was "freed from y^e taking further care about salt peeter houses : : in answer to their petition."

In 1642 the Court made more stringent the laws previously existing against selling fire-arms to the Indians, exacting a forfeiture of £10 for the sale to them of a gun, and £5 for a pound of powder.

In 1643 the Court ordered "that the military officers in every town shall appoint what arms shall be brought to the meeting-house on the Lord's days, and other times of meeting, and to take orders at farms and houses remote that ammunition be safely disposed of that an enemy may not possess himself of them."

COMMON PLANTING-FIELDS.—In the town's earlier years it was the practice to plant fields in common; and repeatedly in the records are these common fields referred to. These planting-places were situated in different parts of the town: between the old North and South Street in the neighborhood of the Gleasons, also between Mill Brook and Pine Brook along "the Plain" in the vicinity of the Drapers, and toward the south bound of the town, near the new bridge.

FENCE-VIEWERS AND FENCES.—A good degree of attention was early bestowed by the town on its fences. Several surveyors were appointed each year to look after them; and although the office of "fence-viewer" has now gone into disuse, it was once one of considerable responsibility. As early as 1655, "Surveyors were appointed to judge of the sufficiency of the fences about men's particular properties in cases of damage and difference." We read in the records that John Maynard and John Blanford were, a certain year, to attend to the fences "of the field and the cornfield on the other side of the way from the pond to the training place." "Edmund Rice and Thomas Goodenow for all the fences of cornfields from new bridge southward within the town bound."

In 1666 the records state that "Persons were appointed surveyors for this year over the fields where Henry Loker dwells, and the field fences, where Solomon Johnson dwelleth." Field fences are mentioned as being on the south side of Pine Brook, also as being between Mill Brook and Pine Brook; also, "upon the hill from the little pond by the dwelling-house of John Blanford unto Mill brook." Several kinds of fences were used. One kind was made by ditching. It was ordered, in 1671, "That all the great river meadows shall be fenced, that is to say that all the proprietors of the great river meadows shall fence the heads or both ends of the meadows, and where it may be necessary, to have a ditch made from the upland to the river at the charge of the squadron that shall lie on both sides of the said ditch according to their benefit." For the upland, also, this mode of fencing was sometimes used. By the roadside, about half-way between Wayland Centre and the Plain, are distinct traces of one of these ancient fences.

Hedges were sometimes made use of. Mention is made of fences that were to be made up "of good rails

well set three feet and one-half high or otherwise good hedge well staked or such fences as would be an equivalent the fences to be attended to by April 1st if the frost give leave if not then ten days after." After a certain date all the field fences were to be closed, as is indicated by the following: "It is ordered, that all the fences that are in general fields, in this town of Sudbury, shall be shut up by the 10th May or else to forfeit for every rod unfenced five shillings."

STAPLE CROPS.—Some of the staple crops were Indian corn,—sometimes called by the one word "Indian,"—rye, barley, wheat, peas and oats. Hemp and flax were also raised.

Hay was early a great staple article; this, as we have noticed, the river meadows bountifully produced. To such an extent did this crop abound, that the settlers not only kept their own stock, but they received cattle from abroad.

The time for cutting the meadow grass is indicated by such statements as these. When Sergeant John Rutter hired the Ashen swamp meadow, "he was to cut the grass by the 10th of July, or else it shall be lawful for any other man to cut the said meadow." He was to pay for it that year four shillings and six pence. Such prices as the following are also mentioned: two bushels of wheat and one bushel of Indian corn for Long Meadow. Strawberry Meadow was let out the same year, 1667, for one bushel of wheat; also the minister's meadow in Sedge Meadow was let out for eight shillings to be paid in Indian corn; Ashen Swamp Meadow was let out the same year to Ensign John Grout for three shillings, to be paid one-half in wheat, the other in Indian corn. The meadow on the southeast side of the town was let out to Henry Rice for a peck of wheat. These, we think, were probably common meadows of the town, and let out from year to year.

Measures were taken from time to time for improving the meadow lands. In 1645 a commission was granted by the colonial authorities (Colony Records, Vol. II., p. 99) "for y^e btt^r & impvng of y^e medowe ground vpon y^e ryver running by Concord & Sudberry." Later, also in 1671, a levy of four pence an acre was to be made "upon all the meadow upon the great river for the clearing of the river; that is, from Concord line to the south side, and to Ensign Grout's spring."

CLIMATE.—The following records will serve to indicate the character of the climate at that period compared with the present. It was at one time ordered by the town that the fences should be set by the 1st or the 10th of April. In 1642 "it was ordered that no cattle were to be found on the planting fields and all the fences were to be up by March 1st."

CARE OF THE POOR.—In 1649 it was ordered that certain persons "have power to speak with Mrs. Hunt about her person, house [or home] and estate, and to take some care for her relief." The following vote was recorded years afterwards: that "Mrs. Hunt

shall have fifty shillings, out of a rate to be made this present February, 1665, this in respect of her poverty." In 1669 [or '67] Mrs. Hunt was to have fifty shillings pension paid out of the town rate. In 1673, "because of the poverty of her family, it was ordered that Mr. Peter Noyes do procure and bring serjeon Avery from Dedham to the Widow Hunt, of this town, to inspect her condition, to advise, and direct, and administer to her relief, and cure of her distemper." Ten pounds were also to be put "into the hands of Peter Noyes with all speed to assist Mrs. Hunt with."

About 1663 a contract was made with Thomas Rice to keep a person a year, "if he live as long," for which he was to have five pounds sterling; and if the person kept had any, or much sickness during the year, the town was to give Mr. Rice "satisfaction to content, for any physic, attendance or trouble." In 1663, £7 were added to the present rate, "for the use of Thomas Tfling's sickness, and to pay for intendance of him." In 1664 John White was "exempted from paying his present rate to the town, and also unto the minister." Dr. Loring, in his diary, gives repeated instances of collections taken for the afflicted in the time of his ministry; as, for example, in 1750: "Lord's day, had a contribution for Thomas Saunders, laboring under a severe and incurable cancer; collected £16-8-0." In 1757 or '59, "had a contribution for our brother, Tristram Cheeney. £31 was gathered." About 1762, October 7th, public Thanksgiving: "A contribution was made for the wife of Asahel Knight, of Worcester. £18 was collected."

But, while the people, as shown by such instances, were generous to the deserving poor, as a town they took stringent measures for the prevention of poverty. This they did, both by discouraging its importation, and by encouraging what tended to thrift. In the records we find the following: "In consideration of the increase of poor people among us, . . . as also considering how many poor persons from other towns come in to reside, *Ordered*, That not any one who owned houses or lands in town should either let or lease any of them unto any strangers that is not at present a town-dweller, without leave or license first had and obtained of the selectmen in a selectmen's meeting or by leave had and obtained in a general town-meeting or otherwise shall stake down, depositate, and bind over a sufficient estate unto the selectmen of Sudbury, which said estate so bound over unto the said selectmen, that shall be in their the said selectmen's judgment sufficient to have and secure the town of Sudbury harmless from any charge that may so come by the said lands so leased, and if any person notwithstanding this order shall lease any houses or lands unto any stranger as above said without lisencc and giving good security as above said, shall for every week's entertainment of a stranger into his houses or lands forfeit the sum of 19 shillings

6 pence to the town of Sudbury; and any person bringing a stranger presuming to come as a truant contrary to order as above said, shall for every week's residence forfeit 19 shillings 6 pence to the town of Sudbury."

In 1683 Mathew Rice was to be warned to come before the town clerk, for admitting to some part of his land Thomas Hedley, who brought his wife and child. Thomas Hedley was also to be warned to quit the town. Another person was censured for "taking in and harboring of Christopher Petingal, who is rendered to be a person of a vicious nature, and evil tongue and behavior, and otherwise discouraging enough." In 1692-93 a law was enacted by the Province, by which towns were allowed to warn away strangers. If the warning was not given within three months, then the parties so far became residents, that, if in need, they were to receive assistance from the town. If persons warned did not leave within fourteen days, the constable could remove them by law. The town repeatedly made use of this power.

Means were also taken for the encouragement of industry.

About 1663 the town voted to grant "Mr. Stearns of Charlestown, ironmonger and blacksmith," certain meadow lands, and "firewood for his family use, and wood for coals for to do the smithy work." He was also to take timber in the commons "to build his house and shop and fence." A little later Joseph Graves was allowed to take timber to build a house, and part of the land formerly given him to erect a smith shop upon. Also there was granted to Richard Sanger "six acres of meadow, on the west side of the river, upon the condition he stay amongst us to do our smith's work for four years, the time to begin the twenty-fourth day of August, 1646."

EDUCATION.—The following records afford some information concerning early educational advantages. In 1664 "the town promised to give answer at the next meeting whether or no they will accommodate Mr. Walker [with] any lands towards his encouragement to keep a free school in Sudbury." We infer that Mr. Walker was encouraged in his project by the following report on educational matters rendered in 1680:

"And as for schools, tho' there be no stated school in this town, for that the inhabitants are so scattered in their dwellings that it cannot well be, yet such is the case that, by having two school dames on each side of the river, that teacheth small children to spell and read, which is so managed by the parents and governors at home, and prosecuted after such sort as that the selectmen who distributed themselves did within three months last past so examine families, children, and youth, both as to good manners, orderly living, chatechizing, and reading, as that they returned from all parts a comfortable good account of all these matters, and render them growing in several

families beyond expectation, rarely reprovably anywhere, encouraging in most places, and in others very commendable, so as that the end is accomplished hitherto. And for teaching to write or cypher, here is Mr. Thomas Walker, and two or three others about this town, that do teach therein, and are ready to teach all others that need, if people will come or send them."

From the report rendered the court for the county of Middlesex, in reference to education in morals, we infer that attention was early turned to that matter. In 1655 persons were "appointed for to take pains for to see into the general families in town, to see whether children and servants are employed in work, and educated in the ways of God and in the grounds of religion, according to the order of the General Court." The same year John How was "appointed by the Pastor and Selectmen to see to the restraining from the profanation of the Lord's day in time of public exercise."

The stocks were employed as a means of punishment. In 1651, "John Rutter promised to mend the stocks." They were used as late, at least, as 1722, when it was voted "by y^e town to grant five shillings to bye to pad Locks for y^e pound and stocks." This old-time appliance was for a period near the meeting-house, as the records state that in 1681 "Samuel How was to build a new pair of stocks," and was to set them up before the meeting-house." In subsequent years, tything-men were appointed, and duly sworn before the selectmen, as the law directed. All these agencies were made use of to maintain a wholesome morality. That they succeeded in accomplishing something, the following from the foregoing report of 1680 indicates: "And the selectmen having also been made acquainted that the court expects their inspection touching persons who live from under family government, or after a dissolute or disorderly manner, to the dishonor of God, or corrupting of youth, the selectmen of the town as above having personally searched and enquired into all families and quarters, in and about this town, do return this answer, that they find none such amongst us."

Commercial relations were not always carried on by payments in money, but sometimes wholly or in part in produce. Edmund Rice, in 1654, "for service as deputy," was to have "six pounds to be paid in wheat at John Parmenters senior, and so much more as shall pay seven pence a bushell for the carriage of it, to be paid within one week after next Michelmas." For work on the meeting-house, about the year 1688, "he was to have country pay, at country price." The country pay was to be "in good sound merchantable Indian corn, or rye, or wheat, or barley, or malt, or peas, or beef, or pork, or work." At a meeting of the selectmen, Oct. 25, 1678, it was ordered that "Mr. Peter Noyes, Peter Kinge and Thomas Stevens or any of them are appointed to collect of the Inhabitants

of this town what may be wanted of the sum granted by any person or persons towards the new college at Cambridge in building according to an order by the Gen C . . ." This being attended to, the town received its discharge.

Sometimes payments were promised either in produce or money, as, in 1696, Benjamin Parmenter was to sweep the meeting-house, from April 1st of that year to April 1st of the next year, "for ten bushells of Indian corn, or twenty shillings in money." Whether Mr. Parmenter was to take which he chose, or the party engaging him was to give which they chose, is not stated. Sometimes the produce was rated, or paid for town rates, in accordance with what the produce was rated or paid for in county rates; as, in 1673, it was ordered that "all corn or grain, paid into the towns rate for this year, shall be paid in at such prices as the county rate is paid in at for the year." We conclude that the town had the liberty to establish the value of produce that was to pay the town rates; as, for the year 1686, wheat was rated at five shillings per bushel, peas at four shillings, oats at two shillings, Indian corn at two shillings nine pence.

PHILIP'S WAR.—In 1775-76 the people suffered hardship in consequence of King Philip's War. Before the town was invaded by the Indians it rendered valuable assistance to the Colony by the service of Ephraim Curtis, a famous woodsman and scout. He was a carpenter by trade, about thirty-three years of age. He had an intimate acquaintance with the country and its native inhabitants, and could speak their language with fluency. After the breaking out of Philip's War the Colonial authorities, wishing to secure the Nipnet Indians in western and central Massachusetts before they should ally themselves to King Philip, selected Ephraim Curtis for this most important and hazardous enterprise. In the ill-fated expedition sent out to the Nipnet country under Capt. Edward Hutchinson, Curtis went as a guide. When the expedition retreated to Brookfield, and the soldiers were besieged in a garrison-house there, and it was necessary to send some one for assistance, the task fell upon Curtis. The bold adventurer set forth from the garrison, a lone soldier, to rely on his prowess and a protecting providence to shield him on his course. Capt. Wheeler, in his official report, states of the affair as follows: "I spake to Ephraim Curtis to adventure forth again on that service, and to attempt it on foot as the way wherein was the most hope of getting away undiscovered. He readily assented, and accordingly went out; but there were so many Indians everywhere threatened that he could not pass without apparent hazard of life, so he came back again, but towards morning the said Ephraim adventured forth the 3d time, and was fain to creep on his hands and knees for some space of ground that he might not be discovered by the enemy, but through God's mercy he escaped their hands, and got safely to Marlboro', though very much spent and

ready to faint by reason of want of sleep before he went from us, and his sore travel night and day in that hot season till he got thither." On arriving at Marlboro' he met Major Simon Willard and Capt. James Parker, of Groton, with forty-six men, who were there to scout between Marlboro', Lancaster and Groton. These, on receiving intelligence of affairs at Brookfield, hastened at once with relief. They arrived August 7th, just in season to rescue the survivors. After this narration, it is unnecessary to speak of the bravery of this adventurous scout, or the value of his services to the country.

Ephraim Curtis was a son of Henry Curtis, one of the original grantees, and whose house was on the old North or East Street, a little easterly of the Abel Gleason estate. It remained standing till within a few years.

When Indian hostilities were imminent, Rev. Edmund Brown was active in making preparations for the defence of the people on the east side of the river. In a letter sent to the Governor Sept. 26, 1675, he states as follows: "I have been at a round charge to fortify my house, and, except finishing the two flankers and my gate, have finished. Now, without four hands I cannot well secure it, and if for want of hands I am beaten out, it will be very advantageous to the enemy, and a thorn to the town." The men asked for were granted him; and his house afforded a place of defence to the inhabitants of that locality, who were directed to resort to it in time of peril. After the war began the meeting-house was made a place of security, and fortifications were constructed about it.

When the hostilities began Mr. Brown sent a letter to the authorities, in which he says: "It is reported that our woods are pestered with Indians. One Adams within our bounds was shot at by a lurking Indian or more. He was shot through the coat and shirt near to the arm-pit. One Smith walking the woods was assailed by 3 or 4 Indians, whom he discovered swooping down a hill toward him, but Smith saved himself by his legs. One Joseph Freeman coming up about 4 mile Brook discovered two Indians, one in the path presenting his gun at him in the way (in a bright moonlight night), but Freeman dismounting shot at him, and mounting rode for it. One Joseph [Shaley] coming home from Marlboro' on Thursday last discovered Indians in our bounds, one of which made a shot at him, the bullet passing by him, but being mounted and riding for it he escaped. One Joseph Curtis, son to Ephraim Curtis on Saturday last heard 3 volleys of shot made by Indians between us and Watertown. This being to long, Ensign Grout can give a full narrative to your Honor and Council. The consideration of all which I hope will excite you : : : to order that these woods may be scoured and that our town of Sudbury a frontier town may be enabled to contribute aid therein and defend itself with its quantity of men, I humbly move. And

this I shall [present] unto the Honorable Council that we may not have men pressed out of our small town." Dated, "Sudbury 26th 7th mo."

Philip made his attack on Sudbury the 21st of April, 1676, on which day he also engaged at Green Hill with the forces of Captains Wadsworth and Brocklebank. The same day a detachment of his men crossed the Town Bridge and began their devastating work on the East Side. They doubtless intended to take what spoil they could and then burn the place; but they were effectually checked in their work. The inhabitants fell upon them with fury. They beat them from the very thresholds of their humble homes, and snatched the spoil from their savage clutch; they even forced them to retreat on the run, and seek safety in precipitous flight. While the work of beating back the enemy was going on, a company of reinforcements arrived from Watertown, by order of Captain Hugh Mason. These reinforcements probably arrived some time before noon. As the attack began about daybreak, and took the inhabitants somewhat by surprise, it is hardly probable that the news would reach Watertown until the morning was well advanced. Watertown was the border town on the east. The part now Weston was called the "Farmers' Precinct." At this locality the sound of guns could without doubt be heard, and the smoke rising over the woods in dark, ominous clouds might bespeak what was befalling the neighborhood. Moreover, the intelligence may have reached Watertown by couriers, who carried it to Boston, arriving there about midday.

When Mason's force reached Sudbury, about two hundred Indians were on the east side the river engaged in mischievous work. The little company of town's people who could be spared from the stockade was too small to drive them back over the river. The best they could do was to keep them from too close range of their little stronghold, and save a part of their property and dwellings. But when these reinforcements arrived, the united forces compelled the foe to make a general retreat.

The retreat that preceded this retreat of the savages was doubtless severe. Two hundred Indians were a force sufficient to offer stubborn resistance. They were near a large force held in reserve by King Philip on the west side of the river, and might at any time receive reinforcement from him; and if they could hold the causeway and bridge, the day might be won. On the other hand, the English had a vast deal at stake; if the foe was forced over the stream, the east side would for a time be safe. They could defend the narrow causeway and bridge, while the high water would protect their flanks. Such were the circumstances that would cause each to make a hard fight. But the English prevailed. The foe was forced back, and the bridge and causeway were held, so that they could not repass them.

A company of twelve men who came to the rescue

from Concord were slain upon the river meadow. The bodies were left where they fell until the following day, when they were brought in boats to the foot of the Old Town Bridge and buried. The burial-place may be on the northerly side of the Town Bridge on the eastern bank of the river. The supposition is based on the fact that it was high water on the meadow at that time, and hence this place was probably the only one suitable for the burial. A monument to this brave relief company would be very appropriate, and serve to mark a locality which on that day was full of stirring events.

Shortly after Philip's War occurred the death of Rev. Edmund Brown. He died June 22, 1678. The town soon called as his successor Rev. James Sherman.

Active measures were immediately taken to provide the minister with a house. The town bought of John Loker the east end of his house, standing before and near the meeting house, and his orchard, and the whole home lot of about four acres; it also bought of him the reversion due to him of the western end of the house that his mother then dwelt in. This part of the house was to be the town's property at the marriage or death of the said Widow Mary Loker. For this property the town was to pay John Loker fifty pounds. The Widow Loker appeared at town-meeting, and surrendered all her reversion in the western end of the house to the town, reserving the liberty to have twelve months in which "to provide herself otherwise." She also promised in the mean time "to quit all egress and regress through the eastern end of the house and every part thereof." In consequence of this the town agreed to pay her annually—that is, till she should marry or die—twenty-five shillings, money of New England. The town also voted to raise twenty-five pounds with which to repair the house. The records inform us, that "the said town doth freely give and grant unto Mr. James Sherman, minister of the word of God, all that house and lands which the said town bought lately of John Loker, and twenty pounds to be paid him in [country] pay towards the repair of the said house, and also twenty pounds more to be paid him in money, for and towards the purchase of the widow Mary Loker's lot that lies adjoining to it, when she shall have sold it to the said Mr. James Sherman, and also six acres of common upland lying on the back side of the town at the end of Smith field, and also six acres of meadow ground some where out of the common meadows of this town. These foregoing particular gifts and grants the said town doth engage and promise to the said Mr. James Sherman minister and his heirs . . . in case he shall settle in this town and live and die amongst them their Teaching Elder. But in case the said Mr. Sherman shall not carry out the constant work of preaching in and to this town, during his life, or shall depart and leave this town before his death, then all the premises shall return to the said town's hands again to be at their own dispose forever,

only they are then to pay to the said Mr. Sherman all the charges he hath been out for the same in the meantime, as [they] shall be judged worth by indifferent men mutually chosen, unless both parties shall agree therein among themselves."

The town also agreed to pay Mr. Sherman eighty pounds salary; twenty pounds of this were to be paid him in "money, twenty pounds in wheat, pork, beef, mutton, veal, butter, or cheese, or such like species at country price, and the remaining forty shall be paid him in Indian Corn and Rye, or Barley or Peas, all at country prices." He was to have five pounds added per annum to his salary for the cutting and carting home of firewood. He was also to have the use of the minister's meadow lands, and could pasture his cattle on the common land, and have firewood and timber from the common land of the town.

Mr. Sherman was son of Rev. John Sherman, of Watertown. He married Mary, daughter of Thomas Walker, of Sudbury, and had two sons, John and Thomas. He was ordained in 1678, and was dismissed May 22, 1705. After leaving the pastoral office he remained in town for a time, occasionally preaching abroad. Afterwards, he practiced medicine in Elizabethtown, N. J., and Salem, Mass. He died at Sudbury, March 3, 1718.

NEW MEETING-HOUSE.—During the pastorate of Mr. Sherman the town took measures for the erection of a new house of worship. October 6, 1686, "it was determined, ordered, and voted, that a new meeting-house be built within this town with all convenient speed, after such manner as shall be resolved upon by the town." "It was ordered that the said new meeting-house shall be erected, finished and stand upon the present Burying place of this town and on the most convenient part thereof or behind or about the old meeting-house that now is."

The business of building the meeting-house was entrusted to Deacon John Haines, between whom and the town a covenant was made at a town-meeting, January 10, 1685. It was to be raised on or before the 1st day of July, 1688; and for the work Mr. Haines was to have two hundred pounds,—one hundred and sixty pounds of it to be paid in "country pay and at country price," and the other forty pounds to be paid in money. The country pay was to be in "good sound merchantable Indian corn, or Rye, or wheat, or barley, or malt, or Peas, or Beef, or Pork, or work, or in such other pay as the said Deacon Haines shall accept of any person."

The meeting-house was to be "made, framed and set up, and finished upon the land and place appointed by the town on the 6th of October last past, in all respects for dimensions, strength, shape, . . . and conveniences, as Dedham meeting-house is, except filling between studs; but in all things else admitting with all in this work such variations as are particularly mentioned in the proposition of Corporal John Brewer and Sam^l How." The town was to help

raise the building, the clapboards were to be of cedar, the inside to be lined with either planed boards or cedar clapboards, and the windows were to contain two hundred and forty feet of glass. It was voted, "that Leut. Daniel Pond shall be left to his liberty whether he will leave a middle alley in the new meeting-house, or shut up the seats as they are in Dedham meeting-house, provided always that the seats do comfortably and conveniently hold and contain seven men in one end of the seats and seven women in the other end of the seats."

A few years after this meeting-house was built a bell was provided for it. It cost "twenty and five pounds in money."

In the succession of wars that occurred during the last of the seventeenth and the first of the eighteenth century the east side was well represented, and familiar names are preserved on the muster rolls of that period. In the State Archives is a petition on which, among others, are the names of Noyes, Rice, Allen, Curtis, Gleason and Rutter. This petition, which is supposed to have reference to the ill-fated expedition of Sir William Phipps in 1690, presents a sad story of suffering. The following is a part of the paper:

"To the honorable Governor, Deputy-Governor, and to all our honored Magistrates and Representatives of the Massachusetts Colony, now sitting in General Court in Boston.

"The humble petition of us who are some of us for ourselves, others for our children and servants, whose names are after subscribed humbly sheweth that being impressed the last winter several of us into dreadful service, where, by reason of cold and hunger and in tedious marches many score of miles in water and snow, and laying on the snow by night, having no provision but what they could carry upon their backs, beside hard arms and ammunition, it cost many of them their lives. Your humble petitioners several of us have been at very great charges to get them out with arms, and ammunition, and clothing, and money to support them, and afterwards by sending supplies to relieve them and to save their lives, notwithstanding many have lost their lives there, others came home, and which were so suffered, if not poisoned, that they died since they came from there, notwithstanding all means used, and charges out for their recovery, others so surfeited that they are thereby disabled from their callings. Likewise your humble petitioners request is that this honored court would grant this favor that our messengers may have liberty to speak in the court to open our cause so as to give the court satisfaction. Your humble petitioners humble request is farther that you would please to mind our present circumstances, and to grant us such favors as seems to be just and rational, that we may have some compensation answerable to our burden, or at least to be freed from farther charges by rates, until the rest of our brethren have borne their share with us, and not to be forced to pay others that have been out but little to respect of us, whereas the most of us have received little or nothing but have been at very great charges several of us. If it shall please this honorable General Court to grant us our petition we shall look upon ourselves as duty binds us ever pray.

John Haynes Sen.	Thomas Walker.
Joseph Noyes Sen.	John Barrer.
Peter Haynes Sen. [or Noyes].	Samuel Glover.
Mathew Rice.	Joseph Gleason sen.
John Allen.	Thomas Rutter.
Mathew Gibbs sen.	Joseph Rutter.
Thomas Rice.	Benjamin Wight.
James Rice sen.	Peter Plympton.
Joseph Curtis.	Israel Miller.
Joshua Haynes sen.	Stephen Cutts."

(State Archives, vol. xxxvi., p. 59.)

Names familiar on the east side are also found among those who performed ranger services at Rutland in 1724.

EDUCATION.—About the beginning of the eighteenth century there was an increased interest in the matter of education. Comparatively little was done before by way of providing public schools. Previous to this time encouragement, we conclude, was given to Mr. Thomas Walker, to keep a "free school in town." It is stated that Mr. Walker taught the youth to "write and cypher;" and that besides this service there were two "school dames on each side of the river that teacheth small children to spell and read." After 1700 new school laws were enacted by the Province; and about that time Mr. Joseph Noyes was chosen a grammar school-master. For a time schools were kept in private houses; but by 1725 the town had voted that each precinct be empowered to build a school-house. In 1729 a vote was passed by which there was to be built in the East Precinct a school-house "18 ft. wide by 22 ft. long and 8 ft. between joints, with a good brick chimney and fire-place at one end and a place to hang a bell at the other end." By 1735 two school-masters were employed in each precinct at a salary of £60 each.

In 1751 the selectmen agreed "with Mr. W^m. Cook [only son of Rev. Mr. Cook] to keep a grammar school . . . for six months, beginning the school the first day of November; and also to teach children & youth to Read English and wright and Instruct them in Rethmetick, and to keep the school in the Town School House as the Selectmen shall from time to time order For the sum of Twelve pounds Exclusive of his Board." It was voted that year that the grammar schools should be kept in the two town school-houses by each meeting-houae. This shows us where two of the town school-houses stood at that time; and this, with other records, show that school matters were at that time conducted by the Board of Selectmen. Another record of 1756 shows where two other school-houses stood, inasmuch as the town voted that year that the grammar school should be kept at four places,—“two at the school-houses near the meeting-house, one at the school-house near Joseph Smith's, and the other at that near Nathan Goodnow's." John Monroe was to keep the school, and have five pounds, thirteen shillings, four pence for a quarter, and the town was to pay his board.

In 1755 the town "voted for Grammar school 30 pounds, three-fifths to be spent on the west side, and two fifths on the east side of the river; for the west side the school was to be kept at the farm." In 1752 it "voted for the support of the Grammar school in sd town the year ensuing 37 pounds, 6 shillings, 8 pence." The school was to be held in five places,—“two on the east side of the river and three on the west, in places as followeth: In the school-house near the house of Mr. Joseph Smith, and in a convenient place or near the house of Dea. Jonas Brewer as may be, or in a convenient place as near the house of Mr. Edward More as may be, and in a convenient

place as near the house of L' Daniel Noyes as may be, and in the school-house near to and northerly from the house of Dea Jonathan Rice all in sd town." The same year the town voted that "the Reading & writing school should be kept In the two Town school houses the year ensuing." During this period several school-houses were built, which stood about half a century.

A prominent man who taught school in town, and who tradition says lived on the east side, was Samuel Paris, who was prominently connected with the witchcraft delusion. In the household of Mr. Paris at his former home, in what was once Salem Village (now Danvers), the Salem witchcraft sensation began.

The records state that in 1717, Mr. Samuel Paris was to teach school four months of the year at the school-house on the west side of the river, and the rest of the year at his own house. If he was absent part of the time, he was to make it up the next year. In Book III., Sudbury Records, we have the following statement, with date May 25, 1722: "These may certify that ye 28 pounds that ye town of Sudbury agreed to give Mr. Samuel Paris late of Sudbury, for his last yeares keeping school in s^d town, is by Mr. John Clapp, treasurer for said town by his self and by his order all paid as witness my hand, John Rice, executor of ye last will and Testament of ye s^d Mr. Paris."

There are graves of the Paris family in the old burying-ground at Wayland. Towards the southeast side of it stands a stone with the following inscription: "Here lyes ye Body of Samuel Paris, Who Died July 27th 1742 in ye 8th year of his age." On another stone is marked: "Here lyes ye Body of Mrs. Abigail Paris who departed this life February ye 15th 1759 in ye 55th year of her age."

As the years advanced school privileges increased. The town was divided into districts, in each of which a substantial school-house was built. For a time the Centre School-house was situated a few feet easterly of the Massachusetts Central Railroad, and was subsequently used as a grocery store by the late Newell Heard. In 1841 a private academy was kept by Rev. Leonard Frost in the Town House, which had at one time one hundred and seven pupils. In 1854 the town established a High School and erected a commodious building just scuth of the Congregational Church. Among its early principals, who were natives of the town, were Miss Lydia R. Draper and Miss Anna Dudley.

ECCLESIASTICAL.—On May 22, 1705, Rev. James Sherman was dismissed from the pastorate, and November 20, 1706, Rev. Israel Loring was installed as his successor. Shortly after the occurrence of these events a movement was made to divide the town of Sudbury into an East and West Precinct. The division was accomplished about 1723, and although Mr. Loring was invited to remain, he moved to the west side of the river, and identified his interests with the

West Precinct. While at the east side he resided at the house which the town had provided for Rev. James Sherman. Concerning the division, the church records kept by Mr. Loring state as follows:

"Feb. 11, 1723.

"The Church met at my house, where, after the brethren on the East Side had manifested their desire that the church might be divided into two churches, it was so voted by majority."

When the effort to secure the services of Mr. Loring proved futile, a call was extended to Rev. William Cook, a native of Hadley, Mass., and a graduate of Harvard College. The call being accepted, Mr. Cook was ordained March 20, 1723, and continued their pastor until his death, Nov. 12, 1760.

The town granted £80 to support preaching on both sides of the river for half a year.

After the setting off of the West Parish, it was considered advisable to move the East Side meeting-house nearer the centre of the East Precinct. January 29, 1721-22, "the town by a vote showed its willingness and agreed to be at the charge to pull down y^e old mee ing-house and remove it south and set it up again." At the same meeting they chose a committee to petition the General Court for permission. In a paper dated December 28, 1724, and signed by Mr. Jennison, Zechariah Heard and Phineas Brintnal, it is stated that they were "the committee who pulled down and removed the old meeting-house in the East Precinct of Sudbury." About 1725 was recorded the following receipt: "Received from Mr. John Clap, late treasurer of the town of Sudbury, the sum of four hundred pounds in full, granted by said town to carry on the building of a meeting-house in the East Precinct in said town. We say received by us, Joshua Haynes, Ephraim Curtis, John Noyes, Samuel Graves, Jonathan Rice, Committee." This building was located at what is now Wayland Centre, on the corner lot just south of the old Town House. The town instructed the committee "to make it as near as they can like the new house in the West Precinct, except that the steps "are to be hansomer;" it was also to have the same number of pews.

Thus at last both precincts were provided with new meeting-houses, and a matter was settled that had occasioned much interest and more or less activity for nearly a quarter of a century. Doubtless participants in the affair at the beginning and during its progress had passed away, and, before its settlement, worshiped in a temple not made with hands, whose Builder and Maker is God. The intercourse between the two precincts was pleasant, and for a while the ministers exchanged once a month. For years the salaries of the two pastors were equal, and again and again is there a receipt on the town-book for eighty pounds for each.

FRENCH AND INDIAN WARS.—In the inter-colonial conflicts known as the French and Indian Wars the East Precinct bore its proportionate part. On the

muster-rolls of the town East Side names repeatedly appear. Shoulder to shoulder men marched to the front, and as townsmen and kindred endured in common the rigors of those arduous campaigns. At the disastrous occurrence at Halfway Brook, near Fort Edward, July 20, 1758, where the lamented Captain Samuel Dakin fell, the East Precinct lost Lieutenant Samuel Curtis, who, with eighteen men, had joined Captain Dakin's force but a short time previous. Among the reported losses on the same occasion were William Grout, Jonathan Patterson, Nathaniel Moulton and Samuel Abbot. Most of the men in the East Precinct in both the alarm and active list of militia turned out for service at the alarm about Fort William Henry.

In 1760, Rev. William Cook died. That year the town voted "sixty-five pounds to each of the Rev^d ministers for the year ensuing, including their salary and fire wood; in case they or either of them should decease before the expiration of the year, then they or either of them to receive their salary in proportion during the time they shall live and no longer."

This may indicate that their death was anticipated. Another record indicates that Mr. Cook had been sick some time when this vote was passed, as the town-book goes on to state: "The same meeting granted thirty-three pounds, six shillings, six pence to pay persons who had supplied the pulpit in Mr. Cook's confinement, and also granted thirty pounds more to supply the pulpit during his sickness, and chose a committee to provide preaching in the meantime." May 11, 1761, the town appropriated seventeen pounds, six shillings, eight pence "out of the money granted for the Rev. Mr. Cook's salary in the year 1760, to defray his funeral expenses."

Mr. Cook had one son who taught the grammar-school for years in Sudbury, and died of a fever in 1758. After the decease of Mr. Cook, another minister was soon sought for on the east side. A little disturbance, and perhaps delay, was occasioned by a petition sent to the General Court relating to the settlement of another minister on the east side the river. But the matter was amicably adjusted by a vote of the town, whereby it decided "not to send an agent to the General Court to show cause or reason why the petition of Deacon Adam Stone and others relating to the settlement of a Gospel minister on the East side the river should not be granted." The town furthermore voted, that the "prayers of the petition now in Court should be granted, Provided the Court would Grant and confirm the like Privilege to the West Church and Congregation when there shall be reason. John Noyes Moderator."

The way cleared of obstructions, a new pastor was soon found. Choice was made of Rev. Josiah Bridge. October 14, 1761, Captain Moses Maynard was allowed twelve shillings "for his travel to Lunenburg to wait on Mr. Bridge;" and, at the same meeting, it was "voted to grant to Mr. Bridge his settlement and

salary as he had contracted with the East Precinct for, and ordered the assessors to assess the inhabitants of the town for the same." Mr. Bridge was a native of Lexington, and graduate of Harvard College in 1758. He was ordained November 4, 1761.

REVOLUTIONARY WAR.—In the Revolutionary War the east side shared in common with the west side the deprivations and hardships incident to that protracted and distressing period. In the matter of men, the east side was represented on April 19, 1775, by two distinct companies, besides having its share of soldiers in two companies that were made up of men from both sides of the river. The two distinct companies were a minute-company of forty men, commanded by Captain Nathaniel Cudworth, and a militia company of seventy-five men, commanded by Captain Joseph Smith. The companies representing both the east and west sides were a company of militia of ninety-two men, under command of Captain Moses Stone; and a troop of horse of twenty-two men under command of Captain Isaac Loker. The company of Captain Smith, it is supposed, attacked the British on the retreat from Concord at Merriam's Corner; and the company of Captain Cudworth at Hardy's Hill, a short distance beyond. Both of these engagements were of a spirited nature; in the former two British soldiers were killed and several of the officers wounded. After the 19th of April the east side soldiers were still in readiness for service. Captain Cudworth became major in Colonel Jonathan Brewer's regiment, and Lieutenant Thaddeus Russell, of Captain Cudworth's former company, secured the re-enlistment of most of the company and was made captain of it. His company consisted of forty-nine men when he reported for duty April 24th. His lieutenant was Nathaniel Maynard and his ensign Nathaniel Reeves.

These soldiers did valiant services at the Battle of Bunker Hill. They were in the regiment of Colonel Brewer, on the left of the American line to the northerly of the summit. Their position was very much exposed; a part of the line had not the slightest protection. The only attempt that was made to construct a breastwork was by the gathering of some newly-mown hay that was scattered about the place; but they were prevented from the completion of even such a slight breastwork as this. The foe advanced and they were compelled to desist. But no exposure to the fire of well-disciplined, veteran troops, and no lack of breastwork protection led those brave Middlesex colonels and companies to turn from or abandon this important position. Says Drake, "Brewer and Nixon immediately directed their march for the undefended opening so often referred to between the rail-fence and the earthwork. They also began the construction of a hay breastwork, but when they had extended it to within thirty rods of Prescott's line the enemy advanced to the assault. The greater part of these two battalions stood and fought here without

cover throughout the action, both officers and men displaying the utmost coolness and intrepidity under fire." The same author also says of Gardiner, Nixon and Brewer, "Braver officers did not unsheathe a sword on this day; their battalions were weak in numbers, but, under the eye and example of such leaders, invincible."

As the war progressed the east side soldiers still gallantly served. Captains Nathaniel Maynard and Isaac Cutting each commanded a company in 1778, and in the muster-rolls presented to the town of Sudbury, of that year, we have given by these captains 132 names.

INCORPORATION OF EAST SUDBURY.—In 1780 the town of Sudbury was divided, and the east side became East Sudbury. The proposition came before the town by petition of John Tilton and others, June 25, 1778, in the east meeting-house. "The question was put whether it was the minds of the town, that the town of Sudbury should be divided into two towns, and it was passed in the affirmative. And appointed the following gentlemen to agree on a division line and report at the adjournment of this meeting, viz.: Colonel Ezekiel Howe, Cap'. Richard Heard, M'. Nathan Loring, M'. Phineas Glezen, M'. John Maynard and M'. John Meriam." The committee reported that they were not agreed as to the line of division.

At a meeting held Jan. 1, 1779, the town appointed Major Joseph Curtis, Thomas Plympton, Esq., Mr. John Balcom, Capt. Richard Heard and Capt. Jonathan Rice to agree on a line of division. At the same meeting measures were taken to petition the General Court. Strong opposition at once manifested itself, and the town was warned to meet at the West meeting-house December 6th, —

"1st. To choose a moderator.

"2^d. To see if the town will choose a Committee to act in behalf of this Town at the Great and General Court of this State to Oppose a Division of s^d Town, and give the Com^{tee} So chosen Such Instruction Relating to said affair as the Town may think proper, and grant a Sum of Money to Enable said Com^{tee} to Carry on Said Business."

The meeting resulted as follows :

"1st. Chose Asahel Wheeler moderator.

"2^d. Colonel Ezekiel Howe, Mr. Wm. Rice, Junr. and Thomas Plympton, Esq., a committee for the Purpose contained in this article, and granted the sum of three hundred Pounds to Enable their Com^{tee} to Carry on said affair; then adjourned this meeting to tomorrow, at three o'clock, at the same place.

"Tuesday, Decem^r 7th. The Town met according to adjournment, proceeded and gave their Com^{tee} Chosen to oppose a division of this Town, &c., the following Instructions, viz. :

"To Col^l. Ezekiel Howe, Thos. Plympton, Esq. and Mr. Rice, Junr., you being chosen a Com^{tee} by the Town of Sudbury to oppose a division of s^d Town, as Lately Reported by a Com^{tee} of the Hon^l General Court of this State.

"You are hereby authorized and Instructed to prefer a Petition or memorial to the General Court in behalf of Said Town. Praying that the Bill for Dividing s^d Town May be set a fire or altded setting forth the Great Disadvantages the Westerly part of the Town will Labour under by a Division of said Town, as reported by s^d Com^{tee}, viz. : as said report deprives them of all the gravel, and obliges them to maintain the one half of the Great Causeways on the Easterly part of said Town notwithstanding the necessary repairs of the Highways on the westerly part of said Town are nearly double to that on the East.

"Said Report also deprives them of the Pound, it also deprives them

of a Training-field though Given by the Proprietors of Said Town to the Westerly side for a Training-field for Ever.

"And further, as there is no provision made in said report for the Support of the Poor in Said Town which will be a very heavy burthen to the West side of the Town as the report now stands. Also, at said adjournment, the Town Granted the sum of three Hundred pounds, in addition to the other Grant of three Hundred Pounds to Enable their Comtee to carry on said Petition.

"Then the town by their vote dissolved this meeting."

But, notwithstanding the vigorous protest made by prominent citizens, their arguments did not prevail with the Court, and an article was passed April 10, 1780, which authorized a division of the town. A committee was appointed by the town to consider a plan for the division of property and an equitable adjustment of the obligations of the east and west parts of the town. At an adjourned meeting, held March 14th, the committee rendered the following report, which was accepted and agreed upon :

"We, the Subscribers, being appointed a committee to Join a Comtee from East Sudbury to make a Division of the Money and Estate belonging to the Town of Sudbury and East Sudbury, agreeable to an Act of the General Court Passed the 10th of April, 1780, for Dividing the Town of Sudbury, proceeded and agreed as followeth, viz. : that all the Money Due on the Bonds and Notes, being the Donation of Mary Dean to the East Side of the River, be Disposed of to East Sudbury according to the will of the Donor. And the money Due on Bonds and Notes, given by Mr. Peter Noyes and Capt. Joshua Haynes, for the Benefit of the Poor and Schooling, be Equally Divided between Each of the Sd Towns, which Sum is 4.3 : 3 : 4. That all the Money Due on Bonds and Notes for the New Grant Lands, or Money Now in the Treasury, or in Constables' hands, be Equally Divided between Each of said Towns, which Sums are as follows, viz. :

" Due on New Grant Bonds and Notes,	133 : 14 : 7
Due from Constable,	3110 : 10 : 7
Due from the Town Treasurer,	348 : 6 : 5

"And that all Land that belonged to the Town of Sudbury, or for the benefit of the Poor, shall be Divided agreeable to the Act of the General Court for Dividing Said Town. And that the Pound and Old Bell, and the Town Standard of Weights and Measures which belonged to the Town of Sudbury, be sold at publick vendue and the proceeds to be Equally divided between the towns of Sudbury and East Sudbury.

"Also, that the Town Stock of Arms and Ammunition be Divided as set forth in the Act of the General Court for Dividing the Town of Sudbury. And if any thing shall be made to appear to be Estate or property that should belong to the town of Sudbury before the Division of the above articles, it shall be Equally Divided between the Town of Sudbury and the Town of East Sudbury. And that the Town of East Sudbury shall Support and Maintain as their Poor During their Life, the Widow Vickery and Abigail Jsgate, And all such Persons as have Gained a Residence in the Town of Sudbury before the division of Sd Town, and shall hereafter be brought to the Town of Sudbury or the Town of East Sudbury, as their Poor shall be Supported by that Town in which they Gained their Inhabitation. Also, that the Debts Due from Said Town of Sudbury shall be paid, the one half by the Town of Sudbury, and the other half by the Town of East Sudbury, which Sum is 2977 : 7 : 1.

" ASHER CUTLER	ASAHEL WHEELER	} Committee."
" THO ^s WALKER	ISAAC MATNAED	
" JAMES THOMSON		

Other committees concerning the matter of division were appointed the same year. The assessors were to make a division with East Sudbury of the men required of Sudbury and East Sudbury for three years ; also to make division of clothing, beef, etc., required of said town. A committee, April 23, 1781, made the following financial exhibit :

" Due to Sudbury in the Constable's and Treasurer's hands	£1487 . 9 . 10
That the town had to pay the sum of	1661 . 19 . 5

Sudbury's part of the Powder	142 lbs.
Their part of the Lead	391 lbs.
Their part of the Guns on hand	4
The old Bell, Pound and Town Standard of Weights and Measures sold for	£1183 . 10 . 0
Sudbury's part of the above sum is	391 . 15 . 0
Received of ——— money	27 . 0 . 0
The charge of sale	20 . 8 . 0
The remainder to be paid by the treasurer of E. Sudbury.	
Money due to the town in Mr. Cutler's hands taken out of the State Treasury for what was advanced by the Town of Sudbury for the Support of Soldiers' families who are in the Continental Army.	1206 . 2 . 0."

In the division Sherman's Bridge was left partly in each town, and the river formed about half the town's eastern boundary.

June 19, 1801, Rev. Josiah Bridge passed away at the age of sixty-two. The following persons have served as his successors in the pastorate: Revs. Joel Foster, John B. Wight, Richard T. Austin, Edmund H. Sears, George A. Williams, Samuel D. Robins, James H. Collins, William M. Salter, Edward J. Young, N. P. Gilman, Herbert Mott.

SOLDIERS OF 1812.—The following men were volunteers in the War of 1812: Abel Heard, James Draper, Rufus Goodnow. The following men were drafted: Reuben Sherman, Daniel Hoven, John Palmer. The first served, the last two procured the following substitutes: Cephas Moore, Jonas Aobot.

June 1, 1814, the frame of a new meeting-house was raised. The structure was completed January 19th and dedicated January 24, 1815, on which day Rev. John B. Wight was ordained. This building is the one now in use by the First Parish or Unitarian Church. Before the erection of this meeting-house there was a prolonged discussion as to where it should be placed. It is stated that a seven years' contest preceded the decision, and that on thirty-four occasions the question was discussed as to which side of the brook the building should stand on. About the time of the completion of the new meeting house the old one was conveyed to J. F. Heard and Luther Gleason, who were to remove it and provide a hall in the second story for the free use of the town for thirty years. It was known for many years as the old Green store. It is the first building easterly of the Unitarian Church, and now the summer residence of Mr. Willard Bullard. The land on which the old meeting-house stood was sold to Mr. James Draper, who about 1840, erected a new building on a part of the same, which contained a Town Hall, school-room and ante-rooms for the use of the town. The building cost \$1700, and was first used for town-meetings November 8, 1841, and served the town for that purpose till the erection of the new building in 1878.

In 1835 the town took the name of Wayland, after President Francis Wayland, of Brown University, and the generous donor to the Public Library. In 1851 an invitation was extended to Dr. Wayland to visit the place, which was accepted August 26th of that year. The occasion was observed in a marked

manner by the people who assembled together to welcome him.

FORMATION OF THE EVANGELICAL TRINITARIAN CHURCH.—May 21, 1828, a new church was organized called the Evangelical Trinitarian Church. The following are the names of the original members: William Johnson, Edward Rice, Ira Draper, Esther Johnson, Nancy Rice, Ruth Willis, Susan Roby, Susan Grout, Eunice Rutter, Sophia Moore, Betsey Allen, Elizabeth Shurtliff, Martha Jones, Eliza Newell, Martha Carter, Fanny Rutter, Sophia Cutting, Abigail Russell.

The February previous to the act of church organization, a hall, belonging to Luther Gleason, was made use of for religious purposes. The first preaching service was held by Rev. Lyman Beecher. Subsequently the tavern hall was engaged for religious meetings, in which there was preaching by various persons. Very soon efforts were put forth for the erection of a chapel, which was completed by May 21, 1828, at which time it was dedicated. In 1834 and 1835 funds were collected for building a meeting-house; \$3000 was secured and the house was soon erected. S. Sheldon, of Fitchburg, was the builder. Some of the material grew in Ashburnham, and was hauled in wagons a distance of forty miles. The building spot was given by Samuel Russell. The house was dedicated July 22, 1835, and four days afterwards no bill relating to the work remained unpaid. The bell, which weighed 1100 pounds and cost \$400, was procured in 1845. It was subsequently broken, and in 1874 was re-cast. The following is the succession of pastors, with the date at which their service began: Revs. Levi Smith, June, 1828; Lavius Hyde, July 22, 1835; John Wheelock Allen, December 29, 1841; Henry Alien, September 30, 1852; Adin H. Fletcher, —; Henry Bullard, October 1, 1863; Ellis R. Drake, November 10, 1868; Truman A. Merrill, April 27, 1873; Robert F. Gordon, settled November, 1888. The parish connected with the new church was organized April 5, 1828, at the house of William Johnson, and was called the Evangelical Society of East Sudbury.

THE CIVIL WAR.—In the great Civil War the town of Wayland took an active part. Repeatedly, her quota was made up wholly or in part of her substantial citizens. The total number of men furnished for these quotas was 129, of which seventy were from Wayland. Of this latter number, twelve were killed in battle or died in the service. The patriotic sentiment of the town was of a fervid nature, and found expression from time to time in a way to enkindle enthusiasm and encourage enlistment. Men left the farm and the work-shop. The young men turned from the quiet of the ancestral homestead to the tumult of the camp and the stirring scenes of the front. Some of these soldiers suffered the privations of the shameful and pestilential "prison pens" of the South; some came home wounded to die; and some found a

soldier's resting-place on the soil they sought to save. Not only did the men well perform their part during the war, but the women also wrought nobly. They were organized as a "Soldiers' Aid Society" and "Soldiers' Relief Society," and furnished such supplies for camp and hospital as their willing hearts and hands could contrive and furnish. Clothing, medicine and miscellaneous articles were generously contributed, and the soldiers of Wayland had substantial reasons for believing that their friends at home were not forgetful of them. The total amount raised by the town's people for recruiting purposes was \$18,000. The following is a list of Wayland men who were either killed in battle or died of wounds or sickness:

Benjamin Cortiss, sickness; Somner Aaron Davis, killed in battle; George Taylor Dickey, sickness; William Dexter Draper, wounds and sickness; Elias Whitfield Farmer, sickness; William Thomas Harlow, sickness; Edward Thomas Loker, Andersonville Prison; John Mellen, killed in battle; James Alvin Rice, killed in battle; Hiram Leonard Thurston, sickness; Alpheus Bigelow Wellington, killed in battle; James Dexter Loker, sickness.

The town has honored her soldiers by the publication of a volume, giving a biographical sketch of each, with an outline of his military service. The book is entitled "Wayland in the Civil War," and is dedicated as follows: "To the Heroic men whose deeds are here recorded, whether returning in the glory of victory from battle-fields or leaving their bodies in honored graves."

RAILROADS.—In 1869 the Massachusetts Central Railroad was chartered, and Oct. 1, 1881, regular trains ran over the road. May 16, 1883, the cars ceased running, and commenced again Sept. 28, 1885, under the management of the Boston and Lowell Railroad. Recently the road had come under the control of the Boston and Maine Company, and excellent accommodations are afforded. There is a tastily built depot at Wayland Centre, kept in an exceptionally orderly manner by the station agent, Mr. Frank Pousland, who has thus officiated for the company since the opening of the road.

The town subscribed for three hundred and twenty-five shares of the stock. Mr. James Sumner Draper was one of the original directors and an early and earnest promoter of the road. Subsequently, litigation occurred between the town and the Railroad Company concerning the former's liability to pay the full amount subscribed for the stock, the objection of the town being that, because of the circumstances of the road, a fair equivalent had not been received for the money demanded.

PUBLIC LIBRARIES.—Wayland has the honor of establishing the first Free Public Library in the State. It was founded in 1848, and opened for the delivery of books Aug. 7, 1850. The first funds were given by Francis Wayland, D.D., late Professor of Brown University, who offered \$500 in case the town would raise a similar sum. It was voted to accept of the proposition of Dr. Wayland, and \$500 was raised by subscription and given to the town to meet the stip-

ulated condition. The library was kept in the old Town Hall till the completion of the new one, when it was removed to the commodious apartment prepared for it in that building. It is stated that the difficulties incident to the establishment of this library were, through the agency of Rev. J. B. Wight, the cause of such legislative action as enables any city or town to establish and maintain a library for the free use of the inhabitants at public expense.

In 1863, James Draper, deacon of the first Church in Wayland, gave \$500 as a permanent fund, the interest of which was to be expended annually in the purchase of books for the library.

Prior to the establishment of this library the people of East Sudbury believed in the benefits of a free use of good books by the community. As early as April 6, 1796, what was called the "East Sudbury Social Library Association" was formed. It had thirty-two original members, who paid a membership fee of \$4, with annual assessment of twenty-five cents. In 1832 the library contained 227 volumes, and was kept at the private houses of the successive librarians. When Rev. J. B. Wight came to Wayland he made a collection of moral and religious books for the free use of the citizens, which increased to 300 volumes. The books were kept first at Mr. Wight's house, and afterwards at the Unitarian meeting-house; 71 of the books are now in the Town Library. In 1845 the town procured a small library for each of the six school districts, for the use of scholars and others. These libraries contained about 60 volumes each. In 1851, by vote of the town, they were placed in the Town Library.

NEW TOWN HALL.—In 1878 a new Town Hall was erected. The plan was made by George F. Fuller, of Boston, and William R. Stinson, of Malden, was the contractor. The building cost \$9700. It was commenced in May, completed October 26th, and dedicated Dec. 24, 1878. The address was given by Mr. Elbridge Smith, a native of Wayland, and principal of the Dorchester High School.

BURYING-GROUNDS.—The first burial-place is on the north side of the road leading to Sudbury Centre, and about a half-mile from the railroad station. It has the general appearance of an old-time graveyard. The wild grass covers the toughened and irregular sod, and the uneven surface of the ground indicates that it was long, long ago broken by the sexton's spade. These indications of the existence of old graves are correct. It was the burying-ground of the settlers, and here—

"Where heaves the turf in many a mouldering heap,
Each in his narrow cell forever laid,
The rude forefathers of the hamlet sleep."

The older part of this cemetery lies near or beside the county highway, and may be the half-acre bought of John Loker for a burial-place. Tradition says that prior to the selection of this spot a few interments were made just over the hill to the north, where tra-

dition also states that there was an Indian graveyard. These traditions have perhaps some confirmation in the fact that on the northern hillside remains of human skeletons have been exhumed. An old citizen, Mr. Sumner Draper, states that in his boyhood, when men were at work in the gravel pit in what was known as the "old Indian graveyard," he saw bones which they dug up, that he thought belonged to several human skeletons, and that he had himself in later years dug up a human skull. He also stated that there were two or three flat stones on some graves, which he believed were without any inscription, and that he thought some such stones were removed from the spot long ago.

The town owned thereabouts two or three acres of land, which was generally known as the "old Indian graveyard." But if this land was reserved by the settlers for a burial-place, it was not long made use of; for the southerly slope was soon set apart for this purpose, and has continued to be used for more than two centuries and a half. Additions have repeatedly been made to this latter portion, as the generations have passed away, and new graves have been opened to receive them; and thus has the slow, solemn march of that silent company been moving over that midway space, until the two portions are almost joined. Besides the age of the yard, there are other things that make it an interesting spot to the inhabitants of Wayland. Within its enclosure stood the first meeting-house. Here lie buried the bodies of those who bore the name of Goodnow, Curtis, Grout, Rutter, Parmenter, Rice, Bent, and others of the early grantees, besides still others of Sudbury's most prominent citizens before the division of the town. Because of the interest that thus attaches to the place, we will give the inscriptions on some of the older gravestones which lie along the common highway.

MEMENTO MORI.

"Here lyeth the remains of Ephraim Curtis ESQ^r who departed this life Nov^r the 17th A D 1759 in the 80th Year of his age. He was a Loving Husband and a Tender Parent a faithful Friend, as a Justice of the Peace he Hon^d his Commission by adhering steadily to the Rules of Justice. he was Major of a Regiment, in which Office he conducted in such a manner as gave General Satisfaction. He was many years Representative in the General Court, a lover of True Piety, belov'd by all that knew him and Equally Lamented at his death."

"Here learn
the end of man
Know that thy life
is but a span."

On this gravestone is a skull and crossbones.

"In memory of Capt. Joseph Smith Who died March 9th 1803, aged 87 years.

"Farewell my dear and loving wife
Farewell my children and my friends
Until the resurrection day."

Probably the captain of the east side militia.

"Here lyest y^r Body of M^r Abigail Paris wife to M^r Samuel Paris, who departed this life Feb^r y^r 15th 1759 in y^r 53th Year of her age."

Probably the wife of the son of Samuel Paris of witchcraft fame.

"Here Lyes y^e Body of Mrs. Patience Browne wife to Maj^r Thomas Browne Aged 59 years. Died Aug^t ye 13, 1706."

Major Thomas Browne was a very prominent Sudbury citizen.

"In memory of Mr. Joseph Rutter, who died Dec. 19th 1781 in y^e 78th year of his age.

"Down to the dead, all must descend,
The saints of God must die.
While Angels guard their soules to rest,
In dust their Bodies lie.

"Erected in memory of Mary Rutter wife of Mr. Joseph Rutter who died Sept 2nd A. E 82."

Joseph Rutter was a descendant and probably grandson of John Rutter, builder of the first meeting-house, which stood just beside where the remains of Joseph Rutter now lie.

"MEMENTO MORI.
In memory of

Mr. Thomas Bent who died Wednesday morning July the 26th 1775. Mrs. Mery Bent wife of Mr. Thomas Bent who died Wednesday morning July y^e 26th 1775

<p>.Etlatis 69. Our term of time is seventy years An age that few survive But if with more than common strength To eighty we arrive</p>	<p>.Etlatis 57. Yet then our boasted strength decays, To sorrow turoes and pain So soon the slender thread is cut And we no more remain "</p>
---	---

Two notable stones are those that mark the graves of Capt. Edmund Goodnow and wife. They are in a horizontal position, and just east of the old meeting-house site. The inscription is rudely cut, and in the language of other years. It is as follows:

YE- DUST-
HEARE-LYETH- PRETIIOUS-
NT-
OF-THAT-EMENANT-SARYA
OF-
GOD-CAP-EDMUND-GOODENOW-
YEARE-
WHO-DIED-YE-77- OF-HIS-
AYGE-APRIL-YE-6-1688."
"HERE-LYETH-YE-BODY-OF-ANNE-YE
WIFE-OF-CAP-EDMOND-GOODENOW-
WHO-DYED-YE : 9 : OF : MARCH 1876 : AGED-
67-YEARS."
"HERE-LYETH-YE-BODY-OF-JOSEPH-
GOODENOW-WHO-DYED-YE-30-OF-MAY :
1676 : AGED-31-YEARS. FEBRY-18-1691."

"Here lies Buried The Body of y^e worthy Joelua Haynes Esq Deceased March y^e 29, 1757 in the 88 year of His Age. He was a Hearty Promoter of the Public weal and Whose . . . Humanity, Integrity and Laudable Munificence Enbalm His oame. He was charitable to the Poor and at his Death gave many Gifts to Particular . . . Besides 2 Thousand Pounds Old Tenor to a Publick School and y^e Poor of y^e Town of Sudbury."

Joshua Haynes was the donor of the fund called, in the list of bequests to Sudbury, the "Ancient Donation Fund."

"HERE-LYES-YE-BODY-OF-MR-JONATHAN-SIMPSON-LATE-OF-BOSTON-WHO-DEPARTED-THIS-LIFE-NOVR-1st-1773-IN-THE 54th YEAR-OF-HIS-AGE.

"Charlestown doth claim his birth,
Boston his habitation ;
Sudbury hath his grave,
Where was his expiration."

In 1800 this old burial-place was enlarged by land purchased of Abel and Luther Gleason, and a strip

of land was bought of the William Noyes heirs, to connect the yard with the old Indian burying-ground. In 1835 land was set apart for a new cemetery. It was purchased of Joseph Bullard, and is situated a little northerly of Pine Brook, about a quarter of a mile south of the Centre. In 1871 a cemetery was laid out at Cochituate.

The piety of our ancestors left little room for customs that were senseless or uninstrucive. If they were severely solemn, they were devoutly so; and, if they employed some curious devices, it was for the promotion of good. The position of their grave-stones shows that the dead were laid with the feet toward the east, or, as it was termed, "facing the east." Whence and why this custom, we know not. It might have had reference to the star of the east that announced the birthplace of Christ; but whatever the cause, it doubtless was suggested by some religious idea. To us it is a strong reminder of the words of John Bunyan: "The pilgrim they laid in a large upper chamber whose window opened towards the sun rising; the name of the chamber was Peace, where he slept till break of day, and then he awoke and sang."

The character of the grave-stones was another peculiarity of those primitive times. It would seem the object was to impart to these mementos of the departed the most sombre aspect imaginable. As no flowers but those that were strewn by God's pitying hand were ever suffered to intrude their gay, sweet presence within the solemn enclosure, so the nearest approach to anything like sympathetic embellishment on those dark slabs was the weeping willow, which drooped its long branches over a funeral urn. But the more common ornament was the "skull and cross-bones," under which were uncouth markings and strange inscriptions. Sometimes the stones were placed in groups, sometimes in irregular rows. Some were placed upright and others horizontal on the ground; but, as the latter are few and of very early date, we infer that this mode was exceptional or that it soon passed out of use. Perhaps it was a wise precaution in those far-off times to protect the grave from the wild beasts which were prowling about through the adjacent forests in search of prey. Another peculiarity is the fewness of the stones in our old graveyards. A casual glance might lead one to think they were full of slate-stone slabs, but actual count gives only a few hundred for all who died in the first century and a half. Indeed, in the older portion of East Sudbury grave-yard there are only two or three scores of stones, yet the yard contains the remains of a large portion of the town's early inhabitants, and a new grave can hardly be dug without intruding upon an old one. This seems to show that the practice of marking graves in old times was the exception and not the rule. Still another characteristic feature of these ancient grounds was their barren and neglected aspect. The graves were gradu-

ally leveled by the touch of time, the ground became uneven and rough and covered over with briars and wild grass. Yet we may believe these spots were not in reality neglected nor forsaken, for, though the floral and decorative offering was a thing unknown, many an irregular, beaten path testified that the place of their dead was an oft-frequented spot.

In early times the dead were carried to the place of burial by the hands of friends. No hearse was used till about 1800, when one was purchased at a cost of fifty dollars. In process of time a bier was used, and, as late as the beginning of this century, the body was carried on the shoulders of the bearers. In 1715 the town granted "three pounds for providing a burying cloth for ye town's use." In 1792 it voted to provide two burying cloths; these were to throw over the remains in their transit to the grave. This is indicated by the following record:

"Lieut. Thomas Rutter is chosen to dig graves, to carry the bier and the cloth to the place where the deceased person hath need of the use thereof, and shall be paid two shillings and six pence in money for every individual person."

In early times, gloves were provided for funeral occasions. We are informed of this repeatedly by the records of the town. About 1773, "To James Brown for 6 pairs of gloves for Isaac Allen's child's funeral—11—"

"To Col. Noyes for 7 pairs gloves for Isaac Allen's burial—13—"

"To Cornelius Wood for 3 pairs gloves for John Goodenow's funeral." This was about 1673.

Almost down to the present time the good old custom prevailed of ringing the bell on the occasion of a death. How it used to break into the monotony of our daily toil to have the silence suddenly broken by the slow tolling bell, that said plainer than words that another soul had dropped into eternity. Now a pause—listen! three times three—a man, or, three times two—a woman. Another pause, and then strokes corresponding in number to the years of the deceased. On the morning of the funeral the bell tolled again, and also when the procession moved to the grave.

As late as 1860 it was common to have a note read—"put up," the phrase was—in church on the Sabbath following a death, in which the nearest relatives asked "the prayers of the church that the death be sanctified to them for their spiritual good."

The grounds early used for burial were owned by the town and set apart for its common use. No private parties possessed "God's acre" then. Proprietary lots were unknown one hundred years ago. Every citizen had a right to a spot for burial wherever in the town's burying-ground the friends might choose to take it. The rich and poor were alike borne to this common spot; caste was laid aside, and nothing save the slab at the grave's head might indicate the former position of the silent occupant of the old-time burial-place. The graves of households were often in

groups, reminding one of our present family lots, but this was by common consent, and not by any titled right to the spot.

The public-house was from an early date considered in Sudbury an important place. In 1653 or 1654 we find it on record that "John Parmenter, senior, shall keep a house of common entertainment, and that the court shall be moved on his behalf to grant a license to him."

The business of these places was to provide travelers with lodging and food, or to furnish "entertainment for man and beast." They were to an extent under the control of the town, as is indicated in a record of October 4, 1684, when it was ordered that upon the "uncomfortable representations and reports concerning the miscarriage of things at the Ordinary . . . three or four of the selectmen, in the name of the rest, do particularly inquire into all matters relating thereto." In all of these taverns strong strong drink was probably sold. Licenses were granted by the Provincial or Colonial Court, and the landlords were usually men of some prominence. Taverns were considered useful places in the early times, and laws existed relating to the rights of both landlord and guest. In the period of the Revolutionary War, when a price-list was determined at Sudbury for various common commodities, the following was established for taverns:

"1779—Mugg West India Philip 15
New England Do 12
Toddy in proportion
A Good Dinner 20
Common Do 12
Best Supper & Breakfast 15 Each.
Common Do 12, Lodging 4.

The "Parmenter Tavern" was the first one kept in town, and was on the late Dana Parmenter estate, a little westerly of the present Parmenter house. The building was standing about eighty years since, and was looking old then. It was a large square house, and in the bar-room was a high bar. There the council was entertained which the Court appointed to settle the famous "cow common controversy." Subsequently, taverns at East Sudbury were kept as follows: one a little easterly of William Baldwin's, one at the Centre called the "Pequod House," one at the Reeves' place, one at the Corner, and one at the end of the old causeway, near the gravel pit. The tavern at the East Sudbury Centre was kept nearly a hundred years ago by John Stone, father of William, who afterwards kept one at Sudbury.

About 1814 the tavern at the centre was kept by Heard & Reeves. The building had a two-story front and over the kitchen in the rear was a low sloping roof. The barn stood sideways to the road, with large doors at each end. In the bar-room was a spacious fire-place where crackled the huge wood-fire on the stout andirons. Near by were a half-dozen log-gerheads ready for use whenever the villager, teamster or transient traveler came in for his mug of hot flip. Here more or less of the townpeople gathered

at intermission between the long sermons on Sunday, while their good wives were spending the "nooning" at neighbor Russell's, just over the brook. The boys bought a small piece of ginger-bread for their lunch, and while they devoured with avidity the rare morsel of "houghten" sweet cake, their fathers sat by the fireside and talked of the war, of the crops and the cattle. Before departing they showed, in a substantial way, their respect for the landlord and their appreciation of the warmth and cheer of the place by the purchase of a mug of flip.

The Reeves tavern was situated on the road from Weston to Framingham, on the "Old Connecticut Path." This was a favorite resting-place for teamsters and travelers. The last landlord was Squire Jacob Reeves, a popular citizen of East Sudbury and an excellent man for his business. He was courteous, cheerful and kind to his patrons. The confidence reposed in him by the community as a business man was evinced by the positions of public trust in which he was placed. He was town clerk eighteen years, was justice of the peace and was several times sent as representative to the General Court. He was also deacon of the First Parish Church, and it is said that his character was in harmony with the functions of his office.

OLD ROADS.—There are several old roads in town, some of which have been discontinued, yet of which brief mention should be made.

Bridle Point Road.—This was early constructed. It began at a point near the Harry Reeves place, and coming out near the Dr. Ames place, passed between the present Braman and John Heard places, and extending along and over the ridge, crossed the site of the present Sudbury and Wayland highway, a little east of the Samuel Russell place, and Mill Brook a little east of its junction with the river. By this way Rev. Edmund Brown's house was reached at Timber Neck, and the Rices who lived by the "Spring" after it was extended to the latter locality, in 1643. It doubtless also served as a hay-road and a short way from the centre of the settlement to the "Old Connecticut Path." Until within less than a century this road was for a time the regular way to the "Island." Before the building of Farm Bridge tradition says that a fording-place near the new causeway bridge (Bridle Point Bridge) was made use of for reaching that place; and that the road over the "Island" passed south of its present course until near the Abel Heard farm; and beyond the house it went north of the present road to Lanham.

The road from the centre to the "Bridge Parsonage" (present Wettington place) was laid out about 1770.

In 1773 town action was taken relative to the "discontinuance of the road from Dr. Roby's to Zechariah Biant's" (Braman place).

In 1653 "it was voted to accept of a highway laid out from Pelatiah Dean's north east corner unto ye

town way leading from the Training field by Ephraim Curtis, Esq., by Lt. Rice's to Weston."

The same date a road was laid out from "Mr. Jonathan Griffin's Corner running southwesterly into the way by Mr. Elish Moore's north corner, formerly Mr. John Adams'."

In early times there was a road from Pine Plain to the Cakebread Mill, which entered the mill road at a point just east of the mill.

Traces of this road are still visible by the bank. It is stated that about 1735-36 there was a change of highway from Whale's Bridge over Pine Plain.

In 1736 a new highway is spoken of over Pine Brook at John Grout's. Formerly a road passed northerly from the Pine Plain Road, starting at a point a little east of Clay-pit Bridge Hill, and passing "the ponds" went to the north part of the town. The road from the centre to the south part was early opened and called "Cotchituatt Road."

The Castle-hill Road is in the town's northwesterly part, and probably so called from the peculiar-shaped hill or knoll along which it passes.

"Northwest Row" was a road still open as a pasture-path or hay-road, from the neighborhood of the Gleasons to the river meadow margin.

The new "great road" from Wayland to South Sudbury was made in the early part of the present century.

In 1743 an offer was made of land by Edward Sherman and John Woodward for a "good and convenient way, two rods wide," in case the town would erect a bridge over the river. The same year a subscription was made for a bridge between the land of John Haynes on the west side of the river and John Woodward on the east side of the river.

A lane to the Cakebread Mill formerly extended from the Wayland Weston "Great road," beginning at a point just west of Deacon Noyes Morse's house.

PLACES OF INTEREST.—*Whale's Bridge.*—This is a small bridge or culvert at the head of the mill-pond, and early referred to in the town records. It took its name from Philemon Whale, one of the early settlers, whose home may have been near by.

Clay-pit Hill.—This is on the east branch of Mill Brook, about an eighth of a mile above the mill-pond. There is a bridge near by, called Clay-pit Bridge or Clay-pit Hill Bridge. Both of these places took their names from the clay-pits near by, where bricks were early made. Other clay-pits were at Timber Neck, near the junction of Mill Brook and Pine Brook, a short distance southwesterly of the High School building.

Pine Plain.—This consists of the plain lands easterly of Wayland Centre, in the vicinity of the Summer Draper place. The locality is early mentioned in the records, and probably took its name from the growth of pine forest found there.

Pine Brook.—This is a small stream that skirts a part of Pine Plain on the easterly. It is crossed by

a small bridge near the Joseph Bullard place, and just below forms a junction with Mill Brook.

The Training-Field.—This was situated just south of the Abel Gleason place, and consisted of about nine acres of land. It was set apart in 1640, and in 1804 was sold to Nathan Gleason.

The Street.—This is that part of the old road of the settlement which extended from the Parmenter tavern to the town bridge. It was a term used by the old inhabitants, and is still familiar in the town.

The Pock Pasture.—This is northerly of Pine Plain, and now largely abounds with berry bushes or brushwood. A small-pox hospital was formerly there, from which it derives its name. There was also a small-pox hospital on the "Island." Tradition states that the treatment in the two hospitals was different, and that in one most of the patients died, and in the other most of them recovered. There is the grave of a small-pox patient just east of Bridle Point Bridge.

Ox Pasture.—This was a reservation set apart in 1640 as a common pasture for working oxen. It was situated between the North and South Streets towards Mill Brook.

The Ponds.—These are small bodies of water near the road, now discontinued, that extended from near Clay-pit Hill to the north part of the town.

Bridle Point.—This is often referred to in the early records, and is a well-known and ancient landmark. We have no knowledge of the origin of the name. It is the extremity of the ridge of land by the new causeway bridge. In a deed of 1666 it was spelled Bridell Poynt.

The New Causeway.—This, as the name implies, is the causeway last made, and is on the South Sudbury and Wayland great road. At the eastern end is the New Causeway or Bridle Point Bridge.

Farm Bridge.—This is the one that crosses the river on the road to the "Farm" or "Island." Recently a new bridge was constructed, and the causeway about it was considerably raised to take it above high water. In 1889 a bridge was built to the easterly of this, to allow the water to pass off from the meadows more readily in flood-time. There are also other bridges for this purpose on the other causeways that are called "dry bridges," under which little or no water passes in a dry time.

The Common.—This public property was so called because it was "the town's Common land." The term, formerly, did not simply refer to a village green, but to all the land that was held in common by the early settlers. The old Common was at the centre, and contained about one acre of land that was bought by the town in 1725-27, "as a site, ordered by a committee of the General Court, on which to place the meeting-house." It was also to be used as a training-field. It was nearly square, and bounded southerly by the Farm road, easterly by the great road. The north line, it is stated, would come within about fifteen feet of L. K. Lovell's house; while the south line, or that

on the Farm road, extended from the corner to just beyond the house recently occupied by Mrs. Josiah Russell. At the southwest corner stood the school-house; and at the southeast corner the old meeting-house, which was removed about 1814. This land, as before stated, was sold to Dea. James Draper. The meeting-house was not moved entire, but was taken to pieces and set up without the replacement of some of its original external ornaments. When in its new position it had a common gable roof with slight pediments and covings, and stood fronting the main street nearly on a line with the fence by the sidewalk as it is at present. It had a projecting porch on the front and also on each end. It had eight windows in front, four on each end, four on the back, one large circular top window back of the pulpit, and a semi-circular one in each gable end. It had neither steeple, turret nor chimney; and near the beginning of the present century its paint was so weather-beaten as to make the original color quite indistinct. A fine sycamore tree stood just back of the pulpit window, and as it towered high above the building added very much to the otherwise plain appearance of the place. On the corner just south of the meeting-house, near the spot now occupied by Mellin's "law office," stood the "Pound." Just beyond the brook, on the right, stood the Samuel Russell house, with two stories in front and one back, within which the church-going dames gathered on a cold Sunday to fill their foot-stoves with coals. There they also talked of the sick and bereaved, for whom prayers may have been offered at the morning service, and other matters of interest and curiosity.

The Village Grocery.—In the early part of the present century a small West India and dry-goods store was kept by Heard & Reeves. Later it had but one proprietor, and was known as "Newell Heard's store." It was a low, red building, and stood a few feet southeasterly of the present railroad station. It was a genuine country grocery; and old inhabitants still remember the tall, slim form of "Uncle Newell," as he was familiarly styled, who was in stature a typical Heard. Mr. Heard was cross-eyed, which may have given rise to the story among the small boys that he could see in different directions at the same time.

This store was a great resort for the staid villagers, who, on a fall or winter evening, gathered there, and many is the grave question of church and state that has been settled by the social group as it sat on the nail-kegs about the fire of that old-time grocery-store. After the proprietor's death the building was removed, and a part of it is now on the premises of L. K. Lovell.

PHYSICIANS.—*Ebenezer Roby, M.D.*—One of the most noted physicians of East Sudbury was Dr. Ebenezer Roby. He was born in Boston in 1701, and graduated in Harvard College in 1719. He settled in Sudbury about 1725, and in 1730 married Sarah, daughter of Rev. John Swift, of Framingham. He

lived in the old Roby house, which was recently destroyed by fire. He was prominently connected with town matters in Sudbury, where he lived and practiced his profession till his death. He was buried in the old grave-yard at East Sudbury, and the following is his epitaph:

"In memory of Ebenezer Roby, Esq., a Native of Boston New England.

"He fixed his residence in Sudbury in the character of a Physician, where he was long distinguished for his ability and success in the healing art.

Born Sept 20th 1701
Died Sept 4th 1772 aged 71."

His son, Dr. Ebenezer Roby, Jr., born in 1732, also practiced medicine in Sudbury, and died July 16, 1786, aged fifty-four. Dr. Joseph Roby, son of Ebenezer, Jr., was a practicing physician in East Sudbury till 1801.

The following is a specimen of Dr. Roby's bills. It was rendered the town for attendance and medicine furnished to some of the French Neutrals. These unfortunates were a part of the Nova Scotia exiles referred to by Longfellow in his poem "Evangeline." One thousand of them were taken to the Massachusetts Bay Province, and supported at public expense. Different towns, among which was Sudbury, had their quota to care for:

MASSACHUSETTS PROVINCE.

"For medicine and attendants for the French Neutrals from Nova Scotia.

"1755, Dec. 11.—To Sundry Medicines for French young women—27—
To Do. for girl 64

"1756, March 22.—To Sundry Medicines and Journey in the night west side the river—0-5-8

"To Sundry Medicines and Journey west side 0-4-0

"To Do. 4* To Journey and Medicines 0-7-0

"To Do. $\frac{1}{2}$ for the old Gentleman when he fell off the house and was greatly bruised and sick of a fever the clavicle being broke."

The following are the physicians who succeeded the Drs. Roby: Nathan Rice, 1800-14; Ebenezer Ames, 1814-61; Edward Frost, 1830-38; Charles W. Barnes, 1860-64; John McL. Hayward, 1874. Charles H. Boodey located in Cochoituate in 1874, where he still resides.

LAWYERS.—Othniel Tyler, Samuel H. Mann, Edward Mellen, David L. Child, Richard F. Fuller, Franklin F. Heard, Gnatavus A. Somerby, Richard T. Lombard, Daniel Bracket, Charles Smith.

SKETCHES OF PROMINENT PERSONS.—*Edward Mellen, Esq.*, was born at Westborough, September 26, 1802. He graduated at Brown University in 1823, and went to Wayland November 30, 1830, where he died May 31, 1875. He was well known in the legal profession. In 1847 he was made justice of the Court of Common Pleas, and in 1855 was made chief justice of the same court. In 1854 he received from his *alma mater* the degree of LL.D.

Lydia Maria Child, whose maiden-name was Francis, was born in Medford, Mass. She married David Lee Child, and went to Wayland in 1853. She was celebrated as a writer, and her works have had wide

circulation. She was eminent as an advocate of freedom for the black man, and long evinced her sincerity in his cause by substantial labors. She was an intimate acquaintance of and earnest co-worker with the prominent anti-slavery advocates of her time. Her home was an humble, unpretentious dwelling, situated about a quarter of a mile east of Sudbury River, on the Wayland and Sudbury Centre highway. Connected with her home was a small and tastefully-kept garden-patch, where she and her husband cultivated flowers and a few vegetables in such moments as they could spare from their busy literary life. It was no uncommon thing for the passers-by to see one or both of this aged couple quietly at work in their little garden-plot, or perhaps toward the close of the day "looking toward sunset," beyond the peaceful meadows that fringe the bank of Sudbury River. Since the death of Mr. and Mrs. Child the place has gone into the possession of Mr. Alfred Cutting, who has built an addition to the original structure.

General Mirah Maynard Rutter was a descendant of John Rutter, who came to America in the ship "Confidence," in 1638. He was born in 1779, and lived on his farm in what has since been known as the Rutter District, on the road from Weston "Corner" to the "Five Paths." He was a patriotic, public-spirited man, and interested in all matters that concerned the welfare of society. For years he had the office of sheriff, and received from Governor Lincoln the commission of major-general. He died in 1837, and his remains were interred in the Rutter family tomb, in the old burying ground.

Franklin Fisk Heard, Esq., was born in Wayland, and graduated at Harvard University in 1848. He studied law and became noted in his profession as a writer and compiler of works of law. In his latter years he resided in Boston, where he practiced his profession until his death, which occurred in 1889.

Dr. Ebenezer Ames was born in Marlboro' in 1788. He studied medicine with Dr. Kittredge, of Framingham, and began the practice of medicine in Wayland in 1814, and died in 1861. He early identified himself with the Evangelical Trinitarian Church, of which he was made deacon November 11, 1829. He was somewhat noted as a physician, and had an extensive practice, not only in Wayland, but in the adjacent towns. As a citizen he was respected by all. He was eminent for his wise counsel and noble, manly character. As a Christian his conduct was exemplary, and he was steadfast in what he believed to be right. At first he lived in the centre village, but soon after built the house upon the Sudbury and Wayland highway, about an eighth of a mile westerly, where he lived and died. His design in building this house was to provide a home for himself and his minister, and the west end of it was used as the parsonage for many years.

Rev. Edmund H. Sears, D.D., was born at Sandisfield in 1810, graduated at Union College in 1834,

and at the Harvard Divinity School in 1837. He was ordained February 20, 1839, and installed at Lancaster December 23, 1840.

Mr. Sears continued pastor of the Old Parish (Unitarian) Church, Wayland, until 1865, when he took charge of the Unitarian Church at Weston. He was a useful citizen and greatly esteemed by his fellow-townsmen. For years he served on the School Committee and also on the Library Committee, and performed such other services as greatly endeared him to the people. As a public speaker he displayed great ability, being substantial in thought and clear and forceful in expression. As a writer he excelled, and his books have been popular among those who were of his school of theological thinking. He exhibited fine poetical talent, and some of the sweet hymns of the church are of his authorship. In theology he was of the conservative class of Unitarians. His residence in Wayland was on the "plain," about a mile easterly of Wayland Centre, near the Summer Draper place. He died at Weston January 16, 1876.

THE RIVER MEADOWS.—These border on Sudbury River, and are more largely in Wayland than Sudbury. They extend, with varying width, the entire length of the river course. In some places they may narrow to only a few rods, while in others they extend from half a mile to a mile, where they are commonly called the Broad Meadows. They are widest below the long causeway and Sherman's Bridge. Comparatively little shrubbery is seen on these meadows, but they stretch out as grassy plains, uninterrupted for acres by scarcely a bush. At an early date these meadows yielded large crops of grass, and subsequent years did not diminish the quantity or quality, until a comparatively modern date. From testimony given in 1859 before a Legislative Committee, it appeared that, until within about twenty-five years of that time, the meadows produced from a ton to a ton and a half of good hay to the acre, a fine crop of cranberries, admitted of "fall feeding," and were sometimes worth about one hundred dollars per acre. The hay was seldom "poled" to the upland, but made on the meadows, from which it was drawn by oxen or horses. Testimony on these matters was given before a joint committee of the Legislature, March 1, 1861, by prominent citizens of Sudbury, Wayland, Concord and Bedford. Their opinions were concurrent with regard to the condition of things both past and present.

From evidence it appears that a great and gradual change in the condition of the meadows came after the year 1825. The main cause alleged for this changed condition was the raising of the dam at Billerica. This dam, it is said, was built in 1711 by one Christopher Osgood, under a grant for the town of Billerica, and made to him on condition that he should maintain a corn-mill, and defend the town from any trouble that might come from damages by the mill-dam to the land of the town above. In

1793 the charter was granted to the Middlesex Canal, and in 1794 the canal company bought the Osgood mill privilege of one Richardson, and in 1798 built a new dam, which remained till the stone dam was built in 1828.

It would be difficult, and take too much space to give a full and extensive account of the litigation and legislation that has taken place in the past near two centuries and a half, in relation to this subject. It began at Concord as early as September 8, 1636, when a petition was presented to the Court, which was followed by this act: "Whereas the inhabitants of Concord are purposed to abate the Falls in the river upon which their towne standeth, whereby such townes as shall hereafter be planted above them upon the said River shall receive benefit by reason of their charge and labor. It is therefore ordered that such townes or farms as shall be planted above them shall contribute to the inhabitants of Concord, proportional both to their charge and advantage."¹ On Nov. 13, 1644, the following persons were appointed commissioners: Herbert Pelham, Esq., of Cambridge, Mr. Thomas Flint and Lieutenant Simon Willard, of Concord, and Mr. Peter Noyes, of Sudbury. These commissioners were appointed "to set some order which may conduce to the better surveying, improving and draining of the meadows, and saving and preserving of the hay there gotten, either by draining the same, or otherwise, and to proportion the charges layed out about it as equably and justly, only upon them that own land, as they in their wisdom shall see meete." From this early date along at intervals in the history of both Concord and Sudbury, the question of meadow betterment was agitated. At one time it was proposed to cut a canal across to Watertown and Cambridge, which it was thought could be done "at a hundred pounds charge." Says Johnson: "The rocky falls causeth their meadows to be much covered with water, the which these people, together with their neighbor towne (Sudbury) have several times essayed to cut through but cannot, yet it may be turned another way with an hundred pound charge." In 1645 a commission was appointed by the colonial authorities (Col. Rec. Vol. II., page 99) "for ye btt' and imp'ving of ye meadowe ground upon ye ryvr running by Concord and Sudbury." In 1671 a levy of four pence an acre was to be made upon all the meadow upon the great river, "for reclaiming of the river that is from the Concord line to the south side, and to Ensign Grout's spring." Later a petition was sent by the people of Sudbury, headed by Rev. Israel Loring, for an act in behalf of the meadow owners. But legislation and litigation perhaps reached its height about 1859, when most of the towns along the river petitioned for relief from the flowage. The petition of Sudbury was headed by Henry Vose and signed by one hundred and seventy-

¹ Shattuck's "History of Concord," page 15.

six others; and that of Wayland by Richard Heard and one hundred and sixteen others.

For any one to attempt with great positiveness to clear up a subject which has perplexed legislators and lawyers, might be considered presumptuous. It is safe, however, to say that while there is evidence showing that the meadows were sometimes wet in the summer at an early period, they were not generally so; it was the exception and not the rule. It was a sufficient cause of complaint if the settlers had their fertile lands damaged even at distant intervals, since they so largely depended upon them; but the fact that they did depend on them, and even took cattle from abroad to winter, indicates that the meadows were generally to be relied upon. Certain it is that, were they formerly as they have been for nearly the last half-century, they would have been almost worthless. Since the testimony taken in the case before cited, these lands have been even worse, it may be, than before. To our personal knowledge, parts of them have been like a stagnant pool, over which we have pushed a boat, and where a scythe has not been swung for years. Dry seasons have occasionally come in which things were different. Such occurred in 1883, when almost all the meadows were mown, and even a machine could, in places, cut the grass. But this was such an exception that it was thought quite remarkable. For the past quarter century people have placed little reliance upon the meadows; and if any hay was obtained it was almost unexpected. This condition of things in the near past, so unlike that in times remote, together with the fact of some complaint by the settlers, and an occasional resort by them to the General Court for relief, indicates that formerly freshets sometimes came, but cleared away without permanent damage to the meadows. At times the water may have risen even as high as at present. It is supposed that at an early period the rainfall was greater than now, and that because of extensive forests the evaporation was less. The little stream that may now appear too small to afford adequate power to move saw and grist-mill machinery, may once have been amply sufficient to grind the corn for a town. But the flood probably fell rapidly, and the strong current that the pressure produced might have left the channel more free from obstructions than before the flood came. Now, when the meadow lands are once flooded they remain so, till a large share of the water passes off by the slow process of evaporation. The indications are that something has of late years obstructed its course. As to whether the dam is the main and primal cause of the obstruction, the reader may judge for himself.

GRASS.—Various kinds of grass grow on the meadows, which are known among the farmers by the following names: "pipes," "late-grass," "blue-joint," "sedge," "water-grass," and a kind of meadow "red-top." Within a few years wild rice has in places crept along the river banks, having been brought

here perhaps by the water-fowl, which may have plucked it on the margin of the distant lakes.

COCHITUATE.—This village is situated in the south part of the town. Its name is of Indian origin, and was originally applied, not to the pond near by, which was formerly known as Long Pond and at present Cochituate Pond, but to the land in the neighborhood, and the locality so-called gave its name to the pond. The evidence of this is the use of the word in the early records. In a record of the laying out of the "Glover farm" in 1644, is this statement: "The southwest bounds are the little river that issueth out of the Great Pond at Cochituate." The word has been spelled in various ways, some of which are Wochittuate, Charchittawick and Cochichowicke. It is said (Temple's "History of Framingham") that the word signifies "place of the rushing torrent" or "wild dashing brook;" and that it refers to the outlet of the pond when the water is high. There are indications that on the highlands west of the pond the Indians once had a fort, and it is supposed the country about was once considerably inhabited by natives.

Cochituate village is probably largely situated upon lands which were once a part of the Dunster or Pond farm or on the Jennison grant before mentioned. Both of these farms early came into the possession of Edmund Rice, who purchased the Jennison farm in 1687, and the Dunster farm in 1659. The Old Connecticut Path passed by this locality and took a course northerly of the pond into the territory now Framingham. Not far from Dudley Pond a house was erected, about 1650, by Edmund Rice. This was probably the "first white man's habitation in this vicinity." The lands on which he built were a part of the Glover farm, and leased for a term of at least ten years. One of the terms of the lease was that Mr. Rice should erect a dwelling on the premises within five or six years, and that it should be of the following dimensions: "thirty foote long, ten foote high stud, one foote sil from the ground, sixteen foote wide, with two rooms, both below or one above the other; all the doores well hanged and staires, with convenient fastnings of locks or bolts, windows glazed, and well planked under foote, and boarded sufficiently to lay corne in the story above head."

Mr. Rice was probably the first white settler of the place, and from this lone dwelling-place streamed forth a light into the dark wilderness that must have looked strange to the native inhabitants. The country in and about this village continued to be like the other outskirts of the town, a quiet farming community, until the early part of the present century, when the manufacture of shoes was commenced in a small way by William and James M. Bent. In the course of a few years, this business developed into quite a source of employment, not only for people in the immediate vicinity, but for some living in the adjoining towns. Stock was cut and put up in cases at the Bent shop, and workmen came and took it to their

homes to finish. The shoes were mostly what were known as "kip" or "russet" shoes, and were sold in cases of from fifty or sixty pairs.

The "russets" were for the Southern market and used by the slaves on the plantations. Since the introduction of modern machinery, the shoe business in Cochituate has mostly been done in one or two large shops. The village has grown in size and prosperity to an extent in proportion as the shoe business has increased; and a large share of the dwelling-houses are owned or occupied by persons who are connected with this important business.

Cochituate has two meeting-houses, one for the Wesleyan Methodist, the other for the Methodist Episcopal Church. The former building is situated in Lokerville, and was erected in 1850. The latter is at Cochituate village and was built about twenty-five years ago. The construction of a Catholic Church was recently commenced on Main Street. It is designed for the use of the French Catholic people of the place. Sabbath services are only occasionally held at the Wesleyan meeting-house, but at the Methodist Episcopal Church they are held regularly.

Cochituate has six public schools, five of which are kept in the grammar school house in the central village, the other is a primary school and kept at Lokerville. The village has a cemetery pleasantly located near Cochituate Lake. The place is supplied with water from Rice's Pond by means of works, constructed in 1878, at an expense of \$25,000.

A street railroad was recently made from Cochituate to Natick, and arrangements have been made the present year for the survey of a branch railroad from Cochituate village to the Massachusetts Central Railroad at Wayland Centre.

The place has several stores of various kinds, and a bakery. Recently it has been provided with electric lights.

THE QUARTER MILLENNIAL ANNIVERSARY.—In accordance with a plan arranged by the joint committee of Sudbury and Wayland, the Quarter Millennial Anniversary exercises began at Wayland on the morning of Sept. 4, 1889, by the firing of cannon and the ringing of the meeting-house bells.

The exercises were of an interesting character. The children of the public schools of Wayland, Cochituate, South, North and Sudbury Centre, all bedecked in festal day attire, and headed by the Fitchburg Brass Band and a rear guard of the "Sudbury Cavalcade," made a detour of the town, and then assembled in the Town Hall, where they were addressed by Rev. Robert F. Gordon, pastor of the Congregational Church, and William H. Baldwin, president of the Young Men's Christian Union of Boston.

When the speaking was ended, the children repaired to the lower room, where a collation was served, after which the people went to South Sudbury by a special train. From South Sudbury a procession

moved to Sudbury Centre, where a dinner was served in the town hall. At about half-past two an oration was delivered by Rev. Alfred S. Hudson, from a platform erected just east of the old parish meeting-house. After the oration, speeches were made by distinguished guests, and the services of the day closed with a concert and fire-works at Sudbury Common, and a ball in the Town Hall at Wayland.

The battery that gave the salute at Wayland in the early morning was from Waltham, and was stationed on the sandy knoll a little southeasterly of Wayland Centre. During the firing, it is stated by those present that a large eagle, a bird quite rare in any part of the State at any time, alighted upon a tree not far away from the battery and remained on its perch as the salute went on. The attendance upon the exercises was greater than the most enthusiastic had anticipated, and it was the general opinion of the great multitude assembled that the day was very enjoyable and one long to be remembered by those who love the two towns. Nature was at her best. The summer lingered in its beauty, while the early autumnal hues and breezes contributed just sufficient to what summer afforded to make the day one that was exceptionally adapted to the celebration of a great event.

CHAPTER XXXVIII.

MAYNARD.

BY REV. ALFRED SERENO HUDSON.

MAYNARD is a new town incorporated April 19, 1871. Its territory consists of 1300 acres taken from Stow, and 1900 acres taken from the northwesterly part of Sudbury. It is situated about twenty-one miles by highway west of Boston; and is bounded north by Acton, south and east by Sudbury and west by Stow. The town contained in 1875 a population of 1965; and has a central village, the principal business of which is the manufacture of woolen goods. The territory is divided by a stream now called the Assabet River, but which has at different times been known as Elizabeth, Elzibeth, Elzebet, Elisabeth and Elizebeth. On an old map of Sudbury by Mathias Mosman, bearing date April 17, 1795, and made by authority of that town in obedience to an order from the General Court of June 26, 1794, the name is spelled Elsabeth. In a note explanatory of the map, is the following statement by the author: "The rivers are also accurately surveyed and planned; the river Elsabeth is from four to five rods wide, but [there is] no public bridge over the river where it joins Sudbury." On a map of Sudbury by William H. Wood, published in 1830, the name is spelled Elzibeth. But although the river has at times been called by what has sounded like an English word, it

is not probable that this was its original name. On the contrary, the evidence is that Elzibeth or Elzibet and similar ones are corruptions of the Indian word Assabet or Assabaeth. At a date prior to the use of the name Elzibeth, Elzibet, etc., as before given, the terms Asibath and Isabaeth were used. When the lands south of the Assabet River were being laid out and apportioned to the settlers, about the year 1650, the farm of William Brown is spoken of as being in the "northwest angle beyond Asibath River," and in the "Colony Records," vol. iii. page 225, with date May 22, 1651, is the statement that "Captain Willard and Lieutenant Goodenow are appointed to lay out the thousand acres of land at Isabaeth which Jethro the Indian mortgaged to Hermon Garret."

Another matter of consideration is that the tributary which flows into the Assabet River just above the upper bridge, near the old Whitman place, was early known as Assabet Brook. It has thus been designated by tradition and document, and the term has come down to the present, notwithstanding that the terms Elizabeth, etc., have been applied to the river. We consider it, then, fairly established that the river, the locality and also the brook were all called by the Indian name. The words Elizabeth, Elizabeth, etc., may have crept into use as corruptions of the original Indian name, and the map-makers doubtless took the name that was popularly used. It is probable that the Indians would have a name for a stream of such size, and also that the settlers would call it by the same name.

Assabet is a convenient form of the Indian names before mentioned. The very sound is a reminder of those far-away days when the home of the red man was here, and the stream and its borders were his fishing-place and hunting-ground. It is suggestive of the murmur of pines, the rippling of water and the rustling of leaves. Such a stream as the Assabet would naturally be a favorite with the aborigines, and attract them to its neighborhood. The Indians, to quite an extent, relied upon fish for subsistence, which they took at certain seasons in large quantities, and preserved, by drying, for future use. The Assabet River is a tributary of the Musketauquid (Concord and Sudbury River), which stream was formerly well stocked with salmon, alewives, shad and dace. These were taken in abundance at different points along the river, one favorite fishing-place being near Weir Hill, by the Concord and Sudbury boundary, and another at Rocky Falls (Saxonville). Surely we may suppose, then, that up a tributary like the Assabet many of these fish would ascend in the spawning season, and give ample opportunity to the natives for obtaining them in abundance. Various methods were employed by the Indians in fishing. As the fish ascended the stream, they would watch at some fall or where there was shoal water, and take them with the arrow or spear. The scoop-net was also used at such places. Many were captured at night, when the In-

dian sat in his canoe, with the blazing torch at the bows, which attracted the fish. When the fish descended the stream a weir was used. This was a fence constructed from the bank towards the stream centre, and running diagonally to an apex, where a net was placed for their capture as they were passing through. Thus this stream, now so busy and important, and associated with so much of the town's life of to-day, was also important and serviceable to the inhabitants long since passed away.

The sounds and the sights are as different from what they once were as are the traits of the two races who have dwelt on its banks. Instead of the hum of machinery and the rumbling of the carriage and car, was the dashing of waves on the rock, the lone whistle of the wild wood-duck's wing, the occasional crash of some worn-out hemlock or oak, the shriek of the wild-cat or the howl of the wolf. Instead of the reflection of scores of bright lights at night of the noisy mill and quiet homes, was the flash of a birch-bark or pitch-pine torch, as, borne at the bows of a light canoe, it fitted noiselessly by inlet and curve. To the very river bank the forest grew, and in place of the meadow or well-tilled field was the oak and dark evergreen grove or the tangled, swampy morass. From these circumstances, then, we may suppose that the Assabet River has played an important part in the history of the place. It is a beautiful stream, with its swiftly-running waters at times and places, and with its picturesque scenery outstretching to the surrounding country.

As Maynard is composed of territory taken from Sudbury and Stow, a few facts concerning the settlements of these old towns may be interesting, and assist to a better understanding of the early history of the place. Sudbury was settled in 1638 by a company of English emigrants, some of whom came direct from England and some from Watertown, after a brief stay there. The lands were attained by permission of the Colonial Court. The first grant was of a tract about five miles square, and was purchased of the Indian proprietor Karto, or Goodman, as he was called by the English. This tract extended from Concord on the north to what was then the "wilderness land" (now Framingham) on the south, and from Watertown (now Weston) boundary on the east to a little westerly of the village of Sudbury Centre. In 1649 the settlers obtained by petition another grant, which extended westward, and was called the "Two-Mile Grant."

The town was incorporated Sept. 4, 1639, when the Court ordered that "The new plantation by Concord shall be called Sudbury." The name was taken from Sudbury in England, from which town some of the settlers are supposed to have come. One great inducement which led to the selection of this spot for a settlement was the extensive meadow lands along the river. Upon these lands the people depended to a great extent for their subsistence during the first

years of their pioneer life. So productive were they that Johnson says "they take in cattel of other towns to winter." The plantation prospered. In 1639 a grist-mill was erected, and in 1640 a small meeting-house was built, the dimensions of which were "thirty foot long and twenty foot wide." The cost was to be six pounds, to be paid in money, corn and cattle to be prized by two men of the town, one to be chosen by the town and the other by John Rutter, the contractor and builder of the house.

The first minister was Rev. Edmund Browne, who it is supposed was settled in England before he came to America. He was a scholarly and substantial minister, as well as an honored and useful citizen. The town soon took rank among the best of the Massachusetts Bay Colony. Not only did the people develop the resources within their own territory, but the spirit of colonization early prevailed, which led the people to pioneer new places. They went south to what is now Framingham and Natick, and westerly beyond the "two-mile grant," to what is now Marlboro', where in 1656 a new town was incorporated.

The town of Stow in its original limits was composed of a tract of country bounded by Sudbury, Concord, Groton, Lancaster, Marlboro' and the Indian plantation called Nashoba (now Littleton). The Indians called it Pompasetticutt. In 1666 a part of this territory was formally laid out to Major Eleazer Usher; and a little later about 500 acres were conveyed to Daniel Gookin, and 150 acres to Richard Heldredge.

In 1669 George Haywood petitioned the General Court to appoint some persons "to view this land." October 13th his request was granted, and May 31, 1670, the committee rendered a report. In this report is the following statement: "We found by estimation 10,000 acres of country land, whereof 500 acres of it is meadow: the greatest part of it is very meane land, but we judge there will be planting-land enough to accommodate twenty families. Also about 4000 acres more of land that is taken up in farms." They stated that the Indian town of Nashoba, that is adjacent, "is exceeding well meadowed, and they make but little or no use of it." The General Court allowed the petitioners to take the land "provided the place be settled with not lesse than tenn families within three years, and that a pious orthodox and able minister be mainteyned there."

Daniel Gookin, Thomas Danforth, Joseph Cooke, or any two of them were appointed to regulate the settling of the place, and Dec. 4, 1672, they appointed a committee to lay out twelve farms of fifty acres each, and to "cast Lotts for them" among those to whom the land was allowed, provided that the parties were "men of good and honest conversations, orthodox in Religion," and would engage to help support "as Godly minister among them," and also would settle upon their lands within two years from the following May ("History of Stow.")

May 16, 1683, the place was made by incorporation the town of Stow, and March, 1686, twenty-six homesteads were granted.

EARLY PURCHASE OF TERRITORY.—That portion of Maynard which was taken from Sudbury was a part of the land last granted to that town by the General Court. It was five miles in length north and south by two in breadth east and west, and its northerly boundary was a direct continuation of the Concord and Sudbury old town line to the Assabet River, at a point which Mathias Mossman on his map calls the Acton, Stow and Sudbury corner. The Colonial record concerning this grant is "Sudberry is granted two miles westward next adjoining to them for their furth' enlargement, provided it [prejudice] not W^m. Browne in his 200 acres already granted." ("Colonial Rec." vol. ii. page 273.) This land tract was purchased of the Indians for twelve pounds. A deed was given which is on record at the Middlesex Registry of Deeds, Cambridge, and of which the following is a true copy:

INDIAN DEED.

"Forasmuch as the Gen^l Court of the Massachusetts Colony in New England hath formerly granted to the Towne of Sudbury, in the County of Middlesex, in the same colony, an addition of land two miles westward of their former grant of five miles, which is also layd out & joyneeth to it; and whereas the English occupiers, proprietors and possessors thereof have chosen Capt. Edmond Goodenow, Leif Josiah Haynes, John Goodenow, John Brigham & Joseph Freeman to be a counttee for themselves & for all the rest of the English proprietors of the s^d tract of land and to satisfy & pay them for their native ancient & hereditary right, title & interest thereunto: Know all People by these presents—That wee, Jehn Jakin, John Magus, John Musqua & his two daughters Gether & Rachel, Benjameo Bohue, John Speen & Sarah his wife, James Speen, Dorothy Wenneetoo & Humphrey Bohue her son, Mary Neppanun, Abigail the daughter of Josiah Harding, Peter Jetbro, Peter Musquamough, John Boman, David Mannoan & Betty, who are the ancient native & hereditary Indian proprietors of the afores^d two miles of laod (for & in consideration of the just & full sum of twelve pounds of current money of New England to them in hand well & truly paid at or before the ensembling & delivery hereof by the said Capt. Edmond Goodenow, Leif Josiah Haines, John Goodenow, John Brigham & Joseph Freeman in behalfe of themselves & of the rest of the English possessors, occupiers, proprietors & fellow-purchasers), the receipt whereof they do hereby acknowledge & therewith to be fully satisfied, contented & paid & thereof and of every part & parcell thereof they do hereby for themselves & their heyr, (Executors, Administrators & Assigns, clearly, fully & absolutely release, acquitt, exonerate & discharge them & all the English possessors, occupiers, proprietors & fellow-purchasers of the same & all and every one of these heyr, Executors, Administrators, Assigns & successors forever. Have given, granted, bargained, sold, aliened, coseossed, made over & confirmed, & by these presents, do give, grant, bargain, sell, alien, enseoosse, make over, confirm & deliver all that their s^d tract & parcells of laods or two miles (hee it more or less, situate lying & being) altogether in one entire parcell in the s^d Towne of Sudbury in the County of Middlesex afores^d & lyeth al along throughout on the westerne side of the old five miles of the s^d Towne & adjoyneth thereunto (together with the farme lands of the heyr of William Browne that lyeth within the same tract, unto the s^d Capt. Edmond Goodenow, Leif Josiah Haines, John Goodenow, John Brigham & Joseph Freeman & unto all & every one of the rest of the English possessors, occupiers, proprietors & fellow-purchasers thereof as the same is limited, butted & bounded on the East by the old part of the s^d Towne of Sudbury (which was the five miles at first granted to the s^d Towne) & is butted & bounded northerly by the line or bounds of the Towne of Stow & is bounded southerly & partly westerly by the lands of Mr. Thomas Danforth. All the lands within said bounds of hills, vallies, planes, intervalls, meadows, swampe, with all the timber, trees, woods, underwoods, grass & herbage, rocks, stones, mines, mineralls, with all rivers, rivoletta, brooks, streams, springs, ponds & all manner of water courses & whatsoever is therein &

thereupon, above ground & under ground, with all rights, members titles, royalties, liberties, privileges, proprieties, uses, profits & commodities, thereof, & every part & parcell thereof, & that is every way & in any wise thereunto belonging and appertaining,

"To Have, Hold, use, occupie, possess, enjoy to the only absolute proper use, benefit, behoofe and dispose of them the s^d English possessors, occupiers, proprietors & fellow-purchasers of the Towne of Sudbury & their heyr, executors, administrators, assigns & successors in a free, full & perfect estate of inheritance from the day of the date hereof & so for ever.

"And the above-named Indian Grantors do also hereby covenant, promise & grant to and with the above-named Edmund Goodenow, Josiah Haynes, John Goodenow, John Brigham & Joseph Freeman, & with all the rest of the English possessors, occupiers, proprietors & fellow-purchasers of the said two mile of land (bee it more or less) as above bounded that at the unsealing and delivery hereof, they are the only and absolute Indian proprietors of the premises, & that they (& none else) have just and full power in themselves the same thus to sell, convey, confirm, make over & deliver, & they do hereby engage & bind themselves & their heyr, executors, administrators & assigns from time to time & at all times hereafter, fully and sufficiently to secure, save harmless & forever defend the hereby granted & bargained two miles of land (as is above bounded, bee it more or less), with all the rights, members & appurtenances thereunto belonging, against all manner & singular other titles, troubles, charges, demands and incumbrances that may be made or raised by any person or persons (especially Indian or Indians) else whatsoever lawfully having or claiming any right, title or interest in or to the premises, or to any part or parcell thereof, to the trouble, vexation, charges, interruption or ejection of the above s^d English possessor, occupiers, proprietors or fellow-purchasers of the same, or any one of them, they or any one of their heyr, executors, administrators or assigns, in his or their quiet and peaceable possession, free & full use, enjoyment, or dispose thereof, or any part or parcell thereof, forever.

"Furthermore, we, the above-named Indian Grantors, do hereby oblige and engage ourselves, all and every one of us & ours as afores^d shall and will from time to time & at all times readily and cheerfully do (at our own proper costs and charges), or cause to be so done, any other or further act or acts, thing or things, that the law doth or may require for more sure making & full confirming of all & singular the hereby granted premises unto the s^d Edmund Goodenow, Josiah Haynes, John Goodenow, John Brigham and Joseph Freeman & unto all & every one of the rest of the English possessors, occupiers, proprietors and fellow-purchasers of the premises, & unto all & every one of their heyr, executors, administrators and assigns, forever.

"In Witness whereof the above-named Indian Grantors have hereunto, each for themselves & altogether, sett their hands and seals, dated the 11th day of July, in the year of our Lord God one thousand six hundred eighty & four, Anno Regni Regis Caroli Secundi, XXXVI.

"Attest CHAS B. STEVENS Reg."

The above deed was not given until years after the grant was made by the Court, and the land was divided up into portions to the inhabitants. The records do not state what occasioned the long delay, but, as was the case elsewhere, perhaps the papers were not passed until, in process of time, the settlers questioned whether the claim to the territory was valid until a deed was obtained of the Indian proprietors. A similar instance occurred at Gratton, where the deed was given long after the land was occupied. The grant was allowed by the Court as early as 1655, but no title was obtained of the natives till about 1683 or 1684.

The 200 acres referred to consisted of land allowed by the Court to William Brown, of which the record is as follows: "In answer to the petition of W^m Browne for 200 ac^s dew for twenty-five pounds putt into the joynt stocke by Mrs. Ann Harvey, his Aunt, from whom he made it appear to the Court he had sufficient deputacon to require it, his request was granted, viz.: 200 ac^s of land to be layed out to him wthout the west lyne of Sudbury by Capt. Simon Willard and Sergeant Wheeler."

Concerning the laying out and apportionment of

these lands, we have the following from the Sudbury records :

November 27, 1651, "It is agreed in a public town-meeting warned for that purpose, that the rate now to be levied for the payment of John Sherman and others for laying out the two miles westward joining to our former bounds which was last granted by the Court for our enlargement shall be paid by the inhabitants, every man to pay alike, the same in quantity, and when that the two miles shall be layed out that every man shall enjoy a like quantity of that land."

About two years later a dispute arose relative to the manner in which the two-mile grant was to be divided. "Two ways were proposed, neither of which gave satisfaction; the first was to divide them equally to every man; the other was to divide by estate or family—to every man four parts—to every wife, child or servant bought or brought up in the family one part."

On January 4, 1655, at a selectmen's meeting it was "voted to take some means to get the new grants laid out," and it was also agreed "to keep a herd of cattle upon the land the next summer." Thus the subject of the new grant was a prominent one, and how to apportion it was an important matter. At length the plan was adopted of dividing it into squadrons, the arrangement of which was as follows: "The south east was to be the first, the north east the second, the north west the third, and the south west the fourth." It was voted there should be a highway extending north and south, "30 rods wide in the new grant joining to the five miles first granted;" also, "voted that there should be a highway 30 rods wide, from south to north, paralel with the other said highway in the middle of the remaining tract of land."

The records further state, that, as there was a pond in the third and second squadrons, "so that the middle highway from south to north cannot pass strait," it was voted to have it "go round the pond." These squadrons were sub-divided into parcels of equal size, each containing one hundred and thirty acres, and were apportioned to the people by lot. It was voted that "the first lot drawn was to begin at the south side of the first squadron running east and west betwixt our highways; the second lot to be in the north side of the first, and so every lot following successively as they are drawn till we come to Concord line and so the first and second squadron."

The Sudbury records give the following information concerning the apportionment and ownership of the second and third squadrons, a part of which are in the present territory of Maynard :

"The second squadron are: William Ward, 13; Josiah Hains, 14; Henry Loker, 15; John How, 16; Edmund Rice, 17; Philemon Whale, 18; John Loker, 19; Mr. Edmund Browne, 20; John Parmeater, Dea., 21; John Maynard, 22; Robert Darnill, 23; Thomas White, 24; Richard Newton, 25; John Reddicke, part of his, 26.

"These thirteen lots and a part afore written are the second squadron, the first whereof being William Ward's, who joineth to Lancaster highway on the south; the last being part of Sargent Reddicke's lot which joineth to Concord line on the north all this squadron of lots, with the

other aforegoing, being bounded on the east by a highway thirty rods wide, and part of the two miles last granted to Sudbury, each lot containing one hundred and thirty acres; third squadron are as followeth :

"John Ward, 27; Peter Kinge, 28; John Smith, 29; Hugh Griffin, 30; Henry Rice, 31; John [—], 32; Robert Beast, 33; William Kerley, Sen., 34; John Wood, 35; John Rutter, 36; Solomon Johnson, Sen., 37; John Toll, 38; Widow Goodenow, 39.

"Mr. Wm. Browne, his farm of two hundred acres, and his lot of one hundred and thirty acres, being granted to be in the northwest angle beyond Asilath river before the lots were laid out. Also the other part of Sargent Reddicke's lot adjoining to Mr. William Browne's farm on the north.

"The thirteen lots last written with Mr. Wm. Browne's farm and lot, and the part of Sargent Reddicke's lot, are the third squadron. Mr. Browne's farm joineth to Concord line on the north, and the widow Goodenow's lot joineth the same said Lancaster highway on the south, the said squadron of lots and farm being on the east the middle highway thirty rods wide and the second squadron, and butting on the west upon the wilderness."

Another part of the Maynard territory may have been a tract of land which we will term the Tanta-mous transfer. This tract is that before alluded to as the property mortgaged by Indian Jethro to Hermon Garrett. This land the Colony Records state "is granted by this Court [General Court] to Watertowne to purchase of Hermon Garrett." Hermon Garrett was a blacksmith who lived at Concord, and it is supposed carried on his trade there before 1638. In a petition dated May 19, 1651, he says that "3 years since he obtained a verdict against Jethro on £16 6s. 4d. and £4 costs for damage in a mare and colt done by him to your petitioner, and that said Jethro mortgaged 1000 acres of his lands to secure said debt." (Temple's "Hist. of Framingham.") The permission granted to Watertown by the General Court may indicate that the mortgaged property came into the hands of Garrett, who it is supposed sold a horse and colt to old Jethro and the default of payment may have been the damages. The statement that this land was at Issabaeth, while it may locate the land but indefinitely, leaves us to infer that it lay along the river course. The vote of Sudbury that there should be a highway running north and south, through the "New Grant," forty rods wide, was observed in the laying out of the land. This reservation was doubtless made without the expectation that it would ever become a regular town highway. It was probably laid out for several objects; one of these may have been to give abutters a right of way to their lots; another may have been to serve the town as a timber supply, and another object may have been that it could be exchanged by the town for land to be used in other places for highways. This highway subsequently became memorable by the discussions that attended its final disposition. It was repeatedly encroached upon by abutters or others who desired it for timber or as an annex to their farms; and at successive town-meetings the question came up as to what to do with the thirty-rod highway.

The following extracts from early records relate to this highway, the first to its direction, the last to its disposal :

"At a town-meeting January y^e 4, 1657, voted in y^e Town Meeting

that whereas there is a pond lying in y^e third and second squadron that soe our middell Highway from South to North cannot paa streight, our will and vote is that y^e said way shall goe round the pond at y^e nearest end and allowance be given by y^e Surveyor to any person that shall be damaged by y^e highway going at y^e ponds end and, Also let it be remembered that y^e long Hhghway from South to north goeth at y^e west end of y^e pond through y^e land of John Toll and Solomon Johnson and is twelve rods wide at y^e narrowest for which may y^e said John Toll and Johnson have sufficient allowance."

At a meeting held March 3, 1731, "Voted that they will discontinue of the thirty Rod Highway or land, so-called, twenty-six rods wide throughout the said highway." It was also "Voted to give and grant to every Proprieter owner one and one half acre of meadow and swamp land in the lands called the New Grants, thirty rod highway, also two acres of upland, January 23^d, 1732, let out to Jonathan Rice all the highway meadow from the Long Pond to Concord Road and to Marlborough Road, for five shillings."

That part of Maynard which formerly belonged to Stow was probably a portion of a tract called by the Indians, Pompasiticut. A hill in Maynard still bears the ancient name. These lands may have been, in part, some of the Tantamous transfer, and in part may have been owned by Benjamin Bohue, or the Speen family, or Musqua, or Musquamog, or Magos, or others who owned land about the Sudbury and Stow territory. It is said that soon after the incorporation of the town of Stow, which occurred May 16, 1683, "a town rate was made to pay Ben Bohue and James Speen and others for lands purchased of them." ("History of Stow.")

INDIAN OCCUPANTS.—The lands at Isebaeth or about the Assabet River were, it is supposed, at one time considerably occupied by Indians. Numerous relics have been discovered in various places; and on the Benjamin Smith place on the west side of the river Indian bones have been exhumed. These remains were discovered when excavating for a barn cellar some years ago. The remains were, it is supposed, those of six Indians who were buried side by side. Various relics were found with them. Just below this place, on the brow of the hill, is an excavation, which, it is supposed, may be the remains of an old cellar once connected with a wigwam or wigwams. This excavation may perhaps have been an old Indian store-house for corn or maize, to make use of their term for grain. These excavations for granaries were probably commonly used by the Indians. Their food was to quite an extent made of maize meal, which was prepared by a rude process of pounding with a small stone. From this meal they prepared a rude cake called "Nokake," which it is stated they carried on long journeys.

Their selections for corn-fields were on easily worked, sunny places, as on some plain land or warm hill-side. The lands were broken up by the squaws with a rude hoe made of stone with a withe handle. Their planting time was when the oak leaf had attained the size of a mouse's ear or squirrel's paw. The same fields were planted year after year and were

probably tilled by several families collectively, after the manner of the English in their early occupation of the country. As the fields were cultivated in common, so the granaries were doubtless also common property. Temple, in his History of "Framingham," says as follows of the granaries:

"These Indian granaries were of two classes, one large, the other small. Both were of similar construction, *i. e.*, circular excavations about five feet in depth. The larger ones were from twelve to sixteen feet across, while the small ones were only three to five feet in diameter. They were commonly dug in the sloping sides of a knoll or bank to secure dryness and the better to shed rain. A number were set close together in order that they might be protected from bears and other enemies by a picket; when filled with corn, or dried fish, or nuts, they were covered with poles and long grass, or brush or sods." Perhaps why so few of the traces of these granaries are found to-day in places once considerably inhabited by the Indians is that English cultivation of the soil has obliterated them. The warm hill-sides where they may have been mostly constructed, in close proximity to the corn-fields on the soft plain lands, have largely become pastures or orchards. The plow has passed over them again and again in the long flight of years. The recollections of the early settlers relating to the Indians were not altogether pleasant, and there was therefore little inducement to preserve the traces of their wigwams, planting-fields and granaries. The indications about the Benjamin Smith place are that in that vicinity may have been a cluster of wigwams or an Indian village. The half-dozen skeletons denote the presence of an Indian burial-place, and this, with the presence of a granary and the finding of stone relics, are supposed to point generally to the occupation of a locality by several families and perhaps a clan.

On the farm of Asabel Balcom, Esq., at a place called Pond Meadow, various relics have been found, such as arrow heads, stone axes, etc.; relics have also been found on the Puffer lands, in the south part of the town. No distinct tribe is known to have occupied the place; but as it was a point intermediate between the Indian plantation of Occogoganset (Marlboro'), and Nashoba (Littleton), and Musketaquid (Concord), it is probable that it was much traversed by the natives in their intercourse one with another; and that the birch canoe glided frequently beneath the hemlocks overhanging the Assabet, as the swarthy occupant made his way to Concord to visit Tahatawan and his family. Comparatively little is known in detail of the character of the Indian proprietors of Isabaeth, but some fragments have come down to us which are full of interest. Tantamous, or Old Jethro as he was called in English, it is supposed in early life lived at Isabaeth. This supposition is based on his ownership of the land, as set forth in his transaction with Garret. A deed dated July 12, 1684, of

land two miles in width adjoining Sudbury on the west and Marlboro' and Stow on the east, Peter Jethro, son of Old Jethro, signed, in which he calls himself "one of the ancient, native, hereditary, Indian proprietors of the said land." The residence of the Jethros subsequent to their home at Isabaeth was at Nobscot Hill, which is partly in Sudbury, but more largely in Framingham. A large stone-heap on this hill, which it is thought may have been Jethro's lookout, is mentioned in the records as early as 1654; and it is said that until recently, at least, Jethro's "granery" was still to be seen there. (Temple's "Hist. of Framingham.")

Old Jethro was not a praying Indian. Gookin says of him that he had twelve members in his family and "they dwelt at a place near Sudbury, Nobscot hill, but never submitted to the Christian profession (except his son Jethro)." He also says that the old man had the "repute to be a powwow," and he was held in great veneration by the natives. Drake says that at the time of Philip's War he lived at Nobscot and was ordered by the Colony to Deer Island, Boston Harbor, for security. Resenting the ill usage that was received from those conducting them there, Jethro and his family escaped in the darkness of night. He was betrayed, however, by his son, Peter Jethro, into the hands of the English, by whom, according to Hubbard, he was executed, September 26, 1676.

Peter Jethro was one of Mr. Eliot's converts to Christianity in 1650. Gookin characterizes him as "a grave and pious Indian." He was at one time a "minister and teacher" to the Indians at Weshakim, a place near Lancaster. His English name is attached to the deed of the New Grant. His Indian name was Hantomush and was sometimes written Anmatohu.

The Indians who lived about this vicinity probably belonged to the Nipnets or Nipmugs, who dwelt in the interior of Massachusetts, or in what was called the fresh water country, which the word Nipnet signifies. The characteristic, and modes of life of the aborigines were like those of other Indians in the near neighborhood, and these were not of a high standard before they were changed by the influence of Christianity. At Concord, where Tahatawan was chief, rules were adopted by the praying band that set forth the depravity that existed among them both in nature and practice. Johnson speaks of the Indians there in 1646 as "being in very great subjugation to the Devil;" and the pow-wows as being "more conversant with him than any other." They were given to lying, "greasing," "pow-wowing" and "howlings." But the light of the Gospel, as it radiated from the praying stations, fostered by such men as Gookin, Eliot and others, soon had a salutary effect upon them. Some of the chief men were reached and their lives and characters changed. A large share of the praying Indians were fast friends of the English, and aided them in the war with Philip. There is no evidence that the early English inhabitants ever came

into conflict with the aborigines of the immediate vicinity, nor that there was ever unfriendly intercourse between them.

King Philip's War was inaugurated by an invading force. The enemy for the most part came from afar, and the settlers defended their homesteads from those who never had a title thereto. It is supposed that a trail ran from the well-known missionary station at Natick northwesterly to Stow and Nashoba (Littleton); such a trail would probably pass through Assabet territory. The natives along its course would naturally make use of it, and have intercourse with these Indian villages.

CONDITION OF THE COUNTRY.—The country at the time of its early occupation by the English was largely an unbroken wilderness. Pine trees are supposed to have grown there very abundantly. Johnson, in his "History of New England," dated 1654, speaks of the "heavy pine forests on the west side of Sudbury River." The Sudbury records state that in 1661 men were appointed "to agree with Richard Proctor, of Concord, about his trespass of burning up our pine for making tar." The committee were to sue him if they could not agree. The absence of extensive pine woodland to-day, and the existence of oak growth, is no evidence as to what these lands formerly produced; for it is the nature of these lands to alternate between the growth of pine and oak. The broad acres that in the present may have a mixed growth of hard woods may two centuries since have been densely covered with pine. The forests of the primitive period were largely clear of brush. Johnson says, in the work already referred to: "The forests, free from under brush, resembled a grove of huge trees improved by art." There may have been two causes for this freedom from underbrush—one, the natural tendency of the larger and stronger trees to crowd out the smaller and weaker ones, and the other, the forest fires set by the Indians, as supposed, for this purpose, that they might the easier capture their game. These fires were set in the autumn, after the equinoctial storm, that they might burn with less intensity. Whatever the cause, the primitive forests were so much like huge groves, that the early settlers could travel over portions of them on horseback, and a trail through the woods, where the country was free from streams and swamps, furnished quite a passable way. Together with these extensive forests were also broken spaces, open meadows, and sunny spots which kept the country from being one of continuous shade. Some of these places were kept clear by the Indians for corn-fields. Notwithstanding the plentiful timber growth, the settlers from the beginning were very watchful against waste; and laws were enacted for its preservation. In 1646 the town of Sudbury ordered that "no oak timber shall be fallen without leave from those that are appointed by the town to give leave to fell timber that shall hew above eighteen inches at the butt end." Again, it was ordered that

no man should have timber upon the commonage if he had a supply on his own land. In 1647 it was ordered that for that year the people should have timber "for every two shillings that they paid the ministry one tree." In 1671, John Adams was "to have liberty to feed his cattle on Sudbury bound, and to take old and dry wood that shall be upon the ground, the said Adams to prevent any trespass by Concord herds or cattle, also in our wood and timber, forthwith to give notice to the town."

Because of the extensive woodlands, it is supposed there were greater falls of rain and snow in former times, so that the little stream, which now has but small water-power, might then have been sufficient to grind the corn of a township. The Assabet may then have been a wild, dashing stream in the spring-time, overrunning its banks in a furious flood; while so much of the country from which it drew its supply, being overshadowed in the summer by the outstretching branches of the leafy trees, it may at that season also have been a considerable stream. But although the snow and rain were more abundant then, if tradition is trustworthy, the climate was not of necessity more severe. On the contrary, there are indications that the spring opened early, and that the frost was gone, and the fields ready for seeding at a very seasonable time. In the Sudbury Records it is stated that at one time the town ordered "that the fences should be set by the 1st or 10th of April"; and in 1642 it was ordered that no cattle were to be found on the planting fields, and all the fences were to be up by March 1st." Grass was to be cut in some of the Sudbury meadows by the 10th of July.

EARLY ENGLISH OCCUPANTS.—Maynard territory had but very few settlers prior to King Philip's War, and what few were there were driven out by the savages on their devastating raids. On the Stow side of the river two men took up their abode about 1660. These were Matthew Boon and John Kettle, both of whom, it is said, came from Charlestown. Boon, it is thought, settled in the south or west part of the original Stow territory; and Kettle in the vicinity of Pompsiticutt Hill, on land now included in Maynard (Balcom.) Kettle married for his first wife, Sarah Goode-now, of Sudbury, and by this marriage had three children—John, Sarah and Joseph. For his second wife he married Elizabeth Ward, by which marriage he had one child or more. When the Indians invaded the Stow territory, Kettle fled to Lancaster, where his wife and some of his children were captured.

Mr. Boon remained in the territory till the invasion by Philip, April, 1676. On the day before the attack on Sudbury, which was made April 21st, Mr. Boon and a son, while endeavoring to make their way with some of their goods to a place of safety, probably one of the Sudbury garrison-houses, were slain by the Indians. They were escorted by Thomas Plympton, of Sudbury, who met with the same fate.

On the monument of the Plympton family, in the old burying-ground at Sudbury, is the statement that Thomas Plympton was killed by the Indians at Boon's plain.

We have found comparatively little by which to determine with certainty the names of those who first settled in the part of Maynard that was once Sudbury. The fact that the "New Grant" lands were allotted to certain individuals is no evidence that they were ever occupied by them. It is probable, however, that some of the owners of the lots lived on them prior to Philip's War. The names of the following, as actual settlers in those early times, have come down to us either by record or tradition—Smith, Wedge, Crane, Freeman, Carley or Kerley, Taylor, Rice, Brigham, Maynard, Wood and Skinner. Others, who settled later, are Jonas Balcom, Phineas Pratt, Jabez Puffer, Simon and Zacheriah Maynard, Arrington Gibson, John Jekyl and Marble. It is probable that such of these settlers as were occupying the ground at the breaking out of Philip's War were driven away by the savages, as it is supposed that every dwelling on the west side of Sudbury River, except such as were garrisoned, was destroyed in those dismal, distressing days. In a list of Sudbury inhabitants attached to a petition sent the General Court, purporting to contain "An Account of Losse Sustenied by Severall Inhabitants of y^e towne of Sudbury by y^e Indian Enemy, y^e 21st April, 1676," are the following names, which, with others in the list, may have been of the New Grant occupants: Joseph Freeman, loss £80; John Smith, £80; Thomas Wedge, £15; Corporal Henry Rice, £180; Thomas Rice, £100; Benjamin Crane, £20, and "Widdow" Haggood (£20. Mrs. Haggood's husband was probably Shadrack or Sydrack Haggood, who was killed near Brookfield in the Hutchinson expedition. A son, Thomas, settled in the northeast part of Marlboro'. Sydrack or Shadrack, who may have been another son, was one of the settlers of Stow about 1778 or 1779. After the close of Philip's War we conjecture the settlement of the territory progressed slowly. The country had been so scourged by the torch and tomahawk that the frontier was somewhat shunned. Savage incursions were made at times for years, by small, predatory bands from the north and east, and life was imperiled and property insecure. According to a map of Sudbury by John Brigham, bearing date 1708, which gives the squadrons of the New Grant, and also purports to give the location of every homestead in Sudbury at that time, we find but fifteen dwellings designated in the second and third squadrons north of the "east and west thirty-rod highway," or the part which is now mostly in Maynard. It is true, that in some instances two families may have lived in one house; but still the fact remains that the territory was sparsely settled for over a quarter of a century after the conflict closed.

The same is true of the Stow side of the territory.

Before Philip's War it was but sparsely peopled. Who was the first settler afterwards is unknown (Hist. of Stow). As before stated, December 4, 1672, a committee was appointed to lay out twelve farms of fifty acres each, and "to cast lots for them," yet as late as June 1, 1675, most of these lots had been forfeited by a failure of the owners to settle upon them. When the war closed desolation brooded over the lonely lands and men were slow to return. In 1681 a list is given of twelve allotments of land, which lots, it is supposed, were taken up by 1678 or 1679. These were assigned to the minister and the following named persons: Boaz Brown, Gershom Heale, John Buttrick, Ephraim Heldrieth, Thomas Stevens, Steven Hall, Samuel Buttrick, Joseph Freeman, Joseph Daby, Thomas Gates and Sydrack Hapgood (Drake's "County Hist.")

It is stated that the country about Stow, being deserted by its inhabitants during the war with King Philip, was quite a place for the Indians to gather before making their devastating incursions on the neighboring towns. "Tradition states that the Indians once held a consultation on Pompsitticut Hill, overlooking Concord and Sudbury, relative to which place they should destroy. Sudbury was decided upon because one of the leading warriors said, 'We no prosper if we burn Concord. The Great Spirit love that people. He tell us not to go there. They have a great man there. He great pray.' This allusion was to Rev. Edward Bulkley, the Concord minister. They feared his influence with the Great Spirit. Hence Concord was saved and Sudbury suffered." (Drake's "County Hist.")

In the Stow "Old Proprietors' Book," with date May 19, 1719, is the following record in relation to selections of land:

"Pitched on by Richard Temple between Pinn Brook and Willard's Pond, Israel Heald, sent, on Pompsitticut Hill, joining to Joseph Jewell's land, John Buttrick, on Pompsitticut Hill, and on the north side of his ten acres of meadow. Jacob Stevens at the Oak swamp at his ten acres on Assabeth Brook and at Elbow meadow. Thomas Whitney, sent, joining to his half-moon meadow and Mr. Goegen's land. Elizabeth Fairbank, on Pompsitticut Hill and at great meadow. John Whitaker, on Pompsitticut Hill and at green meadow. John Eveleth, on Pompsitticut Hill. Joseph Daby, right across the Hill from his house lot to Sudbury line Wetherby's line. Stephen Randall, four acres by his home lot and at his own meadow on Assabeth Brook."

"Stow, Oct. 30, 1738. Voted, on said day that Ephraim Gates have one acre and three-quarters of upland in the common land in Stow, lying on the westerly side of said Gates' House-lot, for consideration of ten Shillings and one quart of Rume."

PHILIP'S WAR.—As we have reason for supposing that the part of Sudbury now Maynard was more or less occupied by English settlers when Philip swept the town with his besom of destruction, a few facts relative to that Indian invasion may be both interesting and important. The attack, as has been stated, was on the 21st of April, 1676. It was a large force that was led by Philip. According to some writers there were 1500 warriors and squaws. There was not a town to the westward of Sudbury to serve as a barrier to the conquering march of the chief.

Marlboro' had fallen, and her dwelling-houses, except the garrisons, were ash-heaps. A few weeks before this attack a repulse was given the enemy by men from Sudbury and Marlboro', who surprised them as they slept at night about their camp-fires, near the town's western boundary. This attack, though it may have hindered them from further depredations at the time, served only as a temporary check; and it is supposed that to retrieve the loss sustained at that time, and avenge the death of their slain, as well as to wipe out another settlement towards the seaboard, they rallied with a mighty force for the work. The west part of the town was to feel the first effects of the onslaught, and there was no resource left the inhabitants but to leave the farms they had cleared, and the humble dwellings they had erected by unremitting toil, and flee to the garrisons. The nearest of these was, so far as we know, the Walker garrison, which still stands in the "New Grant" territory, in the third squadron, and not far from the southern boundary of the Northwest District. It is a quaint old structure in the walls of which are upright planks to resist the force of balls. Another place of refuge was in the Pantry (Northeast) District of Sudbury. At this place was a small block-house, and, tradition says, a garrison-house. Another garrison, on the west of Sudbury River, was the Haynes garrison, near the Sudbury River meadows; and still another, the Browne garrison, at Nobscot, in the fourth squadron of the "New Grant." Probably within one or all of these, and other fortified farm-houses on the west side, of which we have no information, the inhabitants of the "New Grant" lands were sheltered by the night of the 20th of April. The case of Thomas Plympton and Boon, already mentioned as fleeing before the savages to a place of refuge, probably indicates the movements of all the settlers in that exposed region at that time. Early on the morning of the 21st the enemy applied the torch to the deserted dwellings, having been distributed throughout the town during the night for the purpose, and the settlers saw, in the smoke borne aloft on the morning air, the last trace of their former dwelling-places. Around the garrison-houses was a scene of tumultuous conflict. About the time of firing the deserted houses the enemy attacked the fortified places with great fury. The fight at the Haynes garrison lasted from morning till midday, when the savages were repulsed by the bold defenders who sallied forth, and, as the record informs us, drove them from their "skulking approaches." In all the sad scenes of those days—the fight, the siege, the defense, the people of the "New Grant" lands doubtless had their share, and none more than they would be likely to experience their desolating effects. Relief was sent from neighboring towns, and from as far east as Boston. Twelve men came from Concord, eleven of whom were slain in the river meadow near the Haynes garrison-house. Another party came from Watertown, which then was

the border town on the east. This was commanded or sent by Capt. Hugh Mason, and did valiant work in assisting to drive the Indians from the east to the west side of the Sudbury River, and so saving the east side settlement. The other force was led by Captain Wadsworth, of Milton. Captain Wadsworth engaged the main force of the enemy at Green Hill South Sudbury. He was drawn into an ambush and fought bravely till the approach of night and a forest fire forced him from his position, when his ranks were broken and most of his command were captured or slain. A monument marks the spot where the slain soldiers were buried in one common grave, near where they fell. (For details of the Wadsworth Fight or Battle of Green Hill, see "History of Sudbury.") But though a part of the town received assistance, nothing could save the Northwest District, which, from its isolated condition, was doomed from the first approach of the savage.

LOCATION OF EARLY HOMESTEADS.—Tradition and record have located some of the early homesteads and given a few fragmentary facts concerning the early settlers.

Smith.—The lands at first possessed by the Smith family were situated on both sides of the Assabet River, and included all that now occupied by the Assabet Manufacturing Company. An old Smith homestead stood in the rear of Sudbury Street, on the island side of the river, and other homesteads of the family were scattered about the territory. The only person now left in town bearing the family name is Benjamin, who lives on the Stow side of the river. Abraham and William built a family tomb on the William Smith place. On the Levi Smith place, now owned by the Levi Smith heirs, Jonathan kept a hotel about eighty years ago. John was at Sudbury in 1647. He may have been John Smith, an early settler of Watertown. His wife's name was Sarah. He had assigned him lot No. 29 in the Second Squadron of the "Two-Mile Grant." The names Thomas and Amos were early in the family.

There is a tradition that some time early in the settlement of the town, during a severe storm in the spring of the year, several persons came to and were quietly quartered in the barn of one of the Smiths, perhaps Thomas, near where Mr. A. S. Thompson now resides. The unknown visitors were afterwards supposed to have been pirates, from the fact that they were very free with their money, paying liberally for what they obtained from the family. It was said that they threw "pieces of eight" at the swallow for amusement, and before leaving procured from the house some clothing fitted for bags, and tools for digging. The bags, being filled with something apparently heavy, were carried by them to the woods, northerly of the house, and probably buried. The suspected parties soon after left, no one knowing whither they went. Subsequently Mr. Smith received a letter from some pirates that had been cap-

tured, convicted, and were about to be executed, requesting him to come and see them, and they would give him information that would be of value to him; but Mr. Smith, with the feeling of distrust for criminals common to those days, paid no regard to the request, and, for aught known, the secret died with the writers and may never be revealed, unless some fortunate person should discover the hiding-place.

Maynard.—It is supposed that Simon Maynard was one of the original settlers of the soil. Another who was there early was Zachariah. The Maynard homestead was probably near "the Spring," a few rods east of the James McGrath, formerly the Otia Puffer place. Little or no trace now remains of this ancient homestead, and the household that dwelt in it were long ago gathered to their fathers. The first Maynard in Sudbury was John, who, it is supposed, brought with him to America a son Joseph, aged eight years. He married for his second wife Mary Axdell in 1646. By this marriage he had a son named "Zachery," born in 1647, and three daughters, one of whom married Daniel Hudson. Mr. Maynard was a petitioner for the Marlboro' Plantation, and died at Sudbury in 1672. Descendants of the family still live in Sudbury and Maynard, among whom are John A., of the former town, and the Maynards of the latter, who are proprietors of the Maynard Mills, and from whom the town has received its name.

Rice.—It is supposed that Mathias was the earliest of this name in the territory. He married a sister of John and Joseph Balcom, and, it is supposed, owned a strip or range of land running parallel with the Balcom estate. The name of Jonathan has long been familiarly associated with the Rice tavern. The first to keep this old inn was Jonathan, Sr. It was opened probably in the early part of the eighteenth century, perhaps earlier, and was continued as an inn until about 1815. The brother of Jonathan was William. Jonathan, the successor of the first landlord, was his nephew. He was a bachelor, and in stature tall and slim. He died about 1828, near the age of eighty. The Rice tavern was kept at the place now in the possession of John H. Vose.

Colonel Jonathan Rice was a prominent military man. He is mentioned on the Sudbury muster rolls as he passes through the various grades of office. In 1777 and 1778 he is mentioned as captain at Saratoga in a three-months' campaign. The lands connected with the Rice estate were conveyed by Benjamin Crane, of Stow, to Joseph Rice, of Marlboro', in 1685, and are described as follows:

"Six Stone and five acres of land that he purchased of John Woods, Senr., and John Rutter, Senr., and is bounded northward and westward with the land of Thomas Wedge, southward with the land of Solomon Johnson, Junr., eastward by a highway thirty rods wide, running between the squadron of lots in the New Grants of Sudbury aforesaid, to have and to hold the said tract of land, six stone and five acres (be the same more or less) with the house thereon erected, and all the fences belonging to the said tract of land, and all timber and firewood and the orchard thereon, with all the conveniency of water thereon, whether of Pond or Brook, and all profit and advantage."

F. Hayward

This land was conveyed by Jonathan Rice to William Rice, his son, and in 1733 described as bounded by land now in possession of Ephraim Pratt.

Edmund Rice was one of the early grantees of Sudbury, and one of the petitioners for the plantation of Marlboro' in 1656. His son Henry came with him from England, and had assigned him lot No. 31 in the third squadron of the "New Grant."

Brown.—The Brown farm, which consisted of two hundred acres allowed to William Brown by the General Court, was situated north of the Assabet River, mostly on the bend running westerly. It lies on both sides of the road to South Acton, and its northern boundary reaches nearly to the Acton town bound. The Marlboro' Branch of the Fitchburg Railroad passes through a part of it. We are informed by a deed dated 1739 that it was conveyed by Edmund to Josiah Brown, of Sudbury, for the sum of £1500.

The following is a partial copy of the deed, dated, Sept. 3. 1739 :

"To all people to whom these presents shall come, Greeting: Know ye that I, Edmund Brown, of township of York, in the Province of y^e Massachusetts Bay, in New England, yeoman, for and vpon consideration of y^e sum of Fifteen Hundred Pounds to me in hand well and truly paid before the in-sealing hereof, by Josiah Brown, of Sudbury, in the County of Middlesex &c. . . . a certain tract of land Cytuate, Lying, and Being in Stow in the County of Middlesex, and Province aforesaid, containing by estimation Two hundred acres, be the same more or less, bounded as followeth, viz.: Beginning at y^e Northwesterly corner of the premises, at a Stake & Stones thence, running easterly one mile to a thirty-rod highway—thence turns and runs southerly on said highway seventy-seven rods, or near thereabouts to lands in the possession of Edward Fuller, and thence runs westerly one mile to lands in the possession of Amos Brown—thence northerly to the Stake & Stones where we began. Also, one other piece of land lying in Shrewsbury, &c. EDMUND BROWN.

The Brown farm has since been divided up, and is now to an extent possessed by the Brown heirs. Fifty acres belong to George Brown and another section to Henry Fowler, who married into the family.

Rev. Edmund Brown was the first minister of the Sudbury Church and died in 1678; William was the first deacon. They both came from England and were of the town's original grantees.

Puffer.—Jabez and James, the first of this family in Sudbury, came from Braintree in 1712. Capt. Jabez married Mary Glazier in 1702. He had seven children and died in 1746. Jabez (2d) married Thankful Haynes, of Sudbury. A son of Jabez (2d) was Rev. Reuben Puffer, who graduated at Harvard College in 1778. He afterwards resided at Berlin, and became somewhat distinguished in his profession. He received the degree of D.D. from his *Alma Mater*. The Puffer farm was in the southerly part of the "New Grants," and was formerly the Wedge-Pratt farm. In this vicinity were extensive woodlands, which were the favorite resorts of wild pigeons. These birds were caught in abundance by means of a net; and to such an extent was this done on the Puffer place, that one of the late proprietors was familiarly known in the neighborhood as "Pigeon-Catching Puffer."

The process of capturing these birds was to spread grain over the ground in some favorable place in the woods for the space of a few feet or rods and thus entice the birds to a spot where a net was so arranged that it could be sprung by a person concealed in a bow-house. Due precaution was taken by the proprietor to prevent the firing of guns in the near neighborhood, and the birds, for a time undisturbed, lingered about the place until allured to the net. This skillful pigeon-catcher once took thirty-nine dozens and eleven birds at one draw of his net; the twelfth bird of the last dozen was also captured, but escaped before being taken from the net.

Freeman.—The mark of Samuel Freeman, with the name of John Balcom, is attached to the Indian deed of the "New Grants," testifying that John Boman, one of the Indian proprietors of the land, signed the deed in their presence. We have no definite knowledge of the exact place of the Freeman homestead. The name of Joseph is among the eleven Stow settlers who had lots assigned them in 1678 or 1679; and the same name is among the Sudbury petitioners for relief because of loss in King Philip's War. John Freeman was one of the original Sudbury grantees. His wife's name was Elizabeth, and they had one child named Joseph, born March 29, 1645.

The name of Joseph Freeman is among the names given in the Indian deed of the "New Grant."

Gibson.—The Gibson family early and for a long time lived on the Stow side of the river, on what is now known as the Summer Hill farm, on the south side of Pomposetticut Hill. An early member of the family was Arrington.

Taylor.—The Taylors lived west of the present Balcom place, and their estate extended northerly towards the river. The lands long since passed out of the possession of the family.

Brigham.—The Brighams lived on the old Sudbury and Marlboro' road, near the Sudbury town line. The old Brigham homestead, where Abijah formerly lived, stood about ten rods west of the present Lucia Brigham house. It was a large, old-fashioned, red building, with a long sloping roof. The name of John Brigham is on the Indian deed of the new grant lands, and also on the petition to Gov. Dudley in 1706-07 for a West Precinct in Sudbury. The ancestor of the family in New England was Thomas, who came from London to America in 1635. The name of John Brigham is among the names given in the deed of the "New Grant."

Marble.—The Marble family lived on the Stow side of the river. The marble place was probably that occupied by the Daniel Whitman family, on the Acton town line. None by the name now reside in town.

Pratt.—This family lived in the Northwest District of Sudbury, in the south part of the present territory of Maynard. In 1743 the farm was sold to Jabez Puffer, of Braintree.

Ephraim Pratt went to Shutesbury, where he died in

1804. It is said that he was one hundred and sixteen years old at the time of his death. The following is an account given of him in Dr. Dwight's "Travels:"

"He was born at Sudbury, Massachusetts, in 1687, and in one month from the date of our arrival (Wednesday, November 13, 1803), would complete his one hundred and sixteenth year. He was of middle stature, firmly built, plump, but not encumbered with flesh; less withered than multitudes at seventy; possessed considerable strength, as was evident from the grasp of his hand and the sound of his voice, and without any marks of extreme age. About two months before his sight became so impaired that he was unable to distinguish persons. His hearing, also, for a short time had been so imperfect, that he could not distinctly hear common conversation. His memory was still vigorous: his understanding sound, and his mind sprightly and vigorous. The principal part of the time which I was in the house, he held me by the hand; cheerfully answered all my questions; readily gave me an account of himself in such particulars as I wished to know, observed to me that my voice indicated that I was not less than forty-five years of age, and that he must appear very old to me, adding, however, that some men who had not passed their seventieth year, probably looked almost or quite as old as himself. The remark was certainly just; but it was the first time that I had heard persons who had reached the age of seventy considered as being young. We are informed, partly by himself and partly by his host, that he had been a laborious man all his life, and, particularly, that he had mown grass one hundred and one years successively. The preceding summer he had been unable to perform this labor. During this season his utmost effort was a walk of half a mile. In this walk he stumbled over a log and fell. Immediately afterwards he began evidently to decline, and lost in a considerable degree both his sight and hearing.

"In the summer of 1802 he walked without inconvenience two miles, and mowed a small quantity of grass. Throughout his life he had been uniformly temperate. Ardent spirits he rarely tasted. Cider he drank at times, but sparingly. In the vigorous periods of life he had a customed himself to eat flesh, but more abstemiously than most other people in this country. Milk, which had always been a great part, was now the whole of his diet. He is naturally cheerful and humorous, and not much inclined to serious thinking. According to an account which he gave his host, he made a public profession of religion, nearly seventy years before our visit to him; but was not supposed by him, nor by others acquainted with him, to be a religious man. He conversed easily, and was plainly acquainted with the visits and conversation of strangers. When he was ninety-three years old, he made a bargain with his host (who told us the story), that he should support him during the remainder of his life for £20. He was never sick but once, and then with fever and ague. It is scarcely necessary to observe that a man one hundred and sixteen years old, without religion, was a melancholy sight to me."

Wood.—None of the former Wood family now live in Maynard. A little more than a quarter of a century ago two of the family resided on the Stow side of the river and kept quite a popular ladies' boarding-school. The house belonging to the family is near the old Sudbury and Stow town line. The bridge near the "Whitman Place," is commonly known as the "Dr. Wood's Bridge."

John Wood was one of the original grantees of Sudbury. He was one of the petitioners for the Marlboro' township, and was one of the selectmen of that town in 1663-65.

Jekyl.—The land owned by Jekyl was, it is supposed, on the Stow side of the river, in the vicinity of Pompaesitticut Hill. John was the name of an early member of the family.

Balcom.—The Balcom estate was first owned by John and Joseph. It included land now in the possession of Asahel Balcom, Esq., and three or four strips extending from about this place to the Vose farm. The Balcoms are descended from Henry, of

Charlestown, Mass., a blacksmith. He married Elizabeth Haynes, of Sudbury. Soon after his death, in 1683, the family moved to Sudbury, and settled in the locality above designated. The family has been a prominent one, and the name familiar on the muster-rolls of the town. Asahel Balcom, the only one of the name remaining in town, is a prominent citizen. Before the incorporation of the town he was one of the familiar town officials of Sudbury. At one time he taught the school in the Northwest District. He was connected with the Sudbury military company, a justice of the peace, and passed through the various town offices with the esteem of his townsmen. He wrote the historical sketch of Maynard for Drake's "County History."

As one by one the former owners of these old estates passed away, their remains were probably carried for interment to the old burial-places of Sudbury and Stow. The older burying-ground in Sudbury was on the east side of Sudbury River, near the present Wayland Centre. About the time of the erection of a meeting-house at Rocky Plain (Sudbury Centre) land was set apart for a burial-place there, and since then slow processions from the Northwest District have mostly stopped at its gate. The grave of Captain Jabez Puffer is just beside the county road, on the north side of this yard; and scattered throughout that "thickly-peopled ground" are time-worn tombstones on which are inscribed the names of Rice, Balcom, Smith, Pratt, Maynard, Willis and others.

EARLY RELIGIOUS AND EDUCATIONAL ADVANTAGES.—As Maynard territory was originally a part of two towns, and situated on the outskirts, the inhabitants were remote from churches and schools. Those living in Sudbury were prior to 1722-23, at which time a meeting-house was erected at Rocky Plain (Sudbury Centre), a half dozen miles from church. On a petition presented to the General Court by the people in the west part of Sudbury, bearing date January 15, 1707, among the thirty one signatures are the following names of persons who probably lived in the Northwest District: "John Brigham, Tho. Smith, timothy gibson, Jr., Joseph F. Jewel [his mark], Melo C. Taylor [his mark], John Balcom, Joseph Balcom, Thomas Smith, Junior, Jonathan Rice." The substance of the petition sets forth the hardships incident to the long journey to the meeting-house, on the east side of Sudbury River. The following is the petition:

"Petition of the West Side People of Sudbury to Governor Dudley and the General Assembly.

"The petition of us, who are the subscribers living on ye west side of Sudbury great River, Humbly sheweth that whereas ye All-wise and over-Ruling providence of ye great God, Lord of Heaven and Earth, who is God blessed forever moore, hath cast our lott to fall on that side of the River by Reason of the flud of watare, which for a very great part of the yeare doth very much incomode us and often by extremity of water and terrible winds, and a great part of the winter by ice, as it is at this present, so that we are sbut up and cannot come forth, and many times wee doe attempt to git over our flud, we are forced for to seek our spiritual good with the peril of our Lives.

"Beside the extreme Travill that many of us are Exposed unto sum

3: 4: 5: 6: miles much more than a Sabbath day's journey, by Reason of these and many more objections—to many here to enumerate—whereby many of our children and little ones, ancient and weak persons, can very rarely attend the public worship. The considered premises we truly pray your Excellency and ye Honorable Council and House of Representatives to consider and compassionate us in our Extreme suffering condition, and if we may obtain so much favor in your Eyes as to grant us (our presents) as to appoint us a Community to see and consider our circumstances and make report thereof to this honorable Court. And your pure petitioners shall ever pray.

"Sudbury, January 15th 1706-07."

This shows that distance did not altogether deter the people from Sabbath observance in the house of worship, but it indicates the denials they endured for the sake of their faith.

It also shows the condition of things to which the people of the district were subjected. It was by no means a meaningless paper that was thus sent to the Court, but every sentence had a real significance. To be deprived of sanctuary privileges in those times had more of hardship than such deprivations would have in these later years. With few books of any description in their homes, with no issues of the periodical from a weekly press and little intercourse with their townspeople of other parts of the sparsely-settled community, absence from church on the Sabbath meant much. Neither did the petitioners overestimate the obstacles that sometimes stood in their way. It was not the mere matter of distance, but the perils that were incident to it, of which they mostly complained. Those brave pioneer spirits were not stopped by a shadow. They were made of stern stuff, and it took a *substance* to block up their way. But the substance was there. The Sudbury River was at times utterly impassable. Vast floods sometimes covered the entire meadows. On different occasions the inhabitants of Sudbury sought aid from the General Court for the betterment of the river meadows. The same floods that covered the meadow-lands covered, also, the causeway, and sometimes the bridge itself. The town, in its earlier history, appointed parties "to stake the causeway," that when the flood was upon them travellers might not stray from their way and perish. Again and again were those causeways raised to a place then above the flood, but not until comparatively modern times were they exempt from occasional inundations.

But better times were to come to the people.

The petition for a division of the town of Sudbury into an East and West Precinct succeeded after a lapse of nearly a score of years. By 1723 preaching services began to be held on the west side of the river and a meeting-house was completed there by 1725. New Sabbath day accommodations were thus afforded to the inhabitants of the Northwest District, and the distance to the meeting-house was shortened by about three miles. No longer was the "Great River, with its flood of watare," to keep them at home on Sunday. At the time that this new meeting-house was erected, the New Lancaster Road ran, as now (with some slight variation) from "Rocky Plain" (Sudbury

Centre) to the vicinity of the Assabet River and the distance over it was but about three miles. In those earlier times this distance might be considered quite short, especially would it be so considered in comparison with the longer one which had hitherto been travelled. There was no swelling flood to be crossed; no high, bleak hills, with a rough, circuitous path, but a pleasant way by the occasional farm-house and sometimes by the sheltering woods.

The people of the town's out-districts in those days carried their dinners with them to church, and sometimes a small foot-stove with coals. Some of the inhabitants from the remote homesteads had a small house near the place of worship, called a "noon-house," whither they repaired at the noon intermission. These "noon-houses" were provided with a fire-place, which the owners kept supplied with wood, and in this snug, quiet resort they could comfortably pass the noon hour, warm their lunch, replenish their foot-stove with coals and drive off the chill of their long morning walk or ride, and the still greater chill occasioned by the fireless meeting-house. As late as 1772 there is on the Sudbury record the following, relating to four persons who were, it is supposed, then citizens of the Northwest District, and who were probably associated as neighbors in the work of providing a "noon-house:"

"The town gave leave to John Balcom, Joseph Willis, Abijah Brigham and Jonathan Smith, to set up a small House on the town land near the west meeting-house for the people to repair to on the Sabbath day."

In those times the people rode to meeting on horseback, the pillion being used, a man riding in front and the woman behind. The old "horse-block," until within a few years, stood beneath a large button-wood tree before the old meeting-house at Sudbury Centre. To this large, flat stone—for such the "horse-block" was—the church-goers from the Northwest District directed the horse, that the woman might safely alight. There they unloaded the foot-stove and basket of lunch, and, if early, repaired perhaps to the noon-house to deposit their food, arrange their wraps, and start a fire that it might be in readiness for their noon-day meal.

The people of the "New Grant" lots, after the completion of a west-side meeting-house at Sudbury, still enjoyed the services of the Rev. Israel Loring, who cast his lot with the West Precinct. The ministrations of such a man were a privilege to any people who were religiously disposed, and their long journey was by no means without its great spiritual benefits. Dr. Loring continued their minister for years, dying in 1772, in the ninetyeth year of his age and the sixty-sixth of his ministry. His successor in the pastoral office was Rev. Jacob Bigelow, who was ordained Nov. 11, 1772, and continued their minister for years.

The church privileges that were afforded the set-

tlers of the Maynard territory by Sudbury were, so far as we know, all that they received until as late as 1683, when the town of Stow made a "rate" for preaching. One of the early ministers who preached a short time on the Stow side was Rev. Samuel Paris, in whose family at Salem Village (now Danvers), the Salem witchcraft delusion began. June 5, 1685, the town of Stow made a rate to pay Mr. Paris "for his pains amongst us." This clergyman afterwards lived and taught school in Sudbury, where he died. The youth of the Northwest District may have had him for an instructor, as the records inform us that in 1717 he was to teach school "four months on the west side the river and the rest of the year at his own house."

Mr. Paris preached but a short time for the people of Stow. On the 24th of July, 1699, a call was extended to Rev. John Eveleth, and in 1702 he was installed as pastor. He continued as the town's minister until 1717, when he was dismissed, and in 1718, Rev. John Gardner became his successor and continued such for over fifty-six years. For substance of doctrine doubtless the preaching to which which the people who lived on either side the river listened was sound and after the old forms of faith, but until the commencement of Mr. Gardner's pastorate there probably lacked on the Stow side that stability and consecutiveness of influence that the people enjoyed who lived on the Sudbury side, where there were but three pastors in the long space of more than a century and a quarter, during a large part of which time the ministry was exceptionally good.

But after Mr. Gardner's installation there was a long, generally peaceful and influential pastorate, during which season over two hundred persons united with the church.

After Rev. John Gardner's decease, Rev. Jonathan Newell was installed as pastor of the Stow Church. His installation took place in 1774, and continued until December 22, 1828, when the town accepted of his resignation and voted "to hold in lasting remembrance and veneration the Rev. Mr. Newell . . . for the deep interest he has ever manifested in their welfare collectively and individually."

SCHOOLS.—Educational privileges, like those of a religious nature, were for years only to be obtained by exposure and effort. In Sudbury, prior to 1700, they were very scant; and when, a little later, a school was established on each side the river, the children living remote from the centres would naturally be at a disadvantage. But as years advanced, privileges increased. By April 17, 1719, the town was called upon "to see if it will grant the northwest quarter of the town's petition, they desiring the school-master some part of the time with them." Among the teachers who early taught in town was John Balcom. In 1701 the town "voted and chose John Long and John Balcom," who were to "teach children to rede and wright and cast accounts." As the family of Henry Balcom, of Charlestown, moved

to the northwest part of Sudbury about 1685, it is probable that this family furnished one of the town's early school-masters. In 1779 the town of Sudbury voted to build a new school-house in the "northwest corner of the town," and to appropriate two old school-houses for the erection of a new one. In 1800 the town granted money for building three school-houses, which money was to be equally divided between the districts. The Northwest was to have for its share \$157.50. Lieutenant Hopestill Willis was then committee-man for the district. The northwest portion of Sudbury, now in Maynard, was, it is supposed, a school district for at least a hundred and fifty years. The school-house stood at about the centre of the district, by the county roadside, not far from the Balcom place. For years there was quite a well-known private school for young ladies in this district, called the Smith School. It was kept by Miss Susan Smith at the Levi Smith place and was discontinued about thirty years ago. On the Stow side school privileges were perhaps even more mesgre in the early times than on the Sudbury side, its settlement being of later date. The first reference to schools there is said to be in 1715, when a school-master was chosen for one quarter of a year. The schools were at first kept in private houses and the vote to build the first school-house was in 1731-32.

CUSTOMS, MANNERS AND LAWS.—The customs, manners and laws of Sudbury belonged to the inhabitants of the Northwest District in common with all the others. The people were of an English ancestry, associated together in pioneer work and partook of and were moulded by the same general influences. They were religious in their habits, staunch and Puritanic in their principles. They greatly venerated God's word. Town-meetings were opened by prayer, and an overruling Providence was recognized in life's common affairs. For many years the people met for political purposes in the meeting-house on the east side of the river. At this place also, as a small social and commercial centre, they obtained news from the other settlements. Every tax-payer was called upon to support the minister of the town by the payment of "rates." These rates were levied by the invoice-taker and gathered by the town marshal. The people were as surely called upon to pay the minister's tax as the King's tax.

The following records show that the town was not careless in collecting these dues: "November, 1670, Ordered that Jon. Stanhope do see that the minister's rate be duly paid, and in case any neglect or refuse to pay their proportions to said rates when due, he is appointed and empowered by the town to summons such persons before a magistrate, there to answer for their neglect." In 1683-84 it was voted, "That whereas certain proprietors and inhabitants of the town have neglected to pay their proportions to the minister's rate, and added to the evil by not paying the proportion due upon the two six months' rates

made since, to the dishonor of God, contempt of his worship, unrighteousness to their neighbors, as if they : : : slyly intended they should pay their rates for them again, and to the disturbance in and damage of this town, after so much patience used, and to the end this town may not longer be baffled : : : In his majesties name you are therefore now required forthwith to [collect] by distress upon the monies, neat cattle, sheep or other beasts, corn, grain, hay, goods or any other estate movable (not disallowed by law) you can find so much of each person herein named so greatly transgressing, the several sum or sums set off against each man's name."

In the early times there were people living on the town's border, who were designated "farmers," and their estates were called "farms." It was probably with reference to these that the following order was passed in 1677-78: "All persons bordering upon this town and who live and dwell near unto the precinct thereof shall pay (not only to the ministry but also) to all town rates, for that they belong to us, they shall be assessed their due proportions, as all other inhabitants of this town are, and in case of any of them refusing to pay, the same shall be levied by distress."

The early settlers were accustomed to look carefully after the morals of the community. The town was divided into districts and men were chosen to visit, individually, each family and "inspect their condition," and catechise the children and servants, and render a report of their doings to the town. At one time the selectmen were entrusted with this important matter. The stocks were a means of correction and punishment. These were placed near the meeting-house; and are repeatedly mentioned in the records. Later, in the town's history, tithingmen were appointed, and the service of these officials was continued for years.

Commercial transactions were carried on by means of agricultural products, money being a scarce article, and the settlers would convey these products to some central place for barter or for the payment of debts. The inn was the place generally used for this kind of exchange, and the Parmenter ordinary is often referred to in this connection. The minister was paid partly in money, but largely in such articles as flax, malt, butter, pork and peas.

Rates for labor were regulated by town action. Carpenters, thatchers and bricklayers at one time were to have "twenty pence for a day's work; and common laborers eighteen pence a day." Yearly covenanted servants were to take but five pounds for a year's service and maid servants were to take but "fifty shillings the year's service." Laws were made concerning domestic animals, viz.: that cattle were not allowed to go at large on the town's common land except under certain restrictions; and swine were to be "ringed and yoked."

Bounties were offered for the capture of wild animals as wolves and foxes, and at times also for the de-

struction of mischievous birds. The town provided ammunition for the inhabitants, and men were assigned to the duty of procuring it and dividing it up. For a time the meeting-house was used as a place of deposit for the "town's stock of ammunition." The town early set apart reservations of land for pasturage and timber for the public use. There was one large reservation on the east and one on the west side of the river; and these two together contained a large share of the original grant of five miles square. The reservation on the west side extended from the river nearly to the eastern border of the two mile grant, and northerly nearly to the northeastern part of the territory now Maynard. The inhabitants were limited on the number of cattle they were allowed to pasture in the common land by a rule based on the number of acres of meadow-land which they possessed.

In the social life of those days great respect was paid to merit and position. Seats in the meeting-house were assigned in accordance with age, merit and the amount paid for the support of the ministry. Military titles were much in use; even the minor officers of the rank and file were carefully designated by their appropriate affix. Sergeant, Corporal and Ensign, Lieutenant and Captain are common terms on the record. The term Goodman was applied to men considered especially substantial and trustworthy. Political officers were chosen in accordance with merit; and when a person was elected to a public position, he was expected to serve, unless a good excuse could be rendered. If he refused he was subjected to a fine. Idleness and lack of thrift found no favor with the early settlers of Sudbury. This class were not allowed to enter the territory, if their coming was known; and if they entered by fraud or stealth they were liable to be warned away, and any resident who knowingly encouraged the coming of such a one was subjected to a fine and censure.

The circumstances of the people required the strictest economy and industry. A long succession of inter-colonial wars oppressed them with heavy taxation; and the number of able bodied men was at times depleted by calls to the country's service at the front. The implements of husbandry were rude and clumsy and mostly of home manufacture. Home-spun fabrics were in use, and the women and older children needed strong and nimble hands to keep the household clothed. The first houses were small, rude structures; and the material of which they were made was probably all wrought out by hand. There is no mention of a saw-mill in town till 1677, when permission was given to "Peter King, Thomas Read, sen., John Goodenow, John Smith and Joseph Freeman to build a saw-mill upon Hop Brook, above Peter Noyes's Mill." This mill was situated in the second or third squadron of the New Grant. Two of the foregoing names are of settlers in the Northwest District. Before the erection of this saw-mill,

sawn material would be scarce. Probably hewn logs were largely used, with clay placed over the joints. The roofs were covered with thatch. Clay and thatch were made use of in the construction of the second meeting-house in 1654. The records inform us that a committee was appointed "to agree with somebody to fill the walls of the meeting-house with tempered clay, provided they do not exceed the sum of 5 pounds 10 shillings." The following is a record of a house and barn put up by Edward Rice in the south-east part of Sudbury about 1650. The dwelling-house was "30 foote long, 10 foote high stud, 1 foot sill from the ground, 16 foote wide, with two rooms, both below or one above the other; all the doores well hanged, and staires, with convenient fastenings of locks or bolts, windows glazed, and well planked under foote, and boarded sufficiently to lay corne in in the story above head." The barn was "50 foote long, 11 foote high in the stud, one foote above ground, the sell 20 foote if no leantes, or 18 foote wide with leantes on the one side, and a convenient threshing floare between the doares" (Barry). In the primitive dwellings there may have been more of warmth and comfort than we are wont to suppose. Many of them were built near the shelter of the forest, or on the sunny side of some protecting upland. Within the building was a large fire-place with a broad stone hearth. Wood was abundant and near at hand; and as the bright flames flickered up on a winter's night they afforded both light and heat.

HIGHWAYS, BRIDGES AND GRIST-MILL.—*Highways.*—The primitive highways of this territory were doubtless rude, being, as in every new country, but mere wood-paths or trails to the scattered homesteads and meadow-lots, and, in this case, centering in a "great road" which led to the meeting-house, tavern and mill. As these public places lay in a southerly direction, it is probable that one of the earliest main highways was the "New Lancaster Road." This road probably existed previous to 1725; and its course, as given on the Mathias Mosman map of 1794, was from the Sudbury meeting-house northwesterly, passing south of Vose's Pond by the old Rice tavern into Stow. The present "Great Road" from Sudbury Centre by J. H. Vose's is supposed to be a part of that road. This is called the "New Lancaster Road" to distinguish it from the "Old Lancaster Road," of Sudbury, which was laid out about 1653, and which is designated as the "Old Lancaster Road" on the Mosman map.

As the "New Lancaster Road" was long since considered ancient by the inhabitants of the Northwest District, it has been called the "Old Lancaster Road," and hence may have been considered by some to be the only Lancaster road. The "Old Lancaster Road" passed out of Sudbury some distance south of the new one, and is that mentioned in connection with the laying out, apportionment and location of the "New Grant" lots. As the "New Lancaster Road" is in-

tersected at Sudbury Centre by a way that led to the Hop Brook grist-mill, or Noyes' mill, at South Sudbury, the settlers of this district would naturally go to mill by this way before the erection of a mill nearer by. A highway that early passed diagonally through the Sudbury part of Maynard is what was known as the "Old Marlboro' and Concord Great Road." This was a much-travelled highway in the last quarter of the last century. At its intersection with the New Lancaster Road stood the Old Rice Tavern; and along its course a little to the northerly were some of the old estates of the district. As the Northwest District developed, short ways were provided for it by the town. Between 1725 and 1750 mention is made in the records of a way from "Honey Pot Brook through Jabez Puffer's land." The "Thirty-rod highway," going northerly, passed a little easterly of the Rice tavern; and it is not improbable that the North road, by the Balcoms, is a part of that ancient landmark. It is supposed that the east "Thirty-rod highway" reached the town's northerly boundary at or near the powder-mills, by Acton and Concord Corner.

Bridges.—The first record of which we have any knowledge concerning a bridge in this territory is of date Dec. 14, 1715, when the town of Sudbury voted that "there be a horse bridge built over Assabeth River, . . . and that the selectmen do order that y^e bridge be erected and built over Assabeth River, between y^e land of Timothy Gibson's and Thomas Burt's land." The first bridge was probably the Lancaster road bridge, and known as the Dr. Wood's Bridge. It stood on or by the site of the present bridge near the Whitman place, not far from the entrance of Assabeth Brook. The bridge next east is the old Fitchburg road or Haman Smith Bridge, and was built about seventy-five years ago. The next is the Jewell Mill's Bridge, and was probably built to accommodate the mills. The Paper Mill Bridge was built a little more than half a century ago. It is supposed that previous to its erection the river was crossed at that point by a fordway. The road connected with this bridge was laid out by the county commissioners about the time the bridge was made.

Grist-mill.—The first grist-mill was near the present Brooka place. It has had several owners, among whom are Gibson, Jewell and Smith. A saw-mill has been connected with it; and thither the inhabitants carried their saw-logs and corn in those early years, when "to go to mill" was quite an event to the homestead. At the mill and the inn the inhabitants of the hamlet gossiped and gathered the news, as well as procured household supplies. The bread of those days was made largely of rye and Indian meal, wheat being but little used as late as the beginning of the present century. This main reliance on meal made large demands on the mill, and from long distances the grists were brought in a rude cart or on horse-back. Thus this mill was an important place, and although an humble structure in comparison

with the large factories that stand to-day near by, it was very essential to the comfort of man and beast.

CHARACTER OF THE SETTLERS.—Notwithstanding this section was for a time so isolated, its influence was felt throughout the towns to which it belonged, and it furnished some of their best and most trustworthy citizens. In Sudbury the name of Balcom, Rice, Smith, Puffer, Brigham, Vose, Maynard and others have been on the list of the town's official board; while in Stow, the Gibsons, Whitneys, Browns, Conants, Smiths and others have been well-known and substantial citizens. On the Sudbury muster-rolls of the French and Indian and Revolutionary Wars, names long familiar in the Northwest District are common. In a list of fourteen Sudbury men, who were in the campaign for the capture of Louisbourg at Cape Breton, the name of Balcom is given four times. Four brothers enlisted in the closing campaign of the last French War, and were in or about New York in 1760, viz.: Joseph, Jr., Simon, Moses and John Balcom. The first two served as soldiers; Moses, at the age of eighteen, was detailed for duty as a boatman on the Mohawk River to forward army supplies to the front; John, aged sixteen, was employed as a teamster; Simon died in the army of fever, at the age of thirty-one; Joseph took the small-pox on returning home and died. His father and one child took the disease from him and died also. They were buried about the centre of the plain, on the farm of Lewis Brigham. The names of Sudbury men in the companies of Capts. Samuel Dakin, John Nixon and Josiah Richardson, who were in the Canada campaign of the French and Indian War, which are associated with the Northwest District are Eveleth, Puffer, Maynard, Skinner, Wetherby, Brigham, Balcom, Rice and Willis. These names repeatedly appear with different Christian names, indicating how well this territory was represented in those old wars. As the territory of Maynard was taken from two towns in which a patriotic spirit prevailed in the Revolutionary War, it is safe to assume that its inhabitants bore their full share in that protracted struggle.

Sudbury had five companies, two of which were from the West Precinct, and Stow had two in the engagement with the British on their retreat from Concord, April 19, 1775. On the Sudbury muster-rolls of the west side militia and minute companies, the name of Maynard is given five times, Rice five, Puffer five, Brigham four, Willis four, Smith three and Balcom two. It was stated by one who was a Sudbury citizen and soldier in the Revolutionary period that "to the honor of Sudbury" there was not a "Tory" to be found in the town. In the Great Civil War Sudbury and Stow did their full share of service. Sudbury furnished one hundred and sixty-eight men, which was over and above all demands, and appropriated and expended on account of the war, exclusive of State aid, \$17,575. It had a population in 1860 of 1691, and a valuation of \$1,052,778.

Stow furnished for the Union Army one hundred and forty-three men. Several soldiers from each of these towns lost their lives in their country's service. Not only were the former inhabitants of the Maynard territory influential in town matters and well represented in military service, but some of them exerted an influence which was largely felt in the formation of the town of Grafton, in Worcester County. The land of the Grafton township, which contains 7500 acres, was purchased of the native proprietors upon leases obtained of the General Court, May, 1724. The petition asking the privilege of making the purchase was presented by a number of citizens, principally from Marlboro', Sudbury, Concord and Stow; and the petitioners sought leave "to purchase of the Hassanamisco Indians land at that place." In the Indian deed concerning the territory, among other specific declarations is the following: "To Jonathan Rice and Richard Taylor, both of Sudbury in the County of Middlesex aforesaid, husbandmen, each one fortieth part thereof . . . to them and their respective heirs and assigns forever." After the purchase of the territory and the establishment of the plantation, those who composed the company laying claim to the territory held proprietors' meetings, more or less of which were at the house of Jonathan Rice in Sudbury. Their records and proceedings show the prominent part taken by Sudbury citizens in the formation of the township. A few specimens of these records are as follows: "At a meeting of the Proprietors of the common and undivided lands in Hassanamisco, holden in the house of Jonathan How in Marlboro', April, 1728, Mr. Jonathan Rice was chosen clerk for the Proprietors to enter and record all votes and orders from time to time as shall be made and passed in said Proprietors' meetings." "July 9, 1728. The Proprietors held a meeting at Sudbury, at the house of Jonathan Rice, and chose a committee to take charge of building a meeting-house." "Jan. 6, 1730. At the house of Jonathan Rice, voted to lay out 3 acres to each Proprietor 30 acres of land for the third division; voted to raise seven pounds of money on each Proprietor for the finishing of the meeting-house and school-house."

In the appointment of committees for important business Sudbury was creditably represented. The committee chosen "to take a survey of the plantation of Hassanamisco, and find out and stake the centre plot of the plantation," were Captain Brigham, of Marlboro', John Hunt, of Concord, and Richard Taylor, of Sudbury. Jan. 16, 1734, it was voted that Col. John Chandler, of Concord, and Jonathan Rice, of Sudbury, should be "a committee to make Hassanamisco a town."

In the work of securing church privileges and a meeting-house for the inhabitants of the west side of Sudbury, at the place called Rocky Plain, the indications are that the Northwest District had an important influence. After the first petition sent to the General

Court, which petition has been noticed and given, a committee was appointed at a town-meeting to protest against the west side petition. After hearing both the petition and remonstrance, the committee returned a report, May 13, 1708, which was in substance that they considered "the thing was necessary to be done, but their opinion is that now, by reason of the [grievous] times, not so convenient."

But the petitioners were not to be baffled by an answer like this. Accordingly, again they presented their case by another petition, dated May 26, 1708-9. This second petition sets forth the case thus:

"The Humble Petition of Several of the Inhabitants of the town of Sudbury, on the west side of the River.

"To Court session assembled May 26th 170⁸/₉ sheweth that your Petitioners lately by their Petition to the Great and General Assembly, represented the hardships & Difficulties they Labored when by reason of their distance from the meeting house and the difficulty of getting over the water and Some times Impossibility, there being three hundred and sixty five on that side and sometimes in the winter not one of them can possibly go to meeting, the East and West sides are Equal in their payments to the minister and therefore praying they might be made a Precinct and have a meeting house and minister of their side of the River, whereupon the petition was referred to a committee who upon Consideration of the premises (as your petitioners are Informed) have made a Report to this Great and General assembly that the thing was necessary to be done, but their opinion is that now by reason of Troublesome Times not so Convenient.

"Your [Petitioners] thereupon humbly pray that this great and General assembly would please to Grant them the Prayer of their Petition, that they may be Empowered to build a meeting house and have a minister settled on their side, in each time as to this Great and General Assembly shall seem meet and Yo^r Petitioners (and as in duty bound) shall pray,
JOHN BAIGHAM, JOHN DALCOM. In behalf of ye rest."

The parties whose names are signed to this petition are, we infer, men from the north west part of the town, and the fact that they thus head the list of persistent petitioners, leaves room for the fair conjecture that it was from this territory to a large extent, that a very strong influence went forth for the formation of the West Precinct of Sudbury.

The early inhabitants of the Maynard territory depended for a livelihood largely upon the products of the soil, for which the country was fairly suited. On the Sudbury side were extensive woodlands upon which some of the heaviest timber in the State has been produced. On the Stow side were good farming lands, and the land in the neighborhood of Pompsaticutt Hill was good for pasturage and tillage. But, as in every community where pasturage and tillage is depended upon, there was need of industry and economy. These traits prevailed. The families in early times were large, and as each household gathered about the kitchen hearth they made almost a little community of themselves. When a neighborhood gathering was needed for the transaction of business, a favorite place was the inn, and at the old Rice Tavern public business has doubtless many times been planned and discussed. Along the early years of the eighteenth century, meetings were held there relative to the adjustment of land matters, as indicated by the following:

"We the Subscribers and present owners of the New Grant lots in

Sudbury, and as we think and imagine, Proprietors of the two miles of land late granted to Sudbury by the General Court, called the New Grants, we humbly petition your honors to grant us a legal meeting as the law directs, to be at the House of Jonathan Rice, in said Sudbury, inholder, To do or act what may be lawful and needful when met in order to defend said grant of two miles, and every other legal act as Proprietors,

"JOHN CLAP,
"JAMES HAYNES,
"EPHRAIM PRATT,
"JOHN DALCOM,
"THOMAS SMITH,
"JONATHAN RICE,
"AMOS SMITH,
"JOSEPH DALCOM,
and sixteen others."

For years after the settlement of the district there was no commercial centre; but in process of time the water-power of the Assabet River began to be used for manufacturing purposes, and a hamlet or village was commenced.

About 1821 or 1822 a part of the water-power formerly used by the Jewell Mills was employed by James and William Rice for the manufacture of spindles and other kinds of factory machinery for the Smith Mills, at Peterborough, N. H., and the factories at Waltham, Mass.

Near Jewell's Mills, over the river, a saw-mill once stood; and on a brook by the Daniel Puffer house was another saw-mill, which mill was connected with the farm. This mill, because of the small water-power, ran very slowly, so the people used to start the machinery and then go to other work, and when the saw had run its course it would stop of itself.

In 1845 the water-power that up to 1822 had been used for the grain mill, and which had also been used for the manufacture of machinery, was sold to Amory Maynard and William H. Knight, who was formerly connected with the Saxonville Factory. In July, 1846, the Assabet Mill Works were commenced. The dam was built and a canal dug, turning the water from the original channel into a reservoir. The dam was completed, a building erected, and work begun on the mill by the spring of 1847; and carpets and carpet yarn to the value of \$110,000 were made the first year. On September 10, 1862, the "Assabet Manufacturing Company" was formed, with T. A. Goddard, president, and T. Quincy Browne, treasurer.

From the very commencement of the manufacture of woolen fabrics in Maynard the business has proved a success. As it has developed, new buildings have been erected, until they now cover not far from two acres of ground; are four, five and six stories in height, and have a floorage of nearly ten acres. From six to seven millions of bricks were required in their construction. There are water-wheels having a united capacity of 800 horse-power, and four powerful engines with a total capacity of 700 horse-power. The average consumption of coal for steam purposes is, in round numbers, 500 tons a month, or 6000 tons a year. The consumption of wool in the grease is 15,000 pounds per day or 2347 tons a year. The num-

ber of employees has increased from one in 1846 to one thousand, one-fourth of whom are females. One-eighth of the whole number of employees are under sixteen years of age. Improvements in machinery have from time to time been made, resulting in a marked increase in the productions of the mills or a reduction in the number of employees. There are now sixty-five sets of woolen machinery, embracing three hundred and thirty fancy broad looms. The value of the mill property, which in 1847 and 1848 amounted to \$150,000 has increased to \$1,500,000.

From 1777 to 1800, Abijah Brigham had a blacksmith's shop in the easterly part of the district; and nearly a century ago a tavern was kept at the Levi Smith place. One of the first establishments for the storage of ice was in the Maynard territory. The business was carried on by Nathaniel Wyeth. It was established about 1850, and modern machinery was used in the work. At one time there were two cider and vinegar manufactories, but this business has nearly ceased in the town of Maynard. A paper-mill was erected in the Maynard territory about 1820, by William May, for the manufacture of paper by hand. The mill subsequently passed into possession of John Sawyer, of Boston; later, it became the property of William Parker, and more recently, of his son, William T. Parker. These paper-mills have several times been destroyed by fire. They are at the present time unemployed and owned by Hemenway & Maynard.

CONGREGATIONAL CHURCH.—September 23, 1852, an Orthodox Congregational Church was organized, and called the "Evangelical Union Church." The following are the names of original members: Amory Maynard, Mrs. Amory Maynard, Haman Smith, Mrs. Haman Smith, Silas Newton, Mrs. Silas Newton, Henry Wilder, Mrs. Henry Wilder, Sybil Smith and Lydia Stone.

A meeting-house was erected in 1853, which in 1865 was enlarged.

The following are the names of those who have served as pastors with the date of service.

Mr. George W. Frost, stated supply, May, 1852, to May, 1854; Rev. J. K. Deering, acting pastor, May, 1854, to May, 1856; Rev. A. Morton, installed May, 1856, dismissed May, 1859; Rev. E. P. Tenney, acting pastor, August, 1859, to December, 1860; Rev. F. Wallace, acting pastor, December, 1860, to February, 1862; Rev. A. H. Fletcher, acting pastor, June, 1862, to January, 1864; Rev. Thomas Allender, acting pastor, March, 1864, to April, 1866; Rev. O. Hall, acting pastor, April, 1866, to June, 1867; Rev. T. D. P. Stone, installed October, 1867, dismissed June, 1870; Rev. Webster Hazlewood, acting pastor, August, 1870, to July, 1872; Rev. Edward S. Huntress, acting pastor, December, 1872, to March, 1874; Rev. P. B. Shiere, acting pastor, September, 1874, to April, 1876; Rev. S. S. Mathews, acting pastor, May 1, 1876; Rev. C. E. Milliken, January 1, 1879, to July 1, 1882; Rev. Edwin Smith, September 15, 1882, to August 1, 1886; Rev. David H. Brewer, October 15, 1886, to present time.

A Sunday-school was organized in 1851, with about thirty scholars. A. Maynard was its first superintendent. The following are the names of persons who have served as deacons:

Amory Maynard, chosen 1852; Lorenzo Maynard, 1862; Joseph Adams, 1866; Charles B. Stewart, 1868; Isaac Stott, 1871; William H. Gutteridge, 1877; Ezra S. Tarbell, 1888.

METHODIST CHURCH.—February 2, 1867, a meeting was held in the Nason Street School-house, at which a committee was appointed to solicit subscriptions for the support of public worship after the forms and order of the Methodist Church.

A liberal response was made to the call, and measures were taken which resulted in occasional preaching in the school-house by neighboring Methodist ministers.

A committee was appointed the following March to lease Union Hall for the ensuing year, and June 22d a Methodist Church was organized, consisting of seven members.

In 1870 Union Hall was purchased, and Sabbath services have been held there since. The society has been somewhat feeble and small, but has held on in spite of its small means of support. The following are the names of those who have served as pastors: J. A. De Forest, L. P. Frost, John S. Day, M. A. Evans, A. Baylies, A. C. Godfrey, G. R. Best, G. W. Clark, B. Bigelow, W. Wignall, C. A. Merrell.

ROMAN CATHOLIC CHURCH.—There is in Maynard a Roman Catholic Church called St. Bridget's, which is connected with quite an extensive parish, and has a fine house of worship.

Steps which resulted in the formation of this church were instituted not long after the place began to develop as a considerable factory village. For a time the Roman Catholic element in the town was administered to by Reverends Maguire and Farrell, of Marlboro'. A little later Rev. John Conlon, then a resident of and pastor of the church in Marlboro', commenced service among the Catholic population of Maynard; and by his effort a chapel was built there in 1864. He was succeeded by Rev. O'Reilly, whose service continued from January, 1871, to March, 1872, when Rev. Brozuahau became his successor, and resided in the town from March, 1872, till March, 1873, at which time he moved to Concord, and St. Bridget's became an outlying mission of this latter place, Rev. Brozuahau having charge of both parishes until January, 1877. The present pastor is Rev. M. J. McCall, in connection with whose services the present church edifice was built. Work on the structure began as early as 1881, and was rapidly carried forward. It was dedicated in 1884 by Archbishop John J. Williams, of Boston. The building is quite large and commodious, and at the time of its completion was considered one of the finest church edifices in the vicinity, and is at the present time the largest public building in Maynard.

The territory of Maynard was set off, and by incorporation became a new town April 19, 1871. It was named in honor of Amory Maynard, formerly of Marlboro', through whose energy and business ac-

tivity the town has developed. The town of Stow made no special objection to giving up a part of the territory belonging to it for the formation of a new town, and an agreement was made by which Maynard was to pay into the treasury of Stow the sum of \$6500 as a compensation.

The town of Sudbury opposed the separation, and, January 23, 1871, appointed a committee of three to nominate a committee of three to oppose any petition to the General Court to set off any part of the territory of Sudbury. Deacon Thomas Hurlbut, Charles Thompson, Esq., and James Moore, Esq., were nominated. The town accepted the nomination and authorized the committee to use all honorable means to prevent the formation of a new town, including any part of the territory of the town of Sudbury.

The committee chosen Jan. 23, 1871, to oppose the incorporation of any portion of the territory of Sudbury into a new town, reported April 7, 1872, that previous to any hearing before the committee of the Legislature on the petition of Henry Fowler and others for an act incorporating the town of Maynard, certain propositions were made by the petitioners as terms of separation and settlement between the town of Sudbury and the proposed new town. These propositions having been laid before the town of Sudbury, Feb. 20, 1872, the committee were given discretionary power, provided they accept of no terms less advantageous to the town of Sudbury than those contained in the agreement. By mutual consent a bill was agreed upon and passed by the Legislature, by which the town of Maynard was incorporated.

Subsequently, the committee were authorized to settle with the authorities of the town of Maynard, according to the provisions of their charter. They reported that they had attended to that duty, also that the proportion of the town debt, together with the money to be paid by the town of Maynard to the town of Sudbury, or Maynard's share of the stock in the Framingham & Lowell Railroad Corporation, owned by the town of Sudbury, with interest on the same, amounted to \$20,883.28, which sum was paid by them to the treasurer of the town of Sudbury.

Oct. 6, 1871, they say "they have also attended to establishing the line between the said towns, and erected a stone monument at the angle in said line near the iron works causeway, which will also answer as a guide-board, and will be kept in repair by the town of Sudbury; that they have also erected a stone monument marked S. and M., at such places as said line crosses the highway."

For years before the territory of Maynard became an independent town, there were strong reasons why it should become such. The people of Assabet Village and its near neighborhood made up a population nearly twice as large as that of either Sudbury or Stow, considered apart from this locality. It was quite a distance to the town-houses of Sudbury and

Stow, and there was no speedy means of conveyance to either place on the day of town-meeting.

The journey on election days was to be made over the rough country roads of these towns, and usually at such seasons as brought them into a poor condition.

For about five hundred men to make a journey of miles to a polling-place which was several miles distant, when a large portion of this company were living within about a half-mile of each other, was more than could reasonably be expected. A polling-place near by would allow them to attend to town business without much interference with their regular avocation, and save expense of travel.

Moreover, there was but a small community of interests between the people of the Assabet District and those of the other parts of the two towns. The one element was given to agriculture, the other to manufactures. The one element was scattered, the other concentrated. Assabet Village required street lights and sidewalks, a local police, and special school privileges. They needed town regulations adapted to their population and business.

The reasons against division were small, as these related either to the Assabet territory or to the towns to which it belonged. The strip of territory asked for would impoverish neither Sudbury nor Stow. It was well situated for the proposed division, and that the territory asked for had resources amply sufficient to warrant the proposed new town's easy support may be indicated by the following "table of aggregates for the town of Maynard as assessed May 1, 1871:"

Total number of Polls	522
Tax on Polls	\$1,744.00
Value of Personal Estate	285,790.00
" of Real Estate	716,210.00
Valuation	1,002,000.00
Tax for State, County and Town purposes, including Highway Tax	11,392.84
Total number of dwelling-houses	321
Land Taxes	3,015 acres

With such circumstances to favor it, it was only a matter of time when a separate town would be made of the territory; and that the time had come when the effort for it was made may be indicated by the success of the movement.

The town appropriately celebrated the event of its incorporation, and an oration was delivered by Gen. John L. Swift.

In 1872 the following bill was reported to the town of expense incurred:

INCORPORATION AND CELEBRATION EXPENSES.

Paid G. A. Somerby	\$200.00
John Spalding	200.00
J. B. Smith, collation	95.00
Bill for engraving map of town	40.00
Fitchburg Railroad, extra train	75.00
D. C. Osborn, for printing	4.00
Team to Sudbury and Stow	3.00
Town Clerk of Stow, for copy of warrant	50
Railroad tickets	13.50
Printing	1.50
Badges and expenses	2.65

Fireworks	34.13
Use of cannon, etc.	32.65
W. F. Woods, for entertaining lauds	30.00
Use of flags and telegraphing	10.00
B. Smith, transporting cannon	6.00
Three kegs powder	13.50
Surveying proposed town lines	12.50
J. K. Harriman, for labor	5.00
J. Valley, for team to Concord	4.00
Joseph W. Reed, for bills paid	34.40
	<u>\$18.33</u>

As the new town started forth on its first year of independence, the indications are that it made generous appropriations, and evinced a courage which gave promise of success. The following is its published "assessments for 1871 :"

For Support of Schools	\$2,000.00
Repairs of Highways	1,000.00
Incidental expenses	4,000.00
Alterations and Repairs of School-houses	2,000.00
State Tax payable to Sudbury	948.75
" " Stow	525.00
County Tax payable to Sudbury	386.25
" " Stow	214.74
	<u>\$11,074.74</u>
Overlaysings	319.11
Total	<u>\$11,393.84</u>

A disadvantage which the new town met with was its small and defective school accommodations. The following from reports made to the town by the committee for the years 1872 and 1873 may indicate the condition of things. In the report for the former year the committee state :

"THE HIGH SCHOOL.—At the commencement of last term, when the new rooms in the Acton Street School were finished, we determined to open a special school therein, requiring an examination for admission, with the hope of ultimately forming it into a high school. We admitted, on examination, thirty-five pupils, and obtained as teacher Mr. Theodore C. Gleason, of Westboro', a recent graduate of Harvard College. Mr. Gleason had had three months' experience as a teacher in Bolton. He devoted himself heartily to the work of our school, and the scholars were generally very much improved by his instruction—especially in reading and in grammar—two things in which they had been previously sadly deficient. The examination of his school, although far from being what we could wish, fully convinced us that a good work had been done. At the annual town-meeting in March we brought the matter before the town, and with great unanimity they voted to authorize the committee to establish a high school, and granted an extra appropriation for that purpose. We feel sure that the people will not have cause to regret the measure, but that they will feel abundantly repaid by the higher tone of intelligence which a high school will, in time, give to the community.

"SCHOOL ACCOMMODATIONS.—We are inclined to include under this head the accommodations both of teachers and scholars, and we regret to say that in both we are lamentably deficient.

"We would not say, as a well-known clergyman said, at one of our examinations, 'this is the worst town in the Commonwealth for a teacher to come to,' both because it is not true, and because we would not lightly give our town such a poor recommendation. We could name many towns in the Commonwealth which are worse than ours, worse in matter of salary, worse in accommodations, worse in the treatment they receive. But our town is bad enough, we confess. We are surprised that it is so difficult to find proper boarding-places for our teachers. In most towns some of the first families are open to receive the teachers, but in our town, which Mr. Elias Nason would have to be 'the model town,' a teacher can scarcely find shelter for the night; and one of our teachers has not succeeded to this day in finding a place, but is compelled to travel twenty-five miles every evening to pass the night in Cambridge. We hope in some way to see this remedied.

"Our school-houses are beginning to be too small again, notwithstanding the enlargement of last year. Our high school-room will doubtless next term be full, our grammar school is full already, and all our primary schools are a great deal more than full. When it is remembered that last term we opened two new schools, and that the increase of school attendance is likely to be greater this year than it was last year, it will be readily seen how much we are likely to be troubled for want of room. We shall be obliged to engage one, at least, and perhaps two extra teachers at the beginning of next term; and we have no room to put them in except a small recitation room.

"Before the close of another year we shall probably require all the rooms in both the centre school-houses for the classes of the primary schools; and then the grammar and high schools will be set afloat. What we evidently require is a building of commodious arrangement, situated as nearly as it conveniently can be in the centre of the town, in a healthy location, and sufficient in size and in the number of its rooms to meet the demands of our growing population, for the use of the grammar and high schools. We hope the people will consider this matter, for it is of the highest importance and will soon demand attention."

COST OF INSTRUCTION FOR THE YEAR ENDING MARCH 31, 1872.

High School, for each pupil, \$15.43	\$180.00
Main Street Grammar, for each pupil, \$9.03	360.00
Main Street Primary, for each pupil, \$5.70	342.00
Acton Street Primary, for each pupil, \$5.14	342.00
Turpike School, for each pupil, \$15.43	324.00
Brick School, for each pupil, \$6.11	216.00
Total paid for tuition during the year,	\$1770.00
For fuel and incidental expenses,	230.00
Average cost of tuition per scholar, in all the schools, for the year,	6.12

In the report of the committee for 1873 they state thus: "The law of the State declares that no more than fifty pupils shall be placed in charge of one teacher. We have been constantly compelled to break this law by giving one teacher charge of sixty,

seventy and even seventy-five pupils. Three of our schools have now sixty or sixty-five pupils each—fifteen more than the number allowed by law, and the difficulties in this respect are constantly increasing.

"The committee have now no remedy, for our school-rooms are all crowded, the last available room having been recently fitted up for a small class of twenty-five—being all that could be crowded into it. It is becoming more and more apparent that we must soon have a new building. We would not urge such an expensive matter upon the town one moment sooner than we think it becomes absolutely necessary, but it will not do to ignore the fact that, at the beginning of next term, or next fall, at the farthest, we shall doubtless be obliged to form another school, and shall have no place in which to put it, except by the costly arrangement of hiring and furnishing some public or private hall.

"Perhaps the most difficult problem to be solved, in relation to our schools, is what shall we do with the

"FACTORY SCHOLARS" who throng the schools at the commencement of every term, barely remain the full twelve weeks required by law, and then, as they have just begun to know their duties as scholars, and to make some progress in knowledge and behavior, they are taken away and their places are filled by another fresh company, to require of the teacher the same hard task of smoothing, polishing and civilizing as before. It is easy to see how injurious this must be, what an obstacle to the success of any scheme for improvement. This is particularly noticeable in the Grammar school. From carefully prepared statistics of this school, we find that it has had 133 regularly acknowledged pupils, actually belonging to it during the whole year, whereas, the largest number who have attended at any one time was sixty-four,—less than one-half. Of these 133 pupils, there are only nineteen who have attended more than twenty-four weeks; only nineteen in addition have attended more than twelve weeks, and there are ninety-five of them who have attended only twelve weeks, or less. No one can appreciate the difficulties of making any real, thorough progress in that school, without considering these facts, and whoever will carefully consider them will be inclined to wonder how the school can make any progress at all.

"The High and the Primary schools, also, suffer from the same cause. It would seem that it ought not to be so in the Primary schools, which are calculated only for three years of the child's life, but, it is astonishing how eagerly parents press their young and tender children into the service of the factory; they give the agents and overseers no rest until they admit them, and then they are in for life. We cannot think it absolutely necessary that these parents should force their children into the hard struggle of the world so very young.

"By the kind co-operation of the factory agents and overseers, we have been enabled to inaugurate a

system of certificates, whereby we can perform our duty, in seeing that all children, between twelve and fifteen years of age, attend school, at least, the twelve weeks required by law. But, the law still further requires that all those between *ten* and *twelve* years shall attend at least, eighteen weeks, and that those under *ten* shall not be employed in the factory at all. We hope, with the same kind assistance, to be able to extend our arrangements so as to include these latter cases, and thus obey all the law, as all good citizens ought. At that age they will generally have secured a Primary school education, and Christian charity should dictate that they have so much, at least, to fit them for the struggle for life.

"These considerations should impress upon us, more and more, the importance of more perfectly systemizing and improving our Primary schools, since they are the only ones, the benefits of which, there is any hope that a large class of the children of our town will ever reap."

As the years advanced improvements in the schools went forward, and at the present time Maynard has very good schools, consisting of the usual grades from the High School to the Primary Department. The total school expenditures for 1889 were \$6270.42.

An evening school has recently been established, which has been well attended, having at the outset nearly one hundred scholars. This is an important institution for a manufacturing community like that of Maynard.

The amount paid in teachers' wages for the year 1890 was \$4820.20. This was distributed among twelve teachers. The principal of the High School receives a salary of \$1000 per annum; the highest paid to others is a little less than half this sum.

PUBLIC LIBRARY.—There is in Maynard a Public Library containing 3120 volumes, the most of which are in good condition. In 1889 the sum of \$300 was appropriated for its support, and \$559.07 were expended for it; the excess in expenditure being made up of the dog-tax, fines and a balance of the previous year. The place has two hotels, various stores and the usual accompaniments of a thriving manufacturing village of New England. The population is about 3000. It is mostly made up of Irish, English and Scotch, the American element being in a minority.

The thrift of the town is largely dependent upon the prosperity of the Assabet Manufacturing Company. A large share of the houses are the property of it, and occupied by its employees. Many of the homes, however, are owned by the industrious, economical inhabitants, who, from their daily earnings, have in process of time laid by sufficient to purchase for themselves a home. The prosperity of the place since it was set apart as a town has been gradually progressive, and improvements for the public good have from time to time been made. The population is nearly a third more than it was twenty years ago.

In 1888 there were registered in town fifty deaths, seventy-eight births and thirty marriages. Of those who died, eight were at the time of death seventy years old or upwards, the oldest being seventy-eight, while ten were less than ten years of age. •

CEMETERIES.—The town has a well-kept cemetery, called Glenwood Cemetery. It is situated at the junction of the Acton and Fitchburg highways. The first burial was of the body of Thomas H. Brooks in 1871, in which year the ground was laid out. At various times the place has been beautified by the planting of trees and shrubbery.

Adjoining the cemetery, at the northerly corner, is a substantial tomb owned by A. Maynard. It is situated upon a piece of land of about one-half acre in extent, which is surrounded with an iron fence.

A little easterly of the town's cemetery is the Catholic burying-ground. It is situated on the Fitchburg highway, and contains many substantial monuments and stones.

The Marlboro' Branch of the Fitchburg Railroad passes through the town, and affords good facilities for travelling and the conveyance of freight.

In Maynard are the following organizations: Masonic Lodge, Good Templars' Lodge, Grand Army Post, I. O. O. F. American, I. O. O. F. Manchester Unity, Royal Society of Good Fellows, Iron Hall, Royal Arcanum, and Royal Arc.

BIOGRAPHICAL.—*Amory Maynard*, from whom the town took its name, was a son of Isaac and Lydia (Howe) Maynard, and was born in the northeasterly part of Marlboro' Feb. 28, 1804. The education which he obtained in the public schools was quite limited, he having ceased attendance upon them at the age of fourteen.

For a time in early life he worked on his father's farm, but was more largely occupied in his saw-mill, which was situated on a stream that it is said "forms the channel of that basin of water known as Fort Meadow, in Marlboro', at a point where the road from Rockbottom to said town crosses the stream."

When Amory was sixteen years old his father died, and the son took charge of the property. Instead of selling the saw-mill, he did that which, perhaps, few lads of his years would have undertaken, or could have so successfully carried out, which was to take the responsibility of conducting the business alone.

This he did in a way to do credit to an older and more experienced person. So successfully did he manage the property that it increased in value, and the business gradually developed. For about a quarter of a century he carried on the lumber business connected with the mill. During this period he became widely known as a builder. He erected various houses in the neighboring towns, and at one time employed over fifty workmen.

Under his supervision were erected the New England Carpet-Mills.

In 1846 an act was passed by the Legislature

authorizing the city of Boston to take water from Long Pond in Wayland and Natick, and the act conferred the right to construct a dam at the outlet. This action prevented the further use of the waters of Long Pond as an unlimited or unobstructed mill-power at the carpet factories of Saxonville, in the town of Framingham, and work at these places ceased. Mr. W. H. Knight, the owner, conveyed by deed to the city of Boston all his right and title to Long and Dug Ponds, and the land about them, which he had purchased of the Framingham Manufacturing Company, and others, which consisted, besides the water privilege and several dwelling-houses, of three factory buildings, all which property amounted to \$150,000. Two of the factories were burned March 20, 1847.

A joint partnership was then formed between W. H. Knight and Amory Maynard for carrying on the carpet business at what is now Maynard. The company was formed in 1846, and the same year Mr. Maynard went to reside in the place, and occupied the dwelling-house of Asa Smith. A factory was soon erected, which was one hundred feet long by fifty feet wide, and supplied with machinery for the manufacture of carpets and carpet yarn. Success attended the new partnership, and by the vigilance and thrift of such ownership, the business increased and became firmly established.

In 1861 and 1862 the first brick factory was erected, and there was commenced at the same time the manufacture of flannel blankets of about fifty kinds. From that time the business has steadily developed.

When Mr. Maynard went to the Assabet territory there were but few houses in the locality, among which were those of Wm. Smith, Benjamin Smith, Abram Smith, Dexter Smith, Aaron Thompson, Wm. Parker, Paul Litchfield, Ephraim Randall, Silas Brooks and Isaac Maynard. About the time of his arrival in the place as a permanent resident he began to purchase land, and from time to time added to his purchases until he became the owner of several hundred acres. For twenty years Mr. Maynard lived on Main Street, in a house opposite the main entrance to the factory. His last residence was at the homestead on the hill, to which he moved in 1873. Such is the business career of this prominent manufacturer.

The simple story is that the business commenced by Knight & Maynard in 1846, on the quiet banks of the Assabet River has in less than a half century developed from a property value of \$150,000 to a corporation holding property to the amount of \$1,500,000. As a result of this enterprise there has arisen a new town with thrifty commercial, social and moral influence, and affording the means of a livelihood to hundreds of people. A few years ago the following statement of Mr. Amory Maynard was published in the *Boston Herald*:

"Among the guests who registered at Thayer's hotel, Littleton, N. H.,

Saturday afternoon, is the name of Amory Maynard, Esq., the widely known agent of the Assabet woolen mills at Maynard. The only peculiar fact connected with this gentleman is that the vacation he is now enjoying is the second one only that he has taken for over half a century, his first and only other one being spent in this same vicinity, the second week in August, 1822, when he drove in a wagon, alone, from his native town of Marlboro' the distance being some two hundred miles, and the time consumed in the journey being four days. At the time Mr. Maynard was eighteen years of age. Since then he has established the largest strictly woolen mill in the country. Nearly all of his time has been spent in travelling in the capacity of purchasing agent and salesman."

Mr. Maynard was not so absorbed in his mercantile business as to be unmindful of matters of a moral and religious concern. He and his wife were original members of the Evangelical Union Church of Maynard, and gave liberally for its support. Mr. Maynard died at his home March 5, 1890. He retained full possession of his faculties until his eightieth year, when he became enfeebled by a stroke of paralysis, from which he never wholly recovered. His death was the result of an accident which occurred a short time before his death, when he was found in an unconscious condition at the foot of a stairway. Being left for a short time by himself, it is supposed that he attempted to go up-stairs, when his limbs failed him and he fell. The funeral took place March 8th, and the following description of the event was published in the *Boston Herald* of that date :

"MAYNARD IN MOURNING.

"Funeral of Its Founder and Most Prominent Citizen.

"MAYNARD, March 8, 1890. This thriving village has to-day worn a funeral aspect, and well it might, for all that is mortal of Amory Maynard, the founder of the town, as well as its' most conspicuous local figure for a long period of years, has been consigned to mother earth. Everywhere about the town emblems of mourning have been noticed. In fact, the praises of Amory Maynard are in every one's mouth, and nowhere were more evidences of esteem shown than among the hundreds of operatives who have for many years had reason to regard this venerable and worthy citizen as their friend. The mills of the Assabet Manufacturing Company, which were started by Mr. Maynard, and at the head of which concern he had so long been placed, were closed during the afternoon. All the places of business wore a Sabbath aspect from 1 till 4 o'clock, out of the respect entertained for the deceased. The private service occurred at the family residence on Beechmont, where prayers were offered. In the Congregational Church, with which Amory Maynard had been identified ever since its organization, the public funeral services occurred, and the structure was filled to overflowing. Among those who came to offer the last tribute to their friend's memory were a great many of the employes of the mills. As the funeral procession entered the church, Rev. David H. Brewer, the Congregationalist pastor of Maynard, read passages of scripture. In his remarks he traced the career of this remarkable man from the time when he started, a poor boy, in the neighboring town of Marlboro', until he had obtained that degree of success in a business way which had enabled him to found one of the leading towns of this commonwealth. The singing was by a selected quartet, composed of local talent. The closing selection was 'God be with us till we meet again.'"

Old business associates from New York, Boston and other localities were present at the funeral services. The remains were taken for their last resting-place to the beautiful family tomb at Glenwood, which Mr. Maynard constructed years ago.

NATURAL FEATURES.—The scenery of Maynard is beautiful, and perhaps unsurpassed in this part of the State. It has a good variety of objects, each of which

adds a charm to the diversified surface, and contributes something to the beauty of the landscape.

There are the streams, hills, forests and dales; while here and there the little brooklets sparkle and flash as they speed on their way.

Green pastures stretch out in acres of luxuriant grass, verging in some places to the broad, smiling meadow-lands, and in others reaching up the hill slopes to the very top. Upon these fields herds of cattle find bountiful feed, and by them the town is supplied with rich dairy products. About 100,000 cans of milk have been raised in Maynard in a single year. A large share of this is consumed in the place; but within a few years as many as 40,000 cans have been sent to the Boston market. Not only is the country suited for grazing, but for farming purposes in general.

The near proximity of a central village, whose population is so given to mill interests, affords opportunity for the market gardener to vend his produce to ready and substantial customers, and furnishes, on the other hand, safe patrons to the Maynard shopkeepers for the disposal of their dry-goods and groceries. Maynard has thus become a small commercial community of itself, dependent to an extent upon its own resources for thrift; and combines in an excellent measure those substantial elements that make up the thriving manufacturing town of New England.

THE ASSABET RIVER.—A prominent feature of the town's scenery is the Assabet River, which takes a winding course through the territory. It enters Maynard by the Dr. Wood's Bridge, and passes along what may be termed the smaller Pompositicut Hill to the mill dam. At this point its waters are turned from their original course into an artificial channel, and conducted to the mill pond, where they afford power for the factories.

The pond helps make a fine village scenery. Like a little lake in a park, it is alike for the benefit of rich and poor, as they gaze on its surface on a hot summer day, or watch it sparkle and flash in the sun's rays in the early spring or late fall.

In winter it is a place of amusement for the many merry school children as they skim over its frozen surface with skate or sled. Beyond the factories, the waters speed on their unrestrained course to the now unused paper-mill, and from thence pass on to be again turned for a mill purpose.

Perhaps few streams of its size have in so short a distance furnished power for purposes more dissimilar in character than this. Near its entrance to the town it turns aside for the manufacture of cloth; and by the aid of the highly-improved machinery of the "Assabet Manufacturing Company" and the skilled workmen who use it, some of the best woolen fabrics of America are produced. A little easterly it once moved the machinery of a paper-mill, which at one time furnished the material for one of the leading daily newspapers of New England, while just beyond

its exit from the town it affords power for the manufacture of gunpowder.

POMPOSITTICUT HILL.—Another prominent feature of its scenery is Pompositticut Hill. This, like the river along one of whose spurs it flows, is a well-known landmark. As before noticed, it was a prominent place of rendezvous for the Indians in the early times, and it is to-day a favorite resort for lovers of fine views, and much frequented both by the townspeople and others.

The hill is about 250 feet above the river, and situated westerly of the village. It is mainly used for pasturage. On one portion are a few acres which have a young wood growth, and scattered over other parts are still standing a few specimens of the old "pasture oak," which may have stood there when the place was the "town's common land," or when possessed by "ye ancient hereditary Indian proprietors." The "Reservoir" is on the summit; and from this point extends a magnificent view, dotted by a great variety of objects, and in some directions uninterrupted for several scores of miles. To the northwestward are the far-off hills of New Hampshire. Old "Monadnock" towers upward with its massive rock-crowned summit as a lone sentinel above its fellows.

In this State "Wutatic," in Ashby, and "Wachusset," in Princeton, stand out as familiar hill-tops, which are first to whiten with the early snows. To the easterly are the hills of Wayland and Waltham, prominent among which, in the latter place, is "Prospect Hill." To the southerly, in Sudbury and Framingham, is "Nobscoot." The view of the intermediate country is grand. It outstretches in places like acres of vast intervals covered with herbage and forest. Interspersed over the beautiful prospect are villages, hamlets and fruitful farms, threading among which are winding highways and streams.

Southwesterly is Marlboro', Westboro' and Southboro'; southeasterly, Sudbury Centre, South Sudbury and Wayland; while Lincoln is near by on the east; and to the northeasterly is Concord; and to the northerly is Acton with its Davis monument, and various villages.

Nearer, and almost at the very hill's foot, is the smiling and busy village of Maynard.

Prominent in the place is the tall factory chimney and factory buildings, while about them are scattered clusters of comfortable cottages and tenement-houses, and upon the high land adjacent is the former residence of Mr. Amory Maynard, the chief founder of the village, and his son, Lorenzo, the present agent of the Assabet Mills. These latter residences, are beautifully situated, surrounded by a grove of beech, oak and maple trees, while upon the grounds are a choice variety of shrubs and flower-bearing plants.

Pompositticut Hill has the more gradual slope to the north and west, and upon these sides are excellent orchard and plow-lands. On the south side

is a fertile valley and many broad acres of fine pasturage.

Beside the prominent landmarks now mentioned there are lesser objects of interest and beauty, and all together give a pleasing variety, which makes Maynard and the vicinity one attractive alike to the man of business, to those seeking the retirement of a quiet rural retreat, and to the farmer and transient traveler.

CHAPTER XXXIX.

STONEHAM.

BY WILLIAM B. STEVENS.

DURING the year 1620 if a white man could have stood upon the summit of Bear Hill a grand and lovely view would have stretched out before him. Turning his face to the east, he would have beheld the rays of the sun gleaming along the waves of the Atlantic. With his back to the ocean, the murky lines of Wachusset and Mt. Monadnock would have traced their forms on the western horizon. Three or four miles to the south, upon the shores of the Mystic, he would have seen the late habitation of Nanepshemit, chief of the Pawtuckets. Beyond the Charles was Shawmut and the dominion of the Massachusetts. At his feet he might have noticed an Agawome or a Naamkeek paddling his canoe over the picturesque waters of Spot Pond. On the plains to the north he might perchance have discovered fields of Indian corn breaking the sweep of continuous forest, and detected here and there smoke rising over the fields and above the wigwams, but he could have discerned no trace of civilized habitation. Captain John Smith and a few navigators had sailed along the eastern shores of Massachusetts, but no explorer had penetrated so far into the interior. Through the primeval wilderness was seen only the track of the savage. The history of all the past was buried in oblivion, and yet for ages these hills and valleys had been peopled by a race so primitive and barbarous that they have left behind them hardly a trace of their existence. As the plough turns up the earth, the farmer occasionally discovers the head of a spear or an arrow-head. Sometimes the rudest kind of a stone implement is found, and just beyond the eastern limits of the town, in Melrose, extensive heaps of arrow chips constitute about the only memorial in the immediate neighborhood left behind them by the warlike aborigines.

Prior to 1632 there is no evidence that any portion of Stoneham had been visited by a European, but on February 7th of that year the following record of a visit by Governor Winthrop has been preserved :

"The Governor, Mr. Nowell, Mr. Elliott and others went over Mystic River, at Medford, and going North and East among the rocks about

two or three miles, they came to a very great pond, having in the midst some Islands of about one acre, and very thick with trees of pine and birch, and divers small rocks standing up in it, which they therefore called Spot Pond. They went all about it upon the ice, from thence towards the Northwest about one-half mile, they came to the top of a very high rock, beneath which, towards the North, a goodly plain partly open land and partly woods, from which there is a fair prospect, but it being then close and rainy, they could see but a small distance. The place they called Cheese Rock, because when they went to eat somewhat they had only cheese, because of the Governor's man forgetting for haste to put up some bread."

This must have been the north part of Bear Hill. Very generally the early towns of Massachusetts were of large territorial extent. The original settlement often served as a nucleus from which radiated other settlements, the inhabitants spreading out through the wilderness, forming separate communities, and gradually organizing into independent towns. These communities, in many instances, were separated from each other by long distances, with no means of communication between them but by an Indian trail or the rude path of the forest. This was true of Charlestown, which, within a few years after its settlement, included Woburn, Malden, Stoneham, Burlington, Somerville and Melrose, a large part of Medford, and a small part of Cambridge, Arlington and Reading. Woburn, including Burlington, was incorporated in 1642; Malden, including Melrose, in 1649, and Stoneham in 1725. Charlestown was settled in 1629 and '30, so for almost a century she embraced within her limits the territory comprised within this town. The early settlement of Charlestown having been made between the mouths of the Charles and the Mystic, it soon became a matter of great importance to extend the boundaries and fix the limits, which was done by negotiations with the Indians, and by grant from the General Court. July 2, 1633, the Court granted "Mistick Side" to Charlestown, ordering that "the ground lying betwixt the North (Malden) River, and the creek on the north side of Mr. Maverick's and up into the country, shall belong to the inhabitants of Charlestown." But this grant does not say how far up into the country the limits of the town shall extend, and so on March 3, 1636, another order was more definite: "Ordered that Charlestown bounds shall run eight miles into the country from their meeting-house, if not other bounds intersect, reserving the propriety of farms granted to John Winthrop, Esq., Mr. Nowell, Mr. Cradock and Mr. Wilson, to the owners thereof, as also free ingress and egress to the servants and cattle of the said gentlemen, and common for their cattle on the back side of Mr. Cradock's farm." May 13, 1640, on petition of the town, an additional grant was made "of two miles at their head line, provided it fall not within the bounds of Lynn Village (Reading), and that they build within two years." So it appears that as early as 1640 all the territory afterwards embraced within the limits of Stoneham formed part of Charlestown, although it contained at this time not a single white inhabitant.

In 1653 an order was passed by the selectmen "that no inhabitant of the town or any other town shall under any pretence whatever fell or cut down any trees upon the Common without the neck, or the Common beyond Mistick Pond within Charlestown bounds, or the Common on Mistick side belonging to Charlestown, without first acquainting the selectmen therewith, upon the forfeit of what the selectmen shall see meet, who are to judge according as they are to conceive of the offence."

Prior to 1658 all the territory at Mistick side afterwards comprised within the bounds of Stoneham was owned by the inhabitants of Charlestown in their corporate capacity; but this year it was divided among them in severalty. A committee had been appointed to make the division, and on the 13th of February, 1657, they made the following report:

"The returne made by those brethren that were deputed by the inhabitants of Charlestowne for the propounding of a way for dividing their town's land on Mistick syde into Commonage, as also, the dividing of the wood and tymler that each inhabitant may have in his proportion. After some debate spent, and tyme in the consideration hereoff, all the committee unanimously concurring therein doe present this as their advice unto the sayd town. Imprimis; that every head rated in the cuntry rate be vallowed at twenty pounds. 2. That all women, children and servants that are not rated in the cuntry rate in regards of their heads, that every two of them be vallowed at the like proportion, that is to say at twenty pounds. 3. that every £100 estate brought in to be rated to defraye cuntry charges, then that to have the like proportion, that is to say five tymes as much as he that is only ratable for his head, and ten tymes soe much as where there is onely women and children; that is to say, ten of them to £100 estate; and soe where there is not £100 rated yet what part of a hundred pounds that is rated, then that to have its proportion as aforesayd, and soe where there is but one woman, child or servant, they to have their proportion as being halfe hevis. 4. For the division of the wood and tymler we conceive the whole to be divided into ten equal parts, and the divisions to runn from Mistick bounds to Redding bounds the longest way. 5. That the whole according to the proportions above sayd be cast up as supposing them a thousand parts, that then every hundred of these to be comprised under each equal part of the ten parts, the first division to be made by surveyours chosen out by the whole towne, the latter to be made by those whose lot shall fall to be together in any one of the ten parts. 6. That because some inhabitants in this towne are ratable and yet not rated by means of bearing some publick office; and being freed by Court order; as those alsoe that are troopers and soe exempted by their heads in poynt of cuntry rates, as alsoe some by means of poverty; yet all these to have their proportion in this division, they that have estate for them to have a proportion accordingly, and those that have no estates yett those of years to be vallowed at twenty pounds. And those that are women and children and servants that they be vallowed as aforesayd, that is two to twenty pounds.

"THOMAS BRATTLE in behalf of the rest."

The division was finally made on the 1st of March, 1658, under the following agreement:

"CHARLTONNE, the first of March, or the first moneth 1657.

"1. It is Agreed that the first head line shall be Medford Farme, that line between them and our Towne, And all other head lines to rune Parrell with that line foure score podes asunder.

"2. The first Lott, distinguished by the figure one, shall begin at the southeast corner where Mr. Nowells Farme and Medford farme meet, And so successively according to the figures 1, 2, 3, 4, &c., is to the end of the last figure or lott. And at the end of the first Range to turne back againe in the second Range. And so to the third, &c., successively till each man have halfe his proportion, for the first, And then the first to begin againe, 1, 2, 3, 4, &c., and successively each number to take place, in the second division, as in the first, till every man have his other halfe of his Lott.

"3. It is Agreed that the Ponds shall not be measured.

"4. It is Agreed that he that Tarrys not in the Towne as an inhabit-

ant for one year next ensuing the date hereoff, upon his going out of the Towne shall lose his whole Propriatie, both off wood and commons.

"5. It is further Agreed, That no man shall sell his wood or commons but to the Inhabitants of Charletowne, upon forfeiture of twelve pence p. load of eyther wood or Tymber: And not to dispose of the commons to any of any other Towne, upon forfeiture of the same, And if any remove to inhabeite in any other Towne, shall make no use of their commons, but shall sell it or lett it to some of the Towne of Charletown, that the commons may be reserved for ever to the use of the Inhabitants of Charletowne.

"6. It is Agreed that each shall pay for the laying out of his wood lott within one moneth after it is layd out, upon forfeiture of his wood and common. And the selectmen of Charletowne shall have hereby power to sell it to pay the surveyour.

"This was Agreed unto by vote of the inhabitants of Charletowne at a meeting in the meeting-house, this first off March 1658, and ordered to be Recorded in the Towne Booke."

It appears by the foregoing order that, commencing at what was then the line of Medford Farm, about one mile and a fourth south of the present Stoneham boundary, range lines were run in an easterly and westerly direction a quarter of a mile apart, there being two divisions, and seven and a half ranges in each division. These ranges extended north to near where Captain Rufus Richardson's Lane, so called, connects with Main Street. The territory north of this and westerly of High Street was retained by the town in its corporate capacity, and constituted what was afterwards known as the Charlestown Farms. There was also excepted from this allotment Spot Pond Meadows. Nearly all the long stretches of wall running easterly and westerly mark these ancient range lines. The land was drawn by lot and set off to the several inhabitants in proportion as they were rated, one-half of the share of each lying in the first division, and one-half in the second division, probably for the purpose of equalizing, so far as possible, the value of the land. This allotment is of great interest, because it lies at the foundation of nearly all our titles, which can be traced back directly to it, where the deeds have been recorded. Could one go back to the year 1658, and accompany a surveyor of that time, as he came up from the Market Place (now Charleatown Square) with compass and chain to Mistick side, he would leave the road near the river and strike into the primeval forest by a trail or possibly a path over which had been hauled timber and cedar from the swamp near Spot Pond. No break or clearing would meet his eye, except reaches of water and meadow, till his arrival at Doleful Plain, where part of the land was open and had been used, as we suppose, for fields of Indian corn. He would roam through an almost trackless wilderness and could probably discover no human habitation unless possibly a few Indian lodges. No public road had penetrated the recesses of the forest, and there was hardly a landmark to indicate the presence of civilized man. A few years prior to this time, in 1642, Charlestown Village, incorporated as Woburn, had been settled three miles to the west of us, and three years earlier, 1639, just over the line to our east, Lynn Village (afterwards Redding) had been planted.

There were forest paths connecting these two settlements, by means of which the adjacent colonists visited their neighbors, but no highway was built for many years subsequent. The chain-bearer, the blazed lines and the allotment of 1658 paved the way for the early settlement of what was afterwards known as Charlestown End.

There was an individual proprietorship in the land which stimulated its occupancy and improvement. The first settlers seem to have been attracted to the northeast part of the town, probably on account of its nearness to Reading (now Wakefield). It was many miles to the meeting-house in Charlestown, and but a short distance to the meeting-house in Reading; and then our ancestors in this section of the town could derive all the advantages and protection to be obtained from the neighborhood of an established community. In case of an Indian raid they could flee to the block-house of their neighbors. There was no organized movement and general settlement, as in most of the New England towns. The axe of the solitary pioneer first rung out and broke the stillness of a hundred centuries. Little clearings were made here and there and the first farms started. The first toilers were hardy men, with an education insufficient in some cases even to write their own names. The foundations of Stoneham were laid, not by men of culture and wealth, but by the brawn and courage of laborious yeomen. It is impossible to state with absolute certainty the name of the earliest inhabitant or the exact year of his settlement, but in March, 1678, the inhabitants were Thomas Gery, John Gould, Sr., John Gould, Jr., William Rogers, Thomas Cutler and Matthew Smith. These were the fathers of the town. But little is known of them. The monuments which survived them were the fields they cleared, the walls they built and the families they reared. The records have saved a little and tradition something more. Thomas Gery, probably of Irish ancestry, was born about 1638, is supposed for a time to have lived in Reading, where he owned land, and in 1668 or 1669 moved to Charlestown End. He made a clearing and built a house or cabin just beyond the northern slope of Farm Hill, on or near the present High Street, and had his home there during King Philip's War. In 1668 he was complained of for cutting an acre of grass in the meadow of Charlestown. He was at the same time a cunning and a courageous man. It is said that on a certain occasion, having risen early in the morning, his attention was attracted by the suspicious movements of an Indian lying concealed behind a log, and having reason to believe that he was lying in wait for him, and not caring himself to unnecessarily expose his person, he extended through the partly open door his coat and hat in such a manner as to draw the arrow of the unwary savage, and the next instant the ball had whizzed from his unerring musket with fatal effect. Fearing the vengeance of the tribe should they discover the dead body, he

buried it in his own cellar. On another occasion, as the story goes, he had been away from home one winter's day cutting wood, and on his return, just after dark, stopped at the house of his neighbor, Thomas Cutler. Mr. Cutler invited him to remain and spend the night, urging upon him the danger of his proceeding, as a pack of wolves had been heard in the neighborhood. Mr. Gery, thinking of his family and their anxiety should he stay away, declined the invitation, and shouldering his axe, started on. He had proceeded but a short distance before he was greeted by the howls of the wild beasts. On they came, we can imagine with gleaming eyes and lolling tongues, thirsting for human blood. A weak man, a cowardly man might well have been demoralized and lost; not so the hardy woodsman. Backing himself against a tree and swinging his axe to the right and left, he soon cleared a space and drove away the brutes. The next morning, on returning to the spot, he found the carcasses of four dead wolves. By family tradition it has been handed down that this man died as a soldier in 1690, when returning home from Canada in the expedition of Sir William Phipps. From then till now his name has been borne by numerous descendants, many of whom have been among the chief men of the town of which he was one of the first settlers. Of the colony of 1678 the oldest inhabitant was John Gould, Sr., and very probably he was the first pioneer who established himself at Charlestown End. At this time he was sixty-eight years of age, and came here some time prior to 1668. He was an extensive land-holder, and his farm was in the extreme north-eastern section of the town, most of it being embraced in what is now Wakefield, and, including the land of his son John, extended as far west as land of Thomas Cutler (now of Mrs. Doyle). He is supposed to have come from Towcester, in Northamptonshire, and to have embarked for America in the "Defence," from London, July 7, 1635. Originally he was described as a carpenter, and later in life as a planter. It would seem that he was one of the most substantial men of the town, for in the allotment of 1658 there were only nineteen who were rated as high or higher than he, while there were one hundred and eighty-two rated lower. For many years he lived in Charlestown before he moved to the north end of the town. He joined the church in 1638, but later in life seems to have been subjected to church discipline, probably because he lived so remote from the house of public worship. Under date of April 28, 1667, we find the church records contain the following:

"The acknowledgment and confession of Brother John Gould, who had been formerly admonished in order to his acceptance to Communion again, vizt. God hath helped me to see many things wherein I have formerly given offence to his people both of this church and of Redding, for which I have been admonished and I do not nor would justify myself therein but rather I doe justify the church in their proceedings with me looking it to have been the duty of the church to deal with me for what was offensive. God hath done me much good thereby and I desire that the Church would forgive me and accept of me to their communion which formerly before my admonition I did enjoy. This was read to the

brethren liberty given to them who had anything of weight to object but none did object against it but it was accepted of as satisfactory. He was (the brethren consenting) received to that state of communion which he had before his admonition and by the sentence of the church declared to be restored."

On the 25th of September of the same year,

"John Gould appearing before the select men being demanded whether he would pay anything to the maintaining of ordinances for the time past answered plainly that he was not willing to pay anything for the time past."

The military service in the early days must have been very exacting, for it appears that he was excused from training in 1682, when he was seventy-three years old. He conveyed his house and about ninety acres of land to his son Daniel in 1687, and this farm remained in the family of Daniel Gould till a few years since, when it was owned by the late Dr. Daniel Gould, of Malden, who was the son of Daniel Gould, Esquire, or "Square Gould," as he was called. The name Daniel seems to have been attached to the land for two hundred years, having descended from father to son. In 1690 John Gould conveyed to his grandson Thomas a tract of land bounded on the east by Smith's Pond. Dying in 1691, he left a numerous offspring. This family for one hundred and fifty years was perhaps the most influential one of the town. The names of Deacon Daniel Gould, Lieutenant Daniel Gould, Captain Abraham Gould, Square Gould and Colonel J. Parjer Gould, from generation to generation, have represented men of the best type that Stoneham has ever produced. The name has almost disappeared from our midst, but in the female line the blood of old John Gould still circulates amongst us in many households. Next westerly or southwesterly from his father, was the house and farm of John Gould, Junior, who probably lived on the west side of the old road to Wakefield. Adjoining the land of John Gould, Junior, and westerly therefrom the clearing of Thomas Cutler would next have appeared. Thomas Cutler lived on what was afterwards known as the "old poor farm," which remained in the family till the death of the widow Elizabeth Cutler in 1825, after which it was sold to the town, no male representative remaining here who bore the name. Thomas Cutler must have had an eye for beautiful and extensive scenery, his home commanding incomparably the finest view of any among the first inhabitants. He died in 1683, at the age of forty-eight. About one-third or one-half mile southwesterly from the house of John Gould, Senior, lived William Rogers, who occupied the farm lately owned by Captain Bnck. In 1669 he married Abigail, the daughter of Mr. Gould, and at that time was a resident here. His house probably stood on or near the spot where Mr. Currier now resides. But little is known of him. He died prior to 1688, for on February 7th of that year his widow married John Rogers, of Billerica. He was succeeded by his son William. John Cutler conveyed to him in 1690 twelve and one-half acres, "reserving highway two poles wide for use

of the town." The son remained here till 1728, when he sold his farm of thirty acres to Deacon Daniel Gould, and from that time nothing is known of the family. They made no lasting impression upon the town and none of their descendants appear to have remained. The last one of the first inhabitants whose shades we invoke is Matthew Smith. In the early history of Charlestown, there were three generations of Matthew Smith, and it is not quite certain whether it was Matthew first or second who planted himself at Charlestown End. In 1678 Matthew resided here, and ten years later Matthew Smith, Senior and Junior, were residents. It would rather seem that the first one of the name remained in the old town, although it is by no means certain, and probably was the same one who embarked at Sandwich, County Kent, with wife Jane and four children in 1635. He was a shoemaker; inhabitant 1637; with son Matthew, herdsman, 1649 and 1655; town crier, 1657; aged about seventy-two in 1682. He was town messenger at thirty shillings a year in 1637. In the division of 1658 he was allotted eleven acres, five and one-half in the second division, which probably included the land where D. H. Tilton now resides. One of the name, either the father or son, died in 1690, who had married, about 1684, Mary Cutler, probably the widow of Thomas Cutler. He must have been a man of some substance, for in his inventory are found two oxen, one horse, four cows, three yearlings, nine sheep and four swine, and he carried on a farm which he leased of Charlestown. This farm is described as bounded on the north and east by Thomas Gery, and on the south and west by the town, consisting of forty acres, "with as much meadow as he can get out of Parley's swamp, and out of town land nigh Redding, not exceeding twenty acres for twenty-five years; rent after twelve years, four pounds per annum; he to plant and build a house eighteen by twenty-two, and barn, to be left the town." The house in which he lived stood on the north side of North Street, near where Mr. Pierce now resides, or possibly it was the house of the late Deacon Dunlap. This completes the list of the first settlers. It requires but little stretch of the imagination to go back two hundred years, recall to life our early forefathers, look in upon them as they lived in their first rude cabins made of logs, and behold the fields which they cleared amidst the forest, the corn and grain just starting up between the charred and blackened stumps. In those days the streams were dammed by beavers, the sheep were a prey to wolves, the bear roamed through the woods, and now and then the hunter brought down a deer. During these years our pious ancestors, not numerous enough to support a minister themselves, traveled on Sunday to the meeting-house in Reading. Their habits were simple and their wants were few. It was a hard contest with a rigorous climate and a barren soil for the bare necessities of existence, but it produced a strong and manly character. They may have been rough,

and uncouth, and uneducated, but they possessed the best traits of English yeomanry. Some of the aborigines lingered about their old haunts. The Indian wars and the wild beasts made them familiar with the use of firearms. In 1675 John Gould and Thomas Gery were troopers in Captain Hutchinson's company, and were impressed as soldiers from the "Three County Troopers," and served in King Philip's War. There were liquor laws in those days as well as now. In 1682 "John Gould appears before the Court, and convicted of selling strung liquors to the Indians is fined ten shillings money and pay the costs." The means of communication was at first by forest paths and private ways from farm to farm. No public highway existed till about 1685, when one was laid out from Reading to Woburn as follows: "Beginning at ye Country road near Sergt. Parker's house and so along by the meadow, called Hooper's Meddow, and by the foot of ye hill, which is above ye leest of three ponds, from thence to the way marked out by Sergt. Parker, throwe Charlestown land to Woburn River, near John Richardson's house." Another highway was also laid out the same year from Reading to Charlestown (now Stoneham). These two roads were the old road over Farm Hill and the present North Street, or possibly one of them was Green Street. The latter road, beginning at the easterly foot of Coudrey's Hill, came in a southwesterly direction by the houses of the Goulds, passed William Rogers, near the end of Thomas Cutler's land, and so on to Charlestown, a more particular description of which will be given hereafter. The road over Farm Hill accommodated Thomas Gery, and the road from Reading to Woburn (North Street), Matthew Smith. Tradition says there was an old road over the southeast corner of Bear Hill, and so on through Spring Pasture to Medford. "In 1673 a large trade was carried on in cedar posts, shingles and clapboards. The select men granted many of the inhabitants permission to cut the trees in Cedar Swamp near Spot Pond, and John Mousal was charged with the duty of inspecting the number and bigness of the trees cut down." There were but few additions to the inhabitants for many years. In 1688 Thomas Cutler had died, and was succeeded by his son Thomas. Daniel Gould, the son of John, had come of age, and Samuel Coudrey, Michael Smith and Andrew Phillips were added to the settlement of 1678. The history of the town during these years is little more than the bare mention of the names of the people who lived here, and the location of their farms. Measured by the progress and attainments of the nineteenth century, their lives must have been barren indeed. The tomahawk and the war-whoop of the red man at times varied the monotony of their existence, but the great and vital question which, more than any other, seems to have absorbed the attention of our ancestors was religion. About the most important business which came before the town was the building of the meeting-house, and the support of the minister. At-

tending church as they did at Reading, it was a source of grievance to the people of that town that they should contribute nothing towards the support of the Gospel, being taxed as they were in Charlestown, and so the following petition was presented to the General Court:

"The humble petition of the inhabitants of the towne of Redding, Humbly Showeth—That whereas our case, being as your petitioners humbly conceive, soe circumstanced, as wee Know not the like in all Respects—and not Knowing which waye to helpe ourselves—But By humbly acquainting yor honnors with our state—your honnors beeing the Fathers of the Commonwealth to which wee doe belonge;—and yor petitioners humbly hoping that yor honnors will helpe soe far as may bee to the Relieving of us in our case;—It being soe with us that wee are but a poore place, very few above sixty families, Abell to pay to the Ministry, and severall of them have more need to Receive than to paye,—if we were a place of ability as many others bee; and to us there is Adjacent farmers, which bee constant bearers of the word, with us, which goes not at all to their owne towne, But transiently as others doe: Neither came they one the Sabbath daye butt bee breakers of the Lawe of god and of this commonwealth as we conceive. And to many of them It would be soe intolerable a burthen, that many of them must necessarily refrain from the public worship of god, established amongst us, for prevention of which they doe heare with us, which seems to be very hard for us to maintayne Ministry and Meetinghouse conveniently for them, and others to force them to pay their hole Rates to their one towne, as others do; or if some of them bee Better-minded, their busenes lyeth so att the present that wee have nothing from them all or next to nothing.

"Another thing that your humble petitioners desire to declare to your honnors is thatt wee have now not roume enough in our Meeting-house for ourselves, but the Adjacent farmers being one third or very neare one third as much as wee, wee muste build anew before it bee Longe, for the house will be too little for them and us, which we hope your honnors will consider how the case is like to bee with us, if nothing bee considered. Butt as wee hope it is the waye, that god would have us to take to leave the case to your honnors, we desire humbly soe to doe, and quietly to reate to this honoured Courte's good pleasure as to what hath been declared.

"And shall ever pray—In the name & by the consent of the reste of the inhabitants of the towne. Wm. Cowdrey, Robery Burnap, Jona. Poole, Thomas Parker, Jeremy Swaine."

When subscriptions were raised for the purpose of building a new meeting-house in Reading in 1688 the following subscriptions were raised from persons living at Charlestown End and the list substantially comprises those living here at that time

	£	s.	d.
John Gould	4	18	4
Daniel Gould	3	0	0
Thomas Gery	3	0	0
Matthew Smith Sen.	0	10	0
Matthew Smith Jun.	2	10	0
Michael Smith	0	10	0
Thomas Cutler	1	0	0
Samuel Cowdrey	1	0	0
Andrew Philips	1	0	0

Samuel Cowdrey came from Reading, and probably lived not far from where Mr. Tilton now resides. Michael Smith was advanced in years, and his daughter Sarah was the wife of Andrew Philips. Domestic infelicities existed then as well as now. "At a Court held at Charlestown, June 17, 1679, Michael Smith and wife, of Charlestown, for disorderly living apart from one another were admonished and to pay the costs of Court." Andrew Philips settled here somewhere about 1686, living, perhaps, at first in the easterly part of the town near the house of

Mr. Outram, but at the time of his death he resided on Cobble Hill, in a dwelling formerly owned and occupied, and probably built by Nathaniel Dunton, of Reading. His homestead was afterwards conveyed to Rev. James Osgood, the first minister of Stoneham. All the old residents will remember the parsonage of Parson Osgood. It stood on the corner of Green Street, about opposite the house of the late Reuben Locke, and was the best specimen of architectural style among us, which antedated the Revolution. Prior to the latter part of the seventeenth century the population increased very slowly. The settlers had generally located in the northeasterly part of the town, but after this they spread out in all directions. In 1685 Eleazer Bateman came from Woburn and located in the extreme westerly part of the town, just north of Marble Street. The old cellar-hole where his house stood was to be seen till within a short time. That part of the town including the level land extending all the way to Summer Street, was then known as Doleful Plain. When Bateman purchased his land in 1685, there was a cellar dug and stoned upon it, and the frame of a house twenty-two by eighteen feet, which seems to have been the regulation size that then prevailed. Mr. Bateman was a carpenter and owned one or two houses in the neighborhood besides the one in which he lived. One of these probably stood a little north of the house where Mrs. Lot Sweetser resides. He lived here till 1713 and then sold his place to Joseph Underwood. He was a man of so much repute that on several occasions he was appointed by the town on a committee to lease the Charlestown Farms. In 1688, Patrick, otherwise called Peter Hay, then described as of Redding, commenced to buy land at Mystic Side, so called, and afterwards became one of the largest land owners and most prosperous settlers in the neighborhood. Hay was a Scotchman, lived for a while at Lynn, (Lynnfield) and removed to Charlestown End in 1692 or 1693. He must have been a man of great force of character, buying as he did, numerous tracts of land, clearing farms and erecting dwellings. Although his possessions extended in all directions, he himself located in the northerly part of the town, building first a log cabin, which tradition says stood near the bend of Tremont Street, and afterwards the house where he lived and died, on or near the spot where Luther White now lives. This dwelling was occupied by his descendants till about 1846 or 1847, when it was burned. To his son James, who was a shop-keeper in Charlestown, he gave a farm of sixty-three acres, with house and barn in the easterly part of the town. The house stood on the westerly side of Pleasant Street, about opposite the residence of Amos Hill, Esq., and was owned by the Hays till it passed out of the family to Thomas Gould in 1799. Another son of Patrick Hay, Capt. Peter Hay, who was one of the most influential men in Stoneham of his time, settled near his father, living for a while in the build-

ing known a few years since as the Old Office, and afterwards in the Hay Tavern which descended in turn to Capt. David Hay. For generations the race was a thrifty and prolific one, exercising a very large influence. A third son, John, a young man of great promise, died in his thirty-first year. Peter Hay was not only the owner of houses and land and men-servants and maid-servants, but he had a multitude of wives, no less than four. He was one of the first selectmen when the town was organized. After having lived the life of a patriarch, so far as such a life was possible in the eighteenth century, and in Puritan New England, he died at the age of ninety in 1748. As Peter Hay owned a large part of the Northern so John Vinton owned a large part of the Southern section of Stoneham. He was a weaver, afterwards a farmer, born in Malden about 1678; came from Woburn about 1710. His house probably stood upon a slight elevation which is to be seen between the residence of Warren Wilson and South Street. An old house once stood on this spot near which has been dug up old pottery and curious relics. This was upon his farm and he appears to have been the original settler of the territory, so it would seem that this was probably his residence, though possibly he occupied and built the old John Buckman house which was torn down a few years ago. The author of "Vinton Memorial" locates him as near the outlet of Spot Pond, but although he and Stephen Richardson bought the lot on which stood the mill in 1715, there is no reason to suppose he lived there unless for a short time. The above author says "John Vinton, Esq. was a man of great ability, energy and activity, and became a leader in every place where his lot was cast." When Stoneham was incorporated the usual order from the General Court was addressed to John Vinton as the principal inhabitant, directing him to issue a warrant for the first town-meeting. He advanced more money and probably did more than any other man to obtain an act of incorporation for the town.

John Vinton was one of the first board of selectmen and served in that responsible office six years, viz.: 1726, 1727, 1731, 1732, 1734, 1735. He was commonly called to preside at town-meetings as moderator. He was very often employed on public business. He was placed by his townsmen on almost all important committees. At one town-meeting he was placed on four committees. One of the first measures of the town was the erection of a meeting-house, and Capt. John Vinton was one of the committee of three to select a site, procure materials, put up and finish the building. He was also one of the committee to employ a minister. He seems in an eminent degree to have enjoyed the confidence of his fellow-citizens. He was a representative of the town in the Legislature in 1734. Capt. Vinton paid the highest tax of any man in town. He was a lieutenant in the train band in 1720, captain in 1723, a very energetic, enterpris-

ing prosperous man. He received a commission as Justice of the Peace in 1734.

In 1736 he sold his farm of 270 acres to James Allen, of Boston, for which he received £2550 and removed to Dudley where he died in 1760. Some of his descendants remained in Stoneham, and settled in that part of the town which has since been annexed to Melrose. Another large land owner was Timothy Wright who was born in Woburn, was originally a carpenter, and came here about 1700, settling in the westerly part of the town, his house being located near the corner of Wright and Hancock Streets. A large portion of the original farm with additions made to it by his descendants remained in the family for about 175 years. The venerable form of Capt. John H. Wright is still fresh in the memory of the present generation. The possessions of the Wrights embraced most of the territory westerly from Main, and Warren Streets to Woburn line, and from Marble Street on the south to the lands of the Hays, northerly from Montvale Avenue. The progenitor of the Bucknams was Edward who came from Malden in 1716, and bought twenty-six acres of Philip Alexander with a house and barn which stood near the corner of Warren and Lynden Streets, on the easterly side of the road. With the usual thrift of the early settlers he made considerable additions to his original purchase, and died in Stoneham in 1773, aged eighty-two years. Next easterly from Edward Bucknam lived Richard Belcher, who is described of Charlestown as early as 1708, when he bought a house and twenty-one acres of land of Joseph Wright, Jr., of Woburn. He very probably occupied the old Mars-ton or Ebenezer Bucknam house, on the north side of Summer Street. He was a mason, taught school at Charlestown End, and died in 1720, leaving a large family of children. In 1695, Deacon Nathaniel Lawrence came from Groton, bought seventy one and a half acres of Joseph Lynde, and built the house recently torn down on the southerly side of Hancock Street, known as the Old Zac Gerry house. A lane formerly led from the house to the old road (now Summer Street). A brick was taken out of the chimney bearing the mark 1708 from which it is possible to fix the probable date of its erection. For those times it must have been a roomy and substantial residence. The character of this building as of the Ebenezer Bucknam house, the Old Office, the Jonathan Green house in Green Lane, and of several others which have disappeared within the past fifty years, many of them similar, and built about the same period, indicate the thrift and prosperity of the men who were the founders of Stoneham. These ancient relics of the past are gradually fading away, and the time may soon come when not a single monument built by human hands will carry us back to the days of Charlestown End. Even the names of most of those who laid the foundation of the town, have been long forgotten. Deacon Lawrence very likely may have built and first lived in the house

which was the home of Deacon Jabez Lynde on the east side of Sumner Street, and now owned by Miss Sarah A. Lynde. He was past middle life when he came here from Groton, and died in 1724. He had been a leading man in Groton, was an ensign in the militia, a deacon in the church, and one of the first representatives of that town under the charter of William and Mary in 1693. The next year after his death, his farm was sold by his children to Thomas Geary. Another citizen of Groton who settled here was Samuel Holden, who lived for a time in Woburn, and bought a tract of forty-five acres in the westerly part of the town south of Marble Street in 1690. The Holdens owned an extensive territory in the south-westerly part of Stoneham, and easterly of Bear Hill. It is impossible to say with certainty where Samuel first located, but probably on the land which he originally purchased near Marble Street, although subsequently some of his descendants lived in two houses westerly and south-westerly from the last residence of the late John Bucknam. In an ancient paper now in the possession of one of the family is the following reference to him while in Groton: "Samuel Holden, second son to Richard Holden, lived in Groton until the Indian War (which probably was the war with Philip, but whether it was or not, I shall not determine, the war with Philip, I think) was about the year 1675, at which time Mrs. R was taken captive."

"The town in the night was beset with Indians; the Indians came to his house in the night and broke it open and came in. His wife made her escape out of a door with two small children in her arms and went into a corn-field. Mr. Holden stood behind a door with a gun in his hand, intending to kill some of them, but it being so dark he could not see them. He also made his escape out of the house and went to a garrison house. The Indians, after plundering the house, went off. Soon after this Samuel Holden moved to Stoneham (then Charlestown) for fear of the Indians. He died on or about the year 1739, aged eighty-eight years!" As the observant pedestrian tramps over the pastures between the Nathan Bucknam house and Bear Hill, he notices three depressions in the ground where once stood human habitations which long since have disappeared. Two of them were occupied by Holdens, and the one farthest south by Isaac Howe, who purchased there a house and barn and eighty-two acres of land, in 1715. William Richardson, the brother-in-law of John Vinton, probably built the house and for a time lived in it. Isaac Howe came from Roxbury at the age of fifty-nine or sixty, and lived but two or three years after his settlement. He left, however, several sons and a daughter, Naomi, who married Joseph Holden. To the lover of antiquity, in this new country where there are but few antiquities, there is nothing more fascinating than roaming through the woods and over the fields, placing the old range lines, discovering here and there an ancient cellar-hole, and re-

peopling in imagination once more the territory with the early inhabitants who dwelt here one hundred and fifty and two hundred years ago. To a person familiar with the transfer of their lands, the dates of their birth, times of their death, the names of the girls they married and the children they left, these forefathers of ours seem like old and near friends. Going now to the northwestern part of the town, north of William Street, to the farms of Micah Williams and Sumner Richardson, let us rebuild again the houses of Timothy Baldwin, Sr., and Timothy Baldwin, Jr. The former came from Woburn as early as 1705, perhaps earlier, hired of Charlestown eighty-six acres, bought land of his own and lived a few rods northeasterly from the house of Mr. Williams. Deacon Dean, in his history of Stoneham, tells this story of Baldwin's house, which is a tradition. "The building for a considerable length of time was supposed to be haunted. A family lived there at that time. At the season of harvesting a quantity of pumpkins were carried into the garret; one evening while the father was absent, and the mother with the children and other members of the family sat by the fireside, a noise was heard; something appeared to be coming down stairs. It came stamp, stamp, down the garret stairs; it then came to the entry stairs, which led to a lower door, and with increased force came pommel, pound into the entry below. Then the noise ceased. The affrighted family waited with great anxiety for the return of the husband and father. When he returned the news was communicated to him. He repaired to the entry, when, on opening the door, a good, lusty pumpkin was reposing on the floor." Mr. Baldwin was a person of good education for those times, a man of influence, and one of the first board of selectmen. With John Gould, James Hill and Peter Hay he built a grist-mill near Mill Street. Timothy Baldwin, Jr., lived west from his father, a few rods northeast of the house of Sumner Richardson. In 1713 he bought the house and barn and thirty-seven acres of land of Andrew Beard; the latter probably having cleared the land and built the house, for we find Beard buying lots of woodland, which made up the farm of the first proprietors or their heirs, as early as 1700. Hannah, the widow of Timothy Baldwin, Jr., and her second husband, John Vinton, in 1763, sell to Oliver Richardson, in whose family most of the land has since remained. During the first century of the town hardly any family exerted a wider influence or furnished more leading citizens than the Greens, two or three branches of whom located in the easterly and southeasterly parts of the town. Henry, or Elder Green, was a weaver; came from Malden; commenced to purchase land in the latter part of the seventeenth century; is described as of Malden, in 1695, and of Charlestown, in 1709, and died here in 1717, aged seventy-eight. He was the father of Deacon Daniel Green; probably built his house on the

north side of East Street, near the spot where Daniel G. Sturtevant now lives, who is a lineal descendant, a portion of the property having remained in the family for two hundred years.

His possessions lay chiefly north and south of Spring and East Streets. Captain Nathaniel Green was also a resident of Charlestown End in 1716, but in a few years moved to Leicester. Another one of the Greens who settled at Green Lane was Jonathan, who came from Malden in the early part of the eighteenth century. From then till now the old homestead, which is said to have been built early in the eighteenth century, has been occupied in each generation by a Jonathan Green. The Green farm was very extensive, embracing a large portion of the territory from the Melrose line southwest to Pond Street. Captain Jonathan Green, son of the first Jonathan, became a leading citizen, and filled a large space in our history during his life, but it belongs to a later period than the one of which we are now speaking. Supposing it now to be the year 1716, we will return to the abode of Patrick Hav, and traveling easterly, towards the farm of William Rogers, we shall notice the house of Samuel Smith, on the north of where now is Elm Street, about opposite the residence of Captain Snow. This year he sold his farm of thirty-four acres with a house, barn and orchard, to Ebenezer Damon. Damon came from Reading; was a blacksmith; in 1711 was a soldier against the French and Indians in Canada, and lived here but a few years. One of the oldest dwellings in Stoneham is on Green Street, owned and occupied by Oakes Green. Its history goes back almost two centuries, through the families of the Greens, the Bryants and the Southers, to Thomas Millard, who is supposed to have built it and lived there till 1725, when he sold to John Souther. Millard came from Reading. North of Thomas Millard lived Joseph Bryant, the father of Col. Joseph Bryant. To a person tramping through the Felis west of Bear Hill and so down to Spring Pasture, the territory appearing, till within a few years, like a solitary wilderness, away from roads and human habitations, it seems almost impossible to realize that he is passing over what was once cultivated farms, and yet, in this immediate neighborhood, long before the memory of living man, there were three different houses. As one peered into the well, looked down into the cellar-hole and traced the numerous walls about the Parker place, he felt almost the weird sensation of looking back on a pre-historic past, that the traveler experiences in gazing upon the ruins of Palenque and Uxmal. These old landmarks have afforded, how many hours of happy revery, but alas! they are now all swept away, the walls are gone, and not a trace remains to locate the home of Ebenezer Parker, who lived here 150 years and more ago. His nearest neighbors to the south lived, one of them where now is the east end of Winchester Reservoir, and the other a little farther south, in Spring

Pasture. As there was no highway in this neighborhood, the people probably used the road over Bear Hill, which extended down through the woods to Medford. When the division of land among the inhabitants of Charlestown was made, in 1658, the northwestern section of the town was not included; that is to say, the territory between High Street and Woburn line, and north from about Captain Rufus Richardson's Lane. This was subsequently known as the Charlestown Farms, and, in the early part of the eighteenth century, was leased to different individuals. The two hundred acres in the extreme northwestern section were leased, in 1705, to Stephen Williams, of Woburn, for twenty-one years, and were bounded on the south by the old road from Reading to Woburn. There was a provision in the lease that the lessee should "build and finish upon said Land A Dwelling house wich shall be Twenty Two foot Long and Eighteen foot wide, nine foot studd between joists, and a Leanto at the end of said house, Twelve foot Long, the bredth of the house six foot stud, and shall Dig and sufficiently stone A Convenient Seller under said House, and shall build and cary up a Double atack of Brick Chimneys to A Convenient height above the house, and shall Lay two floors in said house, and Leanto and fill the Walles Betweene the Studs and Ceile them with Plained boards or Lime mortar on the inside, and shall make Convenient Stairs, and shall board or Claboard the outside of said house, and board and Shingle the Roofe, to make it every Where Thite, and make Convenient Lights in said house, and Glaze the same; And shall also erect and build A barn upon said Land Thirty foot Long and Twenty foot wide, and Cover the same on the Sides, Ends and Roofe, to make it thite; and at his own proper Cost and charges suport, maintaine, Repair and Amend the said house and barn with all needful Reparaitions and Amendments during said Term, And shall also plant Two acres of said Land with Good fruit Trees, for an Orchard, the Trees to be planted thirty Two foot asuader, and Fence said orchard intire With A Good sufficient fence aboute the same, and make and maintaine A Good sufficient fence, stone Wall, or posts and Railes about What Land he Improves; And the said Land, medow, house, barn and fences erected and sett up on said Land as above said, so well and sufficiently repaired and Amended; with the orchard sufficiently fenced intire, and as above expressed, all the improved Land so fenced; as above said at the end of said Term of Twenty one years shall and will Leave, etc."

Eighty acres were to be reserved for woodland. For rent he was to pay during the first ten years twelve pence per year, and for the other eleven years the sum of five pounds and ten shillings per year. How long he remained is uncertain, though twenty years later there was a Stephen Williams, Jr., here, probably the same man. The house which he built was one story high, and probably stood on the north side

of the old road a little easterly from the Woburn line, though possibly the original dwelling was located near the spot where the late Caleb Wiley lived. The latter spot is said to have been the scene of an Indian butchery. The tradition is, that after the murder the neighbors assembled and pursued the savages. Near a large rock, which may be seen to this day about a third of a mile west of the house, one of them was seen and shot. Also seven packs were found on the rock, from which it appeared that six others were in his company and had escaped. The farm east of that of Williams, consisting of one hundred and sixteen acres, with a house, barn and orchard, just such as has been described, was leased to John Wesson, of Reading, and extended to the Geary land near the present High Street. The house was probably located in the vicinity of where the late James Pierce lived. Wesson also in 1705 leased ninety-one acres south of his other farm, with the same provisions in the lease as to house, barn and orchard as in that of Williams. The latter extended from near Oak Street to High Street. The buildings were located a few rods east of the old house of John B. Tidd south of the road, and were still standing in the early part of the present century. Some years later this farm was occupied for many years by James Hill, the founder of the family of that name. The next and last farm to the south was one, of one hundred and ten acres, let to Thomas and Daniel Gould, with the same conditions as in the other leases, and extended from near Oak Street on the west to land of Kendall Parker on the east, extending a little easterly of High Street, and embraced a large portion of Farm Hill. Two ancient homesteads stood on this territory, and it is not quite certain which was the original farm house, but probably it was one built on the east side of the road, nearly opposite the house of John Paine, and just south of land now owned by the town. It was here that Grover Scollay was afterwards said to have lived, though for a time he hired one of the Charlestown farms formerly occupied by Wesson. When Stoneham was set off, the Gould farm was conveyed to the town towards the support of the ministry. West of the Gould and Wesson farms, and south of the old road, was a farm let to Timothy Baldwin, of eighty-six acres. There were no buildings upon this farm, and in 1787 it was conveyed by Charlestown to Thaddeus, Oliver, Caleb and Elijah Richardson, and afterwards divided between them. It is believed that the names and, so far as possible, the location of almost every inhabitant who founded a family here, prior to 1725, have been given in the preceding pages. It may have seemed tedious to the reader, but it is a duty we owe their memory that their names should be preserved. No one of them is known to have acquired a distinction beyond his immediate neighborhood. None among them could boast of Harvard as his *alma mater*. Neither of the so-called learned professions had had a representative at Charlestown End; probably no

town within a radius of ten miles from Boston had an humbler origin than ours.

It may be interesting to know something of the domestic life of the earliest settlers, and nothing indicates this more certainly than the inventories of their estates as they were made at their decease. Let us for a moment consider a few of them. The first one who died was Thomas Cutler, whose decease occurred in 1683. He left twenty-five acres of land and a house valued at £40; "3 cows, 4 young cattle, £18; 1 mare to colts, three pounds; 10 swine, 40 bushels Indian corn and some rye and oats and barley, 9 pounds and 10 shillings; 1 plough and ax and implements for husbandman's work; 2 beds with bedding; 3 pair sheets with other linen, woolen and flax, 2 pounds, 4 shillings; 5 yards home-made cloth, and some yarn, 2 iron pots with iron things and pewter and brass, 2 pounds 5 shillings; chests and boxes with other usable things in house, 1 pound 10 shillings; wearing clothes, 2 pounds; gun and sword, 1 pound." The inventory of John Gould, filed March 27, 1691, is as follows: "One feather bed, bolster, blanket, bedstead, etc., £5; pewter and brass, £2; iron ware, £1 15s.; household linen, £6 10s.; table, chests, boxes and chairs, £2 15s.; 2 oxen, £4; 2 cows, £4; 12 sheep, £3 12s.; Dairy vessels, £1 13s." Matthew Smith's valuation, dated December 15, 1691, shows that he left "Two oxen valued, £9; 4 cows, £13; 3 yerlings, £4; 1 horse, £4 10s.; 9 sheep, £4; 4 swine, £3; Iron and Ring and plough irons, etc., £2; Iron and two axes, etc., £1 18s.; a whitetree, chains and cart Ropes, Iron and tongs, Iron bolts, shave, Some other edge tools and ax, £2 9s.; Indian corn and English corne, flax, and woolen yarns and linen yarns and linen cloath and hemp, £3 18s.; beds and cording, £5; tobacco, 15s.; hops, 10s.; chests and boxes and pailles, trays and dishes, with other wooden things visabal in the house, £1 15s.; 1 baril and a half of pork, £4 10s.; sadell and bridell, £1; Iron arms and ammunition, £2 10s.; Cloathing, woolen and linen, £3 5s.; books, 8s.; a broad axe, a book, a pair of shoes, £3 10s." Coming down to the early part of the next century, and to the second generation, when wealth had somewhat accumulated and luxuries increased, John Gould, the second of that name, who died in 1712, left a much larger personal property, which was described as follows: "Wareing close, the best feather bed, one bolster, 2 pillows, £6 5s. 6d.; a straw bed, a coverlaid, £6 11s. 1 blanket, 2 sheets, cord and bedstead, £4 8s. 6d.; another feather bed, bolster, coverlaid 9d.; another feather-bed, 1 bolster. 1 coverlaid, 2 blanket, 2 sheets, £4 2s. 6d.; 6 napkins, 1 table cloth, 1 bed blanket, £1 3s.; pillows, 4s.; 3 pewter platters, one bason and other puter and tinn, £1 7s. 11d.; brass cettle, 15s.; worming pan, 6s.; a scollet and oyrn pot, 4s.; friing pan, 6s.; an oyrn cettle, 7s.; an oyrn scelet, 4s.; fire shovel, tongs, 7s.; box oyrn and pot hook, 1 gun, 15s.; a pare of pistils and holster, 18s.; a cutlash, 4s.; 2 chests, 2 boxes, 19s. 6d.; 2 sad-

dies and pilian, 1s.; 10 books, 13s.; 5 barrels and a pipe, 16s. 6d.; lumber, 6s.; a loome, 2 slays, £1 10s.; carpenters tools, £1 14s.; 2 sickles and wedge and old oyrn, 17s. 6d.; and tackling, 15s.; axes, 14s.; forks and 2 chains, 16s.; 1 plough and oyrna, 8s.; hoe, yoke and rings and staples, 12s.; 1 shovel and grindstone, 7s. 8d.; 1 cart and wheels, £4 10s.; sled and tumbrel, 10s.; a flax comb, 9s.; stone cart, 8s.; 20 bushels ry, 10s.; 5 bushals wheat, £1 2s. 6d.; 16 bushals of molt, 1 B $\frac{1}{2}$ barley, £2 12s. 6d.; Indian corn, 55 bushals at 2s. 3d. per B, £6 17s. 6d.; 8 pounds of wool, 5s.; a cross-cut saw, 5s.; 5 swine, £2; 2 pair of oxen, £15 15s.; 1 horse, £4 10s.; one mare, £4 10s.; 6 cows, £17 15s.; 2 yearlings, £1 18s.; 23 sheep, £8 1s.; timber hievel for a barn, 3s.; flax, 10s.; a paire of new shoos, 5s.; 2 sacks, 3s.; 2 baskets, 3s. 9d.; 300 bords, 12s.; 1 barrel and half of pork, £4 10s.; sword, small things, 10s. 6d." By an examination of these lists it will be observed there were no carriages, no crockery or glass-ware or hardly any furniture except bedsteads, chairs and boxes. The only fire was that of the fire place. Carpets or rugs had not come into use. No curtains were required to shield the inmates from the curiosity of passers-by. There were no watches or clocks to indicate the time. No metal more precious than iron and brass and pewter and tin filled their cupboards, or covered their tables. Potatoes had not come into general use. The staple articles of food were Indian corn, wheat, rye, barley and pork, with mutton and beef at intervals, and doubtless veal and lamb now and then. Coffee and tea were luxuries of the future, and probably sugar was very little in use. Flour as we have it was unknown. Garden vegetables were cultivated to no great extent. Milk and butter and cheese they possessed at an early day in abundance. Wild game was plenty. The cloth was for the most part home-spun. To a very large degree their purchases were exchanges, grain taking the place of money as a medium of exchange. Fruit trees were set out at an early day, orchards started, and afterwards great quantities of cider were made and consumed, but the first John Gould and Thomas Cutler hardly lived to reach that blissful day. It is safe to assume that during the first years of the settlement, wagons were not in common use.

As the years went on comforts gradually increased. As appears in the inventory of John Gould, who died in 1712, pillions were used, and we can imagine our great-great-grandfathers on horseback in front, and our great-great-grandmothers on pillions behind. Every household contained a gun, and from necessity all the men, and many of the women were familiar with the use of firearms. This was not a border town, but still the Indians in small numbers made occasional incursions. John Gould and Thomas Geary, as already stated, were soldiers in King Philip's War, and later Ebenezer Damon and Joseph Arnold in the war against Canada. Perhaps there were no slaves here in the seventeenth century, but there were sev-

eral in the eighteenth. Timothy Baldwin in 1708 made his will, giving to his wife his "best feather bed with the furniture thereunto belonging, and six pairs of sheets, one paire of them being cotton and lining, and ten pounds in money, the chamber which is in the east end of the House, with the Improvement of a third part of my seller Roome, well and oven, and my Brass Kettle skilet, Iron Pots and Kettels, and all my Pewter During the Terme of her widowhood. Also the use of a good cow and horse, half a hundred weight of good Pork annually, fifteen bushels of Indian corn, five bushels of malt, two bushels of ry, and two Barrils of sider, ten cords of firewood, liberty of raising one swine and of gathering six bushels of apples." Gould's saw-mill was in existence certainly as early as 1708 and quite probably much earlier, being located south of Mill Street, on or near the spot where stood the saw-mill of the late David H. Burnham. A grist-mill was built here by John Gould, Peter Hay, Timothy Baldwin and James Hill in 1737 or 1738. There was also a mill in the early part of the century near the outlet of Spot Pond. The only public building was the school-house in the easterly part of the town near where Charles Buck resides. The appropriations for the school, however, could not have been very munificent if the usual amount was spent in 1713. That year four pounds were voted "to pay for teaching children to write among our inhabitants near Reading." No record is known to exist of a public house prior to the year 1725, but there is a tradition that one was kept at an early day, located a few rods north of South Street, on the Wilson farm. Numerous relics have been ploughed up at this place, one of the most interesting of which was a large mug in an almost perfect state of preservation, similar to what is now known as Flemish ware. In 1725 the population of Charlestown End had been gradually increasing till the number of male inhabitants who were taxed was sixty-five. They were so far from Charlestown that they derived none of the advantages of a connection with the parent town, and suffered all the inconveniences attending a community separated from the church and the school by miles of wilderness. The time had come when they had outgrown the dependence of a distant settlement and aspired to become a separate town. So this year Captain Benjamin Geary and fifty-three others petitioned to be set off, but the town voted not to grant the petition. The General Court, however, in December, 1725, passed the following act:

"Whereas the Northerly part of the Town of Charlestown within the County of Middlesex is competently filled with Inhabitants who labour under great Difficulties by their Remoteness from the place of public worship, and have thereupon made their application to the said Town of Charlestown, and have likewise addressed the Court that they may be set off a Distinct and Separate Town, and be vested with all the powers and privileges of a Town, and the Inhabitants of Charlestown by their agents having consented to their being set off accordingly, and a committee of this court having viewed the Northerly part of the said Town of Charlestown, and reported in favor of the Petitioners. Be it therefore Enacted by the Lieutenant-Governor, Council, and Representatives

In General Court assembled and by the authority of the same. That the Northerly part of the said Town of Charlestown, that is to say all the Land on the East side of Woburn, the South side of Reading, the West side of Malden and the North side of the Fifth Range of the First Division of Charlestown Wood Lots be and hereby is set off and constituted a separate Township by the name of Stoneham. And the Bounds and the Limits of the said Town of Stoneham be according to the agreement made in November one Thousand seven hundred and twenty-five by and between the committee or Agents for and in behalf of the said Town of Charlestown, and the petitioners of the Northerly part thereof, wherein it was consented and agreed, that the five ranges or remaining part of the said first Division do remain to the Town of Charlestown, agreeable to a former grant of the Town made in the year 1657-58, and that the Inhabitants of the Northerly half of Charlestown should have and enjoy that Tract of Land lying in the bounds aforesaid, commonly called and known by the name of Goulds' Farm, now under lease to Messrs. Thomas and Daniel Gould, containing one hundred and ten acres, or thereabouts; also one-half of all the Town's Meadow (and uplands) lying on Spot Pond, both for quantity and quality containing seventy-nine acres (by Captain Burnapp's plat) an estate in Fee with an equal share in Spot Pond, the said Land or the value thereof to be improved for settling and maintaining an Orthodox minister to dispense the word and ordinances among them. The Inhabitants of the said Northerly half of Charlestown being by virtue of the said agreement to be debarred from any claim or demand of and to any Land money, Rents or income of what kind soever, which now are or shall belong to the Town of Charlestown as well those several Farms and Land lying within the Bounds above said, as all other Estate or Income either Real or Personal, and from all demands for High Ways; that so the Town of Charlestown may quietly and peaceably enjoy the same. And further it is to be understood that none of the Land contained in the Two Ranges and Half belonging to the first Division shall on any pretence whatsoever be assessed or taxed by the said Town of Stoneham, except those Lands that shall be put under Improvement, such as mowing, ploughing and pasturing. And be it further enacted by the authority aforesaid, that the Inhabitants of the Northerly half of Charlestown living within the Bounds aforesaid be and hereby are erected with the Powers, Privileges and Immunities that the Inhabitants of any of the Towns of the Province by Law are or ought to be vested with; that the inhabitants of the said Town of Stoneham do within the space of two years from the Publication of this Act, Erect and finish a suitable House for the public worship of God, and so soon as may be procure and settle a Learned and Orthodox minister, of good conversation and make provision for his comfortable and honorable support; and likewise provide a school-master to instruct their youth in Writing and Reading, and that thereupon they be discharged from any payment for the maintenance of the ministry and school in the Town of Charlestown, Provided that the Inhabitants of Stoneham nevertheless, are to pay their respective proportions to Two several assessments already made by the Assessors of Charlestown for County and Town charges, and David Gould, one of the present constables of Charlestown, is required to collect and pay in such parts and proportions of each of said assessments as are permitted to him by the said Assessors of Charlestown according to the powers and directions in the warrant duly made and delivered; anything in this Act to the contrary notwithstanding. December 17, 1725, This Bill having been Read three several times in the House of Representatives passed to be enacted. William Dudley Speaker."

The first town meeting was held December 24, 1725. Timothy Baldwin Sen. was chosen moderator and Daniel Gould Jr., town clerk. The select men the first year were Captain Benjamin Geary, Captain John Vinton, Mr. Peter Hay Sr., Mr. Timothy Baldwin Sr., and Lieut. Timothy Wright. The following is the list of the remaining male inhabitants who were residents this year and paid a tax.

John Gould Sr., Daniel Gould Sr., Daniel Gould Jr., Daniel Green, Abraham Gould, William Rogers, Thos Cutler Sr., Benjamin Geary Jr., William Lewis, Benjamin Wesson, Benjamin Gould, John Hay, Ebenezer Phillips, Samuel Williams, Jonathan Green, David Green, John Green, John Cowdrey, David Gould, Thomas Geary Sr, Joseph Arnold, Ebenezer Knight, Edward Bucknam, Stephen Parker, Ebenezer Parker, Samuel Williams Jr., John Vinton Jr., Stephen Williams Jr., Timothy Wright Jr., John Dexter, Peter Hay Jr., Ebenezer Damoo, Thomas

Grover Sr., John Souther, Nathaniel Souther, Thomas Geary Jr., John Geary, Thomas Geary, Jonathan Griffin, John Howe, Samuel Holden Jr., Joseph Holden, Jacob Howe, Anthony Hadley, Ephraim Larabee, Samuel Sprague, Richard Belcher, John May, James Taylor, Samuel Wesson, Jeremiah Belcher, Ebenezer Cutler, James Hill, Joseph Bryant, Grover Scollay and Thomas Williams.

The first business of importance which came before the town was the election of committees to provide preaching and to take preliminary steps for the erection of a meeting-house, which was raised the next year. It was located in the easterly part of the town, a few feet southerly from the residence of Charles Buck, and was a plain building thirty-six by forty feet, with galleries on three sides and posts twenty feet high. There were three doors, one on the east, south and west. It could make no pretensions to architectural beauty; at first, was destitute of paint, and for years its bare walls looked down upon a congregation who did not enjoy the luxury of pews. It was spoken of by a person who remembered it in her girlhood, as having no belfry or tower, and no entry, and was situated on the easterly side of the road. The pulpit stood at the north end. It was voted "that the meeting-house shall stand between the black oak tree and the red oak tree, upon the hill near the east end of the school-house." Stones for the foundation were laid by Ebenezer Phillips, and the building was framed by Lieut. Timothy Wright. Our ancestors were men of strong religious convictions and in the main were severe and exemplary in their morals, but in some respects they were more convivial than their descendants.

On the day when the inhabitants assembled to raise the frame of the meeting-house it must have been an occasion of great hilarity and festivity. Refreshments were served, and it requires no flight of the imagination to suppose that the pious enthusiasm of the earnest workers as they erected the great posts and lifted up the heavy beams may have been somewhat stimulated by liberal potations; for besides a quantity of cider they consumed five gallons of rum. For many years there were no pews, the people sitting upon benches, the men on the west side, and in the west gallery, and the women on the east side and in the east gallery, the negro men occupying the rear seat of the men's gallery and the negro women occupying the rear seat of the women's gallery. Numerous town meetings were called, many appropriations made, and a considerable time elapsed before the edifice was completed. Four years after its erection a minister's pew was built and at the same time the doors and window-sashes were painted, also the eave troughs, weather-boards and end-boards. It appears upon the records that the women of Stoneham contributed towards the completion of the house, £5 11s. 9d., to which additions were made by the gentlewomen of Malden, Woburn and Reading. The first town-meeting was held in the school-house, and those persons only were allowed to vote who were freeholders, having an estate of freehold in lands within the Prov-

ince of forty shillings per annum, or other estate to the value of forty pounds sterling.

About an acre of land was purchased of James Hay on which to locate the meeting-house, and at the same time a quarter of an acre for a burial place, it being the northerly part of the old graveyard south of Pleasant Street. Town meetings were called and conducted almost identically the same as those of to-day. By means of them the people learned to govern themselves. They were the very foundation of our republican institutions. De Tocqueville says, "Town meetings are to liberty what primary schools are to science; they bring it within the people's reach; teach them how to use and how to enjoy it." About ten or twelve years after the completion of the meeting-house a vote was passed that family pews might be built which should be "lotted out to such men as appeared to be the highest in rate and right;" and by the subsequent distribution, it would appear that the men of the most consideration were the Hays, the Goulds and the Greens. It may be interesting to pause for a moment and consider the appearance of Stoneham at this period. There were probably about fifty houses in the town, but not the remotest semblance of a village. Almost every man was a farmer, some of them combining with agriculture the occupations of cordwainer, weaver, carpenter or blacksmith. Stoneham was inferior to most of its neighbors in territory, population and wealth. We may suppose its population to have been between two hundred and fifty and three hundred. Although numerous clearings had been made, and many farms were under cultivation, a large portion of the territory must have been covered with forest. Let us start from the meeting-house as a centre, perambulate the town and make as perfect a picture of it as we may. There were but three or four highways, none of them straight, but crooked country roads. In explanation of the circuitous course of the old road over Farm Hill, as it existed forty years ago, it used to be said it was laid out by a drunken man. A large portion of the houses were scattered about on lanes and private ways. The buildings in a country town a century and a half ago did not present the neat and thrifty appearance which characterizes a New England village to-day. The dwelling-houses were generally dark and weather-stained. It was the day of things useful and not ornamental. The meeting-house stood on one of the few highways facing to the south, on an elevation overlooking the site of the future town. Proceeding northerly, the first house a little beyond the church, and on the west side of the road, was owned by James Hay, although he himself did not live in it, being a shopkeeper in Charlestown. The next one, not far distant on the right of the road, was probably where Andrew Phillips had lived, the one which Nathaniel Dunton built. Keeping on until we come to Spring Street, somewhere hereabouts a private way led to the east,

on which lived Daniel Green, Ebenezer Phillips and, a little later, Thomas Knight and Ephraim Brown. Winding our way up through Bow Street, by the stand-pipe, the next old-time citizen we know of on the left, was John Souther (the Oakes Green place). It was here the church was organized. Souther's next neighbor on the north, and on the same side of the street, was Joseph Bryant. From Bryant's the road followed the present course of Green Street till its intersection with Elm, and then easterly by the latter to its junction with the old road to Wakefield, and by the last-named old road till it reaches the foot of Cowdrey's Hill. This was one of the very earliest highways of Charlestown End, and on it lived, in 1725, William Rogers, Daniel Gould, Sr., Daniel Gould, Jr., and Abraham Gould. As before stated, William Rogers was located on the Captain Buck farm. Daniel Gould, Sr., afterwards Deacon Daniel, a short distance beyond Rogers', on the opposite side of the way. On beyond Daniel Sr., was Abraham, and still farther on, Daniel, Jr., otherwise called Lieutenant Daniel, who had inherited the home farm of the original John Gould. All of the Goulds were on the left-hand side of the road as we go towards Wakefield. A lane, we suppose, led from the road near Rogers' house to Thomas Cutler's (the Doyle place).

Retracing our steps once more to the meeting-house and proceeding south by the general course of the present Summer Street, we pass between the house of John May on the left and his blacksmith shop on the right. May lived in the old house now owned by Miss Lynde, which is a building of some historic interest, and will be referred to at a later period. Almost opposite the May house a lane from the road on the west approached the homestead of Thomas Geary, (the Zac Geary house) which had been sold to him by the children of Deacon Nathaniel Lawrence. Following the circuitous course of the highway in the direction towards Woburn, (now Winchester), our attention is first attracted to a house on the north side of the road, where it is supposed Richard Belcher lived at the time of his death in 1720. It was probably occupied at this time by his children and widow. Here lived a century later Ebenezer Bucknam, and within a few years was owned and torn down by Hiram Marston. On the south side of the way between Belcher's and Woburn line, were one and perhaps two houses occupied by Joseph and possibly Samuel Holden. On the north side there was a house a few rods east of Woburn line owned at that time by Joseph Underwood, and occupied perhaps then, at all events a few years later, by Stephen Parker. This was where Eleazer Bateman had established himself forty years earlier. Turning to the present Warren Street where it connects with Marble Street, if we wish to trace the old road we shall follow Warren Street to Central Square, cross the Square to Central, down Central to Elm, up Elm to Waverly over Farm Hill by the way of High Street. Of course these modern

streets have been widened and straightened but this was one of the old country roads from Reading to Woburn a century and a half ago. When the town was organized, Edward Bucknam, Timothy Wright and Peter Hay owned houses on or near it, the locations of which have already been given. It passed by the doors of Grover Scollay and Captain Benjamin Geary, on and over Farm Hill. The central part of the village was then largely a forest. East of the road a path led down to the mill near which John Gould is supposed to have lived. Near the junction of Central and Elm Streets a private way ran towards the Woburn road by the houses of Timothy Baldwin, Sr. and Jr. From near the house of Peter Hay, Sen., a bridle way led easterly towards Reading by the house of Ebenezer Damon. The present North Street ran from Reading to Woburn through the Charlestown Farms. Pond Street was an old road extending towards Malden, passing near the houses of Captain Vinton, David Gould and perhaps Anthony Hadley. From near the meeting-house a private way led to Green Lane and Melrose Highlands. Town government and town offices have changed but little since then, but some of the customs which prevailed at that time seem quaint. It carries us back a long time when we read from the records the vote "that Ebenezer Parker shall be tything man, that hogs shall go at large and that no shepherd shall keep sheep in the town of Stoneham, that Deacon Daniel Green shall set the psalm for the Sabbath day, that five pounds be raised to provide the town with a pair of stocks, and five pounds more for renewing the town's supply of ammunition." The town well organized and a meeting house built measures were taken to secure a settled minister, and procure the services of a school-master. The former was considered a question of such vital importance to the welfare of the people, that it was voted in town meeting assembled to set apart a day for prayer to ask God's direction in the choice of a minister, and so strong was their religious faith, that they doubted not their prayers had been answered when in the following month they elected the Rev. James Osgood. In their selection of a person to fill the pastoral office, they seem to have been as difficult to satisfy as their descendants. Several were heard on trial, before one was chosen. The first preacher who was hired for some months was Rev. Joseph Champney. Mr. Osgood, who came from Salem was called in October, 1728, accepted in April, 1729, and was ordained on September 10th. The ministers assisting at the ordination were Rev. Richard Brown, of Reading, Rev. Samuel Fiske, of Salem, Rev. Hull Abbot, of Charlestown, Rev. Benj. Prescott, of Salem, Rev. Joseph Emerson, of Malden, and Rev. Daniel Putnam, of Reading. The town had voted him a salary of £110 per annum, £172 for a settlement, and a few years later purchased a wood lot and agreed to furnish him with ten cords of wood each year. Mr. Osgood purchased land and built him a house which was a fine

one for those times, and he remained here till his death in 1746. The members of the church who were dismissed from the First Church, of Reading to form the church at Stoneham were Daniel Gould, Daniel Gould, Jr., Ebenezer Knight, David Gould, Ebenezer Parker, Abraham Gould, Edward Bucknam, Thomas Cutler, Joseph Bryant and Jonathan Griffin. These with Ephraim Larrabee, Jacob Howard and Samuel Sprague on July 2, 1729, signed the church covenant. The women who severed their connection with the Reading church, some months later to join the Stoneham church, were Anna, wife of Samuel Holden; Naomi, wife of Joseph Holden; Eliza, wife of Benj. Gary, Jr.; Hannah, wife of Thomas Gary, Sr.; Abigail, wife of James Taylor; Mary, wife of John Souter; Hannah, wife of Peter Hay, Jr.; Sarah, wife of John Gould; Judith, wife of John Gould, Jr.; Eliza, wife of John Gary, and Eliza, wife of Benjamin Gould. From the church at Malden came Judith Lynde, Mary Green, John Green, Isaac Green, Joseph Green, John Dexter, and the wives of the three latter. From the church in Boston came Elizabeth Holden. Some of those who were dismissed from the church at Malden lived in what is now known as Melrose Highlands, a territory which a few years subsequently was annexed to Stoneham, and remained a part of this town till it annexed to Melrose in 1853.

Two of the best sources of information from which to obtain materials for a town history are the records kept by the church and the town clerk. They are pictures of the times, skeletons upon which it requires but little imagination to construct a complete image, representing the customs and habits of life and important events which prevailed in a New England town one and two centuries ago. A most interesting little book is the one in which appears the transcript of the proceedings at church meetings kept for years in the neat and distinct handwriting of Mr. Osgood. For instance, take the occasion when the first deacons were chosen and read Mr. Osgood's record of it. "Att A Chh. Meeting in Stoneham Called by the Rev^d. Pastor of sd Chh on Novemb^r 27th, 1730 at the meeting House in sd Town. The Pastor opened the meeting with Prayer Imploring a Blessing upon their Chh and for Direction & Aid in the work that was before them Viz. in the election of 2 of the brethr^a that might be Best Qualified to Sustain the office of Deacons to the Chh. Then the Brethr^a at the request of the Pastor bro' in ther written vote on Papers. The 1st vote for the 1st Deacon by the Brethr^a of this Chh that were present came out upon Broth^r Dan^l Gould Sen who accordingly accepted of said election. The 2nd vote on written Papers for the 2nd Deacon to this Chh. fell upon Broth^r Dan^l Green, who accordingly stands elected & has accepted of sd election. Nothing further being agitated or acted upon. The Pastor again Prayed with them & Gave thanks to God for his assistance & Recommended the Persons Elected to the office of Deacons to the Grace of Gd that they

might be made Blessings to the Chh & Ans' the Charact' of Deacons & be Enabled to fulfill all parts of ye office. So the Breth^m were Dismist by the Pastor.

"As attests James Osgood Clerk of s^d Chh."

"The second day of March, 1746, Rev. Mr. James Osgood died and was Interred the fifth when his Corpse was carried to ye Meeting-House and there attended to the grave by several ministers and a great Concourse of People." In 1729 the town voted to raise £9 for a school; and for the first time chose a committee to procure a school-master. In 1731 the selectmen laid out a road on the easterly side of Spot Pond to Charlestow (now Medford) line. Previous to this there had been a private way over which people had been accustomed to travel, but it was necessary to take down bars and open gates and the time had come when public convenience required a highway. The exact course which the way should run seems to have caused a good deal of contention between the town and some of the land owners, especially Timothy Sprague of Malden, who owned the land at the outlet of Spot Pond. Litigation followed, and Sprague obtained judgment and execution against the town. The country road then run to Malden, and the new road connected with it near the northeast corner of the pond running south. Finally in 1734 an agreement was made with Sprague by which the course of the road was fixed and a watering-place secured. Also in 1731 the "selectmen laid out an open Highway over the land of Stephen Parker from the Country Road between said Parker's house and barn" to Woburn. "Said way is to lie open to all people to pass as long as there is free liberty to pass from said way over Richardson's land and the other Woburn land to the Country Road near to Samuel Williams in Woburn; and in case any of the owners of Woburn land do stop or hinder the free passing from said way to the Road by Samuel Williams in Woburn as aforesaid, then the way over Parker's land shall no longer be a way." Stephen Parker, it will be remembered lived north of Marble Street, and this was probably the road from Marble Street towards Montvale. It may be interesting to the public-spirited citizens of to-day to know what our fathers raised and appropriated for town expenses. The annual meeting for the election of officers during the first few years was held in March and the meeting for raising money in May. In 1731 they voted to raise £9 for a school for "Reding and Righting, £2 for the Poor and for sweeping the meeting-house and for looking after the meeting house and £40 for the Highways." This was exclusive of the minister's salary, the larger part of which was paid with interest derived from the sale of the Gould farm. John Vinton, Esq., was sent a representative to the General Court in 1734,—the only instance prior to the nineteenth century that the town was represented, except in 1775, when Col. Jos. Bryant was sent a representa-

tive to the General Court, and Capt. Samuel Sprague to the Provincial Congress.

Our ancestors loved office and distinction, were punctilious of all titles from ensign to colonel and deacon, but chose to do without a representative because it involved expense for his service. But little of the highway tax was raised in actual money, most of it being worked out on the roads, a custom which prevailed till a comparatively recent time. Great care was taken that no one should obtain a settlement if it could be prevented, lest such one might become a public charge, and so notices were served upon people coming into town, of which the following is a sample:

"Middlesex ss. To Mr. Ebenezer Phillips, constable for the town of Stoneham and to you greeting; You are in his Majesty's name required forthwith to warn out of the town of Stoneham Martha Tidd and her child, late of Woburn, who are at the house of John Vinton, Esq., of Stoneham, and that they depart the said town of Stoneham speedily, they and their children, or else they may expect further trouble. Hereof fall not and make a return of your doings to myself at or before the 19th day of May. Dated at Stoneham, the seventeenth day of May Anno Domini 1736, and the ninth year of our sovereign Lord King George the Second over Great Britain. By order of the select men. Daniel Gould, Jr., Town Clerk."

One of the great evils with which our forefathers had to contend during the last century was the fluctuation in the value of money on account of the large emission of bills of credit and the consequent inflation of the currency. Prior to 1745, when Louisbourg was captured, specie had almost been driven from the country, and it was flooded with a depreciated currency. Consequently many contracts were made payable in the staple products, such as corn and pork. The purchasing value of the pound was constantly falling. No men suffered from this condition of affairs more than the ministers, and for this reason there was a constant friction between the successive pastors and the people about their salary, which is illustrated by the following letter from Mr. Osgood:

"To the select men of Stoneham To be Communicated to the Inhabitants of said Town at their Town Meeting in May, 1737. Gentlemen. I gave my answer to settle among you in the work of the gospel ministry, April, 1729, and in my answer I then Declared my acceptance of what you then voted me for my settlement, and my yearly salary. But in my further answer I further inserted this: (That I do expect that you will Readily & Cheerfully come into those Further allowances which in the course of my ministry I shall stand in need of for my Comfortable Support. I am coming to a Family Relation among you & By Reason of the Bills of Credit Being so much sunk in their value in Exchange Between Silver & ye Paper Currency; for Silver money has risen from 18 shillings to 27 shillings an ounce in Paper Bills; so that the Paper Bills sinking so much in their Credit, Cloathing, Provisions and Fire wood Have Risen in their price there updo, that with the one Hundred and Ten Pounds which you voted me for my annual Support I cannot Purchase near equal to the value now in the articles with the said one Hundred and Ten Pounds now as I could when I first settled among you. Therefore I w^d Request of you to allow me a valuable consideration for the sinking of Bills of Credit whereof I may be Enabled to comfortably subsist and Live amongst you. I do spend the Produce of my own Place among you. James Osgood, Clerk. Stoneham, May 5, 1737."

In 1739 David Gould and Ebenezer Knight were chosen "to see to the preservation of the Deer," and after that time deer-reeves were annually chosen. The town having buried their first pastor, they sought

a successor and secured the Rev. John Carnes, who was ordained December 17, 1746. Mr. Carnes when he came here was a young man twenty-two years of age and a graduate of Harvard College. He remained till 1757, was afterwards installed at Rehoboth, was subsequently a chaplain in the Revolutionary Army from 1776 till the close of the war, and died at Lynn, October 20, 1802. It was during the pastorate of Mr. Carnes that the old parsonage on Central Street was erected in 1747. Mr. Carnes appears to have had more trouble about his salary even than Mr. Osgood, and indulged in some rather pointed correspondence with the town. On May 17, 1750, which was the day of the town-meeting, he sent them the following letter:

"To the inhabitants of the town of Stoneham, Gentlemen:—I have year after year desired you to consider me with regard to my Salary, but notwithstanding this, and notwithstanding I have sunk by ye full several Hundred Pounds, I have never had since my ordination but a poor pitiful consideration of £80 Old tenor. Whatever you think of it, gentlemen, you have been guilty of great Injustice & oppression and have withheld from your minister more than is meet, not considering what you read, Prov. 11, 21, 25, which Verses run thus. There is that scattereth and yet increaseth, and there is yt withholdeth more than is meet but it tendeth to poverty. The liberal soul shall be made fat; and he yt watereth shall be watered also himself. You have never made good your contract with your minister, and was it not for some of his good Friends in this Town and other Places, he must have suffered. Time has been when I have had no corn nor meal in my House & when I have wanted many other necessaries and havent had one Forty shillings in ye World, nor yet Thirty shillings, and when I have been obliged to live by borrowing; and this is ye case now. But I shall say no more about my circumstances and your Injustice and oppression. What I desire of you now is that you would at this meeting act like honest men and make good your contract that you would make such an addition to my Salary for the present year as that I may be able to subsist. I desire nothing that is unreasonable, make good what you first voted me and I shall be easy. I remain your friend and servant, John Carnes, P. S. Gentlemen—Please to send me word before your meeting is over what you have done, yt I may send you a Line or two in order to let you know I am easy with what you done or not; for if I cant get a Support by the ministry I must pursue something else, must betake myself to some other business and will immediately do it."

The civil and religious duties of those days must at times have been pursued at a disadvantage. The people sat through the long service in a cold and comfortless church, with no means of artificial heat. At the annual town-meetings in March they fulfilled the letter of the law by assembling at the meeting-house, acting upon a part of the warrant and then adjourning, often across the way to the hospitable inn of Lieut. James Hay, where, doubtless amid the fragrant fumes of steaming punch and hot flip, they yielded to the seductive influence of good fellowship, and finished the town's business with great unanimity and satisfaction. Competent men were kept in office for long periods. Lieut. Dan'l Gould was town clerk and town treasurer almost continuously from 1725 to 1748, and Capt. Jonathan Green held the same office, with the exception of one year, from 1748 to 1769. As has been said, the women sat on the east side of the meeting-house and in the east gallery, and the men on the west side and in the west gallery, although after a few years those of the most consideration were

allowed to build for themselves pews. The colored people, though in a state of slavery, were admitted as brethren and sisters to the church. Mr. Carnes, after a good deal of contention and dissatisfaction about his salary, preached his farewell sermon July 31, 1757, went away with a bitter feeling and apparently reflected upon the conduct of the town in the papers, for it was voted "that the town will make an answer to what the Rev. John Carnes hath put into the public print." Mr. Carnes was succeeded by Rev. John Searl in January, 1759. He had been previously settled in Sharon, Conn., and was a graduate of Yale College. During the first fifty years of the town's history she had been called upon to furnish her quotas to the French and Indian Wars. After the French were driven from Acadia many of them were billeted upon the various towns of Massachusetts. A number were assigned to Stoneham and appropriations voted for their support. An occasional house or barn-raising broke in upon the irksomeness of every-day life, for it was usually made an occasion of great hilarity to which came men and boys from far and near. The items of expense which were incurred at the raising of the barn of Daniel Green, Jr., in 1763, indicate how these occasions must have been celebrated: "English cheese for Raising, 6s. 2d.; 6 Quarts of Rhum, 4s.; New England cheese, 1s. 8d.; Bisket for Raising, 2s.; brown bread for Raising, 1s. 3d.; sugar for Raising, 1s. 2d.; butter for Raising, 8d.; malt to make beer for Raising, 1d." The training of the military company was also a feature of colonial times, and it is rather a suggestive fact that they were almost always summoned to meet at the tavern of James Hay. There was but one school, a schoolmaster being employed in winter and sometimes a schoolmistress in summer. Reading, writing and a little arithmetic were taught, although during the first years the girls did not generally learn to even write, it being considered an accomplishment not necessary for female usefulness. Among the teachers were Captain William Toler, Lieut. Joseph Bryant, Hannah Willy and Joanna Burditt. We may form some idea of the educational attainments required, when we remember that Joanna Burditt, in signing her name, made her mark. Captain Toler was engaged in various occupations, for besides teaching school, he kept tavern and carried on a store in the house heretofore referred to as now owned by Miss Lynde. It was said to have been his custom to send a scholar at eleven o'clock to the tavern across the road from the school to bring him his grog. Stoneham was one of the poorest towns of the county. Her comparative valuation appears from the Province tax assessed upon the different towns in 1754, which was as follows:

Cambridge, £125 14s.; Charlestown, £162 13s.; Watertown, £66 13s. 6d.; Woburn, £117; Concord, £74 12s. 6d.; Newton, £117; Sudbury, £126 10s. 6d.; Marlborough, £126; Billerica, £73 16s.; Framingham, £96 6s.; Lexington, £55 18s.; Chelmsford, £72; Sherburde, £49 14s. 6d.;

Reading, £118 16s. ; Malden, £94 16s. ; Weston, £74 7s. 4d. ; Medford, £93 4s. 6d. ; Littleton, £50 11s. ; Hopkinton, £44 2s. ; Westford, £48 12s. ; District of Shirley, £12 7s. 6d. ; Waltham, £62 5s. ; Townsend, £27 10s. 6d. ; Stow, £44 2s. ; Stoneham, £31 11s. 6d. ; Groton, £88 17s. ; Wilmington, £36 ; Natick, £25 1s. ; Dracut, £35 8s. ; Bedford, £41 6s. 6d. ; Holliston, £40 2s. 6d. ; Tewksbury, £35 8s. ; Acton, £26 2s. ; Dunstable, £33 11s. 6d. ; District of Pepperell, £28 8s. ; Lincoln, £53 4s. 2d. ; Carlisle, £34 16s.

The inventory of many of the inhabitants in 1761 has been preserved, signed by each individual, and is valuable as it affords us a view of the material prosperity that then prevailed. Captain Jonathan Green, who, at that time, was one of the most substantial, prosperous and intelligent citizens of the town, owned 1 dwelling-house, 2 servants for life, 3 horses, 6 oxen, 9 cows, 20 sheep, 16 bushels of Indian corn, 14 bushels of rye, 17 bushels of barley, 30 bushels of oats, 30 barrels of cider, 108 acres of pasturage, 12 acres of tillage, 2 acres of orcharding and 33 acres of mowing land. Timothy Taylor, who owned the John Bucknam farm, returned 1 dwelling-house, 2 horses, 4 oxen, 3 cows, 3 swine, 70 acres of pasturage capable of pasturing 20 cows, 8 acres of tillage land (the ordinary produce of which is 100 bushels of Indian corn, 32 bushels of rye and 34 bushels of oats), 2 acres of orcharding (the produce was 24 barrels of cider), 18 acres of mowing land, 14 tons of English hay and 6 tons of meadow hay.

Joseph Hill, the father of James and the grandfather of John and Luther Hill, was at that time a young man, and was taxed for 1 horse, 2 cows, 4 acres of pasture land, 3 acres of tillage, 1 acre of orcharding and £6 money at interest. In 1767 there were 78 ratable polls, 59 dwelling-houses, 1 mill, 10 servants for life, £27 6s. 8d. trading stock, £1160 6s. 8d. money at interest, 42 horses, 41 oxen, 222 cows, 311 sheep, 33 swine, 2346 bushels of grain, 326 barrels of cider, 102 tons of English hay and 205 tons of meadow hay.

Captain Peter Hay, son of the original Patrick, or Peter Hay, was one of the leading inhabitants during the middle of the century, a prominent man in public affairs, holding many offices and possessing a considerable estate. His homestead was near the Farm Hill Station, the house afterwards known as the Hay Tavern. Through the yard between the house and barn led a private way northerly to the Captain Rufus Richardson Lane, and so on by the houses of Caleb, Elijah, Oliver and Thaddeus Richardson, westerly to the Woburn road. When he made his will, in 1768, the original pioneers were all dead, and a second and third generation had taken their places. Some of the changes which had occurred during the first century are indicated by Captain Hay's will. After commending his soul to God, committing his body to the earth and expressing his faith in the resurrection of the body, he gives to his wife, Isabelle Hay, indoor movables, etc., 2 cows, 2 sheep, top-chaise and use of horse, the use of one-half of dwelling-house, 15 bushels of Indian corn and meal, 3

bushels of rye, 1 bushel of malt, 150 pounds of pork, 2 barrels of cider, 50 pounds of beef, 8 bushels of potatoes, $\frac{1}{2}$ bushel of beans, 8 cords of wood, etc., per annum.

About 1734 Reuben Richardson came from Woburn and settled on what is now known as the Thaddeus Richardson Farm, which was retained by his descendants for more than 150 years. His nephew, Oliver, and sons, Elijah and Caleb, occupied farms between his and that of Captain Hay.

From the incorporation of the town to the outbreak of the Revolution but few events of a public nature transpired to vary the monotony which usually prevailed in a thinly-settled community.

From time to time, as expeditions were planned against the French in Canada, volunteers were called for, and soldiers impressed. Many a Stoneham boy, as he returned from Louisbourg, Fort William Henry and Crown Point, must have been a welcome guest, sitting before the blazing fire and recounting the thrilling tales of Rogers' Rangers, and Indian warfare. During the middle of the century the long-continued peace which had blessed the people for over a generation was broken, and for a period of years savage war poured forth destruction along the northern and eastern frontiers. Stoneham was called upon to contribute her quotas, and she responded with the same alacrity that has distinguished her in later times. Among her sons engaged in the war, Thomas Gould and Titus Potamia in 1746 were stationed at Fort Richmond, on the Kennebec. In the Crown Point expedition of 1756, in Captain William Peabody's company of Colonel Plaisted's regiment, Peter Hay was lieutenant, Thomas Hadley and Thomas Johnson were corporals. Among the privates were John Cades, Jonathan Griffin, Timothy Holden, Nathan Holden, John Carter, Titus Potamia, Jonathan Eaton and Philip Gross. Two or three of these were born in Stoneham and went from other towns. These men were stationed at Fort William Henry, at the head of Lake George, from early in the spring till late in the fall. Nathan Holden died there. The list of soldiers in the French and Indian Wars also includes the names of John Hill, Thomas Larrabee, John Converse, Ephraim Brown, Thomas Sprague, Timothy Wright, Aaron Brown, Daniel Connery, Abial Brown, John Geary, Daniel Knight, Michael Negell, Simeon Wyman, Fraucia Phillips, Oliver Gross and Jonathan Morrison. A few of these were hired from other towns to fill our quota. John Hill was a sergeant in the company of Ebenezer Nichols, of Reading, and was in the expedition of 1757-58. Four Stoneham men were also in the famous Rogers' Rangers, whose exploits about Lake George and along Lake Champlain, in the campaigns of 1757-58, fill some of the most thrilling chapters in savage warfare. The French and Indian War, which fell like a thunderbolt upon the colonists, came as a blessing in disguise, for it prepared them for the greater conflict which so

soon was to loom up in the future. Greater events were casting their shadows before. Three millions of people are girding themselves for a struggle with the mightiest power on the face of the globe. The administration of Chatham had covered the British name with imperishable glory, but the government is now fallen into the weak hands of Lord North, whose ministry is assailing the rights we have enjoyed for five generations. The Stamp Act, the Tea Tax, the Boston Port Bill, the Military and Restraining Acts had aroused and incensed the Colonies. The Reconstruction Acts were intended to effect a complete revolution of the government, transferring the powers of the people to the creatures of the Crown. The jurors were to be appointed by the sheriff; the judiciary was to be controlled by the King; certain classes of criminals could be transferred for trial to a distant colony of the mother country! the matters considered in town-meetings were to be under the direction of the Royal Governor! the people were alarmed, their liberties were being threatened; they elected delegates and organized Provincial Congresses. Entreaty and expostulation were followed by resistance. Military stores were being collected, companies of minute-men raised, and the genius of Sam Adams and his compatriots was organizing revolt. The towns unanimous, war meetings held, resolves passed, men furnished, supplies voted, the first volley fired, and the conflict commenced. Stoneham in the mean time had not been idle. The walls of the old meeting-house resounded with the patriotism of our great-grandfathers. It was there that they met and gave utterance to the sentiments that swept like a whirlwind over the Province of Massachusetts Bay and extended to the other English provinces in North America. There were held the war meetings of the Revolution, the Committee of Correspondence chosen, and the resolutions adopted which declared the rights of the colonists, and pledged to the common cause the lives and property of the freeholders and inhabitants in town-meeting assembled. Meeting after meeting was called to consider the questions which were agitating the country.

In January, 1773, a long communication was adopted in town-meeting, and dispatched to Boston, which deserves attention, for it is a full description of the political questions of the day, and was probably written either by the minister, John Searle, or else was framed in accordance with a general form adopted by the other towns. It contains these passages: "We fully join in sentiment with you, that the natural liberty of man is to be free from any superior power on earth, unless justly forfeited by some injurious abuse of it. The right of freedom being the gift of God Almighty, it is not in the power of man to alienate this gift." "It is a point of undoubted evidence with us that the Commons of Great Britain have no right to seize upon the properties of the colonists; that the colonists are well entitled to all the essential rights, liberties and privileges of men and freemen

born in Britain. In special, we are deeply affected with some late threatening innovations upon our Constitution; that the Governor of this province is made independent of the general assembly by his support, whereby the ancient connection between him and this people is weakened, the confidence of the Governor lessened, the equilibrium destroyed, and our happy Constitution essentially altered." Again, in August, 1774, was passed the following covenant:

"We, the inhabitants of the town of Stoneham, being legally assembled, sincerely acknowledge our strict attachment to the Constitution of our nation, and our unfeigned loyalty to our rightful lord and sovereign, King George the Third. Ardently wishing that we might ever live in the utmost harmony with Great Britain. Yet we are driven to the disagreeable necessity to say that, having taken into serious consideration the precarious state of the liberties of North America, and more especially the present depressed condition of this insulted province, embarrassed as it is by several acts of the British Parliament, tending, as we apprehend, to the entire subversion of our natural and charter rights, among which is the act of blocking up the harbor of Boston. Therefore, we do solemnly covenant and agree with each other

1. That henceforth we will suspend all commercial intercourse with Great Britain until they shall afford us relief. 2. That we will not buy, purchase or consume any goods or merchandise which shall arrive in America from Great Britain from and after the last day of September next ensuing. These things we solemnly promise to observe, provided no better scheme shall be devised, to answer the same end, by the Congress who are to meet the next month at Philadelphia to consult the general political interests of America, and provided a majority of the inhabitants of the English Government of North America bind themselves by the covenant above-mentioned, or one essentially similar to it; further provided, that we hereafter shall think of no further method that shall be more worthy of our choice."

The population was small, but a common enthusiasm possessed the hearts of the whole community, and a company of minute-men was organized, which comprised nearly all the inhabitants capable of bearing arms. Tradition says the place of rendezvous was in front of the house of Deacon Edward Bucknam, and that it was arranged they should be called together by firing of alarm-guns in front of the meeting-house. During the winter and early spring of 1775 they drilled and held themselves ready for service at the shortest notice. Rev. Caleb Prentiss, of Reading, under date of February 27th, in his diary, makes the following entry:

"At about 3 o'clock A.M. an alarm was made, the drums beat to arms, the bell was rung and alarm guns were fired in the Parish. The report was that a regiment of the Cambridge troops had landed at Marblehead and marched to Salem to take some cannon there, and that the people were defending the cannon, and wanted assistance. The people were mustered, and before daylight were upon the march towards Salem. Having marched about five miles we were informed by the Lynn End company, who were returning, that the Regulars were retreated without the cannon, embarked and set sail, upon which we returned. On our return we met the West Parish company and the Stoneham company, all which joined together, returned in order to this Parish, and went through the military exercise. The whole were more than two hundred."

"It was twelve by the village clock
When he crossed the bridge into Medford town."

We may suppose an hour or two later, on the morning of the eventful 19th of April, 1775, a messenger knocked at the door of Captain Sprague and announced that the British troops were on the march to capture or destroy the military stores at Concord. At

all events, the alarm was given, the company assembled and they marched to Lexington, reaching there in time to intercept and pursue the British on their retreat from Concord. Before reaching Lexington it is said the company separated and scattered themselves about in small groups. Ebenezer Bucknam, Timothy Matthews and James Willy were together. A bullet passed close to the head of Bucknam and through the hats of both Willy and Matthews. Another member of the company was Josiah Richardson, of whom Mr. Dean, in his history, says, "Asahel Porter, on the morning of the nineteenth of April, was desired by a neighbor, Josiah Richardson, to proceed with him towards Lexington about three o'clock A. M. Somewhere on the way they discovered some British Regulars. Porter and Richardson were also seen by the Regulars and were taken by them. Richardson requested permission to return and was told by the individual to go to another person who would no doubt give him a release, but in case the second person he went to, told him to run, he was by the first ordered not to run; being informed that if he did run he would be shot. Richardson did as he was told to do; and though he was told to run, he walked away and was not injured. The reason why he was ordered to run was this! That the guard might think him a deserter and thereby in the discharge of their duty, shoot him. Mr. Porter not being apprised of their artifice in telling him to run, got permission in the same way as Richardson. Having liberty to go, he set out upon the run. On getting over a wall, a short distance off, he was fired upon and received his death wound." His bones now lie in Lexington with the seven who fell on that morning while defending their rights as freemen. Samuel Sprague was captain of the company, Joseph Bryant lieutenant, Abraham Gould ensign, John Bucknam and Daniel Bryant sergeants, David Geary and Joseph Geary drummers, and the men were Caleb Richardson, Josiah Richardson, Charles Richardson, Ephraim and Samuel Brown, Jacob Gould, Amos Knight, James Steele, Benjamin and David Blodgett, Jacob Gould, Jr., Ebenezer Bucknam, David Geary, Thomas Geary, John Holden, James Willy, Thomas Sweetser, Joseph Atwell, Elias and Ebenezer Bryant, Timothy and Ezra Vinton, Oliver Richardson, Moses Hadley, Thomas and John Knight, Jonathan, Daniel and Daniel Green, Jr., John Crocker, Benjamin Taylor, Nathan Willy, James Hay, Jr., Timothy Wright, Jr., Daniel Hay, Peter Hay, Jr., David and William Hay, John Wright, Daniel Gould, Jr., Samuel Ingalls, John Green, David Gould, John Benjamin, William Person, Joseph Matthews, William Connery, Aaron Putnam, Eben Lawrence, Thomas Vinton, Jacob Cutler, John Geary and Thomas Watson. The British, after retreating to Boston, were besieged by the Provincial troops and Captain Sprague's company was probably engaged for some time in the siege, for it appears by their muster roll that many of them were in the service at that

time during a period varying from a few days to two or three weeks. The first shot over, the war fairly commenced, and the history of Stoneham was like that of almost every other Massachusetts town. She sent Captain Sprague and Major Joseph Bryant to represent her in the Provincial Congress and General Court.

Her sons were with Montgomery of Quebec. They witnessed the surrender of Burgoyne at Saratoga; were at Rhode Island; in camp on Winter Hill; and formed part of the Continental army on the Hudson. William Connery was probably in the battle of Bunker Hill, William Deadman was taken prisoner at Fort Washington. Among the soldiers in the subsequent years of the Revolution were Joseph Bryant, William Deadman, Samuel Brown, John Boyd, William Connery, Reuben Geary, Henry Hawks, John Hill, Daniel Holden, Samuel Ingalls, John Knight, John Noyes, David Blodgett, David Geary, Aaron Putnam, Joseph Geary, Joseph Bryant, third, John Bryant, Samuel Call, Elias Bryant, Daniel Bryant, Aaron Parker, Benjamin Taylor, John Thayer, Benjamin Eaton, Jonathan Farley, Thomas Hay, Eli McIntire, Joseph Matthews, Jacob and George Brown, Peter Hay, Thomas Hadley, Ralph Doyle, John Holden, Daniel Hay, Joseph Holden, Ephraim Woodward, Ebenezer Bryant, Samuel Clapp, John Wright, Jabez Upton, David Gould, John Bucknam, Richard Holden, Samuel Howland, James Weston, Joshua Geary, Job, John and Titus Potamia, Isaiah Barjona, Cato and Sharper Freeman, and Cato and Pomp Green, of whom the last eight were negroes, and some of them obtained their liberty by enlisting in the army. Some of these men probably were not citizens of Stoneham, but were hired by the town. Among her military officers were Major (afterwards Colonel) Joseph Bryant, Captain Abraham Gould, Lieutenant John Bucknam, Lieutenant (afterwards Colonel) Joshua Burnham, Lieutenant Daniel Bryant, Captain Josiah Green and Lieutenant John Holden. No likenesses are known to exist of any of these men, so it is interesting to read the description of some of them and imagine, so far as we may, what was their personal appearance. In 1780 Reuben Geary was nineteen years old, five feet six inches high, light complexion.

"Joseph Matthews, 31 years old, 6 feet high, light complexion; George Brown, 17 years old, 5 feet, 3 inches high, light complexion; Joseph Holden, 17 years old, 5 feet, 7 inches, light complexion; Jobo Holdeo, 19 years old, sandy complexion; Daniel Bryant, 20 years old, dark complexion; Daniel Hay, 38 years old, dark complexion. In 1778—John Hill, 16 years old, 5 feet, 1 inch; Jacob Browe, 25 years old, 5 feet."

John Noyes and William Connery went forth from their homes never to return. Ephraim and George Brown and John Noble were prisoners of war. The names of ninety-eight different Stoneham men appear upon the Revolutionary muster rolls. During these years, the town was constantly purchasing stocks of ammunition, furnishing supplies to the army, raising

bounties with which to pay soldiers, and with an unflagging zeal supporting the common cause. In town-meeting December 22, 1773, it was resolved, "first, that it is the opinion of this town that Great Britain has no right to lay a tax on Tea or any other article imported from Great Britain to raise a revenue payable in America, without our consent. 2. Resolved that the late measures of the East India Company in sending Tea to the colonies loaded with duty to raise a revenue from America, are to all intents and purposes, so many attempts in them and all employed by them to tax the Americans. Therefore, 3. Resolved, that the proceedings of the inhabitants of Boston and other towns in the Province for opposing the landing of this Tea are rational; and they are highly honored and respected by this town for their firmness in support of American liberty and that we are ready with our lives and interest to assist them in opposing these and all other measures to enslave our country. 4. Resolved, that we the inhabitants of this town, will purchase no Tea imported from Great Britain so long as it is subject to a duty payable in North America for raising a revenue. Voted that the committee of correspondence of this town be desired to obtain from the town clerk's office an attested copy of this day's resolves and forward the same to the committee of correspondence at Boston." The emoluments of public men during the early days of the Revolution could not have been very tempting if we may judge from the amount voted to Captain Samuel Sprague who had been a delegate to the Provincial Congress. He was allowed four pounds fourteen shillings and four pence lawful money for his time and expenses during twenty-seven and one-half days, or the munificent sum of about fifty-seven cents a day.

Under date of September 6, 1775, the town voted "to choose a committee to take care, to get the wood carried to the army which the General Court has ordered the town of Stoneham to furnish." Again in July, 1776, the town voted "to give something in addition to what the General Court had provided to encourage men to enlist to go to Canada. In the expedition against Canada, Stoneham was required to furnish twelve men.

In 1777 Captain Abraham Gould, Lieutenant John Bucknam and Lieutenant Daniel Bryant were chosen a committee "to hire men for the war in time to come if men are needed."

On June 29, 1778, two hundred and twenty pounds were raised "to pay those men belonging to the town who have been hired by other towns to go into the army if we hold them and it is needed." At another meeting later in the same year, eleven hundred pounds were raised to pay soldiers. It must be remembered these large figures represent a currency which had become greatly inflated, and was of a constantly diminishing value as resting upon a specie basis. As the war progressed, the country became

depleted in men and resources, and provisions became scarce, requiring great economy, as appears from action of the town in April, 1779, when they voted to choose a committee "to make search in the town of Stoneham to see if there be any quantity of grain belonging to any person more than need for his own use." In the same year eighteen hundred dollars were raised to defray the charges of the war already incurred." The people were compelled to exercise continual vigilance, there being times when it was feared the enemy might make an attack as is shown by a vote passed in 1778, "that when any of the inhabitants of the town of Stoneham draw ammunition from the town stock upon an alarm, Deacon Edward Bucknam shall fix the price thereof; and if the price be not satisfactory to the receivers, they may after the alarm receive this money again, on their returning as much ammunition as they had taken out if equally good." In 1780 five hundred and fifteen pounds were raised to pay the money that had already been expended to hire men for the war. October 9, 1780, it was voted "to raise three thousand seven hundred pounds for beef for the army." Deacon Daniel Green was authorized to hire money to pay soldiers that may be needed for the war. In 1781 it was voted "to raise thirty-seven thousand five hundred dollars of the old emission to pay in part the soldiers that are now called to serve for this year." And so one may go through the town records from 1775 to the close of the Revolutionary War and he will find them filled with the patriotic action of our forefathers. However much they may have been divided upon other questions, they were unanimous in the support of the government. It was the proudest heritage that could be handed down to their descendants. Something of the condition of the town in 1778 may be realized when it is remembered that there were then eighty-seven ratable polls, seventy-five dwelling-houses, six hundred and fifty-six acres of up-land mowing, orcharding and tillage, fifteen hundred and seventy-four acres of meadow, twenty-one hundred and one acres of pasture land, three hundred and forty-eight acres of woodland, ninety-one ounces of plate, fifty-five horses, ninety-six oxen, two hundred and fifty-nine cows, one hundred and fifteen steers and other horned cattle, nine hundred and eighty-nine sheep, one hundred and twenty-eight swine, four chaises, five hundred and twelve bushels of grain, three thousand and eleven bushels of corn and one hundred and seventy-three barrels of cider. The inhabitants of 1784 and their comparative wealth appears from the taxes of that year.

"ASSESSORS."

departure of Mr. Searl. As late as 1786 no new high-ways had been built, in addition to those already described except a road from the meeting-house to Malden (now Melrose), along the general course of Franklin Street, east of Noble's Corner, which was laid out and accepted in 1781 as a particular or private way, and a cross road from the meeting-house to the road near the parsonage (now a portion of Pleasant Street). As has been said, there were many private ways, one extending from Malden (Melrose) line to Woburn line by the house of Captain Peter afterwards of Captain David Hay. In 1786 it was voted "to divide the town into 4 districts as respects highways, as follows: Captain Samuel Sprague is to mend the road from Medford line and Malden line till it reaches the road from Woburn which passes by Deacon Edward Bucknam's. Captain Abraham Gould is to mend the road from Reading line by Col. Joseph Bryant's house till it comes to Stoneham Meeting House, also the cross-road by the Burying Ground. Ezra Vinton is to mend the road from Malden line near Mr. Cook's house to Stoneham Meeting House, and from thence till it comes to the road that comes down by Lt. John Bucknam's house. Mr. Caleb Richardson is to mend the road from Woburn line near Lt. John Holden's till it comes to Reading line near Lt. John Geary's, and thence till it comes to Woburn line near Mr. Leathes."

Our ancestors in many respects were men of great virtue and were stern in their religious convictions, but in the amenities of life, Christian graces and gentleness of manners, great changes have taken place in one hundred years. Nothing illustrates this more aptly than the treatment accorded to the minister, John Cleaveland. He was a man of talent. No insinuations were made against his moral character. From the correspondence he appears to have been a person of great self-possession, forbearance and dignity of character, and yet after the death of his wife, because he married a girl who had been a member, perhaps a domestic in his family, he was treated by the town like a thief and a pick-pocket. At one time they nailed up the door of the minister's pew, at another, covered the seat and chairs and the seat of the pulpit with tar. Not content with these indignities against the pastor, some one vented the general spite by inflicting an injury upon his horse, probably by cutting off his tail. The church stood by him, but the town voted to lock and fasten up the meeting-house against him, so that for a time public worship was held at the house of Deacon Edward Bucknam. They refused to raise his salary, requested him to relinquish his ministry and leave the town, declined to furnish any reason, and rejected his proposition to call a council; but one was finally convened at the parsonage on the 30th of September, 1794, and they found:

"1. That Mr. Cleaveland's influence among this people is lost, and irrecoverably lost and that it has become necessary that his ministerial

In 1776 the minister John Searl was dismissed and succeeded in 1785 by Rev. John Cleaveland, there being no ordained preacher during the war after the

connection with them be dissolved, and it is the advice of this council that he ask a diemission from his pastoral relations to them. 2. It appears from the fullest and they trust from the most impartial examination of the subject of which they are capable, that Mr. Cleaveland has given no just cause for that aversion and opposition to him which in so violent, and very unprecedented a manner they have displayed. 3. It appears to this council that Mr. Cleaveland's moral, Christian and ministerial character stands fairly and firmly supported, and they cordially recommend him to the church and people of God wherever in the Providence of God he may be cast. 4. As Mr. Cleaveland has given to this people no just cause for that opposition to him which they discover, and which renders his removal from them necessary, and as his removal must be attended by great inconvenience and expense to him, it is the opinion of this council that he ought to receive a compensation, and they recommend it to the parties concerned to choose mutually three judicious, impartial characters from some of the neighboring towns to estimate the damage to which Mr. Cleaveland is subjected by his removal. 5. That the select men of the town be seasonably furnished with an attested copy of this result. Finally the council deeply impressed with the singular sacrifice which Mr. Cleaveland's friends make in parting with their valuable and beloved pastor beg leave to exhort them to acknowledge the hand of God in this afflicting Providence as becomes Christians; to maintain the order of Christ's house, and with unremitting ardor promote the interest of His kingdom. And now brethren we recommend you to God and to the word of His grace, who is able to build you up and to give you an inheritance among them that are sanctified. Voted unanimously.

"ELIJAH PARISH, Scribe.

"Stoneham, 30th September, 1794."

Mr. Cleaveland was afterward settled in Rehoboth, and finally in Dunbarton, New Hampshire, where he died. At this council, it was necessary for the church to raise funds with which to furnish a suitable entertainment, and it is rather amusing to read that they pledged two silver communion cups "to Deacon Edward Bucknam, and brother Abraham Gould," as security for the money which they advanced for this purpose. Mr. Cleaveland was succeeded by Rev. John H. Stevens, who came from Methuen to Stoneham, and was installed November 11, 1795. The council met at Captain David Hay's tavern, and afterwards proceeded to the meeting-house, where the exercises took place. Rev. Mr. Prentiss, of the First Church of Reading, delivered the charge. Rev. Mr. Bradford, of the First Church of Rowley, preached the sermon. Rev. Mr. Litchfield, pastor of the church at Carlisle, made the consecrating prayer. Rev. Mr. Spalding, of the Tabernacle Church, Salem, made the introductory prayer. Mr. Green gave the right hand of fellowship, and Rev. Mr. Aiken, of Dracut, made the concluding prayer.

Mr. Stevens was born in Canterbury, Conn., in 1766, and remembered when he was a boy nine years old seeing his brother, Darius, join the Connecticut troops as they were about marching to Massachusetts in the early season of 1775. This Darius Stevens was killed at the battle of Bunker Hill. Tradition says he was wounded and shot so that he could not stand, but kept firing at the British till he was finally despatched. Mr. Stevens filled the longest pastorate of any minister who was ever settled in Stoneham, having had charge of the church here for thirty-two years, after which he preached a few years at the East Parish, Haverhill, and then returned, purchased the parsonage, and spent the last years of his life in

the home he loved so well, dying in 1851, at the age of eighty-five. Some of the pleasantest recollections of the writer's early boyhood are the times when he used to call with his father at the old house in the evening, hitch the horse and pass in through the shed and back hall to the sitting-room where his grandfather and grandmother were generally seated in front of an open fire, presenting an ideal picture of beautiful old age. He was settled on a salary of two hundred and sixty-six dollars, with fifteen cords of wood and the use of the parsonage, and must have been a wonderfully good manager, when it is remembered that on his meagre salary he reared a large family of children, lived well for those days, accumulated a competency sufficient to support him in the last years of his life, and left at the end quite a little property to his children. He was tall, had a fine and dignified presence, was a man of quick feelings, and at times preached with marked eloquence. Some of his sermons were printed and obtained a wide circulation. In the war of 1812 he was an ardent republican and preached a vigorous and patriotic sermon which formed part of the war literature of the time. It was delivered on Fast Day, 1813, and the text was Judges 5: 23. "Curse ye Meroz," said the angel of the Lord, "curse ye bitterly the inhabitants thereof; because they came not to the help of the Lord; to the help of the Lord against the mighty."

Stoneham has to-day a splendid system of public schools in which every citizen may justly be proud, but the educational facilities during the first hundred years were very limited, and the people could make no pretensions to literary attainments. Indeed, till the middle of the present century, the only college graduates outside of the ministers were David and Samuel Green. One of the most distinguished offspring of the old stock was Judge Fletcher, of the Supreme Court, who was not born here, but, on his mother's side, was descended from Jonathan Green.

In 1702 an organization was formed, which deserves to be remembered, and which flourished for about seventy years. It was known as the Stoneham Circulating Library, and was finally merged into the Stoneham Public Library. The first librarian was the Rev. Mr. Cleaveland, and for many years the books were kept at the parsonage. There were some histories, a very few novels, books of a miscellaneous character and several theological works, which seem to have been the kind of literature best adapted to the serious minds of our pious forefathers. There was Brown's Christian Journal, Doddridge's Sermons, Whitefield's Sermons, Hand of Providence, Remedies against the Fears of Death, The Death of Abel, Henry on Prayer, etc. Coming down now to the late years of the eighteenth and to the early years of the nineteenth century, we are reaching comparatively recent times. The early settlers and the soldiers of King Philip's War are almost forgotten. The heroes of the French and Indian Wars are either old

men or else repose in the silence of the grave. The patriots of the Revolution are still the active men of the town. The heroic age in America is a memory of the past, destined, however, to be revived again by the bugle blast of union and freedom in 1861.

The independence of the nation had been achieved, but the long and exhausting struggle of the Revolution had drained the country of its resources and left the people little better than bankrupts. The continental money had become so inflated that it was finally redeemed one dollar for a hundred. The towns and individuals were overwhelmed with debt. General dissatisfaction prevailed. Attempts were made to obstruct the proceedings of the courts. The government was blamed and civil war threatened, which culminated in Shays' Rebellion. Conventions were held in the summer and autumn of 1786 under the pretence of setting forth the grievances of the people, and mobs gathered at the county seats from the various towns. One of these conventions was held at Concord on the 11th of September at which Captain Jonathan Green was sent as a delegate from Stoneham, having been instructed, however, that he should do nothing contrary to the Constitution. During the autumn and winter of 1786 and '87 an insurrection was threatened and the town was called upon again to furnish soldiers to protect the law and defend the State government. The insurgents were led by Luke Day of West Springfield and Daniel Shays of Pelham. Governor Bowdoin ordered Middlesex to raise eight hundred men, out of forty-four hundred from the State, to protect the courts and suppress the insurrection, under the command of Major-General Benjamin Lincoln. "On the 25th of January, Shays, at the head of one thousand men, made an attempt to seize the arsenal at Springfield, but upon a discharge of cannon from the State troops under the command of Gen. Shepard, which killed four of the insurgents, the assailants fled in great haste and confusion and the rebellion was not long after completely suppressed." Stoneham with her accustomed public spirit in times of threatened war, voted to pay the men of her quota three shillings per day during the time of their service. The military company in Stoneham at that time was commanded by Captain David Hay. The first men went under charge of Lieutenant David Geary, followed on the 30th of January by another squad, and a few days later, it would appear, the town was called upon to furnish six additional men and a sergeant.

This company did not go as an organization, though they furnished men for the quota. At least during a portion of the time while the trouble existed one of the regiments was commanded by Colonel Joseph Bryant. At that time Colonel Bryant was the chief military personage of the town, and it may be interesting here to refer to one or two stories that are told of him, though the writer is unable to vouch for their truth; but they were related to him in his youth. He

was grandson of Deacon Daniel Gould, who gave to him the Captain Buck farm. He was a man of considerable influence, was interested in military matters, and doubtless was an ardent patriot. A short time prior to the outbreak of the Revolution he had occasion to go to the marsh, as was customary in those days, for a load of salt hay. On his return he met some of the king's officers on horseback, who ordered him to turn out of the road and make room for them. Twisting the whip lash about his hand, straightening himself to his full height, and menacing defiance in his attitude, he thundered out to them he should neither turn out for them nor all the king's army.

Another story is, that on a certain occasion, the governor called to the house to see him. He was at work in the field and his good wife somewhat awed by the presence of official greatness, and desirous that her husband should appear to good advantage, took his Sunday clothes and ran out to him with them; but the doughty colonel possessed of good sense, and scouting false appearances, marched up to the governor with his working clothes on his back and as we may suppose his Sunday clothes over his arm. In 1788 Captain Jonathan Green was sent as a delegate to the convention in Boston, which was called to ratify the constitution. This same year "Jonathan Green and others petitioned the selectmen to lay out a town-way from Ezra Vinton's barn to the southeast corner of the town, needed by them for the purpose of going to market and to mill," stating that for more than seventy years they and their predecessors had maintained such road at their own expense. The road was laid out and accepted the next year. It is the old road now in Melrose Highlands leading from Franklin Street near the Perkins' place, southerly towards the centre of the town, and into it ran a private way from Green Lane. In 1793 the school-house which had probably grown old and dilapidated, was sold, and the town, either in this or the succeeding year, built a new one twenty feet square and located it a little north of the meeting-house and east of the road. On the 25th of August, 1795, died Captain Jonathan Green, who for fifty years had been the most active man of the town in public affairs. He was the son of Jonathan and the grandson of Samuel Green, of Malden. He was born in Malden, November 23, 1719, and when a young boy removed with his father to Stoneham where he lived the rest of his life, except from 1769 to 1786 when he resided in Chelsea. With the exception of one year he was town clerk and town treasurer from 1748 to 1769, also from March 1789 till his death, except two years; twenty-five years in all. In these days there was no alms-house, and the custom prevailed at the annual town-meeting in March of putting up the paupers at public auction, and striking them off for board to the lowest bidder, a practice perhaps, insuring economy to the town, but not always cheering to the victim. William Street was laid out in 1798 but not built till 1805. During the first

seventy-five years of the town's history, the growth was small, and it must have presented very much the same appearance in 1800 as in 1725. Going back to the first years of the present century, let us look upon the town as it then appeared, the picture perhaps not perfectly accurate in all its details, but nevertheless, substantially correct. It must be remembered that it was long subsequent to this period, when Stoneham became a manufacturing town. If one of our ancestors who was alive at that time should return to-day, and mingle with us, hardly a familiar object would be presented to his view. Imagine him, in the first place, turning his footsteps towards the old meeting-house, and picture the amazement with which he would be overcome. Astonished and bewildered, he would wander about in search of the pound, the James Hay house, the school-house and the church, for in those days all these objects were taken in at a single glance. They have long since disappeared from human sight. Turning his face to the west, he would see that a magic power had felled the trees of the forest and reared in its place a large and prosperous town, presenting an appearance of wealth and prosperity almost beyond the conception of one accustomed to the simplicity of colonial days. On every side the farms which he remembers scattered here and there are covered with houses and factories and chimneys. The quiet rest of country life has given place to the buzz of machinery and the whistle of the engine. Broad and numerous avenues replace the crooked country roads, and the old houses are almost gone. Commencing at North Street and going from Reading (now Wakefield) towards Woburn, the first house on the north side of the street was the one recently known as the Deacon Dunlap house, where formerly lived one Simonds who kept a store. There lived Ephraim Pierce the younger.

A little further on, lived Ephraim Pierce the father, on the spot where Jas. H. Pierce lately resided. The next was a small one story house occupied by Captain Nathaniel Cowdrey, and stood on the south side of the road, a little east of the present farm house of John B. Tidd. The next house was on the right, occupied by Phineas Wiley, and stood where Caleb Wiley lived at the time of his death. Coming from, North Street south onto High Street the first building was an old one on the east side of the street occupied by John Geary. South of him was Benjamin Geary where Mr. Sargeant now resides. Near the top of Farm Hill also on the east side of the road, Stephen Lynde lived in a house owned by Mrs. Reuben Geary. In the old office lived Jas. Willy. Thirty or forty rods south was the residence of Captain Peter Hay. Next came the Hay Tavern, occupied by Captain Peter Hay, on the west side of the street, then the Aaron Hay house and afterwards the parsonage. Where Wm. H. Richardson now lives stood the house of Captain David Geary. Going south on what is now Warren Street was the house of Mr. Wright, father of Captain

John H. Wright, which stood on a lane running westerly from the road. This lane followed about the course of Hancock Street. A little further south on the east side was the residence of James Hill. The Lot Sweetser house on the north side of Marble Street was then owned by James Hill, called James Hill, Jr. The last house in Stoneham which stood partly in Woburn was the Jesse Dike house then occupied by William Holden. Returning east over Summer Street, the first house on the north was that of Ebenezer Bucknam. Then came the dwelling of the late Zac. Geary which was torn down a short time since. A little further north on the east side was Deacon Jabez Lynde. No other building intervened till the meeting-house was reached. A few rods north of the meeting-house and westerly from the highway was Thomas Gould, who had bought the James Hay farm. In the Osgood house lived Mrs. Dalton, a daughter of Rev. James Osgood. In the Oakes Green house lived Eben Bryant and north of him Elias Bryant. Daniel Hay lived where Horace Tilton now resides. On the Captain Buck place was the house of Col. Bryant. Col. Bryant's next neighbor was John Noble where Aaron Paine afterwards lived. On the Jenkins place lived Captain Abraham Gould, and further on Daniel Gould, Esq. The four latter houses were situated on territory which has been annexed to Wakefield. Returning to Spring Street and going east over what was then a private way there was an old house on the south where lived William A. Rove. Where the Chapman house now stands lived Ephraim Brown, and in the Sturtevant house Captain Daniel Green. Continuing on towards Melrose Highlands near the town line and just beyond it standing back from the street on the north side in a lot owned by the town was a small house or hut occupied by Clamrod, a Prussian, whose wife was a mulatto. The first house on Franklin Street, now owned by Mr. Outram, was that of Thomas Green. He was father of Rev. Sam'l Green, born in Stoneham in 1792, afterwards pastor of the Essex Street church, Boston, and although he died in comparatively early life, in his forty third year, he was a man of marked distinction and great promise. Rev. David Green, a brother of Samuel, was born in 1797, and for twenty years was secretary of the American Board of Commissioners for Foreign Missions. In the next house on the north side of the street at present occupied by Mr. Walsh lived Captain Josiah Green. Jonathan and Peter Green resided on Green Lane: near the foot of Vinton's Hill now in Melrose Highlands was the house of Ezra Vinton. Between Ezra Vinton's and the Reading road on the south side lived his two brothers, Thomas and Timothy, and on the north side, the last house in Stoneham was that of John, nicknamed Sopus, Green. Going from Summer Street down the present Pond Street towards Spot Poud, Nathan Bucknam lived in the James Hadley house and John Bucknam in an old house on the south side of the street torn down some years

ago. On the Dyer farm lived Jesse Green. Where the Ames house now stands there was a building then owned and occupied by Jacob and David Gould, the former of whom was murdered in 1819. On the opposite side of the street and a little further south lived a second David Gould, commonly called Pepe Gould. At the northeast corner of the Pond lived Matthew Whipple Sprague. Further down towards the Red Mills were the houses of Ebenezer Bucknam and Jabez Kendall. Returning and taking the road to the south on the east side of the Pond, Daniel Bryant's house was located where Charles Copeland afterwards lived. On the east side of the road, on or near the location of the Butterfield house, lived Mr. Willy.

The last house in Stoneham on the west side of the road was that of Captain Samuel Sprague. Retracing our way to the Hay Tavern in the north part of the town, and going thirty or forty rods a little north of west, we should have come to the Fosdick house, in which Captain Caleb Richardson lived. In the northwest part of the town on the private way leading from the Hay Tavern to Woburn, were the houses of Captain Rufus, Elijah, Oliver and Thaddeus Richardson. At the old Poor Farm lived the widow Elizabeth Cutler, the last survivor of that family. Holden lived east of Bear Hill. A few other buildings there were, but these were substantially all the dwelling-houses of the town, with one church and one school-house. The principal change that had taken place during the last three-quarters of the eighteenth century had been a mere succession of generations, even the same names being very generally preserved. In 1802 the town voted to build a new meeting-house, and chose Mr. Daniel Gould, Captain Daniel Green and Captain David Geary a committee for that purpose. It was also voted to 'build the new meeting-house on the slope of the hill that is east of the Burying Hill Brook on the north side of the road.' The committee were instructed to make all necessary provision for the entertainment and refreshment of the men to be employed, and a general invitation was extended to the inhabitants to be present at the raising, which occupied Wednesday, the 29th and Thursday, the 30th days of June, 1803, and it was dedicated on the 14th day of December, the same year. This was the second house of public worship erected in the town. This second house remained till the first Sabbath in January, 1840, when it was destroyed by fire which accidentally caught from a stove during morning service. The older residents will remember this edifice with the common about it, about one acre and a quarter on the north side of the road and three-quarters of an acre on the south side, which was used as the training field. The following description of the church has been left by Mr. Stevens:

"A. D., 1803. The inhabitants of the town of Stoneham built this new Meeting-House. Captain David Geary, Captain Daniel Green, Mr.

Daniel Gould were the committee to build the meeting-house. They agreed with carpenters to do all the work for seventeen hundred and eighty-one dollars. The house was raised the two last days in June, 1803, and finished about the middle of November following. It is forty-six feet by fifty-six. The entry is ten feet making the body of the house square. It cost about 5500 dollars, including the common which cost about 120 dollars. The pews sold for several hundred dollars more than enough to pay for the house. The highest pew sold for 172 dollars. On the 14th of December, we assembled in the new Meeting House to dedicate it to God. There was a vast concourse of people. Rev. Mr. Sanborn, Rev. Mr. Reynolds, Rev. Mr. Nelson and Mr. M—— attended with myself. Mr. Reynolds read and made the first prayer. Mr. Sanborn made the consecrating prayer. I preached on Haggai. 2, 7, 'I will fill this house with glory,' and made the concluding prayer. The choir concluded with a dedicating anthem. Great order and solemnity marked all the proceedings. On the Sabbath before I preached a farewell sermon at the Old Meeting House, and the day after dedication the people took it down. I have written this that after generations might know about it, especially my successors in the ministry." (Signed), JOHN H. STEVENS.

In 1803 it was "voted to request the select men to lay out a new road from the road south of the Old Meeting House by the corner of Deacon Jabez Lynde's house straight to the New Meeting House." In 1805 William Street was built, and the Medford and Andover Turnpike the next year. In 1806, also, Daniel Gould was elected to represent the town in the General Court.

In 1810 Spring Street was also laid out and was known as Captain Daniel Green's road. This year for the first time a bell was placed on the meeting-house, having been purchased by subscription, the committee to purchase it consisting of Thaddeus Richardson, Benjamin Geary and Lieut. John Bucknam. In the early days Stoneham and its people seemed to be rather fond of indulging in law-suits. In building William Street the road passed through the land and near or over the upper dam of Captain David Hay. They could not agree upon the damages, so the Captain sued the town, recovered judgment and obtained execution. The Richardsons also had a good deal of trouble about their damages, and finally the town was indicted for not opening that part of the road lying between the meeting-house and the houses of Aaron and Peter Hay through the land of Lieut. John Bucknam, now from Pleasant to Central Street.

On the 18th day of June, 1812, war was declared by the Congress of the United States against Great Britain. This war was generally unpopular in New England, though there was a minority strongly in favor of it. The people of the town supported the government, and cheerfully met the demands that were made upon them. At the May meeting they voted "to make up the pay of the soldiers who have volunteered or shall volunteer their services, or who shall be drafted out of the militia in Stoneham in pursuance of the recent general orders of the Governor for raising ten thousand men out of the militia of the Commonwealth, to the sum of fifteen dollars the month, including the United States pay, when they shall be called into the actual service." Again, in August Captain Caleb Richardson, Lieut. John

Bucknam, Deacon Jabez Lynde, Captain Nathaniel Cowdrey and Mr. James Hill were chosen a committee to draw up resolutions upon the national affairs. About this time a famous company of riflemen was organized, known as the Washington Rifle Greens. Most of the men came from Stoneham and South Reading, though the first commissioned officers were all from Stoneham. It was for a long time the crack company of the vicinity, and was called out in 1814 from September 22d to October 31st, and stationed on Dorchester Heights. Its first commander, Captain Jonathan Hay, is said to have been a very efficient officer. Several of the old-time captains whose names were familiar thirty or forty years ago, such as Captain Wright, Captain William Richardson and Captain Steele graduated from this company. The following is a roll of the company while in camp on Dorchester Heights: "Inspection and muster roll of Captain Jonathan Hay's company of riflemen, of Maj. William Ward's battalion in Gen. Maltby's brigade, of the detached corps under Maj.-Gen. Whiton (October 25, 1814.) Jonathan Hay, Captain; John H. Wright, Lieutenant; William Richardson, Ensign; Sergeants—William Deadman, Benjamin Geary, Jr., Samuel Richardson, William Bryant. Corporals—Abraham Marshall, Ephraim Pierce, Samuel Wiley, Jesse Converse. Musicians—Jedde Brown, William Holden, Joseph Matthews, Thomas Parker, Nathaniel Richardson. Privates—James Brown, Jeremiah Converse, Samuel Evans, James Emerson, Joseph Eaton, Benjamin Flint, Samuel Geary, Amos Howard, Pierpont Hay, Simon Jones, Henry Knight, Charles Lewis, Jas. Lathe, Asahel Porter, Timothy Pierce, Alpha Richardson, Jonas M. Rowe, Frederick Slocumb and Samuel Sweetser. One of the curious relics of bygone days was the office of tythingman, a part of whose duty it was to preserve order in the church. The sense of propriety and decency which exists among the young people of to-day must be greater than that which prevailed seventy-five years ago. In 1816 it was necessary to instruct the tythingmen to "clear the stairway of the meeting-house so that the people can have a free passage into the gallery, and the people when they leave the house will turn to the right hand or the left hand as soon as they get out of doors, so that others may have a free passage through the porch and to keep the boys and girls from whispering and laughing in the gallery. The tythingmen will post up these instructions at the Meeting-House." In passing from Stoneham towards Spot Pond over Pond Street, the traveler notices on the right about one-fourth of a mile below the junction of South Street, the well-kept buildings of what was formerly known as the Tom Gould Farm.

For generations it had been the home of a branch of this old family. David, a grandson of the original settler, John Gould, had bought it in 1714. The present dwelling occupies the site of the old

house. On this spot, and during the night of Nov. 25, 1819, occurred the brutal murder of Jacob Gould, which produced a profounder sensation in the town than any other local event in its history. The family at that time consisted of two brothers, David and Jacob, and a maiden sister, Polly Gould, together with one Mrs. Winship, who was hired to help do the work. David and Polly were supposed, for those times, to have considerable money. On the evening of the 25th, between eight and nine o'clock, they were sitting in the kitchen, when three men rushed in with disguised faces, armed with dirks, and demanded of Jacob his money. He attempted to defend himself with a chair, but was overcome, and fell pierced with several wounds, one of which, in the region of the heart, proved fatal. David also received two wounds. The hands of David and Polly were then bound, and each one of the three was in turn taken up stairs to produce the money. From Jacob was obtained five dollars, from David two hundred dollars, and from Polly six hundred dollars, hers being deposited, in six deer-skin bags, in Jacob's chest. In going up-stairs the light went out. In the scuffle that ensued Polly's hands were badly cut and a finger of one of the robbers. Daniels was afterwards detected partly by means of this wound. A fourth man stood at the door to keep watch, supposed by some to have been one Clifton, who had formerly resided in the town. After the robbery the members of the family were all put down cellar, a feather-bed thrown down for them to lie upon, a table placed against the door and warning given that one of the robbers would be left to guard them for two hours. About eleven o'clock, however, David was impelled by the dying groans of his brother to venture up-stairs and give the alarm to their next-door neighbor, Stephen Lynde.

By daylight the whole town was aroused, and scouring the country far and near. Jacob died at three o'clock on the morning of the 26th. A reward of five hundred dollars was offered by David for the detection of the murderers, and five hundred more by the Governor of the Commonwealth. Several men were arrested, but no one was convicted, though Daniels was probably one of the guilty parties. He hung himself while in jail before the trial.

From the early settlement of the town the school-house had been located near the spot where the first meeting-house was built. This was about the geographical centre of the inhabitants. During the period of a century and more, one building followed another. The town-meetings were sometimes held in the meeting-house, and sometimes in the school-house.

In 1820 the town "voted to build a school-house on or near the spot where the old meeting-house stood, large enough to be convenient for the whole town for school and town meetings, by excluding small children under a certain age." But it was not

built till 1826. The first atory was used for a school, and the second for a town hall.

The structure which was erected in accordance with this vote remained where it was built until 1833, when it was moved to the corner of Pleasant and Central Streets, where it now stands, known as the Old Town House. As has been said, the practice prevailed for many years of putting up the town's paupers, for support, at public auction, an occasion attended, very likely, at times, with some festivity, judging from the fact that the meeting adjourned for the sale, sometimes to the tavern, and sometimes to Alpheus Richardson's Hall, neither of which places in those days was surrounded by an atmosphere of total abstinence. The last auction of this character occurred in 1825, when Benjamin Blodgett was struck off to Col. Eldridge Geary at seven shillings per week; Phineas Blodgett to the same person at fifty-three cents per week; Thomas L. Knight to Captain Daniel Green at one dollar and twelve cents per week; Daniel G. Brown to Col. Geary at forty cents per week; Chloe and Nancy Freeman (colored) to Daniel Gould, Esq., at one dollar and ninety-eight cents for both; John Crocker to Joseph W. Noble at eighteen cents per week, and John Green to Benjamin Geary at one dollar per week.

In 1826 the town bought the old Poor Farm, and this cheerful and economical custom has become a relic of by-gone times. It is a pleasant reflection that the number of paupers is much less at the present time, in proportion to the population, than it was seventy years ago. With the progress and development of the nineteenth century poverty is greatly diminished. The laboring man of to-day enjoys comforts and luxuries almost beyond the conception of our grandfathers.

During the first century of our history one of the principal burdens imposed upon the town had been the support of the minister. The last appropriation for this purpose was made in 1826, when three hundred and forty-six dollars was raised for the minister's salary and wood. After this a parish was organized, and the town in its corporate capacity exercised no further control in ecclesiastical matters. The rigor of the laws had been gradually modified in the interest of dissenters, so that every man was allowed the privilege of withdrawing from one religious society provided he connected himself with some other, so that he could be taxed somewhere for the support of preaching. It has been only since 1834 that the support of public worship has been entirely voluntary.

From dissatisfaction with the minister, with the creed and from a variety of causes, many withdrew from the meeting in Stoneham, and joined societies in other towns. A Universalist Society was organized, embracing some of the most substantial citizens; but did not meet, it would seem, at first, with great popular favor; for in 1826 we find the town

voting "not to allow the Universalist Society the privilege of holding meetings for preaching in the hall or in the school-house."

Stoneham's record as a temperance town in recent years is consistent with the opinions entertained by our fathers, who chose, in 1832, the selectmen, "Levi Hill and Charles E. Walker, a committee to see that the law for regulating licensed houses is regarded in this town." And they furthermore voted that the "selectmen use all lawful measures to prevent any person or persons procuring license to retail ardent spirits."

Prior to 1833 the town-meetings had been held either in the meeting-house or the school-house, but after the town-house was built, the bulk of the population gradually settled near the present centre of the village, leaving the public buildings on the outskirts; so it was desired that the town-house should be moved to a location that would better accommodate the population. Opinion was divided, but at the annual meeting in March, 1833, the friends of the movement rallied in force and voted "to move the Town House to some convenient place near the Andover and Medford turnpike, and chose Charles E. Walker, Benjamin F. Richardson and Alpha Richardson a committee to purchase a suitable piece of land, and superintended the moving of the building." This was the 4th of March. The movers had been victorious, but the contest was not yet ended. On the next day the anti-movers had out a warrant for another town-meeting called for the 12th, the earliest possible day, hoping to reverse the action of the town. And now the committee proved themselves equal to the emergency. Only seven days remained in which to purchase the land and make the removal. A lot was bought, the country was scoured for oxen, and forty or fifty yoke were collected together for the important occasion. The ground was frozen and covered with snow and ice. The building was put on runners. A great concourse of people had assembled. Rum was distributed from the interior of the building to stimulate the zeal of the excited crowd. The chains were secured and the oxen attached. The apple-trees of Thomas Gould had been cut so as to make a bee line, near as possible over the meadow to the new location. The signal was given, the great team started, but after a while the chains broke. Delay followed. The broken links were again replaced, or new ones substituted. Time was precious. The loss of a single day accompanied by a thaw might leave the edifice a helpless wreck, anchored in meadow mud; but steam was up, and with a yell of triumph they again started and this time no halt was made till the house was landed near the spot that had been purchased for its location. The victory was won and the anti's were whipped. On the meeting of the 12th there was nothing for them to do but meet and dissolve. Boys who stood about and sat on steps enjoying the fun, are now old men and

love to look back and recall the events of that exciting day. In 1834 the first fire-engine was bought, known as the "Phoenix."

In 1836 the town was divided in six school districts. The school-house, district number one, was located at the corner of Main Street and Captain Rufus Richardson's Lane: in number two on Cobble Hill, not far from the present standpipe; in number three on Vinton's Hill; in number four on Pond Street; in number five on Warren Street; and in number six at the centre, near the corner of Pine and Pleasant Streets. In 1833 the county commissioners laid out the highway now known as Elm Street from the old road towards South Reading. Old people look back to the period between 1830 and '40 as one of great public interest and excitement. Moral and political questions which were destined to agitate the country during the coming years were then beginning to crystallize. Public opinion was divided; one element was aggressive, and the other intolerant. The question of African slavery was cleaving asunder the community. Political fervor was red hot. Some opinion may be formed of the temper of the town in 1837 when it is remembered that Captain Rufus Richardson, Joseph W. Noble, John Hill and Darius Stevens were added as a committee to the selectmen to take charge of the town-house, and were instructed not to let any meeting be held there "which they shall have reason to think will produce a disturbance or endanger the house." On May 9th it was voted sixty-two in the affirmative and thirty-three in the negative "that the town will not allow anti-slavery lectures, and discussions to be held in the town-house." It is difficult to realize to what an extreme limit some of the good men of that time allowed their zeal to carry them in opposition to anti-slavery agitation. Meetings were held, others were broken up, and finally the excitement culminating in mob violence, concluded with the homicide of Timothy Wheeler. Some of the doggerel verse and sarcastic rhyme in which hard epithets were hurled by one side against the other, and received back in turn, now lie hidden away in old houses and attest the violent birth-throes of the great reform, which in a little more than a quarter of century from that time was destined to shake a continent to its foundations and crown a race with human freedom. Reference has been made to the laying out or building of most of the early roads. Only a few others will be mentioned, as the limit of this article forbids it.

In 1837 the county commissioners laid out a continuation of Elm Street from near the house of the late John Paine to the centre of what is now Wakefield, making this the direct and usual thoroughfare between the two towns. The population this year was a little over 900. During the year ending April 1, 1837, there were manufactured 380,100 pairs of shoes, valued at \$184,717. Montvale Avenue was laid out by the county commissioners in 1840. After a life

of 115 years, Stoneham had made but little material progress. In fact, during the first century the growth had been hardly perceptible and the changes slight. Outside of agriculture, the principal occupation was the manufacture of shoes, though carried on in a small way, in comparison with the expensive plants and large capital invested in this business during the last thirty years. The country was dotted here and there with little shoemaker's shops, where most of the work was done. The manufacturers themselves required no large amount of room, only a sufficient space to hold the goods, cut up the stock, and deliver it to the men who made the shoes. The largest manufacturers usually kept a general store in connection with their business, which enabled them to pay their workmen partially in supplies, and thus secure to themselves a double profit. In those days shoemaking was a trade; one shoemaker could make the entire shoe, and labor was not sub-divided as at present, giving to each man a specific part, and having a tendency to make of him a mere machine. Then, manufacturing was the slow and simple process of hand labor, now the magic product of complicated machinery. Something may be said in favor of each process. Those of us who can look back to the little shop where the workmen labored inside in winter, and outside in summer, the proprietors of their own estates, anchored to the soil by a sense of ownership, each one personally interested in the welfare of the town, no large fortunes and no expensive living, we are inclined to think the common citizen leveled up to a rather higher standard than now. On the other hand, with the introduction of machinery, modern inventions, the results of recent scientific research, material prosperity has rapidly increased, fortunes have multiplied, and what were luxuries to our fathers are necessities to us. During the twenty-five years succeeding 1840 great changes took place, new roads were built, great factories sprung up, and a few scattered houses grew into a compact and thrifty town. New business methods prevailed, and the workmen of a single concern, instead of being scattered over the whole town, were collected together under one. In 1844 Franklin Street from Main Street to Noble's Corner was built. The present town-house was originally built in 1847, though it was subsequently enlarged. The committee who built it were Benjamin F. Richardson, Reuben Locke, Jr., Luther Hill, Daniel Hill and Elbridge Gerry, and the expense of the building exclusive of land was between \$5000 and \$6000. The lower story was used for the accommodation of the High School, till a short time before the erection of the present high and grammar school-house, and here it may be well to refer briefly to the history of our public-school system. An allusion has already been made to the single school kept near the meeting-house and to the six district school-houses that were subsequently erected in the different localities of the town.

The High School was first thoroughly organized with a regular course of study and a system of graduation in 1856, although nominally established in 1854, and was the heritage of the Centre Union School, kept by Caleb Oliver in the winter of 1846-47. Let us go back for a moment to the school of Master Oliver, which was taught in the old red school-house, located on Pine near Pleasant Street, and commenced November 30, 1846, and closed February 27, 1847.

George W. Dike, Silas Dean and Ira Gerry were committee, and George W. and Solon Dike, prudential committee. The list of books prescribed were the Bible, Porter's Rhetorical Reader, Emerson's Second and Third Class Readers, Webster's Dictionary, New National Spelling Book, Worcester's Primer, Emerson's Arithmetic, Leonard's Arithmetic, Brown's Grammar, Smith's Anatomy, Oliver's Geography, Burrit's Geography of the Heavens, Willard's History of the United States, Towne's Gradual Reader, Thompson's Seasons, Sherwin's Algebra and Comstock's Philosophy, Chemistry and Physiology. The whole number of scholars was seventy. The teacher was paid thirty-five dollars per month and his board was valued at eight dollars per month. In age the scholars ranged from twelve to twenty. Afterwards the school was kept winters in the old town-house till the new one was built. In 1850 the number of scholars between four and sixteen was 377. Prior to 1851 the prevailing style of school architecture in Stoneham had been that of the old red school-house, which was so common in New England fifty years ago, but this year the town expended about \$16,000 in the erection of three large, fine grammar school houses and two smaller mixed ones, one of them at Spot Pond and one of them at what is now Melrose Highlands. These were among the finest and best appointed of any in the neighboring towns, and they at once placed Stoneham in the front rank, at least as a supporter of the public schools. In 1859 the public library was established, a nucleus having been formed from the old Social Library, the Young Ladies' Library and the High School Library. The present Congregational meeting-house was built in 1840, the second one having been burned, as previously stated. The same year the Universalist meeting-house was also erected, which was subsequently sold to the Catholics in 1868, at the time of the erection of the Christian Union, now the Unitarian Church. The pastors of the Congregational Society of the First Parish subsequent to Jos. Searle, who preached from 1828 to 1832, were Rev. Jonas Colburn, from 1832 to 1837; Rev. John Le Bosquett, from 1837 to 1838; Rev. John A. Vinton, 1839; Rev. Edward Cleaveland, from 1839 to 1840; Rev. John Haven, from 1841 to 1849; Rev. Wm. C. Whitcomb, from 1850 to 1855; Rev. Chas. P. Grosvenor, from 1856 to 1858; Rev. J. E. Swallow, from 1858 to 1859; Rev. W. J. Batt, from 1859 to 1861, and again from 1875 to 1885; Rev. Swift Byington, from 1864 to 1871; Rev. Web-

ster Hazlewood, from 1872 to 1874; Rev. D. Augustine Newton, from 1885 to 1889, and at present the Rev. W. W. Sleeper. Of these, Mr. Le Bosquett, Mr. Vinton, Mr. Cleaveland, Mr. Grosvenor, Mr. Swallow and Mr. Hazlewood were not settled. The Universalist Society remained an independent organization till it united with the Unitarian Society and became the Christian Union Church.

Its first minister was Rev. J. P. Atkinson, followed by Rev. A. G. Fay, 1840-41; Rev. Woodbury M. Fernald, from 1842 to 1845; James M. Usher, 1845; Rev. Mr. Marvin, Rev. Henry Jewel, from 1852 to 1855; Rev. S. W. Squires, from 1859 to 1862 and Edward Eaton, in 1863.

The Unitarian Society was organized in 1858, and employed Rev. Fiske Barrett, who remained with them till 1861. Mr. Barret was followed by Rev. Geo. M. Skinner, who resigned September 1, 1867. During the pastorate of Mr. Skinner the Universalist and Unitarian Societies united under the name of "The Christian Union Church," and for a time worshipped in the Universalist meeting-house. The Universalist meeting-house was sold to the Catholics in 1868, and the Christian Union Church was erected and dedicated on January 1, 1869. Mr. Skinner was succeeded by Rev. E. B. Fairchild, who came in November, 1867, and remained the pastor of the church till January, 1876. The clergymen connected with this society subsequent to Mr. Fairchild have been Rev. D. M. Wilson, from May, 1876, to December, 1878; Rev. Daniel Rowen, from April, 1879, to April, 1883; Rev. C. J. Staples, from May, 1884, to June, 1887, and J. H. Whitmore, from January, 1888. In 1889 the Christian Union Church reorganized as the First Unitarian Society.

The Methodist Society was first organized in 1856, the first pastor having been Rev. J. W. F. Barnea, at present chaplain of the Massachusetts State Prison. Its ministers have been Mr. Barnea, 1857, and a part of 1858; Mr. Little, a part of 1858; Henry V. Degen, a part of 1859; Linus Fish, 1860; H. P. Andrews, 1861; L. Frost (local), 1862; Mr. Wheeler (local), 1863 and 1864; B. W. Gorham, 1865; Steven A. Cushing, 1866; A. D. Sargent, 1867 and 1868; M. M. Parkhurst, 1869 and 1870; W. F. Crafts, 1871 and 1872; Geo. L. Collier, 1873-4-5; L. O. Knowls, 1876-7; Chas. W. Wilder, 1878-9; John M. Short, 1880-1-2; Henry Lummis, 1883-4-5; Charles T. Johnson, 1886-7; J. Weare Dearborn, 1888-9; W. H. Meredith, 1890. The corner-stone of their present church edifice was laid June, 1868, the vestry dedicated in October of the same year, and the main audience-room dedicated December 5, 1870, during the pastorate of Mr. Parkhurst, a man who possessed the force and push requisite to accomplish a great undertaking in the face of obstacles apparently almost insurmountable.

The Baptist, which is the youngest of the religious societies, was organized in 1870, and built the chapel which they now occupy the same year. Their pas-

tors have been Rev. T. P. Briggs, who was ordained July 16, 1871, and resigned July 14, 1872; Arthur J. Hovey, ordained September 25, 1872, resigned October 28, 1887; and J. W. McGreggor, ordained May 31, 1888. It is expected the Baptists will soon build a fine new stone church in the southerly part of the town, upon the estate of the late Luther Hill.

The Catholics bought the old Universalist meeting-house, moved it on to Pomeworth Street in 1868, and occupied it till the completion of their present house of worship, which was completed in 1888. The Catholic pastors residing in Stoneham have been Rev. W. H. Fitzpatrick, from 1868 to 1875; and Rev. Dennis J. O'Farrell, from 1875 to the present time.

Twenty-five years have passed since the close of the great Rebellion. It seems hard to realize that to a large part of the people now living the events of the war are known only as matters of history or tradition; that almost one generation has come and another gone since the opening events of 1861. Those were stirring times in Stoneham, and all who love the old town are proud to dwell upon her record. No town was more patriotic, none more prompt in hurrying to the front, or furnished more men in proportion to her population. Stoneham's company of minute-men having been engaged in the first battle of the Revolution, it was a remarkable coincidence that Captain John H. Dike's company, from the same town, on the same day of the same month, should have participated in the first skirmish of the Rebellion. At Lexington she was in the vanguard of the army which founded the Republic. At Baltimore and Washington she led the hosts that saved the Union. The conduct of Captain Dike and his men in a great emergency deserves more than a passing notice. The part they acted in the march through Baltimore has made the name of the Stoneham company historic. The Stoneham Light Infantry had been the military organization of the town for many years, and was Company C of the Seventh Regiment. The first proclamation had been issued by President Lincoln calling for seventy-five thousand volunteers. On Tuesday, April 16th, Captain Dike goes to Boston, presents himself at the State-House, and begs the privilege of calling out his company in obedience to the President's call. On his return home the men are notified to meet in the armory in the East School-house, where they assemble at 8 P.M., and unanimously vote that they are ready to start at a moment's notice. The night was dark and stormy, and Wednesday morning broke with a cold and hazy atmosphere, but the town was alive with excitement. Men were hurrying to and fro, and preparations being made for immediate departure. A messenger had been despatched from the Governor, who reached Captain Dike's at half-past two in the morning, notifying him to muster his men and report in Boston forthwith. These men were again summoned to meet in the armory at 6 A.M. New names were added to the roll, and the members

dismissed to make the last arrangements, and bid their final adieux. Those who witnessed the company's departure on that morning of the 17th of April can never forget it. The company met at the Town Hall, where prayers were offered, and a little before ten, in military array, they reached Central Square.

The people had assembled in a great multitude, wild with patriotic enthusiasm. It was an occasion such as Stoneham had never witnessed. The company departed from the square amid the ringing of bells, waving of handkerchiefs and tumultuous cheers. After reaching Boston, they marched to the State-House, where they received over-coats and other articles. A. V. Lynde, Esq., presented to each one of the commissioned officers a revolver. The company was assigned to the Sixth Regiment, commanded by Col. Jones, and the same afternoon they were *en route* for Washington. The commissioned officers of the company were: Captain, John H. Dike, First Lieut. Leander F. Lynde; Second Lieutenant, Darin N. Stevens; Third Lieutenant, James F. Rowe, and Fourth Lieutenant, W. B. Blaisdell. In addition to the officers there was one musician and a full complement of sixty men. No language of the writer could give so vivid a description of what occurred during the next few days as the following letter, written by one of the chief actors, Lieut. Lynde, who was in command of the company after Captain Dike was wounded in Baltimore:

"HEAD QUARTERS SIXTH REGIMENT OF I. M. V. M.

"Senate Chamber, April 26, 12 M., '61.

"MR. C. C. DIKE:

Dear sir:—Yours was received this A. M. For the first time we have got direct news from home, and I assure you they were gladly received. Last night at 7 P. M. the 7th Regt. N. Y. arrived and were quartered at the House of Representatives. That cheered us up considerably, but to-day, when the gallant 5th, 7th and 8th Massachusetts and the 1st Rhode Island arrived, the wildest enthusiasm prevailed, for it was refreshing to see familiar faces from the old Bay State. Previous to this we had been worked very hard for green soldiers, sleeping with, and at all times having with us, our equipments, but the men have done well, and have stood by each other like brothers. Now for our journey here. The papers give an account of our route to Philadelphia. From there I will try and give the particulars. Our muskets were loaded and crimped before we got to Philadelphia. We left there at 2 in the morning, arriving at Baltimore about 12 M. Our company were in two covered baggage cars. We had stopped for about fifteen minutes, and a crowd was gathering first, when we discovered that the Colonel and Staff, together with seven companies, had left in their cars, and gone across the city. The men whose duty it was to draw with horses our cars across, were driven off and could not, and we proceeded to get out, fall in, four companies in all, to march across, we having the colors in one of the companies. The companies were C, of Lowell on the right; Co. B, of Lowell, with the colors; then came Co. C, of our town, Captain Dike, followed by Co. I, of Lawrence. Before we got formed we were taunted and spit upon and insulted in every way possible. After marching about ten rods, stones and brick-bats flew merrily, and the order was then given by Captain Follansbee, who commanded the regiment, to double quick march. We had not gone more than ten rods before I saw a man discharge a revolver at us from the second story of a building, and at the same time, a great many were fired from the street. We got scattered a little, and I gave the order to close up in close order, solid column. Just then, Captain Dike being ahead, two of our men fell, one by a bullet from a pistol, and one by a brick bat. I then ordered my men to fire, which they did, and I then gave the order to load and fire as we went. We got partly through the city, when we found them tearing up a bridge, and the street blocked up with stone and large anchors, but we scaled them and kept up our

course. I kept around the colors and stood by them till they were at the depot, then helped put them in the cars. We were scattered very much, all trying to get into the cars. About ten rods from the depot I saw Captain Dike. That was the last time I saw him. He being some way ahead, I supposed he had got into the forward cars. A great many of the cars were locked, and the windows closed, but the butts of the guns soon made a passage into them. Every gun was then pointed out of the window, and the rebels began to leave. While we were getting into the cars, we were showered upon with pistol balls, and they were unshacking the cars so as to leave some of us, but when we got right we soon stopped that by stationing men on the platform, and muzzles out of the windows. After helping put in the colors in company with the color-bearer, I got into the cars and they began to move very slow, for the rebels had gone ahead and torn up the track. The police went ahead and we fixed the track and finally moved on to Washington. One word in regard to the police. Some of them were loyal, but what could they do when we were in the thickest of the fight. As soon as we got started I looked through the train to see who were hurt and who were missing, for we were awfully mixed up. I found upon examination that our Captain, James Keenan, Horace Danforth, Andrew Robbins and Victor Lorendo were left behind. The band did not get out of cars on the north side of Baltimore, and we did not know what had become of them till this morning when we learned that part of them had gone home, and a part of them were in New York. As soon as possible after getting to Washington I took means to find out in regard to those left behind, and found that Captain Dike was shot in the thigh and was in good hands, but was told that they could not tell the names of the parties with whom he was stopping. James Keenan was shot in the leg, and Andrew Robbins was shot and hit with a stone, hurt very bad. Horace Danforth was hit with a stone and injured very severely, but all were in good hands, and well cared for. Communication by letter being cut off from Baltimore, I have not received news from there as well as I should had there been a mail, but have heard several times by men coming from there that they were cared for and doing well, but rumor said yesterday that A. Robbins and H. Danforth were dead. I cannot tell, for it is impossible to write and nobody goes there. I shall do the best I can to hear from them and help them in every way. We got to Washington at dark, went directly to the Capitol, and were quartered in the Senate Chamber. The Pennsylvania Regiment was quartered in the southern wing, 350 men. Monday we took the oath of allegiance to the United States. It was administered by Maj. McDowell. We have marched up to the President's house, passing in review before President Lincoln, Gen. Scott, Wm. H. Seward and Simon Cameron. To-day at 12 M. the 5th and 7th Massachusetts Regiments arrived and marched to the Patent Office, where they are quartered. The 8th Massachusetts are in the Rotunda and old Senate Chamber, very much used up with marching, and going without sleep and provisions, but our men are doing all in our power for them. Say to all our Stoneham friends that the men behaved like men as well as soldiers, and attend to their duties cheerfully, and are ready if needs be to rally at a moment's warning around the colors of 6th Regiment, and under the stars and stripes there to protect our glorious Union against any odds, and at all hazards. We all unite in sending good news to all inquiring friends, and will endeavor so to act that none of them shall ever be ashamed to own that they had friends in the time of need in the Stoneham Light Infantry.

Yours truly,

"L. F. LYNDE, Lieut. Commanding."

The town was full of patriotic ardor. The first company having departed for Washington, fifteen additional Stoneham men joined Company F of the Fifth Regiment, under command of Captain David K. Wardwell, and at once another company was organized by Captain, (afterwards Colonel,) J. Parker Gould, known as the "Grey Eagles." This last company comprised, besides the officers, seventy-seven men from Stoneham, and became Company G of the Thirteenth Massachusetts Regiment, were attached to the Army of the Potomac and served for three years, sharing in the reverses and victories of that grand army. They were at the Second Battle of Bull Run, at Antietam, at Thoroughfare Gap, Chantilly, South

Mountain, Fredericksburg, Chancellorsville, at Gettysburg and the Wilderness. Before leaving for the seat of war they earned a high reputation as a well-drilled and splendid body of men, a reputation which they afterwards fully sustained on a score of battlefields. Here it may be well to pause for a moment and briefly recall the life and services of Colonel Gould, for he stands out in clear relief as the representative of almost an ideal soldier. Descended from John Gould, who has been described as one of the first settlers of Charlestown End, and bearing a name which for two hundred years was one of the most reputable in the town, he was born on the 15th of May, 1822, the son of Jacob and Phœbe Catherine (Parker) Gould. His early advantages were not of the best. Attending in his boyhood the local schools, he learned the trade of a shoemaker and saved money, with which he obtained an education at the Military University of Norwich, Vermont, where he graduated with honor and was employed for some time after his graduation as an instructor. Teaching at times in Stoneham and Wilmington, he acquired and pursued the profession of a civil engineer, following his avocation in Vermont, New Hampshire, Pennsylvania and Massachusetts, but always keeping his residence at the old home in Stoneham. He had been repeatedly honored by his native town, filling many positions of responsibility and trust, having twice represented her in the General Court, and having earned for himself the reputation of a high-minded Christian gentleman. So, when the war came on, he seemed peculiarly fitted by education and character to fill the position in which he was placed. Raising and drilling the company of "Grey Eagles," so-called, in the spring and early summer of 1861, and joining with his company the Fourth Battalion at Fort Independence, which was the nucleus of the Thirteenth Regiment, he was promoted to a majority before leaving for the front. His appointment was said, at first, to have been resented by the members of the Fourth Battalion, who looked upon themselves as a crack organization, and felt that it was rather an intrusion upon their rights to place over them a major from another company; but as time went on, and the men were called into action, they learned to know his soldierly qualities and noble traits, and he soon had earned for himself the *sobriquet* of the "fighting major." It was a saying among the men on the eve of a battle, "We know who is to be our commander now, and he commands no man to go where he is not willing to go himself." After having been engaged in seventeen or eighteen skirmishes and battles he was ordered home to recruit a new regiment, the Fifty-ninth Massachusetts, of which he was appointed colonel. A second time he left for the seat of war, at the head of over a thousand men; in April, 1864, joined the army of General Grant, and participated in the battles of the Wilderness. Some idea may be formed of the campaign when it is remembered that

the Fifty-ninth, on arriving at Petersburg, had become reduced to about one hundred officers and men, all told, and Colonel Gould was left in charge of the brigade. His health at this time had become very much impaired on account of his privations and labors; still he retained command of the brigade until the evening before the explosion of the mine at Petersburg, when he was relieved by General Bartlett. Although relieved of his command on the 29th of July, on the next day he took the field in the fatal advance on Petersburg, commanding the left of the brigade, and while standing on the brink of the mine was struck by a ball in the leg and carried from the field. His leg was amputated, and, contrary to his desire, he was removed within less than three weeks from City Point to Philadelphia, where he died the morning after his arrival, on the 22d of August, 1864. His name is now borne in this town by Post 75 of the Grand Army of the Republic, and he has left a record filled with the gratitude, the pride and the affection of his townsmen, and a name which deserves to be cherished by those who shall come after us for generations to come.

The men, as they shouldered their muskets and left behind them their wives and children, must have felt that they were consigned to the patriotic care of the mother town; that responsibility was to be shared by those who went and those who remained; and recognizing their responsibility, the town voted in 1861 "that the selectmen be instructed to furnish all necessary supplies for supporting the families of members of the military formed and forming in this town, with the understanding that no person thus assisted shall be taken to the almshouse." "That the members of the military company recently formed be allowed the sum of twenty dollars each per month till the 4th day of July next, unless they should be called into active service before that time." Again on June 3d, the town voted "that the select men be instructed to make all necessary provisions for the families of all persons belonging in town who have enlisted for military service." The patriotic ardor of the citizens which prompted them to fill the various quotas of the town continued till the end of the war, and the town itself was no less patriotic in encouraging and supporting the men who went to the front. The reverse of 1861 at Bull Run, and the small progress made by the Union cause during that year, made it necessary for the Government to call out the reserve power of the whole North to meet the exigencies which faced the country in 1862. To a people less courageous and determined, the prospect was indeed a gloomy one. No substantial impression had been made upon the successful progress of the Rebellion, and to the faint-hearted it almost seemed as if the fate of the nation was sealed. As the historian of future years studies the history of the war, and grasps the motives and purposes, and discerns the springs of action which furnished ultimate success and victory, he need

hardly go beyond the annals of a single New England town, and no better representative of the class exists than Stoneham. There was no abatement of the demand made upon her resources and no faltering in the spirit to meet the demand. On August 26, 1862, it was voted "to appropriate and pay to the Stoneham Infantry Company the sum of forty hundred dollars as a bounty to said Company, provided said Company of not less than forty men enlist into the service of the United States as the town's quota, under the call of the President of the United States, for three hundred thousand militia to serve nine months, and accepted and sworn into said service, said sum to be paid by the selectmen as soon as they are sworn in." This was the same organization that had joined the Sixth Regiment and marched through Baltimore, though most of the members were new men. The company was officered by Captain Darius N. Stevens, First Lieutenant Samuel C. Trull, of Stoneham, and Second Lieutenant Frederick Cochran, of Methuen. Forty of the members were from Stoneham, and most of the others from Lawrence and Methuen. They became Company C, of the Fiftieth Regiment, Colonel Carlos P. Messer. Perhaps in no company from Stoneham were so many old residents represented as in this. The beautiful autumn days spent in camp at Boxford, linger as delightful memories in the minds of many who were then full of the hopes and enthusiasm of youth. The day when they shouldered knapsacks and muskets, marched to the train, sped on to Boston, formed in the streets, bade adieu to their friends and left the old Boston and Worcester depot for Allen's Point in New York by way of the Sound, is one never to be forgotten. And their arrival at the great metropolis on a cold and dismal morning, breakfast at the barracks, camp on Long Island, running of the guard, the evenings in the city, the embarking on the steamer "Niagara" from Brooklyn, which sprung a leak and caught fire off Delaware-breakwater, the trip up the river to Philadelphia, its kindnesses and hospitalities, the re-embarking on the "Jennie Lind," and the voyage down the Atlantic by way of Fortress Monroe and the Gulf of Mexico to the Southwest Pass of the Mississippi, and the sail up to New Orleans and Baton Rouge—all these, after a lapse of nearly thirty years, seem like a romance of adventure. The Fiftieth Regiment was in the command of General Banks, participated in the siege of Port Hudson and formed part of the army, which, in conjunction with General Grant at Vicksburg, opened the Mississippi. Vicksburg surrendered on the 4th of July, 1863, and Port Hudson a few days later. Although Company C enlisted for nine months, they were in the service nearly a year, arriving home in August, their return being like a triumphal progress from Cairo through the West, upon whom were showered the hospitality of an enthusiastic and generous people all along the route. About the same time that Company C, of the Fif-

tieth, was being organized, forty-two Stoneham men joined the Thirty-third Massachusetts Regiment, Col. Maggi. The officers were, Captain James F. Rowe, Captain Hiram P. Marston, Lieut. Archeus Welch, Lieut. Sidney L. Colley and Lieut. Charles H. Barry. These men experienced much hard fighting. After being engaged in the battle of Gettysburg they were ordered to the Southwest, participated in the battle of Lookout Mountain and joined the army of Gen. Sherman in his march to the sea. In 1864 Captain Francis M. Sweetser raised a company for 100 days, represented by sixty-six Stoneham men. They performed garrison duty most of the time in and about Baltimore. Marshall P. Sweetser was first lieutenant and Moses Downs, Jr., second lieutenant. In February of the same year twenty-nine other sons of Stoneham joined Col. Gould's Fifty-ninth Regiment, passed through the terrible campaign of the Wilderness and the closing year of the Rebellion. There also appear 189 Stoneham names upon the muster-rolls of the various regiments, battalions and batteries of the State in addition to those already mentioned. Between 400 and 500 soldiers from the town served during the war, although she was credited with more than 500, from the fact that several of them enlisted more than once. Some idea may be formed of the alacrity with which men enlisted when it is remembered in the latter part of 1862 Stoneham had already furnished 269 men, about sixty more than were required of her at that time. The following list of those who were killed and died in the service, while not, perhaps, complete, is believed to be substantially correct:

Killed.

William H. Richardson, 5th Mass. Regt., Co. F (three months), accidentally shot; died July 7, 1861.

George O. Berry and John E. Le Clair, 13th Regt., Co. G, Antietam, September 17, 1862.

Joseph H. Wheeler, 1st Regt. Heavy Artillery, Petersburg, Va., June 18, 1864.

Charles H. Carr, 22d Regt., Co. E, Gaines' Mill, June 27, 1862.

Philip O. Buxton, 33d Regt., Co. D, Lookout Mountain, Tenn., October 29, 1863.

Wm. Mahan, 33d Regt., Co. D, Gettysburg, July 2, 1863.

John Nolan, 33d Regt., Co. D, Dalton, Ga., May 25, 1864.

Leonard S. Whittier, 59th Regt., Co. A, Spottsylvania Court-House, May 12, 1864.

Jeremiah Murphy, 59th Regt., Co. E, Spottsylvania Court-House, May 12, 1864.

Died in the Service.

William B. Smith, 8th Light Battery, September 11, 1862.

John L. Hovey, 3d Regt., Heavy Artillery, June 11, 1865.

Henry Burt, 2d Regt., Mass. Cavalry, June 3, 1865.

William H. Heath, surgeon 2d Infantry; died at Chattanooga August 23, 1864.

Charles A. Whittier, 13th Regt., Co. G, wounded at Antietam; died at Chambersburg, Pa., September 27, 1862.

Otis W. Pinkham, 33d Regt., Co. D, Brook Station, Va., May 16, 1863.

Nathan Starbird, 33d Regt., Co. D, Washington, D. C., January 12, 1863.

Walter B. G. Gray, 33d Regt., Co. D, at Stoneham, August 23, 1864.

Aaron A. Green, 33d Regt., Co. D, at Beverly Ford, Va., June 6, 1863.

Joseph Le Clair, 33d Regt., Co. D, Resaca, Ga., May 15, 1864.

Warren V. B. Tibbetts, 33d Regt., Co. D, Fairfax Court-House, March 15, 1864.

Oliver Wheeler, Jr., 33d Regt., Co. D, Alexandria, Va., Nov. 10, 1862.

Hiram George, 59th Regt., Co. F, Danville, Va., August 20, 1864.

Peter McClusky, 59th Regt., Co. G, Alexandria, Va., October 10, 1864.

John O'Brien, 59th Regt., Co. G, steamer "Baltic," October 16, 1864.

Charles Peterson, 59th Regt., Co. G, Readville, Mass., Oct. 21, 1864.

Clement Pocket, 59th Regt., Co. G, City Point, Va., August 21, 1864.

Samuel I. Dodge, 1st Co. Sharpshooters, Oct. 19, 1862.

Isaac B. Cowdrey, 2d Co. Sharpshooters, Yorktown, Va., April 30, 1862.

George W. Young, 2d Co. Sharpshooters, York, Pa., October 8, 1862.

When men sacrificed their all in sacrificing their lives, it seems almost invidious to select a few for words of eulogy, unless they occupied exceptional positions; but there were some cases that seemed peculiarly distressing. Those who knew Willie Richardson, a bright, active, joyous boy, full of life and spirits, the pet of his family and friends, who was the first victim shot by the accidental discharge of a revolver, will remember what a sad shock was felt by the entire community when the report came of his wound and his death, and with what regret and tears he was followed to the grave. And then the Whittier brothers,—Charles dying from wounds received at Antietam in 1862, and Leonard, killed at Spottsylvania Court-House almost two years later,—furnish an illustration of what grievous sorrow the war imposed upon some households. Both of them upright, promising young men, the two oldest sons, who made a record which deserves to be gratefully cherished by their townsmen for all time to come, as they shall read of the part taken by their town in the great events from 1861 to 1865. The illustrious names of great leaders live on the pages of history, but patriotism and heroism no less worthy of remembrance filled the ranks of the army. Dr. Heath, who was surgeon of the Second Massachusetts Infantry, and who died at Chattanooga, deserves a lasting memory. Born in Sandwich, New Hampshire, he had been located in Stoneham for several years, was the first treasurer of the Stoneham Five Cent Savings Bank, had been actively interested as a member of the School Committee in the public schools, and was a most useful and public-spirited citizen. Those who knew him and recall his kindly smile and genial courtesy must always regret that so promising a life should have been cut off in early manhood. Returning to 1860 and 1861, two important events occurred which materially affected the development of the town.

Prior to the construction of the Boston and Lowell and Boston and Maine Railroads, the public means of communication with Boston had been by stage-coach over the Medford and Andover Turnpike. After the completion of the Boston and Maine Road, which passed through what was then the extreme eastern section of the town, Mr. Padilla Beard connected by coaches with the road at the station, now known as Melrose Highlands, which was the usual way of going to the city, till the Stoneham Street Railroad was built in 1860, it being opened in the fall of that year. The Stoneham Branch Railroad, connecting with the

Boston and Lowell at East Woburn (now Montvale), was opened in 1861, as far as Farm Hill and completed to Franklin Street, the present terminus of the road two years later.

During the war the vast consumption of the Government had stimulated great activity in manufacturing, and the impetus carried along a seemingly prosperous business in almost all industries till 1871 and '72, when the evil effects of a depreciated currency were experienced and a reaction set in. These were very successful years in the material development of Stoneham. For a time the ratio of increase in population was greater than that of any other city or town in the county except Cambridge and Somerville. The men returned home from the war, the factories were filled, business increased, and it was an era of unabated prosperity. The principal industries were the manufacture of shoes and the tanning of hides and currying of leather. The old-time manufacturers, the fathers of the shoe business, such as George W. Dike & Co., Allen Rowe & Co., Warren Sweetser, Alpha Richardson, Darius Stevens and Ira Gerry, had most of them either retired from business, or ceased to occupy the foremost rank. The old methods were passing away, and with them the old concerns. From 1865 to 1870 about the only leading establishments with an existence of twenty years behind them were John Hill & Co. and William Tidd & Co. It is not designed to give any detailed account of the shoe business or of the manufacturers engaged in it; especially there will be no allusion to living men. As a general rule, the faults and virtues of the dead can only be cast up and a correct balance struck, but no complete history of the town during the last fifty years could be written without some reference to the men who were active in it, for it was their lives which largely traced the course of local events. In all frankness let it be said we were not a people generally of considerable education, or of high intellectual and social culture, nor were there many citizens of large means. There was an absence of what are frequently termed "old families," which gave character to many of the most respectable New England towns. On the other hand there was general thrift and prosperity, and that ceaseless, active energy which in the history of communities so often precedes gentle manners and refinements of life.

We were a typical New England manufacturing town, just emerging from the country life of our grandfathers, commencing in a small way, and laying the foundations for a larger future. One of the patriarchs of the shoe business was Alpha Richardson, commonly known as the Commodore, who originally located at the north end of the town, in the Wiley house, at the intersection of Maine, Central and Williams Streets. Here he kept a grocery and variety store in the first story, and had a hall in the second story, which was the scene of old-time dances and social festivities. Had there been a chronicler in

those days to have preserved the reminiscences and stories, told by the neighbors collected about the stove in Mr. Richardson's store, he would have left a most interesting picture of the times. We can readily imagine the old residents coming in on a winter's evening, drawing about the fire and indulging in a vein of jovial wit stimulated by occasional potations of East India rum. It is almost impossible to realize that this was about the business centre of the town at one time. Opposite the store lived Dr. Stevens. On the corner where W. B. Stevens now resides was the blacksmith-shop. Near by lived Aaron and Squire Peter Hay. At the corner of Central and Elm Streets was the Burnham Tavern, and not far away the Parsonage.

Speaking of the Burnham, formerly the Hay Tavern, it was a hostelry, patronized very largely by drovers and teamsters before the days of railroads, for there was a large amount of travel from New Hamp-hire and the North over the turnpike to Boston, which found this a convenient stopping-place. The yard in front of the great barns is said at times to have been white with the canvas tops of wagons. Severer notions prevailed in the church then than now, in reference to dancing and other social amusements, which, at the present time, are regarded as quite innocent. Mr. Richardson was a member of the church, and was taken to task for the use to which his hall was appropriated, as appears by the following transcript from the church record:

"Brethren: Having had it reported with apparent truth that Brother Alpha Richardson has encouraged vain amusements, and feeling such conduct to be a cause of grief to myself as well as to others, I visited him the 15th day of February to be assured of facts, and to speak to him in a Christian manner as disclosures might justify me. Not having obtained satisfaction by seeing him alone, I took with me Brother Peter Green and visited him again on the 24th day of June, and by conversation obtained as little satisfaction as at any previous interview. Having thus taken substantially the step laid down in the Gospel, to deal with an offending brother without gaining him, I now, as a brother offended, tell it to the church for them to examine and judge about as God may direct them. First, it is ascertained that Bro. Richardson has encouraged vain amusements by providing a room for a dancing party. Secondly, he justifies himself in doing it and for reasons which are entirely different from those which ought to influence Christians.

(signed)

"JAEZ LYNDE.

"Stoneham, July 30th, 1830."

"On the foregoing communication the church voted to send a citation to Bro. Alpha Richardson for him to appear before the church at their adjourned meeting and exonerate himself from the charges brought against him." A report is made that "Bro. Alpha Richardson says he has not any thing to do with the church nor the church with him respecting his conducting his business." On July 20th "Bro. Alpha Richardson came before the church and appeared to justify himself in opening his house for balls and dancing parties." Manifesting no repentance, his connection with the church was severed, though he continued ever afterwards to remain a member of the parish and support the society. Mr. Richardson afterwards removed his business to the building on

Main Street, now occupied by Patrick Cogan & Son, where he kept a store and manufactured shoes, residing just north of the factory till his death, which occurred in 1868. He was a man of kind feelings and genial disposition, and for many years was an active and enterprising citizen. At the other end of Main Street, at the corner of Marble, was Allen Rowe, who for many years manufactured shoes in a part of his house, and subsequently, with his son Allen, Jr., built quite a large factory and store on the spot where Hon. Onslow Gilmore now resides. During middle life he was a thrifty and prosperous manufacturer and merchant, though he took no very active part in public affairs. Fifty or sixty years ago one of the leading citizens and principal business men was Darius Stevens, who was repeatedly entrusted with almost every office within the gift of the town, serving continually on important committees and exercising a very great influence in the management of public affairs. Like many of his contemporaries, he both manufactured shoes and kept a store. After his death a short obituary of him appeared in one of the local papers, and it was so just and discriminating in representing his character that perhaps no better account can be given of him.

"Another old resident of the town, Mr. Darius Stevens, passed away at the ripe old age of eighty-six, yesterday morning, after a life of great usefulness. The second son of Rev. John H. Stevens, he was reared in the stern virtues of early New England industry, economy and strict honesty. Later in life, when a prominent manufacturer, which he continued to be for a generation, these virtues stood him in good stead, winning the respect and confidence of all with whom he came in contact. His fellow-townsmen honored him with the important offices of selectman, collector and representative to the State Legislature, which duties he discharged with uniform care and fidelity. Mr. Stevens took a deep pride in the welfare of his native place, and was active in promoting any needed improvement or reform. He lived to see the town grow from a small village of five hundred inhabitants to its present size, a growth which he largely aided, by erecting a number of stores, dwelling-houses, etc. Even to the last was his strong mental power and keen reasoning manifest. A close reader of the leading daily and weekly journals, all the doings of the nation and the State were thoroughly familiar to him, and his upright views concerning men and their duties refreshing in these days of corruption and deceit. Not only was he successful in his public character, but unusually happy in his domestic relations; strongly interested in the Orthodox church where his family worshipped, his liberality and earnest efforts proved greatly instrumental in completing the present edifice. Kind and genial, firm in his convictions, yet with a broad charity for the faults of every one, Mr. Stevens gained the esteem of all. For over three-score years he and his aged wife have

enjoyed a life of quiet content, seeing their children and grandchildren grow up around them. Thus full of years and good report, he has closed a well-spent life and entered into his rest, leaving a wide circle of descendants to revere his memory." (1878.)

Looking back thirty-five or forty years, one of the most familiar figures on our streets was Warren Sweetser. He, with four of his brothers, had come from South Reading when young men and settled in Stoneham, where they all passed their lives, and became respected citizens. Mr. Sweetser's factory occupied the present site of Chase's Block. Those who remember him in his prime, and in town-meeting when answering an opponent, or debating a question, will recall the cool, keen, sarcastic style which so often characterized him and made him a dangerous antagonist. He was born in the year 1799 and lived till the age of ninety, retaining complete possession of his faculties to extreme old age. Originally he took a radical stand in opposition to the anti-slavery agitation, but became an early Republican and an ardent supporter of Fremont in 1856. A man of well-poised mind and good judgment, though of strong prejudices, possessing the old-fashioned New England integrity, during the years of his prosperity he earned for himself the respect of his townsmen, which followed him to the close of life. For many years no two families exercised so wide a local influence as the Hills and the Dikes. Each family, consisting of several brothers who ordinarily stood by each other, was a power in itself; and then each family, in certain ways, seemed to be at times at the head of rival factions. The Hills were generally Whigs and the Dikes generally Democrats. When a Democratic administration was in power, George W. Dike was its local representative and postmaster, and when a Whig administration came in, the same position was occupied by John Hill. They largely represented the vigor and strength of the town, and were living illustrations of one of the advantages of large families. Hon. George W. Dike, son of Jesse Dike, was descended from Samuel Holden, an early settler, and was born April 14, 1807. With slight opportunities in his boyhood, he commenced life in a small way, beginning to manufacture shoes at the age of nineteen, walking to Boston, carrying his goods on his back, and returning with stock in the same way. Gradually increasing his business, after some years he bought out the store of Ira Gerry and formed a co-partnership with John Howard, which continued to the death of Mr. Howard, after which he carried on the business of manufacturing shoes and keeping a country store till 1848, when he formed a co-partnership with his brother, Lyman Dike, under the firm-name of Lyman Dike & Company, the two brothers remaining together till 1855, when they dissolved. During these years they did a very large business manufacturing goods mostly for the Southern and Western trade. They built and occupied the shop that was afterwards owned by H. H. Mawhinney &

Company, on Central Square, at the time it was built, the finest and most complete factory in town. After the dissolution of Lyman Dike & Company he associated with himself two of his sons and two of his sons-in-law, and till 1861 carried on business under the style George W. Dike & Sons. Mr. Dike from the time he became a voter took a great interest in public affairs, local, state and national. He was elected by his fellow-citizens selectman, assessor, overseer of the poor, highway surveyor, town treasurer, trustee of Public Library, of Lindenwood Cemetery, auditor, etc. He was greatly interested in the public schools, having served on the school committee twenty-eight years, and was largely instrumental in changing the schools from mixed to graded ones. He was a member of Governor Boutwell's council in 1851, and at one time the democratic candidate for congress. He was the leading democrat, and always remained true to his political faith, although he furnished two sons in the late war, one of whom was Captain John H. Dike. After a long life, having enjoyed the prosperity of success and suffered the disappointment of reverses he died July 4, 1883, at the age of seventy-six. A generation has now passed away since the death of John Hill, but his name is still respected as one of the best citizens who ever lived in Stoneham. He is usually spoken of as old John Hill, to distinguish him from his son, John Hill, Jr. Mr. Hill was born in Reading in 1794, the son of James Hill and Mary Holden. Although not born in Stoneham, his ancestors on both sides were old Stoneham stock, his paternal ancestors having lived in the north part of the town. He was descended on his father's side from that James Hill who lived 150 years ago on one of the Charlestown farms. John came here with his father when a small child, and lived during his youth at the old homestead on Marble Street which his father built, where the Hill family were reared. The house is the one owned and occupied by the late Lot Sweetser. On arriving at manhood Mr. Hill settled in the south part of the town and built the house opposite the end of Wilson's Lane, the one owned by the late Jesse Green. Here he commenced business in an humble way. It is said of him when he went to Boston to sell his shoes and buy his stock that he used to hire John Bucknam's horse, leave it at Charlestown, and, to save expense, shoulder his goods and take them on his back over the ferry to the city. Some years later he moved to what is now Central Square and bought of Reuben Geary the building that afterwards was enlarged into the Central House. At that time Mr. Geary kept a store there. The frame of the structure had originally been gotten out by Captain David Geary, the father of Reuben, who intended to use it for a tavern, and this was the use to which Mr. Hill subsequently put it, opening there a public-house on December 31, 1829. He kept it for a few years and then sold out to Benjamin Goldsmith, erecting a short time afterwards the house where he subsequently lived

and died. At first a part of his house was used for business purposes where the stock was cut up, but in 1840 the building was erected on the corner of Main and Franklin Streets which, with the additions afterwards made to it, became the extensive factory of John Hill & Co. In 1832 he formed a co-partnership with his brother Luther, and in 1844 they took into the firm John Hill, Jr. Mr. Hill had also quite large interests for several years in pork-packing at Meredocia, Illinois. Some years prior to his death he retired from active business and passed the remainder of his life in the care of his property and the enjoyment of his family and friends. Although he himself retired from business, the old firm-name survived under the management of his son and brother, and for many years during and subsequent to the war the new factory of John Hill & Co. was the principal establishment of the town. While Mr. Hill did not seek or fill public office so often as many others, still he was one of the leading men of his time and perhaps the most prominent leader in the Whig party. Universally loved and respected, he died in 1858 in his sixty-fourth year. Those who remember him recall a dignified, courteous, old-school gentleman, just such as leaves on boys an impression of good manners and a kind heart. Of the manufacturers before the war but few survive.

Perhaps George Cowdrey should be an exception to the rule laid down, that no account shall be given of living men, merely for the purpose of preserving a single fact. Mr. Cowdrey has represented Stoneham in the General Court eight times and was a member of the House of Representatives when Charles Sumner was first elected to the United States Senate. It will be remembered Mr. Sumner was supported by a combination of the democrats and free-soilers. Upon Mr. Cowdrey, who was a democrat, fell the task of leading the fusionists, which he did with marked ability and secured the victory, so to him and his town is due the credit of having elected the great champion of human freedom.

The oldest concern now in existence in Stoneham, which for fifty years has been intimately associated with the industries of the town, is the tannery and currying shop of William Tidd & Co. This establishment, with its well-arranged and extensive plant, employs from 125 to 150 men, and has a capacity of tanning 800 and of currying 4000 sides of leather per week. The manufacturing interests of Stoneham at the present time are chiefly represented by twenty-one concerns engaged in the manufacture of boots and shoes, three in the manufacture of shoe stock, two in leather, one in lasts, two in boxes and one in the manufacture of drugs and medicines, and these establishments turn out goods to the amount of from \$3,000,000 to \$5,000,000 per annum, employing from 1200 to 1500 hands, with an invested capital of between \$1,000,000 and \$2,000,000.

The Stoneham Five Cent Savings Bank, with a de-

posit of between \$500,000 and \$600,000, is the oldest financial institution. It was established in 1855, with Dr. Wm. H. Heath its first treasurer. Dr. Heath was followed by Ira Gerry, the treasurer from 1862 to 1873. Mr. Gerry was a very able and conservative financier, and laid the foundation of a strong institution which has always enjoyed the absolute confidence of the entire community. In 1873 Mr. Gerry was succeeded by Hon. Onslow Gilmore, who from that time has been so completely identified with the bank that one seems almost the complement of the other. The Stoneham Co-Operative Bank, established in 1887, has also met with very substantial success. The Stoneham National Bank, with a capital of \$50,000, and under the presidency of Charles W. Tidd, was opened in March, 1890, and thus far has met with success. The present population of Stoneham is a little upwards of 6000.

It is one of the healthiest towns of the State, with a perfect natural drainage and high elevation, is lighted by electricity and gas, supplied with water from Crystal Lake; directly connected with Boston by way of the Stoneham Branch and Boston & Lowell Railroad, now leased by the Boston & Maine Railroad, and connects with the last road at Melrose Highlands by means of the East Middlesex Horse Railroad. The natural advantages in building locations is surpassed by no town in the neighborhood and by few in the county. An effort is being made to shorten the distance to Boston by extending the Stoneham Branch to the Fells Station on the Boston & Maine. If the project succeeds, the distance to Boston will be nine miles, and it is believed almost every inducement will exist to attract a large suburban population. The finest section of Middlesex Fells, embracing Bear Hill and Spot Pond, is contained within the limits of the town. The picturesque beauties of this sheet of water are not surpassed and hardly equaled by any in Eastern Massachusetts. Those who cherish and love the old town, remembering its humble origin amid the rocks and forests of Charlestown End and recalling the little settlement planted far away from the mother town, look forward with confidence to a prosperous future.

SELECTMEN.—1726-27, Captain Benjamin Geary, Captain John Vinton, Mr. Peter Hay, Mr. Timothy Baldwin, Lieut. Timothy Wright; 1728, John Gould, Daniel Green, Ensign Daniel Gould, Jonathan Green, Daniel Gould, Jr.; 1729, Dan'l Green, John Gould, Sr., Lieut. Dan'l Gould, Ensign Jonathan Green, Dan'l Gould, Jr.; 1730, Daniel Green, John Gould, Sr., Dan'l Gould, Sr., Jonathan Green, Dan'l Gould, Jr.; 1731, Daniel Green, Capt. John Vinton, Lieut. Daniel Gould, Daniel Gould, Jr., Ensign Jonathan Green; 1732, Capt. John Vinton, John Gould, Sr., Deacon Dan'l Gould, Dan'l Gould, Jr., Peter Hay, Jr.; 1733, Deacon Dan'l Green, Dan'l Gould, Jr., Ensign Jonathan Green, Peter Hay, Jr., Timothy Baldwin, Jr.; 1734, Capt. John Vinton, Deacon Dan'l Gould, Dan'l Gould, Jr., Deacon Dan'l Green, Peter Hay, Jr.; 1735, John Vinton, Esq., Deacon Dan'l Green, Dan'l Gould, Jr., John Green, Peter Hay, Jr.; 1736, Dan'l Gould, Jr., Dan'l Gould, Jonathan Green, Peter Hay, Jr., Samuel Sprague; 1737-38-39, Deacon Dan'l Gould, Ensign Jonathan Green, Dan'l Gould, Jr., Peter Hay, Jr., Sam'l Sprague; 1740, Daniel Gould, Jr., Ensign Jonathan Green, David Gould, Edward Bucknam, Thomas Cutler; 1741, Deacon Dan'l Gould, Dan'l Gould, Jr., Ensign Jonathan Green, Edward Bucknam, Samuel Sprague; 1742,

Dan'l Gould, Jr., Jonathan Green, Dan'l Gould, Sr., Thomas Cutler, Timothy Wright; 1743, Ensign Jonathan Green, Deacon Dan'l Gould, Dan'l Gould, Jr., Thomas Cutler, Timothy Wright; 1744, Ensign Jonathan Green, Daniel Gould, Jr., Deacon Daniel Gould, Samuel Sprague, David Gould; 1745, Dan'l Gould, Jr., Thomas Cutler, Timothy Wright, John Geary; 1746, Capt. Peter Hay, Deacon Dan'l Green, Deacon Dan'l Gould, Thomas Cutler, Ensign Timothy Wright; 1747, Capt. Peter Hay, Ensign Timothy Wright, Lieut. Jos. Green, Sam'l Sprague, Ebenezer Parker; 1748, Ensign Timothy Wright, Edward Bucknam, Thomas Cutler, Capt. Peter Hay, Ephraim Brown; 1749, Capt. Peter Hay, Deacon Dan'l Gould, Elder Dan'l Green, Lieut. Dan'l Gould, Deacon Jos. Green; 1750, Capt. Peter Hay, Elder Samuel Sprague, Ensign Timothy Wright, David Gould, Josiah Green; 1751, Capt. Peter Hay, Ensign Timothy Wright, Josiah Green, James Hay, Ephraim Brown; 1752, Capt. Peter Hay, Ensign Timothy Wright, Josiah Green, James Hay, Jonathan Green; 1753, Capt. Peter Hay, Josiah Green, Jonathan Green, James Hay, Isaac Green; 1754-55, Capt. Peter Hay, Deacon Dan'l Gould, Ensign Timothy Wright, Deacon Jos. Green, Jonathan Green; 1756, Lieut. Dan'l Gould, Jr., Capt. Peter Hay, John Geary, Josiah Green, Peter Hay, Jr.; 1757, Capt. Peter Hay, Jonathan Lawrence, Ensign Timothy Wright, Jonathan Green, Benben Richardson; 1758, Jonathan Green, Jas. Hay, Deacon Jos. Green, Isaac Green, Capt. Peter Hay; 1759, Ensign Timothy Wright, Capt. Jonathan Green, Josiah Green, Lieut. Jas. Hay, Abraham Gould; 1760, Ensign Timothy Wright, Capt. Jonathan Green, Edward Bucknam, Ensign Sam'l Sprague, Lieut. Jos. Bryant; 1761, Ensign Timothy Wright, Capt. Jonathan Green, Lieut. Jos. Bryant, Edward Bucknam, Jr., Ensign Sam'l Sprague; 1762, Capt. Peter Hay, Ensign Timothy Wright, Capt. Jonathan Green, Lieut. Jos. Bryant, Jos. Knight; 1763-64, Capt. Peter Hay, Ensign Timothy Wright, Capt. Jonathan Green, Lieut. Jas. Hay, Josiah Green; 1765-66, Capt. Peter Hay, Ensign Timothy Wright, Capt. Jonathan Green, Lieut. Samuel Sprague, Lieut. Jas. Hay; 1767, Capt. Peter Hay, Ensign Timothy Wright, Timothy Taylor; 1768, Ensign Timothy Wright, Capt. Jonathan Green, Timothy Taylor, Lieut. Sam'l Sprague, Jos. Bryant, Jr.; 1769, Ensign Timothy Wright, Lieut. Sam'l Sprague, Dan'l Gould, Jr., Dan'l Green, Edward Bucknam, Jr.; 1770, Capt. Peter Hay, Ensign Timothy Wright, Lieut. Jas. Hay, Peter Hay, Jr., Timothy Taylor; 1771, Timothy Taylor, Capt. Sam'l Sprague, Edward Bucknam, Jr., Abraham Gould, Elisha Knight; 1772, Ensign Timothy Wright, Capt. Peter Hay, Josiah Green, Reuben Richardson, Abraham Gould; 1773, Timothy Taylor, Ensign Joseph Bryant, Dan'l Gould, Jr., Dan'l Green, John Bucknam; 1774, Timothy Taylor, Capt. Sam'l Sprague, Lieut. Jas. Hay, Jas. Hill, Lieut. John Geary; 1775, Lieut. Jos. Bryant, Abraham Gould, Jr., John Bucknam, Deacon Dan'l Green, Timothy Wright, Jr.; 1776, Sam'l Taylor, Capt. Sam'l Sprague, Timothy Wright, Jr., Daniel Gould, Jr., Peter Hay, Jr.; 1777, Capt. Sam'l Sprague, Deacon Daniel Green, Lieut. John Bucknam, Timothy Wright, Jr., Caleb Richardson; 1779, Capt. F. Butterfield, Walter S. Keene.

TOWN CLERKS.—From 1726 to 1747, inclusive, Dan'l Gould, Jr.;

from 1748 to 1758, inclusive, Jonathan Green; 1759, Peter Hay, Jr.; from 1760 to 1769, inclusive, Capt. Jonathan Green; from 1770 to 1786, inclusive, Edw. Bucknam; 1787 and 1788, Captain Peter Hay, Jr.; 1789 to 1791, inclusive, Capt. Jonathan Green; 1792, Col. Jos. Bryant; 1793, Jos. Bryant, Esq.; 1794 and 1795, Capt. Jonathan Green; 1797, Peter Hay (2d); 1798 and 1799, Caleb Richardson, Jr.; 1800, Peter Hay, Jr.; 1801 and 1802, David Gerry, Jr.; 1803, Reuben Richardson; 1804, Peter Hay, Jr.; 1805, Capt. Caleb Richardson, Jr.; 1806, Elijah Richardson, Jr.; 1807, Elijah Hosmer; 1808 to 1811, inclusive, Oliver Richardson, Jr.; 1812 and 1813, Peter Hay (2d); 1814 to 1828, inclusive, John H. Wright; 1829 to 1833, inclusive, Joseph Buck; 1834-36, Warren Sweetser; 1837-39, Amasa Farrier; 1840 and 1841, Solon Dike; 1842 and 1843, Alfred J. Rhaades; 1844, Amasa Farrier; 1845, Alonzo N. Lynde; 1846 and 1847, Solon Dike; 1848, (yrus Hay; 1849 to 1852, inclusive, Silas Dean; 1853, John Hill, Jr.; 1854, Chas. Brown; 1855 and 1856, S. N. Richardson; 1857 to 1890, inclusive, Silas Dean.

REPRESENTATIVES TO THE GENERAL COURT.—1734, Capt. John Vinton; 1775, Lieut. Joseph Bryant; 1806, Dan'l Gould; 1809, '10 and '12, Rev. John H. Stevens; 1811 and 1830, Jabez Lynde; 1816-17, '31, John H. Wright; 1823-24, '32-33, Peter Hay; 1825, Wm. Richardson; 1828-29, Darius Stevens; 1834, Chas. E. Walker; 1836, Ira Gerry; 1837, Benj. F. Richardson; 1840, Wm. G. Fuller; 1841, Solon Dike; 1842, Wm. Bryant; 1843, Sam'l I. Bryant; 1844-50, '51, '52, '83, '84, '85, '86, Geo. Cowdrey; 1846, J. Pierce; 1854, A. V. Lynde; 1855-59, J. Parker Gould; 1856, S. Tidd; 1857, J. Dike; 1860, Lyman Dike; 1861, W. H. Pierce; 1862, John H. Dike; 1863-65, Leander F. Linde; 1866, John Kingnan; 1867, John Botuma, Jr.; 1869, Sam'l Cloon; 1870, Sam'l C. Trull; 1872-73, Amos Hill; 1875, John Beat; 1876-77, Onslow Gilmora; 1878, Geo. A. Cowdrey; 1879-80, John F. Berry; 1881, Chas. L. Gill; 1882, John W. Spencer; 1887-88, Jas. E. Whitcher; 1889-90, Myron F. Ferrin.

SENATORS.—1852, Sam'l E. Sewall; 1865-66, John Hill; 1883-85, Onslow Gilmora.

SPECIAL COUNTY COMMISSIONERS.—1838 to 1841, Darius Stevens; 1841 to 1844, Geo. W. Dike; 1890, about twenty years in all, Lyman Dike.

BIOGRAPHICAL.

IRA GERRY.

Ira Gerry, the youngest son of Captain David and Sarah Richardson Gerry, was born in Stoneham June 29, 1806, and was a descendant in the fifth generation from the original settler, Thomas Gerry. Captain Gerry was a leading man and kept a public-house on the corner of Central and Winter Streets, the old farm comprising a large part of what is now the most thickly-settled section of the town. Losing his father when he was nine months old, he had the good fortune to grow up under the influence of a strong-minded and affectionate mother. His early advantages were limited, and he obtained only the meagre education afforded by the schools of his native town, and yet in after-life he became a man of large information, sound judgment, and possessed a well-trained mind. He had barely reached the age of majority when, in company with his brother Arad, he opened a store and commenced the manufacture of children's shoes, remaining with him, however, only a few years on account of his brother's failing health; after which he continued for some years alone, till 1844, when his own physical weakness compelled him to close up his business and engage in pursuits which required less confinement and application. About this time "Square" Peter Hay, as he was called, died. Mr. Hay for many years had

Fra Gerry.

William F. Stevens

been the principal conveyancer of the town, and after his death Mr. Gerry took his place, and gradually absorbed almost all the business of this character. The deeds and wills and contracts which he wrote during the remainder of his life would have afforded a lucrative office practice to a well-established lawyer. In addition to his occupation of conveyancer and a considerable probate business, he engaged in fire insurance, and became a sound and prosperous financier. He was repeatedly called to fill almost all offices within the gift of the town; and at the age of thirty was elected a Representative to the General Court.

When the Stoneham Five Cent Savings Bank was organized he became its first president, and, in 1862, its treasurer, which office he held for about eleven years, and under his able and conservative management the deposits increased from nine thousand to a quarter of a million.

In financial matters and business affairs Mr. Gerry was a man of rare judgment and sound sense. He was a safe counsellor and trusty friend. But few men in any community ever enjoyed a more universal confidence of his townsmen, which prompted them to constantly seek his advice and entrust to him the settlement of their estates. While not inclined to large public benefactions, or to much display, he was a man of scrupulous honesty and a lover of justice. In politics he was a democrat, though a firm believer in equal rights. In the bitter anti-slavery agitation of 1837, notwithstanding his politics, he demanded for all parties the right of free speech. He was a large owner and dealer in real estate, inheriting from his father land which afterwards became some of the most valuable of the town. Like his brother, Col. Elbridge Gerry, he was an ardent sportsman, and from his gun and dog derived through life the greater part of his recreation. Such was Mr. Gerry's public character which he bore to his townsmen. Another and a gentler side was that which characterized the relations to his family. Marrying, at the age of twenty-six, Paulina, the daughter of Robert Gerry, he lived with her forty-four years, and at his death left to her a memory made beautiful by the affectionate and indulgent devotion of a lifetime.

Thoroughly conscientious, he combined great natural courage with gentleness, and possessed feelings sensitive as those of a woman. He was reared a Congregationalist, but in mature life became liberal in his views, tolerant of the opinions of others and prone to examine all sides of a question impartially himself.

When first engaging in business, like most of their contemporaries, he and his brother kept a stock of liquor among their goods; but becoming convinced of the evils of intemperance, and the dangers attending the sale of intoxicating liquors, they closed them out and determined to have no further connection with such traffic.

Mr. Gerry never had any children, and after a long and distressing illness he died November 23, 1875, in his seventieth year, leaving behind him the reputation of an able, successful and upright man.

DR. WILLIAM F. STEVENS.

Dr. William F. Stevens, the son of Rev. John H. Stevens, was born at the parsonage in Stoneham, January 17, 1807. He was the youngest son of twelve children, which consisted of four boys and eight girls. His early days were spent at home, and he obtained the rudiments of an education in the public schools of his native town. Losing his mother at the age of ten, two years later he was placed by his father in the dry-goods store of a Mr. Foadick, in Charlestown, where he remained two years. A delicate, sensitive boy, with a constitution apparently fragile, he then began the struggle of life from which there was no cessation till its close. Thrown upon his own resources at this tender age, he learned habits of industry and close application. Remaining in Charlestown about two years, when he was fifteen he went into the drug-store of Dr. Plympton, at Old Cambridge, a more congenial occupation, continuing there four years, studying the nature of medicine during his leisure time, and preparing himself for entering college. The condition of his health was such that he gave up the idea of a college education at Harvard, and in 1826 entered the Medical School connected with Dartmouth College, spending his time, when not at Hanover, as a student of Dr. Daniel Gould, who then lived in Reading. Obtaining his medical diploma, he commenced the practice of medicine in Stoneham, before he had quite reached the age of twenty-one, where he continued to reside, and for over fifty years was the good and beloved physician. Devotedly attached to his profession, it absorbed the restless energy of body and mind for a lifetime. Law is said to be a jealous mistress. This is equally true of medicine, and she rarely bestows great success upon her disciples unless they serve her with absolute devotion. A more faithful servant never pursued a calling than Dr. Stevens. Of a reserved and retiring disposition, he filled but few positions of public trust, nor often did he take an active part in public affairs. His profession demanded all his time and attention. He never would consent to have his name used as a candidate for offices of emolument; and yet he was greatly interested in public improvements, as appeared when he became a director of the Stoneham Branch Railroad, and by his influence and exertion contributed so largely to its completion. After his death, a brother physician spoke of him among other things, as follows: "His was one of those rare natures which enjoy work for the very love of it. He did not seem to need a holiday, for every day with him was a holy day consecrated to duty. He was one of the most conscientious men I ever knew; manifesting no

favoritism for either rich or poor, he did the very best he could for all, with a devotion which never swerved and a zeal which never tired. His skill in diagnosis was extraordinary. Within the last six months, three cases came to my knowledge, where professional experts gave one opinion, and he gave a different one, modestly, but clearly, and in all these he proved ultimately to be correct. The solution of one of them occurred on the very day of his death; the other two I was privileged to apprise him of. In nothing was his true merit more marked than in the genuine humility which adorned his character. Many a time I have been astonished at the depth of this trait; for he was just as ready to follow the advice of a young physician commencing practice, as that of one of the magnates of our profession, if convinced he was in the right. More than any man I ever knew, he was guided by our fundamental principle of ethics—the welfare of the patient. All else was thrown aside, apparently without an effort—pecuniary interest and reputation—and he was ready to brave obloquy and misconception, if the true welfare of the patient required the sacrifice. This was partly the secret of the unbounded confidence reposed in him by all who knew him well enough. He was so upright that he almost leaned backward in all cases where his own interests seemed to conflict with those of the patient. I never met a man possessed of more indomitable courage. Time without number, I have known him go to see patients when any other man would have been in bed, and some of them were not half as sick as he himself was. As a man, his manners were refined and courteous, more like a gentleman of the old school than we often meet with nowadays. Those who did not know him intimately sometimes fell into the error of supposing him cold and distant, a very great mistake. Under the outside crust ran a vein of quiet humor, and warm human sympathy. He was deeply affectionate. He loved little children with an intensity which few were aware of, for he did not like to make a parade of his feelings. As a citizen Dr. Stevens was both public-spirited and liberal."

By nature he was a perfect gentleman, of absolute integrity, a lover of justice and virtue, and possessed a delicate refinement of feelings which prompted him to treat others with consideration and respect. In his character natural humility was combined with great dignity. While his appearance was always modest and unassuming, there was something about his bearing that would have repelled any offensive familiarity. Pitying and sympathizing with the poor and unfortunate, a large portion of his life was spent in their service. But few men in his profession ever exemplified more of the spirit of the Great Master. He seemed to fill the place for which nature designed him. People who came into his atmosphere instinctively recognized the skillful physician, the wise counselor and true friend. Beginning his life at a time when there was no other physician in the town, his

practice gradually extended to the neighboring towns, till it became as large and probably larger than that of any other country doctor in Middlesex County. He was a most indefatigable worker, and hardly knew what rest was till the last years of his life, when his constitution had become undermined and his body enfeebled by the exhausting labors of half a century. After an illness protracted through many months, he died on February 16, 1879, in the seventy-third year of his age, leaving a memory cherished in many communities and numerous households with mingled love and respect. After his death the following poem was written of him by Francis Durivage, of New York:

"No unexpected news, and yet it fell
With mournful resonance—a funeral knell!
So good, so true, so gentle and so wise,
I cannot write of him with tearless eyes.
Memory recalls his venerable form,
Less often seen in sunshine than in storm,
As it appeared beneath the sky's black pall,
Through the wild snow and the rain's drenching fall,
Hastening responsive to our urgent call,
Over my loved one's bed of pain to bend,
More than the man of skill—physician, friend!
Well did he win a pure and spotless name,
Who might have won—but he disdained it—FAME!
For he was master of his sacred art,
In its full scope and its minutest part.
But to Ambition's voice he would not yield,
The humble hero of Life's battle-field.
What is fame worth to him who can secure
The blessings of the suffering and the poor?
What academic laurels have the power
To arch with rainbow hues the parting hour?
He chose the better part and sank to rest
Conscious of duty done and truly blest."

LUTHER HILL.

Luther Hill, son of James and Mary (Holden) Hill, was born in Stoneham, Massachusetts, February 3, 1808. His ancestors were among the early settlers of New England. Mr. Hill obtained his education in the public schools of his native town and at the South Reading (now Wakefield) Academy, then in a flourishing condition, with Professor Heath as principal. After completing his studies there he taught school for a short time in Stoneham and Danvers, Massachusetts, but early devoted his attention to business, commencing the manufacture of shoes at eighteen years of age, with a capital of twenty dollars. From this small beginning his business grew to be one of the largest in the State. In 1832 he formed a partnership with his brother, under the firm-name of "John Hill & Co.," John Hill, Jr., entering the firm in May, 1844. This firm was the first to employ power in the manufacture of shoes, using horse-power, then steam, for that purpose. Mr. Hill was also the first to apply power to a labor-saving machine or tool in manufacturing shoes, being the inventor of a die for stamping out lappets or tongues, a great improvement upon the slow process of cutting them out with a knife. He then made dies to stamp out vamps, quarters and soles. In 1858 his firm erected a large factory, intro-

Luther Hill

ducing steam as a power. This application of steam-power was the first of a series of wonderful changes in the shoe industry. Mr. Hill's brain teemed with positive and original conceptions, the result of which was the invention of many machines used in the manufacture of shoes. Among them the first sole-cutter and counter-skiver machine, upon both of which he obtained patents. In 1857 Mr. Hill became interested in, and put in practical operation, the first pegging-machine used in this country. In 1862 he placed in his factory the first heeling-machine ever used, developing it with improvements on which he obtained several valuable patents, and he successfully operated it until, with Gordan McKay and others, he formed a stock company, known as the McKay Heeling-Machine Association. This machine, with additional patents, is in general use to-day. Mr. Hill was the first to apply the sewing-machine to the fitting of shoes, and later connected it with steam-power. Many of the best and most complicated machines used in the manufacture of shoes to-day have sprung from these inventions of Mr. Hill.

He retired from the firm Nov. 10, 1866, after a successful business career of forty years, bearing with him the love and esteem of all with whom he had been associated. Throughout his entire life Mr. Hill had the welfare and progress of his native town warmly at heart, and was prominently identified with all measures for its advancement.

He was largely interested in real estate, helped to introduce street lighting by gas, and with six others planned and pushed to completion the Stoneham Street Railroad. His good judgment, progressive views and dispassionate manner in debate gave him influence as a citizen. His townsmen's appreciation of these qualities was shown by his election to the office of selectman, School Committee, overseer of the poor and assessor. He discharged these duties with the same fidelity, honesty and integrity that distinguished his conduct in every relation of life. Strong in his sense of justice and the principle of universal right, he was a warm supporter of George Thompson and William Lloyd Garrison, and was among the first to join the anti-slavery movement in the days when to avow and maintain its principles meant almost social ostracism. He was one of the founders of the Unitarian Church in Stoneham, and showed the sincerity of his religious faith by the purity of his daily life. In June, 1840, Mr. Hill was married to Sarah Atwell Stevens, of Stoneham, daughter of Darius Stevens, and granddaughter of the Rev. John H. Stevens, who officiated at the marriage ceremony. This marriage was in all respects a most fortunate and happy one, and in his home the utmost harmony and confidence prevailed. Mr. Hill was a strong advocate of woman's suffrage. His daughters shared equally with his sons his thoughts and wise counsels, and to all he gave the same opportunities for education and usefulness. Mr. Hill was a self-made man in every sense of the word ;

whatever he achieved in life was due to his own efforts. While he was sincere and firm in his convictions, his nature was kindly, his impulses generous, and his judgment of others most charitable. He died at his home in Stoneham, Oct. 31, 1877, leaving his wife, four sons and four daughters.

CHAPTER XL.

GROTON.

BY HON. SAMUEL A. GREEN.

THE town of Groton lies in the northwestern part of Middlesex County, Massachusetts, and is bounded on the north by Pepperell and Dunstable; on the east by Tyngsborough and Westford; on the south by Littleton and Ayer; and on the west by Shirley and Townsend. The First Parish meeting-house—or "the tall-spired church"—is situated in latitude $42^{\circ} 36' 21.4''$ north, longitude $71^{\circ} 34' 4''$ west of Greenwich, according to the latest observations of the United States Coast Survey. It is distant nearly thirty-one miles in a straight line from the State House at Boston, but by the traveled road it is about thirty-four miles. The village of Groton is situated principally on one long street, known as Main Street, a section of the Great Road, which was formerly one of the principal thoroughfares between Eastern Massachusetts and parts of New Hampshire and Vermont. The Worcester, Nashua and Rochester Railroad passes through it, and traverses the township at nearly its greatest length, running six miles or more within its limits. It is reached from Boston by trains on the Fitchburg Railroad, connecting with the Worcester, Nashua and Rochester road at Ayer, three miles distant from the village.

The original grant of the township was made in the spring of 1655, and gave to the proprietors a tract of land eight miles square; though subsequently this was changed by the General Court, so that its shape varied somewhat from the first plan. It comprised all of what is now Groton and Ayer, nearly all of Pepperell and Shirley, large parts of Dunstable and Littleton, and smaller parts of Harvard and Westford, in Massachusetts, and small portions of Hollis and Nashua, in New Hampshire. The present shape of the town is very irregular, and all the original boundary lines have been changed except where they touch Townsend and Tyngsborough.

The earliest reference to the town on any map is found in the Reverend William Hubbard's "Narrative of the Troubles with the Indians in New-England," a work published at Boston in the early spring of 1677, and in London during the ensuing summer under a different title. The map was the first one cut in New England, and of course done in a crude man-

ner. It was engraved probably by John Foster, the earliest Boston printer. The towns assaulted by the Indians in Philip's War are indicated on the map by figures; and at that period these places were attracting some attention both here and in the mother country.

There were two petitions for the plantation of Groton, of which one was headed by Mr. Deane Winthrop, and the other by Lieutenant William Martin. The first one is not known to be in existence, but a contemporaneous copy of the second is in the possession of the New England Historic Genealogical Society. The signatures vary in the style of handwriting, but they do not appear to be autographs, and may have been written by the same person. The answer to the petition is given on the third page of the paper, and signed by Edward Rawson, secretary of the Colony, which fact renders it probable that this is the petition actually presented to the General Court as the original one, after it had been copied by a skillful penman. It was found many years ago among the papers of Captain Samuel Shepley, by the late Charles Woolley, then of Groton, but who subsequently lived at Waltham; and by him given to the New England Historic Genealogical Society. The petition is written on the first page of a folio sheet, and the answer by the General Court appears on the third page of the paper. Near the top of the sheet are the marks of stitches, indicating that another paper at one time had been fastened to it. Perhaps the petition headed by Deane Winthrop was attached when the secretary wrote the action of the General Court, beginning, "In Ans^r to both these peticons." The grant of the plantation was made by the Court of Assistants on May 25, 1655—as appears by this document—though subject to the consent of the House of Deputies, which was given, in all probability, on the same day. In the absence of other evidence, this may be considered the date of the incorporation, which is not found mentioned elsewhere.

In the early history of the Colony the proceedings of the General Court, as a rule, were not dated day by day—though there are many exceptions—but the beginning of the session is always given, and occasionally the days of the month are recorded. These dates in the printed edition of the records are frequently carried along without authority, sometimes covering a period of several days or even a week; and for this reason it is often impossible to learn the exact date of any particular legislation, when there are no contemporaneous papers bearing on the subject.

The petition and endorsement are as follows :

"To the honored Generall Courte assembled at Boston the humble petition of vs whose names ar here vnder written humbly shoeth

"That where as youre petitioners by a providence of god haue bene brought ouer in to this wilderness and liued longa here in: and being somthing straightned for that where by subsistance is an ordinarie waie of gods providence is to be had, and Considering the allowance that god gives to the sunes of men for such an end: youre petitioners request there fore is that you would be pleased to grant vs a place for a

plantation vpon the River that runnes from Nashaway in to merimacke at a place or a bouite a place Caled petaupankett and waubanesconett and youre petitioners shall pray for youre happy prosedings

" WILLIAM MARTIN
RICHARD BLOOD
JOHN WITT
WILLIAM LAKIN
RICHARD HAGEN
TIMOTHY COOPER
JOHN LAKIN
JOHN BLOOD
MATHU FARRINGTON
ROBERT BLOOD

"In Ans^r to both these peticone The Court Judgeth it meete to graunt the peticoners eight miles square in the place desired to make a Comfortable plantaçon wch henceforth shall be Called Groaten formerly knowne by the name of Petapawage: that M^r Danforth of Cambridge wth such as he shall Associate to him shall and hereby is desired to lay it out with all Conuenient speede that so no Incouragement may be wanting to the Peticoners for a speedy procuring of a godly minister amongst them. Provided that none shall enjoy any part or porçon of that land by gift from the selectoren of that place but such who shall build houses on their lotts so given them once wthin eighteene months from the tyme of the sayd Townes laying out or Townes graunt to such persons; and for the present M^r Deane Winthrop M^r Jno Tinker M^r Tho: Hinckly Dolor Davis. W^m. Martin Mathew Farrington John Witt and Timothy Couper are Appointed the selectmen for the sayd Towne of Groaten for one two yeares from the tyme it is layd out, to lay out and dispose of particular lotts not exceeding twenty acres to each howse lott, And to Order the prudentiall affairs of the place at the end of which tyme other selectmen shall be chosen and Appointed in their roomes: the selectmen of Groaten giving M^r Danforth such satisfaction for his service & paynes as they & he shall Agree;

"The magiat^s haue passed this wth reference to the Consent of their bretheren the deputs hereto

" EDWARD RAWSON, *Secrety*

" 25 of May 1655.

"The Deputies Consent hereto

" WILLIAM TORSEY *Cleric.*"

The entry made by Secretary Rawson in the General Court Records, at the time of the grant, is substantially the same as his indorsement on Martin's petition, though it distinguishes between some of the names signed to each petition. It is evident that the one headed by Deane Winthrop was also signed by John Tinker and Thomas Hinckley; and probably by Dolor Davia, Richard Smith and Amos Richardson, as is inferred from a petition dated May 16, 1656, and given later in this account of the town. The Roman letters and Arabic figures within parentheses refer to the volume and page of the General Court Records at the State-House. The entry is as follows :

"In Ans^r to the peticon of M^r Deane Winthrop M^r Jno Tinker M^r Tho: Hinckly &c & of Lien Wm Martin Timothy Cooper &c The Court Judgeth it meete to Graunt etc." (IV. 204).

Charles Hastings Gerrish, of Groton, has a contemporaneous copy of this record made by Secretary Rawson, which was perhaps sent originally to the selectmen of the town. It was found among the papers of the late Hon. John Boynton, at one time town clerk.

The record of the House of Deputies is also practically the same, though there are a few verbal variations. It begins :

"There beioge a pet. prferd by M^r Dean Winthrop M^r Tho: Hinckley & diuers others for a plantation vpon the river that Runns from Nashaway into Merimacke called petapawage & an other from some of the

Inhabitants of Concord for a plantation in the same place to both which the Court returned this answer that the Court Thinkes meet to graunt etc." (II. 462).

The following letter from the Hon. J. Hammond Trumbull, whose authority in such matters is unquestioned, gives the meaning and derivation of the Indian name of the town :

"HARTFORD, Dec. 22, 1877.

"MY DEAR DR. GREEN,—*Petaupauket* and *Petapawage* are two forms of the same name, the former having the locative postposition (*-et*), meaning 'at' or 'on' a place; and both are corruptions of one or the other of two Indian names found at several localities in New England. From which of the two your Groton name came I cannot decide without some knowledge of the place itself. I leave you the choice, confident that one or the other is the true name.

"'*Potappog*,' used by Eliot for 'bay,' in Joshua xv. 2, 5, literally means 'spreading' or 'bulging water,' and was employed to designate either a local widening of a river making still water, or an inlet from a river expanding into something like a pond or lake. Hence the name of a part of (old) Saybrook, now Essex, Conn., which was variously written *Pautapaug*, *Potappogee*, *Polabauge*, and, later, *Pellipaug*, &c., so designated from a spreading cove or inlet from Connecticut River. *Potappog Pond*, in Dana, Mass., with an outlet to, or rather an inlet from Chicopee River, is probably a form of the same name. So is 'Port Tobacco,' Charles County, Md. (th. '*Potapaco*' of John Smith's map), on the Potomac.

"But there is another Algonkin name from which *Petaupauket* and some similar forms may have come, which denotes a swamp, bog, or quagmire,—literally, a place into which the foot sinks; represented by the Chippeway *petobeg*, a bog or soft marsh, and the Ahoaki *potepaug*. There is a *Pautipaug* (otherwise *Potapaug*, *Portipaug*, *Patapogue*, etc.) in the town of Sprague, Conn., on or near the Shetucket River, which seems to have this derivation.

"If there was in (ancient) Groton a pond or spreading cove, connected with the Nashua, Squannacook, Nissitasset, or other stream, or a pond-like enlargement or 'bulge' of a stream, this may, without much doubt, be accepted as the origin of the name. If there is none such, the name probably came from some 'watery swamp,' like those into which (as the 'Wonder-working Providence' relates) the first explorers of Concord 'sunke, into an uncertaine bottome in water, and waded up to their knees.'

"Yours truly,

"J. HAMMOND TRUMBULL."

The last suggestion, that the name came from an Algonkin word signifying "swamp" or "bog," appears to be the correct one. There are many bog meadows, of greater or less extent, in different parts of the town. Two of the largest—one situated on the easterly side of the village, and known as Half-Moon Meadow, and the other on the westerly side, and known as Broad Meadow, each containing perhaps a hundred acres of land—are now in a state of successful cultivation. Before they were drained and improved they would have been best described as swamps or bogs.

It is to be regretted that so many of the Indian words, which have a local significance and smack of the region, should have been crowded out of the list of geographical names in Massachusetts. However much such words may have been twisted and distorted by English pronunciation and misapplication, they furnish now one of the few links that connect the present period with prehistoric times in America. "Nashaway," mentioned in the petition, is the old name of Lancaster, though spelled in different ways. Mr. Trumbull has given some interesting facts in regard to this Indian word, which I copy from a paper

by him in the second volume of the "Collections of the Connecticut Historical Society: "

"NASHAWÉ (Chippewa), *nashawai* and *nashawin*, 'mid-way,' or 'between,' and with *ohke* or *auk* added, the 'land between' or 'the half-way place,'—was the name of several localities. The tract on which Lancaster, in Worcester county (Mass.) was settled, was 'between' the branches of the river, and so it was called '*Nashaway*' or '*Nashawake*' (*nashawé-ohke*); and this name was afterwards transferred from the territory to the river itself. There was another *Nashaway* in Connecticut, between Quinebaug and Five-Mile Rivers in Windham county, and here, too, the mutilated name of the *nashawé-ohke* was transferred, as *Ashawog* or *Assawog*, to the Five-Mile River. *Natchaug*, in the same county, the name of the eastern branch of Shetucket river, belonged originally to the tract 'between' the eastern and western branches; and the Shetucket itself borrows a name (*nashawé-tuk-ut*) from its place 'between' Yantic and Quinebaug rivers (page 33)."

The town is indebted for its name to Deane Winthrop, a son of Governor John Winthrop and one of the petitioners for the grant. He was born at Groton, in the county of Suffolk, England, on March 16, 1622-23; and the love of his native place prompted him to perpetuate its name in New England. He stands at the head of the first list of selectmen appointed by the General Court, and for a short time was probably a resident of the town. At the age of exactly eighty-one years he died, on March 16, 1703-04, at Pullen Point, now within the limits of Winthrop, Massachusetts.

The following letter, written by a distinguished representative of the family, will be read with interest :

"BOSTON, 27 February, 1878.

"MY DEAR DR. GREEN,—It would give me real pleasure to aid you in establishing the relations of Deane Winthrop to the town of Groton in Massachusetts. But there are only three or four letters of Deane's among the family papers in my possession, and not one of them is dated Groton. Nor can I find in any of the family papers a distinct reference to his residence there.

"There are, however, two brief notes of his, both dated 'the 16 of December, 1662,' which I cannot help thinking may have been written at Groton. One of them is addressed to his brother John, the Governor of Connecticut, who was then in London, on business connected with the Charter of Connecticut. In this note, Deane says as follows :

"I have some thoughts of removing from the place that I now live in, into your Colony, if I could hit of a convenient place. The place that I now live in is too little for me, my children now growing up."

"We know that Deane Winthrop was at the head of the first Board of Selectmen at Groton a few years earlier, and that he went to reside of Pullen Point, now called Winthrop, not many years after.

"I am strongly inclined to think with you that this note of December, 1662, was written at Groton.

"Yours very truly,

"ROBERT C. WINTHROP.

"SAMUEL A. GREEN, M.D."

A few years before the incorporation of the town, Emanuel Downing, of Salem, who married Lucy, a sister of Governor John Winthrop, had a very large farm which he called Groton. It was situated in what was afterward South Danvers, but now Peabody, on the old road leading from Lynn to Ipswich, and thus named, says Upham, in his "Salem Witchcraft," "in dear remembrance of his wife's ancestral home in 'the old country'" (I. 43). Downing subsequently sold it to his nephews, John Winthrop, Jr., and Adam Winthrop, on July 23, 1644, when he speaks of it as

"his farme of Groton." The sale is duly recorded in the Suffolk Registry of Deeds (I. 57).

Groton in Connecticut—younger than this town by just half a century, and during the Revolution the scene of the heroic Ledyard's death—was named in the year 1705, during the Governorship of Fitz-John Winthrop, out of respect to the Suffolk home of the family.

New Hampshire has a Groton, in Grafton County, which was called Cockermonth when first settled in the year 1766. Subsequently, however, the name was changed by an act of the Legislature, in accordance with the unanimous wish of the inhabitants who approved it, on December 7, 1796. Some of its early settlers were from Hollis, New Hampshire, and others from this town.

Vermont, also, has a Groton, in Caledonia County, which received its charter on October 20, 1789, though it was settled a short time before. A history of the town, written by General Albert Harleigh Hill, appeared in Miss Abby Maria Hemenway's "Vermont Historical Gazeteer" (IV. 1145-1168). Taken bodily from this work, a pamphlet edition was also published, with some slight variations, but with the same paging. The author says:

"It received the name of Groton through the influence of its earliest settlers, who were born in Groton, Mass. These sterling old patriots who, mid all the stirring activity of those days, forgot not the old birthtown, but hallowed its memory by giving its name to their new settlement and town in the wilderness" (page 1145).

New York, too, has a town called Groton, situated in Tompkins County; and Professor Marvin Morse Baldwin, in an historical sketch of the place, published in the year 1858, gives the reason for so naming it. He says:

"At first, the part of Locke thus set off was called Division; but the next year [1818] it was changed to Groton, on the petition of the inhabitants of the town, some of whom had moved from Groton, Mass., and some from Groton, Ct., though a few desired the name of York" (page 8).

There is also a Groton in Erie County, Ohio. It is situated in that part of the State known as the fire lands, and so called after the Connecticut town. The name was originally Wheatsborough, and its first settlement was made in the year 1809.

The latest place aspiring to the honor of the name is in Brown County, South Dakota, which was laid out six or eight years ago on land owned by the Chicago, Milwaukee and St. Paul Railway Company. I am informed that various New England names were selected by the company and given to different townships, not for personal or individual reasons, but because they were short and well sounding, and unlike any others in that State.

In the middle of the last century—according to the New England Historical and Genealogical Register (XXIV. 56 note, and 60) for January, 1870—there was a place in Roxbury sometimes called Groton. It was a corruption of Groaton, the name of the man

who kept the "Grey Hound" tavern in that neighborhood.

Groton, in England, is an ancient place; it is the same as the Grotena of Domesday Book, in which there is a record of the population and wealth of the town, in some detail, at the time of William the Conqueror, and also before him, under the Anglo-Saxon King, Edward the Confessor. A literal translation of this census-return of the year 1086 is as follows:

"To the time of King Edward [the Abbot of] Saint Edmund held Groton for a manor, there being one carucate and a half of land. Always [there have been] eight villeins and five bordarii [a rather higher sort of serfs; cotters]. Always [there has been] one plough in demesne. Always two ploughs belonging to homagers [tenants], and one acre of meadow. Woodland for ten hogs. A mill serviceable in winter. Always one work-horse, six cattle, and sixteen hogs, and thirty sheep. Two free men of half a carucate of land, and they could give away and sell their land. Six bordarii. Always one plough, and one acre of meadow [belonging to these bordarii]. It was then [i. e., under King Edward] worth thirty shillings, and now valued at forty. It is seven furlongs in length and four in breadth. In the same, twelve free men, and they have one carucate; it is worth twenty shillings. These men could give away and sell their land in the time of the reign of King Edward. [The Abbot of] Saint Edmund has the soc, protection and servitude. Its gelt is seven pence, but others hold there."

This extract is taken from the fac-simile reproduction of the part of Domesday Book relating to Suffolk (page CLVIII), which was published at the Ordnance Survey Office, Southampton, in the year 1863. The text is in Latin, and the words are much abbreviated. The writing is peculiar and hard to decipher. The same entry is found, in printed characters, in the second volume of Domesday Book (page 359. b.), published in the year 1783.

Some idea of the condensed character of the record may be gathered from the following copy of the beginning of the description of Groton, in which the matter within the brackets is what the Norman scrivener omitted: "Grotena. [m] t.[empore] r.[egis] e.[dvardi] ten[uit] S.[anctus] e.[dmundus] p[ro] man[er]io" etc. A carucate was "a plough land," or a farm that could be kept under tillage with one plough. It is variously estimated at from twelve acres to a hundred.

It is curious to note the different ways which the early settlers had of spelling the name; and the same persons took little or no care to write it uniformly. Among the documents and papers that I have examined in collecting material for a history of the town, I find it spelled in twenty-one different ways, viz: Groton, Grotton, Groten, Grotten, Grotin, Groaten, Groatne, Groaton, Groaton, Grooton, Grotton, Grotten, Grotton, Groughton, Growthon, Groyton, Groaton, Grawton, Grawton and Croaton. From the old spelling of the word, it may be inferred that the pronunciation varied; but at the present time natives of the town and those "to the manner born" pronounce it *Gráw-ton*. This method appears to hold good in England, as the Reverend John W. Wayman, rector of the parent town, writes me, under date of August 13, 1879, "That the local pronunciation is decidedly Gráw-ton. The name of the

parish is described in old records as Groton, or Growton." I learn from trustworthy correspondents in all the American towns of the name, that the common pronunciation of the word in each one of them is *Gráw-ton*. With the exception of the town in South Dakota, I have visited all these places, including the one in England, and my observation confirms the statement.

The following paragraph is taken from the *Groton Mercury*, of June, 1851, a monthly newspaper edited by the late George Henry Brown, postmaster at that time :

"We have noticed amongst the mass of letters received at our Post Office, the word Groton spelled in the following different ways: Gro-tou, Grawton, Graton, Grotown, Groutowd, Growtowo, Growtan, Grow-ten, Growton, Gratan, Grattan, Grewton, Grothian, Graten, Groten, Grouton."

The daily life of the founders of Massachusetts would be to us now full of interest, but unfortunately little is known in regard to it. The early settlers were pious folk, and believed in the literal interpretation of the Scriptures. They worked hard during six days of the week, and kept Sunday with rigid exactness. The clearing of forests and the breaking up of land left little leisure for the use of pen and paper; and letter-writing, as we understand it, was not generally practiced. They lived at a time when printing was not common and post-offices were unknown. Their lives were one ceaseless struggle for existence; and there was no time or opportunity to cultivate those graces now considered so essential. Religion was with them a living, ever-present power; and in that channel went out all those energies which with us find outlet in many different directions. These considerations should modify the opinions commonly held in regard to the Puritan fathers.

The sources of information relating to the early history of Groton are few and scanty. It is only here and there in contemporaneous papers that we find any allusions to the plantation; and from these we obtain but glimpses of the new settlement. The earliest document connected with the town after its incorporation is a petition now among the Shattuck Manuscripts, in the possession of the New England Historic Genealogical Society, which contains some interesting facts not elsewhere given. All the signatures are in the same handwriting as the body of the document; but those of the committee signing the report on the back of the petition are autographs. The report itself is in the hand of Joseph Hills. The document is as follows:

"Bost": 16: 3 m^o: 1656

"To the Right Worth the Gou^{er} the wo^rth^l Deput Gou^{er} and Magistrates with the Worthy Deputies of this Hono^rd Court

"The humble Peticon of Certain the intended Inhabitants of Groten,
Humbly Sheweth

"That yo^r Peticon^{er} having obtieoed their Request of a Plantacon from this honored Court, they haue made Entrauc therevpon, and do Resolue by the Gracious Assistants of the Lord to proceed in the same (though the greatest Number of Peticon^{er} for the Grant haue declyned the work) yet because of the Remoteness of the place, & Considering

how heavy and elowe it is like to be Carried an end and with what Charge and difficultie it will be Attended yo^r Peticon^{er} humble Requests are

"1 That they be not nominated or included in the Country taxes vntil the full end of three years from these p^{re}sents: (in which time they Account their expenc will be great to the building a house, procureing and maintaining of a minister &c, with all other necessary Town Charges: they being but few at present left to Carry on the whole worke) and at the end of the term, shall be redy by gods help to yeald their Rates according to their Number & abillitie & what shall be imposed, vpon them

"2 That they may haue libertie to make Choyce of an other then M^r Danford for the Laying out their town bounds because of his desire to be excused by reason of his vrgent ocations otherwise, & that they be not strictly tyed to a square forme in their Line Laying out

"So shall yo^r Peticon^{er} be incoriged in this great work, and shall as, duty binde pray for yo^r happloess and thankfully Rest

"[Indorsed for filing:] Grotons Peticon | Eutrd & x^e secured p^d 8 | 1656"

The next document, in point of time, connected with the history of Groton is a petition to the General Court from John Tinker, one of the original selectmen of the town. It is dated October, 1659, and preserved among the Massachusetts Archives (CXII. 120) at the State-House. In this petition Tinker makes some indirect charges against his townsmen, of which the real nature can now be learned only by inference. It would seem that they had taken land in an unauthorized manner, and their proceedings in other respects had obstructed the planting of the town; and that he felt aggrieved in consequence of such action. Evidently the new plantation did not prosper during the first few years of its settlement. The petition reads thus:

"Boston To the Hono^rd Gen^l Court Assembled at Boston
8 m^o The humble Petition of J^{no} Tinker
1659 Humbly Sheweth that

"With vnfaigned Respect to the good and welfare of Church and Commonwealth yo^r Petitioner hath ondeauored to answer the expectation and desires of this hono^rd Court and the whole Countrey In erecting settling and Carying an End the Affaires of Groaton, Granted and intended by this hono^rd Court for a plantation, which notwithstanding (all in vaine) it Continueth vnpeopled and soe Like to remaine vnlese by this hono^rd Court some wise and Judicious Comitte be impowred to order and dispose of all things there about, after which no doubt it will goe ou and prosper, which is the humble desire and Request of yo^r Petitioner that eue it may be, and that yo^r Petitioner be admitted and appoyted

faithfully to declare unto and informe the said Comitee, 1 what hath alreedy bin done, 2 what are the Grounds and Reasons wherefore it Remaineth at the stay it doeth, being so much desired by so many and such Considerable persons as it is, and 3 what hee Concernith needfull to the further Confirming what is done according to Right to evary person & Cause, and the settling such due order as may incorigd the Caring on of all things to a prosperous effect, unto which yo^r Petitioner shall redly adrese himselfe, as willing to submitt to the good pleasure of this hono^rd Court & such Authorized by them for such due satisfacon for all his Care time cost & paines in and about the said plantation as shall be thought meete and humbly begging the good favor of god to Rest vpon you shall ever Remaine to the hono^rd Court and Country

"Yo^r humble Serv^t Jⁿ^s. TINKER

"The comitee having praed this peticon, do Judge y^t it wilbe very convenient that a Comitee of 3: or more meet persons be nominated & impowrd to Examine the pticulars therein mancooned, and make retorne of w^t they find to the Court of Eleccion.

"THOMAS DANFORTH
ANTHONY STODDARD

"21. (8) 59. The Deput^s approue of the ret. of y^r Comitee in answ^r: hereto & haue Nominated M^r Danforth M^r Ephraim Child Capt. Edw: Johnson to be their Comitee desareing of Hoo^rd magists [consent] hereto

"WILLIAM TORREY Cleric.

"Consented to by y^e magists Edw RAWSON Secrety "

It appears from the writing on it that Tinker's petition was referred to a special committee, who recommended that the whole matter be considered by another committee with larger powers, who should report to the Court of Election. In accordance with this recommendation, Mr. Thomas Danforth, Captain Edward Johnson and Ephraim Child were appointed such a committee. I have here given their names in the order in which they are mentioned in the General Court Records (IV. 324), and not as they appear in the approval of the committee's return on the petition. The original report, made eighteen months afterwards and duly signed by them, is now among the Shattuck Manuscripts of the New England Historic Genealogical Society. It is dated May 23, 1661 ("23 (3) 1661"), and bears the official action of the House of Deputies and of the magistrates. Edward Rawson, the secretary, made his entry on the paper May 29, 1661. In copying the document I have followed the General Court Records, as this version of the petition contains fewer abbreviations and contractions. The record-book has been paged differently at three separate times; and the paging marked in red ink has been taken in this copy. The "Committees Returne ab^t Groaten & Courts ord^r" are as follows:

"Wee whose names are subscribed being Appointed & impowrd by the Generall Court in october 1659 for the examination of the proceedings about Groten plantation & the Intanglements that haue obstructed the planting thereof hitherto—having taking paines to travajle unto the said place & examine the Records of forme^r proceedings in that place as also the Capacity of the s^d place for the enterteyning of a meet number of persons that may Carry on the affairs of a Towne, doe Apprehend (according to w^t Information we haue had) that the place will Affoord a comfortable accommodation for sixty familiee at least that may ansist in a way of husbandry—And for such familiee as be there already planted we be not aboue four or five acres¹ wee doe not finde their Interest in such

¹ The word "acres" occurs at the end of a line in the manuscript records, and appears to be an interpolation. The sense does not require it, and the original copy in the library of the New-England Historic,

lands as they claime is legall & Just nor yet consistant wth the Courts ends in their grant of the said plantation.

"And for the further encouragement of such as haue now a desire &c doe present themselves as willing to plant themselves in that place,

"Wee craue leave humbly to leave our poore apphentions wth this Honored Court as followeth

"1 That the old planters & their Assignes whose names are John Tincker Blch: Smith. W^o Martjn. Ri: blood Rob^t Blood & Jⁿ^s Lakin thnt they reteine & keep as their propriety, (of such lands as they now claime an Interest in) each of them only twenty acres of meadow twenty acres for the house lott ten acres Intervale land & ten acres of other vplands & that the same be sett out by a Comitee so as may not vn-equally prejudice such as are or may be their Neighbo^rs

"2 That the neere lands & meadows, be so diuided as may accomodate at least sixty familiee & for that end That the first diuision of lands be made in manner following viz^t such as haue one hundred & fifty pounds estate be allowed equall wth the old planters aboue & that none exceed & that none haue lesse then tenn acres for their houselott & five acres of meadow two & a halfe acres of Intervale & two & a half of other lands for planting lotts in their first diuision & that none be admitted to haue graunts of lotts there but on Condition^s following viz^t

"1 That they Goe vp. wth their familiee wthin 2 years after their graunts, on penalty of forfeiting their graunts againe to the Towne & so many tenn shillings as they had acres Graunted them for their houselots & that the like Injunction be putt vpon those aboue named as old planters.

"2 That all towne charges both Civil & Ecclesiasticall be leyed according to each mans Grant in this first diuision of lands for seven years next Ensuing Excepting only such whose stocks of Cattle shall exceed one hundred & fifty pounds estates.

"3 That the power of Admission of Inhabitants & Regulating the affaires of the said place be referred to a Comitee of meete persons Impowred by this Court thereto, Vntil the plantation be in some good measure (at least) filled wth Inhabitants & be enahled regularly & peaceably to Carry on y^e same themselves

"4 That this hoooured Court be pleased to grantt them Immunitiee [from] all Comon & Ordinary Country charges not exceeding a single rate or a Rate & a half p Annu for three years next ensuing.

"5 That in Graunting of lotts children haue their due Consideration wth estates their pareⁿs giving securitiee to defray y^r charges of the place as is before promised.

"THO DANFORTH
EDWARD JOHNSON
EPHRAIM CHILD

"The Court Approoves of & doe Confirm the retorne of the Comitee & doe hereby further order & Impowrd the aforesajd Comitee for the ends aboue mentioned vntill meete men shall be found amongst such as shall Inhabit there & be approved of by a County Court"
(General Court Records, IV. 371.)

The next document, in point of time, found among the Archives (I. 21) at the State House and relating to Groton, is the following request for a brandmark, which was wanted probably for marking cattle

"The Humble Request of Joseph Parker to the Honoured Governour the Honourd magistrates & deputies, Humbly Requests in behalfe of the towne of Grawton that the letter GR may bee Recorded as the brand mark belonging to the towne I being chosen Counstible this year make bolde to present this, to the Honoured Court it being hit my duty, in the towne behalfe thus Hopinge the Honored Court will grant my request I rest yo^r Humble Servant :

"JOSEPH PARKER

"WILLIAM TORREY Cleric.

"o^r Hono^rd magists consentinge hereto

"Consented by the magists

"EDW: RAWSON Secrety "

Joseph Parker, before coming to Groton, had lived at Chelmsford, where his children were born. He

Genealogical Society does not contain it, though the printed edition of the General Court Records gives it.

was a brother of James, another of the early settlers of the town.

During this period the town was paying some attention to the question of marks for trees as well as for cattle. At a general meeting held on March 5, 1665-66, it was voted that "there should be trees marked for shade for cattell in all commonhy wayes:" and furthermore that "the marke should be a great T." From various expressions found in the early town records, it would seem that the country in the neighborhood was not densely wooded when the settlement was first made. At a meeting of the selectmen held in the winter of 1669, an order was passed for the preservation of trees, but the writing is so torn that it is impossible to copy it. At another meeting held on January 13, 1673-74, it was voted that all trees of more than six inches in diameter at the butt, excepting walnut and pine, growing by the wayside, should be reserved for public works, and that the penalty for cutting them down, without authority, should be ten shillings a tree.

At a general town-meeting on December 21, 1674, leave was granted to William Longley, Jr., to cut down three or four trees standing in the road near his farm and shading his corn, on condition that he give to the town the same number of trees for mending the highways.

The early settlers of Groton encountered many trials and privations in planting the town. The men worked hard in felling trees and breaking ground, and the women toiled faithfully in their rude houses. They were used to hardships, and they took them with Christian resignation. Their daily life taught them the true principles of philosophy. They lived on the rough edge of civilization, and nothing stood between them and an unbroken wilderness. These pioneers were a devout people; and the strength of their religious belief is shown in no way so clearly as in the fortitude with which they met their lot in life. The prowling Indians were their neighbors, whose constant movements required careful watching. There were families of savages scattered along the interval land of the Nashua valley, from Lancaster to the Merrimack River, who at times annoyed the settlers by killing pigs and stealing chickens. Judging from the number of stone implements found in the neighborhood, there was an Indian village just above the Red Bridge, on the west side of the Nashua River. It probably consisted of a few families only, belonging to the Nashua tribe, as they were called by the English. Like all their race, these Indians were a shiftless people, and often changed their abodes, going hither and thither as they found good hunting-grounds or fishing-places. They bartered skins and furs with the planters; and so much business was carried on in this way, that the government sold to individuals the right to trade with them. As early as July, 1657, John Tinker, one of the original selectmen of the town, appointed by the General Court, paid eight

pounds for the privilege of trafficking with them at Lancaster and Groton. A few of these natives knew a little English, which they had picked up from contact with the whites. Gookin refers to them in his "History of the Christian Indians," when he speaks of "some akulking Indians of the enemy, that formerly lived about Groton, the principal whereof was named Nathaniel, he and his party did this and other mischief afterward, in burning several houses at Chelmsford."¹ This Nathaniel was taken subsequently at Coheco (now Dover), New Hampshire, and hanged in Boston. Some of these vagrants took an active part in the burning of Groton during Philip's War. The leader of the savages at this assault was John Monaco or Monoco, nicknamed "One-eyed John," from the loss of an eye. After he had taken by stratagem a garrison-house, he entered into a long conversation with Captain Parker, who was stationed in another house nearby, and called him his *old neighbor*. From this fact I infer that "One-eyed John" knew Captain Parker, and had previously lived in the vicinity. Warfare among the aborigines did not require generalship so much as knowledge of places; and the head of an assaulting party was one familiar with the clearings and the lay of the land in the threatened territory. During the ensuing autumn this leader was brought to the gallows in Boston, where he suffered the extreme penalty of the law.

The Indians soon acquired from the English the love of strong drink, which is sure to lead to disputes and quarrels. The earliest documents at the State House, relating to Groton and the savages, give an account of a drunken brawl which ended in murder. The affair took place in the Merrimack Valley, and several men of this town were summoned to appear as witnesses at the investigation before the General Court in Boston. In the spring of 1668 Captain Richard Waldron built a trucking or trading-house at Penacock (now Concord), New Hampshire, where a few weeks later one Thomas Dickinson was murdered by an Indian while under the influence of liquor. The homicide created great excitement, and it has been supposed to have delayed the permanent settlement of the place for many years. A warrant was issued directing the constable of Groton to summon John Page, Thomas Tarbell, Jr., Joseph Blood and Robert Parish, all of this town, before the General Court in order to give their testimony, which they did under oath. It appeared by the evidence that there had been a drunken row, and that Dickinson was killed by an Indian, who acknowledged the crime and expressed great sorrow for it, but pleaded drunkenness in extenuation of the deed. The culprit was tried at once by a council of the Indians, who sentenced him to be shot, which was done the next day. It is interesting now to note the high temperance stand taken, more than two hundred years ago, by the

¹ *Archæologia Americana*, II. 471.

Chief Tohaunto, which places him abreast of the most earnest opposers of the rum traffic at the present time.

During a series of years before Philip's War the Indians had been supplied with arms and ammunition, though this was contrary to the laws of the Colonies. The French in Canada and the Dutch in New York had carried on considerable traffic with the natives in these contraband articles; and occasionally some avaricious settler would barter with them, giving powder and shot in exchange. The possession of firearms made the Indians bold and insolent, and the tendency of events was toward open hostilities. This tendency was strengthened by a feeling of suspicion on the part of the colonists, and by one of jealousy on the part of the savages. Distrust always grows out of suspicion, and the fears of the settlers began to be excited when they thought of their exposed situation. Under these circumstances, it was wise to prepare for all emergencies; and at an early day a military company was organized in this town. The following entry is made in the manuscript records of the General Court during the session beginning May 6, 1673:

"James Parker of Grosten having had the care of the military Company there for severall yeares. is Appointed & ordered to be their lieutenant & W^m Larkin to be ensigne to the said Company there."¹

The two officers of this organization were each promoted one grade during the next autumn, which would indicate that the company was filling up in numbers. At the session of the General Court beginning October 15, 1673, the record reads:

"The military Company of Grosten being destitute of military officers The Court Judgeth it meet to choose & Appoint James Parker to be their captain W^m Larkin to be lieutenant & Nathaniel Lawrence to be their ensigne."²

Before this time there had been in Middlesex County a company of troopers, or cavalry, made up of men living in the frontier towns, of which Groton was one—as mentioned in the General Court Records of October, 1669.

One of the prominent men in the history of the Colony at this period was Major Simon Willard. A native of England, he came to Massachusetts in the year 1634. He had lived at Concord, Lancaster and Groton, and in all these places exerted a wide influence. He had filled various civil offices, and in his day was a noted military man. His farm was situated at Nonacoicus, now included within the limits of Ayer; and his dwelling-house was the first building burned at the attack on Groton, March 13, 1676. During several months previously he had been engaged with his men in scouting along the line of frontier settlements and protecting the inhabitants. At this assault Major Willard came with a company of cavalry to the relief of the town, though he did not

reach the place in time to be of service in its defence. He died at Charlestown, on April 24, 1676, a very few weeks after this town was abandoned. Benjamin Thompson, the earliest native American poet, pays the following tribute to his character, in a little pamphlet published during Philip's War, and entitled "New England's Tears." It is certainly rude in expression, and probably just in its conception, but not accurate as to the date of his death:

"About this Time Died Major Willard Esq.; who had continued one of our Senators many years, and Head of the Massachusetts Bands. In 23 April 1676.

"EPITAPHIUM.

"Great, Good, and Just, Valiant, and Wise,
New Englands Common Sacrifice:
The Prince of War, the Bond of Love,
A True Heroick Martial Dove:
Pardon I crout his Parts so close
Which all the World in measure knows,
We envy Death, and sell ice may,
Who keeps him under Lock and Key."

Nearly one-and-twenty years had passed since the little settlement in the wilderness was begun, and Groton was fast approaching its majority. The new town had enjoyed a moderate share of prosperity, and was slowly working out its destiny. The founders were poor in this world's goods, but rich in faith and courage. They had now tasted the hardships of frontier life, but not as yet felt the horrors of savage warfare. The distant thunders of a threatening storm were beginning to be heard, and the occasional flashes put the early settlers on their guard. Philip's War had broken out during the summer of 1675, and the outlying settlements were exposed to new dangers. The inhabitants of this town took such precautions as seemed needful, and trusted in Providence for the rest. They were just beginning to prepare for the work of another season, when a small band of prowling Indians alarmed the town by pillaging eight or nine houses and driving off some cattle. This occurred on March 2, 1676, and was a sufficient warning, probably, to send the inhabitants to the garrison-houses, whither they were wont to flee in time of danger. These places of refuge were usually houses surrounded by a strong wall of stone or timber, built up as high as the eaves, with a gateway, and port-holes for the use of musketry.

In Groton there were five such garrison-houses, and under their protection many a sleepless, anxious night was passed by the inmates. Four of these houses were very near each other, and the fifth was nearly a mile away. The sites of some of them are well known. One was Mr. Willard's house, which stood near the High School; another was Captain Parker's house, which stood just north of the Town Hall; and a third was John Nutting's house, on the other side of James's Brook. The fourth was probably north of John Nutting's, but perhaps south of Mr. Willard's. There is a tradition that one stood near the house formerly owned and occupied by the late Eber Woods, which would make the fifth

¹ (General Court Records, IV. 718.)

² (General Court Records, IV. 726.)

garrison-house "near a mile distant from the rest." Richard Sawtell, the first town-clerk, was living on this site at that time, and his house would have been a convenient rallying-point for his neighbors. Without doubt he was the Richard Sawtell who served in Major Appleton's company during Philip's War.

It is recorded in the inventory of his estate, on file in the Middlesex Probate Office at East Cambridge, that Timothy Cooper, of Groton, was "Sleine by the Indeins the Second day of march, 1675-6." Cooper was an Englishman by birth, and lived, probably, somewhere between the Baptist meeting-house and the beginning of Farmers' Row. It is not known that there was other loss of life at this time, but the affair was serious enough to alarm the inhabitants. They sought refuge immediately in the garrison-houses, as the Indians were lurking in the vicinity. On March 9th the savages again threatened the beleaguered town, and by a cunningly contrived ambush, managed to entrap four men at work, of whom one was killed and one captured, while the other two escaped. This second assault must have produced great alarm and consternation among the people of the town. The final and main attack, however, came on the 13th, when the enemy appeared in full body,—thought to be not less than four hundred in number. The inhabitants at this time all were gathered into the several garrisons for protection. During the previous night the savages scattered throughout the neighborhood, and the first volley of shot on the morning of the 13th was a signal for the general burning of the town; and in this conflagration the first meeting-house of Groton was destroyed, together with about forty dwelling-houses. This building, erected at the cost of many and great privations, was the pride of the inhabitants. With its thatched roof, it must have burned quickly; and in a very short time nothing was left but a heap of smoking embers. Although it had never been formally dedicated to religious worship, it had been consecrated in spirit to the service of God by the prayers of the minister and the devotion of the congregation. In this assault John Nutting's garrison was taken by stratagem. The men defending it had been drawn out by two Indians, apparently alone, when the savages in ambush arose and killed one of the men, probably John Nutting himself, and wounded three others. At the same time the garrison-house, now defenceless, was attacked in the rear and the palisades pulled down, allowing the enemy to take possession. The women and children, comprising those of five families, escaped to Captain Parker's house, situated between James's Brook and the site of the Town-House.

There is a family tradition, worthy of credence, that John Nutting was killed while defending his log-house fort during Philip's War. His wife's name appears a few months later in the Woburn town-records as "Widow Nutting," which is confirmatory of the tradition.

Several printed accounts of Philip's War appeared very soon after it was ended, and these furnish all that is known in regard to it. At that time there was no special correspondent on the spot to get the news; and, as the means for communication were limited, these narratives differ somewhat in the details, but they agree substantially in their general statements.

With the exception of Hubbard's Narrative, the contemporary accounts of this assault on the town are all short; and I give them in the words of the writers, for what they are worth. The first is from "A Brief History of the Warr with the Indians in Newe England," by Increase Mather, published in the year 1676. This account, one of the earliest in print, is as follows:

"March the 10th. Mischief was done, and several lives cut off by the Indians this day, at Groton and at Sudbury. An humbling Providence, inasmuch as many Churches were this day Fasting and Praying. (Page 23.)

"March 13. The Indians assaulted Groton, and left but few houses standing. So that this day also another Candlestick was removed out of its place. One of the first houses that the enemy destroyed in this place, was the House of God, i. e. which was built, and set apart for the celebration of the publick Worship of God.

"When they had done that, they scoffed and blasphemed, and came to Mr. Willard (the worthy Pastor of the Church there) his house (which being Fortified, they attempted not to destroy it) and tauntingly, said, What will you do for a house to pray in now we have burnt your Meeting-house? Thus hath the enemy done wickedly in the Sanctuary, they have burnt up the Synagogues of God in the Land; they have cast fire into the Sanctuary; they have cast down the dwelling place of his name to the Ground. O God, how long shall the Adversary approach? shall the Enemy Blaspheme thy Name for ever? why withdrawest thou thine hand, even thy right hand? pluck it out of thy bosome." (Page 21.)

Several accounts of the war appeared in London in 1676, only a few months after the destruction of this town. They were written in New England, and sent to Old England, where they were at once published in thin pamphlets. The authors of them are now unknown, but undoubtedly they gathered their materials from hearsay. At that time Indian affairs in New England attracted a good deal of attention in the mother country. One of these pamphlets is entitled: "A True Account of the most Considerable Occurrences that have hapned in the Warre between the English and the Indians in New England, . . . as it hath been communicated by Letters to a Friend in London." This narrative says:

"On the 13th of March, before our Forces could return towards our Parte, the Indians sent a strong party, and assaulted the Town of Groton, about forty miles North-west from Boston, and burn'd all the deserted Houses; the Garrison'd Houses, which were about ten, all escaped but one, which they carryed, but not the English in it; for there was but one slain and two wounded." (Page 2.)

Another account, entitled: "A New and Further Narration of the State of New England, being a continued account of the Bloody Indian-war," gives the following version:

"The 14th of March the savage Enemy set upon a Considerable Town called Groughton, and burnt Major Walberds House first (who with his family removed to Charls Town) and afterwards destroyed sixty Five dwelling-houses more there, leaving but six houses standing in the whole Town, which they likewise furiously attempted to set on fire;

But being fortified with Arms and Men as Garisons, they with their shot, killed several of the Enemy, and prevented so much of their designe; Nor do we hear that any person on our side was here either slain or taken captive." (Page 4.)

A few pages further on it says: "*Grantham* and *Nashaway* all ruined but one house or two." (Page 14.) Few persons would recognize this town under the disguise of *Grantham*.

A third one of these London pamphlets, bearing the title of "News from New England," says:

"The 7th of March following these bloody *Indians* march't to a considerable Town called *Croatan* where they first set fire to Major *Willards* house, and afterwards burnt 65 more, there being Seventy two houses at first so that there was left standing but six houses of the whole Town." (Page 4.)

The details of the burning of the town are found in "A Narrative of the Troubles with the Indians in New England," written by the Reverend William Hubbard, and printed in the year 1677. It is the fullest history of the events relating to Groton appearing near the time; and very likely many of the facts were obtained from the Reverend Mr. Willard. The account is not as clear as might be desired, and contains some glaring discrepancies, but it is too long to be quoted here.

The Indians were a cowardly set and never attacked in open field. They never charged on works in regular column, but depended rather on craft or cunning to defeat their adversary. The red *hell-hounds*—as they were sometimes called by our pious forefathers—were always ready to attack women and children, but afraid to meet men. The main body of the savages passed the night following the final attack in "an adjacent valley," which cannot now be easily identified, but some of them lodged in the garrison-house, which they had taken; and the next morning, after firing two or three volleys at Captain Parker's house, they departed. They carried off a prisoner,—John Morse, the town clerk,—who was ransomed a short time afterward. The following reference to him in an undated letter, written by the Rev. Thomas Cobbet to the Rev. Increase Mather, shows very nearly the time of his release:

"May y^e 12th [1676] Good wife *Diuans* [Divoll] and Good wife *Kettle* upon ransom paid, came into concord, & upon like ransom presently [a]fter *John Moss* of Groton & lieutenant *Carlors* [Kerley's] Daughter of Lancaster were set at liberty & 9 more w^out ransom." (Mather Manuscripts in the Prince Collection, at the Boston Public Library, I. 76.)

The ransom for John Morse was paid by John Hubbard, of Boston, and amounted to "about five pounds." Morse's petition to the Council, to have Hubbard reimbursed, is found among the Massachusetts Archives (LXIX. 48).

Fortunately the loss of life or limb on the part of the inhabitants of the town was small, and it is not known that more than three persons were killed—of whom one was Timothy Cooper, and another, without doubt, John Nutting—and three wounded; two were made prisoners, of whom one escaped from the

savages and reached Lancaster, and the other, John Morse, was ransomed.

The lot of these early settlers was indeed hard and bitter; they had seen their houses destroyed and their cattle killed, leaving them nothing to live on. Their alternative now was to abandon the plantation, which they did with much sadness and sorrow. The settlement was broken up, and the inhabitants scattered in different directions among their friends and kindred. In the spring of 1678, after an absence of two years, they returned and established anew the little town on the frontier.

In the autumn of 1679 the town of Groton erected a monument to commemorate the site of the meeting-house which was burned during this assault. It bears the following inscription:

"NEAR THIS SPOT
STOOD THE FIRST MEETING HOUSE OF GROTON
BUILT IN 1666
AND BURNT BY THE INDIANS
13 MARCH 1676"

The monument, in connection with two others relating to the history of the town, was dedicated with appropriate exercises in the Town Hall on Feb. 20, 1880, when an address was delivered by Dr. Samuel A. Green, which was subsequently printed.

After Philip's War the colonists were at peace with the Indians, but it was a suspicious kind of peace. It required watching and a show of strength to keep it; there was no good-will between the native race and the white intruders. The savages at best made bad neighbors; they were treacherous and addicted to drink. The following entries in the town records show that they were a shiftless and drunken set:

"Jnneuary 31 1681 It [was] agreed upon by the select men That the *Indians* shall be warned out of the Towne forth with and if they shall neglect the warning and if any of them be taken droncke or in drinke or with drinke Then these parsons ar to be seized and brot he foure the select men either by constable or by any other person and be pounseed accordin as the law doth direct and the Informar shall be sattised for his paines"

"March 28 1682 two *India* squaws being apprehended In drinke & with drinke brought to y^e select men one squaw *Nehatchebio* swaw being droncke was sentenced to receive & did receive ten stripes the other *John Nsequons* swaw was sentenced to pay 3^s 4^d cash and loose her two quart bottle and the Liqueour in it awarded to Sarg^t *Laken* who seized them."

During this period the Indians began again to be troublesome, and for the next fifteen or twenty years continued their occasional depredations by murdering the inhabitants, burning their houses, destroying their crops or killing their cattle. Into these garrison-houses the neighboring families gathered at night, where they were guarded by armed men who warned the inmates of any approach of danger.

At times troops were stationed here by the Colonial authorities for the protection of the town; and the orders and counter-orders to the small garrison show too well that danger was threatening. In the meanwhile King William's War was going on; and the

enemy had material and sympathetic aid from the French in Canada. The second attack on the town came in the summer of 1694, and the accounts of it I prefer to give in the words of contemporary writers. Sometimes there are discrepancies, but, in the main, such narratives are trustworthy.

The attack was made on Friday, July 27th, and Cotton Mather, in his "Magnalia," thus refers to it :

"Nor did the Storm go over so : Some Drops of it fell upon the Town of Groton, a Town that lay, one would think, far enough off the Place where was the last Scene of the Tragedy.

"On July 27. [1694,] about break of Day Groton felt some surprizing Blows from the Indian Hatchets. They began their Attacks at the House of one Lieutenant Lakin, in the Out-skirts of the Town; but met with a Repulse there, and lost one of their Crew. Nevertheless, in other Parts of that Plantation (when the good People had been so tired out as to lay down their Military Watch) there were more than Twenty Persons killed, and more than a Dozen carried away. Mr. Gershom Hobart, the Minister of the Place, with part of his Family, was Remarkably preserved from falling into their Hands, when they made themselves the Masters of his House; though they Took Two of his Children, whereof the one was Killed, and the other some time after happily Rescued out of his Captivity." (Book VII. page 86.)

Governor Hutchinson, in his "History of the Province of Massachusetts Bay," published during the following century, writes :

"Having crossed Merrimack, on the 27th of July [1694] they fell upon Groton, about 40 miles from Boston. They were repulsed at Lakiu's garrison house, but fell upon other houses, where the people were off their guard, and killed and carried away from the vicinity about forty persons. Toxus's two nephews were killed by his side, and he had a dozen bullets through his blanket, according to Charlevoix, who adds that he carried the fort or garrison and then went to make spoil at the gates of Boston; in both which facts the French account is erroneous." (II. 82.)

In the assault of July, 1694, the loss on the part of the inhabitants was considerably greater than when the town was destroyed in the attack of 1676. It is said that the scalps of the unfortunate victims were given to the Count de Frontenac, Governor of Canada. A large majority, and perhaps all, of the prisoners taken at this time were children. The Indians had learned that captives had a market value; and children, when carried off, could be more easily guarded than adults. It was more profitable for the savages to exchange prisoners for a ransom, or sell them to the French, than it was to kill them. It is now too late to give the names of all the sufferers, but a few facts in regard to them may be gathered from fragmentary sources. The families that suffered the severest lived, for the most part, in the same general neighborhood, which was near the site of the first meeting-house. Lieut. William Lakin's house, where the fight began, was situated in the vicinity of Chicopee Row.

The following list of casualties, necessarily incomplete and in part conjectural, is given as an approximation to the loss sustained by the town :

	Killed.	Captured.
John Longley's family	7	3
Rev. Mr. Hobart's "	1	1
John Shepley's "	4?	1
James Parker, Jr.'s "	2	2?
Alexander Rouse's "	2	1

Mr. Gershom Hobart, the minister, whose house was captured in this assault, lived where the Baptist meeting-house now stands. One of his boys was killed, and another, Gershom, Jr., was carried off. There is a tradition extant that a third child was concealed under a tub in the cellar, and thus saved from the fury of the savages. Judge Sewall writes in his diary, under the date of May 1, 1695 :

"Mr. Hobart's son Gershom is well at a new Fort a days Journey above Nerigawag [Norridgewock], Masters name le Nassacombewit, a good Master, and Mistress. Master is chief Captain, oow Bambaheen is abseut."

("Massachusetts Historical Collections," V. Fifth series, 403, 404.)

According to a letter written by the Reverend John Cotton to his wife at Plymouth, and dated "Election-night, Boston" (May 29, 1695), he was rescued from captivity during that month. The inscription on the Shepley monument says that "the Indians massacred all the Sheples in Groton save a John Sheple 16 years old who the[y] carried captive to Canada and kept him 4 years, after which he returned to Groton and from him descended all the Sheplea or Shepleys in this Vicinity;" but there is no record to show how many there were in this family. Mr. Butler, in his History (page 97), makes substantially the same statement, but does not mention any number. In my list it is placed at five, which is conjectural; of this number probably four were slain. Shepley lived near where the Martin's Pond Road starts off from the North Common. The knowledge which the boy John obtained of their language and customs, while a prisoner among the Indians, was of much use to him in after-life. Tradition says that, when buying furs and skins of them, he used to put his foot in one scale of the balance instead of a pound weight. In the summer of 1704, while he and thirteen other men were reaping in a field at Groton, they were attacked by a party of about twenty Indians. After much skirmishing Shepley and one of his comrades, Butterfield by name, succeeded in killing one of the assailants, for which act they were each granted four pounds by the Provincial authorities. He was the direct ancestor of the late Honorable Ether Shepley, of Portland, formerly chief justice of the Supreme Judicial Court of the State of Maine, and his son, the late Gen. George Foster Shepley, formerly a justice of the Circuit Court of the First Circuit of the United States. John's petition to the General Court, asking that an allowance be made for this service, and giving the particulars of the attack, is found among the Massachusetts Archives (XXX, 496, 497) at the State-House.

Among the "Names of those Remaining Still in hands of the french at Canada," found in a document dated October, 1695, are those of "Lidey Langlygerl" and "Jn° Shibly boy." In this list the residences of both these children are incorrectly written, Lydia's being given as Dover, New Hampshire, and

John's as Oyster River. They both belonged in this town, and were taken at the assault of July 27, 1694. The name of Thomas Drew appears in the same list as of Groton, which is a mistake, as he was of Oyster River. (Archives, XXXVIII. A 2.)

This expedition against Groton was planned in part by the Indians at a fort called Amsaquonte above Norridgewock, in Maine. It was arranged also in the plan of operations that Oyster River—now Durham, New Hampshire—should be attacked on the way; and the assault on that town was made July 18th nine days before the one on Groton. At Oyster River more than ninety persons were either killed or captured; the prisoners from the two towns appear to have been taken to Maine, where they were brought frequently together during their captivity. On January 21, 1695, Lieutenant-Governor William Stoughton issued a proclamation, in which he refers to the "tragical outrages and barbarous murders" at Oyster River and Groton. He says that several of the prisoners taken at these places "are now detained by the said Indians at Amarasoggin and other adjoining places."

Hezekiah Miles, *alias* Hector, a friendly Indian, at one time a captive in the enemy's hands, made a deposition before the Lieutenant-Governor and Council, at Boston, May 31, 1695, which gives some details of the preparation for the attack; and Ann Jenkins, in a deposition on June 11, 1695, adds other particulars. These papers may be found among the Massachusetts Archives (VIII. 39, 40).

The story of William and Deliverance Longley's family is a sad one to relate. They were living, with their eight children, on a small farm, perhaps a mile and a quarter from the village, on the east side of the Hollis road. Their house was built of hewn logs, and was standing at the beginning of the present century. The old cellar, with its well-laid walls, was distinctly visible forty years ago, and traces of it could be seen even to very modern times. The site of this house has recently been marked by a monument bearing the following inscription:—

HERE DWELT
WILLIAM AND DELIVERANCE LONGLEY
WITH THEIR EIGHT CHILDREN.
ON THE 27TH OF JULY 1694
THE INDIANS KILLED THE FATHER AND MOTHER
AND FIVE OF THE CHILDREN
AND CARRIED INTO CAPTIVITY
THE OTHER THREE.

The monument was erected in the autumn of 1879, at the expense of the town, on land generously given for the purpose by Mr. Zechariah Fitch, the present owner of the farm; and it was dedicated with appropriate exercises on February 20, 1880.

On the fatal morning of July 27, 1694, the massacre of this family took place. The savages appeared suddenly, coming from the other side of the Merrimack River, and began the attack at Lieutenant

William Lakin's house, where they were repulsed with the loss of one of their number. They followed it up by assaulting other houses in the same neighborhood. They made quick work of it, and left the town as speedily as they came. With the exception of John Shepley's house, it is not known that they destroyed any of the buildings; but they pillaged them before they departed. They carried off thirteen prisoners, mostly children,—and perhaps all,—who must have retarded their march. There is a tradition that, early in the morning of the attack, the Indians turned Longley's cattle out of the barnyard into the cornfield and then lay in ambush. The stratagem had the desired effect. Longley rushed out of the house unarmed, in order to drive the cattle back, when he was murdered and all his family either killed or captured. The bodies of the slain were buried in one grave, a few rods northwest of the house. A small apple-tree growing over the spot and a stone lying even with the ground, for many years furnished the only clue to the final resting-place of this unfortunate family, but these have now disappeared.

William Longley was town clerk in the year 1687, and also from 1692 till his death, in 1694; and only one week before he was killed he had made entries in the town records. His father, William Longley, Sr., also had been town clerk during the years 1666 and 1667, and died November 29, 1680. The father was one of the earliest settlers of the town, as well as the owner of a thirty-acre right in the original Groton plantation. Lydia, John and Betty were the names of the three children carried off by the savages, and taken to Canada. Lydia was sold to the French and placed in the Congregation of Nôtre Dame, a convent in Montreal, where she embraced the Roman Catholic faith, and died July 20, 1758, at the advanced age of eighty-four years. Betty perished soon after her capture from hunger and exposure; and John, the third child, remained with the savages for more than four years, when he was ransomed and brought away much against his own will. At one time during his captivity he was on the verge of starving, when an Indian kindly gave him a dog's foot to gnaw, which for the time appeased his hunger. He was known among his captors as John Augary. After he came home his sister Lydia wrote from Canada urging him to abjure the Protestant religion; but he remained true to the faith of his early instruction.

Their grandmother, the widow of Benjamin Crispe, made her will April 13, 1698, which was admitted to probate in Middlesex County on the 28th of the following December; and in it she remembered these absent children as follows:

"I give and bequeath unto my three Grand-Children y^e are in Captivity if they returne Vizdt these books one of y^e a bible another a Sermon booke treating of faith and the other a psalme booke."

The old lady herself, doubtless, had read the "Sermon booke treating of faith;" and it must have strengthened her belief in Divine wisdom, and been a

great consolation in her trials. She did not know at this time that her granddaughter was already a convert to the Roman Catholic religion. The knowledge of this fact would have been to her an affliction scarcely less than the massacre of her daughter's family.

John Longley returned about the time when the grandmother died; and subsequently he filled many important offices both in the church and the town. Like his father and grandfather, he was the town clerk during several years. Among the papers (Knox Manuscripts, Waldo Papers, L. 13) in the possession of the New England Historic Genealogical Society is a deposition made by Longley, giving a short account of his captivity among the Indians.

In the month of July, 1877, I was in Montreal, where I procured, through the kindness of the Mother Superior at the Congregation of Notre Dame, a copy of the French record of Lydia's baptism, of which the following is a translation:

"On Tuesday, April 24, 1696, the ceremony of baptism was performed on an English girl, named Lydia Longley, who was born April 14, 1674, at Groton, a few miles from Boston in New England. She was the daughter of William Longley and Deliverance Crisp, both Protestants. She was captured in the month of July, 1694, by the Abenaki Indians, and has lived for the past month in the house of the Sisters of the Congregation of Notre Dame. The godfather was M. Jacques Leber, merchant; the godmother was Madame Marie Madeleine Dupont, wife of M. de Maricourt, Ecuier. Captain of a company of Marines: she named this English girl Lydia Madeleine.

Signed "LYDIA MADRELINE LONGLEY,
" MADELINE DUPONT,
" LEBER, !
" M. CAILLE, acting curate."

After this attack of July 27th the town was left in straitened circumstances, and the inhabitants found it difficult to meet the demands made on them. In this emergency they petitioned the General Court for relief, which was duly granted.

Cotton Mather says that one man was killed at Groton in the year 1697, and another, with two children, carried into captivity. (Magnalia, Book VII. page 91.) He does not give the date clearly, but inferentially it is June. The prisoner was Stephen Holden, who was captured, with his two oldest sons, John and Stephen, Jr. John was released in January, 1699, at which time the father and the other boy were yet remaining in the hands of the savages. It was not long, however, before they too were freed; for, in the following June, the House of Representatives voted three pounds and twelve shillings for the expenses that had been incurred in bringing them back.

QUEEN ANNE'S WAR, as it is commonly called in America, broke out in the year 1702, when England declared war against France and Spain; and the American Colonies were drawn into the contest. The Indians in New England were in sympathy with the French; and they kept the frontier settlements continually on the alert. Strict vigilance, on the part of the colonists was the price of their safety. Military companies were still held under discipline and drill,

and from time to time were reviewed by the proper officers. In the year 1702, Chief Justice Samuel Sewall accompanied Governor Joseph Dudley through Middlesex County on a tour of inspection; and in his Diary, under date of October 28th, he writes:

"Went to Groton, saw Captain Prescott and his company in Arms. (Govt had sent to them from Dunstable that would visit them). Lancaster is about 12 Miles Southward from Groton. Concord is 16 Miles $\frac{3}{4}$ and Ten-Rod from Groton."

(Massachusetts Historical Collections, VI. fifth series, 67.)

After these alarms there was a short respite, which continued till 1704, when the frontier towns were again exposed to savage warfare, and this town suffered with the others.

Samuel Penhallow, in "The History of the Wars of New England" (Boston, 1726), thus refers to the attack on this place in August, 1704: The Indians—

"afterwards fell on Lancaster, and Groton, where they did some Spoil, but not what they expected, for that these Towns were seasonably strengthened. . . .

"And yet a little while after they fell on Groton, and Nashaway [Lancaster], where they kill'd Lieut. Wyler [Wilder], and several more. (Pages 24, 25.)

In the library of the Massachusetts Historical Society is a manuscript diary of John Marshall, of Braintree, which has the following entry:

The beginning of this month of august [1701] the Indians did mischief at Lancaster Killed 3 or 4 persons burnt their meeting house: and did some harm also at Groton. the same week. Killed one or more: about 200 men went out after them who wear gone 20 days under major Taylor, but Returned Without doing any spoil on them."

The attack on Lancaster was on July 31st, and that on Groton probably within a day or two of the same time.

It was during this assault that Matthias Farnsworth, Jr., was captured and taken to Canada, where he remained permanently. He was afterward married to a French wife, and his numerous posterity are still living in Canada. The name is found written now Farnet, Farnef and Phaneuf.

A party of Indians, numbering about thirty, made their appearance in town, and killed a man on the night of October 25, 1704. Pursuit was at once made for them, but it was unsuccessful. *The Boston News-Letter*, October 30, 1704, gives the following account of the affair:

"On Wednesday night [October 25] an English man was kill'd in the woods at Groton by the Indians which were afterwards descried in the night by the Light of their Fires, by a Person Travelling from Groton to Lancaster, and judged they might be about Thirty in number; pursuit was made after them, but none could be found."

From "Marshall's Diary" we learn the name of the man who was slain. It is there recorded:

"on the 25 day [October, 1704]. our Breck was ordained at Marlborough. the next day a man was killed and scalped by the Indians he belonged to the town of Groton his name was Davis: a very useful man and much Lamented."

It has been a tradition that John Davis was killed by the Indians, but the date of his death was unknown; this entry, however, seems to fix it. It is said to have happened in the early part of the even-

ing, while he was taking in some clothes which had been washed and hung out to dry. He lived near the Groton School, where W. Dickson resided when the map in Mr. Butler's History was made; and Davis's Fordway, in the river near by, named after him, is still remembered by the older people of that neighborhood.

It is not surprising that the inhabitants, upon the renewal of hostilities, were obliged to ask for help from the General Court. They had already suffered much in life and property, and were little able to bear new burdens. They represented to the Governor that they had been greatly impoverished by their loss of horses and cattle, of corn and hay, and that they were scarcely able to hold out much longer; but the crowning calamity of all was the illness of the minister, Mr. Hobart, which prevented him from preaching. Their means were so limited that they could not support him and supply his place besides. They were obliged to earn their living at the peril of their lives; and some were thinking to leave the town. They spent so much time in watching and guarding that they seemed to be soldiers rather than farmers. Under these discouraging circumstances they asked for help from the Province, and were allowed out of the public treasury twenty pounds to assist them in procuring another minister, besides ten pounds to be divided among those who had been the greatest sufferers in the late attack upon them.

Two years later another assault was made on the town, though with little damage. I again quote from Penhallow's History of the Wars of New England:

"[July 21, 1706]. Several Strokes were afterwards made on *Chelmsford, Sudbury* and *Groton*, where three Soldiers as they were going to publick Worship, were way-laid by a small Party, who kill'd two, and made the other a Prisoner." (Page 36.)

A few additional particulars of these "Strokes" are found in the Rev. John Pike's Journal, printed in the Proceedings of the Massachusetts Historical Society for September, 1875:

"July 21, 1706. Sab: 2 souldiers slain & one carried away by the enemy at Groton. They were all new-Cambridge [Newtoo] men & were returned to their Post from one Bloods house, who had invited y^m to Diner." (XIV. 143.)

Marshall, in his Diary, briefly alludes to this affair, thus:

"on the 21 [July] they Killed 2 and took one captive at groton.

The Rev. Jonathan Homer, in his History of Newton, as published in the Massachusetts Historical Collections, V. 273, gives the names of these men as John Myrick, Nathaniel Healy and Ebenezer Seger, and says they were all three killed by the Indians. This statement, however, is inaccurate, as John Myrick was not one of the three soldiers, and, furthermore, was alive after this date. It is sufficiently clear from contemporaneous petitions among the Massachusetts Archives (LXXI. 345,419), that two of these men were brothers, by the name of Seger, and the third one was Nathaniel Healey. It was

Ebenezer Seger who was killed, and, probably, Henry, Jr., who was taken prisoner.

At various times in its early history, the town was threatened by bands of roving Indians, who did whatever damage lay in their power to do. Such incursions kept the inhabitants on the alert, and from time to time companies were organized for the purpose of scouring the neighborhood.

On March 12, 1694-95, an Act was passed by the General Court, which prohibited the desertion of frontier towns by the inhabitants unless permission was first granted by the Governor and Council. There were eleven such towns, and Groton was one of them. The law required the inhabitants of these out-towns, who owned land or houses, to take out a special license, on pain of forfeiting their property, before they could quit their homes and live elsewhere. It was thought that the interest of the Crown would be prejudiced, and encouragement given to the enemy, if any of these posts were deserted, or exposed by lessening their strength. Many towns were threatened by the Indians about this time, and a few were attacked. It is recorded that some of the settlers here left the town, and there was probably a movement among the inhabitants in other places to do the same. This fact undoubtedly occasioned the enactment, which was to remain in force "unto the end of the session of the general assembly to convene in May, one thousand six hundred ninety-six (if the present war so long last), and no longer, nor afterwards."

A similar Act was again passed on March 22, 1699-1700, which embraced fourteen frontier towns, of which Groton was one, and seven other towns that "lye more open than many others to an attack of an enemy." This enactment had a limitation in point of time similar to the preceding one. Subsequently this Act was revived on June 8, 1702, with the limitation, though no towns are specified by name; again on June 28, 1706, it was re-enacted, to remain in force until June 29, 1707; and still later, but not for the last time, it was passed on June 10, 1707. This continuous legislation to prevent the desertion of the frontiers shows clearly the unsettled condition of the outlying towns during Queen Anne's War, and Groton was no exception. The inhabitants were now living in constant dread of the savages. Sometimes an exposed farm-house was attacked and burned, some of the inmates killed and others carried away in captivity; sometimes the farmer was shot down while at work in the field, or while going or coming. This was the fate of John Shattuck, and his eldest son John, a young man nineteen years of age, who were killed on May 8, 1709.

They were returning from the west side of the Nashua River, where Mr. Shattuck owned land, and were attacked just as they were crossing the Stony Fordway, near the present site of Hollingworth's paper-mills, where they were killed. At the time of his death Mr. Shattuck was one of the selectmen of the

town. During the autumn of 1882 Messrs. Tileston and Hollingworth, of Boston, at that time the owners of the mill, caused a suitable stone to be placed by the wayside, bearing the following inscription :

NEAR THIS SPOT
JOHN SHATTUCK,
A SELECTMAN OF GROTON,
AND
HIS SON JOHN
WERE KILLED BY THE INDIANS,
MAY 8, 1709,
WHILE CROSSING STONY FORDWAY,
JUST BELOW THE PRESENT DAM.
1882.

A remarkable fatality seems to have followed Mrs. Shattuck's kindred. Her husband and eldest son were killed by the Indians, as has just been mentioned. Her father, James Blood, was likewise killed, September 13, 1692. So also were her uncle, William Longley, his wife and five children, July 27, 1694; and three others of their children were carried away into captivity at the same time. A relative, James Parker, Jr., and his wife were killed in this assault, and their children taken prisoners. Her step-father, Enoch Lawrence, received a wound in an engagement with the Indians, probably in the same attack of July 27, 1694, which almost wholly prevented him from earning a livelihood for himself and family. The three Tarbell children, who were carried off to Canada by the Indians, June 20, 1707, were cousins of Mrs. Shattuck. John Ames, who was shot by the savages at the gate of his own garrison, July 9, 1724, was the father of Jacob, who married her niece, Ruth Shattuck. And lastly, her son-in-law, Isaac Lakin, the husband of her daughter Elizabeth, was wounded in Lovewell's Fight at Pequawket, May 8, 1725. These calamities covered a period of only one generation, extending from the year 1692 to 1725.

In a list of prisoners held by the French and Indians in Canada, March 5, 1710-11, are the names of "Zech: Tarbal, John Tarbal, Sarah Tarbal, Matt. Farnsworth [and] Lydia Longley" (Archives, LXXI. 765), all of Groton, though no date of capture is given. Lydia Longley was taken by the Indians on July 27, 1694, and the particulars of her case have already been told; Matthias Farnsworth was captured in the summer of 1704; and the Tarbell children were carried off on June 20, 1707. Sarah, John and Zechariah were children of Thomas and Elizabeth (Wood) Tarbell, who with a large family, lived on Farmers' Row, near where James Lawrence's house now stands. Sarah was a girl nearly fourteen years of age, John a lad of twelve years and Zechariah only seven, at the time when they were taken. They were near kindred of the Longley family, who had been massacred thirteen years before. The father was unquestionably the Corporal Tarbell who commanded, in the autumn of 1711, one of the eighteen garrisons in the town.

The story of their capture and captivity is a singular one, and sounds like a romance. They were picking cherries early one evening,—so tradition relates,—and were taken before they had time to get down from the tree. It should be borne in mind that the date of capture, according to the new style of reckoning, was July 1st, when cherries would be ripe enough to tempt the appetite of climbing youngsters. These children were carried to Canada, where, it would seem, they were treated kindly, as no inducement afterward was strong enough to make them return permanently to their old home. The girl, Sarah, was sold to the French, and placed in a convent at Lachine, near Montreal; but what became of her subsequently I am unable to say.

Thomas Tarbell, the father of these children, made his will September 26, 1715, which was admitted to probate six weeks later, and is now on file at the Middlesex Probate Office in East Cambridge. After making certain bequests to different members of his family, he says:

"all the rest and residue of my Real Estate I give to be Equally divided between my three children, John, Zachary, & Sarah Tarbell, upon their return from Captivity, or In Proportion unto any of them that shall return, & the rest, or the parts belonging to them that do not return, shall be Equally divided among the rest of my children."

During my visit at Montreal in the summer of 1877, I saw the Congregation of Notre Dame, the French record, of which the following is a translation:

"On Monday, July 23, 1708, the ceremony of baptism was performed on Sarah Tarbell, who was born at Groton in New England, October 9, 1693. Her parents were Thomas Tarbell and Elizabeth Wood, both Protestants, and she was baptized by the minister shortly after her birth. Having been taken by the savages on Monday, June 20, 1707, she was brought to Canada; she has since been sold, and has lived with the Sisters of the Congregation of Notre Dame, established at Lachine, where she abjured her religion on May 1. Her godfather was M. Jacques Urbain Robert de Lamorandière, Secretary of M. l'Intendant; and her godmother was Madame Marguerite Bouet, wife of M. Etienne Pascaud, the deputy treasurer of the King in this country.

Her name Sarah has been changed to Marguerite.

"Signed,

"MOU BOUAT,
"PASCAUD,
"LAMORANDIERRE,
"MARIEL, PRÊTRE."

The boys remained for many years with their captors at Caughnawaga, an Indian village on the right bank of the St. Lawrence River, directly opposite to Lachine.

It is supposed that they left this place about the year 1760, when they moved up the river, in order to establish another settlement.

In the year 1713 John Stoddard and John Williams were appointed by Governor Joseph Dudley to go to Quebec and treat with the Governor-General of Canada for the release of the New England prisoners. They were accompanied by Thomas Tarbell,—probably the elder brother of the boys,—and we find his petition presented to the House of Representatives June 1, 1715, "praying consideration and allowance for his Time and Expences in going to

Canada, with Major Stoddard & Mr. Williams, Anno 1713, to recover the Captives."

The petition was referred, and, on the next day,—

"Capt. Noyes, from the Committee for Petitions, made Report on the Petition of *Thomas Tarbell, viz.* That they are of Opinion that nothing is due from the Province to the said *Tarbell*, since he proceeded as a Volunteer in that Service to *Canada*, & not employed by the Government, but recommended him to the favour of the House."

The report was accepted, and, in consideration of *Tarbell's* services, he was allowed ten pounds out of the public treasury. Captain Stoddard's Journal, giving an account of the negotiations, is printed in "The New England Historical and Genealogical Register" (v. 26), for January, 1851, and *Tarbell's* name is mentioned in it.

We find no further trace of these boys, now grown up to manhood, during the twenty-five years following this attempt to release the New England prisoners. In the winter of 1739 John and Zechariah *Tarbell* came back to Groton in order to visit their kinsfolk and see their native town. They were so young when carried away that their recollections of the place were of course very indistinct. It is not known now under what circumstances or influences they returned. An itemized bill of the expense incurred in bringing them back from Canada was made out against their brothers, Thomas and Samuel, and perhaps paid by them. Shortly afterward Thomas *Tarbell* petitioned the General Court for means to enable him to meet the necessary charges of the journey, besides the expenses of an interpreter; and a conditional loan was granted. The record does not say whether it was ever paid back by him. The papers relating to the subject are among the Massachusetts Archives (XV. A, 15-19).

On April 20, 1739, Governor Belcher brought the case of these captives to the attention of the Council and the House of Representatives, when he made a speech, in which he said:

"There are lately come from Canada some Persons that were taken by the Indians from Groton above thirty Years ago, who (its believed) may be induced to return into this Province, on your giving them some proper Encouragement: If this Matter might be effected, I should think it would be not only an Act of Compassion in order to reclaim them from the Errors and Delusions of the Romish faith; but their living among us might, in Time to come, be of great Advantage to the Province."

On the same day the subject was referred to a Committee of the House, who reported a resolution which was sent to the Council for concurrence; and on several occasions within a short time the same question came up in different forms.

All these efforts, however, to reclaim the two men from savage life proved unavailing; for it is known that they remained with the Indians and became naturalized, if I may use the expression. They married Indian wives, and were afterward made chiefs at Caughnawaga and St. Regis, villages in Canada. Their descendants are still living among the Indians, and the *Tarbells* of the present day, in this town, are their collateral kindred. Nearly forty years after

their capture, Governor Hutchinson met them in New York State, and in his "History of the Province of Massachusetts Bay" refers to them thus:—

"I saw at Albany two or three men, in the year 1744, who came in with the Indians to trade, and who had been taken at Groton in this, that is called Queen Ann's war. One of them, — *Tarbell*, was said to be one of the wealthiest of the *Cagnawaga* tribe. He made a visit in his Indian dress, and with his Indian complexion (for by means of greuse and paints but little difference could be discerned) to his relations at Groton, but had no inclination to remain there." (II. 139.)

Some years after this time, these two young men—now occupying the position of chiefs—moved up the St. Lawrence River, accompanied by several others, all with their families, and established the village of St. Regis. This Indian settlement is pleasantly situated on the right bank of the St. Lawrence, the boundary line which separates the State of New York from Canada running through it. From its peculiar position, it was agreed, during the last war with England, that the Indians should remain neutral, but the compact was often broken. In the summer of 1852 the tribe numbered about eleven hundred persons, of whom it is said that not one was of pure Indian origin.

Many interesting facts concerning the *Tarbells* at St. Regis are found in the "History of St. Lawrence and Franklin Counties, New York" (Albany, 1853), by Dr. Franklin B. Hough. A part of the village comes within the limits of Franklin County; and the author has gathered up some of the stories still told about these two brothers in that neighborhood.

In former years the St. Regis Indians had certain rights in a land reservation in the State of New York; and more than once treaties were made between the Governor of the State and the chiefs of the tribe, among whom were descendants of these *Tarbell* boys. A treaty was signed on February 20, 1818, in behalf of the Indians, by Loran *Tarbell* and Thomas *Tarbell*, and two other chiefs. Another treaty was signed on September 23, 1825, by eleven chiefs and trustees of the tribe, including Peter *Tarbell*, Thomas *Tarbell*, Mitchel *Tarbell*, Louis *Tarbell*, and Battice *Tarbell*. Some of these names, I am sure, will sound familiar to the older inhabitants of Groton. It is very likely that Battice is the same as Sabattis, an Indian name, which is said to be a corruption of *Saint Baptiste*.

Dr. Hough writes about one of the earlier members of the family as follows:—

"A half-breed Indian, who usually was known as PETER THE BIG SPEAK, was a son of Lesor *Tarbell*, one of the lads who had been stolen away from Groton by the Indians, and who subsequently became one of the first settlers who preceded the founding of St. Regis.

"He was a man of much address and ability as a speaker, and was selected as the mouthpiece of the tribe on the more important occasions that presented themselves." (Page 182.)

The statement is wrong, however, that Lesor was the name of one of the captured boys. It is perfectly well known that their names were John and Zechariah, but it is not improbable that one of their sons was named Lesor. If such was the case, it was intended, doubtless, for Eleazer, the name of their youngest brother, who was less than two months old

when they were carried off. It certainly would be a touching tribute to their childish recollections if they had remembered this little babe at home and carried him in their thoughts for so many years.

In the summer of 1877 I visited St. Regis, where I met a grandson of one of the Tarbell captives. He was more than eighty years old, and could speak only Indian; and I had to talk with him through an interpreter. I learned that he was aware that his grandfather had been taken when a boy, from a town near Boston, and that he had kinsfolk atill living there. What interested me exceedingly was the physical resemblance between him and some of his collateral relations, who lived and died at Squaunacook within my recollection. He was a man of ordinary size, with a sunburnt face and gray hair, though somewhat bald. There was but little appearance of Indian blood in his veins, and he would have passed anywhere for a good-looking old man. He lived with one of his sons in a small house that was clapboarded and painted,—and one of the best in the village,—where, surrounded by his grandchildren, he was passing the declining years of his life in comfortable ease.

During the summer of 1723 "the Indian enemy"—as the early settlers were wont to call them—still threatened the western frontier towns. On August 16, 1723, according to the printed Journal of the House of Representatives, Lieutenant-Governor Dummer, at that time the acting Governor of the Province, was desired immediately to order detachments of men, varying from three to six, from the inhabitants of the several towns along the line of outer settlements, to be constantly employed in scouting and ranging the woods in their respective towns; and under this order Groton was to have six. On August 24th it was ordered by the House of Representatives that these scouts should be placed under the direction of the chief military officer of the several towns, and such officer should receive five shillings a week for his services. Owing to informalities in the matter, a dispute arose between the House and the Lieutenant-Governor, who within two days sent two messages to that body, and some slight modifications were made in the original draft.

Penhallow, in "The History of the Wars of New-England," speaking of the Indians at this period, says:

"The next damage they did was at Groton, but were so closely pursued, that they left several of their Packs behind." (Page 102.)

It was on Thursday, July 9, 1724, that John Ames was shot by an Indian, one of a small party that attacked his garrison in the northwesterly part of the town. Ames lived on the north side of the Nashua River, a short distance below the Hollingsworth paper-mills. He is said to be the last person killed by an Indian within the township. The Indian himself was immediately afterward shot by Jacob Ames, one of John's sons. *The Boston Gazette*, July 13, 1724, thus refers to the event:

"A man was kill'd last Week at Groton, by the Indians, and 't is suppos'd one Indian was kill'd by one of our Men in the Garrison; the Indians left their Packs, 5 in number, which were taken and secur'd by the English."

In the *Gazette* of July 27th it is said that "An Indian Scalp was brought to Town last Week from Groton."

The New England Courant, July 13, 1724, reports that "Last Week the Indians kill'd a Man at Groton, and had one of their own Men very much wounded." The same newspaper, in its issue of July 27th, says that "The Scalp of an Indian lately kill'd at Groton is brought to Town."

Jacob Ames' petition for an "Allowance" or bounty, for killing the savage, is found in the printed Journal of the House of Representatives, November 20, 1724.

In the summer of 1722 the Provincial governments of Massachusetts and New Hampshire offered a bounty of a hundred pounds for every Indian's scalp that should be taken and shown to the proper authorities. This legislation incited volunteers to scour the wilderness for the purpose of hunting the savages, and with this motive Captain John Lovewell, of Dunstable, organized a company which soon became famous.

The story of Lovewell's Fight was for a long time repeatedly told in this neighborhood, and there is scarcely a person who has not from early infancy heard the particulars of that eventful conflict. It was in the spring of 1725 that Captain Lovewell, with thirty-four men, fought a famous Indian chief, named Paugus, at the head of about eighty savages, near the shores of a pond in Pequawket, now within the limits of Fryeburg, Maine, and known as Lovewell's Pond. Of this little Spartan band, seven belonged in this town; and one of them, John Chamberlain by name, distinguished himself by killing the Indian leader.

The fullest account of the Fight is found in a pamphlet entitled, "*Lovewell Lamented, or, A SERMON occasion'd by the Fall of the Brave Capt. John Lovewell and Several of his Valiant COMPANY, in the late Heroic Action at Piggwacket Pronounc'd at Bradford, May 16, 1725 By Thomas Symmes, V.D.M.*" (Boston, 1725.) The sermon contains an historical preface, duly attested by three of the company, which gives many particulars of this ill-fated expedition. It includes a list of the men who took part in the fight, with the names of the killed and wounded. According to this list, the following Groton men were members of Lovewell's company and present during the action: John Jefts, Daniel Woods, Thomas Woods, John Chamberlain, Elias Barron, John Gilson [Isaac Lakin?], Joseph Gilson; of whom Thomas Woods, Daniel Woods and John Jefts were killed in the fight, and Elias Barron, John Chamberlain and John Gilson [Isaac Lakin?], wounded. It is stated by Mr. Symmes, in his preface, that Barron subsequently "strayed from the rest, and got over *Ossipy River*, by the side of which his Gun Case was found, & he has ner been

heard of since." (Page viii.) Joseph Gilson was the only one of this quota who escaped injury.

The first edition of the sermon was published on July 1st, and exhausted in a very few days. A second edition was issued about the middle of July, with a title-page somewhat changed from the original one, as follows: "*Historical Memoirs Of the Late Fight at Piggwacket, with a SERMON Occasion'd by the Fall of the Brave Capt John Lovewell And Several of his Valiant Company; in the late Heroic Action there. Pronounc'd at Bradford, May 16, 1725* By THOMAS SYMMES, V.D.M. **The Second Edition Corrected.**" (Boston, 1725.) In this edition the running title of "*An Historical PREFACE*" is changed to "*Memoirs of the Fight at Piggwacket.*" A few corrections are made; in the list both of the soldiers and of the wounded, the name of Isaac Lakin is given in the place of John Gilson's.

Captain Lovewell, the commander of the company, was a brave officer and a noted man. He was at this time in the prime of life, and ambitious to distinguish himself. He had previously led two successful expeditions against the Indians, and his very name inspired confidence. Only a few weeks before, his second expedition had returned to Dover, New Hampshire, where he made a triumphal entry at the head of his company. They bore ten Indian scalps stretched on hoops, and were received with great joy and excitement; thence they proceeded to Boston, where they were paid a large bounty by the government. The following Groton men were members of the company which went on this second expedition: Jacob Ames, Ephraim Farnsworth, Reuben Farnsworth, Benjamin Parker, Samuel Shattuck, Samuel Tarbell and Henry Willard. Throughout New England, Lovewell's daring was made the subject of talk, and the public looked to him as a natural leader in border warfare.

With the small force now at his command, the heroic captain pressed forward to meet the enemy, and in a few days reached the borders of Saco Pond, since known as Lovewell's Pond, southeast of the present village of Fryeburg, Maine. On the morning of Saturday, May 8th, while engaged at prayers they heard a gun, and shortly afterward discovered an Indian on a point of land which ran into the pond. They were distrustful of an ambush, and a consultation was held in order to see whether they should advance or retreat. Their decision was to proceed at all hazards. They said: "We came out to meet the Enemy; we have all along prayed GOD we might find 'em; and we had rather trust Providence with our Lives, yea Dy for our Country, than try to Return without seeing them, if we may, and be called Cowards for our Pains." After this answer, Lovewell ordered his men to move forward cautiously; and they soon reached a place where they halted and took off their packs, and piled them up together. Leaving

these behind without a guard, and advancing a short distance, they came upon the Indian whom they had previously descried. He was returning to his companions with some game that he had killed. Several guns were instantly discharged at him, when he in turn fired and wounded Captain Lovewell and another man; after which he was killed and scalped. The company then turned back, and with their wounded leader repaired to the place where they had left their packs. In the meanwhile Paugus, the far-famed chief of the Pequawkets, at the head of eighty warriors on their way home from a marauding expedition, had discovered the pile of packs, and, counting them, had learned the number of the English. Finding that the force was much less than his own, Paugus placed his men in ambush and awaited the return of Lovewell. When the company came up for their packs, the Indians with hideous yells rushed forth suddenly from their hiding-places and began to fire. The brave captain ordered his men to return it, which was done with terrible effect. Lovewell himself fell at the first shot, and eight of his men soon shared the same fate. Ensign Wyman, of Woburn, then assumed the command, and, perceiving that the Indians were trying to surround them, ordered a retreat to the pond, where he took his stand. A ledge of rocks projecting into the water on one side of him, and a deep brook on the other, made a position favorable for defence. The fighting continued, and during the day the savages vainly endeavored to compel the valiant band to surrender; but they would not listen to the proposition. Paugus was slain in the action by John Chamberlain, of Groton. After the death of their chief the Indians became somewhat disheartened, and for a time withdrew from the skirmish. Later in the day the combat was resumed, when, it is supposed, the enemy received reinforcements, but with no decisive result. As night approached they again withdrew, and left this little forlorn band masters of the field.

About midnight the survivors, with the exception of three men mortally wounded and unable to travel, fell back and directed their course to the fort, where they expected to find their former companions; but in this hope they were sadly disappointed. It seems that, at the beginning of the fight, a member of the company, escaping, made his way to the fort, and reported that Lovewell and his men were all cut to pieces, which he may have believed. Disappointed at finding the fort abandoned, the survivors of this memorable command made their way back to the settlements as best they could, coming in at different places along the frontier line.

The name of Lovewell at once became famous, and the story of the expedition was told in every household, and even in the pulpit. It was made the subject of ballads, which were sung at family firesides, and excited the popular heart with the memory of the brave and adventurous leader. Peace soon followed

the action at Pequawket, and deep and sincere was the public feeling at its restoration.

John Chamberlain, the surviving hero of Lovewell's Fight, was the son of Thomas and Elizabeth Chamberlain, of Chelmsford, where he was born March 29, 1692. The father was a carpenter and miller, who afterwards removed to Groton, and lived about a quarter of a mile northerly of Wattle's Pond, on the left-hand side of the road to Hollis. He is supposed to have died about the year 1709. After the fight the son was known as "Paugus John," and bore that name through life. He owned a mill, situated near Brown Loaf, on a small stream formed by the confluence of Martin's Pond Brook and another, now called Paugus Brook.

His death took place about the year 1756, though no record of it is found. The appraisal of his estate was made on March 31, 1756, according to papers on file in the Middlesex Probate Office at East Cambridge.

If ever young Paugus came to Groton in order to avenge his father's death, and it seems probable from tradition that he did, it was undoubtedly at this place. Furthermore, there is a deep hole in Paugus Brook, known since the last century as Paugus Hole, wherein it is said that Chamberlain sunk the body of the Indian, after he had killed him. A small elm stands on the south bank of the brook, very near the place.

Many other tales about the Indians have come down by tradition, and some of them are probably true. The following story, told me by the late Charles Woolley, refers to Isaac Lakin, one of Lovewell's men:

Lakin lived in a log-house near the Nashua River, in the north part of the town. The house had no glass windows, but had shutters instead, and a door that swung on wooden hinges. One day an Indian was seen lurking about the house, and hiding behind the stumps, apparently bent on mischief. Lakin seized his gun, and, standing at a crack in the shutters, told his wife to swing the door so that it would creak on its hinges. Hearing the noise, and seeing the door open, the Indian sprang from behind a stump, and started for the house, when Lakin fired and shot him dead. Seeing no sign of other Indians, after dark he dug a hole and buried him.

In the year 1744 war was again declared between England and France, called by the English colonists King George's War. Civilization had now pushed the belt of frontier towns far into the wilderness; and Groton was no longer exposed to the assaults of the Indians, though at times threatened with danger. Her sons and soldiers, however, were still found during this period, on the outer rim of settlements, whenever and wherever their services were needed, either to extend the borders or to defend them. A military organization was kept up in the town, ready for emergencies here or elsewhere in the neighborhood.

The first settlement of Charlestown, N. H.—then known as No. 4,—was made in the year 1740, by three brothers, Samuel, David, and Stephen Farnsworth, natives of Groton; and they were soon followed by Isaac Parker and his sons, and Obadiah Sawtell, also of this town. The Farnsworths were leading men at Charlestown, and they distinguished themselves on several occasions in fights with the Indians. Samuel Farnsworth, the eldest brother, was killed in a skirmish, May 2, 1746. David was taken prisoner by a party of French Indians, April 20, 1757, and carried to Canada. He managed to escape, and reached home not a long time probably after his capture. Stephen, the youngest brother, had also his bitter experience with the enemy. He was captured April 19, 1746, and taken to Montreal, where he remained seventeen long months before he was exchanged. His health was so broken down by the hardships of his captivity that he never fully regained it. He died September 6, 1771, leaving behind the reputation of a brave man and a good citizen.

Ebenezer Farnsworth, a native of Groton and a kinsman of the three brothers just mentioned, was captured August 30, 1754, by the St. Francis Indians, at Charlestown. He was carried to Montreal and held a prisoner during three years. His ransom was paid in the summer of 1755, but he was not then set at liberty. Mrs. Susanna Johnson and her sister, Miriam Willard, were taken at the same time. They were both daughters of Moses Willard, who had formerly lived in the south part of this town. A full account of the affair is given in "A Narrative of the Captivity of Mrs. Johnson," published at Walpole, New Hampshire, in 1796. Two years later, on June 18, 1756, Moses Willard, the father, was killed by the Indians, at Charlestown; and in the same attack his son, Moses, Jr., had a narrow escape from death by the hands of the savages, being severely wounded at the time.

Lieutenant Isaac Parker was taken by the Indians at the same time with Stephen Farnsworth, and remained in captivity until the following winter, when he was returned to Boston under a flag of truce.

The Sawtell family is also largely represented in Charlestown, where the name is now spelled Sartwell. It is a numerous family in that town, and they sprang from the early settler, Obadiah, who went from Groton. He, too, had a sad experience in savage warfare, and once was captured by the Indians. He was taken by them on May 24, 1746, and remained a prisoner until August 20, 1747. He finally met his death at their hands on June 17, 1749, being attacked while ploughing in his corn-field, unsuspecting of any danger.

Charles Holden, Isaac Holden and Seth Walker, natives of Groton, were early settlers and proprietors of Charlestown. Moses Wheeler was another pioneer and a distinguished soldier, taking part in some of

the fiercest encounters of the French and Indian War. He was a large man and noted for his strength. He was called by the Indians "the strong man." Moses Willard, Isaac Farwell and Micha Fuller, other settlers, were also from this town. Eleazer Priest, son of Joseph Priest, of Groton, and a soldier, was captured by the Indians, on March 15, 1748, at Charlestown, and died at Louisburg, Nova Scotia, in September of that year, while on his way home.

The earliest minister of Groton was the Reverend John Miller, who graduated at Gonvil and Caius College, Cambridge, England, in the year 1627, and came to this country in 1637. For a short time he lived in Roxbury, where he was one of the elders in Eliot's church. From the year 1639 to 1641, and perhaps later, he was settled in the ministry at Rowley as assistant to the Reverend Ezekiel Rogers; and during this period he filled the office of town clerk. He was made a freeman of Massachusetts on May 22, 1639. In the autumn of 1641 he was waited on by messengers from Woburn, who desired his services for their church; but they found "Mr. Roggers loth to part with him."

Johnson, in his "Wonder-Working Providence of Sion's Saviour, in New England," refers to him both in prose and verse. The following is a specimen of the poetry:—

*"With courage bold Miller through Seas doth venter,
To Toyl it out in the great Western coast,
Thy stature low one object high doth center;
Higher than Heaven thy faith on Christ is plac't:"*

—Chap. XI., p. 131.

From Rowley Mr. Miller removed to Yarmouth, where he was settled as a preacher, though the date of his removal to that town is not recorded. Nor is it known exactly when he came to Groton, but probably at some time during 1662, as in that year the town voted to build a house for the minister. On March 18, 1663, a vote was passed asking him "to continue still with vs for our further edificat[ion]," which shows that he was preaching at that date; but in three short months his labors ceased and he went to take his reward. In the first return of deaths, made by the town clerk of Groton to the recorder of the county, it says:—

"Mr. Jn^o. Miller, minister of Gods holy word died. June 12th 1663."

The second minister of Groton was the Reverend Samuel Willard, a son of Major Simon and Mary (Sharpe) Willard, and born at Concord, on January 31, 1639-40. He graduated at Harvard College in the class of 1659, and was the only member who took his second degree. He began to preach at Groton probably late in the year 1662, or early in 1663. In the latter year, on the 21st of June, it was voted "that Mr. Willard if he accept of it shall be their minester as long as he liues w^o Mr. Willard accepts Except a manifest providenc of God appears to take him off."

Mr. Willard was a scholar and writer of consider-

able note in his day, and even now would be considered such. But little is known of his early history; and no church-record during his ministry at Groton is extant. Coming here in the vigor of young manhood, at the age of twenty-three,—if we may judge him from the high position he afterward attained,—it is fair to assume that he exerted a strong influence in this neighborhood. It is probable that his early experiences on the outer rim of civilization fitted him for the places of honor and dignity that he was subsequently called upon to fill. A few weeks after his settlement he married Abigail, a daughter of John Sherman, minister of Watertown; and, after her death, he married, as his second wife, Eunice, daughter of Edward Tyng. He had a large family of children, of whom five were born in this town. One of his great-grandsons, Robert Treat Paine, was a signer of the Declaration of Independence.

In the year 1673, Mr. Willard published a volume of sermons entitled, "Useful Instructions for a professing People in Times of great Security and Degeneracy: delivered in several Sermons on Solemn Occasions."

It consists of three sermons, of which one was preached on the occasion of a case of witchcraft which occurred in Groton. It is evident, from a reference in the sermon, that the fame or notoriety of the case had spread far from this town. Mr. Willard says: "There is a voice in it to the whole Land, but in a more especial manner to poor Groton; it is not a Judgement afar off, but it is near us, yea among us."

The book is inscribed, "To his Beloved Friends the Inhabitants of Groton." Like all the publications of that time, it is purely theological, and contains nothing now of particular interest. If he had given us even a few lines of town history, it would be almost invaluable. We look in vain through its pages for any thing that throws light on the manners and customs of the early settlers. We do find, however, the modes and habits of thought that were prevalent in those days; and with these we must be content, for the sermons furnish nothing more.

After the town was burned by the Indians in the spring of 1676 and the settlement deserted, Mr. Willard became the pastor of the Old South Church in Boston, where he died on September 12, 1707.

The third minister was the Reverend Gershom Hobart, a son of the Reverend Peter Hobart, of Hingham, and a graduate of Harvard College in the class of 1667. In the early spring of 1678, just two years after the attack on the town, the old settlers returned to their former houses; and Mr. Hobart accompanied them, or soon followed. He was not ordained, however, until November 26, 1679; and soon afterward troubles between the people and the preacher began to spring up. There was the usual controversy about the site of the new meeting-house, which is not peculiar to this town or to that period, but is common to-day here and elsewhere; and there was a dispute over

the minister's salary. Mr. Hobart's pastorate was anything but happy and harmonious, and he appears to have left Groton about 1690. The records of this period are very meagre, but contain brief allusions to his absence. During the next two years there was no settled minister of the town, though the inhabitants were not without stated preaching. The Reverend John Hancock filled the pulpit for several months and received a call to become the minister, which was declined. He was the grandfather of John Hancock, Governor of the Commonwealth and signer of the Declaration of Independence.

The fourth minister was the Reverend Samuel Carter, who came on an invitation given by the town, on October 21, 1692. It is evident, from the scanty records, that he accepted the call and remained with his people until the time of his death, which took place in the autumn of 1693. According to papers on file in the Middlesex Probate Office at East Cambridge, administration on his estate was granted on October 30th of that year. Mr. Carter was the eldest son of Thomas Carter, first minister of Woburn, and born on August 8, 1640. He graduated at Harvard College in the class of 1660, and, before coming to Groton, had been preaching at Lancaster for a considerable length of time. He was followed in time by Gershom Hobart, who became the fifth minister as well as the third, in the order of settlement. Mr. Hobart came back to his former parish in the autumn of 1693, but it is not now known how the reconciliation was brought about between him and the town, as the church records of that period are lost; perhaps it was through an ecclesiastical council. He continued to preach here until about the end of the year 1704, when he gave up his charge. His dwelling stood on the site of the present Baptist meeting-house, and, at one time during the Indian wars, was used as a garrison-house. On July 27, 1694, it was captured by the savages, when one of Mr. Hobart's children was killed, and another, Gershom, Jr., a lad eight or ten years old, was carried off a prisoner and held in captivity during nearly a year. Mr. Hobart, the father, died at Groton on December 19, 1705.

During the year 1705 the pulpit appears to have been filled by John Odly, as the records have it, and probably the same as John Odlin, a native of Boston and a graduate of Harvard College in the class of 1702. On July 3, 1705, he received a call to be the "town's minister and the church's officer," which was not accepted.

The fifth minister was the Reverend Dudley Bradstreet, a son of Dudley Bradstreet, of Andover, and a grandson of Governor Simon Bradstreet. He was born at Andover on April 27, 1678, and a graduate of Harvard College in the class of 1698. He was the first master of the grammar school in his native town, where he was teaching as early as the year 1704, and perhaps earlier.

It is highly probable that he was connected with this school when he received his invitation to come to Groton. On May 4, 1704, he was married to Mary Wainwright, and they had three sons, and perhaps other children. Mr. Bradstreet was preaching here as early as March, 1706, but was not ordained until November 27th of that year. Under a vote of May 8, 1706, a house "of 38 foot long and 18 foot wide" was built for the minister, which is still standing, and in a state of good preservation. It is situated on the east side of Hollis Street, and the present measurements conform very nearly to the dimensions given in the records.

In the summer of 1712 Mr. Bradstreet was dismissed from his charge in this town, presumably for his Episcopal tendencies; and soon afterward he went to England to apply for orders in the Anglican Church. It appears from a copy of the original document in Latin, made in a manuscript volume, (page 90), by President John Leverett now deposited among the archives of Harvard University in the College Library, that he was ordained a deacon by the Bishop of London, on April 18, 1714, and a priest one week later, on April 25th. He died of small-pox during the next month, only two or three weeks after receiving priestly orders; and tidings of his death reached this country in the following summer.

The sixth minister was the Reverend Caleb Trowbridge, a son of Deacon James Trowbridge, of Newton. He was born on November 17, 1692, and graduated at Harvard College in the class of 1710. On March 10, 1715, he was married, first, to Sarah Oliver, of Newton; and on September 18, 1718, to Hannah Walter, of Roxbury. Mr. Trowbridge was blessed with a family of nine children, and until recently some of his descendants were living at Groton. He died on September 9, 1760, and lies buried in the old burying-ground, where the inscription on a slab of slate laid over his grave makes a just statement of his religious and social character.

The seventh minister was the Reverend Samuel Dana, son of William Dana, and born in that part of Cambridge which is now Brighton, on January 14, 1738-39. He was a graduate of Harvard College in the class of 1755, and ordained in the ministry at Groton on June 3, 1761. No articles of faith or church covenant appear on the church records until the period of his settlement. On May 6, 1762, he was married to Anna Kenrick, of Newton; and they had five children born at Groton. His pastorate appears to have been harmonious until the political troubles of the Revolution began to crop out, when a sermon preached by him in the early spring of 1775 gave great offence to his parish. Mr. Dana's sympathies were with the Crown, while those of the people were equally strong on the other side; and the excitement over the matter ran so high that he was compelled to give up his charge. After his dismissal from the town and church he remained at Groton

during some years, preaching for a year and a half to a Presbyterian society, then recently organized; and later he removed to Amherst, New Hampshire, where he died on April 2, 1798.

The eighth minister was the Reverend Daniel Chaplin, a son of Jonathan Chaplin, of Rowley, where he was born on December 30, 1743. He graduated at Harvard College in the class of 1772, and studied theology under the tuition of the Reverend Samuel Haven, of Portsmouth, New Hampshire. He was ordained at Groton on January 1, 1778, when he became pastor of the First Parish, and he continued to hold this relation until the time of his death, on April 8, 1831, being the last minister settled by the town. The degree of D.D. was conferred upon him by his *Alma Mater* in the year 1817. On June 24, 1779, he was married to Susanna, eldest daughter of the Honorable James and Susanna (Lawrence) Prescott, of Groton. After their marriage they lived for awhile in the house built by Colonel William Lawrence, who was Mrs. Chaplin's grandfather. It was situated on the north corner of Main and Court Streets, latterly the site of Liberty Hall, which was burned on March 31, 1878; and subsequently they removed to the dwelling built by Major William Swan, and situated on School Street, north of the burying-ground.

Dr. Chaplin's youngest daughter, Mrs. Sarah (Chaplin) Rockwood, died in Cortland, Cortland County, New York, on November 26, 1889, at the remarkable age of 104 years and eighteen days.

The ninth minister was the Reverend Charles Robinson, the eldest son of Caleb Robinson, of Exeter, New Hampshire, where he was born on July 25, 1793. He graduated at Harvard College in the class of 1818, and was ordained over the Unitarian Church at Eastport, Maine, where he remained two years and a half. Mr. Robinson was installed at Groton on November 1, 1826, and resigned his charge in October, 1838. He was afterward settled at Medfield and at Peterborough, New Hampshire, but in the year 1860 he returned to Groton, where he resided until his death, on April 9, 1862. During his residence here he was married, on July 3, 1827, to Jane, only daughter of the Honorable Stuart John Park, of Groton, who died on March 23, 1828; and subsequently to three other wives.

The tenth minister was the Rev. George Wadsworth Wells, son of Seth and Hannah (Doane) Wells, of Boston, where he was born on October 17, 1804. He graduated at Harvard College in the class of 1823, and then pursued his theological studies at the Harvard Divinity School. For a while he preached in Boston and Baltimore, and, on October 24, 1827, was ordained at Kennebunk, Maine, as colleague pastor of the first Congregational Church in that town, where he remained during eleven years. On November 21, 1838, Mr. Wells was installed over the First Parish in Groton, where he preached with great ac-

ceptance and success until his death, which took place on March 17, 1843. The last time that he officiated in the pulpit was on Sunday, February 5th of that year. He was married on May 30, 1833, to Lucia Gardner, daughter of John Fairfield, of Boston. Just before graduation at college, his middle name was inserted by an Act of the Legislature, on June 14, 1823.

The eleventh minister was the Reverend Joseph Couch Smith, a native of Waltham, where he was born on July 18, 1819. He graduated at Bowdoin College in the class of 1838, and subsequently passed two years at the Andover Theological Seminary. On October 11, 1842, he was ordained in Portland as an Evangelist. After Mr. Wells's death he came to Groton, and was installed on July 12, 1843. Here he remained during eight years, working diligently and faithfully in the cause of his Master, to which he had devoted his life. Finally the loss of his health compelled him to ask a dismissal, and his relations to the society ceased in August, 1851. After passing six or eight months in foreign travel, and returning home much invigorated, he was called to the Channing Congregational Church, at Newton. Here he preached for four years, when his physical infirmities again compelled him to seek retirement from his cares and labors; and he sailed for the Sandwich Islands in the hope that he would still be able to act as an agent of the American Unitarian Association, but in this he was disappointed. After a rapid decline he died at Honolulu, of consumption, on December, 29, 1857.

Mr. Smith was twice married,—first, on August 31, 1843, to Augusta Hepibah, daughter of Ivory and Louisa (McCulloch) Lord, of Kennebunk, Maine; and secondly, on December 8, 1846, to Margaret Ann, daughter of George and Margaret (Shattuck) Brigham, of Groton. His first wife died at Groton, on June 20, 1844, and his widow in Lowell, on March 31, 1864.

The twelfth minister was the Rev. Crawford Nightingale, a son of Samuel and Elizabeth Kinnicut, (Thompson) Nightingale, and born in Providence, R. I., on November 3, 1816. He graduated at Brown University in the class of 1834, and at the Harvard Divinity School in 1838, and was ordained as an Evangelist, in Providence, on November 7, 1838. He was married, on May 13, 1846, to Mary Hoyt, daughter of William Henry and Frances Wiswall (Humphrey) Williams, of Athol. Mr. Nightingale was settled over the parish on January 26, 1853, and received his dismissal on September 1, 1866, though he continued to be a resident of the town until the year 1875. Before coming here he held a pastorate at Chicopee, and had previously acted as a missionary in Toledo, O., and in Chicago. He has now retired from the laborious duties of his profession, though he preaches occasionally, and is living at Dorchester.

The thirteenth minister was the Rev. George McKean Folsom, a son of Charles and Susanna Sarah (McKean) Folsom, and born in Cambridge on February 6, 1837. He graduated at Harvard College in the class of 1857, and at the Harvard Divinity School in 1866. He was ordained at Groton on December 12, 1866, and married, on January 8, 1867, to Susan Cabot, daughter of Charles, Jr., and Susan (Cabot) Jackson, of Boston. In April, 1869, he left Groton and removed to Dedham, where he was installed over another parish. He died in Boston on May 20, 1882, and his wife at Dedham on June 27, 1871. An only child, a daughter, born at Groton on November 16, 1867, survives the parents.

The fourteenth minister was the Rev. John Martin Luther Babcock, a son of James Babcock, of Andover, Me., where he was born on September 29, 1822. His father's family removed to Boston in the year 1825, where he remained until 1846. In early life he studied for the Baptist ministry, and joined the clerical profession in 1852, though he was not ordained until January, 1854. He held pastorates at different towns in Maine, New Hampshire and Vermont, but later he changed his denominational relations and entered the Unitarian pulpit, being settled at Lancaster, N. H., before coming to this town. He was installed over the First Parish on April 26, 1871, though he had been preaching here since December 1, 1870, and received his dismissal on August 31, 1874, though he continued to fill the pulpit until April 1, 1875. Since leaving Groton he has given up the profession. On November 30, 1843, he was married (first) to Martha Day Ayer, of Plaistow, N. H., who died on January 26, 1846; and, secondly, on April 5, 1849, to Miriam Clement Tewksbury, of Wilmot, who died at New Hampton, N. H., on September 22, 1888.

The fifteenth minister was the Rev. Joshua Young, a son of Aaron and Mary (Coburn) Young, and born at Pittston, Me., on September 29, 1823. He graduated at Bowdoin College in the class of 1845, and at the Harvard Divinity School in 1848. He was married, on February 14, 1849, to Mary Elizabeth, daughter of Dr. Sylvanus and Mary Bell (Warland) Plympton, of Cambridge. Mr. Young was settled in Groton at the beginning of 1875, and still continues to be the minister of the parish. Before coming to this town he had held pastorates in Burlington, Vt., and in Hingham and Fall River. On commencement, June 26, 1890, he received the honorary degree of Doctor of Divinity from his *Alma Mater*.

The formation of a second church in Groton dates back to the summer of 1825, when the venerable Dr. Chaplin, enfeebled by age, became so infirm that he required the help of an assistant. At that time he was well past eighty years, and the powers of a vigorous manhood were beginning to fail him. On Sunday afternoon, July 10, 1825, a very hot day, Dr. Chaplin, near the end of his sermon, fainted in his pulpit; and soon after the question of settling a col-

league pastor came up. This matter gave rise to much controversy and discussion, and resulted in a division of the old parish into two societies.

It happened during a period when throughout the Commonwealth many of the Congregational Churches were undergoing great changes in their creed, and were forming new lines of theological belief. Few persons of the present day are aware of the bitter animosity that prevailed in New England at that time, when these churches were torn asunder by internal dissensions, and of the sectarian feeling that followed the division of the parishes. At the beginning of the troubles the Reverend John Todd, a graduate of the Andover Theological Seminary in the class of 1825, had received a call to become a colleague pastor with Rev. Dr. Chaplin, but which, owing to certain informalities, was never recognized by the town, and over his settlement the main controversy had arisen. The second society, made up of those who had now separated from the First Parish, was duly organized and a house of worship built, which was dedicated to the service of God on January 3, 1827, and at the same time Mr. Todd was ordained in the ministry. He remained as pastor of this society, which became known as the Union Congregational Church, until January 8, 1833, when he was dismissed at his own request.

The Reverend John Todd was the eldest child of Dr. Timothy and Phebe (Bud) Todd, and born in Rutland, Vt., on October 9, 1800. He graduated at Yale College in the class of 1822, and then entered the Theological Seminary at Andover. On March 11, 1827, he was married to Mary Skinner, daughter of the Reverend Joab Brace, of Newington, Conn., who died at Pittsfield on April 29, 1889. After leaving Groton, Dr. Todd held pastorates at Northampton, Philadelphia and Pittsfield, where he died on August 24, 1873, after an illness of three months. In the year 1845 the degree of Doctor of Divinity was conferred upon him by Williams College. He was the author of more than thirty volumes, besides many sermons and pamphlets, including among them "The Student's Manual," a work which has exerted a wide influence on the young men of the country.

The second minister of the Union Church was the Reverend Charles Baker Kittredge, a son of Josiah and Mary (Baker) Kittredge, and born at Mount Vernon, N. H., on July 4, 1806. He graduated at Dartmouth College in the class of 1828, and at the Andover Theological Seminary in 1832. He was ordained at Groton on October 15, 1833, but the time of his ministry here was short, as he was dismissed on August 31, 1835. After leaving this town he was settled over various parishes in different places, and died at Westborough on November 25, 1884. Mr. Kittredge was married, on July 9, 1830, to Sarah, daughter of Charles and Susanna (Bayliss) Brigham, of Grafton, who died on March 26, 1871.

The third minister was the Reverend Dudley

Phelps, a native of Hebron, Conn., where he was born on January 25, 1798, and a graduate of Yale College in the class of 1823, and of the Andover Theological Seminary in 1827. He was ordained at Haverhill on January 9, 1828, where he remained until the year 1833, and during 1834 and 1835 was the editor of the *Salem Landmark*. Mr. Phelps was installed at Groton on October 19, 1836, where he continued as pastor of the church until his death, which took place on September 24, 1849. He was the father of the late Hon. Benjamin Kinsman Phelps, district attorney of New York, an only child by the first wife, who was Ann Kinsman, of Portland, Me. The second wife was Lucretia, daughter of the Hon. Benjamin Mark and Lucretia (Gardner) Farley, of Hollis, N. H., and of Groton, to whom he was married on October 12, 1837.

The fourth minister was the Reverend Edwin Adolphus Bulkley, a son of Eraatus and Mary (Walbridge) Bulkley, and born in Charleston, S. C., on January 25, 1826. He graduated at Yale College in the class of 1844, and at the Union Theological Seminary in 1848, and was married, on September 28, 1848, at Huntington, Long Island, N. Y., to Catharine Fredrica, daughter of Daniel and Catharine Fredrica (Kunze) Oakley. Mr. Bulkley was installed over the society on September 18, 1850, and dismissed on January 10, 1864. Before coming to Groton he was settled at Geneva, N. Y., and on leaving this town he went to Plattsburg. At the present time he has charge of a Presbyterian Church at Rutherford, N. J. He has been blessed with eight children, of whom three survive, and five of the eight were born at Groton. In the year 1868 the degree of D.D. was conferred upon him by the University of Vermont.

The fifth minister was the Reverend William Wheeler Parker, a son of Ebenezer and Hannah Brooks (Merriam) Parker, and born at Princeton on March 2, 1824. He graduated at the Andover Theological Seminary in 1858, and on August 24th, of that year, he was married at Holden to Emily, daughter of Joel and Diodamia Walker. Mr. Parker was installed at Groton on May 16, 1865, and dismissed at his own request on August 25, 1868. Since leaving this town he has lived in several places, but is now residing at Harwich Port.

The sixth minister was the Reverend Jeremiah Knight Aldrich, a son of Nehemiah Knight and Sarah Bowen (Branch) Aldrich, and born in Providence, R. I., on May 20, 1826. He became a licentiate after an examination before the Windham County (Connecticut) Association of Congregational Ministers, on June 4, 1862, and was ordained at Central Village, Plainfield, in that State, on February 17, 1863. He was settled at Groton on June 1, 1870, and dismissed at his own request on May 18, 1873. Mr. Aldrich was married, on June 3, 1848, in Providence, R. I., to Sarah Hamer, of Taunton.

The seventh minister was the Reverend Benjamin

Adams Robie, a son of Thomas Sargent and Clarissa (Adams) Robie, and born at Gorham, Maine, on September 9, 1836. He graduated at the Bangor Theological Seminary in the class of 1865, and was married on July 6, 1869, at Vassalborough, to Lucy Hedge Wiggin, of that town. He was settled as pastor-elect on April 1, 1874, and resigned on April 1, 1884.

The eighth minister was the Reverend George Austin Pelton, a son of Asa Carter and Ophelia (Austin) Pelton, and born at Stockbridge, on April 15, 1833. He graduated at Yale College in the class of 1861, and at Andover Theological Seminary in 1864. He was licensed to preach by the Essex South Association in February, 1864, and ordained "to the work of the Gospel ministry" without installation, at Franklin, on August 9, 1865. Mr. Pelton was married in New Haven, Conn., on April 27, 1864, to Catharine Sarah, daughter of Seth Warner and Catherine Post Brownson. He was settled as pastor-elect on May 15, 1884, and resigned on May 15, 1886.

The ninth minister was the Reverend John Barstow, a son of Ezekiel Hale and Eunice (Clark) Barstow, and born at Newton Centre on February 16, 1857. He graduated at Dartmouth College in the class of 1883, and at the Andover Theological Seminary in 1887. He began his labors at Groton on April 1, 1887, and was ordained and installed on June 29th, of the same year. Mr. Barstow was married at Wethersfield, on July 5, 1887, to Mary Weller Wolcott, of that town. He was dismissed at his own request on September 12, 1889, and is now settled over a society at Glastonbury, Conn. At one time his father was the principal of Lawrence Academy.

The tenth minister is the Reverend Edward Leeds Gulick, the present pastor. He is a son of the Reverend Luther Halsey and Louisa (Lewis) Gulick, and born in Honolulu, Hawaiian Islands, on March 21, 1862. He graduated at Dartmouth College in the class of 1883, and at the Union Theological Seminary, New York, in 1887. He began his labors on October 27, 1889, and was ordained on December 23d of the same year.

A Baptist Society was organized on December 5, 1832, and the Rev. Amasa Sanderson was the first minister. Captain Josiah Clark, one of the members, generously gave them the use of a commodious hall in the third story of a house at the south corner of Main Street and Broad Meadow Road. In the year 1841 the society erected a meeting-house on the spot where the Rev. Mr. Hobart's dwelling stood, which was a garrison-house in the summer of 1694.

Mr. Sanderson was a native of Gardner, Mass., where he was born on April 16, 1796. He was married, first, at Weston, in 1822, to Abigail Rand, who died on January 3, 1867; and, secondly, at Nashua, New Hampshire, in July, 1867, to Mrs. Mary Rebecca (Batchelder) Woodbury, widow of Seth Woodbury. Mr. Sanderson supplied the pulpit until May, 1843,

when from feeble health he resigned his charge. He died in Nashua, New Hampshire, on June 1, 1877, and buried at Ayer.

The Rev. Alfred Pinney, of Auburn, New York, was the second minister, and had charge of the society from August, 1843, to August, 1844. He is a son of Joshua Lasselle and Mary (Lake) Pinney, and born at Middlefield, Otsego County, New York, on October 15, 1812. In early life he studied the profession of medicine, which he practised for a while, but soon afterward gave up in order to enter the ministry. He began a course of study in the academic department of Madison University at Hamilton, New York, with a view to graduate from the college and the Theological Seminary, but owing to trouble with his eyes he was compelled to abandon the plan. On June 8, 1841, Mr. Pinney was married in Troy, New York, to Olivia Marcia Brownell; and he is now living at No. 95 Madison Street, Brooklyn.

The Rev. Lewis Holmes, a native of Plymouth, was the third minister. Born on April 12, 1813, he graduated at Waterville College (now Colby University) in the class of 1840. He was settled at Groton in May, 1845, and remained until May, 1849. Mr. Holmes was settled over various societies in Massachusetts, and died at Plymouth on May 24, 1887.

The Rev. John Allen was the fourth minister, and his pastorate extended from June, 1849, to September, 1853. He was born at Mansfield on March 27, 1792, and died at East Providence Centre, Rhode Island, on November 28, 1882. He was married, first, in the year 1816, at Easton, to Sally Bonney; and secondly, on April 22, 1856, in Boston, to Mrs. Anna (Carpenter) Carpenter, daughter of Caleb Carpenter, and a native of Rehoboth. His father's name was Joseph Allen.

The Rev. George Everett Tucker was the fifth minister, and his service began in November, 1853, and lasted until June, 1857. Born at Canton on February 29, 1820, he fitted for college at Pierce Academy, of Middleborough and graduated at Brown University in the class of 1842. He has held pastorates at various places in Rhode Island and Maine, and died at Dedham on October 24, 1888, while on a visit, though his home was at Brunswick, Maine.

The Rev. Lucius Edwin Smith was the sixth minister, and served the society from December, 1857 to September, 1865. Mr. Smith is a native of Williamstown, where he was born on January 29, 1822, and a graduate of Williams College in the class of 1843. He first studied law in his native town and was admitted to the bar in the year 1845; afterward studied divinity and graduated at the Newton Theological Seminary in 1857. His editorial services have been extensive, and he is now associate editor of the *Watchman* (Boston). The degree of D.D. was conferred upon him by his *Alma Mater* in 1869.

The Rev. Oliver Ayer was the seventh minister, and had charge of the society from April, 1866, till March 29, 1874. He is a son of Daniel and Nancy (Day)

Ayer, and was born at Plaistow, New Hampshire, on August 2, 1810. He graduated at Brown University in the class of 1834, in the same class with the Rev. Crawford Nightingale, of Groton, and immediately after graduation became the principal of Rockingham Academy at Hampton Falls, New Hampshire. In the year 1837 he was ordained at Littleton, Massachusetts, where he was the pastor of the Baptist Church until 1843, and then, after a settlement at Dover, Claremont and Deerfield, all in the State of New Hampshire, he came to Groton in the spring of 1866.

After leaving his town he was settled for six years over a society at North Oxford, since which time he has been living in Providence, with no pastoral charge. Mr. Ayer was married, first, on November 5, 1835, to Caroline Perais, daughter of William and Elizabeth (How) Garland, of Portsmouth, who died on September 23, 1857; and, secondly, on September 16, 1862, to Susan French Sargent, of Lebanon, New Hampshire.

The Reverend Benjamin Franklin Lawrence was the eighth minister, and settled over the society from July, 1874, to August, 1880. He graduated at Colby University in the class of 1858, and studied at the Newton Theological Institution during the years 1859 and 1860. He has had charge of various parishes in New England, and is now at East Jefferson, Maine.

The Reverend Herman Franklin Titus served the church from December, 1880, to February, 1881, without settlement. He is a son of Moses and Sophronia (Patch) Titus, former residents of the town.

The Reverend Thomas Herbert Goodwin was the ninth minister, and settled over the society from October, 1881, to January, 1884. He is a son of Benjamin and Lucy Adams (Mixer) Goodwin, and born in Manchester, New Hampshire, on July 4, 1847. He was married, on March 23, 1871, at New London, New Hampshire, to Arvilla Olive Pattee, and is now living at North Hanover.

The Reverend Frank Curtis Whitney was the tenth minister, and settled over the church from August 1, 1884, to October 1, 1889. When he left the society he went to Minnesota.

The Reverend Samuel Bastin Nobbs, the present pastor, is the eleventh minister, and took charge of the congregation on December 1, 1889. He is a son of James and Eliza (Haynes) Nobbs, and born at Charlton Kings, Gloucestershire, England, on July 1, 1862. After a short residence in Australia he joined his parents in their removal from England to New York in September, 1881. Receiving his preparatory education at Gloucester, England, he entered the Theological Seminary at Hamilton, New York, in the year 1885, where he graduated in 1888. His first pastorate was at Newport, Vermont. Mr. Nobbs was married, on July 1, 1886, to Loue Maud Richardson, of Hamilton, New York.

During the year 1885 a house of worship was built

at West Groton, which was dedicated on October 7, according to the ritual of the Methodist Church. The Congregational, Baptist, and Episcopal Societies of the town were well represented on the occasion, and everybody seemed to feel that the new building was a benediction to the village. In the "Life of John Todd" (page 181), written by his son, there is an early allusion to a chapel built during the winter of 1827, as follows: "My friends are preparing me a pretty chapel over at this spot [West Groton], and as soon as it is finished I am to open a battery there." All recollection of this building among the inhabitants of the village has now passed away.

During the first three years after the present church was built, services therein were conducted under the auspices of the Methodist denomination, but since that period the society has made arrangements with the Congregational minister at Groton to supply the pulpit, and he preaches on each Sunday afternoon.

Services of the Episcopal Church were begun in connection with the Groton School at its opening in October, 1884. The parish is called St. John's Chapel of Groton School, and the sittings in the church are free. The services are conducted by the head master, Reverend Endicott Peabody. The present chapel was built in the year 1887, and consecrated on January 8, 1888, by the Bishop of the Diocese.

LAWRENCE ACADEMY.—During the early part of the year 1792 a voluntary association was formed at Groton, by certain people of the town and neighborhood, in order to establish an academy where a higher education could be obtained than was given at the district schools of that period. A subscription paper was circulated for the purpose of procuring funds to erect a suitable building. A subscription of five pounds currency was the smallest sum received from any person, and was denominated a share; ten pounds was called two shares; and so on. On April 27, 1792, the association organized by choosing trustees and the other customary officers; and from this as a beginning sprang the institution known formerly as Groton Academy, but now as Lawrence Academy. When it was first opened, in the spring of 1793, the exercises were held in the district school-house, on Farmers' Row. By a resolve of the Legislature, on Feb. 27, 1797, a grant of land was given to the academy, which consisted of half a township situated in Washington County, District of Maine. It comes now in Hodgdon, Aroostook County, and lies on the eastern frontier of the State, just south of Houlton.

Among the early friends and benefactors of the institution may be mentioned,—Benjamin Bancroft, Timothy Bigelow, James Brazer, Aaron Brown, Francis Champney, Daniel Chaplin, Samuel Dana, Nathan Davis, Zechariah Fitch, Samuel Hemenway, Samuel Lawrence, Joshua Longley, Joseph Moors, William and Oliver Prescott, Samuel Rockwood, William Swan and Sam-on Woods.

During the summer of 1841 the Academy building

was remodeled for the first time and somewhat enlarged by an addition to the rear, at a cost of \$2000, generously given for the purpose by Amos Lawrence, Esq., of Boston. The grounds also were improved, and a fence, consisting of stone posts and chains, placed in front of the yard, as well as on the south side, separating it from the Brazer estate.

In the spring of 1844 William Lawrence, Esq., of Boston, an elder brother of Amos, gave the sum of \$10,000 to be added to the permanent funds of the institution. In consequence of this liberal gift and other manifestations of their interest in the school, on the part of the two brothers, the trustees voted the annual meeting, on August 20, 1845, to petition the General Court to change the corporate name of the school to "The Lawrence Academy of Groton." At the next session of the Legislature the petition was duly presented and granted on February 28, 1846.

The benefactions of the Lawrence brothers did not cease with the change of name in the school. During the month of July, 1846, Amos Lawrence, Esq., bought the Brazer estate (so called), adjoining the Academy lot on the south, and formerly belonging to James Brazer, Esq., for the sum of \$4400, and soon afterward conveyed it by deed to the trustees of Lawrence Academy. He also requested that all the buildings and fences on the place should be put in complete repair at his expense, which was accordingly done at a cost of more than \$1200. During the next month William Lawrence, Esq., wrote to the trustees, offering to give \$5000 to be used for the enlargement of the Academy building, for the erection of a substantial stone and iron fence in front of the grounds, including the Dana and Brazer estates, and for the purchase of another bell for the school. The Dana estate, adjoining the Academy lot on the north, had formerly belonged to the Hon. Samuel Dana, and was bought by the trustees in the summer of 1836. With this sum, thus generously placed in their hands, the trustees, during the ensuing autumn, enlarged the Academy by an extension on its north side, and very soon afterward carried out his wishes in the other matters. At Mr. Lawrence's death, which occurred on October 14, 1848, he bequeathed the sum of \$20,000 to the institution.

Unfortunately, the main building of the Academy was burned to the ground on July 4, 1868, and a structure of brick and stone erected on the same site, which was dedicated June 29, 1871.

A celebration in connection with the history of Lawrence Academy took place on July 12, 1854, when an address was delivered by the Rev. James Means, a former principal of the institution. It was a distinguished gathering, and known at that time as the "Jubilee." A full account of the proceedings was afterward published, with a general catalogue of the school from its beginning. Another re-union was held on June 21, 1883, when a dinner was given in

GROTON SCHOOL,
GROTON, MASSACHUSETTS.

the Town Hall to the old pupils. The assemblage was not so large as the previous one, but quite as enthusiastic. The wish was generally expressed that the centennial anniversary of the school, which comes in the year 1893, should be duly celebrated. The proceedings on this occasion also were printed in a pamphlet form.

During the early days of New England there was no distinct class of men following the profession of medicine, but the practice was taken up in connection with some other calling. In every community either the minister or the schoolmaster or some skilled nurse was expected to act in cases of need, and, for the most part, such persons performed the duties now undertaken by the faculty. In the early part of 1672 the Rev. Samuel Willard wrote a long account of a case of witchcraft which befell Elizabeth Knapp, of Groton, and he relates how the "Physitian" came to see her on November 5, 1671, when he gave his judgment on the case, or, in other words, made the diagnosis. It would be an interesting fact to know who was the doctor then practicing in the neighborhood, but this is now beyond the reach of historical inquiry.

The earliest physician in Groton, mentioned by name, of whom I have found any trace, is Dr. Henry Blasdell, who was impressed into the public service by Colonel Edmund Goffe. On May 28, 1725, he petitioned the General Court that an allowance be made him for his professional services and for medicines furnished during the campaign of the previous autumn, while he was surgeon to the western forces. The amount of his bill was £26 14s. and the General Court allowed him £17 9s.

Dr. Ezekiel Chase, of Groton, was married at Newbury, on May 20, 1729, to Priscilla Merrill, of that town. She was a daughter of Nathan and Hannah (Kent) Merrill, and born at Newbury, on October 16, 1703.

Dr. Benjamin Morse was a son of Dr. Benjamin and Abigail (Dudley) Morse, and born at Sutton on March 20, 1740. He was married, on November 27, 1760, to Mary, daughter of Isaac and Sarah Barnard, also born at Sutton, on September 13, 1741; and while living in that town they had a family of six children.

Dr. Morse came to Groton probably during the Revolutionary period, and was a Representative to the General Court in the session of 1784, and several succeeding ones; and he was also a delegate to the Convention for adopting the Constitution of the United States, in the year 1788, where he opposed the adoption. He lived in the south part of the town, near the present village of Ayer; and the site of his house is laid down on the map of Groton, published in 1832. He died on May 31, 1833, aged ninety-three years, and his widow, on December 16, 1835, aged ninety-four years.

Dr. Ephraim Ware, a physician of Groton, was

married at Cambridge, on October 13, 1785, to Mrs. Abigail Gamage. He was a native of Needham, and born on January 14, 1725. His first wife was Martha, daughter of Josiah and Elizabeth Parker, of Groton, where they were married on July 26, 1764. She was born on January 7, 1737, and died at Groton on April 4, 1776. After their marriage they went to Dedham to live, as the records of that town say: "The Selectmen on the 2d Day of Augt., 1765, gave Orders to Israel Everett, Conatable, to warn Ephraim Ware, Martha Ware [and three others] to depart this Town in 14 Days, or give Security to indemnify the Town." Such orders were in accordance with an old practice, then common throughout the Province, which aimed to prevent the permanent settlement of families in towns where they might become a public burden. Their two eldest children, both boys, were born at Dedham; and three other children—a daughter, Sarah, and two sons, who both died in infancy—were born at Groton. Sarah, born on September 18, 1769, was married to Richard Sawtell, of Groton, on March 10, 1796, and died on March 23, 1851, having been the mother of nine children.

Dr. Ephraim Woolson was practicing medicine at Groton in the year 1766. He was a son of Isaac and Sibyl Woolson, and born at Weston on April 11, 1740. He graduated at Harvard College in the class of 1760, and was married to Mary Richardson on July 29, 1765. Dr. Woolson appears to have been living at Weston just before his residence at Groton, and in the year 1767 he bought land at Princeton, where six of his children were born. He was a justice of the peace, and is said to have died in the year 1802.

Dr. Jonathan Gove was a son of John and Tabitha (Livermore) Gove, and born in that part of Weston which is now Lincoln, on August 22, 1746. He graduated at Harvard College in the class of 1768, and studied medicine under the instruction of Dr. Oliver Prescott, of Groton. About the year 1770 he was married to Mary, daughter of Nathan and Mary (Patterson) Hubbard, of this town, and here John and Lucinda, their two eldest children, were born and baptized. This son graduated at Dartmouth College in the class of 1793, studied law and died at Chillicothe, Ohio, in the year 1802. From Groton Dr. Gove removed to New Boston, New Hampshire, where three more children were born. His wife was born at Groton on January 9, 1748, and died at New Boston. He was married, secondly, on January 6, 1791, to Polly Dow, who became the mother of three children. Dr. Gove subsequently removed to Goffstown, New Hampshire, and died there on March 24, 1818.

Dr. Samuel Farnsworth was the youngest child of Isaac and Anna (Green) Farnsworth, and born at Groton on September 29, 1767. He was married, on November 25, 1788, to Betsey, daughter of Captain Zachariah and Lydia (Tuck) Fitch, and they had a family of eight children, of whom two sons, Samuel, and Benjamin Franklin, were graduates of Dartmouth

College in the class of 1813. Dr. Farnsworth subsequently removed to Bridgeton, Maine, where he had a successful career as a physician. His eldest child, Betsey, was born at Groton on July 2, 1789, and the next one, Samuel, at Bridgton on October 9, 1791; and the removal from this town took place in the year 1790. He died on November 4, 1817.

These several physicians practiced their profession in the neighborhood of Groton, though they had never taken medical degrees. Before the present century this was a common custom throughout the country; and the instances were very exceptional where practitioners could rightfully append M.D. to their names. As a class they were men of shrewd sense and acute observers, and their practice was attended with success. Perhaps they made a better use of their opportunities than we make to-day with our richly endowed medical schools and numerous hospitals.

During the last century Dr. Oliver Prescott was an eminent physician of Groton, and he took high professional rank throughout the Province. He was the youngest of three distinguished brothers, of whom the eldest was Judge James Prescott, who filled many important positions in civil life as well as in military circles; and the second was Colonel William Prescott, who commanded the American forces at the Battle of Bunker Hill. Both Dr. Oliver Prescott and his son, Dr. Oliver Prescott, Jr., occupied exceptional place among the physicians of Middlesex County.

Dr. Oliver Prescott was a son of the Honorable Benjamin and Abigail (Oliver) Prescott, and born at Groton on April 27, 1731. He graduated at Harvard College with the highest honors in 1750, and then studied medicine under the tuition of Dr. Ebenezer Robie, of Sudbury. On October 19, 1756, he was married to Lydia, daughter of David and Abigail (Jennison) Baldwin, of Sudbury, and they had eight children. His high standing in the profession gave him a place as a charter member of the Massachusetts Medical Society in 1781, and at the commencement of 1791 Harvard College conferred upon him the honorary degree of M.D. He was also the president of the Middlesex Medical Society during the whole period of its existence. Apart from his professional laurels he likewise enjoyed many civil and military honors.

Dr. Prescott was town clerk during thirteen years, and selectman during thirty-two years. Before the Revolution he held the offices of major, lieutenant-colonel, colonel and general, respectively, in the militia. Subsequently, in the year 1778, he was appointed third major-general of the militia, and in 1781 second major-general, but soon afterward, on account of ill health, he resigned the position. He was a justice throughout the Commonwealth, a member of the Board of War, a member of the Council of Massachusetts, until he declined the office, and, in the year 1779, was appointed Judge of Probate, and continued as such until his death. He took an active

part in suppressing Shays's Rebellion, which had many supporters in this neighborhood. Dr. Prescott was one of the original trustees of Groton Academy, and the first president of the board; and he was also a member of the American Academy of Arts and Sciences. He died on November 17, 1804, aged seventy-three years, and his wife on September 27, 1798, aged sixty-two years.

Dr. Oliver Prescott, Jr., was the eldest son of Dr. Oliver Prescott, and born at Groton on April 4, 1762. He pursued his preparatory studies under Master Moody at Dummer Academy, and graduated at Harvard College in the class of 1783. He studied medicine under the direction of his father and Dr. James Lloyd, of Boston, and established himself in practice in his native town. With every social advantage in his favor he at once took high rank as a physician, and soon enjoyed a wide reputation. On Feb. 22, 1791, he was married to Nancy, daughter of Captain Leonard and Ann (Hall) Whiting, of Hollis, N. H., and they had nine children. His wife died on Sept. 13, 1821, aged fifty-eight years; and he was married, secondly, on Nov. 6, 1823, to Mrs. Elizabeth (Atkins) Oliver, who was born on Dec. 30, 1762, and died on May 21, 1835. Dr. Prescott was the town clerk and chairman of the selectmen from the year 1804 to 1811, and represented the town in the General Court during the sessions of 1809 and 1810. He was a trustee of Groton Academy from the time of its incorporation until 1811, when he removed to Newburyport, where he died on September 26, 1827.

Dr. Joseph Mansfield was a son of Richard and Elizabeth (Whittemore) Mansfield, and born in Lynn on December 17, 1770. He graduated at Harvard College in the class of 1801, and among his classmates were Tyler Bigelow, Thomas Bond, James Abbot Cummings, Timothy Fuller, Luther Lawrence, Stephen Minot and William Bant Sullivan, either natives or at some time residents of Groton. Both while an undergraduate, and while studying his profession, he kept the district school on Farmer's Row, and even after he had acquired his profession he taught the same school with the understanding that his hours of instruction should conform somewhat to the needs of his practice. While in college he took high rank as a scholar, and, at an exhibition near the end of his junior year, he delivered a poem which attracted some attention in literary circles, and subsequently was printed. He studied medicine with Dr. Oliver Prescott, Jr., and, on June 11, 1805, was married to Abi, daughter of Benjamin and Meriel (Nichols) Hartwell. About the year 1810 he built the large dwelling, with brick ends, near the Baptist meeting-house, where he resided until his death, which took place on April 23, 1830.

His son, Dr. George Mansfield, born at Groton on October 8, 1807, studied medicine and graduated at the Harvard Medical School in the class of 1832. He was married, on November 15, 1832, to Hannah Maria

Curtis, of Boston, and died at Janesville, Wisconsin, on July 25, 1869.

Dr. Amos Bancroft was a son of Edward and Rachel (Howard—Barron) Bancroft, of Pepperell, where he was born on May 23, 1767. He graduated at Harvard College in the class of 1791, and from the same institution took the degree of Bachelor of Medicine in the year 1794. He began the practice of his profession at Westford, but soon afterwards removed to Weston, where he remained until the year 1811. He was married—first, on August 29, 1796, to Abigail, daughter of Captain Leonard and Ann (Hall) Whiting, of Hollis, New Hampshire, who was born on March 25, 1772, and died at Weston, on December 4, 1799; secondly, on October 7, 1800, to Sarah, daughter of Henry and Faith (Savage) Bass, of Boston, who was born on April 21, 1768, and died on April 30, 1837; thirdly, on October 17, 1839, to Eliza Doane, of Boston, who died on November 11, 1840; and fourthly, on October 31, 1841, to Mary, daughter of Richard and Martha (Hall) Kneeland, of Westford, who was born on February 25, 1789, and died on April 22, 1862.

Dr. Bancroft had a large practice and, at various times, a considerable number of medical students under his tuition, including among them the brothers James Freeman Dana and Samuel Luther Dana, who were grandsons of the Reverend Samuel Dana, a former minister of the town, and graduates of Harvard College in the class of 1813. He was frequently called in consultation by other physicians, and often at a long distance from home. In those days there were no railroads, and traveling was attended with many difficulties. During the winter, when the roads were blocked up with snow, he was obliged, sometimes, to travel on snow-shoes; and, as his patients lived many miles apart, he was often absent from home for several successive days. To add to his discomfort on such occasions it was difficult to obtain proper food, though there were at that period but few dwellings where he could not obtain some New England rum or other spirit to help restore exhausted nature. In the year 1811 his *Alma Mater* conferred upon him the honorary degree of M.D.

On July 12, 1848, while walking down State Street, in Boston, he stepped from the sidewalk, in order to cross the way, when a wagon, coming along rapidly, knocked him down, and injured him so severely that he died in the course of a few hours.

Dr. Mansfield and Dr. Bancroft were the last physicians of the town, who, while visiting patients, used to ride on horseback with saddle-bags, although they also drove much in sulkies. In early days, owing to bad roads, physicians on their professional rounds were in the habit of riding, and it was near the beginning of the present century, in this neighborhood, that the sulky, or covered gig, came into fashion among them. At the present time the four-wheeled buggy solely is used by physicians.

Dr. Joshua Green was a son of Joshua and Mary (Mosley) Green, and born at Wendell, on October 8, 1797. He attended school at the academies in New Salem, Westfield and Milton, and graduated at Harvard College in the class of 1818. He studied medicine in the office of Dr. John Collins Warren, of Boston, and took the degree of M.D. at the Harvard Medical School in the year 1821. Soon after taking this degree he was appointed apothecary at the Massachusetts General Hospital, then just opened for the reception of patients, where he remained for one year. At that time the apothecary, in addition to his own duties, performed those of the house-physician and the house-surgeon. In March, 1823, Dr. Green began to practice his profession at Sunderland, and on January 5, 1824, was married to Eliza, daughter of Major Samuel and Susanna (Parker) Lawrence, of Groton. His wife was born on March 13, 1796, and died on August 20, 1874. During a winter of his college course he taught a district school at Groton, now known as the Moors School, and boarded in the family of Major Lawrence, who lived on Farmers' Row.

In the spring of 1825 Dr. Green removed to Groton, where he continued the practice of medicine, but after about ten years, owing to ill health, he gradually gave up his profession. In the year 1832 a pulmonary hemorrhage compelled him to pass a winter in the island of Cuba, where to a fair degree he regained his health. He joined the Massachusetts Medical Society in 1826, and for many years was one of its councillors. He represented the town in the Legislature during the years 1836 and 1837, and was one of the trustees of Lawrence Academy from 1831 to 1867, and during most of this time either the secretary or the president of the board. On the seventy-fourth anniversary of his birth (October 8, 1871) he had a paralytic stroke, from the effects of which he never fully recovered. After the death of his wife he went to live with his only daughter, Mrs. Elizabeth Lawrence (Green—Kendall) Swan, at Morristown, New Jersey, where he died on June 5, 1875.

Dr. Micah Eldredge was a son of Hezekiah and Abigail (Whiton) Eldredge, and born at Ashford, Connecticut, on May 24, 1776. He studied medicine with an elder brother, Dr. Hezekiah Eldredge, and in 1798 began the practice of his profession at Dunstable, where he resided for many years, living first on one side of the State line and then on the other. On October 1, 1797, Dr. Eldredge was married to Sally, daughter of Tilly and Abigail (Hale) Buttrick, of Princeton. In 1826 he removed to Groton, where he remained for two years, when he established himself at Dunstable, New Hampshire, (now Nashua). The honorary degree of M.D. was conferred upon him by Dartmouth College in 1841. He died at Milford, New Hampshire, on July 2, 1849, and was buried in the Hollis Street Cemetery at Nashua.

Dr. Jacob Williams was a son of Jacob and Han-

nah (Sheple) Williams, and born at Groton on July 16, 1789. About the year 1816 he was practicing medicine at the Gilmanton Iron Works, New Hampshire, and in June, 1822, he was married to Irene Locke, of Epaom. In the year 1828 he returned to his native town and established himself as a physician; and while here his wife died on March 11, 1831. During the next year he was married, secondly, to Retsey Wakefield, of Kennebunk, Maine. He remained at Groton until the year 1835, when he removed to Kensington, New Hampshire, where he died on July 7, 1857.

Dr. James Wilson was a son of the Honorable Abiel and Abigail (Putnam) Wilson, and born at Wilton, N. H., December 4, 1796, on the farm where his great-grandfather, Jacob Putnam, began a settlement in the year 1739. He studied medicine under the tuition of Dr. John Wallace, of Milford, New Hampshire, and graduated at the Dartmouth Medical School in the class of 1821. He was practicing his profession at Boston in the early part of 1825, as his name appears in the directory of that year, and he removed to Groton near the beginning of 1828. He was married, in February of that year, to Elizabeth P. Wilson, of Boston, a daughter of the city crier; and he came here under the patronage of Dr. Amos Bancroft, who desired some respite from a large practice, and acted as his sponsor in the community. After living at Groton during two years he returned to Boston and passed a brief period, and then removed to New York, where he remained for a short time. Soon afterward he went to Cuba, where he spent the remainder of his days, and died in Matanzas on November 23, 1868.

Dr. George Stearns was the youngest child of Ephraim and Molly (Gilman) Stearns, and born at Walpole, New Hampshire, on May 10, 1802. He graduated at the Harvard Medical School in the class of 1827, and began the practice of his profession in Boston, where he remained about three years, when he settled at Groton. He was married, on July 2, 1868, to Mrs. Ann (Moulton) Gilson, widow of Joshua Gilson, of Groton. Dr. Stearns was the last survivor of thirteen children, and died on March 7, 1882, at which time he was the oldest physician in the town.

Dr. Amos Farnsworth was a son of Major Amos and Elizabeth (Rockwood) Farnsworth, and born at Groton on August 30, 1788. He studied his profession with Dr. Calvin Thomas, of Tyngsborough, and with Dr. John Collins Warren, of Boston, but before his graduation he was commissioned as surgeon's mate in the Fourth Massachusetts Infantry Regiment, on April 14, 1812, just before war was declared by the United States with Great Britain; and two months later, on June 15th, his regiment left South Boston for Burlington, Vermont, for service on the frontier. He remained with the Fourth Infantry during thirteen months, when he resigned his commission on May 14, 1813. During the following summer he graduated at

the Harvard Medical School, and began the practice of his profession in Boston, where he remained until the year 1832, when he removed to his native town. On March 21, 1823, Dr. Farnsworth was married to Mrs. Mary (Bourne) Webber, widow of Captain Seth Webber, of Boston. He died in Roxbury on July 31, 1861, and his wife in Boston, on October 27, 1828, aged thirty-seven years.

Dr. Amos Bigelow Bancroft was a son of Dr. Amos and Sarah (Bass) Bancroft, and born at Groton on April 3, 1811. He graduated at Harvard College in the class of 1831, and at the Harvard Medical School in 1834. He began the practice of his profession at Groton in connection with his father; and on June 11, 1840, was married to Marietta, daughter of Nathan and India (Emerson) Shepley, of Pepperell. Dr. Bancroft remained in town until the spring of 1853, when he removed to Charlestown, where for more than ten years he was physician to the State Prison. Under the administration of Gen. Grant he was appointed superintendent and surgeon in charge of the Marine Hospital at Chelsea, which position he held from August 1, 1869, to June 30, 1877, when he took up his residence in Boston. While traveling abroad with his family he died in Florence, Italy, on November 8, 1879, much lamented by a wide circle of friends and patients at home,—leaving a widow and two daughters to mourn his loss.

Dr. Abel Hervey Wilder was a native of Winchendon, where he was born on June 16, 1801. He was a son of Levi and Grace (Wilder) Divoll; but by an Act of the Legislature on February 7, 1812, his name was changed from Hervey Divoll to Abel Hervey Wilder, keeping the surname of his mother. He graduated at the Dartmouth Medical School in the class of 1828, and began to practice his profession at Temple, New Hampshire. On February 29, 1828, he was married at New Ipswich, New Hampshire, to Mary, daughter of Ephraim and Elizabeth (Bent) Brown, a native of Lincoln.

Dr. Wilder subsequently removed to Pepperell, and in the year 1836 came to Groton, where he had the management of an institution for the treatment of nervous diseases. He continued to live here until the death of his wife, which took place on February 12, 1843, when he removed to Pittsfield. After leaving Groton he was married for the second time; and after a residence in different parts of the country, he died at Bloomfield, New Jersey, on January 2, 1864.

Dr. James Merrill Cummings was a son of Jacob Abbot and Elizabeth (Merrill) Cummings, and born in Boston on July 27, 1810. He graduated at Bowdoin College in the class of 1830, and at the Bowdoin Medical School in 1834. On November 4, 1835, he was married to Sarah Thurston Phillips, daughter of Joel and Sarah Phillips (Thurston) Hall, of Portland, Maine. In the spring of 1842 Dr. Cummings came to Groton and bought out the establishment of Dr. Wilder, which he conducted for four years; and in

the spring of 1846 he removed to Salem, where he remained for four years, when he settled in Portland, where he died on July 20, 1883. His widow died on January 29, 1890, at the advanced age of eighty-five years.

Dr. Rufus Shackford, a son of Captain Samuel and Hannah (Currier) Shackford, was born at Chester, New Hampshire, on December 17, 1816; studied medicine under the tuition of Dr. Cummings, and graduated at the Harvard Medical School in the class of 1845. He practiced for a brief period at Groton in the office of his preceptor, after which he lived in Lowell for a short time, when he removed to Portland, Maine, where he is now in practice.

Dr. Norman Smith was a son of Jesse and Nabby (Kittredge) Smith, and born at Mount Vernon, New Hampshire, on October 13, 1811. He graduated at the Vermont Medical College, Woodstock, in the class of 1843, and began to practice medicine at Groton, where he passed his whole professional life, with the exception of four years spent in Nashua, New Hampshire. In April, 1861, at the outbreak of the Rebellion, he went out as surgeon of the Sixth Massachusetts Militia Regiment, and was with that famous organization on its march through Baltimore and during its first campaign of three months. He was a member of the Union Congregational Church, and prominent in all matters connected with the welfare of the town. His death took place at his farm on Common Street, on May 24, 1888, and the funeral, on May 28th, was conducted under Masonic rites.

Dr. Smith was married, first, on May 3, 1838, to Harriet, daughter of John and Lydia Sleeper, of Frankestown, New Hampshire, who died on September 2, 1839; secondly, on November 6, 1843, to Mariett Sleeper, a sister of his first wife, who died on July 6, 1846; thirdly, on September 22, 1847, to Abigail Maria, daughter of Ephraim and Sarah (King) Brown, of Wilton, New Hampshire, who died on July 17, 1852; fourthly, on September 12, 1853, to Sarah Young, daughter of Solomon and Dorcas (Hopkins) Frost, who died on December 4, 1856, and, fifthly and lastly, on September 11, 1866, to Mrs. Mary Jane (King) Lee, daughter of Daniel and Rebecca (Parmenter) King, of Rutland, Massachusetts.

Dr. Lemuel Fuller was a son of Dr. Lemuel and Mary (Shepherd) Fuller, and born at Marlborough, on April 2, 1811. He graduated at the Vermont Medical College, Woodstock, in the class of 1844, and came to Groton from Harvard in the year 1847. On June 6, 1844, he was married to Catherine Palliseur, daughter of Francis and Maria Foster (Palliseur) Barrett, of Concord. Dr. Fuller left Groton in 1850, and died at Harvard during a temporary visit from home February 11, 1864. During the last ten years of his life he lived at North Weymouth.

Dr. Miles Spaulding was a son of Captain Isaac and Lucy (Emery) Spaulding, and born at Townsend, on April 4, 1819. He graduated at the Berkshire

Medical Institution, Pittsfield, in the class of 1842, and he soon afterward established himself at Dunstable, where he remained until the year 1851, when he removed to Groton. Dr. Spaulding was married, first, on January 12, 1848, to Sophia Louisa, daughter of Aaron and Lucinda (Munson) Miller, of New Haven, Connecticut, who died on September 4, 1852; and, secondly, on August 27, 1863, to Mary Mehetable, only child of Stephen and Mary (Kilborn—French) Stickney. He still lives at Groton, the senior physician of the town.

Dr. Peter Pineo is a son of Peter and Sarah (Steadman) Pineo, and was born at Cornwallis, Nova Scotia, on March 6, 1825. He graduated at the Bowdoin Medical School in the class of 1847, and was married in Boston, on May 8, 1850, to Elizabeth, daughter of Kendall and Betsey (Hill) Crosby. In the spring of 1853 he came to Groton, where he remained for two years, after which time he removed to Quechee, a village in the town of Hartford, Vermont. On June 11, 1861, he was commissioned as surgeon of the Ninth Regiment Massachusetts Volunteers, and soon afterward was promoted to a brigade surgeoncy, which office was abolished on July 2, 1862, by an Act of Congress, when officers of that rank became surgeons of United States Volunteers. On February 9, 1863, he was made medical inspector United States Army, with the rank of lieutenant-colonel, and he served with distinction until the end of the war. At the present time he is a resident of Boston.

Dr. Kendall Davis was a son of Joseph and Hannah Davis, and born at New Ipswich, New Hampshire, on December 4, 1802. According to the State Register of the years 1847–50, he was then living at Groton, where he practiced for a short time. From this town he went to Athol, and died at Templeton on September 20, 1875.

Dr. Richard Upton Piper is a son of Samuel and Mary (Folsom) Piper, and was born at Stratham, New Hampshire. He graduated at the Dartmouth Medical School in the class of 1840, and began the practice of his profession at Portland, Maine, where he was married, on November 8, 1841, to Elizabeth Frances Folsom, a native of Portsmouth, New Hampshire. In the year 1864 he came to Groton and remained five years, though without engaging in the active practice of medicine. He afterward lived in Chicago, but is now a resident of Washington. He is an author of some note, having written a work entitled "Operative Surgery Illustrated," and another on "The Trees of America."

Dr. Joseph Franklin Coolidge was a son of Charles and Nancy (Spaulding) Coolidge, and born at Westminster on Sept. 11, 1837. He graduated at the Harvard Medical School in the class of 1862, and in the year 1864 came to Groton, where he remained until his death, which took place on June 1, 1865. Dr. Coolidge was one of a family of ten children, and was never married.

Dr. William Ambrose Webster was the only son of William Gordon and Susan (Ambrose) Webster, and born at Rochester, New Hampshire, June 13, 1830. He graduated at the Medical School of the Long Island College Hospital, Brooklyn, N. Y., in the spring of 1862. Soon after graduation, on July 1, 1862, he was commissioned as surgeon of the Ninth New Hampshire Volunteers, which left for the seat of war on August 25, 1862, and he continued in that capacity until January 5, 1865, when he was honorably discharged. In September of that year he came to Groton, where he remained during three years, when he removed to Westford. He died in Mauchester, N. H., on February 8, 1887. Dr. Webster was twice married,—first, in August, 1851, to Mary Anne Kaime of Pittsfield, N. H., and secondly, on August 9, 1858, to Marion M. Ladd, of Middlesex, Vt. By the first marriage two daughters were born, who both are now living, and by the second marriage one daughter, Susan Marion Webster, was born at Groton on June 25, 1866, but she died before her father.

Dr. David Roscoe Steere is a son of Scott and Mary (Mathewson) Steere, and was born at Lisbon, Connecticut, April 27, 1847. He graduated at the Dartmouth Medical School in the class of 1871, and, after graduation, practiced for a few months at Savoy. In July, 1872, he came to Groton, where he has since remained; and in the year 1878 he built the house, at the corner of Main and Church Streets, which he now occupies. On June 18, 1873, Dr. Steere was married to Adelia, daughter of Jephtha and Betsey (Boyn-ton) Hartwell.

Dr. Edward Hubbard Winslow was a son of the Reverend Hubbard and Susan Ward (Cutler) Winslow, and born in Boston on Dec. 26, 1835. He was married, on Sept. 1, 1859, to Helen H. Ayer, of Mount- vale, Me., and in the early spring of 1875 came to Groton, where he remained about two years. Dr. Winslow died in New York on Oct. 16, 1873.

Dr. George Washington Stearns is a son of Paul and Lucy (Kneeland) Stearns, and was born at Reading, Vermont, on Dec. 25, 1814. His mother was a sister of Abner Kneeland, the preacher and author. He took his medical degree first in March, 1857, at Penn Medical University, Philadelphia, and secondly, in 1858, at the Hahnemann Medical College, in the same city. In the spring of 1878 Dr. Stearns came to Groton from Marblehead, and in November, 1882, removed to Holliston, where he remained a few years, when he went to Holyoke, of which city he is now a resident. He was married, first, on May 8, 1838, at South Yarmouth, to Sylvia Crowell, and secondly, on July 19, 1877, at New Bedford, to Julia Amanda, daughter of Cyrus and Eliza Eastman (Cottrell) Ware.

Dr. William Barnard Warren is a son of Noailles Lafayette and Mary (Barnard) Warren, and was born at Leominster on Nov. 16, 1853. He graduated at the Medical Department of the University of the

City of New York in the class of 1881, having previously attended a course of lectures in 1879 at the Dartmouth Medical School. In December, 1882, he came to Groton and established himself in practice, where he now remains. Dr. Warren was married at Groton on Oct. 31, 1883, to Ardelia Temple, daughter of Thomas Haines and Relief (Cummings) Smith, of Boston.

Dr. Marion Zachariah Putnam is a son of John and Sophia (Weaver) Putnam, and was born at Mount Sterling, Illinois, on August 14, 1844. In the year 1870 he graduated at the Medical Department of the Northwestern University, Chicago, and began to practice in his native town. On September 9, 1880, Dr. Putnam was married to Harriet Elizabeth, daughter of Thomas Spencer and Harriet Heyward (Law-ton) Farnsworth, of Groton. About the year 1883 he came to this town from Lowell, where he had resided for a short period. He lives on Pleasant Street, but has retired from the active practice of his profession.

The Fitchburg Railroad was first opened to public travel, through the southerly part of Groton, on December 30, 1844; and the Peterborough and Shirley Railroad, under the management of the Fitchburg company, was opened during the year 1847. The Worcester and Nashua Railroad was operated for regular business, through its entire length, on December 18, 1848, though the section from Groton Junction to Clinton had been previously opened on July 3, 1848, and from Clinton to Worcester on November 22d; and the Stony Brook began its operations on July 1, 1848. Soon after these interconnections were made, a village sprang up in the neighborhood, which became popularly known as the "Junction," though by the Post-Office Department at Washington it was officially called "South Groton." On March 1, 1861, the name of the post-office was changed by the Department from South Groton to Groton Junction. This settlement, growing in numbers, after a while was set off from the parent town, and, by an act of the Legislature on February 14, 1871, incorporated as a distinct town-ship, under the name of Ayer. After this date, therefore, the list of physicians, so far as they relate to the Junction, and their biographical sketches, will cease.

Dr. Ebenezer Willis was a son of John and Nancy (Spriggs) Willis, and born at Newmarket, New Hampshire, on January 26, 1815. He was married at Exeter, on July 23, 1836, to Mary Frances, daughter of Benjamin and Mary Seavey (Neal) Batchelder. Dr. Willis came to Groton Junction in March, 1849, and was the pioneer physician of the place. He died at Ayer on May 10, 1890.

Dr. John Quincy Adams McCollester is a son of Silas and Achsah (Holman) McCollester, and was born at Marlborough, New Hampshire, on May 3, 1831. He took his degree of M.D. from the Jefferson Medical School in March, 1856. Dr. McCollester was married, first, on May 6, 1856, to Sarah Elizabeth, daughter of Joseph and Anua (Longley) Hazen, of

Shirley, who died on May 5, 1858; and, secondly, on August 9, 1859, to Georgianna Lydia, daughter of Daniel and Lydia (Fisk) Hunt, of Groton. During the War of the Rebellion he was the surgeon of the Fifty-third Regiment Massachusetts Militia, having been commissioned on December 1, 1862, and mustered out of the service on September 2, 1863. He is now a resident of Waltham.

Dr. Edson Champion Chamberlin, a native of Thetford, Vermont, came to Groton Junction in the summer of 1859 and remained one year. He graduated at the Worcester Medical Institution on June 20, 1854. He was married to Mary A. Pierce, of Southbury, Connecticut, where he died on January 26, 1877, aged fifty-six years.

Dr. Gibson Smith came to Groton Junction from the State of Maine about the year 1866. He was an "eclectic" physician and a spiritualist, and died at Ayer on September 26, 1885, aged seventy years.

Dr. John Eleazer Parsons is a son of John and Rosalinda Davis (Robbins) Parsons, and was born at Harrison, Maine, on November 20, 1835. He graduated at the Harvard Medical School in the class of 1863, and on March 18th of the same year was commissioned as assistant surgeon of the Twenty-eighth Regiment Massachusetts Volunteers, but for disability was discharged on July 30, 1863. Dr. Parsons next served as acting assistant surgeon, United States Navy from October 10, 1863, to December 10, 1866, when he resigned. During the last week of December, 1866, he came to the village of Groton Junction (Ayer), where he is still living.

Dr. Benjamin Hall Hartwell is a son of Benjamin Franklin and Emma (Whitman) Hartwell, and was born at Acton February 27, 1845. He received his early education at Lawrence Academy, Groton, of which institution he is now one of the trustees, and graduated at the Jefferson Medical College, Philadelphia, on March 7, 1868. In the early spring of 1869 Dr. Hartwell came to Groton Junction (Ayer), where he still resides, having filled many prominent positions of trust and usefulness. He was married, on September 10, 1879, to Helen Emily, daughter of Major Eusebius Siisby and Mary Jane (Shattuck) Clark.

Dr. James Moody Moore was a son of Dr. Ebenezer Giles and Eliza Sarah (Hidden) Moore, and born at Wells, Maine, on June 20, 1832. He graduated at the Dartmouth Medical School in the class of 1860, and in May of that year came to Groton Junction, where he remained until April, 1861. Dr. Moore then removed to Concord, New Hampshire, his father's home, where he died on February 3, 1870.

A LIST OF REPRESENTATIVES to the General Court, from the colonial period to the present time, with the dates of their election and terms of service; including also the names of certain other officers—1672-1887.

The Assistants of Massachusetts, sometimes called

Magistrates, were the forerunners of the Provincial Council and the State Senate. They were few in number, and, in point of dignity and honor, next to the Governor and the Deputy-Governor. Major Simon Willard, the only citizen of the town who ever held the office, became a resident in the year 1672, removing here from Lancaster at that time. He was first chosen to the position in 1654, when living at Concord.

COURT OF ASSISTANTS.

<i>Date of first Election.</i>		<i>Term of Service.</i>
May 3, 1654	Major Simon Willard	1672-1676 (Died in office on April 24, 1676.)

SENATE.

October 26, 1780	Honorable James Prescott	1780-1784, 1786
June 1, 1797	Honorable Timothy Bigelow	1797-1800
May 6, 1805	Honorable Samuel Dana	1805-1812, 1817 (Mr. Dana was president of the body during the years 1807, 1811 and 1812.)
November 13, 1837	Honorable Stuart James Park	1838, 1839
January 9, 1851	Honorable John Boynton	1851
November 13, 1864	Honorable Abijah Edwin Hildreth	1865
November 5, 1867	Honorable Daniel Needham	1868, 1869
November 8, 1887	Honorable Moses Poor Palmer	1888-1890 (Of these Senators the last two are the sole survivors.)

There is no reference in the Groton records to the election of any representatives to the General Court before the year 1693; and even then the names are not given, and only by the receipts for their pay, and by some allusions to the subject, is it known that any were chosen previously to that date. According to the Colonial records, Captain James Parker served as a deputy, or representative, during the session beginning November 7, 1683, and it is probable that he was the only one from the town under the first charter.

The following entries comprise every allusion to the subject found in the earliest volume of town records, which is known as the "Indian Roll":

"February the 6 1693 the inhabitanc being met together for to Consider of sum waye for to prevent futar unnesesary charges did by uott declare that they would petishone unto the geararill Court that ther representetive might be releasd from attending the Seelone any more

"the same daye the town did by uott declare that they would have dacon Lawranc for to manidge the portitions for them which the Coumthly hath draw up" (Page 107.)

"Groton April 12 1693 Know all peple by thes presenc that Nathanaell Lawranc senor hath Reseived full satisfactiōe by the select men and Constables for sarveing the town as a Representiue at the two first seetione

"I saye reseived by me NATHANNIL LAURANCE"

"Groton April 12 1693 Know all peple by thes presenc that John Page senor doth fully and [sic] Clearly acquite the town select men and constables for sarving the town as a representetive at the first [session] held at boston in ye year 1692

"as witness my hand JOH PAGE seneyer"

"Payed to Nathanael Lawranc se[nior] eight pounds in mony
"Payed to John Page se[nior] two pounds sixteen shillings and nine pence in mony" (Page 109.)

"maye 15 1693 the Town being met together ther unto orderlie warned then the town did by uote declare that they would not send nor Choose any parson nor parsons for to Represent them at the great and geararill Corte or assembly

"John page senor Jeams Kemp John Stone and William Longley se[nior] desent from this uote John farnworth and Steuen holden

"The Town Resons is they do not iudg themself layable nether accordiud to Law nor Charter

"as atest
(Page 109.)

WILLIAM LONGLEY Town Clerk"

"October 30 1693 at town meeting Legally warned Capt Jearns Parker was chosen to Represent the town at ye great and genaralell assembly held at boston the eight dey of nonember Insuing the date here of" (Page 110.)

It does not appear from the records of the General Court that Captain Parker was present at any meeting of this session.

"January 1 1693 $\frac{1}{2}$ the town this daye did ingage to sequer the select men from any harm or dameldg that they shall meett with all in Respect of Decon nathanaell Lawranc in that he doth demand thirty 6 shillins in money for to be his dew fur sarfing the said town as a representative and the town doo Refuse to paye the said money the select men being esteemed as the rest of the inhabitanc in the matter also the town did by the major vote chouse Liffenant Jonah Prescott & Jearns parker Ju for to answer in the case if the said Lawranc should truble y^e select men or towne and they did except of the chois and they are to haue their paye for their pains when the said town is able to paye them

"as witness WILLIAM LUNGLEY town clerk"

"John page se[nior] desents from the aboue mentioned propositi^one" (Pages 111, 112.)

"at a town meting legelly warned May 9th 1699: Capt: Prescott was chosen for to atende the genrell Cort: for to sarue as a representiue

"JAMES BLANCHARD Clark"

(Page 118.)

"May 17 1703 at a town metting legelly warned the town did by uot declare that they would pay deacon larrance the mony that the deacon demande for saruing the: town as one representiue In the year 1693

"the town did uote and declare that they would borrow the mony of thomas Williams for four month and pay for the use of it one shilling

"JAMES BLANCHARD Clark"

(Page 124.)

"Groton May y^e 8 1705 then capt prascot was chosen to sarue as a representiue for the yer Insuing

"THOMAS TARBELL Clark"

(Page 126.)

"Groton May the eight 1706 At a town metting legally warned to chouse a representiue the fre hooldars and other inhabitants qualiaed according to law did by the major vote chouse [choose] Simin Stone for this year 1706 a representiue

"JOSEPH LAKIN town clerk"

(Page 129.)

The paging, as given after these several extracts, refers to the printed edition of "The Early Records of Groton, Massachusetts, 1662-1707," from which they are taken. Since the year 1707, and even before that date, in the town records, there are occasional omissions of the names of representatives, and these gaps I have filled from the Colonial and Provincial records at the State-House. In such cases the names are printed within brackets, and the dates given with them refer to the beginning of each session; and in all other instances in the list, where dates of the sessions have been obtained or inferences drawn from these records, brackets are used.

In early times the representative to the General Court was paid by the town that sent him; and this fact furnishes the reason why the town of Groton, on May 15, 1693, voted not to send one. It was then poor, and staggering under a heavy load in the shape of debts and current expenæs. Notwithstanding the receipt of Deacon Lawrence given on April 12, 1693, the town was threatened by him with a suit for thirty-six shillings, for his services as a representative, perhaps during a short period after the petition of February 6, 1693, when it was voted that he should be released from attendance. It is not now known

whether a suit was ever begun, but, ten years later, as appears by the vote of May 17, 1703, the town agreed to settle the matter by paying the demand, though it was obliged to borrow the money for that purpose,—an indication of its extreme poverty. During some of these ten years Deacon Lawrence was a resident of that quarter of Cambridge which is now Lexington; and his absence from Groton may have been, in part, the cause of the long delay in settling the dispute. Neither Deacon Lawrence nor Mr. Page was chosen to the Assembly that convened on May 31, 1693.

John Paris was a member of the Council for Safety of the People, which met on May 9, 1689, just after Governor Andros was deposed. It is probable that the town was unrepresented during the following years: 1693 (first session), 1694-1698, 1700-1704, and 1707, as the Provincial records of those dates do not mention any member from Groton.

In the following list of representatives I have given the church, civil and military titles found in the records, inasmuch as they indicate, approximately, the period when they were acquired. For nearly a century and a half the term of service of each member was during the year of his election. The name of John Sheple, as spelled in the town records, is written John Shepley in the Provincial records, but the two names refer to the same man, and the Nathaniel Sawtell of the town records is identical with the Nathaniel Sartle of the Provincial records.

HOUSE OF REPRESENTATIVES.

Date of Election.

[November 7, 1683, Captain James Parker.]
[May 9, 1689, John Paris.]

Under the Charter of William and Mary.

[June 8, 1692, Nathaniel Lawrence.]
[June 8, 1692, John Page.]
[May 31, 1693 (first session), probably none chosen.]
[October 30, 1693 (second session), Captain James Parker.]
[May 30, 1694, probably none chosen.]
[May 29, 1695, probably none chosen.]
[May 27, 1696, probably none chosen.]
[May 26, 1697, probably none chosen.]
[May 25, 1698, probably none chosen.]
May 9, 1699, Jonas Prescott.
[May 29, 1700, probably none chosen.]
[May 28, 1701, probably none chosen.]
[May 27, 1702, probably none chosen.]
[May 26, 1703, probably none chosen.]
[May 31, 1704, probably none chosen.]
May 8, 1705, Jonas Prescott.
May 8, 1706, Simon Stone.
[May 28, 1707, probably none chosen.]
[May 26, 1708, John Farnsworth.]
May 25, 1709, Ensign John Farnsworth.
May 22, 1710, Ensign John Farnsworth.
[May 30, 1711, John Farnsworth.]
May 7, 1712, Ensign John Farnsworth.
May 11, 1713, Ensign John Farnsworth.
[May 26, 1714, John Farnsworth.]
[May 25, 1715, Thomas Tarbell.]
[May 30, 1716, John Shepley.]
May 21, 1717, John Sheple.
[May 28, 1718, John Shepley.]
[May 27, 1719, John Shepley.]
May 6, 1720, Captain Jonas Prescott, Jr.

May 22, 1721, Captain John Sheple.
 August 8, 1721, Captain John Sheple.
 [May 30, 1722, Captain John Sheple.]
 May 1, 1723, Lieutenant Benjamin Prescott.
 May 18, 1724, Lieutenant Benjamin Prescott.
 May 14, 1725, Captain John Sheple.
 May 19, 1726, Captain John Sheple.
 May 17, 1727, Benjamin Prescott.
 May 10, 1728, Captain John Sheple.
 May 14, 1729, John Longley.
 May 18, 1730, Deacon John Loogley.
 May 17, 1731, Deacon John Loogley.
 [May 31, 1732, Nathaniel Sartle.]
 May 21, 1733, Nathaniel Sawtell, Esq.
 May 8, 1734, Benjamin Prescott, Esq.
 May 19, 1735, Benjamin Prescott, Esq.
 May 18, 1736, Benjamin Prescott, Esq.
 May 17, 1737, Colonel Benjamin Prescott.
 May 15, 1738, Benjamin Prescott, Esq. (died in office on August 3, 1738).
 December 25, 1738, Justice Nathaniel Sawtell, in the place of Benjamin Prescott, Esq., deceased.
 May 23, 1739, Justice Nathaniel Sawtell.
 [May 28, 1740, John Longley.]
 May 25, 1741, Justice Nathaniel Sawtell.
 May 12, 1742, Nathaniel Sawtell.
 [May 25, 1743, William Lawrence.]
 May 14, 1744, Nathaniel Sawtell.
 May 17, 1745, William Lawrence, Esq.
 May 18, 1746, William Lawrence, Esq.
 May 18, 1747, William Lawrence, Esq.
 May 17, 1748, William Lawrence, Esq.
 May 22, 1749, William Lawrence, Esq.
 May 28, 1750 (the town voted not to send).
 May 27, 1751, William Lawrence, Esq.
 May 14, 1752, William Lawrence, Esq.

The district of Shirley was set off from Groton on January 5, 1753, and the district of Pepperell, three months later, on April 12th, and after these dates, until the period of the Revolution, the two districts were represented in the General Court by the parent town.

Date of Election.

May 14, 1753, William Lawrence, Esq.
 [May 29, 1754, William Lawrence.]
 May 13, 1755, Colonel William Lawrence.
 May 17, 1756, William Lawrence, Esq.
 May 13, 1757, William Lawrence, Esq.
 May 17, 1758, William Lawrence, Esq.
 May 25, 1759, William Lawrence, Esq.
 May 26, 1760, William Lawrence, Esq.
 May 15, 1761, William Lawrence, Esq.
 May 17, 1762, Captain Abel Lawrence.
 May 16, 1763, Captain Abel Lawrence.
 May 21, 1764, Captain Abel Lawrence.
 May 14, 1765, Captain Abel Lawrence.
 May 12, 1766, Colonel James Prescott.
 May 18, 1767, Colonel James Prescott.
 May 10, 1768, Colonel James Prescott.
 May 23, 1769, Colonel James Prescott.
 May 21, 1770, Colonel James Prescott.
 May 20, 1771, Colonel James Prescott.
 May 18, 1772, Colonel James Prescott.
 May 17, 1773, Colonel James Prescott.
 May 9, 1774, Colonel James Prescott.
 May 22, 1775, Honorable James Prescott.

After this date Pepperell and Shirley were each represented in the General Court separately, and not by the parent town. Owing to the political disturbances, a new Assembly was chosen by the Province in the summer of 1775. The precept issued to the town of Groton, with the answer, is found among the

Archives (CXXXVIII. 214) at the State House, as follows :

" COLONY OF THE MASSACHUSETTS BAY.

" These are to will, and require you forthwith to cause the Freeholders, & other Inhabitants of your town that have an Estate of Freehold in land within this Colony or Territory of forty Shillings per annum at the least, or other Estate to the value of forty Pounds sterling, to assemble at such time, & Place as you shall appoint; then & there to elect, and depute one or more Persons (being freeholders, and resident in the same town) according to a number set, & limited by an Act of the General Court or Assembly, which was conven'd at Watertown on the nineteenth day of July current for the Service of this Colony, and is still in being; and to cause the Person or Persons so elect, and deputed by the major part of the electors present at such election to be timely notified, & summoned by one of the constables of your town forthwith to attend the Service of this Province in the said general Court, or Assembly, & during the Session or Sessions of the same. — Hereof fail not, and make a Return of this Precept with the name or names of the Person, or Persons so elected, & deputed, with their being summoned into the General Assembly, as soon as may be after such election, & summons shall be made.

" Dated at Watertown this 31st day of July A.D. 1775.

" By order of the House of Representatives

" JAS : WARREN Speaker

" To the Selectmen of the town of
 Groton in the County
 of Middlesex Greeting.

" Pursuant to the Precept within written the Freeholders and other Inhabitants of the town of Groton qualify'd as is therein directed, upon due Warning given, assembled and met together on the Twenty first day of August and then did elect, & depute Capt. Josiah Sartell—to serve for, and represent them in the Session, or Sessions of the great, and general Court or Assembly which was conven'd at Watertown on the nineteenth day of July current for the Service of this Colony the said Person being chosen by a major part of the electors present.

" Dated in Groton sforesaid the 21st day of August—A.D. 1775.

" OLIVER PRESCOTT } Selectmen
 ISAAC FARNSWORTH } of
 AMOS LAWRENCE } Groton

" The Person chosen as above said notified thereof & summon'd to attend accordingly
 by me Constable of Groton
 OLIVER FLETCHER

[Indorsed] " Return from Groton Cap^t Josiah Sartell

" Mr Fowle Please to make out a Precept for the town of Hancock in the County of Berkshire—according to this Form—
 [Addressed] " To The Selectmen of the Town of Groton."

Date of Election.

August 21, 1775, Captain Josiah Sartell.
 May 20, 1776, Colonel Josiah Sartell.
 May 26, 1777, Honorable James Prescott. Deacon Isaac Farnsworth, declined, and Colonel Josiah Sartell chosen in his place.
 May 18, 1778, Honorable James Prescott.
 May 17, 1779, Honorable James Prescott.
 May 15, 1780, Honorable James Prescott.

The first General Court of the Commonwealth of Massachusetts met on Wednesday, October 25, 1780, and the Honorable James Prescott was the representative from this town. He was chosen to the House on September 4th, and a short time later, in order to fill a vacancy in the Senate, he was elected to that body by a convention of both branches on Thursday, October 26, 1780; and subsequently by another similar convention on Friday, October 27th, to the Executive Council. At that time the Councilors and Senators were chosen on the same general ticket, without any special designation of either office, and then the Legislature selected from the upper body the members of the Council.

The *Continental Journal*, etc., (Boston), November 2, 1780, gives a list of the members of the General Court, where Mr. Prescott appears not only as a representative, but also as a Senator and a Councilor; and in another column of the same newspaper it is announced, as a resolution of the Legislature, that owing to Mr. Prescott's acceptance of the Senatorship, his office as sheriff of Middlesex County was rendered vacant, and owing, furthermore, to the lack of time in filling it, agreeably to the new Constitution, the session of the Superior Court of Judicature, Court of Assize and General Gaol Delivery would stand adjourned for one fortnight. He was also chosen, during the years 1781, '82, '83, '84 and '86, first to the Senate, and shortly afterwards to the Council, where he appears to have served through the respective terms. He had previously represented the town in the three Provincial Congresses of 1774 and 1775, and his experience in legislative bodies was large.

Two of the representatives in the following list, namely, the Hon. Timothy Bigelow and the Hon. Luther Lawrence, have been Speakers of the House. Mr. Bigelow was first chosen to that position on May 29, 1805, and for eleven years, at intervals, he continued to fill the office—the longest term of service in that capacity ever held by one person—though during a part of this period he was representing the town of Medford. He was Speaker at the time of the separation of Maine from Massachusetts. Mr. Lawrence, a brother-in-law of Mr. Bigelow, was elected to the same office on May 29, 1822, and held it during one year. It is not a little singular that they both were occupants, at different times, of the same dwelling, formerly situated on Main Street, but now moved away; and both had their law-offices in a building near by, where, also, Mr. Dana, the president of the Senate, had had his law-office. This coincidence is by no means weakened by the fact that Governor Bontwell, the present owner of the place, was once the Democratic candidate for the Speakership, when the Legislature met on January 6, 1847, and he also was a resident of the town at that time. It may be worthy of note that another Speaker, the Hon. Timothy Fuller, the father of Margaret, who is known as the Countess d'Ossoli, was a citizen of Groton for some years before his death, which took place on October 1, 1835.

Under the Constitution originally the political year began on the last Wednesday of May, but the Senators and Representatives were chosen at different times. The members of the House were elected, annually, in the month of May, ten days at least before the last Wednesday of that month, and their term of service was during the year of their election.

UNDER THE STATE CONSTITUTION.

Date of Election.

September 4, 1780, Hon. James Prescott.
 May 14, 1781, Deacon Isaac Farnsworth.
 May 13, 1782, Deacon Isaac Farnsworth, declined, and Israel Hobart chosen in his place.

May 12, 1783, Israel Hobart.
 May 10, 1784, Dr. Benjamin Morse.
 May 9, 1785, Ebenezer Champey.
 May 8, 1786, (the town voted by one majority not to send).

On March 7, 1787, the General Court passed an order fining the town of Groton twenty-four pounds and ten shillings for its neglect to send a representative during the preceding year. Forty other towns were fined various sums at the same time for a similar neglect; and among them were Pepperell, Dunstable, Westford, Littleton, Harvard and Lunenburg.

Date of Election.

May 7, 1787, Dr. Benjamin Morse.
 May 12, 1788, Dr. Benjamin Morse.
 May 11, 1789, Dr. Benjamin Morse.
 May 4, 1790, (the town voted not to send).
 May 9, 1791, Major Aaron Brown.
 May 7, 1792, Major Aaron Brown.
 May 6, 1793, Major Aaron Brown, Mr. Timothy Bigelow.
 May 12, 1794, Mr. Timothy Bigelow.
 May 6, 1795, Mr. Timothy Bigelow.
 May 2, 1796, Mr. Timothy Bigelow.
 May 1, 1797, Mr. Timothy Bigelow.
 May 14, 1798, Hon. Timothy Bigelow.
 May 6, 1799, Hon. Timothy Bigelow.
 May 5, 1800, Hon. Timothy Bigelow.
 May 4, 1801, Hon. Timothy Bigelow.
 May 3, 1802, Hon. Timothy Bigelow.
 May 2, 1803, Samuel Dana.
 May 7, 1804, Hon. Timothy Bigelow.
 May 6, 1805, Hon. Timothy Bigelow, *Speaker*.
 May 5, 1806, Hon. Timothy Bigelow, *Speaker*.
 May 4, 1807, Joseph Moors.
 May 2, 1808, Joseph Moors.
 May 1, 1809, Joseph Moors, Oliver Prescott.
 May 7, 1810, Oliver Prescott, James Brazer.
 May 6, 1811, Major Joseph Moors, Major Thomas Gardner.
 May 4, 1812, Joseph Moors, Luther Lawrence.
 May 3, 1813, Joseph Moors, Luther Lawrence.
 May 2, 1814, Joseph Moors, Luther Lawrence.
 May 1, 1815, Luther Lawrence.
 May 6, 1816, Luther Lawrence.
 May 3, 1817, Luther Lawrence.
 May 4, 1818, Luther Lawrence.
 May 3, 1819, Luther Lawrence.
 May 1, 1820, Luther Lawrence.
 May 7, 1821, Luther Lawrence.
 May 6, 1822, Luther Lawrence, *Speaker*.
 May 12, 1823, (the town voted not to send).
 May 23, 1824, Captain Noah Shattuck.
 May 2, 1825, Hon. Samuel Dana.
 May 1, 1826, Hon. Samuel Dana.
 May 7, 1827, Hon. Samuel Dana.
 May 5, 1828, (the town voted not to send).
 May 4, 1829, Caleb Butler, declined, and William Livermore chosen in his place.
 May 3, 1830, Luther Lawrence, William Livermore.
 May 11, 1831, Captain John Boynton.
 (The town voted not to choose a second representative.)

By the tenth Article of Amendment to the Constitution of Massachusetts, adopted by the General Court during two successive sessions, and ratified by the people on May 11, 1831, the beginning of the political year was changed from the last Wednesday in May to the first Wednesday in January, and the day of election changed to the second Monday in November. In this list hereafter the term of service is during the year following the date of election.

Date of Election.

November 12, 1832, Captain John Boynton, Captain John Rockwood.

November 11, 1833, Captain John Boynton, Captain John Rockwood.
 November 10, 1834, Captain John Boynton, Timothy Blood.
 November 9, 1835, Captain John Boynton, Timothy Blood.
 November 14, 1836, John Gray Park, Dr. Joshua Green.
 November 13, 1837, Dr. Joshua Green.

(The town voted not to choose a second representative.)
 November 12, 1838, John Gray Park, Captain Daniel Shattuck.
 November 11, 1839, (the town voted not to send.)
 November 9, 1840, John Boynton.
 November 8, 1841, George Sewall Boutwell.
 November 14, 1842, George Sewall Boutwell.
 November 13, 1843, George Sewall Boutwell.
 November 11, 1844, William Livermore, Jr.
 November 10, 1845, William Livermore, Jr.
 November 10, 1846, George Sewall Boutwell.

Mr. Boutwell was chosen on the third trial by five majority. On the preceding day there had been a tie vote twice between him and Edward Coburn, the Whig candidate.

Date of Election.
 November 8, 1847, George Sewall Boutwell.
 November 13, 1848, George Sewall Boutwell.
 November 12, 1849, George Sewall Boutwell.
 November 11, 1850, Phineas Gilman Prescott.
 November 10, 1851, Phineas Gilman Prescott.
 November 8, 1852, William Shattuck.
 November 14, 1853, William Shattuck.
 November 13, 1854, John Warren Parker.
 November 12, 1855, John Warren Parker.

By the fifteenth Article of Amendment to the State Constitution, adopted by the General Court during two successive sessions, and ratified by the people on May 23, 1855, the day of election was changed to the Tuesday next after the first Monday in November.

Date of Election.
 November 4, 1856, Warren Fay Stone.

Under Chapter CCCVIII., Acts of 1857, a new apportionment of Representatives was made throughout the State, and the town of Groton became, thereby, in connection with the towns of Pepperell, Shirley, Westford and Dunstable, the Twenty-sixth Middlesex District, with two Representatives.

Date of Election.
 November 3, 1857, Ebel Shumway.
 November 3, 1857, Robert Parker Woods.
 November 7, 1860, George Henry Brawn.
 November 4, 1863, George Samuel Gates.
 November 8, 1865, Benjamin Franklin Taft.

Mr. Shumway's election was contested before the General Court by Allen Cummings, of Dunstable, and a hearing was given by the Committee on Elections; but the matter was decided in favor of Mr. Shumway. For a full statement of the case, see "Reports of Controverted Elections in the Senate and House of Representatives of the Commonwealth of Massachusetts from 1853 to 1885 inclusive" (page 41), by Edward P. Loring and Charles Theodore Russell, Jr. (Boston, 1886).

By another apportionment, made under Chapter CIII., Acts of 1866, Groton and Pepperell became the Thirty-first Middlesex District, and were entitled to one Representative. The town of Ayer, on its incorporation, February 14, 1871, except that part which had previously belonged to Shirley, was added to the district.

Date of Election.
 November 7, 1866, Daniel Needham.
 November 4, 1868, William Livermore.
 November 2, 1869, Edmund Dana Bancroft.
 November 5, 1873, George Samuel Gates.

By still another apportionment, under Chapter XV., Acts of 1876, Groton became, in connection with Westford, Dunstable and Pepperell, the Thirty-fourth Middlesex District, and entitled to one Representative.

Date of Election.
 November 8, 1876, Asa Stillman Lawrence.
 November 3, 1880, Asa Stillman Lawrence.
 November 7, 1883, Moses Poor Palmer.
 November 12, 1886, George Sumner Graves.

Colonel William Lawrence was a member of the General Court during seventeen years,—the longest term of service of any Representative from the town; and after him came the Hon. James Prescott, who served fifteen years.

Mr. Boutwell is now the senior surviving member, and, with the exception of Phineas Gilman Prescott, William Shattuck, Warren Fay Stone, George Henry Brown and George Sumner Graves, all his successors are still alive.

REVOLUTIONARY PERIOD.

FIRST PROVINCIAL CONGRESS OF DEPUTIES.

<i>Date of Election.</i>	<i>Term of Service.</i>
May 9, 1774	Honorable James Prescott 1774

SECOND PROVINCIAL CONGRESS OF DEPUTIES.

December 26, 1774	Honorable James Prescott 1775
-----------------------------	---

THIRD PROVINCIAL CONGRESS OF DEPUTIES.

May 22, 1775	Honorable James Prescott 1775
------------------------	---

MEMBERS OF THE BOARD OF WAR.

October 30, 1776	Oliver Prescott, declined.
November 16, 1776	James Prescott 1776-1779

MEMBER OF THE COUNCIL.

May 29, 1777	Oliver Prescott 1777-1779
------------------------	-------------------------------------

According to the records of the General Court, when the Board of War was first chosen on October 30, 1776, "Brig. Prescot" was elected a member. This referred to Dr. Oliver Prescott, at that time a brigadier-general, but it does not appear that he ever took his seat with the board. On November 13th the records state that two of the members, whose names are given, had declined, and their places were at once filled; and on November 16th five more resignations were announced,—though no names are mentioned,—and the vacancies then filled. Dr. Prescott was undoubtedly one of the five who declined at this time. Among those chosen at the second election was "Colonel Prescott," who was James, a brother of Oliver. It is a little singular that their Christian names are not given in the records, as both were well-known men. The "Journal of the House," October 30, 1776, prints the name of "James Prescott, Esq;," as one of the nine original members chosen at that time, but this is an error. Colonel Prescott attended his first meeting with the Board of War on December 18,—according to the manuscript minutes of the Board.

VARIOUS OFFICERS.

GOVERNOR OF THE COMMONWEALTH.

<i>Date of Election.</i>		<i>Term of Service.</i>
January 11, 1851 . . .	Honorable George Sewall Boutwell	1851, 1852

SECRETARY OF THE UNITED STATES TREASURY.
(Under President Grant.)

March 11, 1869	Honorable George Sewall Boutwell	1869-1873
--------------------------	--	-----------

SENATOR IN CONGRESS.

March 12, 1873	Honorable George Sewall Boutwell	1873-1877
--------------------------	--	-----------

REPRESENTATIVES IN CONGRESS.

November 5, 1810	Honorable William Merchant Richardson	1811-1814
----------------------------	---	-----------

November 7, 1814	Honorable Samuel Dana	1814, 1815
----------------------------	---------------------------------	------------

November 4, 1862	Honorable George Sewall Boutwell	1863-1869
----------------------------	--	-----------

MEMBERS OF THE EXECUTIVE COUNCIL.

October 27, 1780	Honorable James Prescott	1780-1784, 1786
----------------------------	------------------------------------	-----------------

May 28, 1802	Honorable Timothy Bigelow	1802
------------------------	-------------------------------------	------

PRESIDENTIAL ELECTOR.

November 6, 1820	Honorable Samuel Dana	1820
----------------------------	---------------------------------	------

(The Electoral College of Massachusetts cast its vote on December 7, 1820, unaniously in favor of James Monroe for President.)

DELEGATES TO CONSTITUTIONAL CONVENTIONS.

Convention for forming the Constitution of Massachusetts, September 1, 1779.

<i>Date of Election.</i>		<i>Term of Service.</i>
August 16, 1779	Honorable James Sullivan	1779, 1780

(Mr. Sullivan was afterward Governor of the Commonwealth, and died on December 10, 1809, while holding the office.)

Convention for adopting the Constitution of the United States, January 9, 1788.

December 3, 1787	Dr. Benjamin Morse, Joseph Sheple, Esq.	1788
----------------------------	---	------

(Both these delegates opposed the adoption.)

Convention for altering the Constitution of Massachusetts, November 15, 1820

August 21, 1820	{ Honorable Samuel Dana, }	1820, 1821
	{ Luther Lawrence, Esq. }	

Convention for altering the Constitution of Massachusetts, May 4, 1853.

March 7, 1853	John Gray Park, Esq.	1853
-------------------------	------------------------------	------

(Mr. Boutwell, of Groton, represented the town of Berlin, Worcester County, in this Convention.)

JUDGES AND OTHER COURT OFFICERS.

CHIEF JUSTICE OF THE COURT OF COMMON PLEAS.

<i>Date of Appointment.</i>		<i>Term of Service.</i>
June 3, 1803	Honorable James Prescott, Jr.	1803

(By an Act passed on June 21, 1811, the Court of Common Pleas became the Circuit Court of Common Pleas.)

CHIEF JUSTICE OF THE CIRCUIT COURT OF COMMON PLEAS.

October 14, 1811	Honorable Samuel Dana	1811-1820
----------------------------	---------------------------------	-----------

JUSTICE OF COURT OF COMMON PLEAS.

December 21, 1782	Honorable James Prescott	1782-1800
-----------------------------	------------------------------------	-----------

JUDGES OF PROBATE.

July 1, 1779	Honorable Oliver Prescott	1779-1804
------------------------	-------------------------------------	-----------

(Reappointed on March 27, 1781.)

February 1, 1805	Honorable James Prescott, Jr.	1805-1821
----------------------------	---------------------------------------	-----------

SHERIFF.

September 6, 1775	Honorable James Prescott	1775-1780
-----------------------------	------------------------------------	-----------

CLERK OF THE COURT OF COMMON PLEAS.

May 28, 1783	William Swan, Esq.	1783-1789
------------------------	----------------------------	-----------

"The Massachusetts Register and United States Calendar for the year of our Lord 1806" (page 75) gives Ephraim Wood, of Groton, as one of the justices of the Court of Common Pleas in Middlesex County, but the place of residence is without doubt a mistake. I cannot find that Judge Wood ever lived at Groton.

A LIST OF THE RESIDENTS

Of Groton who held Commissions from the Governor and Council, during the Provincial Period.

Date of Appointment.

August 27, 1713, Captain Jonas Prescott, Justice of the Peace.
 December 9, 1715, Captain Jonas Prescott, Justice of the Peace.
 December 26, 1727, Benjamin Prescott, Justice of the Peace.
 October 10, 1729, Benjamin Prescott, Justice of the Peace.
 March 19, 1729-30, Captain Nathaniel Sartle, Justice of the Peace.
 July 9, 1731, Benjamin Prescott, Justice of the Peace.
 July 9, 1731, Nathaniel Sartle, Justice of the Peace.
 June 27, 1735, Benjamin Prescott, in place of Paul Dudley, a Special Justice of the Superior Court of Judicature.
 January 2, 1735-36, Benjamin Prescott, Justice of the Peace and of the Quorum.

November 10, 1737, Benjamin Prescott, in place of Paul Dudley, a Special Justice in divers cases.

December 29, 1739, William Lawrence, Justice of the Peace and of the Quorum.

August 12, 1749, William Lawrence, Special Justice of the Inferior Court of Common Pleas.

June 21, 1751, William Lawrence, Special Justice of the Inferior Court of Common Pleas

January 2, 1753, James Prescott, Justice of the Peace.

June 26, 1755, William Lawrence, Justice of the Inferior Court of Common Pleas, in place of Francis Fulham, resigned.

November 20, 1761, William Lawrence, Justice of the Peace and of the Quorum.

November 20, 1761, James Prescott, Justice of the Peace.

June 8, 1764, Abel Lawrence, Justice of the Peace.

CORONERS.—The first three names mentioned below are taken from the Council records; but the others are found in the "Record of Civil Commissions," in the office of the Secretary of State. Under the Constitution coroners were appointed for life, unless sooner removed; but by an act passed on April 29, 1862, their tenure of office was limited to seven years, subject to reappointment. By another act passed on May 9, 1877, the office was abolished, and, so far as related to inquests, the medical examiner was substituted in place of the coroner.

Date of Appointment.

March 8, 1759, Israel Hubbard [Hobart].

November 20, 1761, Israel Hobart.
 (These two persons were the same.)

July 12, 1769, Isaac Farnsworth.

August 28, 1775, Isaac Farnsworth.

September 24, 1778, Ephraim Russell.

March 27, 1781, Ephraim Russell.

March 2, 1790, Samuel Lawrence.

March 2, 1790, Peter Edea.

January 7, 1801, Samson Woods.

February 3, 1803, William Farwell Brazer.

July 4, 1803, James Lewis, Jr.

July 5, 1809, William Lawrence.

February 20, 1810, Abel Farnsworth.

August 20, 1811, Jacob Lakin Parker.

March 2, 1813, Amos Lawrence.

May 26, 1817, Benjamin Moors.

February 9, 1820, William Austin Bancroft.

(Mr. Bancroft was a resident of Townsend at the time of his appointment.)

January 16, 1822, David Childs.

June 29, 1852, Jacob Pollard.

May 15, 1856, John Mason Porter.

April 2, 1858, Ensebius Silsby Clarke.

April 10, 1860, Asa Stillman Lawrence.

January 24, 1866, John Quincy Adams McCollester.

April 16, 1867, Asa Stillman Lawrence.

April 30, 1869, Benjamin Lincoln Howe.

April 30, 1874, Asa Stillman Lawrence.

NATIVES OF GROTON

And Residents of the Town, who have Afterward Filled Important Positions Elsewhere.

Honorable John Prescott Bigelow, born at Groton on August 25, 1797, Harvard College, 1815; Secretary of the Commonwealth of Massachusetts, 1836-43; Member of the Executive Council, 1845-49; Mayor of Boston, 1849-51. Died in Boston on July 4, 1874.

Honorable Henry Adams Bullard, born at Groton on September 9, 1788, Harvard College, 1807; Justice of the Sixth District Court of Louisiana, 1822-31; Representative in Congress from Alexandria and New Orleans, Louisiana (Twenty-first, Twenty-second and Thirty-first Congresses), 1831-34, '50, '51; Justice of the Supreme Court of Louisiana, 1834-46, with the exception of a few months in 1839, when he acted as Secretary of State. Died in New Orleans on April 17, 1851.

Mr. Bullard's father was the settled minister at Pepperell, but all the printed accounts of his life say that he was born at Groton, which is my authority for the statement.

Honorable Willard Hall, born at Westford on December 24, 1780, Harvard College, 1799; studied law with the Honorable Samuel Dana at Groton; Secretary of the State of Delaware, 1811-14, '21; Representative in Congress from Wilmington, Delaware (Fifteenth and Sixteenth Congresses), 1817-21; Judge of the United States District Court in Delaware, 1823-71. Died in Wilmington on May 10, 1875.

Honorable John Harris, born at Harvard on October 13, 1769, Harvard College, 1791; studied law with the Honorable Timothy Bigelow at Groton; Justice of the Superior Court of Judicature of New Hampshire, 1823-33. Died at Hopkinton, New Hampshire, on April 23, 1845.

Honorable Amos Kendall, born at Dunstable on August 16, 1789, Dartmouth College, 1811; studied law with the Honorable William Merchant Richardson at Groton; Postmaster-General under Presidents Jackson and Van Buren, 1835-40. Died in Washington, D. C., on June 12, 1869.

Honorable Abbott Lawrence, born at Groton on December 16, 1792; Representative in Congress from Boston (Twenty-fourth and Twenty-sixth Congresses), 1835-37, '39, '40; Presidential Elector, 1844; Envoy Extraordinary and Minister Plenipotentiary to Great Britain, 1849-52. Died in Boston on August 18, 1855.

Honorable John Locke, born at Hopkinton, Massachusetts, on February 14, 1764, Harvard College, 1792; studied law with the Honorable Timothy Bigelow at Groton; Representative in Congress from Ashby, Massachusetts (Eighteenth, Nineteenth and Twentieth Congresses), 1823-29; Member of the Executive Council, 1831. Died in Boston on March 29, 1855.

Honorable Thomas Rice, born at Pownalborough (now Wiscasset), Maine, on March 30, 1768, Harvard College, 1791; studied law with the Honorable Timothy Bigelow at Groton; Representative in Congress from Augusta, District of Maine, Massachusetts (Fourteenth and Fifteenth Congresses), 1815-19. Died at Winslow, Maine, on August 24, 1854.

Honorable William Merchant Richardson, born at Pelham, New Hampshire, on January 4, 1774, Harvard College, 1797; Preceptor of Groton Academy, 1799-1802; studied law with the Honorable Samuel Dana at Groton; Postmaster, 1804-12; Representative in Congress from Groton (Twelfth and Thirteenth Congresses), 1811-14; removed to Portsmouth, New Hampshire, and afterward became Chief Justice of the Superior Court of Judicature of that State, 1816-38. Died at Chester, New Hampshire, on March 23, 1838.

Honorable Ether Shepley, born at Groton on November 2, 1789, Dartmouth College, 1811; Senator in Congress from Maine, 1833-36; Justice of the Supreme Judicial Court of Maine, 1836-48; Chief Justice of the same Court, 1848-55. Died in Portland on January 15, 1877.

Honorable Samuel Emerson Smith, born at Hollis, New Hampshire, on March 12, 1788, Harvard College, 1808; studied law with the Honorable Samuel Dana at Groton; Justice of the Court of Common Pleas of Maine, 1822-1830; Governor of Maine, 1831-1833; Justice of the Court of Common Pleas again, 1835-1837. Died at Wiscasset, Maine, on March 3, 1860.

Honorable Asabel Stearns, born at Lunenburg, June 17, 1774, Harvard College, 1797; Preceptor of Groton Academy during a short period immediately after his graduation; studied law with the Honorable Timothy Bigelow at Groton; representative in Congress from Chelmsford, Massachusetts (Fourteenth Congress), 1815-1817; University Professor of Law at the Harvard Law School, 1817-1829. Died in Cambridge on February 5, 1839.

Honorable James Sullivan, born at Berwick, Maine, on April 22, 1744; Member of the three Provincial Congresses, from Biddeford, 1774, 1775; resident of Groton, 1778-1782; delegate to the Continental Congress, 1782; Member of the Executive Council, 1787; Judge of Probate, Suffolk County, 1788-1790; Attorney-General, 1790-1807; First President of the Massachusetts Historical Society, 1791-1806; Governor of the Commonwealth, 1807, 1808. Died in Boston on December 10, 1808, while in office.

Honorable John Varnum, born at Dracut on June 25, 1778, Harvard College, 1798; studied law with the Honorable Timothy Bigelow at Groton; Representative in Congress from Haverhill, Massachusetts (Nineteenth, Twentieth and Twenty-first Congresses), 1825-1831. Died at Niles, Michigan, on July 23, 1836.

In the spring of 1765 the odious Stamp Act was

passed, which did much to hasten public opinion toward the American Revolution. This town sympathized warmly with the feeling, and prepared to do her part in the struggle. A large number of her inhabitants had received their schooling in the French War, as their fathers before them had received theirs during the Indian troubles. Such persons did not now enter upon camp life as raw troops, but as experienced and disciplined soldiers. The town had men willing to serve and able to command. The leaders of the Revolution displayed great foresight in the careful attention paid to the details of their work; and the final success of the struggle was due as much to their sagacity as to the deep feeling of the people. On the side of the patriots the skirmishes of April 19, 1775, were fought by companies made up of minute-men, organized on a recommendation of the First Provincial Congress of Massachusetts, in a resolve passed at Cambridge on October 26, 1774. It was at that time recommended to the field officers of the various militia regiments that they should enlist at least one-quarter of their respective commands, and form them into companies to be held in readiness, at the shortest notice by the Committee of Safety, to march to the place of rendezvous. Such soldiers soon became known as minute-men, and proved to be of very great help and strength to the popular cause. Two companies were enlisted at Groton; and at the desire of the officers, the Rev. Samuel Webster, of Temple, New Hampshire, on February 21, 1775, preached a sermon before them, which was afterward printed. It was there stated that a large majority of the town had engaged to hold themselves in readiness, agreeably to the plan of the Provincial Congress to act in the service of their country. The sermon is singularly meagre in those particulars which would interest us at the present time, and is made up largely of theological opinions, perhaps as valuable now as then, but not so highly prized.

On the memorable 19th of April two companies of minute-men, under the respective commands of Captain Henry Farwell and Captain Asa Lawrence, marched from Groton to Concord and Cambridge; and on the same day for the same destination two other companies of militia, under the respective commands of Captain Josiah Sartell and Captain John Sawtell. According to the company rolls at the State-House, there were in Farwell's company, at the time of marching, three commissioned officers and fifty-two men, and in Lawrence's three officers and forty-three men; and in the two militia companies (Sartell's) three officers and forty-five men, and (Sawtell's) one officer and twenty-five men, respectively, though in Sawtell's company some of the men were from Pepperell.

In the battle of Bunker Hill, on June 17, 1775, one commissioned officer and eleven soldiers, residents of Groton, were either killed in the fight or mortally wounded. This roll of honor comprises the names of

Lieutenant Amaziah Fassett, who fell wounded and died a prisoner on July 5th; Sergeant Benjamin Prescott, a son of the Hon. James Prescott, and a nephew of Colonel William Prescott, who commanded the American forces, and privates Abraham Blood, Chambers Corey, James Dodge, Peter Fisk, Stephen Foster, Simon Hobart, Jonathan Jenkins, David Kemp, Robert Parker and Benjamin Woods. This was the largest loss experienced by any town in the battle, and it shows the patriotic character of the citizens at that period. Colonel Prescott, the commander on the American side, and three of the Pepperell soldiers who lost their lives in the fight, were natives of Groton.

During the War for the Union the record of the town is equally honorable. According to General William Schouler's "History of Massachusetts in the Civil War" (ii. 409), she furnished four hundred men for the public service, which was a surplus of forty-nine over and above all demands; of whom twenty-four were commissioned officers. Forty of these soldiers were either killed in battle or died of their wounds, or of sickness contracted in the army. A marble tablet with their names cut in the stone has been placed in the hall of the Town-House in grateful recognition of their services and dedicated to their memory. The whole amount of money raised and appropriated by the town for war purposes, exclusive of State aid, was thirty-one thousand seven hundred and twenty-four dollars and forty-seven cents (\$31,724.47).

CAMP STEVENS AT GROTON.—During the War of the Rebellion, in the autumn of 1862, the Commonwealth of Massachusetts established a military camp at Groton, on the triangular piece of land situated in the southwesterly part of the town, and bounded by the Peterborough and Shirley Railroad, the Nashua River and the road to Shirley Village. It contained eighteen or twenty acres, more or less, and at that time belonged to Joseph Cutts; the entrance was near the angle made by the railroad and the highway. The Fifty-third Regiment of Infantry, Massachusetts Volunteer Militia, while its ranks were recruiting, was encamped on this ground. The regiment was raised from Groton and Clinton, Leominster, Fitchburg and other towns in the neighborhood belonging to Worcester County, and was mustered into the public service for nine months.

Special Order, No. 916, issued by the Adjutant-General of the Commonwealth, September 19, 1862, contains the following:

"A camp of rendezvous is established at Groton Junction, Middlesex Co., where barracks are being built, which is designated Camp Stevens. Capt. W. C. Sawyer, 23d Regt. Mass. Vols., is appointed Commandant. Due notice will be given when the barracks are ready for use."

Special Order, No. 955, under the date of September 23d, has the following:

"Lindsey Tilden [Charles Linzee Tilden], 20th Regt. Mass. Vols., is detailed for Post Adjutant at Camp Stevens, Groton."

The camp was so named in memory of General Isaac Ingalls Stevens, a native of Andover and a graduate of West Point, who was killed in the battle of Chantilly, Virginia, on September 6, 1862, only a fortnight before the camp was established.

The commandant was Wesley Caleb Sawyer, born in the adjoining town of Harvard, on August 26, 1839, who graduated at Harvard College in the class of 1861. Soon after leaving Cambridge he was commissioned, on October 8, 1861, as a captain in the Twenty-third Massachusetts Volunteers, and he left the State with that regiment. He was attached to Burnside expedition, that went to North Carolina; in the battle of Newbern, March 14, 1862, he was severely wounded, which resulted in the amputation of his left thigh, and necessarily prevented him from further participation in an active campaign.

The regiment left Camp Stevens on Saturday, November 29th, for New York, where it remained until January 17, 1863, at which time it embarked for New Orleans. Subsequently to the departure of the troops from Groton, the following order was issued:

"COMMONWEALTH OF MASSACHUSETTS,

"HEAD QUARTERS, BOSTON, Dec. 20, 1862.

"Special Order, No. 1311.

"The troops which were enlisted and mustered into service at Camp Stevens, Groton Junction, having left the Commonwealth for the seat of war, Capt. Wesley C. Sawyer, Commandant of the Camp, is relieved from further service, and I am directed by His Excellency, the Commander-in-Chief, to thank Capt. Sawyer for the acceptable manner in which he has performed the duties of his post.

"By order of the Commander-in-Chief,

"WILLIAM SCHOLLER,

"Adj. General."

Since the war Captain Sawyer has studied at Göttingen, Germany, where he received the degree of Doctor of Philosophy. He has held the professorship of Philosophy and Rhetoric at Lawrence University, Appleton, Wisconsin, but is now connected, as a professor, with the Normal School at Oshkosh, Wisconsin.

The barracks and other structures used by the soldiers at Camp Stevens have long since disappeared, and not a trace of the former occupation is to be seen. Years ago some of the buildings were taken down, and the rest were removed, mostly to Ayer. George James Burns, Esq., a lawyer of that town, wrote an interesting article for *The Groton Landmark*, June 25, 1887, which traces the history of many of these buildings.

In the autumn of 1862, Dr. Edward Jarvis, of Dorchester, was appointed by Surgeon-General Dale to visit the various camps in the State, of which there were ten, and report on their sanitary condition. The result of his labors may be found in two communications printed in *The Boston Medical and Surgical Journal* for December 4 and 11, 1862 (LXVII. 364-367 and 381-384, respectively), wherein he makes some criticism on Camp Stevens.

According to the "Record of Massachusetts Volunteers, 1861-65" (I. 390-392), the following soldiers

died in camp at Groton: Henry A. Waters, of Shirley, Co. D, on October 25, 1862; Spencer Stockwell, of Athol, Co. E, November 20th; and Daniel P. Hemmenway, of Barre, Co. F, December 1st.

The veterans of the war have organized a post of the Grand Army of the Republic, which is called the E. S. Clark Post, No. 115. It is named after Major Eusebius Silsby Clark, of Groton, a gallant officer of the Twenty-sixth Massachusetts Volunteers, who was mortally wounded at Winchester, Virginia, on September 19, 1864, and died on October 17, 1864.

THE POPULATION OF GROTON AT DIFFERENT TIMES.—The town of Groton was formerly a much more important place relatively, both in size and influence, than it is at the present time. According to the census of 1790, it was then the second town in Middlesex County, Cambridge alone having a larger population. At that time Groton had 322 families, numbering 1840 persons; and Cambridge, 355 families, numbering 2115 persons. Charlestown had a population of 1583, and Newton, 1360. Reading, with 341 families (nineteen more than Groton), numbered 1802 persons (thirty-eight less than Groton). Woburn then had a population of 1727; Framingham, 1598; Marlborough, 1554, and Waltham, 882. Pepperell contained 1132 inhabitants; Shirley, 677; Westford, 1229, and Littleton, 854.

There were at that time in Middlesex County forty-one towns, which number has since been increased to forty-seven towns and seven cities; and in the meanwhile Brighton and Charlestown have been merged in the municipality of Boston, and thus have lost their separate existence. Major Aaron Brown, of Groton, and General Henry Woods, of Pepperell, were the marshals who took the census of the county, with the exception of that small portion lying on the further side of the Merrimack River.

A comparison of the population of the town at different periods is somewhat interesting to those familiar with its history. John Tinker, in a petition to the General Court, dated October, 1659, four years after the incorporation of the town, says that the plantation "Continueth vnpeopled." The report of the committee,—of which Thomas Danforth was chairman,—dated May 23, 1661, and already quoted, states that there were four or five families "planted" at that time. In March, 1676, when the town was burned by the Indians, it was estimated by the Rev. William Hubbard, in his narrative, that there were then sixty families in the place. Another writer of that period puts the number of dwellings destroyed at sixty-six, and says that only six houses were left standing. From these estimates it would appear that the population of the town at the time of its destruction was between 300 and 350 inhabitants. From March, 1676, until the early spring of 1678 the settlement was abandoned and entirely deserted. In March, 1680, there were forty families in the town, as appears by some statistical returns printed in "The

New England Historical and Genealogical Register" (V. 173) for April, 1851. In March, 1707-8, there were sixty-seven polls ("Collections of the American Statistical Association," p. 146), which would indicate a population of about 300 persons. At the beginning of the year 1755 there were fourteen negro slaves in town—seven men and seven women—who were sixteen years old or upwards.

On June 2, 1763, Governor Francis Bernard sent a message to the General Court, expressing his wish that a census of the Province might be taken; but that body paid no heed to the suggestion. On January 19, 1764, he renewed the proposition, and apparently with better success; for the Legislature, on February 2d, adopted an order carrying out his wishes. The popular heart, however, was not in the work, and no interest was taken in the measure. The people were suspicious of the rulers in England, and jealous of all political interference; and it is but natural that the census proceeded slowly. On March 5, 1765, an act was passed by the General Court to carry into effect an order which had previously been passed for numbering the people within the Province. This action shows that the Governor's pet scheme was not receiving a warm support.

With these drawbacks, and under such conditions, the first census of the houses, families and number of people in the Province of Massachusetts Bay ever taken was finished in the year 1765. Singularly enough, there are now no returns of this enumeration among the Provincial or State Archives, where they were undoubtedly placed. How or when they disappeared is a matter of conjecture; but probably they were lost amid the confusion that naturally prevailed during the Revolutionary period. Fortunately a copy of this census was found by the late Judge Samuel Dana, of Groton, among some papers of a deceased friend, which had then lately come into his possession; and by him sent to the *Columbian Centinel* newspaper, where it was printed for the first time in the issue of August 17, 1822, more than half a century after the enumeration was made. From this source is derived all the information concerning the figures of the census of 1765; and the printed copy, in the absence of any other, is an authority second in importance only to the original manuscript returns. At that time the town of Groton had 1408 inhabitants.

Akin to this subject, there is in the Library of the Massachusetts Historical Society a memorandum-book, which contains some interesting facts connected directly or indirectly with the population of the Commonwealth during the Revolutionary period. According to this authority the population of Groton in the year 1776 was 1639; the number of ratable polls in 1778 was 362, and the number in 1781 was 395.

In compliance with a resolution of Congress, an act was passed by the General Court of Massachu-

setts on July 2, 1784, requiring the assessors of towns to make certain returns, from which it appears that there were at that time 418 polls in Groton. This was the largest number returned by any town in the county, with the single exception of Cambridge, which had 457 polls; and after Groton came Reading with 399 polls, and Woburn with 395, followed closely by Framingham with 389.

At the several decennial dates of the United States census, the population of Groton has been as follows: In the year 1790, 1,840; 1800, 1,802; 1810, 1,886; 1820, 1,897; 1830, 1,925; 1840, 2,139; 1850, 2,515; 1860, 3,193; 1870, 3,584, and 1880, 1,862. The town of Ayer was incorporated on February 14, 1871, and made up almost entirely from the territory of Groton, which accounts for the great diminution in the population between the last two decennial periods, as given above. The new town started on its corporate existence with a population nearly equal to that of the parent town, and, with all the vigor of youth, soon surpassed it in size.

The population of Groton, as taken by the State in the quinquennial years, has been as follows: In the year 1855, 2,745; 1865, 3,176; 1875, 1,908, and 1885, 1,987. By all the enumerations, National or State, made during the present century, it will be seen that there has been a steady increase in the population of the town, with the exception of the period between the years 1860 and 1865, when there was a slight decrease of seventeen inhabitants, and of the period between 1875 and 1880, when there was a falling off of forty-six inhabitants. The loss in the first instance was due, of course, to the disturbing effects of the Civil War.

The population of Ayer in the year 1885 was 2190; and if that village had not been separately incorporated, the population of Groton would now be considerably more than 4000 inhabitants. According to the last State census there were thirty-two towns or cities in Middlesex County larger than Groton, and twenty-one towns smaller.

The original Groton Plantation, as granted by the General Court on May 25, 1655, has furnished the entire territory of Ayer; the whole of Pepperell, with the exception of a narrow strip lying along its northern boundary, which once belonged to the West Parish of Dunstable (Hollis); the whole of Shirley, with the exception of a small portion formerly known as "Stow Leg;" one-half of Dunstable; and has contributed more or less to form five other towns, namely, Harvard, Littleton and Westford (including a part of Forge Village), in Massachusetts, besides Nashua and Hollis, in New Hampshire. The total population of this territory is now more than 10,000 inhabitants.

SUMMARY.—*Population of Groton at Different Times.*—Town incorporated on May 25, 1655; in October, 1659, "vnpeopled;" in May, 1661, four or five families; in March, 1676, about 300 inhabitants; in

March, 1680, forty families; in March, 1708, 67 polls; in March, 1765, 1408 inhabitants; in 1776, 1639 inhabitants; in 1778, 362 polls; in 1781, 395 polls, and in 1784, 418 polls.

Year.	Inhabitants.	Year.	Inhabitants.
1790	1840	1855	2745
1800	1802	1860	3193
1810	1886	1865	3176
1820	1897	1870	3584
1830	1925	1875	1908
1840	2139	1880	1862
1850	2515	1885	1987

The approximate population of the town, under the national census of 1890, is 2071, though these figures are subject to change in the official count.

SLAVERY IN GROTON.—During a long period before the Revolution, Groton had one element in her population which does not now exist, and which to-day has disappeared from almost the whole civilized world. At the beginning of the year 1755 there were fourteen negro slaves in town, seven men and seven women, who were sixteen years old or upwards. At that time Townsend had three slaves, two men and one woman; Shirley had one, a man; and Pepperell made no return of having any. Westford had five, but the sex is not given. These facts are gathered from a census of negro slaves in Massachusetts, ordered by the Province, which is published in the third volume, second series, of the Collections of the Massachusetts Historical Society (pages 95-97).

William Banks, a negro or mulatto, was married at Groton on December 21, 1719, by Francis Fullam, a justice of peace, to Hannah Wansamug. William appears to have been a slave belonging to Eleazer Robbins, of Groton, and Hannah was an Indian, who is called in the records "late of Lancaster;" but unfortunately the marriage was not a happy one. With all confidence in her husband, the wife bought his freedom, when he proved false to his plight and promise, and deserted her. The story, told in her own words, is found in the Journal of the Massachusetts House of Representatives, June 13, 1724 (page 39):

"A Petition of Hannah Banks Indian, shewing that she bought of Eleazer Robbins of Groton his Servant Man's Time, and gave a Bond of £. 15 for Payment of the same, that afterwards she married the said Servant Man, who is since absconded, and the said Robbins hath put the said Bond in Suit, and cast the Petitioner into Prison in Boston, that the Principal Debt with the Charges hath arisen to £. 25 which Mr. Edward Ruggles of Roxbury hath paid for her, praying this Court would please to enable the said Edward Ruggles to Sell such a part of her Land in Natick, as will satisfy him for his advance of said Twenty-Five Pounds.
"Read and committed to the Committee for Petitions."

The following advertisement, not an unusual one for that period, appears in *The Boston Evening-Post*, July 30, 1739:

RAN away from his Master, Mr. John Woods of Groton, on Thursday the 12th of this Instant July, a Negro Man Servant named Caesar, about 22 Years of Age, a pretty short well sett Fellow. He carried with him a Blue Coat and Jacket, a pair of Tow Breeches, a Castor Hat, Stockings and Shoes of his own, and a Blue Cloth Coat with silver'd Metal Buttons, a white flower'd Jacket, a good Beaver Hat, a Gray Wigg, and a pair of new Shoes of his Master's, with some other things. It is suspected there is some white Person that may be with him, or design to make Use of his Master's Apparel above described.

Whoever shall take up the said Servant, and bring him to his above-said Master in Groton, or be a Means of convicting any person or Confederate with said Servant as above suspected, shall have Five Pounds Reward for each of them, and all necessary Charges paid.

Another advertisement appears in *The Boston Gazette and Country Journal*, June 13, 1774, as follows:

Ten Dollars Reward.

RAN AWAY from the Subscriber, Joseph Moors, of Groton, in the County of Middlesex, and Province of Massachusetts-Bay, a Molatto Man Servant, named TITUS, about 20 Years of Age, of a middling Stature, wears short curl'd Hair, has one of his Fore-Teeth broke out, took with him a blue Surdan, a Snuff-coloured Coat, and a Pair of white wash'd Leather Breeches, a Pair of new Cow-Hide Pumps and a Fur'd Hat with large Brims, and sundry other Articles of Weariog Apparel.—Whoever will take up said Servant and confine him in any of his Majesty's Goals, so that the Owner may have him again, shall have TEN DOLLARS Reward and all necessary Charges paid, by
JOSEPH MOORS.

All Masters of Vessels and others, are hereby Caution'd against Harboursing, Concealing, or carrying off said Servant, as they would thereby incur the Penalty of the Law.

The following marriage is entered in the church records under the date December 28, 1742: "Priamus (Cap' Boydens Negro man servant []) to Margr. Molatto formerly servant to S. S. both of Groton." It is also recorded that Margaret, the servant of Samuel Scripture, Jr., was baptized on January 30, 1733-34, and that she owned the church covenant at the same time. The initials "S. S." stand for Samuel Scripture. This negro couple was afterward blessed with a family of children, and they lived on the west side of the Nashua River, a short distance north of the county road to Townsend. His surname was Lew or Lue, and his given name became contracted into Primus; and to this day the rise of ground, near the place where the Pepperell road leaves the main road, is known as Primus Hill, so called after him. Mr. Butler thinks that perhaps Margaret's name was Lew. See his History (page 454). Their oldest child, —Zelah, a corruption of Barzillai,—born at Groton on November 5, 1743, was a famous musician, who lived at Dracut and the father of numerous children who were also musicians. He was a fifer in Captain John Ford's company of the twenty-seventh Massachusetts Regiment, in service at the siege of Boston, and was present at the Battle of Bunker Hill.

About the year 1740 there was a negro slave in Groton by the name of Boad, who used to look after the cattle sent up to Groton Gore in the spring to be pastured during the summer. See "The Boundary Lines of Old Groton" (page 37). The church records contains the entry of the baptism of Hagar, a servant of William Green, on August 1, 1765.

Akin to the subject of slavery in Groton is this item, from *The Groton Landmark*, November 14, 1885:—

"Gov. Boutwell has in an old scrap-book the following interesting Memorandum:

"August, 1856.

"Noah Shattuck, esq., informs me that there were eleven slaves in Groton when slavery was abolished, and he mentioned the following names: Chloe Williams, Phillis Cutler, Phillis Sartell, Ichabod

Davis, Fanny Borleo and William Case. Phineas Wait also owned one slave."

Noah Shattuck, a son of Job and Sarah (Hartwell) Shattuck, was born on August 30, 1772, and died on September 23, 1858.

The following entry is found in the town records, and refers to the last survivor of negro slavery within the limits of the town. The institution was abolished by the adoption of the State Constitution in the year 1780, the courts holding that the Bill of Rights swept away the remnants of involuntary servitude:

"Phillis Walby, servant to Josiah Sawtell, Jun., deceased, died at Groton, aged 79, February —, 1821."

The following extract from the town records refers to Titus, who is advertised as a runaway in *The Boston-Gazette, and Country Journal*, June 13, 1774, as mentioned above. The advertiser was a son of Abraham Moors, the owner of Zebina, the slave-mother:

"Titus, a molatto boy born of Zebinah, a negro slave to Mr. Abraham Moors, March —, 1751."

A LIST OF THE TOWN CLERKS (from the year 1662 to the present time, with the dates of their election and terms of service. In this list the years are given according to the new style of reckoning, and in specifying dates, small fractions of years are overlooked. The town was attacked by the Indians in the spring of 1676, and abandoned by the inhabitants until March, 1678.

The earliest records of the town were written by Richard Sawtell, and begin on June 23, 1662, though his election as town clerk was not recorded until December 24, 1662. During the period since that date there have been thirty-four town clerks, of whom five, namely, Jonathan Morse, William Longley, Jr., James Blanchard, Jonathan Sheple and Samuel Rockwood, died while in office—Longley being killed by the Indians on July 27, 1694. During the early part of 1682 Captain James Parker, Richard Blood and Jonas Prescott made entries in the records, though no one of them appears to have been at the time town clerk. Jonathan Morse was the first who signed the records with his name, though the practice with him was not constant. William Longley, William Longley, Jr., and John Langley were representatives of three successive generations in the same family, being father, son and grandson. On December 9, 1687, William Longley, Jr., was chosen clerk, but he acted as such during only a part of the next town meeting on May 21, 1688, when he was followed by Josiah Parker, who made the entry for so much of that meeting as occurred after his election. Mr. Bingham, the present occupant, has filled the position for more than thirty-five years continuously—by far the longest term of service of any town clerk. Joseph Lakin, with a record of seventeen years, comes next to him in length of time. Of all the persons mentioned in the list, only the last three are now living, namely, Mr. Boutwell, Mr. Parker and Mr. Brigham; and their combined

term of service covers just forty-four years. Since the death of Mr. Park, which took place on September 23, 1875, these three have been the only survivors. Mr. Butler died on October 7, 1854, and Mr. Boynton on November 30, 1854—less than eight weeks apart.

Date of Election.

December 24, 1652, Richard Sawtell, 1662-1664.
 January 27, 1665, James Fisk, 1665.
 December 2, 1665, William Longley, 1666, 1667.
 December 11, 1667, Joho Page, 1668.
 November 11, 1668, Richard Blood, 1669.
 November 10, 1669, John Morse, 1670-1676.
 (Town abandoned during two years.)
 1678, James Parker, 1678, 1679.
 December 23, 1679, John Morse, 1680, 1681.
 1682, Jonathan Morse (died July 31, 1686), 1682-1686.
 December 10, 1686, Josiah Parker, 1686, 1687.
 December 9, 1687, William Longley, Jr., 1688 (a short time only).
 May 21, 1688, Josiah Parker, 1688-1691.
 December 10, 1691, Jonas Prescott, 1692.
 December 12, 1692, William Longley, Jr. (killed July 27, 1694), 1693-1694.
 March 4, 1695, James Blanchard, 1695.
 March 3, 1696, Jonas Prescott, 1696.
 December 10, 1696, James Blanchard (died Feb., 1704), 1697-1701.
 March 8, 1704, Thomas Tarbell, 1704, 1705.
 March 5, 1706, Joseph Lakin, 1706-1722.
 March 5, 1723, John Longley, 1723-1726.
 March 7, 1727, Joseph Lakin, 1727.
 March 5, 1728, John Longley, 1728, 1729.
 March 3, 1730, Jonathan Sheple, 1730.
 March 2, 1731, Thomas Tarbell, Jr., 1731-1733.
 March 5, 1734, Jonathan Sheple, 1734-1744.
 March 5, 1745, Thomas Tarbell, Jr., 1745-1756.
 March 1, 1757, Abel Lawrence, 1757-1764.
 March 5, 1765, Oliver Prescott, 1765-1777.
 March 3, 1778, Isaac Farnsworth, 1778-1781.
 March 5, 1782, Abel Bancroft, 1782, 1783.
 March 2, 1784, Jonathan Keep, 1784.
 March 1, 1785, Abel Bancroft was chosen, but declined.
 March 1, 1785, Isaac Farnsworth, 1785-1787.
 March 4, 1788, Nathaniel Sattel was chosen, but declined.
 March 10, 1788, Joseph Shed, 1788-1794.
 March 3, 1795, Samuel Lawrence, 1795-1798.
 March 5, 1799, Samuel Rockwood (died May 29, 1804), 1799-1804.
 June 18, 1804, Oliver Prescott, Jr., 1804-1810.
 March 5, 1811, Joseph Mansfield, 1811-1811.
 March 7, 1815, Caleb Butler, 1815-1817.
 March 3, 1818, Joseph Mansfield, 1818.
 March 2, 1819, Noah Shattuck, 1819-1822.
 March 3, 1823, Caleb Butler, 1823-1831.
 March 6, 1832, John Boynton, 1832, 1833.
 March 4, 1834, John Gray Park, 1834-1836.
 March 6, 1837, John Boynton, 1837-1845.
 March 3, 1846, George Sewall Boutwell, 1846-1850.
 March 4, 1851, John Warren Parker, 1851-1854.
 March 5, 1855, George Dexter Brigham, 1855-

A LIST OF THE TREASURERS (so far as they are found in the town records, with the dates of their election and terms of service).—Alden Warren served during twenty-four years, which is the longest term of any treasurer; and next to him, in length of service, was Benjamin Bancroft, who filled the office for seventeen years. After him came Calvin Boynton, who served during sixteen years, and then Capt. Ephraim Sawtell, with a term of fifteen years. William Livermore, who was treasurer in 1845, is the senior survivor; and, with the exception of the brothers George and Walter Shattuck, all his successors are still alive.

Date of Election.	Date of Election.

THE OLD STORES AND THE POST-OFFICE OF GROTON.—Tradition has preserved little or nothing in regard to the earliest trading-stores of Groton. It is probable, however, that they were kept in dwelling-houses by the occupants, who sold articles in common use for the convenience of the neighborhood, and at the same time pursued their regular vocations.

Jonas Cutler was keeping a shop on the site of Mr. Gerrish's store before the Revolution, and the following notice, signed by him, appears in *The Massachusetts Gazette* (Boston), November 28, 1768:

"A THIEF.

"Whereas on the 19th or 20th Night of November Instant the Shop of the Subscriber was broke open in Groton, and from thence was stolen a large Sum of Cash, viz, four Half Johannes, two Guineaes, two Half Ditto, One Pistole mill'd, nine Crowns, a Considerable Number of Dollars, with a considerable Quantity of small Silver & Copper, together with one Bever Hat, about fifteen Yards of Holland, eleven Bandannas, blue Ground with white, twelve red ditto with white, Part of a Piece of Silk Romalls, 1 Pair black Worsted Hose, 1 strip'd Cap, 8 or 10 black barcelona Handkerchiefs, Part of a Piece of red silver'd Ribband, blue & white do, Part of three Pieces of black Satin Bibband, part of three pieces of black Tafferty ditto, two bundles of Razors, Part of 2 Dozen Penknives, Part of 2 Dozen ditto with Seal, Part of 1 Dozen Snuff Boxes, Part of 3 Dozen Shoe Buckels, Part of several Groce of Buttons, one Piece of yellow [yellow?] Ribband, with sundry Articles not yet known of— Whoever will apprehend the said Thief or Thieves, so that he or they may be brought to Justice, shall receive TEN DOLLARS Reward and all necessary Charges paid. JONAS CUTLER.

"Groton, Nov. 22, 1763 [8].

"If any of the above mentioned Articles are offered to Sell, it is desired they may be stop'd with the Thief, and Notice given to said Cutler or to the Printers."

On October 21, 1773, a noted burglar was hanged in Boston for various robberies committed in different parts of the State, and covering a period of some years. The unfortunate man was present at the delivery of a sermon by the Reverend Samuel Stillman, preached at his own request, on the Sunday before his execution; and to many of the printed copies is appended an account of his life. In it the poor fellow states that he is only twenty-one years old, and that he was born in Groton of a respectable family. He confessed that he broke into Mr. Cutler's shop, and took away "a good piece of broad-cloth, a quantity of silk mitts and several pieces of silk handker-

chiefs." He was hardly seventeen years of age at the time of this burglary. To the present generation it would seem cruel and wicked to hang a misguided youth for offences of this character.

Mr. Cutler died on December 19, 1782; and he was succeeded in business by Major Thomas Gardner, who erected the building formerly known as Gerrish's Block, which was moved away in the summer of 1885. Major Gardner lived in the house now owned by the Watters family.

Near the end of the last century a store, situated a little north of the late Benjamin Perkins Dix's house, was kept by James Brazer, which had an extensive trade for twenty miles in different directions. It was here that the late Amos Lawrence served an apprenticeship of seven years, which ended on April 22, 1807; and he often spoke of his success in business as due, in part, to the experience in this store. Late in life he wrote that "the knowledge of everyday affairs which I acquired in my business apprenticeship at Groton has been a source of pleasure and profit even in my last ten years' discipline."

The quantity of New England rum and other liquors sold at that period would astonish the temperance people of the present day. Social drinking was then a common practice, and each forenoon some stimulating beverage was served up to the customers in order to keep their trade. There were five clerks employed in the establishment; and many years later Mr. Lawrence, in giving advice to a young student in college, wrote:

"In the first place, take this for your motto at the commencement of your journey, that the difference of going *just right*, or a *little wrong*, will be the difference of finding yourself in good quarters, or in a miserable bog or slough, at the end of it. Of the whole number educated in the Groton stores for some years before and after myself, no one else, to my knowledge, escaped the bog or slough; and my escape I trace to the simple fact of having put a restraint upon my appetite. We five boys were in the habit, every forenoon, of making a drink compounded of rum, raisins, sugar, nutmeg, &c., with biscuit,—all palatable to eat and drink. After being in the store four weeks, I found myself admonished by my appetite of the approach of the hour for indulgence. Thinking the habit might make trouble if allowed to grow stronger, without further apology to my seniors I declined partaking with them. My first resolution was to abstain for a week, and, when the week was out, for a month, and then for a year. Finally, I resolved to abstain for the rest of my apprenticeship, which was for five years longer. During that whole period, I never drank a spoonful though I mixed gallons daily for my old master and his customers." 1

The following advertisement is found in the *Columbian Centinel* (Boston), June 8, 1805:

"James Brazer,

Would inform the public that having dissolved the Copartnership lately subsisting between AARON BROWN, Esq. SAMUEL HALE and the Subscriber; he has taken into Copartnership his son WILLIAM F. BRAZER, and the business in future will be transacted under the firm

JAMES BRAZER & SON;

They will offer for sale, at their store in Groton, within six days a complete assortment of English, India, and W. India GOODS, which they will sell for ready pay, at as low a rate as any store in the Country.

"Groton, May 29, 1805."

"JAMES BRAZER.

"Squire Brazer," as he was generally called, was a man of wealth and position. He was one of the founders of Groton Academy, and his subscription of £15 to the building fund in the year 1792 was as large as that given by any other person. In the early part of this century he built the house now belonging to the academy and situated just south of it, where he lived until his death, which occurred on November 10, 1818. His widow, also, took a deep interest in the institution, and at her decease, April 14, 1826, bequeathed to it nearly five thousand dollars.

After Mr. Brazer's death the store was moved across the street, where, until the summer of 1885, it remained, forming the wing of Gerrish's Block. The post-office was in the north end of it during Mr. Butler's term as postmaster. About this time the son, William Farwell Brazer, built a store nearly opposite to the Academy, which he kept during some years. It was made finally into a dwelling-house, and occupied by the late Jeremiah Kilbourn.

The brick store opposite to the High School was built in the year 1835, by Henry Woods, for his own place of business, and afterwards kept by him and George S. Boutwell, the style of the firm being Woods & Boutwell. Mr. Woods died on January 12, 1841, and he was succeeded by his surviving partner, who carried on the store for a long time, even while holding the highest executive position in the State. In the spring of 1855, when he began to practice law, Governor Boutwell sold out the business to Brigham & Parker. The post-office was in this building during the years 1839 and 1840 and until April, 1841. For the past thirty years it has been occupied by various firms, but is now kept by John H. Sheedy & Company.

During the last war with England, Eliphalet Wheeler had a store where Miss Betsey Capell and her sisters, Sarah and Catherine, in more modern times, kept a haberdasher's shop. It is situated opposite to the Common, and is now used as a dwelling-house. They were daughters of John Capell, who owned the saw-mill and grist-mill, which formerly stood on the present site of the Tileston and Hollingsworth paper-mills, on the Great Road, northwest of the village. Afterward Wheeler and his brother, Abner, took Major Thomas Gardner's store, where he was followed by William F. Brazer, Park & Woods, Park & Potter, Potter & Gerrish and lastly by Charles Gerrish, who kept it for more than thirty years. It was given up as a store in July, 1884, and has since been moved away and made into a tenement-house.

Near the beginning of the present century there were three military companies in town: the Artillery Company, commanded at one time by Captain James Lewis; the North Company, by Captain Jonas Gilson, and the South Company, by Captain Abel Tarbell. Two of these officers were soon promoted in the regimental service; Captain Tarbell to a col-

oneley, and Captain Lewis to a majorate. Captain Gilson resigned and was succeeded by Captain Noah Shattuck. They had their spring and fall training-days, when they drilled as a battalion on the Common,—there were no trees there then,—and marched through the village. They formed a very respectable command, and sometimes would be drawn up before Squire Brazer's store, and at other times before Major Gardner's, to be treated with toddy, which was then considered a harmless krink.

David Child had a store, about the beginning of the century, at the south corner of Main and Pleasant Streets, nearly opposite to the site of the Orthodox meeting-house, though Pleasant Street was not then laid out. It was subsequently occupied by Deacon Jonathan Stow Adams, then by Artemas Wood, and lastly by Milo Henry Shattuck. This was moved off nearly twenty years ago, and a spacious building put up a few rods north, on the old tavern site across the way, by Mr. Shattuck, who still carries on a large business.

Alpheus Richardson kept a book-store, about the year 1815, in his dwelling, at the south corner of Main and Elm Streets, besides having a book-binding in the same building. Soon afterward an L was added to the house, and for a short time he carried on a country variety store in connection with his other business. The book-store and binder's shop were continued until about 1850. It is said that this house was built originally by Colonel James Prescott, for the use of his son, Abijah, as a store; but it never was so occupied by him.

Joseph and Phineas Hemenway, uncles of the late Augustus Hemenway, of Boston, built a store on the north corner of Main and Elm Streets, about the year 1815, where they carried on a trading business. They were succeeded by one Richardson, then by David Childs; and finally by John Hamilton Spalter, who had for many years a book-store and binder's shop in the building, which is now used as a dwelling-house. At the present time Mr. Spalter is living in Keene, New Hampshire.

About the year 1826, General Thomas Adams Staples built and kept a store on Main Street, directly north of the Orthodox meeting-house. He was followed successively by Benjamin Franklin Lawrence, Henry Hill and Walter Shattuck. At one time the style of the firm was Shattuck, Brown & Company. The building was burned down very early on Tuesday morning, November 17, 1874, and its site is now occupied by Dr. David Roscoe Steere's house.

In November, 1844, a large building was moved from Hollis Street to the corner of Main and Court Streets. It was put up originally as a meeting-house for the Second Adventists or Millerites, as they were called in this neighborhood, after William Miller, one of the founders of the sect; and during the following winter and spring it was fitted up in a com-

modious manner, with shops in the basement and a spacious hall in the second story. The building was known as Liberty Hall, and formed a conspicuous structure in the village. It was first occupied by tenants in July, 1845. The post-office was kept there while Mr. Lothrop and Mr. Andrus were the post-masters. It was used as a shoe-store, a grocery and a bakery, when, on Sunday, March 31, 1878, it was burned to the ground.

The brick store, owned by the Dix family, was built and kept by Aaron Brown, near the beginning of the century. He was followed by Moses Carleton, and after him came —— and Merriam, and then Benjamin P. Dix. It is situated at the corner of Main Street and Broad Meadow Road, and is now used as a dwelling-house. A very good engraving of this building is given in *The Groton Herald*, May 8, 1830, which is regarded by persons who remember it at that time as a faithful representation, though it has since undergone some changes.

Near the end of the last century Major William Swan traded in the house now occupied by Charles Woolley, Jr., north of the Common, near the old burying-ground. It was Major Swan who set out the elms in front of this house, which was the Rev. Dr. Chaplin's dwelling for many years.

At the beginning of this century two daughters of Isaac Bowers, a son of Landlord Bowers, had a dry-goods shop in the house owned and occupied by the late Samuel William Rowe, Esq. About the year 1825 Walter Shattuck opened a store in the building originally intended for the Presbyterian Church, opposite to the present entrance of the Groton Cemetery. Before the Revolution there was a store kept by Jonathan Clark Lewis, near the site of Captain Asa Stillman Lawrence's house, north of the Town Hall. Mr. Lewis was an Englishman by birth, and died on April 7, 1781. See "Groton Epitaphs" for a cut of the family coat-of-arms, which appears on his grave-stone. There was a trader in town, Thomas Sackville Tufton by name, who died in the year 1778, though I do not know the site of his shop. Captain Samuel Ward, a native of Worcester, and an officer in the French and Indian War, was engaged in business at Groton some time before the Revolution. He removed to Lancaster, where at one time he was the town clerk, and died there on August 14, 1826.

The Groton Post-Office.—The Groton post-office was established at the very beginning of the present century, and before that time letters intended for this town were sent through private hands. Previous to the Revolution there were only a few post-offices in the Province, and often persons in distant parts of Massachusetts received their correspondence at Boston. In *The Boston Gazette, or County Journal*, June 30, 1755, a letter is advertised for Samuel Bowers, of Groton, who at that time kept a tavern; and in the same newspaper of August 4, 1755, another is advertised for Captain Samuel Parker, and one for Dudley

Woodbridge, who lived probably at Groton, Connecticut. It is also stated that "none of the above Letters came by the last mails." In the supplement to *The Boston Gazette*, February 9, 1756, letters are advertised as remaining uncalled for, at the Boston office, addressed to William Lakin and Abigail Parker, both of Groton, as well as to Samuel Manning, Townsend; William Gleany, Dunstable; and Jonathan Lawrence, Littleton. Nearly five months afterward letters—and perhaps these identical ones—are advertised for the same persons in *The Boston Weekly News-Letter*, July 1, 1756, as still uncalled for. The name of David Farnum, America, appears also in this list, and it is hoped that wherever he was he received the missive. The names of Oliver Lack (intended for Lakin) and Ebenezer Parker, both of this town, are given in another list printed in the *Gazette* of June 28, 1762; and in the same issue one is advertised for Samuel Starling, America. In the supplement to the *Gazette*, October 10, 1768, Ebenezer Farnsworth, Jr., and George Pierce, of Groton, had letters advertised; and in the *Gazette* October 18, 1773, the names of Amos Farnsworth, Jonas Farnsworth and William Lawrence, all of this town, appear in the list. In the *Columbian Centinel* (Boston), January 29, 1794, a letter is advertised for Benjamin Tarbel, of Groton.

I find no record of a post-rider passing through Groton, during the period immediately preceding the establishment of the post-office; but there was doubtless such a person who used to ride on horseback, equipped with saddle-bags, and delivered at regular intervals the weekly newspapers and letters along the way. In the year 1794, according to the History of New Ipswich, New Hampshire (page 129), a post-rider, by the name of Balch, rode from Boston to Keene one week and back the next. Probably he passed through this town and served the inhabitants with his favors.

Several years ago I procured, through the kindness of General Charles Devens, at that time a member of President Hayes's Cabinet, some statistics of the Groton post-office, which are contained in the following letter:

"POST-OFFICE DEPARTMENT, APPOINTMENT OFFICE,
WASHINGTON, D. C., September 3, 1877.

"HON. CHARLES DEVENS, Attorney-General, Department of Justice.

"SIR,—I have to acknowledge the receipt of a communication from Samuel A. Green, of Boston, Massachusetts, with your indorsement thereon, requesting to be furnished with a list of postmasters at the office of Groton, in that State, from the date of its establishment to the present time.

"In reply, I have the honor to inform you, that the fire which consumed the department building, on the night of the fifteenth of December, 1836, destroyed three of the earliest record-books of this office; but by the aid of the auditor's ledger-books, it is ascertained that the office began to render accounts on the first of January, 1801, but the exact day is not known. Samuel Dana was the first postmaster, and the following list furnishes the history of the office, as shown by the old records.

"Groton, Middlesex County, Massachusetts. Office probably established in November, 1800. Samuel Dana began rendering accounts January 1, 1801. Wm. M. Richardson, October 1, 1804.

"From this time the exact dates are known.

"Abraham Moore, appointed postmaster January 31, 1812.

Eliphalet Wheeler, August 20, 1815.

James Lewis, September 9, 1815.

Caleb Butler, July 1, 1826.

Henry Woods, January 15, 1839.

George S. Boutwell, January 22, 1841.

Caleb Butler, April 15, 1841.

Welcome Lothrop, December 21, 1846.

Artemas Wood, February 22, 1849.

George H. Brown, May 4, 1849.

Theodore Andruss, April 11, 1853.

George W. Fiske, April 22, 1861.

Henry Woodcock, February 13, 1867.

Miss Hattie E. Farnsworth, June 11, 1869, who is the present incumbent.

"Each postmaster held the office up to the appointment of his successor, but it is probable that Mr. Boutwell and Mr. A. Wood, although regularly appointed, did not accept, judging by the dates of the next postmasters.

"As to the 'Income' of the office, to which allusion is made, it is very difficult to obtain any of the amounts; but the first year and the last year are herewith appended, as follows:—

(1801)	FISCAL YEAR	(1876)
" First quarter, \$1.91		First quarter, \$314.15
Second " 2.13		Second " 296.94
Third " 2.93		Third " 305.71
Fourth " 5.29		Fourth " 294.28
For the year, \$12.26		For the year, \$1,211.08

"Trusting the foregoing, which is believed to be correct, will be acceptable to you, I am, sir, respectfully,

"Your obt' serv't,

"JAMES H. MARR,

"Acting First Ass't P. M. General."

It will be seen that the net income of the office, during the first seventy-five years of its existence, increased one hundred-fold.

This letter of the Acting First Assistant Postmaster-General supplements the account in Butler's "History of Groton" (pages 249-251). According to Mr. Butler's statement, the post-office was established on September 29, 1800, and the Honorable Samuel Dana was appointed the first postmaster. No mail, however, was delivered at the office until the last week in November. For a while it came to Groton by the way of Leominster, certainly a very indirect route. This fact appears from a letter written to Judge Dana, by the Postmaster-General, under the date of December 18, 1800, apparently in answer to a request to have the mail brought directly from Boston. In this communication the writer says:—

"It appears to me, that the arrangement which has been made for carrying the mail to Groton is sufficient for the accommodation of the inhabitants, as it gives them the opportunity of receiving their letters regularly, and with despatch, once a week. The route from Boston by Leominster, to Groton is only twenty miles farther than by the direct route, and the delay of half a day, which is occasioned thereby, is not of much consequence to the inhabitants of Groton. If it should prove that Groton produces as much postage as Lancaster and Leominster, the new contract for carrying the mail, which is to be in operation on the first of October next, will be made by Concord and Groton to Walpole, and a branch from Concord to Marlborough.

"I am, respectfully, sir, your obedient servant,

"JOS. HABERSHAM."

The amount of postage received from the office, after deducting the necessary expenses, including the postmaster's salary, was, for the first year after its establishment, about twelve dollars, or three dollars for three months. In the year 1802 it was thirty-six dollars, or nine dollars for three months, a large propor-

tional increase. At this time the mail came once a week only, and was brought by the stage-coach.

Samuel Dana, the first postmaster, was a prominent lawyer at the time of his appointment. He was the son of the Reverend Samuel Dana, of Groton, and born in this town June 26, 1767. He occupied a high position in the community, and exerted a wide influence in the neighborhood. At a later period he was president of the Massachusetts Senate, a member of Congress, and finally chief justice of the Circuit Court of Common Pleas. He died at Charlestown, on November 20, 1835.

Judge Dana kept the post-office in his own office, which was in the same building as that of the Honorable Timothy Bigelow, another noted lawyer. These eminent men were on opposite sides of the same entry, and generally on opposite sides of all important cases in the northern part of Middlesex County. The building stood on the site of Governor Boutwell's house, and is still remembered as the medical office of the venerable Dr. Amos Bancroft. It was afterward moved away, and now stands near the railway-station, where it is occupied as a dwelling-house. Judge Dana held the position during four years, and he was succeeded by William Merchant Richardson, Esq., afterward the chief justice of the Superior Court of New Hampshire. Mr. Richardson was a graduate of Harvard College in the class of 1797, and at the time of his appointment as postmaster had recently finished his professional studies in Groton, under the guidance of Judge Dana. After his admission to the bar Mr. Richardson entered into partnership with his former instructor, succeeding him as postmaster in July, 1804; and the office was still kept in the same building. During Judge Richardson's term the net revenue to the department rose from nine dollars to about twenty-eight dollars for three months. He held the position nearly eight years, and was followed by Abraham Moore, who was appointed on January 31, 1812.

Mr. Moore was a native of Bolton, Massachusetts, where he was born on January 5, 1785. He graduated at Harvard College in the class of 1806, and studied law at Groton with the Honorable Timothy Bigelow, and after his admission to the bar settled here as a lawyer. His office was on the site of the north end of Gerrish's Block, and it was here that the post-office was kept. During his administration the average income from the office was about thirty-three dollars for the quarter. In the summer of 1815 Mr. Moore resigned the position and removed to Boston.

Eliphalet Wheeler, who kept the store lately occupied by Mr. Gerrish, was appointed in Mr. Moore's stead, and the post-office was transferred to his place of business. He, however, was not commissioned, owing, it is thought, to his political views; and Major James Lewis, who was sound in his politics, received the appointment in his stead. Major Lewis retained Mr. Wheeler for a short time as his assistant, and

during this period the duties were performed by him in his own store. Shortly afterward Caleb Butler, Esq., was appointed the assistant, and he continued to hold the position for eight years. During this time the business was carried on in Mr. Butler's law-office, and the revenue to the government reached the sum of fifty dollars a quarter. His office was then in a small building,—just south of Mr. Hoar's tavern,—which was moved away about the year 1820, and taken to the lot where Colonel Needham's house now stands, at the fork of Main and Hollis Streets. It was fitted up as a dwelling, and subsequently moved away again. At this time the old store of Mr. Brazer, who had previously died, was brought from over the way, and occupied by Mr. Butler, on the site of his former office.

On July 1, 1826, Mr. Butler, who had been Major Lewis' assistant for many years and performed most of the duties of the office, was appointed postmaster.

Mr. Butler was a native of Pelham, New Hampshire, where he was born on September 13, 1776, and a graduate of Dartmouth College in the class of 1800. He had been the preceptor of Groton Academy for some years, and was widely known as a critical scholar. He had previously studied law with the Honorable Luther Lawrence, of Groton, though his subsequent practice was more in drawing up papers and settling estates than in attendance at courts. His name is now identified with the town as its historian. During his term of office as postmaster the revenue rose from fifty dollars to one hundred and ten dollars a quarter. He held the position nearly thirteen years, to the entire satisfaction of the public; but for political heresy he was removed on January 15, 1839, when Henry Woods was appointed his successor.

Mr. Woods held the office until his death, which occurred on January 12, 1841; and he was followed by the Hon. George S. Boutwell, since the Governor of the Commonwealth and a member of the United States Senate. During the administration of Mr. Woods and Mr. Boutwell the office was kept in the brick store, opposite to the present High School.

Upon the change in the administration of the National Government, Mr. Butler was reinstated in office on April 15, 1841. He continued to hold the position until December 21, 1846, when he was again removed for political reasons. Mr. Butler was a most obliging man, and his removal was received by the public with general regret. During his two terms he filled the office for more than eighteen years, a longer period than has fallen to the lot of any other postmaster of the town. Near the end of his service a material change was made in the rate of postage on letters; and in his History (page 251) he thus comments on it:

"The experiment of a cheap rate was put upon trial. From May 14, 1841, to December 31, 1844, the net revenue averaged one hundred and twenty-four dollars and seventy-one cents per quarter. Under the new law, for the first year and a half, the revenue has been one hundred and four dollars and seventy-seven cents per quarter. Had the former rates remained, the natural increase of business should have raised it to one hundred and fifty dollars per quarter. The department, which for

some years before had fallen short of supporting itself, now became a heavy charge upon the treasury. Whether the present rates will eventually raise a sufficient revenue to meet the expenditures, remains to be seen. The greatest difficulty to be overcome is evasion of the post-office laws and fraud upon the department."

Like many other persons of that period, Mr. Butler did not appreciate the fact that the best way to prevent evasions of the law is to reduce the rates of postage so low that it will not pay to run the risk of fraud.

Captain Welcome Lothrop succeeded Mr. Butler as postmaster, and during his administration the office was kept in Liberty Hall. Captain Lothrop was a native of Easton, Massachusetts, and a land surveyor of some repute in this neighborhood. Artemas Wood followed him by appointment on February 22, 1849; but he never entered upon the duties of his office. He was succeeded by George Henry Brown, who had published *The Spirit of the Times*, a political newspaper, during the Presidential canvass of 1848, and in this way had become somewhat prominent as a local politician. Mr. Brown was appointed on May 4, 1849; and during his term the office was kept in an L of his dwelling, situated nearly opposite to the Orthodox meeting-house. He was afterward the postmaster of Ayer. Mr. Brown was followed by Theodore Andruss, a native of Orford, New Hampshire, who was appointed on April 11, 1853. Mr. Andruss brought the office back to Liberty Hall, and continued to be the incumbent until April 22, 1861, when he was succeeded by George Washington Fiske. On February 13, 1867, Henry Woodcock was appointed to the position, and the office was then removed to the Town-House, where most excellent accommodations were given to the public. He was followed on June 11, 1869, by Miss Harriet Elizabeth Farnsworth, now Mrs. Marion Z. Putnam; and she in turn was succeeded on July 2, 1880, by Mrs. Christina Dakin (Caryl) Fosdick, the widow of Samuel Woodbury Fosdick, and the present incumbent.

The office is still kept in the Town-House, and there is no reason to think that it will be removed from the spacious and commodious quarters it now occupies, for a long time to come. This public building was erected in 1859, and the first town-meeting was held within its walls, on Tuesday, November 8th. of that year. The High School was first opened in the lower hall on Monday, December 5th, and the examination of classes for admission took place three days previously, on Friday, December 2d.

A semi-daily mail was established between Boston and Groton in the year 1849, during the early part of postmaster Brown's administration; and a tri-daily mail on Monday, April 18, 1887. The post-office was made a postal-order office on Monday, August 16, 1886, and raised to the rank of a Presidential office on February 15, 1890.

Few towns in the Commonwealth can present such an array of distinguished men among their postmas-

ters as that of Groton, including, as it does, the names of Judge Dana, Judge Richardson, Mr. Butler and Governor Boutwell. One of Judge Richardson's assistants was afterwards Postmaster-General of the United States. The Honorable Amos Kendall was studying law in his office at the time, and subsequently became Postmaster-General under Presidents Jackson and Van Buren, 1835-1840. In Mr. Kendall's "Autobiography" (Boston, 1872), edited by his son-in-law, William Stickney, it is said:

"During the residue of the year 1813 Mr. Kendall's studies [at Groton] were much interrupted by the business of the office, which devolved on him as the oldest student. He had charge of the post-office; received, made up and despatched the mails, delivered the letters and papers and made out the accounts. He was frequently sent on business to the neighboring towns, and employed in collecting office dues." (Page 78.)

West Groton is a small settlement that has sprung up in the western part of the town, dating back in its history to the last century. It is pleasantly situated on the banks of the Squannacook River, and in my boyhood was known as Squannacook, a much better name than the present one. It is to be regretted that so many of the old Indian words which have a local significance and smack of the region, should have been crowded out of the list of our geographical names. There is a small water-power here, and formerly a saw-mill, grist-mill and a paper-mill were in operation; but these have now given way to a factory where leather-board is made. The Peterborough and Shirley Branch of the Fitchburg Railroad passes through the place, and some local business is transacted in the neighborhood. As a matter of course, a post-office was needed in the village, and one was established on March 19, 1850. The first person to fill the office was Adams Archibald, a native of Truro, Nova Scotia, who kept it in the railway station.

The following is a list of the postmasters, with the dates of their appointment:

Adams Archibald, March 19, 1850.
Edmund Blood, May 25, 1868.
Charles Henry Hill, July 31, 1871.
George Henry Bixby, July 11, 1878.

During the postmastership of Mr. Blood, and since that time, the office has been kept in a store near the station, and for a long while the only one in the place.

A post-office was established at South Groton, on June 1, 1849, and the first postmaster was Andrew Boynton Gardner. The village was widely known as Groton Junction, and resulted from the intersection of several railroads. Here six passenger-trains coming from different points were due in the same station at the same time, and they all were supposed to leave as punctually.

The trains on the Fitchburg Railroad, arriving from each direction, and likewise the trains on the Worcester and Nashua Road from the north and the south, passed each other at this place. There was also a train from Lowell, on the Stony Brook Railroad, and

another on the Peterborough and Shirley Branch, coming at that time from West Townsend.

A busy settlement grew up, which was incorporated as a distinct town under the name of Ayer, on February 14, 1871, so called after the late James Cook Ayer, of Lowell.

The following is a list of the postmasters, with the dates of their appointment :

Andrew Boynton Gardner, June 1, 1849.
Harvey Alphens Woods, August 11, 1853.
George Henry Brown, December 30, 1861.
William Holmes Harlow, December 5, 1862.
George Henry Brown, January 15, 1863.
William Holmes Harlow, July 18, 1865.

The name of the post-office was changed by the Department at Washington, from South Groton to Groton Junction, on March 1, 1862 ; and subsequently this again was changed to Ayer, on March 22, 1871, soon after the incorporation of the town, during the postmastership of Mr. Harlow.

Closely akin to the post-office in its functions is the service of the telegraph and the telephone, and for that reason I add the following facts :

The telegraph office was opened in the village of Groton on Saturday, March 20, 1880, mainly through the exertions of the late Charles Harrison Waters and of Francis Marion Boutwell, Esq. ; and the first message was sent to Nashua. The office was established in the railway-station, where it has since remained, and the first operator was Miss Etta Augusta Shattuck.

The telephone office was opened in the village on Friday, April 29, 1881, affording communication with Boston and other places.

THE OLD TAVERNS AND STAGE-COACHES OF GROTON.—It has been said that there is nothing contrived by man which has produced so much happiness as a good tavern. Without disputing the statement, all will agree that many good times have been passed around the cheerful hearth of the old-fashioned inn.

The sites of the earliest taverns of Groton cannot easily be identified, but the names of some of the landlords are found in the records of the Middlesex Court of Quarter Sessions,—now at East Cambridge,—when they were licensed as inn-holders. At that period no great preparations were made in the small towns for the lodging of strangers, beyond obtaining the necessary license, and guests were treated like members of the family. Occasionally a farmer would keep a tavern for a while, and thus make a market for his home products. For a long time Groton was a frontier settlement, and all beyond it was a wilderness. The travel through the place was mainly along the circumference of civilization, from one outlying town to another, and there was but little patronage for public-houses. The following list of early landlords and retailers of spirits is taken from the Court records, and the entries are made during the

months of July, August and September in the respective years :

1699.—Joseph Cady.
1700.—Probably no license granted.
1701.—Joseph Cady.
1702.—Probably no license granted.
1703.—Samuel Parker, Nathan Mors.
1704.—Samuel Parker.
1705.—Samuel Parker.
1706.—Samuel Parker.
1707.—Samuel Parker.
1708.—Samuel Parker.
1709.—Probably no license granted.
1710.—Samuel Woods.
1711.—Mr. Samuel Woods.
1712.—Probably no license granted.
1713.—Nathaniel Woods.
1714.—Nathaniel Woods.
1715.—Nathaniel Woods.
1716.—Nathaniel Woods.
1717.—Nathaniel Woods, Eleazer Robbins, Eleazer Green ; James Patterson, retailer.
1718.—Mr. Nathaniel Woods, Mr. Eleazer Robbins, Mr. Eleazer Green.
1719.—Mr. Eleazer Green, Mr. Nathaniel Woods.
1720.—Mr. Eleazer Green.
1721.—Mr. David Whetcomb, Mr. Eleazer Green, Mr. Jonathan Hubbard.
1722.—Mr. Eleazer Green, Mr. Jonathan Hubbard.
1723.—Mr. Jonathan Hubbard.
1724.—Mr. Jonathan Hubbard, Mr. Joseph Spaulding.
1725.—Mr. William Tarbell.
1726.—Mr. Jonathan Hubbard, Mr. William Tarbell.
1727.—Mr. Jonathan Hubbard, Mr. William Tarbell, Mr. Josiah Sautell.
1728.—Mr. Jonathan Hubbard.
1729.—Mr. Jonathan Hubbard.
1730.—Mr. Jonathan Hubbard, Mr. Josiah Sartel, Nathaniel Sartel, Esq.
1731.—Nathaniel Sartel, Esq., Mr. Jonathan Hubbard.
1732.—Nathaniel Sartel, Esq., Mr. James Parker.
1733.—Nathaniel Sartel, Esq., Mr. John Bulkley.
1734.—Nathaniel Sartel, Esq., Mr. John Bulkley, Mr. Benjamin Bancroft.
1735.—Nathaniel Sartel, Esq., Mr. Benjamin Bancroft, Mr. John Bulkley.
1736.—Nathaniel Sartel, Esq., Mr. Benjamin Bancroft, Mr. John Bulkley.
1737.—Mr. Benjamin Bancroft, Mr. John Bulkley.
1738.—John Bulkley, Captain Samuel Parker, Jonathan Sheple.
1739.—Captain Samuel Parker, John Bulkley ; Jonathan Sheple, Abraham Moores, retailers.
1740.—John Bulkley, Abraham Moores, William Lawrence, Esq.
1741.—Samuel Parker, John Bulkley ; William Lawrence, Esq., Abraham Moores, retailers.
1742.—Samuel Parker, John Bulkley, Abraham Moores ; William Lawrence, Esq., Thomas Tarbell, retailers.
1743.—Samuel Parker, John Bulkley, Abraham Moores, James Lawrence ; William Lawrence, Esq., Thomas Tarbell, retailers.
1744.—Caleb Trowbridge, Jr., Isaac Farnsworth, Benjamin Bancroft, John Bulkley, Samuel Parker.
1745.—Isaac Green, John Bulkley, Abraham Moores, James Lawrence ; William Lawrence, Esq., Benjamin Chase, retailers.
1746.—Caleb Trowbridge, Jr., Benjamin Bancroft, John Bulkley, Samuel Parker, Amos Lawrence.
1747.—Isaac Green, John Bulkley, Abraham Moores, James Lawrence ; John Sheple, Ezra Farnsworth, retailers.
1748.—Capt. Benjamin Bancroft, Capt. John Bulkley, Abraham Moores, Caleb Trowbridge, Jr., Amos Lawrence.
1749.—John Bulkley, Abraham Moores, James Lawrence ; Ezra Farnsworth, retailer.
1750.—John Bulkley, Abraham Moores, James Lawrence ; Ezra Farnsworth, retailer.
1751.—John Bulkley, Abraham Moores, James Lawrence ; Ezra Farnsworth, retailer.
1752.—John Bulkley, Abraham Moores, James Lawrence, James Colburn, Jr., William White ; Caleb Trowbridge, Jr., retailer.

1753.—John Bulkley, Abraham Moores, Thomas White, Caleb Trowbridge, Jr.; Josiah Sartell, retailer.

1754.—John Bulkley, Abraham Moores, Thomas White, Caleb Trowbridge, Jr.; Josiah Sartell, John Stevens, Esq., retailers.

1755.—John Bulkley, Abraham Moores, Samuel Bowers, Thomas White; John Stevens, Esq., Jonathan Sartell, retailers.

In the Journal of the House of Representatives (page 96), December 21, 1752, is a petition of Caleb Trowbridge, Jr., of Groton, stating that :

"He lives upon a publick Road leading from *Dunstable* to *Harrard*, which is frequented by many Travelers; that the publick Houses on said Road are fifteen Miles distant from each other; that he has only Liberty to Retail, yet is often crowded with People who want necessary Refreshment, but who is not allowed to sell it to them; he therefore prays he may now obtain a Licence as an Innholder.

"Pass'd in Council, &c. In Council, December 21st, 1752. Read and Ordered, That the Justices of the General Sessions of the Peace for the County of *Middlesex*, be and they hereby are allowed to grant the Petitioner a License to be an Innholder, if they see Cause, at their Adjournment on Saturday, the 23d Instant, the Time for granting Licences being elapsed notwithstanding, provided the Petitioner first obtains the Approbation of the Select-Men of *Groton* for that purpose.

"Sent down for Concurrence. Read and concor'd."

The Trowbridge tavern cannot now be identified with certainty; but it is highly probable that it was the same as the Bowers inn, mentioned in the next paragraph.

The earliest tavern in Groton, of which there is any positive record or knowledge, was kept by Samuel Bowers, Jr., in the house lately and for a long time occupied by the Champney family. Mr. Bowers was born in Groton on December 21, 1711, and, according to his tombstone, died on "the Sixteenth Day of December Anno Domini 1768. Half a hour after Three of the Clock in y^e Afternoon, and in the Fifty Eight year of his age." He was first licensed in the year 1755, and was known in the neighborhood as "Land'urd Bowers,"—the inn-keeper of that period being generally addressed by the title of landlord. I do not know who succeeded him in his useful and important functions.

The next tavern of which I have any knowledge was the one kept by Captain Jonathan Keep, during the latter part of the Revolution. In *The Independent Chronicle* (Boston), February 15, 1781, the committee of the General Court for the sale of confiscated property in Middlesex County advertise the estate of Dr. Joseph Adams, of Townsend, to be sold "at Mr. Keeps, innholder at Groton." This tavern has now been kept as an inn during more than a century. It was originally built for a dwelling-house, and, before the Revolution, was occupied by the Reverend Samuel Dana; but since that time it has been lengthened in front and otherwise considerably enlarged. Captain Keep was followed by the brothers Isaiah and Joseph Hall, who were the landlords as early as the year 1798. They were succeeded in 1825 by Joseph Hoar, who had just sold the Emerson tavern, at the other end of the village street. Excepting the year 1836, when Moses Gill and his brother-in-law, Henry Lewis Lawrence, were the landlords, Mr. Hoar kept it until the spring of 1843, when he

sold out to Thomas Treadwell Farnsworth. It was then conducted as a temperance house, at that time considered a great innovation on former customs. After a short period it was sold to Daniel Hunt, who kept it until 1852; and he was followed by James Minot Colburn, who had it for two years. It then came into the possession of Joseph Nelson Hoar, a son of the former landlord, who took it in 1854, and in whose family it has since remained. Latterly it has been managed by three of his daughters, and was known as the Central House. For a long time it was the only tavern in the village, and for neatness and comfort could not easily be surpassed. Within a few months it has been shut up as a public-house, but it is hoped only temporarily. The following description of the inn was written by the late Mrs. Delano A. Goddard, in a letter from Groton to the *Worcester Daily Spy*, July 7, 1876, after giving an account of the celebration on the Fourth of July :

"I cannot leave Groton without one word for its 'Central House,' its only tavern; a long, low building, with a picturesque piazza its whole length, covered with a luxuriant woodbine. It is unique, and is kept by three sisters [the Misses Hoar], who receive their visitors hospitably and serve them themselves; who, in spite of all their household duties, never seem hurried, are always to be found, always courteous, always ready. They are admirable representatives of the intelligent, capable, attractive New England girls who don't know what shirking is, but who take up the life they find waiting for them, and make of it the best thing they can."

In August, 1877, a tavern, known as the Fletcher House, was opened at the southerly end of the village street. It is situated on the easterly side of the Boston Road, near the Colonel Prescott monument, and fifty years ago was owned by Dr. Farnsworth.

In a list of innholders printed near the end of Isaiah Thomas's Almanack for 1785, appears the name of Richardson, whose tavern stood on the present site of the Baptist Church. It was originally the house owned and occupied by the Rev. Gershom Hobart, which had been considerably enlarged by additions on the north and east sides, in order to make it more suitable for its new purposes. Mine host was Captain Jephthah Richardson, who died on October 9, 1806. His father was Converse Richardson, who had previously kept a small inn on the present Elm Street, near the corner of Pleasant. It was in this Elm Street house that Timothy Bigelow, the rising young lawyer, lived when he first came to Groton. Within a few years this building has been moved away. Soon after the death of Captain Jephthah Richardson the tavern was sold to Timothy Spaulding, who carried on the business until his death, which occurred on February 19, 1808. Spaulding's widow subsequently married John Spalter, who was the landlord for a short time. About 1812 the house was rented to Dearborn Emerson, who had been a driver of a stage-coach, as well as the owner of a line. He remained in possession of it for a few years.

During the War of 1812 it was an inn of local renown; and a Lieutenant Chase had his headquarters

here for awhile, when recruiting for the army. He raised a company in the neighborhood, which was ordered to Sackett's Harbor, near the foot of Lake Ontario. The men were put into uniforms as they enlisted and drilled daily. They were in the habit of marching through the village streets to the music of the spirit-stirring drum and the ear-piercing fife; and occasionally they were invited into the yard of some hospitable citizen, who would treat them to "the cups that cheer but not inebriate," when taken in moderation. William Kemp was the drummer, and Wilder Shepley the fifer, both noted musicians in their day. Sometimes Moses Kemp, a brother, would act as fifer. William, who died on September 28, 1885, at the advanced age of ninety-six years, used to give many reminiscences of that period. He was born at Groton on May 8, 1789, and began to drum in early boyhood. His first appearance in the public service was during the year 1805, as drummer of the South Company of Groton, commanded by Luther Lawrence, Esq., afterward the mayor of Lowell. Among the men enlisted here during that campaign were Marquis D. Farnsworth, Aaron Lewis, William Shepley and John Woodward, of this town; and James Adams and his son, James, Jr., of Pepperell.

During his boyhood Mr. Kemp knew Major Daniel Simpson, the veteran drummer of Boston, whose mother was Sarah, daughter of Job and Sarah (Hartwell) Shattuck, of Groton. The major was born at Harrison, Maine, on September 29, 1790, and died in Boston on July 28, 1886. In former years he used to spend considerable time at Groton, where many a trial of skill between the two drummers has taken place.

It was about the year 1815 that Dearborn Emerson left the Richardson tavern, and moved down the street, perhaps thirty rods, where he opened another public-house on the present site of Milo H. Shattuck's store. The old tavern, in the mean time, passed into the hands of Daniel Shattuck, who kept it until the year before his death, which occurred on April 8, 1831. The business was then carried on during a short time by Samuel Clark Tenny, who has the following advertisement in *The Groton Herald*, June 12, 1830:

"OLD STAND.

"THE Subscriber would respectfully inform his friends and the public generally, that he has taken the Tavern lately occupied by Mr. DANIEL SHATTUCK, in Groton: and having thoroughly fitted up the same for the reception and accommodation of travellers, he flatters himself he shall obtain a share of their custom.

"No pains shall be spared to give satisfaction to all those who may be disposed to patronize him.

"SAMUEL C. TENNY.

"Groton, June 12, 1830."

The next landlord was Lemuel Lakin, and after him Francis Shattuck, a son of Daniel, for another brief period. About the year 1833 it was given up entirely as a public-house, and thus passed away an old landmark widely known in those times. It stood well out on the present road, the front door facing

down what is now Main Street, the upper end of which then had no existence. In approaching the tavern from the south, the road went up Hollis Street and turned to the left somewhere south of the Burying-Ground. The house afterward was cut up and moved off, just before the Baptist meeting-house was built.

Dearborn Emerson married a sister of Daniel Brooks, a large owner in the line of stage-coaches running through Groton from Boston to the northward; and this family connection was of great service to him. Jonas Parker, commonly known as "Tecumseh" Parker, was now associated with Emerson in keeping the new hotel. The stage business was taken away from the Richardson tavern, and transferred to this one. The house was enlarged, apacious barns and stables were erected, and better accommodations given to man and beast,—on too large a scale for profit, it seems, as Parker & Emerson failed shortly afterward. This was in the spring of 1819, during which year the tavern was purchased by Joseph Hoar, who kept it a little more than six years, when he sold it to Amos Alexander. This landlord, after a long time, was succeeded in turn by Isaac J. Fox, Horace Brown, William Childs, Artemas Brown, John M. Gilson, Abijah Wright and Moses Gill. It was given up as a hotel in 1854, and made into a shoe-factory, owned by Messrs. Bigelow & Randall; and finally it was burned on Wednesday evening, December 19, 1855. Mr. Gill had the house for seven years, and was the last landlord. He then opened a public-house directly opposite to the Orthodox Church, and called it *The Globe*, which he kept for two years. He was succeeded by Stephen Woods, who remained only one year, after which time this also was given up as a public-house.

The following advertisement in *The Groton Herald*, March 13, 1830, shows that the selectmen of the town at that time, wishing to be impartial in distributing their official patronage, used to meet equally at all the taverns in the village for the transaction of public business:

"STATED MEETINGS OF THE SELECTMEN.

"THE Selectmen of Groton will meet on the last Saturdays of each month the present municipal year, at 3 o'clock, P. M., viz.:—At Hoar's Tavern in March, April, May and June; at Alexander's in July, August, September and October; and at Shattuck's in November, December, January and February.

"CALEB BUTLER, Chairman."

Another hostelry was the Ridge Hill tavern, situated at the Ridges, three miles from the village, on the Great Road to Boston. This was built about the year 1805, and much frequented by travelers and teamsters. At this point the roads diverge and come together again in Lexington, making two routes to Boston. It was claimed by interested persons that one was considerably shorter than the other,—though the actual difference was less than a mile. In the year 1824 a guide-board was set up at the crotch of the roads, proclaiming the fact that the distance to Lexington through Concord was two miles longer

than through Carlisle. Straightway the storekeepers and innholders along the Concord road published a counter-statement, that it had been measured by sworn surveyors, and the distance found to be only two hundred and thirty-six rods farther than by the other way.

The first landlord of the Ridge Hill tavern was Levi Parker, noted for his hearty hospitality. He was afterward deputy-sheriff of Middlesex County, and lived at Westford. He was followed, for a short time, by John Stevens, and then by John Hancock Loring, who conducted the house during many years, and was succeeded by his son Jefferson. After him came Henry Lewis Lawrence, who kept it during one year; he was followed by his brother-in law, Moses Gill, who took the tavern in April, 1837, and kept it just five years. When Mr. Gill gave up the house, he was followed by one Langdon for a short time, and he in turn by Kimball Farr as the landlord, who had bought it the year previously, and who remained in charge until 1868. During a part of the time when the place was managed by Mr. Farr, his son Augustus was associated with him. Mr. Farr sold the tavern to John Fuzzard, a native of Brighton, England, who kept it as the landlord for a while, and is still the owner of the property. He was followed by Newell M. Jewett, and he in turn by Stephen Perkins, a native of York, Maine, who took it in 1880. The building had been vacant for some years before that time. It was given up by Mr. Perkins in the spring of 1884, when it ceased to be a public-house, and was occupied again by Mr. Fuzzard as his dwelling. A fair used to be held here on the first Tuesday of every month for the sale of horses, and buyers were attracted from a long distance. At one time this property was owned by Judge Samuel Dana, who sold it to John H. Loring.

As early as the year 1798 there was a tavern about a mile from the Ridges, toward Groton. It was kept by Stephen Farrar, in the house now standing near where the brook crosses the Great Road. Afterward one Green was the landlord. The house known as the "Levi Tufts place," in the same neighborhood, was an inn during the early part of this century, conducted by Tilly Buttrick. Also about this time, or previously, the house situated south of Indian Hill, and occupied by Charles Prescott,—when the map in Mr. Butler's History was made,—was an inn. There was a tavern kept from about the year 1812 to 1818 by a Mr. Page, in Mr. Gerrish's house,—near the Unitarian Church in the village,—which was built by Martin Jennison, about 1803. Last spring the same dwelling was newly furnished and opened as a boarding-house for transient or permanent guests, according to an advertisement in *The Groton Landmark*, May 3, 1890. There was also a tavern, near the present paper-mills of Tileston and Hollingsworth, kept for many years (1820-45) by Aaron Lewis, and after him for a short time by A. M.

Veazie. It was originally the house of John Capell, who owned the saw-mill and grist-mill in the immediate neighborhood. Amos Adams had an inn near Squannacook, a hundred years ago, in a house now owned by James Kemp.

Forty years ago an attempt was made to organize a company for the purpose of carrying on a hotel in the village, and a charter was obtained from the Legislature. The stock, however, was not wholly taken up, and the project fell through. Of the copartners, Mr. Potter was the last survivor, and he died in Cincinnati, on December 2, 1884. Below is a copy of the act:—

“AN ACT TO INCORPORATE THE GROTON HOTEL COMPANY.

“BE it enacted by the Senate and House of Representatives, in General Court assembled, and by the authority of the same, as follows:

“SECT. 1. Luther F. Potter, Nathaniel P. Smith, Simeon Ames, their associates and successors, are hereby made a corporation, by the name of the Groton Hotel Company, for the purpose of erecting, in the town of Groton, buildings necessary and convenient for a public house, with all the powers and privileges, and subject to all the liabilities, duties and restrictions, set forth in the forty-fourth chapter of the Revised Statutes.

“SECT. 2. Said corporation may hold such real and personal property, as may be necessary and convenient for the purposes aforesaid, not exceeding in amount twenty thousand dollars: *provided*, that no shares in the capital stock of said corporation shall be issued for a less sum or amount, to be actually paid in on each, than the par value of the shares which shall be first issued. And if any ardent spirits, or intoxicating drinks of any kind whatever, shall be sold by said company, or by their agents, lessees, or persons in their employ, contrary to law, in any of said buildings, then this act shall be void.” [Approved by the Governor May 2, 1850.]

In the spring of 1852 a charter was given to Benjamin Webb, Daniel D. R. Bowker, and their associates, for the purpose of forming a corporation to carry on a hotel at the Massapoag Springs, in the eastern part of this town; but the project fell through. It was to be called the Massapoag Spring Hotel, and its capital stock was limited to \$30,000. The act was approved by the Governor on May 18, 1852; and it contained similar conditions to those mentioned above in regard to the sale of liquors. In the spring of 1859 an act was passed by the Legislature, and approved by the Governor on April 1st, incorporating Abel Prescott, Harvey A. Woods, Levi W. Woods, Stephen Roberts, and Levi W. Phelps, their associates and successors, under the name of the Groton Junction Hotel Company, for the purpose of erecting a hotel at Groton Junction, now known as Ayer. The capital of the company was limited to \$15,000, but the stock was never taken. These enterprises are now nearly forgotten, though the mention of them may revive the recollections of elder people.

THE GROTON STAGE-COACHES.—During the first half of the present century Groton had one characteristic mark, closely connected with the old taverns, which it no longer possesses. It was a radiating centre for different lines of stage-coaches, until this mode of travel was superseded by the swifter one of the railroad. Wayfarers from the surrounding towns off the line of travel came hither daily in private vehicles to engage their seats and take their passage.

During many years the stage-coaches were a distinctive feature of the place; and their coming and going were watched with great interest, and created the excitement of the day. In early times the drivers, as they approached the village, would blow a bugle in order to give notice of their arrival; and this blast was the signal at the taverns to put the food on the table. More than a generation has now passed away since these coaches were wont to be seen in the village streets. They were drawn usually by four horses, and in bad going by six. Here a change of coaches, horses and drivers was made.

The stage-driver of former times belonged to a class of men that has now disappeared from the community. His position was one of considerable responsibility. This important personage was well known along the route, and his opinions were always quoted with respect. I easily recall the familiar face of Aaron Corey, who drove the accommodation stage to Boston for so many years. He was a careful and skillful driver, and a man of most obliging disposition. He would go out of his way to bear a message or leave a newspaper; but his specialty was to look after women and children committed to his charge. He carried also packages and parcels, and largely what to-day is intrusted to the express. I recall, too, with pleasure Horace George, another driver, popular with all the boys, because in sleighing time he would let us ride on the rack behind, and even slacken the speed of his horses so as to allow us to catch hold of the straps. In youthful dialect, the practice was called "ketching on behind."

Some people now remember the scenes of life and activity that used to be witnessed in the town on the arrival and departure of the stages. Some remember, too, the loud snap of the whip which gave increased speed to the horses, as they dashed up in approved style to the stopping-place, where the loungers were collected to see the travelers, and listen to the gossip which fell from their lips. There were no telegraphs then, and but few railroads in the country. The papers did not gather the news so eagerly nor spread it abroad as promptly as they do now; and items of intelligence were carried largely by word of mouth.

The earliest line of stage-coaches between Boston and Groton was the one mentioned in the *Columbian Centinel*, April 6, 1793. The advertisement is headed "New Line of Stages," and gives notice that—

"A Stage-Carriage drives from Robbins' Tavern, at Charles-River Bridge, on Monday and Friday, in each week, and passing through Concord and Groton, arrives at Wyman's tavern in Ashley [Ashby] in the evenings of the same days; and after exchanging passengers there, with the Stage Carriage from Walpole, it returns on Tuesdays and Saturdays, by the same route to Robbins'.

The Charlestown Carriage drives also from Robbins' on Wednesday in each week, and passing through Concord arrives at Richardson's tavern, in Groton, on the evening of the same day, and from thence returns on Thursday to Robbins'.

"Another Carriage drives from Richardson's tavern in Groton, on Monday in each week, at six o'clock in the morning, and passing by Richardson's tavern in Concord, at ten o'clock in the forenoon, arrives at Charlestown at three o'clock in the afternoon. From Charlestown it drives on Tuesday and Thursday in each week, at three o'clock in the afternoon and returns back as far as Richardson's tavern in Concord—and from that place it starts at 8 o'clock in the mornings, of Wednesday and Friday, and runs again to Charlestown. From there it moves at six o'clock on Saturday morning, and returns to Richardson's tavern in Groton, in the evening of the same day."

It was probably one of these "Carriages" to which allusion is made in Mr. Winthrop's "Memoir of the Honorable Nathan Appleton," as follows:

"At early dusk on some October or November evening, in the year 1794, a fresh, vigorous bright-eyed lad, just turned of fifteen, might have been seen alighting from a stage-coach near Quaker Lane,¹ as it was then called, in the old town of Boston. He had been two days on the road from his home in the town of New Ipswich, in the State of New Hampshire. On the last of the two days, the stage-coach had brought him all the way from Groton in Massachusetts; starting for that purpose early in the morning, stopping at Concord for the passengers to dine, trundling them through Charlestown about the time the evening lamps were lighted, and finishing the whole distance of rather more than thirty miles in season for supper. For his first day's journey, there had been no such eligible and expeditious conveyance. The Boston stage-coach, in those days, went no farther than Groton in that direction. His father's farm-horse, or perhaps that of one of the neighbors, had served his turn for the first six or seven miles; his little brother of ten years old having followed him as far as Townsend, to ride the horse home again. But from there he had trudged along to Groton on foot, with a bundle-handkerchief in his hand, which contained all the wearing apparel he had, except what was on his back." —*Proceedings of the Massachusetts Historical Society*, v. 249, 250.

It has been said that the first public conveyance between Boston and Groton was a covered wagon, hung on chains for thoroughbraces; but this was probably subsequent to the time of the advertisement. It was owned and driven by Lemuel Lakin, but after a few years the owner sold out to Dearborn Emerson.

The following advertisement from the *Columbian Centinel*, June 25, 1800, will give a notion of what an undertaking a trip to Boston was at the beginning of the century:

"GROTON STAGE.

"The subscriber respectfully informs the public that he drives the Stage from Boston to Groton, running through Lexington, Concord, and Littleton, to Groton: Starts from Boston every Wednesday morning, at 5 o'clock, and arrives at Groton the same day; Starts from Groton every Monday morning, at 7 o'clock, and arrives at Boston the same day at 4 o'clock. Passage through, 2 dols. per mile, 4d.

"DANBORN EMERSON.

"Seats taken at Mr. SILAS DUTTON'S in Royal Exchange Lane. Newspapers supplied on the road, and every attention paid to conveyances."

The given-name of Emerson was Dearborn, and not "Danborn," which is a misprint. Two years later he was running a stage-coach from Groton to New Ipswich, New Hampshire; and on the first return trip he brought three passengers,—according to the "History of New Ipswich" (page 129). Emerson was a noted driver in his day; and he is mentioned with pleasant recollections by the Honorable Abbott Lawrence, in an after-dinner speech at the Jubilee of Lawrence Academy, on July 12, 1854, as appears

¹ Now Congress Street.

from the published account of the celebration. Subsequently he was the landlord of one of the local taverns.

It is advertised in *The Massachusetts Register*, for the year 1802, that the—

"GROTON Stage sets off from J. and S. Wheelock's [Indian Queen Inn], No. 37, Marlboro'-Street [now a part of Washington Street, Boston], every Wednesday at 4 o'clock in the morning, and arrives at Groton at 3 o'clock in the afternoon, same day, leaves Groton every Monday at 4 o'clock in the morning, and arrives in Boston at 6 o'clock in the afternoon, same day." (Pages 19, 20.)

It seems from this notice that it took three hours longer to make the trip down to Boston than up to Groton,—of which the explanation is not clear. In the *Register* for 1803, a semi-weekly line is advertised, and the same length of time is given for making the trip each way as is mentioned in the *Register* of the preceding year.

About the year 1807 there was a tri-weekly line of coaches to Boston, and as early as 1820 a daily line, which connected at Groton with others extending into New Hampshire and Vermont. Soon after this time there were two lines to Boston, running in opposition to each other,—one known as the Union and Accommodation Line, and the other as the Telegraph and Despatch.

One of the drivers for the Telegraph and Despatch Line was Phineas Harrington, popularly known along the road as "Phin" Harrington. He had orders to take but eight passengers in his coach, and the trip was made with remarkable speed for that period. "Phin" was a man of small size; and the story used to be told of him that, on cold and stormy nights, he would get inside of one of the lamps fixed to the box, in order to warm his feet by the lighted wick! He passed almost his whole life as a stage-man, and it is said that he drove for nearly forty years. He could handle the reins of six horses with more skill than any other driver in town. Mr. Harrington died at Dracut, on May 23, 1870, aged eighty years, two months and nine days.

William Shepard & Co. advertise in *The Groton Herald*, April 10, 1830, their accommodation stage. "Good Teams and Coaches with careful and obliging drivers will be provided by the subscribers." Books were kept in Boston at A. M. Brigham's, No. 42 Hanover Street, and in Groton at the taverns of Amos Alexander and Joseph Hoar. The fare was one dollar, and the coach went three times a week.

About this time George Flint had a line to Nashua, and John Holt another to Fitchburg. They advertise together in the *Herald*, May 1, 1830, that "no pains shall be spared to accommodate those who shall favor them with their custom, and all business intrusted to their care will be faithfully attended to." The first stage-coach from this town to Lowell began to run about the year 1829, and John Austin was the driver. An opposition line was established soon afterward, and kept up during a short time, until a com-

promise was made between the two lines. Later, John Russ was the owner and driver of the line to Lowell, and still later, John M. Maynard the owner. Near this period there was a coach running to Worcester, and previously one to Amherst, New Hampshire.

Fifty years ago General Thomas Adams Staples was a well-known stage proprietor. He was a man of large frame and fine proportions, and is still remembered by many residents of the town. He was born in Boston on July 20, 1804, and died at Machias, Maine, on November 13, 1880.

The following is a list of some of the old drivers, who were well-known along their respective routes. It is arranged in no particular order and is by no means complete; and the dates against a few of the names are only approximations to the time when each one sat on the box.

Lemuel Lakin was among the earliest; and he was followed by Dearborn Emerson. Daniel Brooks drove to Boston during the period of the last war with England, and probably later.

Aaron Corey drove the accommodation stage to Boston, through Carlisle, Bedford and Lexington, for a long time, and he had previously driven the mail-coach. He was succeeded by his son, Calvin, the driver for a few years, until the line was given up in 1850. Mr. Corey, the father, was one of the veterans, having held the reins during thirty-two years; he died March 15, 1857, at the age of seventy-three.

Isaac Bullard (1817-30), William Smart (1825-30), George Hunt, Jonathan Buttrick, Obadiah Kendall, Albert Hayden, Charles Briggs, Levi Robbins, James Lord, Frank Brown, Silas Burgess, Augustus Adams, William Dana, Horace Brown, Levi Wheeler, Timothy Underwood, ——— Bacon, Horace George (1838-45), Leonard Williams Cushing (1842-45) and Joseph Stewart,—these drove to Boston. After the stages were taken off, "Joe" Stewart was the driver of the passenger-coach from the village to the station on the Fitchburg Railroad, which ran to connect with the three daily trains for Boston. The station was three miles away, and now within the limits of Ayer.

Among the drivers to Keene, New Hampshire, were Kimball Danforth (1817-40), Ira Brown, Oliver Scales, Amos Nicholas, Otis Bardwell, Abel Marshall, the brothers Ira and Hiram Hodgkins, George Brown, Houghton Lawrence, Palmer Thomas, Ira Green, Barney Pike, William Johnson, Walter Carleton and John Carleton. There were two stage routes to Keene, both going as far as West Townsend in common, and then separating, one passing through New Ipswich and Jaffrey, a northerly route, while the other went through Ashby, Rindge and Fitzwilliam, a southerly one.

Anson Johnson and Beriah Curtis drove to Worcester; Addison Parker, Henry Lewis Lawrence, Stephen Corbin, John Webber, and his son Ward, drove to Lowell; the brothers Abiel and Nathan

Fawcett, Wilder Proctor and Abel Hamilton Fuller, to Nashua.

Micah Ball, who came from Leominster about the year 1824, drove to Amherst, New Hampshire, and after him Benjamin Lewis, who continued to drive as long as he lived, and at his death the line was given up. The route lay through Pepperell, Hollis and Milford.

The forerunner of this Amherst stage was a one-horse vehicle, which used to go over the road each way two or three times a week, and carry the mail. It began to run about the year 1820, and took passengers as occasion required.

Other reins-men were John Chase, Joel Shattuck, William Shattuck, Moses Titus, Frank Shattuck, David Coburn, — Chickering, Thomas Emory and William Kemp, Jr.

The sad recollection of an accident at Littleton, resulting in the death of Silas Bullard, is occasionally revived by some of the older people. It occurred on February 3, 1835, and was caused by the upsetting of the Groton coach, driven by Samuel Stone, and at the time just descending the hill between Littleton Common and Nagog Pond, then known as Kimball's Hill. Mr. Bullard was one of the owners of the line, and a brother of Isaac, the veteran driver. The *Columbian Centinel*, February 5, 1835, contains the following account of the affair:

"From Briggs's News Room Bulletin."

"On Tuesday afternoon [February 3], as the Groton and Keene mail-stage was returning to this city, in a narrow pass of the road in Littleton, one of the fore wheels of the stage came in contact with the hind wheel of a wagon, which suddenly overturned the stage.—There were eleven passengers in the vehicle at the time, who, with the exception of Mr. Silas Bullard, of this city, and Mr. Washington Shepley, of Groton, escaped uninjured. Mr. Bullard was seated with the driver at the time of the accident and was thrown, with great violence, to the ground, the stage falling immediately upon him. His collar-bone and two of his ribs were broken, shoulder blade dislocated, and otherwise injured. He was conveyed to a private dwelling, where he has the best medical aid, but his recovery is very doubtful. Mr. Shepley's injuries were of an internal nature, but not such, as to prevent his immediate return to Groton. A passenger states that no blame can be attached to the driver."

Mr. Bullard died on February 5th, and the *Centinel* of the next day pays a worthy tribute to his character.

Besides the stage-coaches, the carrier-wagons added to the business of Groton, and helped largely to support the taverns. The town was situated on one of the main thoroughfares leading from Boston to the northern country, comprising an important part of New Hampshire and Vermont, and extending into Canada. This road was traversed by a great number of wagons, drawn by four or six horses, carrying to the city the various products of the country, such as grain, pork, butter, cheese, eggs, venison, hides; and returning with goods found in the city, such as molasses, sugar, New England rum, coffee, tea, nails, iron, cloths, and the innumerable articles found in the country stores, to be distributed among the towns above here. In some seasons it was no uncommon

sight to see forty such wagons passing through the village in one day.

In addition to these were many smaller vehicles, drawn by one or two horses, to say nothing of the private carriages of individuals who were traveling for business or pleasure.

THE GROTON FIRE DEPARTMENT.—The first fire-engine in Groton was made in the year 1802, by Loammi Baldwin, Jr., then a law-student in the office of the Honorable Timothy Bigelow, but who afterward became a civil engineer. He was a son of Loammi and Mary (Fowle) Baldwin, and born at Woburn on May 16, 1780; and after his graduation at Harvard College, in the class of 1800, he came to Groton in order to study the profession of law. Like many others he does not seem to have found out at the start his proper calling, as his tastes were naturally for mechanical science and the kindred arts. While following his studies here, a house, situated just south of the academy grounds, was burned down in the winter-time and there was no fire-engine to stop it. The neighbors had to fight the flames as best they could, with snow as well as water. By this incident he became so impressed with the need of an engine in Groton, that with his own hands he constructed the first one the town ever had. This identical machine, known for a long time as *Torrent, No. 1*, is still serviceable after a use of more than eighty-eight years, and will throw a stream of water over the highest roof in the town. It was made in Jonathan Loring's shop, then opposite to Mr. Boynton's blacksmith-shop, where the ironwork was done. The tub is of copper, and bears the date "1802." Mr. Baldwin, soon after this time, gave up the practice of law, and became distinguished in his new profession.

The following description of the engine is found in *The Firemen's Standard* (Boston) for April, 1884:

"The old 'machine' has a quaint appearance with its copper tub in which is inscribed its name, *TORRENT, No. 1*, and its ancient tool box which bears the date of its birth, 1802. The said tub is three feet six inches long, two feet two inches wide, and twenty-two inches deep. On its bottom rests an oak plank in which are set the valves and in which stand the brass cylinders and air chamber, the former of which being each five inches in diameter and sixteen inches high. A gooseneck on the top of the air chamber serves as the outlet for the water and a reel is attached to the hind part of the tub capable of carrying one hundred feet of two-inch hose, the first supply of which was made at the harness shop and sewed with waxed thread" (page 4).

Among the active members of *Torrent Company*, nearly fifty years ago, was Elijah Tracy, a deaf-mute, who attended the stated meetings, and turned out at the fires, with as much regularity as his more favored comrades.

At two different times within sixteen years, *Torrent, No. 1*, has done most excellent service in putting out fires, and it is the testimony of all acquainted with the facts, that on each of these occasions it prevented a serious conflagration. Notably this was so at a fire which took place early on Sunday morning, October 26, 1884, when a dwelling-house, owned by Andrew Robbins, was burned down. At this time Mr. Dix's

buildings, in very close proximity, were in great danger, but they were saved through the efforts of the Fire Department and the use of the old engine, which was worked to good advantage in narrow quarters, where the other engine could not be taken. The other occasion was when Walter Shattuck's store was burned down on November 17, 1874; and largely by means of this engine the Congregational meeting-house was saved from destruction.

Torrent, No. 1, until recently, was housed at the end of a row of horse-sheds, near the First Parish meeting-house, but in the year 1885 it was transferred to West Groton, for the protection of that part of the town. It was there placed in the charge of a volunteer company of young men; and on April 5, 1886, the town voted to authorize the Board of Engineers to form a permanent company in that village, which was accordingly done, with the volunteer association as a nucleus. The engine has been re-named, and is now known as the Squannacook. An engine-house, next to the new church on Groton Street, has been built, which was formally opened with appropriate ceremonies, on the evening of December 30, 1887. In the upper story is a hall for public meetings, where, on January 6, 1888, the company gave a ball. A pamphlet was printed (Ayer, 1887, 12mo, pp. 8), entitled "Constitution and By-Laws of Squannacook Engine Co., No. 2, West Groton, Masa.," which sets forth the rules of their government.

The Union Engine Company was organized in the spring of 1830, and the immediate occasion of its formation was the series of incendiary fires that occurred during the year 1829. Presumably the name of the engine company was taken from the Union Congregational Church in the immediate neighborhood; and the engine was housed at the easterly end of the horse-sheds, situated on the northerly side of the meeting-house.

The following notice in the *Groton Herald*, May 8, 1830, is addressed to the subscribers for the engine:

"TAKE NOTICE.

"THE Subscribers to the New Engine are hereby requested to meet at ALEXANDER'S Hotel, MONDAY the 10th inst., at 6 o'clock, P.M. to hear the report of their Committee, chosen for the purpose of purchasing an Engine, and to transact any other business which they may think expedient.

"ELIJAH WHITON, } Committee.
"T. A. STAPLES. }

"Groton, May 8, 1830."

A Board of Engineers of the Fire Department was originally appointed in April, 1875, by the selectmen, in accordance with Chapter 35 of the Public Statutes. Their first report was made in the spring of 1876, and printed in the Town Report of that year. A new engine, known as the Lawrence, was bought in August, 1875, and is kept in the town-house. The following is a list of the chief engineers, with the dates of their several appointments, which are made by the selectmen:

April 10, 1875, George Sumner Graves.

April 22, 1876, Charles Blood.
April 24, 1877, Charles Blood.
April 22, 1878, Charles Blood.
April 23, 1879, Charles Blood.
April 17, 1880, Charles Blood.
April 20, 1881, John Gilson.
April 21, 1882, John Gilson.
March 20, 1883, John Gilson.
March 29, 1884, George Sumner Graves.
March 18, 1885, George Sumner Graves.
March 15, 1886, Charles Woolley.
March 26, 1887, Charles Woolley.
April 2, 1888, Charles Woolley.
April 1, 1889, Charles Woolley.
April 1, 1890, Charles Woolley.

Groton Fire Club.—The Groton Fire Club was formed during the winter of 1815; and the immediate occasion of its organization was the burning of John Wethered's dwelling on Wednesday evening, February 1, 1815. This house stood at the lower end of Main Street, and some years previously had been owned and occupied by Dr. Oliver Prescott, Senior. Mr. Wethered was from Wilmington, Delaware, and came to Groton from that State. According to tradition the dwelling was set on fire by a negro in his employ, who had been a slave at the South.

On November 7, 1814, Mr. Wethered bought the place of Dr. Oliver Prescott, Jr.; and three months later the house was burned, as has been stated. On April 29, 1816, Mr. Wethered sold it to Robert C. Ludlow, of Boston, a purser in the United States Navy, who, at this time, in connection with Commodore Bainbridge and Charles W. Green, was interested in the ownership of the Lakin farm, where they were then raising sheep. On September 25, 1817, Purser Ludlow sold it to Joshua Nash, who ten years later became the father-in-law of the late Bradford Russell, Esq., of Groton.

The present house on the same site was built about the year 1826 by Miss Susan Prescott, afterward Mrs. John Wright, for the accommodation of her school for girls, a famous institution more than sixty years ago. After Mrs. Wright's occupation of the place, it passed into the hands of Dr. Amos Farnsworth, and since that time there have been several owners. The house is now kept as a tavern.

The first meeting of the Fire Club was held on February 4, 1815, when the Honorable James Prescott was chosen president of the association, and Caleb Butler, Esq., secretary. The club used to meet annually, for the choice of officers, at one of the public-houses in the village, when a supper was served; and sometimes on such occasions members of one of the engine companies would be invited to join in the festivities. Each member of the Fire Club was required to provide two leather buckets and a fire-bag, which were to be always ready for use; and a failure to take them to a fire was met with a fine. Among some of the descendants of the early members these articles are now treasured as heirlooms.

On March 1, 1875, the town voted to adopt Chapter XXIV., Sections 23–31, of the General Statutes of the

Commonwealth, by which action the need of a private organization was largely superseded. The last meeting of the Fire Club, according to the records, was held in November, 1872, no day of the month given. The following preamble, with a list of the original members, is taken from the first two pages of the record-book :

"The undersigned, inhabitants of Groton warned by the recent conflagration in this village¹ and feeling one common interest and duty to be constantly in readiness to act with promptitude and effect on such distressing emergencies, agree to form and procure immediately to organize a society for that purpose, to be called, 'Groton Fire Club,' and do pledge ourselves to comply with and conform to all such rules and regulations, as the Society may at any time adopt to promote that end.

"Dated the fourth day of February, A.D. 1815.

On May 6, 1872, the town voted to build five reservoirs, which should hold 4000 gallons each. They were to be so situated as to give protection to the greatest number of houses in the village, with due regard to a sufficient supply of water. The reservoirs were placed, respectively, near the three meeting-houses, the Town-House, and the High School; and they are kept full by the water which runs from the roofs of these several buildings. After that vote, a few years later, another reservoir was placed in Court Street.

STARCH-FACORY, PAPER-MILLS, ETC.—In the spring of 1832 the following act was passed by the General Court of Massachusetts; and under the authority of the enactment a company was organized at Groton for the manufacture of starch.

A mill was built for the purpose on the Groton side of the Squannacook River, three-quarters of a mile above the village of West Groton, but the undertaking did not prove to be a success. It stood on the site of the present paper-mill in that locality; and the place is shown on Mr. Butler's Map of Groton. It was expected that this new industry in the town would help the farmers of the neighborhood by encouraging the cultivation of potatoes, which were to be used in making the article; but the scheme was a failure.

¹ The dwelling-house of Mr. John Wethered was entirely consumed by fire on the evening of the 1st day of February, A.D. 1815.

"CHAP. CXXVII.

"An Act to incorporate the Dana Manufacturing Company."

"SEC. 1. Be it enacted by the Senate and House of Representatives, in General Court assembled, and by the authority of the same, That Oliver Sheple, Samuel Dana, Samuel Dana, Jr., Oliver Sheple, Jr., James Dana, and Washington Sheple, their associates and assigns be, and they hereby are constituted a corporation and made a body politic, by the name and style of the Dana Manufacturing Company, for the purpose of manufacturing cotton and woollen goods, iron wares, and starch from any materials, in the respective towns of Groton and Shirley in the county of Middlesex, and for this purpose shall have all the powers and privileges, and be subject to all the duties and requirements contained in an act passed the twenty-third day of February in the year of our Lord one thousand eight hundred and thirty, entitled 'an act defining the general powers and duties of manufacturing corporations.'

"SEC. 2. Be it further enacted, That the said corporation may take and hold such real estate, not exceeding in value the sum of two hundred thousand dollars, and such personal estate not exceeding in value two hundred thousand dollars, as may be suitable and convenient for carrying on the business aforesaid."

[Approved by the Governor, March 13, 1832.]

The building was subsequently used as a paper-mill, and burned many years ago, probably during the summer of 1846. Soon afterward another mill was erected on the same site, which was bought on October 22, 1852, by Lyman Hollingsworth of Jephthah Richardson Hartwell. The plant was sold in 1881 by Mr. Hollingsworth to Messrs. Hollingsworth and Vose, of Boston, who still own it. The senior partner of this firm is a nephew of the former owner. The product of the mill is a Manilla paper of high grade, of which about three tons are made daily. On August 7, 1889, I visited the mill when they were making a paper, which is sent to England in boxes, for the manufacture of sand-paper, and very likely to be returned here in that form. In the stock-houses there were two hundred tons of old cordage, more or less, ready to be ground up and used in connection with "wood pulp," which enters largely into the composition of the article. Last year a new dam, a solid granite structure in place of the original one, was built; though, in times of low water, steam-power is required to turn the machinery.

The direct road from the village of West Groton to the paper-mill—perhaps three quarters of a mile in length—was laid out by the county commissioners on April 13, 1838. An attempt was previously made by interested persons, in the spring of 1832, to have the same piece of highway built, but it did not meet with success, as it was then adjudged by the commissioners to be "not of common convenience and necessity." Of course the road was opened in order to accommodate the business of the new factory.

The paper-mill on the Na-hua River, at the Paper-Mill Village, was originally a wooden structure, and built in the year 1841 by Oliver Howe, who owned the saw-mill and grist-mill in the close proximity; and here the manufacture of Manilla paper was carried on. During more than a century there has been a dam at this place across the river, and in early times there was, also, a ford known as the Stony Fordway or Stony Wading-place. Among the Massachusetts Archives at the State House is a rough plan, made

probably about the year 1740, which gives the names of the bridges, etc., in this neighborhood, at that period. It is found in the volume marked on the back "Maps and Plans" (XVI. 6), and bears the catalogue number 1482.

About the year 1846 the property, on which stood these several mills, was sold to the brothers John Mark and Lyman Hollingsworth; and on Sept. 1, 1851, Lyman sold his share to the other brother, John Mark, who rebuilt the paper-mill, making it of brick, but the building was very soon afterwards burned. The following item is taken from the *Boston Daily Journal*, Monday, June 7, 1852:

"PAPER MILL BURNT. We learn that a paper-mill, dwelling-house and out-buildings adjoining, situated in Groton, and owned by Mr. J. M. Hollingsworth were totally consumed by fire on Saturday [June 5]."

The mill was at once rebuilt, and soon again in operation.

"J. M. Hollingsworth's extensive and costly paper mills, at Groton Junction [Paper Mill Village], are nearly ready to go into operation. Mr. H. intends to manufacture first quality book paper, employing about 35 hands."

Lowell Weekly Journal and Courier, May 20, 1853.

On March 7, 1865, Mr. Hollingsworth, just before his death, on April 6th of that year, sold the property to his brother Lyman, who himself died on April 1, 1890; and eleven years later it was burnt for the second time. The *Boston Evening Journal*, Friday, May 26, 1876, has the following account of the fire:

"MILL BURNT AT GROTON, MASS.

"The large paper mill of Lyman Hollingsworth at North [?] Groton was destroyed by fire on Thursday afternoon [May 25]. It gave employment to about fifty workmen, and was valued at \$140,000. The insurance is placed in the following companies: Etna, Hartford, and Phoenix, of Hartford; Home of New York; North British and Mercantile; Springfield Fire and Marine; Fire Association of Philadelphia; Meriden Fire; Roger Willinos of Providence, and Shawmut of Boston. It is divided as follows: On mill, \$50,000; machinery, \$24,000, and on stock, covering the probable loss, \$8,000. It is not yet known how the fire occurred."

The mill was again rebuilt, this time by Lyman Hollingsworth, and the manufacture of book paper continued, now with a daily product of about five tons. On Dec. 13, 1881, the establishment was sold to Messrs. Tileston and Hollingsworth, of Boston, and in July, 1889, by them transferred to the Tileston & Hollingsworth Company, of Boston, a corporation organized under the laws of the Commonwealth.

At West Groton there is a leather-board mill, of which the daily product is about four tons. It employs thirty-five men, and stands on the site of a saw-mill and grist-mill, which were built as early as the year 1765, and perhaps earlier. There is also a saw-mill on the Squannacook River, near the Townsend line, giving employment to eight or ten men, where box-hooks, reels, staves, etc., are made.

THE GEOGRAPHY OF GROTON.

RIVERS.—In early times, before the original Plantation had been cut up in order to form other towns,

the Nashua River flowed through the township of Groton for a distance of ten miles or more, and nearly bisected its territory; while to-day its course within the town's limits is hardly more than three miles. This river is formed by the union of two branches, known respectively as the North Branch and the South Branch, which come together at Lancaster. The former has its source in Ashburnham, near the foot of the Watatuck Mountain, and in Westminster, and passes through Fitchburg and Leominster; while the latter rises in the neighborhood of the Wachusett Mountain, at Princeton, and among the hills of Rutland and Holden, and passes through West Boylston and Clinton. Both these branches for a considerable distance above their confluence are known also as the Nashua. The stream at Groton is about one hundred feet above tide-water.

At a very early period the Nashua River was sometimes called the Penacook, and at other times the Groton River. In Thomas Noyes's survey of the grant of Major Simon Willard's farm, in the autumn of 1659, the land is described as "lying and being for the most part on the east side of Groaten Riuier." And again, at the session beginning on Sept. 6, 1676, the approval of the General Court was given to Jonathan Danforth's survey of lands laid out to William Hawthorne, "lying in the wilderness; on the North of Groaten Riuier at a place called by the Indians Wistequassuck," now within the limits of Townsend. At a later period it was more frequently referred to as the Lancaster River; and it is likely that the stream bore different names in different towns along its course even at the same time. In the record of "The lands of Mr. Samuell Willard, which is layd out to him in the town of Grotten," on Sept. 29, 1680, reference is made to the Nashawag River—another form of spelling.

The Squannacook River forms the divisional line with Shirley for perhaps four miles, which is the whole distance of contact with that town. This stream rises in Ashby and flows through Townsend and by West Groton, emptying into the Nashua. The name is found in the Proprietors' records as early as the spring of 1684.

PONDS.—*Buddacook Pond*—lies about two miles from the village, near the Lowell Road. It covers an area of 103 acres, and is the largest pond in the town. It is mentioned in the record of James Parker's land under the date of July 6, 1666.

Outlet: *Baddacook Brook*, which flows into Cow Pond.

Cady Pond—a small and deep pond, covering perhaps two acres, lying less than a mile from the village in a southeasterly direction, near the Boston Road. It was named after Nicholas Cady, one of the early settlers, who owned land in the neighborhood. This pond and Flat Pond, both very small, are the only ones in the town whose waters ultimately reach the Nashua River.

Outlet: a small unnamed brook running south-westerly into James' Brook.

Cow Pond—sometimes called Whitney's Pond, in the easterly part of the town, covering an area of seventy-one acres. Cow Pond Meadow is mentioned in the record of Ralph Reed's land before the year 1664.

Outlet: Cow Pond Brook, which flows into Massapoag Pond.

Duck Pond—near the Ridges, east of Knop's Pond, and separated from it by a ridge only—lies perhaps half a mile south of Cow Pond. It covers fifty-five acres, and has no outlet.

Flat Pond—a small sheet of water near the Throne, in the west part of the town.

Outlet: a small unnamed brook into the Squannacook River.

Half-Moon Pond—a small pond in the upper part of the meadow, which lies south of the Hillside Road.

Knop's Pond—near the Ridges, west of Duck Pond, and is of the same size as that pond, covering fifty-five acres. So called from James Knapp, or Knop, an early settler who owned land in the neighborhood.

Outlet: a brook into Cow Pond.

Long Pond—lies on the southern border of the town, partly in Groton, but mostly in Ayer, covering forty-five acres.

Outlet: a brook into Sandy Pond.

Martin's Pond—near the foot of Gibbet Hill, on its northeasterly side—covers sixteen and two-thirds acres; it was named after William Martin, an early settler. In the record of James Parker's land, on July 6, 1666, "the pond called Goodman Martin's Pond," is mentioned. The following article, found in the warrant for the town-meeting held on September 17, 1792, seems to show that the outlet of the pond was formerly through Hog Swamp and Half-Moon Meadow into James's Brook, though there is now no other evidence to confirm this view:

"Art. 8. To see if the town will order the water running from Martin's Pond to be turned into the old Channel as it formerly used to run, through the Town, and appoint some proper person or persons to remove the obstructions and Effect the Business."

In the proceedings of the meeting, it is recorded that this article was "Past in the Negative." A measurement of the pond was lately made, when frozen over, which proves it to be much smaller than it was half a century ago.

Outlet: Martin's Pond Brook into the outlet of Knop's Pond, half-way between that pond and Cow Pond.

Massapoag Pond—on the easterly border of the town, but lies mostly in Dunstable and Tyngsborough, covering an area of fifty-six acres. It is now used as a storage basin of water by the Vale Mills Manufacturing Company, of Nashua, New Hampshire, and in dry seasons it is drawn upon for a supply.

Outlet: Salmon Brook, which empties into the Merrimack River at Nashua.

Springy Pond—a small sheet of water connected with Knop's Pond by a brook.

Wattle's Pond—three miles north of the village, on the road to East Pepperell, with no outlet. The origin of the name is unknown; but perhaps from Wattle, "a rod laid on a roof for the purpose of supporting the thatch." Many of the houses of the early settlers were thatched.

The area of the ponds, with the exception of Martin's Pond, is taken from the Fourth Annual Report of the State Board of Health of Massachusetts (January, 1873), as given on pages 124 and 125.

A story is told relative to Massapoag Pond, based on tradition, which probably has no real foundation. It is said that—

"Its outlet was on the easterly side, and as it was the reservoir into which Cowpond brook poured its waters, a considerable mill-stream issued from it. The waters passed without any rapid for a considerable distance, affording no favorable site for a mill. The north end of the pond was bounded by a ridge of loose sand, rising but little above the surface of the water, and being about six rods only in width; on the opposite side of which was a descent of about forty feet. Here, then, was an eligible spot for an overshoot mill. At a town-meeting held May 21, 1688, a grant was made to Samuel Adams of a small pond near Buck meadow, and leave given to drain it by a brook running into 'Tyng's cove.' At the same meeting, for the encouragement of any who would set up iron-works at Massapoag, a grant was offered of the wood on the easterly side of Unquetenasset brook. It is said that Adams, who is supposed to have accepted the grant, erected a grist-mill at the site above mentioned, conducting the water across the sand-bank to the flume of his mill. At the time of a flood about the year 1700 (the precise time is not known), a breach was made across the sand-bank, and it being very loose and moveable, the whole bank was soon torn down by the water to the depth of more than thirty feet; and consequently a sheet of water of that depth, where the pond was so deep, and where of less depth the whole water upon the surface, flowed suddenly off (all in one night), with irresistible violence. The mill, of course, was demolished, and the stones, though diligently sought for, and even the skill of the famous Moll Pitcher, of Lynn, employed in the search, have never yet been found. The bottom of the pond being uneven, fish in abundance were left in the cavities, which were easily taken, and the inhabitants of the neighboring towns, as well as of Groton, came and carried off loads of them. Where the water formerly issued from the pond, a small brook now runs in, and the outlet is, at the place of disruption, called the 'gulf.' The water finds its way into the old channel, two or three miles from the pond, in a northwesterly direction from Dunstable meeting-house."

[Butler's History of Groton, pages 246, 247.]

The name of Buck Meadow, which has been in use for more than two centuries, is firmly established, and the site well known. The meadow lies near Lovewell's Pond, formerly within the limits of Groton, but now in Nashua; and Adams's mill stood undoubtedly at the outlet of this pond, where there is a small water-power. This theory would tally with the town records; and furthermore a tradition is still extant that there was once a mill in the neighborhood. Lovewell's Pond is much smaller than Massapoag, and at that time probably had no designation. It was named after Captain John Lovewell, who was killed by the Indians on May 8, 1725. The following is the entry in the records:

"May: 21. 1688. The inhabitants of Groton Granted to Samuill Adams y^e pond that lyes neare buck meadow which hath its outlet Into the meadow known by y^e name of Tyngs Couee, and the swampy land adioyeng ther to prouided y^e sd land do not exceed fifteen accers;

"attest; JOSIAH PARKER Clarke

and ad adams hath liberty to drean the s^d pond at y^e small brook that runes in to Tyng's Cove provided sd Adames macks good all damagees that shall be don ther by "

There are now three small brooks running into Massapoag Pond on the easterly side, and their fall is too great for any one of them ever to have been the old outlet to the pond. Furthermore, it would have been impossible for any of these brooks to drain the pond (which even at the present time covers fifty-six acres) without causing too great damage for Adams to make good. There is no indication along their banks that they have been much larger streams than they are to-day. While the formation of the banks at the mouth of the pond, or the "gulf," so called, is peculiar, there are no signs that the water-line was ever any higher than it is at the present time. None of the local antiquaries are able to identify Tyng's Cove, which is in a manner undoubtedly derived from Jonathan Tyng, one of the earliest settlers of Dunstable.

At the same town-meeting, held on May 21, 1688, the inhabitants of Groton—

"Doed then by the maior wot grant for the incorpment of such men as will set up foran works at masabog pond; that they shall have y^e use & improvement of the woods and timber yt is now common one the est sid of uncutanaset brook and so to nashua riuer and groton line est ward A south ward to good man greens' masabog meadow. . . ."

I give this extract from the town records in order to show that the inhabitants at that period knew the pond by its present name; and if they had seen fit then to grant Adama any special privilege connected with it, they would have called it "Massapoag," and would not have said "y^e pond that lyes neare buck meadow."

HILLS.—*Barralock Hill*—is mentioned in the record of Samuel Woods' lands; but I am unable to identify it. Perhaps it is the hill due north of Baddacock Pond.

Brown Loaf Hill—commonly called Brown Loaf—is a handsome, symmetrical hill standing alone, more than a mile from the village, near the Lowell road. Brown Loaf Hill Meadow is mentioned in the description of Joseph Parker's lands, December 2, 1664, which would imply that the hill was so named before that time. Brown Loaf Hill is also mentioned in the record of James Parker's lands made on July 6, 1666; and Brownloafe Playne and Brownloaf Hill are given in the record of James Fisk's lands in John Morse's handwriting, of which the date is absent, but which was certainly made at a very early period. The height of the hill is 448 feet above mean tide on the coast line.

Chestnut Hills—the range lying northerly of Martin's Pond; so called from the abundant growth of chestnut-trees on its sides. The highest hills in the town, their greatest elevation being 544 feet.

Clay-Pit Hill—the small hill at the corner of the East Pepperell road and Break Neck.

Gibbet Hill—a noted landmark overlooking the village on its easterly side. It is mentioned in the land-grant of Sergeant James Parker, which was entered in

the town records of Richard Sawtell, the first town clerk who filled the office from June, 1662, to January, 1664-65. The tradition is that the hill was so called from the fact that once an Indian was gibbeted on its top. If this ever occurred, it must have happened before Sawtell's term of office. The town was incorporated by the General Court on May 25, 1655, but no public records are known to have been kept before June 23, 1662. Its height is 516 feet.

Horse Hill—in the eastern part of the town, near Massapoag Pond. It lies partly in Dunstable, and is covered with woods.

Indian Hill, or Hills—the range beginning near James's Brook, a mile south of the village, and running in an easterly direction on the south side of the Great Road to Boston. The height is 524 feet above mean tide.

Naumox—a low hill or ridge a short distance west of the road to East Pepperell, near the Longley monument, and running parallel with the road. The name is also used in connection with the neighborhood.

Prospect Hill—very near Lady Pond, and east of it; perhaps 250 feet or more above the Nashua, and 503 feet above mean tide.

Ridge Hill, or The Ridges—the name of a peculiar ridge, three miles southeasterly from the village, along which the Great Road runs. It also gave the name to a tavern formerly kept in the immediate neighborhood.

Rocky Hill—there are two hills of this name, one lying northeasterly of Baddacock Pond, near the old District School-house No. VIII. (now the Trowbridge School), which is also known as the Rocky Hill School, and the other situated in the southeast part of the town, between Long Pond and the Ridges. A visit to either of these hills will show why it was so called.

Sandy Hill—a small elevation on the road to East Pepperell, below the Longley monument, near the place where the Nashua road branches off.

Shepley Hill—lies west of the East Pepperell road, near Naumox. The name is rarely heard now, though it was in use as far back as February 28, 1670,—evidently so called from the Shepley family.

Snake Hill—in the south part of the town, but lies mostly in Ayer. Rattlesnakes have been killed on it within the memory of the present generation. Its height is 497 feet.

The Throne—a high hill in the western part of the town, on the summit of which is a level field of perhaps sixty acres, containing a small pond,—near the Townsend line. A map of Groton resembles a tea-kettle, the portion west of the Nashua River forming the spout, and the Throne comes in the spout. It is 484 feet high.

MEADOWS.—The early settlers of Groton, according to the town records, had many parcels of meadow allotted to them in the assignment of land. Sergeant

James Parker owned in twenty different meadows, and the other settlers also were large owners. It is probable that they did not attach the same significance to the word "meadow" which now belongs to it in New England, where it means low, swampy land, without regard to the mowing. They called by this name all grass-land that was annually mown for hay, and especially that by the side of a river or brook; and this meaning of the word was and still is the common one in England, whence they brought their language. They sometimes spoke of a "swamp," meaning by it what we call a "bog;" but much of this kind of land has since been reclaimed, and is now known as "meadow." As a matter of fact, it happened that the lands which could be mown for the fodder were low lands; and it would require perhaps less than a generation to transfer the meaning of mowing lands to the low lands, which were nearly the only ones that could be mown in the early days of the Colony. This explanation will make clear the following vote of the town, passed on February 18, 1680-81:

"At the same meeting it was agreed upon and voted that Mr Hubbard should have all the comon which was capable to mak medow in swan pond medow vp to the vpland for seauen acre and a halfe for to mak vp his fifteen acres of medow."

The following names of meadows are found in the town records, and in a few instances I have indicated their locality:

Accident; Angle, in the northerly part of the town; Big Spring, in the neighborhood of Hawtree Brook; Broad, immediately west of the village; Brook; Brown Loaf, east of the hill; Buck, now lying within the limits of Nashua, New Hampshire; Burnt, in the vicinity of Baddacook Pond; Cow Pond, near the pond of that name; East; Ferney, near Brown Loaf; Flaggy, to the southward of the Baddacook road, near the pond; Flax; Great Flaggy, presumably near Flaggy, and perhaps the same; Great Half-Moon, the same as Half-Moon, which lies east of the village; Little Buck, probably a part of Buck Meadow; Little Half-Moon, a part of Half-Moon, being an offshoot from it; Lodge; Long; Maple; Massapoag, evidently near Massapoag Pond; New Angle; Pine; Plain; Pretty; Providence; Quasoponagon, "ou the other aid of the riuier," near the Red Bridge, through which Wrangling Brook runs; Reedy, known by this name to-day, lying north of the Reedy Meadow Road; Rock, south of Snake Hill; Sallo, perhaps Sallow, a kind of willow; Sedge; Skull, through which Unquetenasset Brook runs, near the Dunstable line; Sledge, north of Reedy Meadow, near the Sledges; South; South Brook; Spang; Spot; Spring; Spruce; Swamp; Swan Pond; and Weavers.

In the record of Daniel Pearse's land, by William Longley, town clerk, on July 6, 1666, reference is made to the "iland lying within the meadow called Little Halfe Moone Meadow." This land now be-

longs to Governor Boutwell, and there is upon it a small knoll which is always spoken of as the island, undoubtedly a survival of the expression applied to it when more or less surrounded by water.

BROOKS.—*Cold Spring Brook*—a small brook, rising in Cold Spring "on y^e Left hand of the high way that goe to Reedy medow." It runs across the Nashua road, the East Pepperell road, through Hazen Swamp and Libby Lobby Moat, into the Nashua River.

Cow Pond Brook—has its source in Cow Pond Meadows and Cow Pond, and empties into Massapoag Pond. Formerly there was a dam between the meadows and the pond, where there was a saw-mill; and later on the same site a paper-mill, which disappeared about thirty-five years ago.

Gift Brook—in the north part of the town, rises in Gift Meadow, crosses Chicopee Row, and empties into Unquetenasset Brook.

James's Brook—one of the longest brooks within the limits of the town. It takes its rise in Half-Moon Meadow, crosses Main Street in the village, and runs southerly and westerly for three or four miles into the Nashua River. At its mouth is the beginning of the line separating the town of Ayer from Groton. Formerly there was a tannery on the banks of the brook, near Indian Hill, known as Dix's tannery; and a mile below, on land of the late Benjamin Moors, east of the road, at one time there was a mill,—but now no traces of either are left, except some remains of the mill-dam. The stream took its name from an Indian, who was a famous hunter and trapper in very early times. It empties into the Naahua River, nearly opposite to the mouth of the Squannacook.

Hawtree Brook—in the northerly part of the town, near Chicopee Row; after it unites with Walnut Run and two or three other small streams, it forms Unquetenasset Brook. In the early records of the town the Hawtrees are frequently spoken of, which refer to the neighborhood of this brook.

Nod Brook—rises near the Soapstone Quarry, crosses the Nod road, and runs into the Nashua River.

Reedy Meadow Brook—rises in Reedy Meadow and flows northerly, emptying into the Nashua River below East Pepperell. It is sometimes called Johnson's Brook.

Sedge Brook—a small brook from Sedge Meadow, running into Reedy Meadow Brook.

Tuity Brook—contracted from Gratuity—a very small stream which rises near the head of Farmers' Row and runs through Hazle Grove into the Nashua River below Fitch's Bridge.

Unquetenasset Brook—often called Unkety—A stream formed by the union of Walnut Run, Hawtree Brook, and one or two small tributaries, and running northerly through Skull Meadow and that part of Dunstable formerly Groton into the Nashua.

Walnut Run—a brook issuing from the sides of Chestnut Hills and uniting with Hawtree Brook and one or two other streams, forms the Unquetenasset.

Also the name of a place—perhaps it was the mouth of a stream—on the Nashua River where in olden times there was a bridge. It stood farther up the river than Fitch's Bridge.

Wrangling Brook—in West Groton, a mile and a half in length—meanders through Quasoponagon Meadow, and then empties into the Nashua a short distance below the Red Bridge.

ROADS.—*Baddacook Pond Road*—a continuation of the Martin's Pond Road to the neighborhood of the pond.

Break Neck—the short strip of road from the East Pepperell road to Common Street, south of the soapstone quarry.

Chicopee Row—running north for three miles from the Cemetery. The district to which it leads is known as Chicopee, a name given long ago.

Farmers' Row—applied to the road on the height of land west of the village. It begins at the west end of Pleasant Street, and runs in a southerly direction for two miles, passing by the Groton School.

Great Road—one of the principal thoroughfares between Boston and parts of New Hampshire and Vermont. The section of the road through the village is known as Main Street.

Hillside Road—the highway along the southern slope of the Indian Hills.

Love Lane—the highway from the Lowell Road, near the First Parish Meeting-house, to the Great Road near Cady Pond.

Martin's Pond Road—the highway from the site of the first meeting-house to the neighborhood of the pond, where it becomes the Baddacook Pond Road.

Reedy Meadow Road—from the Nashua road to Chicopee Row, immediately south of Reedy Meadow.

Squash Path—through the woods from the East Pepperell road to the Nashua road—a short distance beyond Cold Spring Brook.

Tuity Road—a contraction of Gratuity Road—the road leading to Fitch's Bridge from the Great Road near the railroad bridge, half a mile north of the village. The name had its origin in the early history of the town, when grants of land were made to the inhabitants as gratuities. Tuity Brook, a very small stream, crosses this road and empties into the Nashua River, below Fitch's Bridge.

MISCELLANEOUS.—*Brickyard*—on the north side of the Great Road, about a mile from the First Parish Meeting-house. It was much used during the last century; and probably was the place where the bricks were made for the parsonage, as mentioned in the town-records, June 20, 1706. Only a few traces of it are now left, though a clump of elms by the roadside is a good guide to the site.

Brown Loaf Plain—to the west of Brown Loaf.

Community—the name of a district or neighborhood beyond the Groton School, where many of the residents formerly held similar religious views. It had its origin nearly fifty years ago, when the Sec-

ond Adventists, or "Millerites," gave up their regular services in the village.

Dead River—the old course of the Nashua River, around the island which was formed by the cutting through of the "neck."

Deep Soil—in the neighborhood of the race-course, in Hazle Grove; so-called on the *lucus a non lucendo* principle.

Fitch's Bridge—over the Nashua River, a mile and a quarter below the Red Bridge.

General Field—often mentioned in the early town records, refers to land owned in severalty by the proprietors of Groton, who kept it as one field, for reasons not now understood. It was upland, and lay in the southwest part of the town, near the river. It appears to have been allotted to the proprietors, according to the number of acre-rights which each one owned. Perhaps it was land already cleared when the first settlers came.

The Gift—a parcel of land near Reedy Meadow, in the north part of the town.

The Hawthrees—mentioned several times in the early records, and referring, doubtless, to some native shrubs or trees; for instance, Zachery Sawtell had meadow-land "Near the hawtrees" confirmed to him on November 18, 1670. It evidently became the name of a limited district or neighborhood in the north part of the town, and from it undoubtedly Hawthree Brook was named. The late Professor Asa Gray, the distinguished botanist, wrote me that there are three or four species of wild hawthorn in Massachusetts. He says: "One of the forms of the Black or Pear Thorn (*Crataegus tomentosa*) would be the likeliest for Groton, or perhaps the Coekspur Thorn. The former has the more edible fruit, and would be sure to attract attention."

Hazen Swamp—near the mouth of Cold Spring Brook.

Hazle Grove—the neighborhood of the east bank of the Nashua River above Fitch's Bridge.

Hicks's Hole—a small piece of meadow, lying north of Reedy Meadow.

High Plain—on the north side of the Baddacook road, in the neighborhood of the pond. It lies in the angle of the roads, west of the house of John Johnson, Jr., as laid down on the map of Groton, made from a survey during the years 1828 and 1829.

Hog Swamp—lying between the westerly side of Martin's Pond and Martin's Pond Road. Governor Boutwell's private way to the Chestnut Hills passes through it.

Hoyt's Wharf—the name of a place on Cow Pond Brook where one Hoyt formerly kept his boat. It was near the house of Samuel Hazen,—as laid down on the map of Groton, made from a survey during the years 1828 and 1829,—nearly a mile north of Cow Pond.

The Island—a small, though prominent, hill in the meadow south of Hillside Road; undoubtedly once surrounded by water.

Wm. Linnell

Jamaica—the name of a small patch of meadow behind the hills on the west side of Chicopee Row.

Libby Lobby Moat—below the Ox Bow, opening into the Nashua River. This word is probably another form of Loblolly, in use at the South, and denoting wet land.

Lily Moat—on the east side of the Nashua and south of the road, near the Red Bridge.

Madagascar—the name of the district where the paper-mill formerly stood on the brook, between Cow Pond and Knop's Pond.

Nod—the district lying in the neighborhood of the four corners, below the anapatone quarry. The road from the Hollingsworth Paper-mills to this place is called the Nod Road.

Ox Bow—the bend of the Nashua River, in the northerly part of the town, below the Lawrence pasture.

Paugus Hole—in Paugus Brook, on the west side of Brown Loaf, where, it is said, the body of Paugus's descendant, who came to kill Chamberlain, was sunk, after he himself was killed.

Pine Plain—probably near the Nashua River, and perhaps on the westerly side. In December, 1673, Joseph Morse had meadow-lands on the Pine Plain, "neare the fordway."

Punch Bowl—one of several natural depressions near the Lowell road, below Brown Loaf. The name is also applied to the neighborhood.

Red Bridge—over the Nashua River, on the road to West Groton.

Sledges—the name of a meadow northeast of Reedy Meadow, mentioned in the early records, where John Lakin owned land. Mr. Butler, in his History (page 273), says that "this word seems to signify strips of meadow or parcels of low lands abounding in iron ore." Bog-iron is found in that quarter of the town, and in old times was worked by a company formed for that purpose.

Sodom—the district in the northwest part of the town, near the Townaend line. The name refers to the quality of the soil, and not to the character of the inhabitants.

Squannacook—an Indian word—the old name of West Groton,—applied to the river passing by that village.

Stony Fordway, or Wailing-Place—near the site of the Hollingsworth Paper-mills, on the Nashua River, a mile and a half northwesterly of the village.

Swill Bridge—was between the homesteads of Eber Woods, Jr., and Joel Davis,—as given on Mr. Butler's map of Groton, from a survey made in the years 1828 and 1829,—a short distance west of the present railroad bridge. Originally it was a causeway, perhaps twenty rods in length, over the southerly end of Broad Meadow, though now it is a solid road.

Thomas Turbell's Fordway—was between where the Red Bridge now stands and Fitch's Bridge, which is a mile and a quarter below.

Tobacco Pipe Plain—on both sides of the road from the Ridges to Sandy Pond, near Rocky Hill. It is mentioned in the "Bye-Laws of Groton relative to Schools; and Instruction of the School Committee, 1805," and in old deeds.

REFLECTION OF LIGHT.—The reflection of the electric light in Boston and the surrounding towns can be seen from certain elevations at a great distance. When the atmospheric conditions are favorable, it is distinctly visible on particular nights from Indian Hill at Groton, in the neighborhood of Major Moses Poor Palmer's house, and from other places in the town. A slight haziness in the air is needed in order to receive the reflection. The distance from Boston to Groton in a straight line is about thirty miles, though the illumination is helped by the electric systems of Newton and Waltham, which are somewhat nearer. From different points in the village of Groton the reflection of the circuits at Nashua, Lowell, Clinton and Fitchburg is often visible, which places are twelve or thirteen miles distant as the crow flies.

The illumination of the heavens during the great fire that occurred in Boston on the night of November 9, 1872, was distinctly seen by various persons in different parts of the town.

BIOGRAPHICAL.

ABBOTT LAWRENCE.

The name of Lawrence is one of the earliest to be found among the Puritan settlers of Massachusetts. John Lawrence, the first emigrant of the name, was established in Watertown as early as 1635.

Abbott Lawrence was the fifth son of Samuel and Susanna Lawrence. He was born in Groton on the 16th day of December, 1792. He received the family name of his paternal grandmother, Abigail Abbott, daughter of Nehemiah Abbott, of Lexington. His education, begun at the district school, was completed at the academy of the town, of which his father had been a trustee for many years. He enjoyed nothing in the way of educational advantages beyond this, but he evidently improved the time and turned all that he received to the best account. In 1808 he was sent to Boston and placed as an apprentice to his elder brother, Amos Lawrence, who had been for some years established there as an importer of English goods. By steady application and fidelity he prepared himself in this subordinate position for the responsibilities which were soon to come upon him as a principal. In 1814 he was admitted to partnership with his brother. The times were by no means encouraging, as we were in the midst of our war with England, and after a few months the prospect seemed so unpromising that Mr. Lawrence proposed to withdraw from the business and enter the army. He had pre-

viously been an active member of the New England Guards. He applied to the War Department for a commission, but before an answer could be received the news of peace arrived, and he abandoned all thought of a military life. He embarked in the first vessel that left Boston for England after the proclamation of peace to purchase goods for the market. "The passage was a short one. With characteristic ardor, he was the first to leap on shore, being thus, perhaps, the first American who touched his fatherland after the war was ended." He remained abroad for some time, on the occasion of this his first voyage to Europe, visiting the Continent, where he saw the allied armies immediately after the battle of Waterloo.

Messrs. A. & A. Lawrence soon engaged largely in the sale of cotton and woolen goods of domestic manufacture, and devoted all their energies to foster this great branch of the national industry. Mr. Lawrence's interest in the work of railroad construction in New England was hardly less than in the establishment and extension of the manufacturing system. He was a large subscriber to the various railroads projected for the concentration of trade in Boston, and this from a feeling of patriotism rather than the expectation of profit. Mr. Lawrence was chosen to represent Massachusetts at the Harrisburg Convention in 1827 and took a prominent part in its proceedings. In 1831 he was elected to the Common Council of Boston, but declined a re-election. In 1834 he was elected to Congress. On taking his place he was at once put on the Committee of Ways and Means. On the expiration of his term his constituents testified their sense of his services by inviting him to a public dinner. This he declined in a letter in which he touches on the great questions of the day. He declined a re-election to Congress, although the members of the opposite party gave him the remarkable assurance that, if he would consent to stand, no candidate should be brought out against him. Two years later he consented to accept a second nomination and again took his seat in the House. Shortly after his arrival he was attacked by typhus fever, so that for some time small hopes were entertained of his recovery. He resigned in the following autumn.

In the Presidential campaign of 1840, Mr. Lawrence took an active part in favor of the election of General Harrison. In September, 1842, he was president of the Whig Convention which nominated Henry Clay for President on the part of Massachusetts.

In 1842 Mr. Lawrence was appointed by the Governor one of the commissioners on the part of Massachusetts to negotiate a settlement of our northeastern boundary, which had been a source of irritation for many years between the United States and England. Quoting Mr. Prescott's language: "It is not too much to say that but for the influence exerted by Mr. Lawrence on this occasion the treaty, if it had been arranged at all, would never have been brought into the shape which it now wears." Mr. Nathan

Appleton in his memoir confirms this statement in the following words: "It is the belief of the writer, who was then in Congress, that to Mr. Lawrence more than to any other individual is due the successful accomplishment of the negotiation which resulted in the important Treaty of Washington."

In July, 1843, Mr. Lawrence, accompanied by his wife and daughter, embarked from Boston for England in the steamer "Columbia." The following day they were wrecked on Black Ledge, near Seal Island. After a week's detention on the island, they were transported to Halifax whence they proceeded on their voyage.

Mr. Lawrence's reputation had preceded him. He was received in England with marked attention, and the hospitality of many distinguished and influential people was extended to him.

In 1844 he was a delegate to the Whig National Convention and one of the electors at large for the State of Massachusetts. He was an ardent supporter of Henry Clay for the Presidency and deeply disappointed on his defeat.

In 1845 the Essex Company was organized and Mr. Lawrence was its president and the first and largest subscriber to its stock. The city of Lawrence, incorporated as a town in 1847, was named for him.

Most justly has it been said: "The broad comprehension, unwavering faith and large capacity of Abbott Lawrence should never be forgotten by dwellers in the city that bears his name."

In 1846 Mr. Lawrence addressed to the Hon. Wm. C. Rives, of Virginia, his celebrated letters on the tariff. Mr. Webster wrote to Mr. Lawrence from Washington: "Your letters to Mr. Rives have a very great circulation, as you are aware, and are highly praised by intelligent men. The second of them will form the substratum of what I propose to say (if I say anything) on the tariff subject." "These letters attracted much attention in all parts of the country and especially in Virginia, where they were re-printed and commented upon at length in the leading newspapers. So deep was the impression made in that State by them, and such a spirit of enterprise did they enkindle, that some of the leading citizens invited him to come and establish a manufacturing town at the Great Falls of the Potomac. This appeal on the part of a sister State for co-operation and leadership in the development of its industry and capital was a remarkable recognition and tribute to the ability and character of Mr. Lawrence. . . . But vast interests were at stake nearer home, and he could not allow himself to be diverted from this work by the projected enterprise on the shores of the Potomac, no matter how alluring the promise of results both to himself and to others."

Mr. Hill in his Memoir thus spoke of Mr. Lawrence: "His character, in all respects that of the pure New England type, was peculiarly so in the love and zeal which he always manifested in the cause of

PROPERTY OF JAMES LAWRENCE.

Abner T. Palmer

popular education. . . . We have an illustration of this in the letters written by him when he established the Lawrence prizes in the High and Latin Schools of Boston, (1844-45) giving to each the sum of \$2000—using his own language—the interest to be expended in medals, books, and other prizes among those pupils who may excel in the various branches of learning which are taught in those schools." In a like spirit he aided in the endowment of the Franklin Library at Lawrence which also received a bequest of \$5000 at his death.

For several years he had felt (to use his own words) "the pressing want in our community (and in the whole country) of an increased number of men educated in the practical sciences." "He was satisfied," says Mr. Prescott, "that, however liberal the endowments of that institution" (Harvard University) "for objects of liberal culture, no adequate provision had been made for instruction in science." When, therefore, the Corporation of the University announced its purpose of organizing a school of theoretical and practical science, he responded by a gift in 1847 of fifty thousand dollars. In recognition of his munificence the institution was named the Lawrence Scientific School. Soon after its establishment, Professor Agassiz was appointed to the chair of Zoology and Geology. Mr. Lawrence endowed the school with a further like sum by his will.

Mr. Lawrence was a leader in the movement to supply the city of Boston with an abundance of pure water. He attended several public meetings held to promote that object, and made speeches in support of it. One of them may be found in full in "Hill's Memoir" of him. The project met with the strongest opposition. The first act of the Legislature (passed March, 1845) authorizing the city to take water from either Long Pond or Charles River was rejected at the polls by a large majority, but a second act, such had been the change in public opinion only eleven months later, was accepted by a still larger majority. Water was brought into the city from Long Pond in October, 1848, and Mr. Lawrence lived to see all his predictions more than verified.

In the Presidential canvass of 1848 the name of Mr. Lawrence was prominently associated for the office of Vice-President with that of General Taylor for President, and at the convention in Philadelphia he wanted but six votes of being nominated for that office. This result was owing to the peculiar and unexpected course of some of the delegates from his own State. He, however, heartily sustained the nomination of Taylor and Fillmore. Immediately after the inauguration of General Taylor, Mr. Lawrence was offered a seat in his Cabinet, but declined it; soon after he was nominated to the mission to England, which he accepted. After serving three years his private affairs obliged him to return, and in October, 1852, he resigned. No minister from the United States was ever more respected or left behind him a more enviable reputation. The Rev. John Cumming, in dedicat-

ing the American edition of his "Apocalyptic Sketches" to Mr. Lawrence, says: "I regard this as an opportunity of expressing a conviction shared and felt by the good and great of this country how much they appreciated your presence in London, as the representative of your magnificent nation, and how deeply,—I may add universally,—they regretted your departure. We never had so popular a minister from America or one who has done so much to leave lasting and elevated impressions of his countrymen."

After his return from England, Mr. Lawrence held no public position, though he still maintained a warm interest in public affairs. He vigorously opposed the new State Constitution of 1853 and made numerous speeches against it; but with this exception and his efforts in the "canvass for General Scott as President, he took no active part in politics. He showed the same zeal as ever in the cause of education, and watched with the deepest interest over the rising fortunes of the Scientific School which he had founded at Cambridge."

Mr. Lawrence married, on the 28th of June, 1819, Katharine, the eldest daughter of the Hon. Timothy Bigelow, the distinguished lawyer. He died in Boston on the 18th of August, 1855, and was buried with civil and military honors.

Recognizing Mr. Lawrence's hearty and generous interest in the cause of education, as well as his valuable public services, Williams College in 1852 and Harvard College in 1854 conferred on him the honorary degree of Doctor of Laws.

HON. MOSES P. PALMER.¹

Moses Poor Palmer is a son of Moses Harriman and Mary Harriman (Hale) Palmer, and was born at Derry, N. H., on May 1, 1830. His parents were cousins, and in the year 1832 the family removed to East Bradford (now Groveland), where the son received his early education, attending school at Merrimack Academy, in that village. During the summer months he worked upon his father's farm, and in the winter on the shoemaker's bench, as was the custom of young men at that time in his neighborhood. He learned the trade of shoe-cutting at Marlborough; and in the year 1854 he came to Groton in order to superintend a shoe factory that had just been started. It was organized by Messrs. Bigelow and Randall, in a building that had then only recently been given up as a tavern, and situated near the Congregational meeting-house. On December 19, 1855, the establishment was burned, and then the business was transferred to the building previously used as a bakery and situated at the corner of Main and West Streets. Here young Palmer remained until 1858, when, in partnership with his brother, he began the manufacture of shoes at Marlborough, where he continued until the break-

¹ By Hon. Samuel Abbott Green.

ing out of the Rebellion in the spring of 1861. He then recruited a company of riflemen at Marlborough, and, on May 6th of that year, was commissioned as captain. In the mean time the quota of men asked for by President Lincoln was filled, and for that reason the company was not at once accepted, but was assigned afterward to the Fourth Battalion of Rifles, which became the nucleus of the Thirtieth Massachusetts Volunteers. On June 25th this organization was ordered to garrison Fort Independence, Boston Harbor, where it was soon recruited to ten companies; and on July 16th Palmer was commissioned as first lieutenant. On July 30th the regiment left for the seat of war, and, on August 16, 1862, Lieutenant Palmer was promoted to a captaincy, although he had been in command of the company during most of the time since the regiment left Boston. In the campaign of 1862 he was in command through all the principal battles of the Army of the Potomac, notably the second battle of Bull Run, where he was wounded three times,—one of which wounds was a very severe one, a bullet passing through his neck and lower jaw,—and also slightly wounded at Frederickburg. He took part in Bolivar Heights, Front Royal, Thoroughfare Gap, Chancellorsville, and various other battles and skirmishes.

During the fight at Gettysburg on July 1, 1863, while in the First Corps (Reynolds'), he was severely shot in the right knee and crippled for life, and on March 9, 1864, was honorably discharged from the military service. Owing to this wound he has lost the entire use of his knee, and is compelled to walk on crutches. On May 10, 1866, for gallant and meritorious services in the field, he was breveted major of volunteers.

After his discharge from the army Captain Palmer returned to Groton, the home of his wife, and bought a farm, situated on the Great Road to Boston, about a mile from the village, where he now lives, much respected in the community. For twelve years (1877-89) he served the town as selectman, assessor and overseer of the poor, and for four years was the chairman of the board. He has been commander of E. S. Clark Post, No. 115, Grand Army of the Republic; master of Grange No. 7, Patrons of Husbandry; an officer of the Groton Farmers' and Mechanics' Club, and a member of the Middlesex North Agricultural Society at Lowell, having been for many years one of its vice-presidents and trustees. He has been a justice of the peace since March 30, 1881, and is now treasurer of the New England Milk Producers' Union. His success as a farmer shows what can be accomplished by skill and application, and furnishes a good example for young men to follow.

Major Palmer was a member of the House during the session of 1884, and a member of the Senate during the sessions of 1888-90, a period of three years, a longer term of service than has ever been accorded to any other Senator from his district.

On July 7, 1861, he was married to Martha Green, daughter of Joshua and Matilda (Prescott) Eaton, of Groton; and they have one son and two daughters.

CHARLES HARRISON WATERS.¹

For a period of twenty-eight years, from 1855 to 1883, Charles Harrison Waters was one of Groton's most capable, efficient and respected citizens. He possessed in a marked degree the qualities which make a strong character; and his usefulness was equal to his energy.

He was the oldest son of Horace Waters and Ruth Hovey, of Millbury, Mass., where he was born July 31, 1828. His school days were not protracted, ending with a term or two at an academy. At the age of fifteen he was a factory boy; at eighteen, an overseer in a mill, already with an aim in life, and to the end of his busy career he pursued, in the main, the way of his father before him, that of a successful manufacturer.

Dec. 21, 1854 he married Mary J. Farnsworth, daughter of James Farnsworth, of Groton, where, in the following year, he took up his residence, at first, on the Farnsworth estate in the west part of the village, and, subsequently, purchasing and remodeling for his occupancy the house owned by Mr. John Peabody on Main Street (North). There were born to him three children, two of whom remain.

Mr. Waters was a man of action; his was an alert mind, his a ready hand. He could not be of the number of those "who merely exist in a state of benumbed torpor, not finding it needful to be more than half awake." He must be up and doing. And so he worked and over-worked until he broke down. Warning came to him some five years before, and he gave it heed just long enough to make a flying trip to Europe, but only to gird on the harness again as soon as he got back.

Mr. Waters had the genius of an inventor. Problems of natural philosophy, physics, books of science had to him far more attraction than other subjects.

He was still a young man only twenty-three when he went to Jewett City, Connecticut, and engaged in the manufacture of rope and twine, introducing original methods. Much of the machinery now in use in the extensive works of the Clinton Wire-cloth Company (of which he was first the agent, then the general manager, then vice-president, and finally president, which office he held at the time of his decease) was of his invention.

In prosecuting the new enterprise known as the Avery Lactate Company, and while personally superintending the construction of the building at Littleton, from the walls of which he was descending when attacked by paralysis, he either made himself, or caused to be made, some important and original investigations in chemistry. Had his life been spared

¹ By Rev. Joshua Young, D.D.

C. B. Motters.

Luther Blood

it is not impossible that this business venture would have been successful.

Undoubtedly the quality of efficiency would be mentioned as his chief mental characteristic. By virtue of his natural executive ability it was his right to lead—not simply to have his own way, but to have things *done* and well done. He used his power for good. And underneath that large, forceful brain there was also an equally large and benevolent heart. The charity that emanated from his house was widely recognized, his own kindness of heart being seconded by that of his estimable wife. As a citizen, he was public-spirited in an eminent degree. He was in favor of improvements, whether it was to have better schools or better roads. In the beautiful village of his residence, whatever gives attractiveness to the place, or character and dignity to the people, is due as much to his personal effort as to that of any other man of his generation. His religious affiliation was with the Unitarians. His attendance on the ministrations of the house of God was as regular and constant as the return of the Sabbath. His mind recognized a Supreme Intelligence, and bowed with reverence and adoration to an authority

“Enthroned above the reach of sight.”

For several years he was the president of the North Middlesex Conference of Unitarian and other Christian churches. He died March 13, 1883, aged fifty-four years.

A unique monument of his own design marks his resting-place in the village cemetery.

LUTHER BLOOD.

Luther Blood was born at Groton, October 21, 1810, and is a son of Luther and Sally (Cook) Blood. His grandfather, Caleb, married Hannah Holden, November 1, 1753, and Elizabeth Farnsworth, March 3, 1774. He had twenty-seven children, of whom Luther was the twenty-fifth. Elizabeth, the grandmother, was a member of the old Farnsworth family, whose name was among the first settlers of the town. Caleb was born November 23, 1734, and was the son of John and Joanna (Nutting) Blood, who were married July 13, 1712. The first ancestor in Groton of Luther Blood was probably James, who was one of four by the name of Blood who early went to the township and became original proprietors, and are mentioned as petitioners for a plantation at that place. The family name is a familiar one; and while some who bear it have become widely scattered in the land, there have yet been those who have continued it in Groton and the adjacent places, which were formerly a part of the ancient town. The old homestead, where the subject of this sketch was born, is situated in West Groton, near Fitch's Bridge. It is on the west side of the Nashua River, and is now owned and occupied by Augustus Blood, a brother of Luther. This estate has for many

years been in the possession of the Blood family. The grandfather of Luther came into possession of it when it was wilderness land, and by his industry and thrift it became a smiling homestead, where successive generations of the family have been reared. On this farm the subject of this sketch spent his early years, where his life was in accord with the customs and ways of the rural and sparsely-peopled places of our old New England towns. There was plenty of hard, rough work on the farm, and that substantial and wholesome fare, which may have been a condition of the robust health which he, at his advanced age, now enjoys. The education he received was at the humble school-house in what is still known as District No. 4, and consisted in what could be obtained in a course of six or eight weeks each year.

At the age of eighteen he left home and learned the carpenter's trade. Two school buildings still stand which were erected under his supervision, and which, by their contrast, suggest the rapid improvement in our educational means. One of these is a small, unoccupied, brick school-house, in District No. 4, built in 1835; the other the beautiful Lawrence Academy, erected in 1870.

May 2, 1844, Mr. Blood married Sarah Park Stone, of South Groton, now the town of Ayer. Miss Stone's birthplace was about a mile from Ayer Junction; but her later home was the "Stone Place," on the old road from Ayer to Groton. Mr. and Mrs. Blood have no children. Their residence is pleasantly situated on High Street, near the Lawrence Academy and the Unitarian Church. Mr. Blood was an old-time Whig, till the breaking up of that party, since which time he has been a Republican. His habits have been simple and regular. He has been temperate and industrious, and bears the marks of well-developed old age.

SAMUEL A. GREEN.¹

Samuel Abbott Green was born in Groton, Mass., March 16, 1830. He graduated at Harvard in 1851. After receiving his medical degree, in 1854, he spent several years in Europe. On his return he began the practice of his profession in Boston. May 19, 1858, he was appointed by Governor Banks surgeon of the Second Massachusetts Militia Regiment, and at the breaking out of the Rebellion he entered the service as assistant surgeon of the First Massachusetts Regiment, and was the first medical officer in the Commonwealth mustered in for three years' service. September 2, 1861, Dr. Green was promoted to surgeon of the Twenty-fourth Massachusetts Regiment, a position which he occupied until November 2, 1864. During this time he was on the staffs of various cavalry officers. On the Burnside expedition to Roanoke he had charge of the hospital-ship "Recruit," and later,

¹ By the Editor.

of the hospital-ship "Cosmopolitan," on the South Carolina coast. He was also chief medical officer at Morris Island during the siege of Fort Wagner. He was appointed post-surgeon at Jacksonville and St. Augustine, Fla., in October, 1863, and from this point went to Virginia, and was with the army when Bermuda Hundred was taken. After the surrender of Richmond Dr. Green was appointed acting staff-surgeon in that city, where he remained three months.

In 1862 he was successful in organizing Roanoke Cemetery, one of the first regular burial-places for Union soldiers, which was dedicated, with appropriate ceremonies on February 23, 1862. Dr. Green was faithful to his trust, and those characteristics which have marked his later life shone resplendent in the service, and in 1864, for gallant and distinguished services in the field, he was breveted lieutenant-colonel of volunteers.

At the close of the war he returned to Boston, where he has filled various positions of trust and responsibility. From 1865 to 1872 he was superintendent of the Boston Dispensary. He was a member of the Boston School Board in 1860, '62, '66 and '72; trustee of the Boston Public Library from 1868 to '78, and acting librarian from October, 1877, to October, 1878. In 1870 he was appointed by Governor Claflin on the commission to care for disabled soldiers. He was city physician from 1871 to 1880, and also, in 1878, he was chosen a member of the board of experts, authorized by Congress to investigate the yellow fever. He is now serving his fourth term as an Overseer of Harvard College, and is also one of the trustees of the Peabody Education Fund, which was established by the late George Peabody for educational purposes at the South.

In 1882 Dr. Green was elected mayor of Boston.

While Dr. Green has been active and prominent in the affairs of Boston generally, the distinguishing feature of his career, perhaps, is the time and research he has given to historical studies, and the various works which he has prepared and printed—many of them privately—form an invaluable addition to the historic literature of the Commonwealth.

Among his works may be mentioned the following: "My Campaigns in America," a journal kept by Comte William de Deux Ponts, 1780-81; translated from the French manuscript, with an introduction and notes (Boston, 1868); "An Account of Percival and Ellen Green and Some of their Descendants," (printed privately, Groton, Mass., 1876); "Epitaphs from the Old Burying-Ground in Groton, Mass." (1879); "The Early Records of Groton, Mass, 1662-1677" (1880); "History of Medicine in Massachusetts," a centennial address delivered before the Massachusetts Medical Society, June 7, 1881 (Boston, 1881); "Groton during the Indian Wars" (Groton, 1883); "Groton during the Witchcraft Times" (1883); "The Boundary Lines of Old Groton" (1885); "The Geography of Groton," preserved for the use of the

Appalachian (Mountain) Club (1886); "Groton Historical Series," thirty-seven numbers, 1883-1890, and the "History of Groton," in this work.

CHAPTER XLI.

CONCORD.

BY HON. JOHN S. KEYES.

Settlement—Early History—Indian Troubles—Capt. Wheeler's Narrative.

WHATEVER other distinction Concord has obtained, it has surely that of being the oldest inland Anglo-Saxon town in America. The first English settlement made above tide-water was here.

In 1635 a small company of twelve or fifteen families broke their way along the Indian trails into the forest, away from the sea-shore. Starting from Newtown (now Watertown), at the head of tide-water in the Charles River, they made their toilsome way along either the route still known as the "Trapelo" road, or that called the "Virginia," over hills and across swamps, to the "Musketaquid." Their object was the wide, grassy meadows of that stream, free from the forest growth, and the level plains on its banks where the Indians had raised their corn. These meadows and plains Simon Willard had known, if not seen, in his trading for furs with the natives. He was the leader of the small company, made up of Peter Bulkeley, the minister, John Jones, the teaching elder, William Buttrick, James Hosmer, Robert Fletcher, John Ball, George Hayward, Richard Rice, William Hartwell, John Heald, William Judson, Luke Potter, John Scotchford, Merriams and Wheelers, with their families,—sturdy Englishmen from Kent, Surrey, Yorkshire and Bedfordshire, who had come to this country in the "great emigration" of that time. They had secured from the General Court an act of incorporation, dated September 2, 1635, granting them "six myles of land square," and the name of "Concord."

For shelter the first winter they made rude hovels of earth and brushwood on the southerly slope of the mile-long ridge east of the Common. The next year they built their first frame house for the minister and elder, on the little knoll at the northwest end of the ridge nearest the river, and their first meeting-house on the summit of the ridge. In this dwelling-house they made their bargain with the Indians for the land, three miles north, south, east and west, and obtained a deed signed by Squaw Sachem, Tahattawan, Nimrod, and others. For this they paid in wampum, beads, blankets, hoes, knives and cloth, to the satisfaction of the native owners, and were "made welcome." This land was laid out, and the corners of the tract marked by stone bounds, with surprising exactness, considering the difficulties of the task. It

included a part of the present Carlisle on the north, of Bedford on the east, and Lincoln on the south, and agrees with the line of Sudbury and Acton on the other sides. These lines took in Fairhaven Bay, White, Bateman's, Flint's, Walden and Beaver Ponds, and Nashawtuck, Annurnsack and Punkatasset Hills.

The first road was laid out along the foot of the ridge, and the earliest houses were built in the place of the hovels of the first winter. New-comers to the growing settlement soon extended the hamlet across the brook that flowed near the first road. A dam across this brook at the side of the Common gave the power to the first mill erected as soon as practicable. The farms taken up by the settlers, as their choice or fancy inclined, were very early extended out in a northwesterly direction across the river. "Canows" were for a time used for access to and from these, but a bridge was soon needed. The first, built over the south branch to the foot of Nashawtuck Hill, was carried away up stream by a freshet coming from the Assabet or North River as it was then called. The second bridge was built over the great river below the junction of the two branches at the spot destined to become historical. The South bridge took the place of the one first mentioned at a point higher up the stream. These, with the roads leading over them, were the public works of the first generation, and they were great undertakings for the time and the men. In such a community as this, after food and shelter were found, religious concerns were most prominent. A Puritan church was organized for Concord by a council that met at Cambridge July 5, 1636. Rev. Peter Bulkeley was ordained pastor, and Rev. John Jones, elder. The latter, after a few years' service, left Concord with a part of the settlers and moved to Connecticut. The former remained, and spent his life and fortune in the service of the small company he had joined for the settlement of this town. Peter Bulkeley, B.D., was of noble birth, scholarly attainments and ample resources, probably the foremost of all the earlier ministers of New England. He was born at Wodell, in Bedfordshire County, January 31, 1583, educated at St. John's College, Cambridge, settled in his native town, and preached there twenty years. Persecuted by Archbishop Laud, he left his parish and emigrated to this country. He was an eloquent preacher, a useful pastor and a great help to the infant settlement. He published a volume of sermons which reached a second edition, and was dedicated "to the church and congregation in Concord," and to his nephew "Oliver St. John, Lord Ambassador Extraordinary from the Parliament of the Commonwealth of England to the High and Mighty Lords, the States General of the United Provinces of the Netherlands and Lord Chief Justice of the Common Pleas," (afterwards Lord Bolingbroke), London, 1651. Mr. Bulkeley married for his first wife Jane, daughter of Sir Thomas Allen, by whom he had nine sons and two daughters. For his second wife he mar-

ried Grace, daughter of Sir Richard Chetwood, and had by her three sons and a daughter. He died March 9, 1659, leaving an estate of £1302, including books valued at £123.

He was succeeded by his son, Rev. Edward Bulkeley, who, though not the equal of his father, continued to preach till the increase of the town and his infirmities required the aid of a colleague in 1667. His only printed work is the sermon preached at a special Thanksgiving held October 26, 1675, on the return of Captain Wheeler's expedition, and published with the narrative of that striking event of Philip's War. He died January 2, 1696, after fifty-three years' service as minister at Marshfield and Concord.

Rev. Joseph Estabrook graduated at Harvard College in 1664, and, first settled here as a colleague, remained the minister till his death, September 16, 1711, and left of all his sermons only the annual election sermon of 1705 in printed form.

Rev. John Whiting succeeded to the charge. He was a graduate of Harvard in 1700, and a tutor there before his settlement in Concord. He preached till 1737, when he was dismissed by a council, but continued to reside in Concord till his death, May 4, 1752. Thus through more than a century the church and the town, one and inseparable, had prospered under the preaching of these learned, pious and useful ministers, with as little of incident or disturbance as falls to the lot of such organizations.

With the settlement of Rev. Daniel Bliss in 1738, and the differences of opinion that grew up in New England about this time, troubles began in this church and community. A revival occurred under Mr. Bliss' preaching, and in 1741 the celebrated Whitefield preached in Concord, who greatly excited his hearers, so that a great awakening ensued and fifty persons joined the church that year, and sixty-five more in 1742. As usual, out of this excitement much controversy and division arose, and council after council failed to satisfy the discontent. A new society was formed by the seceders from the old parish in 1745, and met for worship in a tavern. This stood near the site of the present Library building, had a sign of a black horse over the door, which caused the society to be called in derision "The Black Horse Church."

The early settlers soon found the meadows wet and the plains unfertile, so that in 1644 quite a number of the disheartened followed Elder Jones to Connecticut. Those left in Concord were persevering, and soon obtained from the General Court new grants of land westerly and northwesterly of the "Six Miles Square," furnishing fields and "pastures new" to the old settlers and attracting new-comers to the town.

From the bargain made with the Indian owners of the place, and the kind treatment these received from the white men, no serious raid was made by the Indians upon Concord, while the towns beyond suf-

ferred greatly from their attacks. A few of the more exposed homesteads in remote parts of the town were raided, and one or two unwary farmers were killed at their work, but no great damage was done. Concord, however, furnished its full proportion of the soldiers and scouting-parties to defend the more remote settlements.

Captain Thomas Wheeler, who led a company of troopers, chiefly from this town, to the defence of Brookfield in Philip's War, wrote an account of the expedition that was printed with the sermon of Rev. Edward Bulkeley, preached to the survivors on their return, in 1675. Only two copies of this pamphlet are known to be in existence, and from the one presented to the Concord Library by the Hon. George F. Hoar the following extracts are made. It shows, better than pages of modern writing would describe, the dangers and hardships our ancestors incurred in the savage warfare that for a century was carried on by the Indians against the white settlers of this colony:

CAPT. THOMAS WHEELER'S NARRATIVE

of an expedition with Capt. Edward Hutchinson into the Nipmuck Country and to Quaboag (now Brookfield).

"A true narrative of the Lord's providences in various dispensations towards Capt. Edward Hutchinson, of Boston, and myself, and those that went with us into the Nipmuck Country, and also to Quaboag, *alias* Brookfield: The said Captain Hutchinson, on having a Commission from the Honoured Council of this Colony to treat with several Sachems in those parts, in order to the public peace, and myself being also ordered by the Said Council to accompany him with part of my troop, for security from any danger that might be from the Indians; and to assist him in the transaction of matters committed to him—

"The said Captain Hutchinson and myself, with about twenty men or more, marched from Cambridge to Sudbury July 28, 1675; and from thence into the Nipmuck Country, and finding that the Indians had deserted their towns, and we having gone until we came within two miles of New Norwich, on July 31st (only we saw two Indians having an horse with them, whom we would have spoke with, but they fled from us, and left their horse, which we took) we then thought it not expedient to march any further that way, but set our march for Brookfield, whither we came on the Lord's day about noon. From thence the same day (being August 1st), we, understanding that the Indians were about ten miles northwest from us, we sent out four men to acquaint the Indians that we were not come to harm them, but our business was only to deliver a message from our Honoured Governour and Council to them, and to receive their answer, we desiring to come to a treaty of peace with them (though they had for several days fled from us), they having before professed friendship and promised fidelity to the English. When the messengers came

to them they made an alarm, and gathered together about an hundred and fifty fighting men, as near as they could judge. The young men amongst them were *stout* in their speeches, and surly in their carriage. But at length some of the chief Sachems promised to meet us on the next morning about 8 of the clock upon a plain within three miles of Brookfield, with which answer the messengers returned to us. Whereupon, though their speeches and carriage did much discourage divers of our company, yet we conceived that we had a clear call to go to meet them at the place whither they had promised to come. Accordingly we, with our men, accompanied with three of the principal inhabitants of the town, marched to the place appointed, but the treacherous heathen, intending mischief (if they could have opportunity) came not to the said place, and so failed our hopes of speaking with them there. Whereupon the said Captain Hutchinson and myself, with the rest of our company, considered what was best to be done; whether we should go any further towards them or return, divers of us apprehending much danger in case we did proceed, because the Indians kept not promise there with us. But the three men who belonged to Brookfield were so strongly persuaded of their freedom from any ill intentions towards us (as upon other bounds, so especially because the greatest part of those Indians belonged to David, one of their chief Sachems, who was taken to be a great friend to the English); that the said Captain Hutchinson, who was principally intrusted with the matter of Treaty with them, was thereby encouraged to proceed, and marche forward towards a Swampe where the Indians then were. When we came near the said swampe the way was so very bad that we could march only in a single file, there being a very rocky hill on the right hand and a thick swampe on the left. In which there were many of those cruel, bloodthirsty heathen, who there waylaid us, waiting an opportunity to cut us off: there being also much brush on the side of the said hill, where they lay in ambush to surprise us. "When we had marched there about sixty or seventy rods, the said perfidious Indians sent out their shot upon us as a showre of haile, they being (as was supposed) about two hundred men or more. We seeing ourselves so beset, and not having room to fight, endeavored to fly for the safety of our lives. In which flight we were in no small danger to be all cut off, there being a very miry swamp before us, into which we could not enter with our horses to go forward, and there being no safety in retreating the way we came, because many of our company who lay behind the bushes and had left us pass by them quietly; when others had shot they came out and stopt our way back so that we were forced as we could to get up the steep and rocky hill; but the greater our danger was the greater was God's mercy in the preservation of so many of us from sudden destruction. Myself being gone up part of the hill without any hurt, and per-

ceiving some of my men to be fallen by the enemies' shot, I wheeled about upon the Indians, not calling on my men who were left to accompany me, which they in all probability would have done, had they known of my return upon the enemy. They firing violently out of the swamp and from behind the bushes on the hillside wounded me sorely and shot my horse under me, so that he faltering and falling I was forced to leave him, divers of the Indians being then but a few rods distant from me. My son, Thomas Wheeler, flying with the rest of the company, missed me amongst them, and fearing that I was either shot or much endangered, returned toward the swampe again, though he had then received a dangerous wound in the reins, where he saw me in the danger aforesaid. Whereupon he endeavored to rescue me, showing himself therein a loving and dutiful son, he adventuring himself into great peril of his life to help me in that distress, there being many of the enemies about me. My son set me on his own horse and so escaped, awhile on foot himself, until he caught an horse whose rider was slain, on which he mounted, and so through God's great mercy we both escaped. But in this attempt for my deliverance he received another dangerous wound, by their shot, in his left arm. There were then slain, to our great grief, eight men, viz.: Zachariah Philips of Boston, Timothy Farlow of Billerica, Edward Coleborn of Chelmsford, Samuel Smedley of Concord, Sydrach Hopgood of Sudbury, Sergeant Eyres, Sergeant Prichard and Corporal Coy, the inhabitants of Brookfield, aforesaid. It being the good pleasure of God that they should all these fall by their hands, of whose good intentions they were so confident and whom they so little mistrusted. There were also then five persons wounded, viz.: Captain Hutchinson, myself, and my son Thomas, as aforesaid, Corporal French of Billerica, who having killed an Indian was (as he was taking up his gun) shot and part of one of his thumbs taken off, and also dangerously wounded through the body, near the shoulder. The fifth was John Waldo, of Chelmsford, who was not so dangerously wounded as the rest. They also then killed five of our horses and wounded some more which soon died after they came to Brookfield. Upon this sudden and unexpected blow given us (wherein we desire to look higher than man the instrument) we returned to the town as fast as the badness of the way and the weakness of our wounded men would permit, we being then ten miles from it. All the while we were going, we durst not stay to staunch the bleeding of our wounded men for fear the enemy should have surprised us again, which they attempted to do, and had in all probability done, but that we perceiving which way they went wheeled off to the other hand and so by God's good providence towards us they missed us, and we all came readily upon and safely to the town, though none of us knew the way to it, those of the place being slain, as aforesaid, and

we avoiding any thick woods and riding in open places to prevent danger by them. Being got to the town we speedily betook ourselves to one of the largest and strongest houses therein, where we fortified ourselves in the best manner we could in such straits of time, and there resolved to keep garrison, though we were but few and meanly fitted to make resistance against such furious enemies. The news of the Indians' treacherous dealing with us, and the loss of so many of our company thereby, did so amaze the inhabitants of the town that they being informed by us, presently left their houses, divers of them carrying very little away with them, they being afraid of the Indians suddenly coming upon them, and so came to the house we were entered into, very meanly provided of clothing or furnished with provisions.

"I perceiving myself to be disenabled for the discharge the duties of my place by reason of the wound I had received, and apprehending that the enemy would soon come to spoyle our town and assault us in the house, I appointed Simon Davis, of Concord, James Richardson and John Fiske, of Chelmsford, to manage affairs for our safety with those few men whom God hath left us, and were fit for any service, and the inhabitants of the said town; who did well and commendably perform the duties of the trust committed to them with much courage and resolution, through the assistance of our gracious God who did not leave us in our low and distressed State but did mercifully appear for us in our greatest need, as in the sequel will clearly be manifestad.

"Within two hours after our coming to the said house or less, the said Captain Hutchinson and myself posted away Ephraim Curtis, of Sudbury, and Henry Young, of Concord, to go to the Honoured Council at Boston, to give them an account of the Lord's dealing with us in our present condition. When they came to the further end of the town they saw the enemy rifling of houses which the inhabitants had forsaken. The post fired upon them and immediately returned to us again, they discerning no safety in going forward, and being desirous to inform us of the enemies' actings that we might more prepare for a sudden assault by them, which indeed presently followed, for as soon as the said post was come back to us, the barbarous heathen pressed upon us in the house with great violence, sending in their shot amongst us like baile through the walls and shouting as if they would have swallowed us up alive, but our good God wrought wonderfully for us so that there was but one man wounded within the house, viz—the said Henry Young who looking out of the garret-window that evening was mortally wounded by a shot, of which wound he died withiu two days after. There was the same day another man slain, but not in the house, a son of Serjeant Prichard's, adventuring out of the house wherein we were to his Father's house not far from it, to fetch more goods out of it, was caught by those cruel enemies as they were com-

ing towards us, who cut off his head, kicking it about like a foot ball, and then putting it upon a pole they set it up before the door of his Father's house in our sight.

"The night following the said blow they did roar against us like so many wild bulls, sending in their shot amongst us till towards the moon rising which was about three of the clock, at which time they attempted to fire our house by hay and other combustible matter which they brought to one corner of the house and set it on fire. Whereupon some of our company were necessitated to expose themselves to very great danger to put it out. Simon Davis, one of the three appointed by my self as Captain to supply my place by reason of my wounds as aforesaid, he being of a lively spirit encouraged the soldiers within the house to fire upon the Indians; and also those that adventured out to put out the fire (which began to rage and kindle upon the house side) with these and the like words, that *God is with us, and fights for us, and will deliver us out of the hands of these heathen*, which expressions of his the Indians hearing they shouted and scoffed, saying, *now see how your God delivers you or will deliver you*, sending in many shots whilst our men were putting out the fire. But the Lord of Hosts wrought very graciously for us in preserving our bodies both within and without the house from their shots and our house from being consumed by fire, we had but two men wounded in that attempt of theirs, but we apprehended that we killed divers of our enemies.

"I being desirous to hasten intelligence to the Honourable Council, of our present great distress, we being so remote from any succour (it being between sixty and seventy miles from us to Boston, where the Council useth to sit), and fearing our ammunition would not last long to withstand them if they continued to assault us, I spake to Ephraim Curtis to adventure forth again on that service, and to attempt it on foot, as the way wherein there was most hope of getting away undiscovered; he readily assented and accordingly went out, but there were so many Indians everywhere thereabouts, that he could not pass without apparent hazard of life, so he came back again; but towards morning, the said Ephraim adventured forth the third time and was fain to creep on his hands and knees for some space of ground, that he might not be discerned by the enemy, who waited to prevent our sending, if they could have hindered it. But through God's mercy, he escaped their hands and got safely to Marlborough, though very much spent and ready to faint by want of sleep before he went from us, and his sore travel night and day in that hot season till he got thither, from whence he went to Boston; yet before the said Ephraim got to Marlborough, there was intelligence brought thither of the burning of some houses and killing some cattel at Quaboag by some who were going to Connecticut, but they, seeing what was done at the end of the

town, and hearing several guns shot off further within the town, they durst proceed no further, but immediately returned to Marlborough, though they knew not what had befallen Captain Hutchinson and myself and company, nor of our being there, but that timely intelligence they gave before Ephraim Curtis his coming to Marlborough occasioned the Honoured Major Willard's turning his march towards Quaboag for their relief, who were in no small danger every hour of being destroyed, the said Major being, when he had that intelligence, upon his march another way as he was ordered by the Honoured Council, as is afterwards more fully expressed.

"The next day being August 3d, they continued shooting and shouting and proceeded in their former wickedness blaspheming the name of the Lord and reproaching us his afflicted servants, scoffing at our prayers as they were sending in their shot upon all quarters of the house, and many of them went to the town's meeting-house (which was within twenty rods of the house in which we were), who mocked, saying come and pray and sing psalms, and in contempt made an hideous noise somewhat resembling siuging. But we to our power did endeavour our own defence, sending our shot amongst them, the Lord giving us courage to resist them and preserving us from the destruction they sought to bring upon us. On the evening following we saw our enemies carrying several of their dead or wounded men on their backs, who proceeded that night to send in their shot as they had done the night before, and also still shouted as if the day had been certainly theirs, and they should without fail have prevailed against us which they might have the more hopes of in regard that we discerned the coming of new companies to them to assist and strengthen them, and the unlikelihood of any coming to our help.

"They also used several stratagems to fire us, namely, by wild fire in cotton and linen rags with brimstone in them, which rags they tied to the piles of their arrows sharp for the purpose and shot them to the roof of our house after they had set them on fire, which would have much endangered the burning thereof, had we not used means by cutting holes through the roof and otherwise to beat the said arrows down, and God being pleased to prosper our endeavours therein. They carried more combustible matter as flax and hay to the sides of the house and set it on fire and then flocked apace towards the door of the house either to prevent our going forth to quench the fire as we had done before or to kill our men on their attempt to go forth or else to break into the house by the door, whereupon we were forced to break down the wall of the house against the fire to put it out. They also shot a ball of wild-fire into the garret of the house which fell amongst a great heap of flax or tow therein, which one of our soldiers, through God's good Providence soon espied, and having water ready presently quenched it, and so we

were preserved by the keeper of Israel both our bodies from their shot which they sent thick against us and the house from being consumed to ashes, although we were but weak to defend ourselves, we being not above twenty and six men with those of that small town who were able for any service, and our enemies as I judged them about (if not above) three hundred. I speak of the least, for many there present did guess them to be four or five hundred. It is the more to be observed that so little hurt should be done by the enemies' shot it commonly piercing the walls of the house and flying amongst the people, and there being in the house fifty women and children besides the men before mentioned. But abroad in the yard one Thomas Wilson, of that town, being sent to fetch water for our help in further need (that which we had being spent in putting out the fire) was shot by the enemy in the upper jaw and in the neck, the anguish of which wound was at the first that he cried out with a great noise by reason whereof the Indians hearing him rejoiced and triumphed at it, but his wound was healed in a short time praised be God.

"On Wednesday, August 4th, the Indians fortified themselves and the barns belonging to our house, which they fortified, both at the great doors and at both ends, with posts, rails, boards and hay, to save themselves from our shot. They also devised other stratagems to fire our house on the night following, namely, they took a cart and filled it with flax, hay and candlewood and other combustible matter, and set up planks fastened to the cart to save themselves from the danger of our shot. Another invention they had to make the more sure work in burning the house: they got many poles of a considerable length and bigness, and spliced them together at the ends one of another, and made a carriage of them about fourteen rods long, setting the poles in two rows, with peils laid cross over them at the front end, and dividing these said poles about three feet asunder, and in the said front end of this, their carriage, they set a barrel, having made a hole through both heads, and put an axle-tree through them, to which they fastened the said poles, and under every joynt of the poles where they were spliced, they set up a pair of truckle wheels to bear up the said carriages, and they loaded the front or fore end thereof with matter fit for firing, as hay and flax and chips, &c.

"Two of these instruments they prepared that they might convey fire to the house with the more safety to themselves, they standing at such a distance from our shot whilst they wheeled them to the house. Great store of arrows they had also prepared to shoot fire upon the house that night, which we found after they were gone, they having left them there. But the Lord, who is a present help in times of trouble, and is pleased to make his people's extremity his opportunity, did graciously prevent them of effecting what they hoped they would have done by the aforesaid devices, partly by sending a shower of rain in

season, whereby the matter prepared, being wet, would not so easily take fire as it otherwise would have done, and partly by aide coming to our help. For our danger would have been very great that night had not the only-wise God (blessed for ever!) been pleased to send to us about an hour within eight the worshipful Major Willard, with Captain Parker, of Groton, and forty-six men more, with five Indians, to relieve us in the low estate into which we were brought.

"Our eyes were unto him, the holy one of Israel; in him we desired to place our trust, hoping that he would, in the time of our great need, appear for our deliverance, and confound all their plots, by which they thought themselves most sure to prevail against us; and God who comforteth the afflicted as he comforted the holy apostle Paul by the coming of Titus to him, so he greatly comforted us, his distressed servants, both souldiers and town inhabitants, by the coming of the said honoured Major and those with him. In whose so soon coming to us the good Providence of God did marvellously appear; for the help that came to us by the honoured Council's order (after the tydings they receive by our post sent to them) came not to us till Saturday, August 7, in the afternoon, nor sooner could it well come, in regard of their distance from us, i. e., if we had not had help before that time, we see not how we could have held out, the number of the Indians so increasing, and they making so many assaults upon us that our ammunition before that time would have been spent, and ourselves disabled for any resistance, we being but few and alwaies fain to stand upon our defence; that we had little time for refreshment of our selves, —either food or sleep. The said honoured Major's coming to us so soon was thus occasioned: he had a commission from the honoured council (of which himself was one) to look after some Indians to the westward of Lancaster & Groton (where he himself lived), and to secure them, and was upon his march towards them on the foresaid Wednesday in the morning, August 4th, when tydings coming to Marlborough by those that returned thither as they were going to Connecticut, concerning what they saw at Brookfield, as aforesaid, some of Marlborough knowing of the said Major's march from Lancaster, that morning, presently sent a post to acquaint him with the information they had received. The Major was gone before the post came to Lancaster; but there was one speedily sent after him who overtook him about five or six miles from the said town, he being acquainted that it was feared that Brookfield (a small town of about fifteen or sixteen families) was either destroyed or in great danger thereof, and conceiving it to require more speed to succour them (if they were not past help) than to proceed at present as he before intended; and being also very desirous (if it were possible) to afford relief to them (he being then not above thirty miles from them), he immediately

altered his course, and marched with his company towards us, and came to us about one hour after it was dark, as aforesaid, though he knew not then either of our being there nor of what had befallen us at the swampe and in the house those two days before.

“The merciful providence of God also appeared in preventing the danger that the honored major and his company might have been in when they came near us, for those beastly men, our enemies, skilful to destroy, indeavoured to prevent any help from coming to our relief, and therefore sent down sentinels (some nearer and some farther off), the farthest about two miles from us, who, if they saw any coming from the bay, they might give notice by an alarm. And there was about an hundred of them, who for the most part, kept at an house some little distance from us, by which if any help came from the said bay they must pass, and so they intended (as we conceive) having notice by their sentinels of their approach to way-lay them and if they could, to cut them off before they came to the house where we kept.

“But as we probably guess they were so intent and busy in preparing their instruments (as above said) for our destruction by fire that they were not at the house where they used to keep for the purpose aforesaid, and so the major’s way was clear from danger till he came to our house. And that it was their purpose so to have fallen upon him or any other coming to us at that house is the more probable in that (as we have since had intelligence from some of the Indians themselves) there was a party of them at another place who let him pass by them without the least hint or opposition, waiting for a blow to be given him at the said house, and then they themselves to fall upon them in the rear, as they intended to have done with us at the swampe, in case we fled back as before expressed.

“The major and company were no sooner come to the house and understood (though at first they knew not that they were English who were in the house, but thought that they might be Indians and therefore were ready to have shot at us till we discovered they were English by the major’s speaking, I caused the trumpet to be sounded) that the said Captain Hutchinson, myself and company with the town’s inhabitants were there, but the Indians also discerned that there were some come to our assistance, whereupon they spared not their shot, but poured it out on them; but through the Lord’s goodness, though they stood not far asunder one from another, they killed not one man, wounded only two of his company, and killed the major’s son’s horse; after that, we within the house perceived the Indians shooting so at them, we hastened the major and all his company into the house as fast as we could, and their horses into a little yard before the house, where they wounded five other horses that night; after they were come into the house to us the enemies continued their shoot-

ing some considerable time, so that we may well say had not the Lord been on our side when these cruel heathens rode up against us as they had swallowed us up quick when their wrath was kindled against us. But wherein they dealt proudly the Lord was above them.

“When they saw their divers designs unsuccessful, and their hopes therein disappointed, they then fired the house and barne (wherein they had before kept to lye in wait to surprize any coming to us), that by the light thereof they might the better direct their shot at us, but no hurt was done thereby, praised be the Lord. And not long after they burnt the meeting-house, wherein their fortifications were, as also the barne which belonged to our house, and so, perceiving more strength come to our assistance, they did, as we suppose, despair of effecting any more mischief against us. And therefore the greater part of them towards the breaking of the day, August the fifth, went away and left us, and we were quiet from any further molestations by them; and on that morning we went forth of the house without danger, and so daily afterwards, only one man was wounded about two days after, as he went out to look after horses, by some few of them skulking thereabouts. We cannot tell how many of them were killed in all that time, but one that afterwards was taken confessed that there were killed and wounded about eighty men or more. Blessed be the Lord God of our salvation who kept us from being all a prey to their teeth. But before they went away they burnt all the town except the house we kept in, and another that was not then finished. They also made great spoyle of the cattel belonging to the inhabitants, and after our entrance into the house, and during the time of our confinement there, they either killed or drove away almost all the horses of our company.

“We continued there both well and wounded towards a fortnight, and August the thirteenth Captain Hutchinson and my self, with the most of those that had escaped without hurt, and also some of the wounded came from thence, my son Thomas and some other wounded men came not from thence, being not then able to endure travel so farr as we were from the next town till about a fortnight after. We came to Marlborough on August the fourteenth, where Captain Hutchinson, being not recovered of his wound before his coming from Brookfield, and overtired with his long journey by reason of his weakness, quickly after grew worse and more dangerously ill, and on the nineteenth day of the said month dyed, and was there the day after buried, the Lord being pleased to deny him a return to his own habitation and his near relations at Boston, though he was come the greatest part of his journey thitherward. The inhabitants of the town also not long after men, women and children removed safely with what they had left to several places, either where they had lived before their planting or setting down there, or where they

had relations to receive and entertain them. The honoured Major Willard stayed at Brookfield some weeks after our coming away, there being several companies of souldiers sent up thither, and to Hadly and the towns thereabouts, which are about thirty miles from Brookfield, whither also the Major went for a time upon the service of the country in the present wars, and from whence there being need of his presence for the ordering of matters concerning his own regiment and the safety of the towns belonging to it, he, through God's goodness and mercy, returned in safety and health to his house and dear relations at Groaton.

"Thus I have endeavoured to set down and declare both what the Lord did against us in the loss of several person's lives and the wounding of others, some of which wounds were very painful in dressing and long ere they were healed, besides many dangers that we were in, and fears that we were exercised with, and also what great things he was pleased to do for us in frustrating their many attempts and vouchsafing such a deliverance to us. The Lord avenge the blood that hath been shed by these heathen, who hate us without a cause, though he be the most righteous in all that hath befallen there and in all other parts of the country; he help us to humble ourselves before him, and with our whole hearts to return to him, and also to improve all his mercies which we still enjoy, so that his anger may cease towards us, and he may be pleased either to make our enemies at peace with us or more destroy them before us.

"I tarried at Marlborough with Captain Hutchinson until his death, and came home to Concord August the 21 (though not thoroughly recovered of my wound), and so did others that went with me. But since I am reasonably well, though I have not the use of my hand and arm as before. My son Thomas, though in great hazard of life for some time after his return to Concord, yet is now very well cured and his strength well restored. Oh, that we could praise the Lord for his great goodness towards us. Praised be his name, that though he took away some of us, yet was pleased to spare so many of us and adde to our days; he help us whose souls he hath delivered from death, and eyes from tears, and feet from falling to walk before him in the land of the living till our great change come, and to sanctifie his name in all his ways about us, that both our afflictions and our mercies may quicken us to live more to his glory all our dayes."

This narrative has been well called the "Epic of New England Colonial Days." The combination of bravery and piety, of "trust in the Lord and keeping their powder dry," that characterizes this expedition is a marked example of the spirit of the times. The men who could do and suffer and believe as this troop did, were true founders of

In April, 1676, a force of Concord soldiers sent to the defence of Sudbury were decoyed into an ambuscade and nearly all killed by the Indians. Ten men are reported slain, but the names of only eight of them are now known. In the fall of that year the praying Indians of Nashoba, being short of food, were removed to Concord, and placed in the charge of John Hoar. The excitement about the attacks of the savages on the outlying settlements was so great that the presence here of these Christian Indians was not tolerated by many. A force under Captain Moseley, of Boston, appeared here on Sunday, and with scant ceremony hustled these poor converts off to Boston, where they were detained on Deer Island, in the harbor. John Hoar protested vigorously, and the Colonial authorities were appealed to in vain.

CHAPTER XLII.

CONCORD—(Continued).

Independence in Church and State—Preparations for Revolution—Journal of a British Spy.

FOR the first century of its life Concord had struggled for food, shelter and clothing, yet had sent forth its sons and daughters to found other settlements of the wilderness. It had increased in numbers and wealth, and had become one of the mother-towns. To the Province of Massachusetts it was the important central town, holding much the same position that Worcester now does to the State. With the troubles in the church, and the disturbance in politics, to which the citizens now found time from other labors to give their attention, a new era began. The new minister, Mr. Bliss, was at heart a Tory, and his views did not agree with those of his flock, who had helped to depose Governor Andros, and were already beginning to think of independence. Discussion was rife, and the town-meetings ere long held "high debate," and passed strong resolutions. The stir of national life was arising, and echoes from Boston and Salem were heard with quick response by this central town.

Next to the church, the military organization was the most important in the town. It began the first year after the settlement, when Simon Willard was appointed to exercise the freemen of Concord in training, and has been kept up in some form to this day. The story of Capt. Wheeler's command has been told. In 1689, on the thrice memorable 19th of April, the Concord company, under Lieut. John Heald, marched to Boston and helped execute the order of the Representatives, signed by Ebenezer Prout of this town as clerk to the Representatives, for the removal of Andros to the castle. This bloodless revolution ended the Colonial period of Massachusetts history.

The militia of Concord had their full share in the

"A Church without a Bishop,
A State without a King."

Indian and French Wars that kept the settlers in arms through the first half of the eighteenth century. They were present at Sudbury, where ten of their number were killed, Lancaster, Groton, in Lovewell's Fight, in the expedition against Cuba, at the capture of Louisbourg, at Crown Point and Fort Edward. Wherever long marches, sharp fighting and great privations were encountered, soldiers from Concord, in single files or full ranks, were found at the front. This military spirit and these adventurous expeditions fostered, even among those who remained at home, a tendency to emigration farther into the wilderness. Lancaster, Littleton, Rutland and Grafton, in Massachusetts, Peterborough and Keene, in New Hampshire, and many other settlements to the west were founded by Concord men.

The mutterings of the coming storm of the Revolution excited all, some with hopes and others with fears. Daniel Bliss, the lawyer, son of the Rev. Daniel, and Joseph Lee, the physician of the town, took the side of the King. James Barrett and Joseph Hosmer were as ardent for their country. Rev. William Emerson, the newly-settled minister, after Dr. Bliss' death, had healed the church difficulty, and this left more time for his hearers to consider political matters. As a town, Concord stood manfully for the rights of the Provincials, and her leaders were soon in consultation and agreement with Otis and Adams in resisting the arbitrary acts of the Parliament and the King of England.

The Boston Port Bill, the massacre in State Street, the tea party in Boston Harbor gave new fuel to the fire of excitement that raged in Concord and throughout the Province. It was much increased here by the meeting of the First Provincial Congress in this town, October 11, 1774. A Legislature had been chosen under the proclamation of General Gage, the Governor of Massachusetts, to meet at Salem. Finding that it would be hostile to his administration, he forbade its meeting, whereupon it organized as a Congress, and adjourned to Concord. Here, with its ranks filled up with sturdy patriots, chosen for the purpose by the towns, began the real work of organization for the conflict of arms that impended.

Concord was the suitable place for this meeting. Her part in the resistance to the King's encroachments on the charter and liberties of the Province had been conspicuous in both word and deed. In 1773 the town adopted a patriotic response to the address of the citizens of Boston. In 1774 Concord passed strong and bold resolutions against the illegal taxation and the importation of tea and other articles from England. These were made effective by the subscription of more than three hundred of the voters to a covenant not to consume such goods. So few opposed the patriot cause that, except three or four individuals, the town was a united body of Sons of Liberty.

A county convention was held here in August, 1774—the first of those in Massachusetts—at which

resolutions were passed denouncing the acts of Parliament and the new officers of Government appointed for the Province. To carry these into effect, some hundreds of men from this and neighboring towns, partly armed, marched to Cambridge. Finding no body of men in arms to oppose them, they laid aside their guns and visited several persons who were Tories and compelled them to recant their acceptance of offices under the Crown.

In September, 1774, the County Court was to meet here, but the assembling on the Common of a large number of men from this and other towns prevented its sitting and compelled it to adjourn.

At another large meeting, soon after, all suspicious persons were brought before a committee of the meeting, tried for Toryism, and if found guilty, were "humbled" as much as the crowd thought fit.

The Provincial Congress having begun the purchase of arms and ammunition and the collection of military stores Concord followed the example by procuring cannon and ammunition, the enlistment of two companies of minute-men and the raising of a liberty pole. The military stores and arms obtained by the Provincial Congress were mainly deposited in this town in the keeping of trusted patriots. This work and the sessions of the Congress made a busy, stirring season for the stout-hearted Whigs of the village, where the manufacture of gun-carriages, fire-arms, harnesses, accoutrements, musket-balls and cartridges went on lively all that winter. The Congress held its meetings in the old church, that yet stands, strangely altered, on the Common, being then a plain, barn-like structure, with two tiers of galleries and without any of its present adornments. John Hancock presided; Samuel and John Adams, Otis, Warren and others spoke; rousing resolutions were passed, a Committee of Safety appointed, regiments and companies of militia and minute men raised and the officers commissioned by the authority of the Congress. Concord agreed to pay the minute-men of the town for their time spent in drill and exercising, and examined them by a committee, and furnished with guns those not already supplied.

In March, 1775, a review was held of all the military companies of the town, and they marched into the meeting-house and heard a sermon from the Rev. William Emerson. On the next Thursday a solemn fast was kept, and Mr. Emerson again preached. To protect the arms and stores deposited here, guards were stationed at the bridges and in the centre, and on the road to Boston. The morning gun and guard-mounting at night gave the town the appearance of a military camp, and the excitement and enthusiasm was so great that some of the men carried their guns at all times, even to church on Sundays.

On March 22d, the Second Provincial Congress met here and remained in session till April 15th. This adopted measures to save the collected stores

and arms from seizure and destruction by the British forces, for improving the discipline of the minute-men and for organizing companies of artillery. After their adjournment the Committee of Safety were empowered to take all necessary steps to secure the safety of the Province.

Gen. Gage, the commander of the British forces in Boston, alarmed at these preparations for war, sent out spies and officers to find the condition and location of the stores and arms, and the opinion of the Tories as to the probabilities of resistance to the King's troops.

One of these spies came to Concord on his return from Worcester and kept a diary of his adventures on the trip. This was printed in 1827 at Concord, N. H., but as the edition was nearly all burned, only two copies are known to exist. From this curiously accurate journal the extracts that follow give a vivid picture of the state of feeling that existed in this county, and of the habits of the officers in Boston:

"Journal kept by Mr. John Howe while he was Employed as a British Spy during the Revolutionary War."

"On the 5th of April, 1775, General Gage called on me to go as a spy to Worcester to examine the roads, bridges and fording places, and to see which was the best route to Worcester to take an army to destroy the military stores deposited there. Accordingly Col. Smith and myself dressed ourselves as countrymen with gray coats, leather breeches, and blue mixed stockings, with silk flagg handkerchiefs round our necks, with a small bundle tied up in a homespun checked handkerchief in one hand, and a walking-stick in the other.

"Thus equipped we set out like countrymen to find work. We travelled to Cambridge, about two miles, and found the roads good. Nothing extraordinary took place until we got to Watertown, about six miles; here we called for breakfast at the tavern. While at breakfast there came in a negro woman to wait on the table. Col. Smith asked her where we two could find employment. She looked Col. Smith in the face and said, Smith, you will find employment enough for you and all Gen. Gage's men in a few months.

"This conversation about wound up our breakfast. Smith appeared to be thunderstruck, and my feelings were of the keenest kind. Directly the landlord came in and asked how our breakfast suited. Smith replied very well, but you have a saucy wench here. The landlord asked what she had said. Smith repeated very near what she had said, the landlord then replied that she had been living in Boston and had got acquainted with a great many British officers and soldiers there, and might take you to be some of them. Then we paid our reckoning as soon as possible, the landlord said it was likely that we could find work

up the road. We bid him good morning and set off, traveled about one mile, found the road very good; here we were out of sight of any house and got over the wall to consult what was best to be done.

"I told Smith that for us to go any farther together would be imprudent. Smith said he thought so, and would return back to Boston, if I would pursue the route. He then gave me up the journal-book and pencil, and ten guineas with several letters to Tories between Boston and Worcester. Smith said if he came out with a regiment that road, he would kill that wench. He told me if I would pursue the route and got through he would insure me a commission. So we parted. The last I saw of Smith was running through the barberry bushes to keep out of sight of the road.

"I then set out towards Waltham Plains, and found the roads good. When I got to the head of the plain, being about four miles from where we breakfasted, I called at a tavern and inquired if they wanted to hire. The landlord asked me where I was from, I told him from the eastward, he asked me what kind of work I could do. I told him farming work, but that I should rather work at gunsmithing, for that was my trade.

"When I mentioned that he told me I could get employment at Springfield, for they were in want of hands to work at that business, and said that I had better get there as soon as possible for they were in want of guns, for they expected the regulars out of Boston, and they meant to be ready for them. He asked me if I would take some spirit, I told him I would take some New England and molasses, for I well knew that to be a Yankee drink, and the good man wished me prosperity in my business and I set off.

"I found the roads hilly, stony and crooked for about three miles, when I came to a hollow with a narrow causeway over it; here I left the road and went below to see if there was any place where our artillery could cross, but finding none there I examined above and found it bad. Here I saw a negro man setting traps. The negro asked me what I was looking for, I told him for sweet flag root for the stomach ache. He said it did not grow here, but he had a piece he would give me; he walked out to the road with me. About ten feet from this narrow road stood the largest tree I ever saw. I asked the black man what kind of wood that tree was. He said buttonwood, and further said that the people were going to cut it down to stop the regulars from crossing with their cannon. I asked him how they would know when the regulars were coming in time enough to cut the tree down. He said they had men all the time at Cambridge and Charlestown looking out. This tree would completely blockade the road should they do it. I asked this negro how far it was to a tavern. He said one mile to a tavern by Weston meeting-house, another tavern half a mile above. I asked him which was the best, and what their names were. He said

the first was kept by Mr. Joel Smith, a good tavern, and a good liberty man; the other was kept by Capt. Isaac Jones, a wicked tory, where a great many British officers go from Boston to his house.

"Here I left the negro man and proceeded on my way one mile, found the road hilly, stony and crooked. Came to Smith's tavern, where two teamsters were tackling their teams. I asked them if they knew of any one who wanted to hire, one of them answered and said he did not know of any body who wanted to hire Englishmen, for they believed I was an Englishman. I asked them what reason they had for thinking so. They said I looked like them rascals they see in Boston, here I wished myself at Capt. Jones', but to start off then I thought it would not do. So I walked into the house, called for some rum and molasses, one of them followed me in, and told the landlord he guessed I was a British spy. The landlord then questioned me very closely, where I was from and where I was going. I told him I was going to Springfield to work at the gunsmithing business as I understood arms were very much wanted, but I should like to work a few days to get money to bear my expenses. The landlord told me he believed Capt. Jones would hire.

"I asked him where he lived, he said about half a mile above and kept tavern at the sign of the golden ball. This seemed to pacify the teamsters. I now went on to Capt. Jones, here I handed him a letter from Gen. Gage. After perusing it, he took me by the hand, and invited me up stairs. There I made him acquainted with all that had taken place from Boston here, it being fourteen miles.

"He informed me that it would not do for me to stay over night for his house would be mobbed and I should be taken. Here I got some dinner, then he said he would send his hired man with me to the house of one Wheaton in a remote part of the town where I must remain till he sent for me. After dinner I set out with the hired man for Mr. Wheaton's, I arrived there about sunset. The hired man informed Mr. Wheaton of my business, and that I was a British spy, and Capt. Jones wished him to keep me secure until he sent for me. Then I was conducted into a chamber with a table furnished with a bottle of brandy, candle, paper, etc. Now I went to work to copy from my head on a journal. I remained here all night, the next day being the sixth, the good hired man came to see me early in the morning. He informed me that the news of the conversation which took place at Watertown between Col. Smith and a black woman reached Capt. Jones' last evening by the same teamsters you saw at J. Smith's tavern yesterday. They insisted that there were British spies in the house. The news spread and by eleven o'clock there were thirty men collected. Capt. Jones gave them leave to search the house, which they did, in part, then they went into the kitchen and asked the black woman if there were any strangers or English-

men in the house. She replied she thought not. They asked if there had been any there that day. She answered, one or two gentlemen dined up stairs this afternoon. They asked her where they went to. She answered, they sent them off to Jericho Swamp, a dismal swamp about two miles from Jones' tavern. By this time their fury was subsided, Capt. Jones set on a bottle of spirits to drink, which they drank, and all retired.

"Now the hired man went home, saying he should call again in the evening. After breakfast I went to work upon my journal, here I set down the number of militia arms and ammunition of this place, sent to me by the hired man from Mr. Jones. After dinner Mr. Wheaton introduced his two daughters, stating to them that I was a British officer in disguise. Here we sat and played cards till tea time. After tea the ladies retired and I lie down, being very tired and expected company. That evening about eight o'clock the hired man called for me, and said he was going with me to Marlborough, but said we could not go by Capt. Jones', for they were lying in wait for me there. So I bid Mr. Wheaton and his family Good-bye, and off we set on the back road, coming out above Capt. Jones one mile on the Worcester road. Here I found the roads good to Sudbury River. Here I found myself twenty-five miles from Boston. Here we examined the river for a fording place, providing the bridge should be moved. We found a place which was fordable in Framingham, a town opposite from here. We proceeded for Esq. Barnes', in Marlborough, and found the roads bad. We traveled all night, examining the roads as well as possible, and arrived at the house of Esq. Barnes at two o'clock in the morning of the seventh. Here we knocked at the door, the Esq. put his head out of the window and asked who was there. My guide answered Capt. Jones' hired man. He struck a light and let us in. I gave him a letter from Gen. Gage. My guide likewise gave him one from Capt. Jones. After reading them he took me by the hand, saying he wished me good luck in my undertaking, and promised to assist me all in his power. He set on the table a bottle of brandy and some victuals. After refreshing ourselves I asked him if he had heard of the affair of the spies at Watertown and Weston. He answered he had, but it was not believed in that quarter. Here my guide bid me good-morning, and left me. The Esq. said I had better go to bed and rest myself, and that he would find means to help me to Worcester. I went to bed about four o'clock and slept till nine. Then the Esq. waked me, informing me that he had been to the tavern, and reports were there that two men, supposed to be spies by their examining a small bridge near the house where a woman, being up with a sick child, saw them. She said they went on toward Worcester.

"The Esquire told me I must remain there that day, make out the plan of the road so far as I had come,

and any other writing I wished to do. He said he would go back to the tavern and see if there was any stir about the spies. If there was, he would let me know seasonably enough so that I could be conveyed to the swamp. Here the table was furnished with victuals and drink, pen, ink and paper, and the Esquire left me to go to the tavern. About four o'clock in the afternoon he returned and said all was quiet, the stories had turned out to be negro stories. I must wait till dark, when he would let me have a horse, as he concluded I was tired to go to Worcester, when I must examine the roads and bridges as well as I could in the night, and I must remain in Worcester till the next night.

"About eight o'clock in the evening I started for Worcester on the Esquire's horae. I rode all night and it snowed all the time. I arrived in Worcester about an hour before sunrise, found the roads very hilly and bad. I had slow work getting along for I had to get off my horse to examine the road and bridges. Here I delivered a letter to Mr. . . . from Esquire Barnes, and one from General Gage. After reading them, he ordered my horse put up, and conveyed me to a private chamber, where he said I must remain all day. Here I was furnished with all things which were comfortable. I was informed of the number of militia, and of the quantity of military stores in this place. Nothing particular took place during the day. After dark Mr. . . . took me to the place where the military stores were deposited, showed me the place where I could break in; also two old wells where I could throw in them the flour and ammunition. Now I returned to the chamber, after he had looked over my papers, I asked him what he thought of an army coming from Boston to Worcester. He said he did not think a man would dare lift a gun to oppose the regulars, and asked me what was my opinion. I told him if he would keep it a secret, I would give him my opinion. He frankly declared he would. I then told him if General Gage sent five thousand troops with a train of artillery from Boston to Worcester, they would never one of them get back. Then he answered, We, his Majesty's friends, are in a bad situation.

"Then I collected up my papers, ordered my horse, and started from Worcester about nine o'clock in the evening to go to Esquire Barnes. The night was clear and cold. I was now fifty miles from Boston and in danger of being captured every moment. The night was long and dismal. I often wished that night that I had never undertaken the business of a spy. Nothing particular took place during that night. I arrived at Esquire Barnes' about the break of day on the 9th, where the Esquire kindly received me.

"Here I had some hot sling and a warm breakfast. Soon after breakfast I gave the Esq. my papers. He told me I must go to rest and lie till one o'clock and he would go to the tavern and see if he could make any discoveries which would operate against me. At

one o'clock he called upon me and informed me that all was safe, but it would not do for me to tarry in his house that night. I got dinner and then I collected my papers, after the Esq. had given me an account of the militia and ammunition from there to Worcester, and from this place to Weston, and all this he found out while I was gone to Worcester. Now he took me to his garret window and pointed the way for me to go to Concord. He said I must go across the lots and roads. He said I must start about eight o'clock. Then we retired to a private chamber; we conversed about the British coming to Worcester. Then I got my papers and tied them up in a bundie and threw them on a table all ready for a start, then he set on a bottle of brandy and we drank. Now, it being about eight o'clock, we heard a knocking at the front door. The Esq. told me if he did not return in one moment to make my escape out of the chamber window upon the shed and from there into the awamp, and make for Concord. I heard a man say, Esq., we have come to search your house for spies. I heard him say, I am willing. I then hoisted the window, leaped upon the shed, which being covered with snow, my feet flew up and I fell flat on my back in the garden. I recovered a little from the fall, picked up my bundle and hat, and made for the swamp, though considerably lame. Here I was afraid they would track me, the snow lying about six inches deep. When I got into the swamp I looked back to the house, and could see lights dodging at every window. I heard horse's feet in the road as if great numbers were collecting at the Esqr.'s house.

"Now, I traveled, as near as I could judge, four miles, the snow being on the ground. It was tolerably light. I came to a negro's house, where I found a black man and his wife. I told them I believed I had got out of my way and enquired the way to Concord. The man said I had better stay all night and he would show me the way in the morning. I told him my business was urgent, and if he would show me the way to the road which led to Concord I would pay him, showing him a silver dollar. He asked me what my business was, that I wished to go that night. I told him I was going to making guns to kill the regulars, for I thought they would be out of Boston in a few weeks. Now the man consented to go. The woman observed, she wished I could make guns to kill the regulars, as she understood there had been a number about Esq. Barnes' a day or two. I asked her if Esq. Barnes was a tory. She said he was. I said I hoped they would catch him and hang him.

"Then I set out with my black guide. We proceeded on to Concord River; my guide went to a black man's, a little above, where he borrowed a canoe, and carried me safe over. He said he would go with me a mile farther if I would give him a half a dollar, which I readily granted. When we arrived here he went up to a house and said we could buy some rum

here if I wanted. I told him I should be glad of it, and if he would go in I would follow him. Then he knocked and they bid us come in. Here my guide told them about my coming to his house, and our route across the lots, and my business. The people in the house appeared to be very glad. I called for some brandy and it was set on. I told my guide to help himself, which he did quite freely. The man of the house said I better tarry till morning and he would go to Concord with me, it being now nearly daylight. By this time my guide was fast asleep. I slept till about sunrise, and I called for some breakfast. I set out for Concord, which was in sight. Mr. Wetherby accompanied me to Concord, where he introduced me to Major Buttrick and several other gentlemen, and informed them that I wanted to get into business, which was gunsmithing. They said I was the very man they wanted to see, and would assist me all they could, and immediately went to hire a shop. Here they brought me several gun locks for me to repair, which I repaired with neatness and dispatch, considering the tools I had to work with.

"I was now invited to take dinner at the tavern with a number of gentlemen. The conversation at dinner was respecting the regulars at Boston, which they expected out. I asked them if there were many tories in the place. The answer was, they expected there were, but not openly. I was asked by a gentleman where I was from. I answered Pownalborough, down east. The gentleman asked what I might call my name. I answered him, Wood. He asked me if I was a relation of Col. Wood, of Pownalborough. A distant relation, I said. He asked me whether he was called a liberty man. I answered him it was doubtful which way he would be. He said he would write the Col. a letter immediately to stand his hand. He asked me when I was going to return there. I answered him that I was going right down to get some tools to carry on my business here. Inform the Col. when you see him, that you have seen old Major Parmenter of Sudbury; tell him I say, that if he turns tory I will seek his life at the risk of my own.

"By this time we had got through dinner. After dinner we walked up to the store house to examine some guns, they asked me if I could make such guns. I told them I could make any kind they wished. Here I found a quantity of flour, arms and ammunition. After examining the gates and doors attached to yard and store house, I returned to the tavern, where, after taking some brandy and water, I took leave of them, and set off for Pownalborough after my tools as they supposed.

"Now I set out on the road to Lexington, I travelled about two miles, here I called at a small house a small distance from the road. I found it inhabited by an old man and his wife. The old man was cleaning his gun. I asked him what he was going to kill, as he was so old I should not think we could take sight

at any game. He said there was a flock of red coats at Boston which he expected would be here soon, he meant to try and hit some of them, as he expected they would be very good marks.

"I asked him when they were expected out, he said he should not think strange if they should come before morning, he said some supposed they would go up through Watertown to Worcester for we hear they have sent out spies that road. I asked the old man how he expected to fight. He said open field fighting or any way to kill them red-coats. I asked him how old he was? he said seventy-seven, and never was killed yet. The old man asked me what parts I was from, and what my business was, I repeated the same story I did at Concord. I asked the old man if there were any tories nigh there. He said there was one tory house in sight, and he wished it was in flames. I asked what the man's name was. He said it was Gove. I very well knew where I was now, being the very house I wanted to find, it was situated in Lincoln, about four miles from Concord, Mr. Gove being one of his majesty's friends. Here the old gentleman told the old lady to put some balls in the bullet pouch. She asked him how many. He said 30 or 40, perhaps I shall have an opportunity to give some to them that have not got any. The old woman pulled out an old drawer and went to picking out. The old man says, Old woman, put in a handful of buck shot as I understood the English like an assortment of plumbs. Here I took leave of them. I travelled on the Lexington road about one mile, then I turned out west for Mr. Gove's house, arrived there about half hour after sunset, inquired for the man of the house, he immediately came forth. I told him I wanted to speak to him in private. He took me to a private room I informed him of my business and told him I put my life in his hands. I laid my papers on the table and asked him to examine them. He told me to give myself no uneasiness for he was my friend. He informed me he was at Southboro at the time I escaped from Esq. Barnes', he informed me the mob were supplied with tar and feathers to apply to the Esq., if they found me in the house.

"I was furnished with refreshment and apparatus for continuing my Journal. I wrote until about 10 o'clock when Mr. G. came into the chamber and informed me he must remove me to an out house he had at a small distance to lodge, for fear the plot would be found out at Concord, and his house would be immediately searched. Accordingly I did, and retired to rest. He called me about break of day, this being the 11th day, and said I might return to my chamber, and he would go to Concord, and see if he could hear any thing new.

"He returned from Concord about 10 o'clock, and said they were very much pleased with the prospect of having an armory established there. He said I must stay until evening, and he would convey me to Charlestown which was about 12 miles. Accordingly

about eight o'clock in the evening we set out for Charlestown both on horseback and examined the road through Lexington to Charlestown, and arrived there about 12 o'clock. I took leave of Mr. G. and he took the horse I rode and returned back. I went to the ferry, and took a boat and crossed over to Boston the 12th (April), about two o'clock in the morning and retired to my quarters to rest.

"About sunrise I turned out, threw by my yankee dress and put on my British uniform, and walked down King Street, and directly met Col. Smith, he took me by the hand, and said how do you do John? We heard you broke your neck jumping out of Barnes' chamber window. Smith further said come go up to the General's quarters. I told him I should rather go after breakfast.

"Tell me nothing about your breakfast; you are under me now. Accordingly we went to the general's quarters, where the officers were generally collected. I thought they had been taking their bumpers rather too freely by their actions. The general said 'Good morning, John. How do you like the Rebels?' I replied I should not like to fall into their hands. I took my papers out and presented them to the general. I asked him after he had perused them if he would return them to me. He told me he would, with fifty guineas with them. The general said, adjutant take charge of the papers. He took the papers, handed me a guinea. He said, take that, John, and go and get some liquor; you are not half drunk enough for officers' company. The general told me to call at his quarters at 11 o'clock. Accordingly I did. The general said, 'John, we have examined your journal; you are well deserving the name of a good soldier and a lucky and expert spy. How largo an army will it take to go to Worcester and destroy the stores and return safe?' By answering that question I must stand or fall, but I was determined to give my opinion in full, turn as it would. I said, if they should march 10,000 regulars and a train of artillery to Worcester, which is forty-eight miles from this place, the roads very crooked, stony and hilly, the inhabitants generally determined to be free or die, that not one of them would get back alive. Here Smith exclaimed, 'Howe has been scared by the old women.' Major Pitcairn says, 'Not by a negro wench, John,' which caused a great laughter. The general asked me what I thought of destroying the stores at Concord, only eighteen miles. I stated that I thought 500 mounted men might go to Concord in the night and destroy the stores and return safe; but to go with 1000 foot to destroy the stores the country would be alarmed; that the greater part of them would get killed or taken. The general asked me what I thought of the Tories? I stated that they were generally cowards, and no dependence could be placed on them.

"The general asked me how old I was. I told him I was twenty-two. He said my judgment was very

good for a beardless boy of twenty-two. Here are your papers and money, John. You shall be exempt from carrying a firelock;" and I was dismissed for that day. He said I must call again the next day at nine o'clock. Accordingly the next day at nine o'clock I called at the general's headquarters. He said he should want me to put on my Yankee dress and go on horseback through Malden, Lynn, and Marblehead to Salem, on the 18th, at night to carry letters to the Tories in those places, to have them use their influence to restrain the militia and secure the arms and ammunition, if they should attempt to take up arms against his majesty's regulars, as I shall detach Major Pitcairn to march on the 19th, at 1 o'clock in the morning with 800 grenadiers; to have me on my return from Salem, if I heard of any alarm from the Americans to ride through the adjacent towns east of Concord to see what preparations were making, if any, to let Major Pitcairn know without delay. This I told the general I would undertake; he might rely on my faithfulness in this dangerous undertaking.

"Accordingly, on the 18th, the troops were put in readiness; about two o'clock we embarked and crossed over to Charlestown. Here I left the troops, mounted on a country horse prepared for the purpose, with my Yankee dress. I called at Malden on one Mr. Goodridge, delivered him a letter from the British general. I rode from this place to Lynn. Here I called on another tory; delivered my letter. I now proceeded to Marblehead; there I delivered another message. Then I proceeded to Salem, where I arrived about daybreak, making the distance about 15 miles. Here I refreshed myself and my horse. About sunrise I mounted, returned back to Lynn, where I called for a breakfast. While at breakfast, the thundering news came that the regulars had gone to Concord, and had killed 8 men at Lexington. Such a confusion as the people were in I never heard or saw. They asked me where I had been and where I was going. I told them I was a Bostonian and had been to Salem to notify the people that the regulars were afraid were going out of there to Concord. They said I had better make my way through Reading and Woburn, also through Billerica to Bedford and Concord, and notify the people that the regulars had gone on, and have themselves in readiness to march to Concord. Now I set out full speed; wherever I saw the people were alarmed, I informed them that the British had come out and gone to Concord, and for their lives and country to fly to arms. Where there was no alarm I made none. When I arrived at Woburn, ten miles from Boston, I found the militia about on their march for Concord. Here I omitted going to Billerica, it being ten miles further into the country.

"I made the best of my way through Bedford to Concord. Here my horse failed me in some measure. Here I overtook crowds of militia; I told them to drive on. I also told them there had been 8 men

killed at Lexington by the British. I told them I was afraid the regulars would leave the town of Concord. This kind of alarm I gave the people all the way. I soon arrived at Concord, where I found confusion, sure enough. Here I found the militia pouring in from every quarter. I rode up to Major Pitcairn and informed him that the militia were turning out all the way from Concord to Salem. Major Pitcairn informed me that he must have a reinforcement from Boston, or else he could not get a man back to Charlestown, for they were very sore and fatigued. I was furnished with a fresh horse and set off for Boston and alarmed the people on the road to fly to arms and waylay the regulars from behind fences and walls and any thing that would cover them from their fire. No person mistrusted but what I was a faithful American through the whole route. When I arrived at Charlestown I met Lord Percy with a regiment of regulars and two pieces of artillery. I passed the troops and went on the ferry and crossed over to Boston; went to General Gage's headquarters and informed him of my route, and all that had taken place. He said he did not think the damned rebels would have *taken up arms against His Majesty's troops*, etc.

"From this time I was determined to leave the British Army and join the Americans."

CHAPTER XLIII.

CONCORD—(Continued).

Concord Fight—Brunt and Strife of Revolution.

THE BIRTHDAY OF AMERICAN LIBERTY.—There are several personal accounts written by those who took part in the events that made the 19th of April, 1775, forever memorable. Rev. William Emerson's diary is the most complete and accurate. The journal of Lieut. Barnard, of the British Army, is clear and interesting in its details. Capt. David Brown's entry in his almanac, "Had a sharp squirmish with the Regulars to-day" is graphic. John Howe, the spy, writes: "That at Concord I found confusion sure enough." Martha Moulton's description of the conduct of the British at Concord is vivid. The depositions of the patriot soldiers, taken by the Committee of Congress a few days after the fight, are exact and carefully given under the solemnity of an oath. The report of Lieut.-Col. Smith, the commander of the regulars, is in print, and from this Gen. Gage's report to his King was garbled by the ministry before it was published, to meet the political necessities of the government, and is therefore unreliable. A letter to Jefferson, printed in his Virginia newspaper, and probably written by Gen. Warren the night after the battle, is the best of the published accounts in the press of that time. While the stories and traditions that have

grown up since, and the sermons and orations, the pamphlets and histories of the events, would fill a larger volume than this whole book. Relying on contemporaneous accounts, and neglecting the after-thoughts and one-sided statements when controversies had arisen, the real facts may be ascertained.

CONCORD FIGHT.—General Gage, aware by the reports of his spies of the condition of things at Concord, determined to destroy the military stores and arms collected there. An expedition was secretly organized for this duty, composed of six companies of the Tenth Light Infantry and the grenadier companies of several other regiments in Boston. Lieut.-Col. Smith was the commander, with Major Pitcairn, of the marines, as the second officer. These troops were taken off their regular duty under pretence of learning a new drill, and were quietly embarked in the boats of the men-of-war from the foot of the Common late in the evening of April 18th. The project was found out by the vigilance of the patriots in Boston, and when the column started, Paul Revere set forth from Charlestown on his famous ride, and

"Gave the alarm
To every Middlesex house and farm."

The troops were rowed across the Charles River and landed at Lechmere's Point (now East Cambridge). After some delay, and a wet tramp through the marsh covered by the spring tides, they kept on through West Cambridge (now Arlington) in the great road leading to Concord. The country was alarmed, as the ringing of bells and firing of guns in the surrounding towns proved to the British officers, and Col. Smith sent back to Gen. Gage for reinforcements. Major Pitcairn hurried on with the Light Infantry to secure the bridges over the Concord River. His detachment arrived at Lexington as the militia company there under Capt. John Parker were forming on the Common. Major Pitcairn rode up just at daybreak, and ordered the Provincials to disperse. They obeyed his orders when repeated by their captain, and were leaving the Common when the British fired on them a volley that killed eight and wounded ten men,—a massacre of which the inscription on their monument, says: "The blood of these martyrs was the cement of the Union of these States." After the grenadiers had come up and joined the light infantry, the column marched on to their destination, Concord.

Several British officers, well-mounted and armed, had been sent out the day before to reconnoitre the scene, and on their return in the evening to intercept any messengers from Boston who might give the alarm. They captured Revere and his companion, Ebenezer Dorr, just below the line in Lincoln, while Samuel Prescott, who had joined Revere, escaped by jumping his fleet horse over the wall of the road and taking a by-way through Lincoln, gave the alarm there, and reached Concord between one and two o'clock on the morning of the 19th.

He aroused the guard at the town-house, who fired the

signal gun and rang out the alarm bell. This assembled the minute-men, the militia and the townsmen, old and young. Rev. William Emerson, the pastor, with his gun in his hand, was among the first to join the guard. Major John Buttrick and his son, the fifer of Captain Brown's company, were among the early arrivals. Messengers were despatched to the adjoining towns, Samuel Prescott to Acton, William Parkman to Sudbury, and Reuben Brown was sent towards Boston to report the approach of the enemy. The Committee of Safety began the removal of the cannon, ammunition and stores to places of security, and the women and children, with their valuables, fled to the woods or to houses remote from the village. The minute-men and militia companies took position on the hill in front of the church, around the liberty pole, on which the pine-tree flag was raised, and awaited the return of the messenger, Brown. They were supplied with ammunition from the town-house, and about seven o'clock saw, from their post on the hill, the British approaching. It was a pleasant morning of an early spring, after a mild winter; the fruit trees were in bloom and the spring grain waved in the breeze, foretelling a warm day. ✕

As the King's troops came in sight, their bayonets glistening in the sun and their solid platoons filling the wide, old highway, the officers of the Concord companies saw that they could not resist such a superior force successfully. The provincials fell back to another hill, some eighty rods distant, and from this watched the movements of the regulars. The British force marched to the Common in the centre of the town, paraded there and sent out squads of soldiers to find and destroy the stores of flour, fish, salt and rice, and the magazine of arms, cannon, powder and balls the provincials had collected. The officers made the taverns their headquarters; Colonel Smith at Jones' tavern, on the main street, and Major Pitcairn at the Wright tavern, next the church. Col. Smith finding that the early alarm had nearly spoiled the object of his raid, and that the patriots were increasing in numbers, sent a company under Captain Munday Poie to guard the South Bridge, and five companies under Captain Lawrence Parsons to the North Bridge. Three of these companies remained there to guard the bridge, while two companies went two miles beyond to destroy the cannon and ammunition at Col. James Barrett's farm. Captain Lawrie commanded the guard at the bridge, and, while Captain Parsons was absent on his errand, permitted the soldiers to seek food and drink at the neighboring houses.

Captain Parsons found but little to reward his search. He burned a few carriages for cannon, but the cannon had been hidden in a new-plowed field, and when he heard signal guns fired at the bridge his command retreated hastily towards the village.

While Colonel Smith and Major Pitcairn were resting and refreshing themselves at the taverns the

grenadiers sacked the store-houses, broke up sixty barrels of flour, disabled two twenty-four pound cannon, burned four gun carriages and sixteen artillery wheels and some barrels of wooden spoons and plates, threw into the mill-pond about five hundred pounds of bullets and cut down the liberty-pole on the hill. The town-house, in which the powder was stored, was set on fire, but by the remonstrances of Martha Moulton, who pointed out the danger from the explosion, the fire was put out and the building saved with its valuable contents.

This was all the expedition accomplished. The Americans fell back, as the detachment advanced, towards the North Bridge, crossed it and took position on Punkatasset Hill, half a mile north. Here their numbers increased by squads and files of minute-men from the adjoining towns, till they were in sufficient force to advance to the high ground just west of the causeway and bridge. From this point they could overlook the village and watch the guard at the bridge. Here they were joined by the companies from Lincoln, Sudbury and Acton, and by Lieutenant-Colonel John Robinson and some minute-men from Westford. Joseph Hosmer, of Concord, acting as adjutant, formed the companies and squads into line as they arrived on the ground, while the officers held a council of war to determine what should be done.

The smoke of the burning gun carriages and other spoils in the village could be plainly seen, and it seemed as if the British were burning the town. This determined the council to march to its protection, and Colonel James Barrett, as the commanding officer, gave the order "to march to the bridge and pass the same, but not to fire on the King's troops unless they were first fired upon." Major Buttrick took the command, first offering it to Lieutenant-Colonel Robinson, who declined the post, but went with the major as his aid, and Colonel Barrett left for his farm to take care of his family and the stores. The American force numbered more than the guard at the bridge, but the British force in the village was the larger, and an advance on this would bring Captain Parsons' detachment in their rear, and place the provincials between two fires. It was a hazardous movement but the patriots did not flinch from the danger when the crisis came. Captain Davis' Acton company, who were armed with bayonets on their guns, took the right, and the Concord company, under Capt. David Brown, came next, and thus the "embattled farmers" in double files marched down the hill to the tune of the "White Cockade." As they reached the causeway at the foot of the hill the British guard began taking up the planks of the bridge to prevent their crossing it. Major Buttrick ordered them to desist, and they soon stopped this work and formed in solid column on the easterly bank of the river. The Americans pressed forward till within a hundred yards, when the British fired two signal guns and then

a volley at the advancing minute-men. This killed Captain Isaac Davis and private Abner Hosmer of the Acton company, and wounded two or three men of the other companies. Major Buttrick sprang from the ground and gave the order. "Fire, Fellow-Soldiers, for God's sake Fire!" The order was repeated along the line, and the Americans fired a volley that killed two British soldiers, fatally wounded Lieutenant Kelly and a sergeant, and severely wounded several officers and many privates. This firing with sure aim from the shoulder was too effective for the regulars to return with their guns only pointed from their hips without aim. They broke and retreated towards the village, bearing their wounded, bleeding and dying, in their ranks. The signal guns had given the alarm to the main body of the British on the Common, and it soon marched to the aid of the retreating detachment.

The Americans crossed the bridge and occupied the hill on the east side of the river, from which they could see the advance of the main body to join the retreating companies. After some consultation, and before the return of Captain Parsons' command over the bridge, the Americans left this hill and passed by a bridle-road through the woods around the centre of the town to the road leading to Boston. They might have cut off the two companies returning from Colonel Barrett's, but the risk to their force and the town was too great, and they wisely decided to reserve the attack until after the British had left the village on the retreat to Boston. The war had begun. "Major Buttrick gave the order to fire to British subjects. It was obeyed by American citizens," who "fired the shot heard round the world."

This fight proved to Col. Smith not only that the Americans would resist, but that his force must return to Boston at once. Arranging for the care of his wounded who could not be removed, and taking chaises and pillows for those unable to march, he hastily collected his troops and before noon left the village on his retreat. Throwing out flank guards on the ridge that lined the road for a mile, he kept his force in column unmolested till Merriam's Corner was reached. Here the patriots from the fight at the bridge were posted in safe positions, and were joined by companies from Reading and Chelmsford and Billerica. As the British left the protection of the ridge and called in their flank guards to cross a narrow causeway over the meadows, the Americans poured a sharp fire on the retreating columns, causing some loss, and then passed round the next hill to renew the attack. Another sharp skirmish took place at the foot of Hardy's Hill where a Sudbury company came up on the south flank of the regulars and the fire was hot from both sides of the road. A little farther on the woods lined the highway, and from behind trees and rocks and walls the Americans sorely galled the retreating column. The officers dismounted and sought shelter in the ranks of the soldiers. Col.

Smith's horse was shot, and Major Pitcairn's captured with his pistols in the saddle-holsters, which are still preserved as memorials of the fight. The retreat became a rout long before the reinforcement under Earl Percy was reached, and if any American officer could have been found in command Col. Smith would have surrendered.

It was the first and perhaps the only instance when a body of veteran soldiers of England fled before an undisciplined and unorganized armed mob of inferior numbers.

This reinforcement sent out by Gen. Gage in the forenoon with two field-pieces checked the pursuit by the Americans, and received the worn-out men of Smith's command into the shelter of their ranks, where they laid down like tired dogs with their tongues hanging out of their mouths from the heat and dust of the rout. After a short rest the British took up the march for Boston, and were again attacked by the Americans, who pursued them, and poured a hot fire into their ranks, till they reached Charlestown Neck and were under the shelter of the guns of the ships of war in Boston Harbor.

The victorious patriotic farmers encamped that night in Cambridge, and formed the nucleus of the Continental Army around Boston, where the British were shut up till they evacuated that town early the next year.

The British loss that day, as reported by Gen. Gage, was sixty-five killed, 176 wounded, and twenty-seven missing. The American loss was forty-nine killed, thirty-six wounded and five missing.

Of this battle, which has passed into history under a new and wrong name, Senator Hoar said, in his address at the quadro-millennial celebration of the town of Concord, "the number of the slain is no necessary test of the importance of a battle. The English lost at Agincourt but four gentlemen, 'none else of name, and of all other men, but five and twenty.' Plassy, which gained India to England, cost the victors seven European and sixteen native soldiers killed, thirteen European and thirty-six native soldiers wounded. The Americans lost but twenty-seven at New Orleans. There were more Englishmen slain on the retreat from Concord than fell of Wolfe's army who captured Quebec, more than were slain on the Greek side at Marathon; more men fell on both sides that day than at the first battle of Bull Run." Concord, the first battle-ground of the Revolution, is well named the birth-place of American liberty; for if in Boston was the conception, and in Lexington the agonizing throes of deadly pain, here the blessed child was born.

The British retreat begun here never ended till Yorktown, and, however it may be called in history, this is glory and honor enough for any place, any men, any generation—in this broad land or the world.

Of the many incidents of that day in Concord—whether of the large, fleshy, bulky Col. Smith being

run against and knocked over by Ephraim Jones, the tavern-keeper, or of Major Pitcairn stirring his glass of brandy with his finger at the Wright Tavern, and hoping "to stir the damned Yankee blood so ere night," the shrewd reply of the miller, Wheeler, to preserve his meal from the spoilers, the cute Yankee answers of the women to save the property in their houses from the raid, the cool remarks of the alightly wounded, that "a little more and it wouldn't have hit me"—there is no occasion here for more detail.

Nearly 200 of the men of Concord were engaged in the fight that day. As they were volunteers, and the rolls of the companies are not preserved, all their names cannot be ascertained. A partial list only can be given, and this includes almost every Concord family name of that period. Of the prisoners captured that day, Lieut. Kelly was buried in Concord, Lieut. Gould was exchanged, Lieut. Potter was confined at Reuben Brown's house—and his sword is still there in the Antiquarian Society's collection—several of the soldiers were confined in the old jail, and one or two of them, when released, remained during their lives in the town. The horses and other property taken from the British were advertised and sold at auction, and the leading men in the fight gave their depositions within a few days after it occurred.

No more genuine Yankee or American trait than this is recorded in history, that, after beginning a war, shooting down the King's troops, and shutting them up in Boston, the victorious leaders coolly sit down, deliberately draw up, and solemnly swear to their account of the engagement. It marks their Puritan spirit, their devotion to duty, their conscientious regard for truth, and carries out the honest saying of one of them, Captain Miles, "that he went to the battle in the same spirit that he went to Church." When a Revolution is undertaken by such men, it will be carried through and a firm government successfully established.

In the Revolution thus begun on her soil, Concord did her full part throughout the war. This town furnished, in answer to all the calls for men, over two thousand soldiers for longer and shorter terms of service. For the expenses of the war there was raised here by taxation annually more than \$10,000 of silver money, an amount that made a greater burden on the property of the town at that time than twenty times as much would be now. To the expedition to Ticonderoga in 1775 a full company went from Concord, and her beloved minister, Rev. William Emerson, accompanied the Middlesex Regiment as chaplain. He fell a victim to the camp-fever and died at Rutland, Vermont, October 20, 1775, at the early age of thirty-three years.

While Boston was occupied by the British forces, Concord furnished the patriots with fuel and provisions to a considerable amount. So many of the inhabitants of Boston were received and sheltered here, that in July, 1775, a town-meeting of and for Boston

was duly held in Concord, a representative chosen and other votes passed—perhaps the only instance in which a town held its meeting outside its own limits.

The American Army having occupied for barracks the buildings of Harvard College at Cambridge, that institution removed to Concord in 1775 and remained here nearly a year. It held its exercises in the Court-House, its students and professors living in various houses in the town. The large dwelling-house on the Lee farm, in which the Tory Dr. Lee had been confined by order of the Committee of Safety became the Harvard Hall of that episode. The commencement exercises of 1776 were held in the old church, and on the return of the college to Cambridge its authorities passed votes of thanks to Concord for their reception and kind treatment.

CHAPTER XLIV.

CONCORD—(Continued).

Progress and Prosperity as a Shire-town and a Literary Centre—Celebrations—Monuments—Rebellion.

AFTER the Revolution had triumphed, and peace and independence were won, the sacrifices and burdens of the war were felt more fully than while it lasted. Debts had accumulated, the currency inflated, distress increased and culminated in Shays' Rebellion. Concord as a shire-town was the place of meetings and conventions to consider the state of the times, and at length, in 1786, an attempt was made by an armed mob to prevent the court from sitting here in September. Although this town had taken measures of precaution by its committees and resolutions, a mob of armed men, several hundred in number, assembled here to oppose the authority of the Government. They were led by Captain Job Shattuck, of Groton, and, after spending the night of September 12th in the court-house and in barns in the village, they took position on the Common and formed their lines to stop the judges from holding court. Their leader held them in some order while a committee of a convention called by Concord had a parley with him, and at last succeeded in persuading him to consent to the court opening and adjourning to the last of November. The rain and the rum had badly demoralized the mob, and they dispersed to their homes without acts of violence or any bloodshed. The invasion created great alarm and anxiety in the town, and would have had serious consequences but for the prudence and firmness of her leading citizens. Captain Shattuck was afterwards arrested for this and other treasonable acts, was badly wounded by the officers who made the arrest, and was confined in jail till May, 1787, when he was tried in Concord, convicted of treason and sentenced to be hanged. He was, how-

ever, pardoned in September, through the efforts of Judge Wood, of this town, and lived in Groton till 1819.

After the troubles that caused this insurrection had subsided, the era of growth and prosperity that followed national independence was felt in Concord. Trade and manufactures increased here. As a shire-town in the centre of Middlesex County, it attracted population, capital and ability, and soon became a prominent rival with Boston for the seat of the State Government, and came near having the State House. Men of character and distinction in the profession of the law settled in the town and gave it influence. In 1798, at the time of the difficulty with France, William Jones, a lawyer here, led a detachment of forty-one men from Concord to join the Oxford army, so called, because that was the place where the troops assembled.

When the War of 1812 was declared the old hostility to England induced Concord's leading lawyer to give up his practice and his offices of county treasurer and postmaster and take command of a regiment recruited in the vicinity for service on the Canada frontier. Although political feeling at that time ran so high in Massachusetts that he did not escape sneers and reproach, yet Colonel John L. Tuttle was brave and patriotic, and deserved a better fate than death by poison for the purpose of robbery, which he met at Sackett's Harbor, N. Y. The town furnished both its military companies for the defence of Boston when in danger of an attack from the British fleet, and raised a large company of exempts to protect its homes in case of invasion. Several English prisoners of war were confined here till they were exchanged or paroled.

In this busy prosperity Concord moved even faster after the peace of 1814 without noticeable events till, in 1824, the visit of Lafayette as the nation's guest occurred. During his triumphal tour he visited this historic town and was received with all the manifestations of gratitude and hospitality that could be made. Military escort, address of welcome, collation, greetings of old comrades of the Revolution, and of men, women and children, united to bring tears of joy from the companion of Washington. His visit revived the memory and stirred the patriotism of that generation so much that the fiftieth anniversary of Concord fight, April 19, 1825, was fitly celebrated. The cornerstone of a monument on the centre of the Common was laid with due ceremonials. Edward Everett, then in the flush of his youth and eloquence, delivered an oration seldom equaled by him in his after-years. But the corner-stone never found its superstructure, opposition to the site developed and the project slumbered for nearly a dozen years without fulfillment.

In the next decade various institutions started that mark the growth of the town,—the Middlesex Mutual Fire Insurance Company in 1826, that in its long and useful existence has developed into one of the

largest and strongest in the State; the Concord Bank in 1832, an equally successful corporation, and the Middlesex Institution for Savings that has pursued a steady growth to a strong financial position. An academy was founded somewhat earlier, in 1822, and under teachers of good repute a higher education than the town schools afforded was given. In 1828 a Lyceum was formed, growing out of an earlier debating society. This has continued to the present time, furnishing a course of lectures each winter from some of the best minds of New England. It is now incorporated, has an invested fund and increases in popularity every season.

A social library was established in 1821, and soon obtained a useful collection of books, reviews and pamphlets. An ornamental tree society planted many of the fine trees that shade the village streets. A public bathing-house contributed to the physical health of the community. The Concord Chapter of Royal Arch Masons was formed in 1826, and a volunteer engine company in 1827.

The Western Society of Husbandmen and Manufacturers, incorporated in 1803, removed from the upper part of the county to Concord in 1821, and has held its annual cattle shows here nearly every year since. In 1852 its name was changed to the Middlesex Agricultural Society. It has a large exhibition building, ample fair-grounds and a good half-mile track.

More than all these, the single parish system of the town broke up, and a second religious society was formed. Rev. Ezra Ripley, who succeeded Rev. William Emerson in 1778, had grown liberal in his views and preaching with his years—had, in fact, become Unitarian. A Trinitarian society was organized in 1826 by those who held to the old faith. Sixteen joined the new church, and built a meeting-house and settled a minister the next year. By the successful result of an act of incorporation of the trustees of the old ministerial fund that money was preserved to the Unitarian Society, and the town saved from the usual lawsuit attending such divisions.

The influence of all these was shown in 1835, on the two hundredth anniversary of the settlement of Concord. An appropriate celebration was arranged and carried out on the twelfth of September of that year. It was among the first of the long line that have followed, and equal to the best of these town holidays. The address by Ralph Waldo Emerson was the earliest of those that have made his words and thoughts known throughout the English-speaking world. The Governor and his staff attended; the procession, escorted by the infantry and artillery companies, marched to the old church, through the lines of the school children, and a crowded audience listened to the eloquent words there uttered. A dinner and speeches at the table by the distinguished guests from Boston, Plymouth, New York and other places concluded the

celebration. The address was printed and reprinted in 1875, and may be found in the complete edition of Emerson's works.

The occasion furnished a pattern example to later towns, especially in the matter of expense. This, the committee reported, amounted to \$168.79, of which the town voted \$75.00, private subscribers gave \$45.50, and the balance, \$48.24, was paid by the committee themselves.

Shattuck's "History of Concord" was published this same year, and is one of the earliest and best of town histories, since so numerous. It gave much information about the olden times, and has become very rare and valuable.

Now began the period of literature and culture which for a generation marked Concord more prominently than its historical, political or business traits had before.

A great awakening of thought was springing up in New England about this time. In part it had been brought over the sea by the brilliant young men who had studied abroad. In part it was the uprising of the intellect of a people who had found leisure from the sordid cares of life to seek some higher ideas. Mr. Emerson's residence here, which began on his return from Europe, attracted much of this transcendentalism, as it was called. Margaret Fuller, Hawthorne, Alcott and Channing came to Concord to live. The *Dial*, the organ of the new philosophy, was often mainly composed here, and from this town, as a centre, many of the converts drew their inspiration, and to it made their pilgrimages, as to their Mecca.

This "newness," as it has been styled, soon dominated the village, and found its expression in many forms of the life and society of the town. It gave birth to and encouraged the literary efforts of that generation. Hawthorne wrote his "Mosses from the Old Manse," to which he had brought his bride in 1842, and in which Emerson had written his "Nature" a few years earlier. Thoreau wrote and published his works chiefly about Concord scenes, Channing printed his poems, Alcott his conversations, his daughter Louisa her stories, Mrs. Austin her novels, and others, inspired by these examples, rushed into print till the alcove in the Free Public Library devoted to Concord books is nearly filled. So much of this literary work was done here that a distinguished state and national officer, when asked by a fellow-traveler in the cars through Concord, "What was the chief occupation of the villagers?" promptly replied, "Principally writing for the *Atlantic Monthly*." This dwarfed and soon overcame the business and political importance of the town, and although the railroad came here in 1844, the quiet repose of the place was hardly stirred by the locomotives.

One result of Mr. Emerson's address in 1835 should be recorded. The next year the town decided to build a monument at the battle-ground, a matter that had been too long neglected. A fund had ac-

cumulated in the town treasury for this purpose sufficient for a modest memorial. This money was originally subscribed in this vicinity for the Bunker Hill Monument Association, which had planned to mark both the earlier battle-grounds of the Revolution with enduring monuments. Finding that the work on Bunker Hill was more than they could accomplish, that Association gave up their plan of building one at Concord and returned a part of the subscriptions to this town. Dr. Ripley, who had gained a title by possession to the old road leading to North Bridge, reconveyed the same to trustees for the purpose of a memorial.

A simple design was selected by a committee of the town, and from a granite boulder within the original limits of the "six miles square" the modest shaft was obtained and placed on the river-bank, where it now stands. The task of framing a suitable inscription was a difficult one. Several inscriptions had been sent in by persons asked to contribute, and while each had merits, no one exactly suited the committee. Thereupon, they made a composite, taking sentences from such as they approved, and inscribing this on the monument:

" Here,
on the 19th of April, 1775,
was made
the first forcible resistance
to British aggression.
On the opposite bank
stood the American militia.
Here stood the Invading Army,
and on this spot
the first of the enemy fell
in the War of that Revolution
which gave
Independence
to these United States.
In gratitude to God
and
in the love of Freedom,
this Monument
was erected,
A. D. 1836."

For the dedication of this monument July 4, 1837. Mr. Emerson wrote his immortal hymn, that was sung by the assemblage, and is copied below from the original printed slip:

" By the rude bridge that arched the flood,
Their flag to April's breeze unfurled;
Here once the embattled farmers stood,
And fired the shot heard round the world.
" The foe long since in silence slept;
Alike the conqueror silent sleeps,
And Time the ruined bridge has swept
Down the dark stream that seaward creeps.
" On this green bank, by this soft stream,
We place with joy a votive stone,
That memory may their deed redeem,
When, like our sires, our sons are gone.
" O Thou who made those heroes dare
To die, or leave their children free,—
Bid Time and Nature gently spare
The shaft we raise to them and Thee."

A prayer by Rev. Dr. Ripley, then in the eighty-

seventh year of his age, and an address by the Hon. Samuel Hoar completed the simple exercises. On the 19th of April, 1838, the four rows of trees lining the avenue to the monument were planted by the towns people.

In 1841 the old meeting-house, built in 1712 and remodeled in 1794, was so changed and altered as to leave no trace of the old structure, either inside or out. The tall, slender spire surmounting the square clock-tower was torn down, and in its place the Grecian temple porch, with the heavy wooden columns, was added. The old square pews and long gallery seats were replaced by modern slips. The high pulpit, with graceful sounding-board above, gave way to the reading-desk, and those "who knew it so well would know it no more."

The alteration of the church of which he had been minister for sixty-three years was coincident with the death of Dr. Ripley, and his funeral was held in the Orthodox Church, where the Unitarians worshiped during the repairs.

This quiet of Concord was broken in the Presidential campaigns of 1840 and 1844 by mass-meetings of the county, which gathered thousands of voters to renew on this historic spot their patriotism. They were addressed by distinguished speakers brought here from Maine to Georgia, including Webster, Choate, Winthrop, Lawrence, and others of this State. The effect of these on the town subsided when the election was over, and peace reigned.

Again in 1850 the repose of the town was interrupted by a union celebration of the seventy-fifth anniversary of the battle. At this all the neighboring towns that took part on the 19th of April, 1775, united in commemorating the day. The Legislature and the State officers attended, escorted by the Ancient and Honorable Artillery Company, and listened to the oration delivered by the Hon. Robert Rantoul, of Beverly. This, with the eloquent speeches of Hon. E. R. Hoar, who presided, and of the distinguished guests at the dinner-tables, was printed by a resolve of the General Court as a legislative document. The last survivor of Concord fight, Amos Baker, of Lincoln, was present on this occasion, at the great age of ninety-four years and eleven days.

During these quiet years ending in 1860 Concord did some useful work by improving her public grounds, laying out the pleasant Sleepy Hollow Cemetery, establishing a Town Library, building a commodious Town Hall, and organizing various societies that helped in many ways. In agriculture the railroad made a great change from the old general farming to the milk-producing and fruit-raising of the present. This was stimulated by a successful Farmers' Club, of which Hon. Simon Brown was the founder, and the profit of it increased largely by Hon. Ephraim W. Bull's discovery of the Concord Grape, the greatest vegetable improvement of the age. This grape, raised by him from seeds of the native wild

grape, has extended to the Pacific, and across the Atlantic to Europe, while the mother vine, from which millions have grown, still lives and bears here.

Through the great Civil War the manhood, the wealth and the spirit of Concord were poured out for the Union and to put down the Rebellion.

Her company left home on the memorable 19th of April, 1861, with full ranks, under the command of Lieut. George L. Prescott. They were duly mustered into the United States' service and sent forward to Washington by way of Annapolis, Maryland. On their arrival they were quartered for a time in the Senate Chamber of the Capitol. They took part in the first battle of Bull Run, and had four men taken prisoners by the Rebels on the retreat that day. At the expiration of their three months' term of service they were received on their return home with enthusiastic greetings. Another company was soon re-enlisted by the same commander, now Captain Prescott, and were stationed at Fort Warren, guarding Rebel prisoners for some months, as a part of the Thirty-second Regiment Massachusetts Volunteers. This regiment was sent to the front in 1862, and saw active service in the Army of the Potomac at the great battles of Antietam, Gettysburg, the Wilderness and others throughout the war.

Captain Prescott, promoted to colonel, was killed at Petersburg, Va., in 1864, giving his life for his country after a brave and honorable service. His name heads the roll of the illustrious dead on Concord's Soldiers' Monument.

A third company, under Captain Richard Barrett, served under Gen. Banks, in the Forty-seventh Regiment, in Louisiana for the nine months of that campaign. This regiment was stationed in New Orleans, and held that city in subjection during their term of service. By the skill and care of Captain Barrett every man of the company was brought back home on its return to be welcomed by the rejoicings and thanks of the town's people. Others enlisted in various regiments,—a squad of eleven, headed by Sergeant Lovejoy, in the Fortieth Regiment, and nine in the Fifth Regiment, for one hundred days' service. In all, two hundred and twenty-nine men from Concord served in the war, making twelve over and above all demands on the town. Of these, thirty names are inscribed on the Soldiers' Monument in the public square as "Faithful unto Death," and the town "records with grateful pride that they found here a birth-place, home or grave."

To support their soldiers in the field and the families left at home, Concord raised during the war nearly twenty thousand dollars in money. Besides this, the donations and supplies to the Sanitary Commission, collected and forwarded by the ladies of the Soldiers' Aid Society, amounted to even more in value. The bandages alone, carefully prepared for wounds, exceeded the dollars in number.

This town also gave to the Sanitary Commission, in the person of Louisa Jane Barker, one of the most earnest, useful and indefatigable of their agents at Washington. She was the sister of William Whiting, Lincoln's solicitor of the War Department, and the wife of Rev. Stephen Barker, chaplain of Massachusetts Heavy Artillery Regiment. Her services and labors for the cause were of such interest and value as to merit a longer and more enduring record than this mention.

Other brave men and fair women of the town did their utmost in thought and word, in help and counsel for the Union, who could not render military or hospital service. And the record of Concord in the putting down the Rebellion is as patriotic as that of other Northern towns, and worthy of its historic fame. The completion and dedication of the Soldiers' Monument, one of the earliest in the State, shows how mindful of the duties and sacrifices of the war was this town. The plain, but severely simple structure, raised to commemorate her dead soldiers, was the first work to be done after the war ended, and Peace and Union were established.

The next work was to build a High School-house on the ample lot, generously given to the town by Cyrus Stow, who thus remembered his native town in his life-time, and at his death gave a fund of \$3000 for the use of the High School. Soon after this the town built a large new almshouse.

By the liberality of Mr. William Monroe, also a native of the town, a library building was erected, and, with a fund for its preservation and increase, given to a Library Corporation as trustees of the public. To this Concord handed over the books and funds of the Town Library, and the new building was opened in 1873, and has proved the great attraction of the town. It has already required enlargement to hold the twenty-two thousand volumes mentioned in the last report of the trustees.

Water-works had become a necessity for Concord. Looking for a source of supply, Walden Pond was found insufficient in size and height to be used without pumping; Nagog Pond, in Acton, too far away; Sandy Pond, in Lincoln, the most available. This clear sheet of one hundred and fifty acres, about two miles from and ninety feet above the village, was selected. It is fed wholly by springs, has three hundred acres of water-shed, a large outflow, a sandy bottom and but two houses within its drainage limits. The water, by analysis, contains less than two grains, chiefly vegetable matter, to the United States gallon. Having obtained an act of the Legislature authorizing the taking of this source, the town, by its water commissioners, secured a favorable contract, under which a ten-inch main, one and three-fourths of a mile in length, was laid to the Common, and branches of suitable sizes to all the streets of the village. The water was let on December 2, 1874, and has proved a real blessing to the town. The supply is ample for all uses, the pressure sufficient for fire in any build-

ing within the water limits, and the interest on the cost, with one per cent. to a sinking-fund, has been paid by the water rates from the start. The system has been since extended to the west to supply the Reformatory, Concord Junction and Westvale, requiring another main to the pond and a reservoir on Nashawtuck Hill. The whole work was executed under the direction of William Wheeler, civil engineer, a native of this town, a graduate of the State Agricultural College, and president of the Agricultural College in Japan for two years.

That was an interesting town-meeting in 1873, when on one side of the platform were the plans of the water-works, and on the other the model of the statue of the minute-man, by Daniel C. French, a Concord youth, shown for the inspection and adoption by the voters of the town after a full examination and discussion.

Some feeling had always existed among the older citizens that the monument at the battle-ground stood on the wrong side of the river; that it was on the British and not on the American ground of the fight. This feeling was specially cherished by Ebenezer Hubbard, who led the solitary life of a bachelor on his farm in the middle of the town for ninety years.

He had accumulated by the frugal ways of an odd and queer recluse some money, and inherited strong prejudices as well as the old house in which Hancock and Adams lived while attending the Provincial Congress. To carry out his patriotic sentiments, he left by his will the sum of \$1000 to Concord towards building a monument on the spot where the Americans fell on the opposite side of the river from the present monument "in the battle of the 19th of April, 1775," and further provided that if it "is not built, nor sufficient funds for that purpose obtained within five years after my decease," then the sum is to be paid over to Hancock, New Hampshire. As showing the habits of Mr. Hubbard, he found, some years after the time for redeeming them had expired, six one hundred dollars bills of the Concord Bank carefully hidden in an old family Bible. These he presented at the bank, and as the president of the Concord National Bank offered, though not legally obliged, to redeem them, Mr. Hubbard gave the sum to him for the purpose of re-building the old North Bridge across the river to make a way to the new monument he wished built. A committee of the town recommended the acceptance of this legacy and gift, in 1873, and the erection of a statue of a minute-man on the right bank of the stream. Stedman Buttrick, Esq., gave the land for this purpose, and at the town-meeting before named the project was voted almost unanimously. The statue was finished by the sculptor, Mr. French, and cast in bronze from condemned cannon given by Congress by a resolve passed on the anniversary of the fight, through the influence of the Hon. E. R. Hoar, then Representative of this district at Washington. The bridge was built. The statue

was set up on a granite pedestal cut from the same boulder as the older monument, with the first verse of Emerson's hymn, before quoted, for an inscription on the front, and the dates "1775, 19th of April, 1875," on the rear panel.

The centennial of the battle was set for the dedication of the new memorial, and the statue was unveiled in the presence of Gen. Grant, President of the United States, his Cabinet, the Governors of all the New England States, with their staffs and body guards, the Legislature of Massachusetts, escorted by the Boston Independent Corps of Cadets, the Fifth Regiment of Massachusetts Volunteer Militia, and an immense concourse of people. The exercises at the battle-ground were an address by Mr. Emerson, a poem by James Russell Lowell, an oration by George William Curtis, and speeches at the dinner table by Speaker Blaine, Secretary Boutwell, Senator Hawley, Governors Peck and Ingersoll and others. Judge Hoar presided, General F. C. Barlow was marshal, and the celebration was in all respects fit to begin the long line of centennials of the Revolution. As the first of these it attracted attention throughout the nation, and the only limit to the attendance upon it was the inability of the railroads to bring all who wished to come. The estimates of the number present varied from 15,000 to 20,000, while the severely cold weather and the crowds at the car stations kept as many more away. The festivities closed with a splendid ball in the agricultural building, where the decorations gathered from the United States navy yards, the music of the Mariue Band from Washington, and the brilliant company made an unequalled display.

A decade later, in 1885, Concord celebrated her 250th anniversary. As a preparation a large committee designed and set up in the right places, tablets of stone or bronze inscribed thus. On the rock at the junction of the rivers :

"ON THE HILL NASHAWTUCK
AT THE MEETING OF THE RIVERS
AND ALONG THE BANKS
LIVED THE INDIAN OWNERS OF
MUSKETAQUID
BEFORE THE WHITE MEN CAME."

On a slate in the wall of the Hill Burying-Ground :

"ON THIS HILL
THE SETTLERS OF CONCORD
BUILT THEIR MEETING-HOUSE
NEAR WHICH THEY WERE BURIED.
ON THE SOUTHERN SLOPE OF THE RIDGE
WERE THEIR DWELLINGS DURING
THE FIRST WINTER.
BELOW IT THEY LAID OUT
THEIR FIRST ROAD AND
ON THE SUMMIT STOOD THE
LIBERTY POLE OF THE REVOLUTION."

On a bronze plate set in granite near the square :

"HERE, IN THE HOUSE OF THE
REVEREND PETER BULKELEY,
FIRST MINISTER AND ONE OF THE
FOUNDERS OF THIS TOWN,
A BARGAIN WAS MADE WITH THE
SQUAW SACHEM, THE SAGAMORE TAHATTAWAN
AND OTHER INDIANS,
WHO THEN SOLD THEIR RIGHT IN
THE SIX MILES SQUARE CALLED CONCORD
TO THE ENGLISH PLANTERS
AND GAVE THEM PEACEFUL POSSESSION
OF THE LAND,
A. D. 1636."

On a stone west of the three arch bridge :

"ON THIS FARM DWELT
SIMON WILLARD
ONE OF THE FOUNDERS OF CONCORD
WHO DID GOOD SERVICE FOR
TOWN AND COLONY
FOR MORE THAN FORTY YEARS."

On a bronze plate on the west side of the Square :

"NEAR THIS SPOT STOOD
THE FIRST TOWN HOUSE
USED FOR TOWN-MEETINGS
AND THE COUNTY COURTS
1721-1794."

On a stone by the road northwest of the minute-man :

"ON THIS FIELD
THE MINUTE MEN AND MILITIA
FORMED BEFORE MARCHING
DOWN TO THE
FIGHT AT THE BRIDGE"

On a stone at the junction of the Old Bedford and Boston roads :

"MERIAM'S CORNER
THE BRITISH TROOPS
RETREATING FROM THE
OLD NORTH BRIDGE
WERE HERE ATTACKED IN FLANK
BY THE MEN OF CONCORD
AND NEIGHBORING TOWNS
AND DRIVEN UNDER A HOT FIRE
TO CHARLESTOWN"

The other arrangements for the occasion included a reception of their guests by the town's people, on the evening of the day before. And on Saturday, September 12, 1885, the usual procession, oration and dinner. The weather was perfect, in marked contrast to that of ten years previous. The attendance of former residents and natives of the town added to the interest, and the exercises were of a high order of merit. The report upon the historic tablets by Charles H. Walcott, the address by George F. Hoar, the remarks after the dinner by the Governor, George D. Robinson, by James Russell Lowell, William M. Evarts, George W. Curtis and Concord citizens, were

appropriate and eloquent. Much of the success of the celebration was due to the chairman of the committee, Henry J. Hosmer, and the chief marshal, Richard F. Barrett.

Rev. B. R. Bulkeley, a descendent of the first minister of the town, was the chaplain, and John S. Keyes, son of the president of the bi-centennial, presided at this anniversary. A gratifying feature of the day was the gift by Hapgood Wright, of Lowell, of a fund, to this, his native town, of \$1000, to accumulate for fifty years, the interest then to be spent on the tri-centennial, and the principal to be again invested for terms of the same length; so on indefinitely, thus providing for future semi-centennials. Concord accepted this gift and will keep and use it carefully.

CHAPTER XLV.

CONCORD—(Continued).

Courts, Schools, Societies, Donations, Etc.

CONCORD COURTS.—This was a shire-town as early as A.D. 1692, and the Courts were held here first in the meeting-house. In 1721 a court-house and town-house was built on the west side of the square, chiefly out of the materials of the former church. This new building was nearly square, with a hip roof and a turret on the top, in which a bell was hung and the whole surmounted by the vane of the old meeting-house, bearing the date of 1673, which is still preserved. A new and commodious court-house was built in the year 1794 on the opposite side of the square by the county, and had a double lantern tower rising seventy-five feet from the ground. This furnished room for the Supreme and Common Pleas Courts, the Probate Court and the Court of Sessions, and for the county treasurer's office. In this, by the gift of the lot of land on which it stood, the town had the right to hold their town-meetings, and many other gatherings were accommodated. The militia, or "old shad" companies assembled in its spacious lower entry; the fruits and vegetable at the cattle shows were here exhibited. Stowed away in its dark recesses were the stocks in which many a poor fellow had sat to expiate his offences, and the gallows on which a man had been hung, the only execution in Concord of which there is a record. This took place in the field east of the burying-hill, and was witnessed by a great crowd, and under circumstances so remarkable as to be worth noting. It seems by the court records that "Isaac Moore and Samuel Smith, both of Sudbury, on the night of the 21st of June, 1799, broke and entered the dwelling-house of William Tucker, in Sherburne, with intent to steal, and stole seven yards of tannin, worth \$2.90; five yards shalloon,

worth \$2; thirteen yards of mode, worth \$2; two and one-half yards check linen, worth \$1.25; seven yards muslin, worth \$5.75; nine yards gauze, worth \$3.50; eight pounds sewing silk, worth \$8; three pair spectacles, worth \$1.25; 500 needles, worth \$2.50; three and one-half yards tow cloth, worth \$1.16; eight handkerchiefs, worth \$10; three yards calico, worth \$1.84; six pair hose, worth \$2.50; three and one-half yards India cotton, worth \$1.16; twelve knives, worth \$2.16; 24,000 pins, worth \$4.68; two hats, worth \$2.12; twelve sticks of twist, worth \$0.68; one pound of thread, worth \$1; one tea canister, worth \$0.50; two pounds tea, worth \$1.32; thirty yards stuff, worth \$11.68, of the goods and chattels of William Tucker, in the dwelling-house aforesaid. To the indictment Moore and Smith plead not guilty. Levi Lincoln (afterwards Governor) and Timothy Bigelow, Esquires, were appointed by the Supreme Judicial Court counsel for defendants, and they were tried at the October term, 1799, for the offence. The jury found Moore not guilty of the burglary, but guilty of the stealing and found Smith guilty of both. Moore was sentenced to be "publicly whipped on the naked back twenty stripes, to be confined at hard labor three years, to pay William Tucker \$170, which, with the goods restored, is treble value of the goods stolen, and to pay the costs of prosecution." November 9th the attorney-general moved for sentence of death on Samuel Smith, and the Court, after asking him if he had anything to say and his replying nothing additional to what had been said before, sentenced him to be hanged by the neck until he was dead.

The warrant was issued by the Governor and Council November 19, 1799 and the day of the execution was set for the 26th of December 1799. On the day before (Christmas), Smith was taken to the meeting-house and a sermon preached to him by Dr. Ripley, and on the 26th, the dread sentence of the law was executed on him by Sheriff Hosmer.

Smith must have been a hardened offender, or the extreme penalty of the law would not have been inflicted. Tradition "says that he sold his body to the doctors, and while waiting execution spent the money received from them for ginger bread for his own consumption."

In front of the court-house stood the large elm-tree, planted in 1776, that was used for the whipping-post for the culprits who, at each term of the court, received their thirty-nine lashes on their bare backs, their hands being tied up to the big staple long since grown over by the bark. In this court-house many important trials took place; that of the rioters who burned the Ursuline Convent in Charlestown in 1836, about whom so excited was the feeling of the community that the officers of the Court were armed and juries disagreed, so that only one boy was convicted and punished; and the Phoenix Bank cases, in which Daniel Webster, Rufus Choate, Sidney Bart-

tell and Franklin Dexter were counsel for the president and cashier, who were charged with embezzlement, and Asahel Huntington and Charles Allen, district attorneys, conducted the prosecution.

This court-house was thoroughly remodeled in 1840 and was burned in June, 1849, by an incendiary who wished to destroy a criminal indictment against him.

Previous to the fire Lowell had drawn away from Concord the April term of the Supreme Court and the September term of the Common Pleas. This last had been for years the great holiday of the county. On the farms haying must be done, and corn-stalks cut before the September Court or the hired men and boys could not be spared to attend its sessions. A long row of booths for the sale of eatables and drinkables and for shows of various kinds covered both sides of the square. Crowds of both sexes and all sizes came for the fun, which was often fast and furious. Drinking, gambling and horse-racing went on openly, sometimes ending in fights and rows. The disorder occasionally rose to such extremes that the court would adjourn and the sheriff and his deputies, with the judges and jurors as a posse, would sally forth to put down the riot.

After the burning of the Court-House an attempt was again made to remove the terms of the court to Lowell and Cambridge and prevent rebuilding in Concord. This failed mainly through the sagacity of the town in sending as its Representative to the Legislature the Hon. Samuel Hoar, whose wisdom and influence controlled votes enough in that body to defeat the removal. The present Court-House was built in 1851, and during the interval the courts were held in the vestry of the church. With the change of the Common Pleas to the Superior Court, the March term was removed to Lowell, and only a civil and a criminal term in the summer were left in Concord. In 1857 the Supreme Judicial Court held a session here for capital trials. The presence for a week of Chief Justice Shaw, Justices Metcalf and Bigelow, with Attorney-General Clifford, revived the former glory of Concord Courts, while Abbott, Butler, Train, Somersby, Gale and Kelly kept up the old reputation of the Middlesex Bar by successful defences of the accused.

These were the last important trials in this town, and in 1867 the courts were removed to Cambridge and Lowell, and Concord ceased to be a shire. The act authorizing this removal provided that the county property here should be given to the town which had furnished the sites of the county buildings. This was done, and the Court-House was sold by the town to the Middlesex Mutual Fire Insurance Company.

The jail, built in 1791 of split granite, with large rooms, strong doors and safe gratings, frequently crowded with prisoners during terms of the courts had held in its walls Alcott and Thoreau for refusing to pay their taxes, was sold, taken down and used for ulyverts and cellar walls. This jail took the place of

an earlier one built of wood that stood on the rear of the Main Street Burying-Ground, in which Sir Archibald Campbell, lieutenant-colonel of the Seventy-first British Regiment, was confined with other prisoners of war during the Revolution, and his sketch of the building now hangs in the Public Library. There are some traditions of a still earlier jail that is said to have been placed near the Orthodox Church grounds, but it has left no distinct record. The county house near the jail became the property of the Catholic Church, and all traces of the shire-town were taken from Concord.

MILITIA COMPANIES.—The two companies into which the Concord soldiers had been for nearly a hundred years divided were the originals of the two which fought at the North Bridge.

The heavy drafts on the town by the Revolution and the organization of the Light Infantry Company, left but one company of militia, called the Standing Company, in Concord. This continued till the change of the law, in 1840, enrolling the militia. Great consideration to military titles was always paid in the town. These are set out in the earlier records, displayed on the old grave stones and handed down in the speech of the generations. Since the Revolution, there have been in Concord three generals,—Hildreth, Colburn and Buttrick,—a dozen colonels, several majors, and two-score captains, who were always spoken of and to by their titles.

In 1804 a company of artillery was chartered for Concord, and made its first parade the 4th of July of that year. By the charter act it was ordered that two brass field-pieces, suitably engraved, be provided for the company, and in pursuance of this a pair of six-pounders were given them.

The inscription on these cannon reads:

" The Legislature
of Massachusetts
consecrates the names of
Major John Buttrick
and
Captain Isaac Davis
whose valour and example
excited their fellow citizens
to a successful resistance
of a superior number of
British troops,
at Concord Bridge,
the 19th of April, 1775,
which was the beginning
of a contest in arms
that ended in
American Independence."

These field-pieces, after a service of more that forty years in the company, were exchanged for a new pair having the same inscription, pursuant to a resolve passed in 1846. The first pair now stand in the Doric Hall of the State-House, on either side of the statue of Washington. The new pair, after nearly forty years of service, were transferred by the Legislature to the town of Concord, and with all their equipments of caissons, harnesses, &c., are carefully

kept in the town-house under the charge of an independent battery of light artillery.

The Concord Light Infantry gave up its charter in 1848, being then the oldest corps in the State next to the Ancient and Honorable Artillery of Boston. The Concord Artillery, about the same time, changed its drill to infantry, secured an armory on Bedford Street and has since become a leading company of the Massachusetts Volunteer Militia—Co. L, Sixth Regiment. A few years ago the town built a new and convenient armory on Walden Street, in which this corps take pride and keep up the spirit and drill of their high rank as soldiers. While the two uniformed companies, the infantry and artillery, continued, great rivalry existed between them, and showed in their street parades as well as in their military balls.

These dances were held each winter by the infantry at Shepard's Coffee-House, on Main Street, and by the artillery at the Middlesex Hotel, and great efforts were put forth by either company to secure the fairest partners, the finest music and the best supper of the season. The rivalry culminated in a grand training in October, 1838, when each company turned out with a full band of music from the city and paraded on opposite sides of the square. The bands strove to drown each other's music, the soldiers to crowd the ranks of the other company off their line of march as they passed and repassed, till hot blood was raised and spilled before the interference of wiser and cooler heads stopped the fray.

The next year "Cornwallis day" was duly honored in Concord by a gathering from all the county. The uniformed companies, under the command of Gen. Joshua Buttrick, as Lord Cornwallis, represented the British army, and the militia companies led by Col. Sherman Barrett, as General Washington, the American force. The line was formed on the Common in the forenoon, extending the whole length in double ranks of Continentallers, displaying every old and odd article of dress that could be ransacked from the garrets of the county. They were armed with any and every kind of weapon that had seen service, from the old fire-locks of the Indian wars to the modern rifles and fowling-pieces. A more quaint motley than these presented has rarely been seen in this age and community.

The two armies had a sham fight in the afternoon, that was hardly bloodless, one or two being wounded with ramrods, fired off in the haste of loading, or a bayonet prick in the excitement of a charge. At dark Cornwallis surrendered, and this was duly celebrated at the taverns, where both forces fraternized afterward. The occasion fully proved the truth of Lowell's lines :

"Recollect what fun we had,
You 'n' I an' Ezra Hollis,
Up there to Concord plain last fall,
Along of the Cornwallis."

Twenty years later, in 1859, Governor Banks as-

sembled the whole volunteer militia of Massachusetts for a five days' muster at Concord. Seven thousand well-drilled uniformed soldiers were present, and were reviewed by the State officers and the Legislature, in the presence of a great crowd of people. This muster helped materially to make the State troops ready for the breaking out of the Civil War. After that war was over, in 1869, Major-Gen. Butler, then in command of the Massachusetts Volunteer Militia, repeated this general muster of all the force, on the same field in Concord. It was almost a review of the veterans of the Union Army from this State, so many of them who had gallantly borne themselves on Southern battle-fields, had continued in the service to that time.

MEADOWS.—Stretching along the Concord River and its south branch are great meadows, containing more than 10,000 acres. These were the beds of ancient ponds or lakes, now drained by the river, and are covered with deep, rich soil. The early settlers found on these a supply of grass for their cattle, and gradually, as the forest was cleared off, the meadows should have become dryer and fit for cultivation. But in 1793 the Middlesex Canal Company was chartered to make a canal from the Merrimack River to the Mystic River. This was then a great public work, and so much interest was taken in its success that the charter was very loosely drawn, without suitable provisions for damages to private property. It was intended to take the water of the Merrimack and bring it through the canal to the Mystic near Boston. Complete surveys showed the Concord River, where the canal would cross it at Billerica, too much above the level, and the plan was changed. The Concord River had to be used as the feeder, and the water of that stream taken to fill both ends of the canal. To get a sufficient supply a dam was required at Billerica that would hold the water of the Concord in the dry season. An old mill-dam, used only in the wet portion of the year, existed there, and was secured by the canal for its purposes, raised and tightened so that the river was flowed back on the meadows, and they grew more wet every year and of less value. The meadow owners brought various suits for damages sustained by this flowing, but were never successful in getting any pay, because of the insufficient provisions of the Canal Act.

After the Boston and Lowell Railroad was in operation the canal lost most of its business, and was finally given up as a water-way, and in places filled up and the land put to other uses. In 1851 the Canal Company released all their land and rights in the dam and water-power at Billerica to the Messrs. Talbott for \$20,000. This was a small consideration if they had a right to maintain the dam after the canal was abandoned. Earlier than this the city of Boston built large reservoirs on the upper waters of the Concord River to compensate for taking the water of Lake Cochituate to Boston. The natural outlet of

this lake was through the Sudbury River, and the plan was to make good the supply of water to the mills at Billerica and below. Between the dam below and the reservoirs above these meadows, the wetness so increased that they became worthless, and the owners at last were roused to take measures of redress. In 1859 the citizens of Bedford, Carlisle, Concord, Sudbury and Wayland petitioned the General Court for relief, and a special committee of the Legislature sat in Concord during the recess to hear and examine the complaints and the cause of the trouble. This committee reported their findings and all the evidence, both documentary and oral, to the Legislature of 1860. The case of the meadow-owners was so strong that an act was passed by a great majority appointing commissioners to take down the dam at Billerica to the level from which it had been raised by the Canal Company, and to pay the damages caused by such reduction of the dam, if any, from the State Treasury.

This act was to take effect the next September, in order to give the mill-owners time to substitute steam for the water-power they might lose. When September came legal proceedings were had, and an injunction laid on the commissioners, on the ground that the State might not pay these damages, which delayed their action till winter had set in, and the work was difficult. Meantime a new Legislature had been chosen, to which the manufacturers were incited to send representatives by the alarm that dams were in danger. The Legislature of 1861, although chosen to some extent under manufacturing influence, could not be induced to repeal the act of the former year, so strong was the case of the meadow-owners for relief. The most that could be passed was an act to suspend the former law, and have a commission appointed to examine into the trouble again. This commission sat, surveyed and experimented all summer at an expense of \$15,000, and reported to the next Legislature in substance that although the top of the dam was higher than the bottom of the river for its length of over twenty miles, and that there was only thirty-four inches of fall to the stream in that distance, there were so many bars and weeds and rocks in the river that the dam didn't do all the harm. This report was adopted, and the law taking down the dam repealed in 1862, so that the meadow-owners got no relief for the depreciation of their crops for more than half a century, and the decrease in value of the land from one hundred to ten or fifteen dollars an acre; in all a loss of more than a million dollars by a dam that was never worth or cost more than \$20,000, and the improvident legislation under which it was built.

EDUCATION.—The schools of Concord have been from the earliest days objects of great interest. The town had a grammar school before 1680, and in that year the constable returned, on an order of the Council, that he "had made diligent inquiry and find no defects to return;" *i. e.*, of any children or youth not

"taught to read the English tongue, have knowledge of the capital laws, be taught some orthodox catechism, and brought up to some honest employment." This grammar school has been kept since 1692 to the present time, some years in the centre of the town, and in other years partly in the centre and partly in the different quarters of the town.

After the Revolution the districts were revised, and the money appropriated for schools divided among them according to the taxes paid by the residents, but there never were legal school districts established. In 1831 a new system of division of the school money was made, by which each district received a certain percentage of the sum raised. There were six outer districts in addition to the centre one as early as the present century. In 1799, when new school-houses were built in nearly all of the districts, a School Committee was chosen for the first time, consisting of five citizens, who had the general charge of all the schools, and a prudential committee for each district was usually chosen to provide teachers and sundries for that school. This system substantially continued until 1860, when a larger committee was chosen, consisting of three from the Centre District and one each from the other six districts, one-third of the number being elected annually. Under this new system a superintendent of schools was appointed by the committee, and this plan is still in force. A high school was established by this committee, though the grammar school had been called high school for a few years previous, and a superintendent of schools had been sometimes chosen before 1860. The sum raised by the town for the schools that year was \$3300. This has been almost yearly increased, till in 1890 \$14,400 was raised for schools, besides \$1,000 for text books, and \$800 for repairs of school-houses.

Meantime a still greater change in the school system has taken place. The school-houses in five of the six outer districts are closed, and the scholars of each of these districts are brought to and carried from the Centre, so that except at Westvale all the children of the town are taught in the graded Emerson School and in the High School, both new and modern school-houses of eight and four rooms. At the Junction a new four-room school-house was built in 1887, and the children of that village, Westvale and the Reformatory attend there in a graded school.

The teachers of the grammar and High School since 1830, have been,—

PRIVATE SCHOOLS.—Since the close of the academy in 1834, various private schools have existed in Concord at different times, some of these remarkable for a high order of teaching and scholarship. As an instance of longevity and continuance of families in town, out of twenty-two scholars attending a private school here, sixteen were living fifty years after its close, and twelve of these were present at a wedding in Concord half a century from its commencement.

SOCIETIES.—Beside those already mentioned, various associations were formed that have had much influence in this town. The first and oldest, growing out of the Committee of Safety of the Revolution, is the Social Circle in Concord. This was formed in 1782 and consists of twenty-five members, meeting at each other's houses weekly, in the season from October to April. It has, with two slight interruptions, been steadily continued to the present time and celebrated its centennial in 1882. The proceedings of that meeting were printed with the memoirs of the twenty-five original members. During this century of its life it consisted mainly of the leading citizens of the town, and contributed to the improvement of Concord in many ways. Of late years its chief work has been the preparation of memoirs of all its deceased members. In 1889 a second series of these memoirs was printed, containing sixty-two more, concluding with that of Ralph Waldo Emerson, by his son, and completing the list to 1839, the date of Mr. Emerson's admission, of all who joined the Circle previously. It is of this club that Emerson wrote, in 1844, "Much the best society I have ever known is a club in Concord called the Social Circle, consisting always of twenty-five of our citizens, doctor, lawyer, farmer, trader, miller, mechanic, etc. Solidest of men who yield the solidest of gossip." Perhaps it should be noted, that of the present members, only one, Hon. E. R. Hoar, belonged to it at the time of that writing above quoted.

In 1879 a similar club of fewer members and somewhat younger men was formed, called the Tuesday Club. Not to be outdone by the gentlemen, last year the ladies got up a club of their own, which, like the other two, meets for the same purpose on the same evenings.

In 1794 a Fire Society was formed, each member of which was required to keep in readiness for use, two leather buckets, a ladder and a large canvas bag. It was expected that each member, at an alarm of fire, would seize his buckets and bag and go to the scene and help save the property from destruction. This society, with its annual supper, paid for by the fines of delinquent members, was for many years a useful and flourishing institution of the town, till superseded by a Fire Department in 1855.

The Female Charitable Society was established in 1814 and has continued ever since its good work of relieving the wants of the poor and needy. It has

now more than a hundred members and a fund of two thousand dollars.

Musical, Temperance, Colonization, Anti-Slavery, Bible and Missionary Societies have existed in Concord for many years, changing from time to time as their purposes waned or expired. In recent years church associations, lodges, orders and clubs have multiplied till they include in their membership a large part of the population. The latest society, and destined to become one of the great interest, is the Concord Antiquarian Society. This was incorporated in 1887, and received from Mr. Cummings E. Davis his collection of antiquities and relics valued at many thousand dollars. The society purchased the old Reuben Brown house, near the Square, for a home for their collection, has held regular meetings at which historical papers are read, and by its annual meeting on the 12th of September keeps up an interest in the anniversary of the settlement of the town. The rooms are open daily for visitors, on the payment of a small fee, and its attractions receive much praise. It furnishes a nucleus around which in the future will gather many interesting articles that will whisper of the Past, and become rarer and more valuable with years.

The gift of twenty thousand dollars by Miss Martha Hunt for a Home for the Aged in Concord caused the incorporation of such an institution in 1886. The large mansion of the late Cyrus Snow, on Walden Street, was purchased for the purpose, and several inmates have availed themselves of its shelter and support.

The literary epoch of Concord closed with, if it did not culminate in, the School of Philosophy. This was got up in 1879 by A. Bronson Alcott and held its first session in his house. It attracted a class of metaphysical thinkers and speakers from various sections of the land, and was reported largely in the newspapers and quoted as a new departure in Philosophy. A small chapel-like structure, capable of holding several score persons, was built the second year for the purpose, and in this lectures, essays and discussions went on for seven summers. Some old and some new ideas were uttered, some worshiped and some scoffed, and the world outside made fun of its dialectics and lucubrations. Eminent men and women at times read papers at its meetings, but the failure of Alcott's mind and health, and the secession of some of its leaders, took away from its interest. The attendance fell off, and after a season or two of literary and biographical notices of Goethe, Dante and Emerson, it quietly passed away in 1887 to the oblivion it merited. The outcome, except to those who attended its sessions, was little except the ridicule of the unbelieving world.

NEWSPAPERS.—In 1816 Messrs. Bettes & Peters began the publication of a weekly in Concord called the *Middlesex Gazette*. This was changed to the *Yeoman's Gazette* in 1830, and continued under various

editors till 1840. The last editor was William S. Robinson, a native of this town, and well known in after years as "Warrington."

Meantime in the Anti-Masonic excitement of 1834 another paper, the *Concord Freeman*, was published here by Francis R. Gourgas, and continued by him and Charles C. Hazewell till about 1850. While these two rival sheets existed, much controversy went on between them, and lively, sharp and personal editorials appeared. A curious instance of their disagreement was shown in September, 1835. The *Gazette* for several issues was filled with the notes of preparation for the Bi-Centennial of the town, and printed a long account of the celebration. The *Freeman* of that time makes no mention of the occasion, either before or after that date, although nearly the whole people of the town were present or interested in the great event.

In 1875 the *Concord Freeman* was revived as a branch of the local newspapers of several of the neighboring towns and still continues to be published.

In 1885 the *Concord Transcript* was started by Frank A. Nichols, and issued for a single year, printing in the paper of September 19th a full account of the 250th anniversary of the town and a verbatim report of the speeches at the dinner (with the oration of Senator Hoar, in a supplement), making over thirty columns of the paper. More recently the *Concord Enterprise* was published on the same plan as the *Freeman*, and still exists, so that the town has the advantage of two local newspapers and their advertisements.

MANUFACTURES — Damon Manufacturing Company.—The earliest industry engaged in by the colonists of New England, which could properly be called a manufacture, was the working of iron, established in 1643, in Lynn, Mass. Considerable quantities of bog-iron ore had been discovered in the western part of that town, and a company was organized in London to furnish capital for the erection of a furnace and forge, which was effected, and the business was continued for many years, until the supply of ore was so far exhausted that it became unprofitable. The superintendent of the works, about 1658, was Oliver Purchis, who was also one of the most influential citizens of Lynn, as was indicated by his election to various offices of civil trust, such as selectman, town clerk, representative to the General Court, etc. Through his influence, as is probable, a company was incorporated on the 5th of March, 1658, "to erect one or more Iron Works in Concord." A considerable deposit of iron ore had been discovered in the southwest part of the town. The company was immediately formed, and consisted of Oliver Purchis, who held five thirty-seconds of the stock; John Payne, a merchant of Boston, thirteen thirty-seconds; Edward Bulkley, the parish minister of Concord; Robert Meriam, Timothy Wheeler, Sr., William Buss, John Niles, Joseph Hayward, and

Mary Griffin, of Concord, and Michael Baron, of Woburn, being the other stockholders. Operations were commenced in 1660. The company had permission from the General Court, by vote passed May 30, 1660, "to digg iron ore without molestation in any land now in the Court's possession." As a further encouragement to the enterprise, a thousand acres of land, on the north side of the North River, as the Assabet River was then called, were granted and became known as the "Iron Works Farm." A dam was built across the river, and near its northern end the iron works were built, and at once went into active operation.

In 1664, on the 18th of October, John Payne sold eleven thirty-seconds of the stock to Simon Lynde, a merchant of Boston; and in 1671, on the 15th of December, Oliver Purchis sold all of his stock to the same gentleman. In 1670, on the 19th of December, John Payne sold the remainder of his stock to Thomas Brattle, a merchant of Cambridge, and on the 19th of November, 1672, the other stockholders sold their interest to Mr. Brattle. So that, before the close of 1672, the whole property was owned in equal shares by Simon Lynde and Thomas Brattle, both of them wealthy and influential men in the Colony.

In 1684, on the 30th of May, the half belonging to Mr. Brattle was sold to James Russell, Esq., of Charlestown. The description of the property is of interest. The deed conveyed "one moyety or half part of all the Iron Mills and Iron Works or Forge at Concord aforesaid, together with one moyety or half part of all the land whereupon the same doth stand, and of all the Ponds, Dams, Gates, Headwards, Waters, Water-courses, Rivers, Fishings, Gears, Harnesses, Bellows, Hammers, Anvills, Houses, Sheds, Buildings, Scales, Weights, Utensils, Tools and Implements whatsoever, to the same belonging."

The share of Simon Lynde was conveyed, December 13, 1694, to Nathaniel Cary, a merchant of Charlestown. The terms of the deed show that the iron works were still in operation in 1694. On the 1st day of April, 1700, Mr. Cary sold his share to James Russell, who thus became sole proprietor. This deed conveyed "one moyety or half part of all the land whereupon the iron works did formerly stand," showing that, between 1694 and 1700, the works had ceased to be operated.

In 1702, on the 31st of March, Mr. Russell conveyed to Jonathan Prescott, "chirurgeon" of Concord, "eighty-eight acres on the north side of the North River, adjoining to ye said river, both above and below the old Iron Works or Forge." This deed makes no reference to any grist or other mill on the premises, but speaks of a road on the south side of the river, leading to Hayward's corn-mill, which was on another privilege on the brook which enters the Assabet River, a short distance below the Iron Works Dam.

On the 14th of January, 1708-09, Dr. Prescott con-

veyed the property to Josiah Wood, of Beverly, Mass. The deed embraced "eighty-eight acres and a small dwelling-house thereon standing, as also a corn-mill and a forge or iron-works thereon standing, with all the tools, implements and utensils properly belonging to and for the use of," showing that some part at least of the old iron-works and tools still remained and were in operation, probably only for the convenience of the people in the vicinity for work ordinarily done in a blacksmith's shop. The manufacture of iron from the ore had, without doubt, been abandoned some years previously from the failure of the supply of ore. The deed also shows that, before 1708, a corn or grist-mill had been built at this dam, so utilizing a part of the power.

On the 12th of March, 1714-15, Mr. Wood conveyed to Jonathan Herrick and Lot Conant, Jr., both of Beverly, Mass., "the very place or same, which was commonly called the Iron Works Farm, where the old works stood, and the which now doth contain the new dwelling-house that I at present dwell in, as also another small dwelling-house stands upon it, together with a barn and a shop, as also two mills, the one of which is a grist-mill and the other a fulling-mill, all stand upon the premises with a dam to them belonging." From this deed it appears that, before 1714, a fulling-mill or clothier-shop for fulling and dressing the homespun and home-woven cloth made in the vicinity, had been established on the privilege, which, after the lapse of nearly a century and three quarters, is occupied for a branch of the woolen manufacture in successful operation.

The property remained in the hands of Mr. Conant and his descendants for nearly a century. His grandsons, Lot and Ezra, on the 15th of June, 1808, sold three-fifths of the privilege to Ephraim Hartwell, of New Ipswich, N. H. and John Brown, of Concord. These persons entered into partnership, under style of Hartwell & Brown, for the purpose of establishing a cotton factory. Ephraim Hartwell was a pioneer in the cotton manufacture in New Hampshire, having, with Charles Barrett and Benjamin Champney, built the first cotton factory in that State, at New Ipswich, in 1804. There is little doubt that they at once carried out their purpose and that one of the earliest cotton factories in New England was then established at what is now called Westvale. It was a considerable enterprise for those times, as in 1813, on the 19th of February, Ephraim Hartwell Bellows, a nephew of Ephraim Hartwell, paid six thousand dollars for one-third of the factory and land, and became a member of the firm, the style being changed to Hartwell, Brown & Company. Mr. Bellows afterwards, by purchase or inheritance—probably the latter, as there is no record of a deed—became the owner of Hartwell's share of the property. On the 14th of July, 1817, John Brown sold four-fifths of his interest to Caleb Bellows, of Windsor, N. H. who thus became a partner in the firm, the style of which was changed to E.

H. Bellows & Co. On the 23d of July, 1823, E. H. Bellows purchased from the administrator of the estate of Caleb Bellows, deceased, the interest which had belonged to that gentleman. Messrs. Bellows & Brown continued the business until 1825, when, in consequence of certain disagreements between them, Mr. Bellows determined that the business should stop. This gave rise to a lawsuit, which became one of the *causæ celebres* of the period. It was decided in favor of the plaintiff, Mr. Brown, and Mr. Bellows sold for ten thousand dollars the whole property to Thomas Lord & Company, commission merchants in Boston, the deed being dated April 14, 1831.

On the 20th of September, 1833, Thomas Lord & Company sold the property to James Derby, of Exeter, N. H., a manufacturer of cotton and woolen machinery. Mr. Derby established his business in a part of the factory, which was then a building of wood, one hundred feet long and five stories high, including the basement and attic. He continued the business there but a little more than a year, and on the 26th of December, 1834, sold it to Calvin C. Damon, of Framingham, Mass., for eighteen thousand dollars. The mill was run by Mr. Damon as described in his memoirs at the end of this sketch of Concord.

The charge of the mill was assumed by Mr. Damon's eldest son, Edward Carver Damon. He was born in Concord, Mass., July 19, 1836. In addition to instruction in the schools of his native town, he enjoyed the advantage of attendance, for several terms, at the Lawrence Academy, Groton, Mass., and the Phillips Academy, Andover, Mass., both of them seminaries of a high grade. On the occurrence of the sickness of his father and the consequent stoppage of the mill, he closed his attendance on school, and though yet lacking some six months of being eighteen years of age, and with only such knowledge of the operations of the mill as he had gained by employment in it during the intervals of the school and academic terms, he started up the mill. Assuming the entire charge of the business, he continued it with efficiency and success till the summer of 1862. On the 19th of June of that year the mill, which was of wood, was destroyed by fire. Arrangements were immediately made and the new mill, constructed of brick and with reference not only to the essential requirements of the business, but to architectural taste and proportions, was completed in 1863.

Mr. Damon continued the business alone till May, 1864, when he received as partner Henry F. Smith, his cousin, their mothers being sisters, and nieces of James Johnson, the commission merchant of Boston, referred to above. Mr. Smith had had a somewhat varied experience in woolen-mills. He was employed by George H. Gilbert, at Ware, Mass., from 1851 till about 1853, when he went to Rock Bottom, Mass., and entered the employ of B. W. Gleason, whose partner, Samuel J. Dale, had recently died.

He remained at Rock Bottom some two years, and in the winter of 1854-55 went to Holderness, N. H., and thence, after a few months, to Ballardvale, Mass., where he was associated with J. Putnam Bradley till 1863. In May, 1864, he was received into partnership by Edward C. Damon, under the style of Damon, Smith & Co. On the 1st of May, 1865, Benjamin Harper Damon, a younger brother of Edward, born in Concord, Mass., September 15, 1843, and having been trained in the work of the mill, became a partner. He lived less than two years after his admission to the firm, his death occurring November 11, 1866.

The firm of Damon, Smith & Company was dissolved Dec., 1876, Mr. Smith retiring, and Edward P. Almy becoming a partner, under the firm-name of Damon & Almy. Mr. Almy was a practical woolen manufacturer, having been educated to the business in the American Mills, at Rockville, Conn. He had also operated a small woolen-mill in Windham, N. H., for about a year and a half before associating himself with Edward C. Damon. This partnership continued about four years, and on the 1st day of December, 1880, Mr. Damon purchased the interest of Mr. Almy, and organized a joint-stock corporation under the name of the Damon Manufacturing Company.

The business, in the nearly sixty years since the Damons took control, has been largely increased and diversified, especially in the last ten years. The various kinds of goods manufactured in the past two years comprise one hundred and fifty styles. The annual product is now over thirty thousand pieces, or one million two hundred and fifty thousand yards, in the place of seven thousand pieces, or two hundred and twenty-five thousand yards, made in the old mill. The number of persons employed has increased from forty to one hundred and sixty. The hours of labor have decreased from thirteen in the summer and eleven in the winter season, to ten hours for a day's work, and the wages have increased in a greater proportion. The present officers of the corporation are: Ralph H. Damon, president; Edward C. Damon, treasurer; Charles E. Manock, superintendent.

The manufacture of lead pipe was begun in 1819 and of sheet lead in 1831, by David Loring, at the falls of the brook into the Assabet, half a mile east of Westvale. This continued till about 1850, when it was changed to a wooden-ware factory, and has been enlarged and the business much increased since. The junction formed by the Lowell and Framingham Railroad crossing the Fitchburg Railroad near this mill factory about 1870, and the building of the prison in the vicinity, have given an impulse to manufacturing in this part of Concord. Several other establishments are in operation or are building there, and the latest, a leather harness factory, owned by Mr. Harvey Wheeler, of Concord, is now in operation. This section promises to become the busy industrial portion of the town, and to build up a new town with

these various industries. Meantime the old or central part of Concord is becoming rather more a place of residence than of business.

PRISON.—In 1873 commissioners were appointed, under a resolve of the Legislature, to build a new State Prison. This was located in the westerly part of Concord by the decision of the Governor and Council. The prisoners were removed here from Charlestown in 1878, and after being here six years were taken back to the old prison. The Massachusetts Reformatory was established in Concord in the place of the State Prison. A few of the best behaved prisoners were returned to the Reformatory and it soon filled up to the maximum. Col. Gardner Tufts was appointed superintendent and has had the charge of the institution to the present time. The inmates are divided into three classes according to their behavior, wear different uniforms and have different privileges. By a recent law, sentences to the Reformatory are made indeterminate, and convicts are to be kept here not more than two years for minor offences and not more than five years for aggravated crimes. There are about seven hundred in confinement, instructed, guarded and employed by nearly fifty officers, who make, with their families, quite a village. Several different industries are carried on for the employment of the prisoners, and the institution is highly commended.

FIRES.—The first and the most serious loss by fire in this town was the burning of the Simon Willard house, at the foot of Nashawtuck Hill, in the middle of the seventeenth century. By this the earliest records of Concord were destroyed, and the names of the first settlers, the division of lands among them, their trades and troubles with the Indians, and with each other, were lost forever. In 1784 Samuel Heald's house was burned and three lives were lost. In 1819 the alms-house was destroyed by fire and the same year the Centre School-house, causing considerable loss to the town as a municipality. In 1823 Col. William Whiting's carriage factory and part of his dwelling-house on Main Street were consumed. In 1829 a new house, built by Major Samuel Burr on Monument Street, was burned before it was entirely finished. In 1834 another large fire destroyed the foundry and blacksmith-shops of Whiting's carriage factory. In 1842 the large, new store of Phineas How was robbed, set on fire and burnt. In 1845 the old Middlesex Hotel was consumed by a fire which happened during the June term of the Court, much to the inconvenience of those attending that session. In 1849 the court-house was set on fire and burnt, with the dwelling-house and stable of Mr. Keyes adjoining. In 1859 the large mansion on the Lee farm, on the site of the Simon Willard house, and occupied by Harvard College in 1776, was burnt, and in 1862 Damon's woolen factory shared the same fate. Several other dwellings and barns and shops have been burned, but those mentioned are the most important.

Since the introduction of the water no large fire has occurred in the town, and the losses by fire here have been slight.

MUSICAL MATTERS.—Some attention was early given to psalmody, and singing-schools were the first and almost the only amusement of the young people of the olden time. Musical societies were formed after this century began, and aided the improvement of this art. Until 1800 the tuning-fork for the church-choir was the only instrument used. Soon after that year a bass-viol, a violin, a clarionet and flute were added to the voices in sacred music on Sundays.

On the remodeling of the old meeting-house, in 1841, an organ was procured, and with it came a new interest in the choir: some well-trained, sweet voices made melody never before heard here. The town appropriated money for singing-schools, and these in the winter evenings were well attended by both old and young. Later an instrumental band was formed that for several years furnished pleasing music for public occasions and village concerts. A choral club is the latest and best of the musical societies. This, besides occasional concerts, has as its climax brought out the opera of "Priscilla, or the Puritan Proxy," an original production of its members, which has been received with favor by several audiences both here and elsewhere, and shows the great stride from psalms to opera.

A play-ground containing four acres of level land was presented to the town in 1887 by the family of Ralph Waldo Emerson. It is situated near the Emerson School on Hubbard Street, and is admirably adapted to furnish a place for out-door games and sports. In the future it will have apparatus for gymnastic exercises and probably a gymnasium within its limits. The control and improvement of the play-ground is vested in officers chosen by the town, and it affords now almost the only open space in the centre for military drill and the plays of youth.

Of course in these days this town could not fail to take an interest in the national game and form a base-ball club. Under the management of Mr. William Barrett this has become a popular institution of the town. It has played nearly every week of the last season on the Agricultural Grounds and attracted crowds of people to see games with similar clubs of amateurs. In nearly every instance the Concords have been successful, and if they persevere in this course the town will have reason to be proud of this latest achievement of her boys.

TAVERNS.—The earliest tavern in Concord of which there is a record is that of William Buss, in 1660. This stood near the present library building and was kept by William several years, though he objected to selling liquor and asked to be relieved from that part of the business.

In 1666 John Haywood kept a tavern, which, if not the same as that of Buss, stood quite near it. This part of the present Main Street was for two hun-

dred years the site of one or more taverns. The Black Horse Tavern, which in the next century gave the name to the seceding church, if not one of these two earlier taverns, was very nearly on the same site. The Wright tavern, built in 1747, and still standing on the Common, was kept as a public-house till after the Revolution, when it was changed to a bake-house and used as such for the next half century. This change did not take from it quite all its character as "a public," for while Deacon Jarvis was the baker, it was resorted to on Sunday noons for lunch by many who stayed for afternoon service. After the baking business was given up it held various tenants, both for domestic and trading purposes, until about 1882, it was restored to its original design, and is still kept as a tavern under its first name.

Previous to the Revolution Ephraim Jones kept a tavern at the west end of the Main Street burying-ground, in a large, roomy house, that had grown by various additions, perhaps from that of John Haywood. The site of this, now the fine lawn of Colonel R. F. Barrett's residence, was close to the old wooden jail, and feeding the prisoners was part of the tavern-keeper's business. This tavern continued, under the charge of a son of Ephraim Jones, and under Major Paine, Nathan Patch and Hartwell Bigelow, to be the resort of the teamsters who carried over the highway from Boston to Keene, N. H., the bulk of the trade of this section till after the railroad took away their business.

After the Revolution John Richardson opened a public house on the Common, in what is now the priest's house. After the stone jail in the rear of this was built, he swapped houses with the county and took the corner of the Main Street for the tavern, which was enlarged and improved into the Middlesex Hotel. Here he and his successors did a thriving business of a better class of custom than the Bigelow tavern for half a century. This hotel was the sojourn of the lawyers, jurors and witnesses during the terms of court, furnished the dinners for the conventions and cattle-shows, the suppers of the societies and the balls of the village. Its ample bar-room on the front corner was the scene of many jolly carouses, and its public room, overhead, held many gatherings of the more sober and sedate sort, while the large hall in the third story had dancing schools and parties, both numerous and gay. In 1845, while occupied by Thomas D. Wesson, it was burned, and the present building was erected by him the next year. Mr. Wesson, then an old man, long a tavern-keeper, could not see the change made in travel by the railroads, and persisted in rebuilding on the same plan as the old hotel, instead of adopting a newer style. The result was unsuccessful, and the house, under various landlords, has never filled the demand for a hotel of the modern type. After the removal of the courts its business fell off, and for several years past it has been closed and neglected, until now, almost a ruin, it

is an eye-sore to the citizens and a disgrace to its owner.

Early in this century a third tavern was opened in the village, and was kept by Major Wheelock, in the house on the Main Street nearly opposite the present library building. This was owned by Dr. Isaac Hurd, and was enlarged by several additions as the business increased, and kept by various landlords for the next twenty-five years. In 1829, Wm. Shepherd, a proprietor of the line of stages from Boston to Keene, bought this hotel, and kept it for the next ten years under the sign of "Shepherd's Coffee-House." In his hands it acquired much fame and was noted as one of the best hotels outside of Boston. Mr. Shepherd added a large hall for dancing parties, and had the best custom of the town and the road, while the stage passengers stopped there for breakfast and supper. He left Concord in 1839, selling the tavern, which passed through several landlords, the last of whom Colonel Joseph Holbrook, after keeping it as a hotel till about 1860, moved off the hall, and converted both that and the main hotel into dwelling houses.

Of course the most profitable part of the business of these taverns was selling liquor over the bar to their thirsty customers. Before the temperance reformation had made such a change in the habits of drinking, a line of customers could be seen daily wending their way from workshops, fields and houses, at eleven and four o'clock, for their forenoon and afternoon bitters. On a still summer day the music of the several toddy sticks crunching the sugar and clinking the glasses could be heard through the main street of the village at the hours above named. But the taverns at last had to yield to the growing sentiment for prohibition and no license, though they kept up the fight stoutly till the law prevailed, the bar-rooms closed, the taverns shut their doors, and for a time Concord had no tavern in its borders. Since then the Wright Tavern has been re-opened, and in 1889 the Thoreau House was started as a hotel on the north side of the Common.

Mention might have been made of several other houses, some still standing, that for longer or shorter periods were kept as taverns in this town, notably the Wheeler House, on Great South road at the Nine Acre Corner; but this must suffice on the subject.

TOWN DONATIONS.—Peter Wright, a weaver by trade, in 1718, devised to the town by his will as follows: "Unto ye poore of the Town of Concord that shall be, I do will and bequeath unto their use all the produce and income of all my real estate (after the death of my wife) forever. The ordering of the same I do empower the worthy minister of the said town that either is or shall be, together with the selectmen that shall be successively forever. The minister that shall be to have a double vote to any one that shall be of the selectmen that shall be in that affair." This was the beginning of the Silent Poor Fund in Concord, and this donation now amounts to \$300.

John Beaton in 1776 gave to the poor of Concord the sum of one hundred pounds, and this now amounts to \$400. John Cuming in 1782 gave to the same object the sum of one hundred and fifty pounds sterling, which now amounts to \$900. Abel Barrett in 1802 gave to the Silent Poor the sum of \$500. Jonathan Wheeler in 1809 gave a similar amount for the same purpose. Ephraim Merriam in 1844 gave \$800 to this fund. Perez Blood in 1857 gave his wood lot to the town for the same object, and it realized on a sale the sum of \$1200. Charles Merriam, of Boston, in 1864 gave \$1000 to this fund. Reuben Hunt, of Charlestown, in 1867 added \$1000. Samuel Barrett, of Concord, gave by his will \$500 more. Ebenezer Hubbard in 1872 added \$1000. Abel Hunt in 1874 bequeathed \$1000. The trustees of William Monroe, under his will, in 1880 gave \$1000. Cyrus Stow in 1877 bequeathed the sum of \$300. Lydia Russell Whiting, the widow of William Whiting, of Boston, in 1882 by her will added \$2000. Reuben N. Rice in 1884 bequeathed \$2000. Sundry persons have added to this fund \$175, and the whole now amounts to \$14,175, the income of which is distributed annually in the manner directed by the first giver a century and three-quarters ago.

For Schools.—John Beaton and John Cuming gave the same sums as above to the Silent Poor, viz., \$400 and \$900, and Cyrus Stow gave by his will \$3000 to the High School, which, invested in real estate, is now by accumulations \$4000.

For Shade Trees.—Reuben N. Rice left by his will for this object \$2000.

Semi-Centennial Fund of \$1000.—The Hapgood Wright Fund, already mentioned, is to accumulate for fifty years, and the income then to be spent as the town by a two-thirds vote may determine, and the principal to be again put on interest for another half-century, and the income then spent, and so on indefinitely.

Cemetery Donations.—Twenty-six persons have given to the town various sums for the care and preservation of their lots in Sleepy Hollow Cemetery, and in some cases the surplus income for the general use of the cemetery, amounting in all to \$4750. Other persons in 1860 subscribed to a fund for the care and improvement of the cemetery that now amounts to \$2000. All these funds are in the charge of three Trustees of Town Donations, who are chosen as vacancies in their number occur, and this arrangement has existed for nearly a century.

By the act of 1872 for introducing Sandy Pond water into Concord, the Trustees of Town Donations have the charge of the Sinking Fund for the water debt, and they now hold over \$22,000 for that purpose.

Before the Town Library was incorporated donations to the amount of several thousand dollars had been made to the town for the support of the library. These funds were transferred with the books to the

Free Public Library corporation and are now held by that institution.

CHAPTER XLVI.

CONCORD—(Continued).

Professional and Official Citizens—Conclusion.

CLERGYMEN.—Beside those already mentioned as ministers of the First Parish (now Unitarian), Rev. Hersey B. Goodwin was settled as a colleague with Rev. Dr. Ripley in 1829, and died in 1836. Rev. Barzillai Frost succeeded him; settled in 1837, and died in 1758. Rev. Grindall Reynolds was settled in 1858, and resigned in 1882, but has continued as honorary pastor since. Rev. Benjamin Reynolds Bulkeley was his successor, and is the present minister.

Over the Second Parish, the Orthodox Society. Rev. Asa Rand preached the first year, 1826. Rev. Daniel S. Southmayd was settled in 1827, and resigned in 1832. Rev. John Wilder was settled in 1833, and resigned in 1839. Rev. James Means was settled in 1839, and resigned in 1844. He was succeeded by Rev. William L. Mather, who resigned in 1849, and Rev. Luther Farnham served till 1850, then Daniel Foster till 1851; Rev. Luther H. Angier, from 1851 to 1858; Rev. Charles B. Smith, from 1861 to 1863; Rev. Edmund S. Potter, from 1863 to 1866; Rev. Frank Haley, to 1867; Rev. C. H. S. Williams, 1867 to 1870; Rev. Andrew J. Rogers, 1871 to 1872; Rev. Henry M. Grant, 1872 to 1886; and Rev. William A. Depew from 1886 to 1890.

The Universalist Society had one minister, Rev. Addison G. Fay, who was settled in 1842 and resigned in 1846.

The Catholics who succeeded to the church of the Universalists have had for priests: Rev. P. J. Canney, from January, 1868, to August, 1870; Rev. F. Delahanty, from August, 1870, to December, 1870; Rev. John O'Brien, from January, 1871, to 1873; Rev. T. Brosnahan, from 1873 to January, 1877; Rev. M. J. McCall, from 1877 to the present time.

Rev. John A. Crow has for some years been in charge of the Catholic worship at the Reformatory. Rev. W. J. Batt is the chaplain of that institution.

An Episcopal chapel was built here in 1885, and services have been conducted in it since by Rev. Mr. Rand, Rev. Mr. Judkins and Rev. Mr. Breed.

At Westvale a religious society is formed, to which Rev. H. G. Buckingham, Methodist, preached in 1886-87, and Rev. Bartlett H. Weston, Congregationalist in 1888-89, and a church is soon to be organized.

LAWYERS.—John Hoar is the earliest lawyer in the town, if not in the Colony, and he was ordered not to practice in 1660, and died in 1704, being noted

for his difficulties with the church and his humanity to the Indians.

Peter Bulkeley, son of the first minister, held many places of honor and trust in the Colony, and died in 1688.

Daniel Bliss, a son of the minister, was an ardent Tory, left Concord in 1775, had his property confiscated, and settled in New Brunswick, where he became chief justice.

Jonathan Fay came to Concord from Westborough in 1780, and practiced his profession here till his death, in 1811.

John L. Tuttle opened an office here in 1799, and was postmaster and county treasurer till he led a regiment to the Canada frontier in the War of 1812, and died in the army, being robbed and poisoned.

John Merrick practiced law here for ten years before 1797, when he died at the age of thirty-six years.

William Jones, a native of the town, had an office here for a few years after being admitted to the bar in 1795, moved to Maine and held important positions there.

Thomas Heald practiced law in Concord from the beginning of the century to 1813, when he went south and became a judge in Alabama.

Samuel Hoar, a descendant of John Hoar, was born in Lincoln, started in practice in Concord in 1807, and took the foremost rank in his profession. He was chosen Representative in Congress in 1836, and sent to Charleston, S. C., in 1844, as agent for Massachusetts to protect negro sailors from being sold as slaves. He was forcibly sent home by the proslavery mob, and narrowly escaped violent treatment. He retired from practice in 1849, after representing the town in both branches of the General Court, and died in 1857, universally beloved and lamented.

John Keyes, a native of Westford, came here in 1812, took the practice and the offices of Colonel Tuttle, held the positions of postmaster and county treasurer for twenty-five years, was Senator and Representative several years and died in 1844, at the age of fifty-eight years.

Nathan Brooks, born in Lincoln, opened his office here in 1811, and became secretary of the Middlesex Mutual Fire Insurance Company in 1826, and continued in that office till his death in 1863. Mr. Brooks beside service in the Legislature and the Governor's Council, had a large practice in the Probate Court as administrator or executor of a large number of estates.

Elisha Fuller practiced law in Concord from 1823 to 1831, when he removed to Lowell.

John Milton Cheney, who graduated in 1821 at Harvard College, studied law with Hon. Rufus Hosmer, at Stow, settled here in June, 1831, and was made cashier of the Concord Bank in 1832. In 1836 he was chosen treasurer of the Middlesex Institution for Savings, and filled both places till his death, in 1869. While he alone discharged the duties of these

positions, the great robbery of the bank safe took place in 1867. In broad daylight at noon the bank was entered, the safe opened, and \$300,000 in bills and securities was carried off by two expert cracksmen. Of this, \$200,000 was afterwards secured and restored to the institution.

Albert H. Nelson, a son of Dr. Nelson, of Carlisle, graduated at Harvard, studied law and began the practice here in 1836, in partnership with John Keyes. He afterwards opened an office on his own account and continued here till 1841, when he removed to Woburn. There he had a large practice and was district attorney for the Northern District for two years, 1846 to 1848. He served two years in the Senate and was a Councillor in 1855. He was that year appointed chief justice of the Superior Court of Suffolk County, and held that office till his death, in 1858.

Ebenezer Rockwood Hoar began practice in Concord in 1839; was appointed justice of the Common Pleas Court in 1849, and served five years; in 1859 was appointed to the Supreme Judicial Court, and served there ten years; in 1869 was Attorney-General of the United States, and in 1872 a member of the High Joint Commission to settle the disputes with England growing out of the War of the Rebellion. After this he resumed practice in Boston; was counsel in many important causes, and, though partially retired from active work in his profession, still appears in court occasionally. He served one year in the State Senate, and one term as member of Congress, in 1873-75.

John S. Keyes opened an office here with his father, in 1844; was sheriff of Middlesex County from 1853 to 1860; United States marshal for Massachusetts from 1861 to 1866, and since 1874 has been standing justice of the District Court of Central Middlesex.

George Merrick Brooks, son of Nathan, began as a lawyer, in 1847, in Concord; held the office of State Senator in 1859, and of Representative in Congress, in 1869-71; was appointed judge of Probate and Insolvency for this county in 1871, and still fills that office.

Charles W. Goodnow practiced law here from 1848 till his death, in 1856.

George Heywood studied law with Samuel Hoar; began practice in 1851; has been Representative and Senator in the General Court, member of the Governor's Council, and is now president of the Concord National Bank and of the Insurance Company, and has been town clerk more than thirty-seven years.

Charles Thompson, a native of Sudbury, has practiced law in Concord since the war, and was trial justice here from 1872 to 1874, and is an associate justice of the District Court.

Charles H. Walcott opened an office here and in Boston, in 1874, and is now chairman of the State Board of Arbitration and Conciliation.

Prescott Keyes, son of John S., has also had an office here and in Boston since 1882.

Henry A. Richardson has recently begun the practice of law in Concord.

Judge Henry F. French resided here from 1870, till his death in 1885, although his duties as Assistant Secretary of the Treasury in Washington kept him there for nearly ten years.

George A. King, Samuel Hoar and Woodward Hudson reside in Concord and practice law mainly in Boston.

In 1877 every board of town officers save the Fire Department had a lawyer at its head.

PHYSICIANS.—In addition to the long list of those in Concord prior to 1835, as given in Shattuck's "History of Concord," there may be now mentioned: Dr. Edward Jarvis, a native of Concord, who practiced from 1832 to 1837, when he went to Louisville, Kentucky. He returned to Massachusetts in 1843, settled in Dorchester, and made a specialty of the care of insane persons. He took great interest in statistics, founded a statistical society in Boston; was a trustee of the Worcester Lunatic Hospital; wrote voluminous reports, lecture, pamphlets and books; represented his society in the International Statistical Congress, in England, in 1860; did much labor for the census of that year and of 1870, and, after a long and useful life, died in 1884, and was buried in Concord.

Dr. Henry A. Barrett, a son of Col. Sherman Barrett, of Concord, began practice here in 1845, in the place of Dr. Isaac Hurd, and continued till his death, in 1889.

Dr. Edward W. Emerson began in 1873 to practice here in partnership with Dr. Josiah Bartlett, who had been the leading physician since 1819, and continued after Dr. Bartlett's death in 1878, till he gave up his profession in 1884.

Dr. George E. Titcomb succeeded to Dr. Emerson's practice in 1884. Dr. N. H. Kirby began to practice here in 1888 and Dr. Braley in 1889, and all continue in Concord to the present time. Other physicians have at various times practiced in Concord,—Drs. Gallup, Sawyer, Whiting and Ballou, as homœopaths; Drs. Tewksbury and Dillingham as eclectics, and some others.

GRADUATES.—Since the publication of Shattuck's "History," the following Concord young men graduated at Harvard College:

1834, George Moore; 1835, Hiram Barrett Dennis, Ebenezer Rockwood Hoar; 1837, Henry David Thoreau; 1841, John Shepard Keyes; 1841, George Merrick Brooks, Edward Sherman Hoar; 1845, Gorham Bartlett; 1846, George Frisbie Hoar; 1847, George Heywood; 1849, Joseph Boydon Keyes; 1850, Ephraim Merrim Ball; 1851, Nathan Henry Barrett; 1854, Charles Pickering Gerrish; 1856, Nehemiah Ball, George Brooks Bigelow; 1858, Henry Walker Frost; 1864, Charles Henry Hildreth, Gardner Whitney Lawrence; 1866, Edward Waldo Emerson; 1867, Samuel Hoar; William Hammett Simmons; 1870, Charles Emerson Hoar, Charles Hosmer Walcott; 1871, Henry Nathan Wheeler; 1873, Francis Hagar Bigelow; 1874, Edward Emerson Simmons; 1876, Frank Wheeler Barrett; 1879, Woodward Hudson, Prescott Keyes; 1882, Sherman Hoar; 1883, George Heywood; 1884, Herbert Wheeler Blanchard, George William Brown; 1886, Thomas Parker Sunborn; 1887, Nelson Macy Barrett.

Making, with the sixty-six whose names are given in Shattuck's "History," over one hundred graduated from Concord since John Bulkley, in the first class in 1642. This gives an average of more than one student in the college all the years of its existence.

STATISTICS.—The population of Concord was: 1840, 1784; 1850, 2249; 1855, 2244; 1860, 2246; 1865, 2232; 1870, 2412; 1875, 2676; 1880, 3922; 1885, 3727; 1890, 4435. Number of legal voters, in 1885, 760. Valuation of real estate in 1889, \$2,194,020; valuation of personal estate, \$1,165,017; number of polls, 957; number of dwelling-houses, 639; number of horses, 575; number of cows, 1528; number of other cattle, 259; number of swine, 208; number of acres of land, 14,879. Rate of taxation, \$10.40 on \$1000.

OFFICIALS OF THE UNITED STATES GOVERNMENT.

—E. R. Hoar, United States Attorney-General, 1869, and member High Joint Commission, 1872; J. S. Keyes, U. S. Marshal, 1861 to 1866; A. G. Fay, Provost Marshal, 1863-64; L. Eaton, assessor internal revenue, 1865-66; Richard Barrett, Edwin S. Barrett, George Keyes and D. G. Lang served as Deputy United States Marshals during and since the war; William W. Wilde, Geo. Keyes, H. H. Buttrick and Lyman Clark were in the Boston Custom-House before and after the war; Samuel Hoar, Representative in Congress, 1835; George M. Brooks, Representative in Congress, 1869; E. R. Hoar, Representative in Congress, 1873. Besides these three, two others: William Whiting, of Boston, and George F. Hoar, of Worcester, have been members of Congress. The five lived, and four of them were born on an acre of land on Main Street, in Concord, and one of these has been a member of the Cabinet, and another is a Senator in Congress now.

Two graduates of the West Point Military Academy, Amiel W. Whipple in 1840, and Elbert Wheeler in 1874, were both appointed cadets from the same house in the southwest part of the town, known as the "Nine Acre Corner."

OFFICIALS OF THE COMMONWEALTH OF MASSACHUSETTS.—Lieutenant-Governor, Sion Brown, 1855; State Treasurer, Joseph Barrett, 1845-49; Councillors, Nathau Brooks, 1829-31, George Heywood, 1880-83; State Board of Arbitration and Conciliation, Charles H. Walcott, 1886; Clerk of the Senate, Henry D. Coolidge, 1880-90; Senators: Joseph Hosmer, 1783-93; John S. Tuttle, 1808-12; John Keyes, 1822-29; Samuel Hoar, 1825, '32; Nathau Brooks, 1831, '35; Daniel Shattuck, 1836; Phineas How, 1841; Ephraim Merriam, 1842; F. R. Gourgas, 1843; E. B. Hoar, 1846; J. S. Keyes, 1849; C. C. Hazewell, 1852; E. W. Bull, 1856; George M. Brooks, 1859; George Heywood, 1863; Henry J. Hosmer, 1889-90; Trial Justice, Charles Thompson, 1872-73.

OFFICIALS OF MIDDLESEX COUNTY.—Justice of Court of Common Pleas, Ephraim Wood, 1785-93; Justice of Court of Sessions, Abiel Heywood, 1801-27; Judge of Probate, George M. Brooks, 1871-; County Treasurers: John L. Tuttle, 1808-12; John Keyes, 1812-37; Stedman Buttrick, 1837-55; Sheriffs: Joseph Hosmer, 1794-1808; William Hildreth, 1809-13; John S. Keyes, 1852-60.

OFFICIALS OF THE TOWN OF CONCORD.—Town Clerks: Abiel Heywood, 1796-1834; Phineas Allen, 1834-35; Nehemiah Ball, 1835-39; Cyrus Stow, 1840-48; F. R. Gourgas, 1848-53; George Heywood, 1853-; Town Treasurers: John M. Cheney, 1834-40; Timothy Prescott, 1841; Stedman Buttrick, 1842-51; A. A. Kelsey, 1852; Albert Stacy, 1853; Samuel Staples, 1854-55; Joseph Holbrook, 1856-57; John B. Moore, 1858-59;

Julius M. Smith, 1860-61; George Heywood, 1862-75; Henry J. Walcott, 1876-84; Charles E. Brown, 1884-87; George E. Walcott, 1887-88; John C. Friend, 1890; Selectmen: Abiel Heywood, 1796-1834; Daniel Clark, 1830-44, '49; Cyrus Hubbard, 1822-34; Joseph Barrett, 1834; Cyrus Stow, 1835-40, '42-43; Isaac S. Lee, 1835-40, '42; Timothy Prescott, 1840-41; Elisha Wheeler, 1840-41; Joseph Darby, 1843-48; Francis B. Gourgas, 1844-50; Jacob B. Farmer, 1844-49; Richard Barrett, 1848-49; Nehemiah Ball, 1860; A. A. Kelsey, 1850-56; C. A. Hubbard, 1850, '76-80; J. S. Keyes, 1851-58; A. G. Fay, 1851-53, '62-63, '71-72; Samuel Staples, 1854-55; George M. Brooks, 1858-59; B. N. Hudson, 1858-62; J. M. Smith, 1858-60; E. W. Bull, 1860-61; Elijah Wood, 1862-63; N. B. Stow, 1862-65; B. Tolman, 1864-66; L. A. Surette, 1867-69; E. C. Damon, 1867-69; L. W. Bean, 1867-69; W. F. Hurd, 1870; Edwin Wheeler, 1870; Joseph Derby, Jr., 1870; A. J. Harlow, 1871-72; H. F. Smith, 1871, '73-75; W. W. Wilde, 1872-75; J. B. Moore, 1873-76; Charles Thompson, 1876-82; George Tolman, 1876-80; R. F. Barrett, 1881-82; W. H. Huot, 1883; C. H. Walcott, 1883; Samuel Hoar, 1884-86; H. J. Hosmer, 1884-86; S. G. Brooks, 1884-87; C. E. Brown, 1887-88; A. G. Fuller, 1887-88; G. E. Walcott, 1889-90; Prescott Keyes, 1889; Woodward Hudson, 1889; John H. Moore, 1890; Calah H. Wheeler, 1890; Representatives to the Legislature: John Keyes, Joseph Barrett, 1833-35; Cyrus Stow, Stedman Buttrick, 1836-37; Stedman Buttrick, 1838; Stedman Buttrick, Ephraim Merriam, 1839; Ephraim Merriam, Francis R. Gourgas, 1840; Ephraim Merriam, 1841; Francis R. Gourgas, 1842; Anthony Wright, 1843-44; Isaac S. Lee, 1845-47; John Stacy, 1846; Samuel Staples, 1846, '52-53, '56, '83; No choice, 1849; Samuel Hoar, 1850; Aaron A. Kelsey, 1851; William W. Wilde, 1853, '77; Ephraim W. Bull, 1855; Richard Barrett, 1857, '76; George M. Brooks, 1858; Simon Brown, 1860; George Heywood, 1863-64, '66-67; Edwin Wheeler, 1871; John B. Moore, 1874; Samuel Hoar, 1881; Henry J. Hosmer, 1884, '86-87.

The latest vote of Concord, in a matter of public interest, was that in 1889, when it was learned that one of the new naval cruisers was named for this historic town. Under an article, in the warrant for the annual meeting, it was voted "to present to the government of the United States some appropriate ornament for the new gunboat 'Concord,'" and an appropriation for the purpose was made, and a committee chosen to carry out the vote. A reduced copy of the minute-man in bronze was suggested to the Navy Department and accepted by the Secretary of the Navy as appropriate for the purpose. Mr. Daniel C. French, the sculptor, kindly offered to make a new model of this famous work, which has been successfully cast at the Chicopee Foundry. It is nearly three feet in height, and presents the same figure, with the musket and plow, as does the original at the battle-ground. It is to stand on the front of the poop-deck of the ship, with an appropriate legend beneath expressing its meaning. The "Concord" has been built at Chester, Pennsylvania, by the Delaware Iron Ship Works, formerly John Roach & Son's, and with all her machinery from the Quintard Works in New York on board, was safely launched March 8, 1890. When the vessel is completed with her armament, and put in commission, the statue will be presented and permanently placed in position to carry on the ship the honor of the name and the victory it represents around the world.

The centre of the town is every year becoming more a place for residence rather than business. Many of those in active life go to Boston daily, and more who have retired from busy occupations seek Concord for a quiet home. The largest farms are secured by persons of taste and wealth for great and

permanent improvements. The smaller and worn-out farms are falling into the hands of the industrious and saving of our foreign population. The change that these departures from the old-time ways are fast making in the Concord of to-day can hardly yet be fully estimated. The business activity, the political influence, the literary prominence of the past generations seem to be gone, never to return. What the future will be must be left to the coming men and women to determine.

In the closing words of Senator Hoar's oration this sketch may well finish: "It may be that the separate municipal and social life which has given this town her character and history is about to come to an end; that this little river is to lose itself in the sea; that the neighboring city will overflow her borders, or that railroad and telegraph and telephone will mingle her elements inseparably with the great mass of American life. I do not believe it. I think the town will preserve for a long and indefinite future her ancient and distinctive quality. But however this shall be, the lives of our fathers will not be lost. The town will have made her impression upon America herself. Among the memorable figures in history shall be that of dear, wise, brave, tender, gentle Old Concord—she who broke the path into the forest—she who delivered her brave blow between the eyes of England—she by whose firesides the rich and the poor sat together as equals—she whose children made her famous by eloquence, by sculpture and by song."

BIOGRAPHICAL.

NATHAN BROOKS.

Thomas Brooks was of the early settlers of Concord, and the family name has been handed down through every generation since, till in the Revolution it was borne by one of the minute-men at the Old North Bridge, who was slightly wounded by the British fire.

His son Nathan, the subject of this sketch, was born in Lincoln, just over the Concord line, Oct. 18, 1785. He was one of fourteen children, and, as was the custom and necessity of those days, was obliged to help in the farm work as soon as he was old enough to be of service. He had no other schooling than was afforded by the district school three months in a year until he was seventeen years old. Then, desiring to go to college, he studied with Rev. Dr. Stearns, the clergyman of Lincoln, fitted for college and graduated at Harvard in 1809. He taught school in the winters, and thus earned some part of the expenses of his education, which his father could not afford to pay. He held a fair rank in his class, and taught school a year and then began the study of the law in the offices of Hon. Samuel Hoar, and Thomas Heald,

Esq., in Concord, and was admitted to the Middlesex Bar in 1813. He began practice in Concord in a small office on the Lexington road previously occupied by Jonathan Fay, Esq.

Here he got some clients, and, by his faithfulness and care of their cases, soon acquired a fair share of the business of this shire-town. He removed in a few years to a more central office on the Main Street, which he built in conjunction with Mr. Hoar, and occupied his part of it till 1833. His practice, more especially in the Probate Court, increased, and his industry and honesty became almost proverbial.

In 1826 the Middlesex Mutual Fire Insurance Company was organized, and Mr. Brooks was chosen the secretary and treasurer of the company. This employment soon required so much of his time that it interfered with his practice of his profession, and afterwards he confined his legal work mainly to office business and the settlement of estates. He was for many years master in chancery for Middlesex county, and under the "Insolvent Laws" of that time had a large share of that business. He had great industry and capacity for work, and in all his occupations he found plenty to do, as he was a director of the Concord Bank and the president of the Savings Bank from their incorporation. He was early interested in politics, and as a staunch National Republican he was elected representative from Concord to the Legislature of 1823, '24 and '25, and was a useful and popular member. After this service he was chosen by the Whigs to the Council in 1829 and 1830, and to the Senate in 1831 and 1835. He was the candidate of the same party for Congress in 1838, and, after nine stoutly-contested trials, his Democratic opponent, Hon. William Parmenter, was chosen. In town affairs he was active and influential, though he seldom had any leisure for town offices, and in his office many important town matters were discussed and practically agreed upon.

Why insurance offices should be such centres of talk, news and gossip, it might be hard to tell, but the Old Middlesex was no exception to the rule. In the dark, dingy back-room of the bank building, where Mr. Brooks worked as secretary, more stories have been told, more anecdotes repeated, more politics discussed than perhaps in any other room in the town if not the county. Always there, never interrupted by sickness, uniformly courteous, rarely impatient with the prolonged stay of callers, from nine o'clock A.M. when the mail had come and directors and neighbors collected to read the paper and chat about the news, till nine o'clock in the evening a constant succession of visitors were entertained by Mr. Brooks, till the great wonder was how he ever found time to do his work. In the winter a great open fire of walnut logs tempted many to toast their shins around his hearth, and the warmth of his smiling welcome equalled that of the fire. To all who came he listened patiently, and with a rare fund of humor answered

Brooks
3

with an apt story or a ready joke or a sound advice, that seldom failed to make them go away the better for the visit. Indeed if those walls could repeat what was said there, it would be a history of Concord, of Middlesex and Massachusetts, if not of the country and the world. Very regular in his habits and so uniform in his ways that the village clock might have been set by his movements, and it has been said that his neighbors used his passing their windows for a time-piece.

Mr. Brooks was interested in all matters of social improvement, especially that of temperance, and while avoiding fanaticism, by his moderation and good sense helped their progress. His fund of humor aided him in many a difficult situation with ultra zealots, and his ready wit and imperturbable good nature often soothed the troubled waters so that without eloquence he was a favorite speaker on all occasions, and as toast-master a great success of many important festivities.

Mr. Brooks married, in 1819, Caroline Downes, of Boston, who died March, 1820, leaving a daughter now the wife of the Hon. E. R. Hoar. In 1823 Mr. Brooks married Mary Merrick, daughter of Tilly Merrick a prominent merchant then living in Concord. Of this marriage Hon. George M. Brooks, judge of Probate for Middlesex County is the only surviving child, a younger brother having died in infancy.

In his pecuniary affairs Mr. Brooks was too unable to say no to applications for loans, and lost many hundreds of dollars by his willingness to help those who persisted in borrowing of him without repayment. He bore these losses, as he did the other troubles of life, with great equanimity and without worry or anger. His sunny temperament and his equable disposition, his good health and contented mind, enabled him to go through a long life with less anxiety and more comfort than falls to the lot of many men. His habit was to look on the bright side of everything and to take cheerful views of all subjects, but he had well-considered opinions and the strength of his convictions was not lessened by his courteous listening to opposing views. He had great charity for those who differed from him, kindness for all, and enmity to none. He was a firm believer in the Unitarian religion, a constant attendant on public worship and in his later years joined the church of the First Parish in Concord.

Mr. Brooks was of medium height and size, with dark eyes and hair, and a strongly-marked face. Not robust, he had uninterrupted good health and a strong constitution that carried him almost to the four-score limit of man's life with all his faculties in use. He never wore glasses, and always carried a cane, but invariably under his arm, not as a staff, and for many years bore a lighted lamp to and from his office with a skill to keep the flame burning that only a severe storm could overcome. His health failed very gradually at last, and he died December 11, 1863, after only a week's sickness, a loss to the community and his friends.

CALVIN C. DAMON.¹

Mr. Calvin Carver Damon was descended in the sixth generation from Deacon John Damon, one of the early settlers of Reading, Mass. John Damon was born in Reading, Berkshire County, Eng., in 1620. In 1633, being then a lad of some thirteen years, he came to America and found employment in Lynn, Mass., where he resided till about 1644, in which year the township of Reading, including what had been for several years known as Lynn Village, was set off from the town of Lynn. He fixed his residence on the hill, known in later times as Cowdrey's Hill, in Wakefield, formerly the South Parish of Reading, and the part of the town first settled. In the next year, 1645, he was registered as a freeman of Reading. In the early colonial history, those who wished to become "freemen" were required to be members of the Congregational Church, and to take a solemn oath of allegiance to the Commonwealth, binding themselves to maintain its laws. None but "freemen" were allowed to hold office, or to vote on public affairs. About the same time he married Abigail, daughter of Richard Sherman, a wealthy merchant and leading citizen of Boston. He was also at an early period chosen one of the deacons of the Church. And it is claimed that to his influence was due the fact that the new town took the name of his birth-place in England. These facts indicate that, in his early manhood he had developed qualities which secured for him an alliance with a leading family in the Colony, as well as a prominent position in the Church and in the town. Prior to the incorporation of the town a grant of one hundred and sixty acres of land had been made by the General Court to each person who was, or might become a resident, on condition that he should raise thirty bushels of Indian corn in two years. In the early colonial records, under the date of 1639, it is said that "John Damon, bringing good and satisfactory evidence to that effect, and being a man of substance, having much cattle, took his lot on Bear Brook, at the head of the great pond." This lot was within the present limits of Reading. Mr. Damon did not remove to it, but lived always at his original place of residence. It was occupied by Samuel Damon, his second son, who came to manhood. The fourth son of Samuel Damon, named for his grandfather, John, and who was a thriving, wealthy farmer, built there, in 1751, the Damon Mansion, one of the best dwelling-houses of the period in Middlesex County, and which still stands, after the lapse of nearly one hundred and forty years, and having been occupied by six generations of the family.

The grandson of the second John Damon, named above, was Benjamin, who was born in Reading, June 4, 1760. He served from 1776 till the close of the war as a soldier in the army of the Revolution,

¹ By Rev. W. R. Bagnall.

though he attained his majority only some four months before the virtual close of the conflict. He had enlisted when he was only some sixteen years old. He soon afterwards removed to Amherst, N. H., where he married Polly Hesea, the daughter of a sea-captain who had removed, in 1775, from Plymouth, Mass., to Amherst, N. H.

Speaking of his secluded home, without another house in sight or hearing, and approached in all directions through the woods, the historian of the Fiske family says: "There, in the fear of God and in keeping his commands, Deacon Damon, with his young wife, sat him down in peace and content, driving his saw-mill in the spring when water was abundant, working his farm in summer, and enjoying the fruits of his labor in the winter. There he lived and died in a good old age, an humble, honest man, rich in faith and good works, and unambitious of the world's gilded honors. There his children were born and reared, in all the loveliness of rural simplicity and Christian education. Nor was their training inefficient, since it is believed by those who knew them well that no one of Deacon Damon's family was ever guilty of a dishonest or dishonorable deed."

His third son was Calvin Carver, born in Amherst, New Hampshire, February 17, 1803. The son of a farmer, and spending his childhood and youth in what was then a sparsely-settled region, his early opportunities for education were very limited, but he was of an enterprising, ambitious spirit and disinclined to pursuits with which he had been familiar from early childhood. Accordingly he sought and obtained employment in a store in Concord, N. H., where, as clerk and salesman, he acquired experience in mercantile pursuits. He remained there till he had attained his majority. He then decided to go to the city of New York, and to seek employment there. He had, however, formed the acquaintance of John Marland, a young man of his own age, the son of Abraham Marland, one of the pioneer woolen manufacturers of New England. The latter was at this time increasing the facilities of his industry, and his son invited his friend Damon to go to Andover and accept a position in the counting-room of his father. He did so and remained there two years. He then engaged in trade, forming a co-partnership with Edwin Farnham, under the style of Farnham & Damon, doing the miscellaneous business of what was then known, everywhere in the rural districts of New England, as a country store.

He continued that business till about the close of 1831, and in December of that year went to the village of Saxonville, in the town of Framingham, Mass., on the invitation, again, of John Marland. Mr. Marland was then in charge of the mills there, known as the Saxon Mills. He had, shortly before this time, established a small factory for the manufacture of woolen goods at the outlet of Lake Cochituate, and at this time engaged the services of Mr. Damon as

its superintendent, his own time being occupied with the management of the Saxon Mills. Early in 1833 Mr. Damon entered into partnership with Mr. Marland, and soon bought Mr. Marland's interest, and continued the business alone till early in May, 1835, when the mill was destroyed by fire. In the month of December previous he had purchased the property at West Concord, and now removed to that place.

He had been aided in the purchase by his wife's uncle, James Johnson, the head of the old and wealthy commission house of Boston—Johnson, Sewall & Co.—who proposed to take the agency of his goods. During the years of his employment in the mills—first at Andover and then at Saxonville—he had become familiar with the manufacture of satinets, a fabric having a cotton warp and wool filling, then used largely in the manufacture of men's clothing, and made very generally by woolen manufacturers throughout New England. In deciding to engage in this specialty of manufacture he was guided by the advice of Mr. Johnson. He soon found that his business did not pay expenses. The goods, with his facilities for manufacture, cost too much for the price which they would bring, deducting commissions, and he was in competition with long-established and wealthy manufacturers, among whom were Welcome Farnum, Edward Harris, Abraham Marland and others. He determined on a change, at first partial, by devoting a portion of his machinery to the manufacture of white wool flannels. He soon found that it was neither convenient nor economical to carry on in so small a mill the manufacture of fabrics of two distinct classes. He therefore removed all the machinery adapted only to the manufacture of satinets and filled up the mill with flannel machinery. Mr. Johnson, who, when the mill was started by Mr. Damon, had suggested the manufacture of satinets as its business, and still believed that it might be made profitable, was much displeased, and at first was disposed to stop the business—as he might have done, with Mr. Damon's large indebtedness to him—but this, on the other hand, would involve him in loss. Finding that Mr. Damon was inflexible in his purpose, he offered him a considerable sum if he would induce some other merchant to take the account and to relieve him from all liability. Mr. Damon's reply was: "No; you have got me into this scrape, and you must get me out." At this time it occurred to Mr. Damon that a kind of cloth might be made with the flannel machinery which would be likely to have a considerable sale and to afford a more profitable employment for his mill than even all-wool flannels, the manufacture of which had been rapidly developed in the little more than twenty years since it had been first undertaken in this country by Nathaniel Stevens. So many mills had been devoted to this specialty, that the competition in it had become quite active.

The fabric, proposed to himself, by Mr. Damon, was to be woven in the same manner as ordinary flannel, but with a cotton warp and a wool filling. An additional consideration in favor of the experiment was the fact that Mr. Damon had on hand a considerable number of warps of cotton which had been prepared for making satinets. Proceeding with the experiment, Mr. Damon produced some cloth, a sample of which he carried to Boston and showed to Mr. Johnson. It is said that the merchant, on looking at it, exclaimed: "Dom it, that is good cloth; it will sell," and that this was the origin of the name which, slightly changed to *domet* or *domett* or *dommet*, as it has been variously spelled, was at once given to the fabric, and which it still retains, the name being found on the books of Mr. Damon as early as January, 1836. Whether or not this was the origin of the name, the remark was one which might naturally have fallen from the lips of the bluff, hearty, old merchant, pleased with the solution of a question which had caused him much anxiety, viz., the profitable employment of the mill in which he had a considerable pecuniary interest, as well as a good business for a kinsman for whose welfare he was concerned.

The merits of the fabric were apparent. It would shrink but little in washing, and, being both light and warm, was well adapted to be a substitute for the linsey-woolsey, originally of home manufacture, which had been long used for the undergarments of women and children. It was also of domestic manufacture and free from foreign competition. The *domett* flannels soon assumed the place which they have since maintained as a staple article of American manufacture.

The business, thus placed by Mr. Damon on a basis of permanent prosperity, was continued under his personal management till about the close of 1853, when he was subjected to an attack of pleurisy, which resulted in his death January 12, 1854.

RALPH WALDO EMERSON.¹

Ralph Waldo Emerson was the son of William Emerson, minister of the First Church in Boston, and Ruth Haskins his wife. He was born in Boston, May 20, 1803, the third child in a family of six sons and two daughters, both of whom, as well as the oldest son, died in infancy. His early education was carried on in the Boston schools, the Latin School among others; but he was, as a boy, an eager reader, and composition in prose and verse was the constant amusement of his youth. The death of his father when Emerson was but eight years old, although kind friends and the First Church Society came to the aid of the widow of their pastor, made it important that the boys during the whole period of their edu-

cation should work and help the family. Hence Emerson became a teacher before he entered college, and continued to teach during the college course and afterward until 1826.

He graduated at Harvard in 1821, and while teaching, and struggling with very bad health, prepared himself for the ministry and was approbated to preach by the Middlesex Association of Ministers in 1826. Sickness obliged him to journey by sea to Florida, and his health improving, he came slowly northward, preaching by the way as opportunity offered. On this trip he was brought into contact with slavery. In 1829 he became the associate pastor, with the Rev. Henry Ware, of the Second Church in Boston. The same year he married Ellen Louisa Tucker, of Concord, N. H. Mr. Ware's health failing, Mr. Emerson succeeded to the pastorate of that church. These were years of change and rapid growth in the mind of the young minister and it seemed to him that he and the flock committed to his charge were cramped by usage and tradition. The duty of stated prayer, a perfunctory act, was one from which he shrank, and the communion rite seemed to him foreign and not helpful to Americans of the nineteenth century. He hoped that his people would feel as he did, and welcome the liberating innovations for which he asked after three years' ministry. The church, however, was not ready for the changes which he proposed in the administering of the rite of the Lord's Supper, and they parted with regret and affection. His wife had died before this time and his own health had been sorely tried by his loss and his parting with his church, so on Christmas Day, 1832, he sailed for Europe for rest and refreshment. He remained abroad less than a year and this visit was chiefly memorable because it was the occasion of his visiting Landor, Wordsworth, and Carlyle, whose writings drew Emerson to seek and find him far among the Scottish moors.

On his return from Europe, restored in body and spirit, he was invited to become pastor of the Unitarian Church in New Bedford, but the society not accepting his condition that public prayer be not expected from him unless he felt moved to that act of devotion, he refused the invitation.

In the autumn of 1834 he went to Concord and wrote much of his first book, "Nature," staying with his kin at the Old Manse, which had been built by his grandfather, William Emerson, the patriot minister of the town in the Revolution. In 1835 he bought the house in Concord in which he lived through the remainder of his days, and in September was married to Lydia Jackson, of Plymouth.

The little farm which he acquired, where the Cambridge Turnpike leaves the great road to Boston, (three hours away by stage in those days) had the recommendation, for him, of convenience in reaching the city when he went to lecture or visit, and also of lying on the edge of the village near to Walden and

¹ By Edward W. Emerson.

its wide woodland ranges, which became a temple, visited almost daily, and there he waited for the thoughts, the oracles which he was sent into the world to report. Concord was thereafter his home; he loved and honored the ancestral town, and held it a privilege to bear his part of civic duties and neighborly relations, yet held closely to his task of writing, which involved a life mainly secluded during more than half the year; but, as all his essays were first read as discourses before literary societies, or lectures in the lyceums, he was, of necessity, brought into a contact, which he highly valued, with minds and work of all sorts of men and women. He considered the lyceum his wider pulpit, and, though he put off the gown of the preacher, held the larger office of teacher through life.

He was interested in all that tended to emancipate the bodies, the minds, the souls of his race. Hence, he early and constantly allied himself with the protectors of the Indian and the slave, and maintained that woman had only to ask for greater freedom before the law and wider opportunities, and these would be granted her. Although he had rebelled against forms which he had found hindrances in worship, he required religion and reverence in all true men, and had no sympathy with destructive methods. He watched and helped the spiritual and intellectual awakening and growth in his generation. He was one of the founders of the *Dial* magazine, and for a time its editor. Margaret Fuller, Alcott, Thoreau, Channing, Mrs. Ripley, Agassiz, Hawthorne, Lowell were among his friends and neighbors. Through life a strong friendship existed between him and Carlyle, whose works he had welcomed and edited in America when they were little known in England.

"Nature" was Emerson's first work, published in 1836, but later grouped with other addresses and lectures in a volume. The other prose works came in the following order: "Essays," 1841; "Essays" (second series), 1844; "Representative Men," 1850; "English Traits" (written after his visit to England in 1847-48, for the purpose of lecturing there), in 1856; "Conduct of Life," 1860; "Society and Solitude," 1870; "Letters and Social Aims," 1874; and after Mr. Emerson's death two other volumes were published by his friend and literary executor, Mr. James Elliot Cabot, entitled "Lectures and Biographical Sketches" and "Miscellanies."

The office of poet always seemed to Emerson the highest, and even in boyhood he had aspired to express himself in verse, but not until 1847 did he give to the world the volume of poems which he had been rehearsing to himself in the woods through many years. In 1867, "May Day" was published—the poetical fruits of riper years.

Emerson received the degree of Doctor of Laws from Harvard University, and was also chosen an overseer in 1867, and soon after was appointed a lecturer on philosophy there. The failure of his strength

at this time was increased by the exposures and exertions incident to a partial burning of his house in 1874. His many friends rebuilt his house and sent him abroad to restore his health meantime. On this trip he visited England, France, Italy, and made a journey up the Nile. He returned in better health, but, although he read a few lectures after his return, he ceased to write, and his public life was at an end. He passed the remainder of his days quietly and happily in Concord, where he died April 27, 1882.

REUBEN N. RICE.

Richard Rice was among the early settlers of Concord, and the name has existed here almost ever since. Nathaniel, a native of Sudbury, was probably a descendant of Richard, and was the father of the subject of this sketch. He was in business in Boston when Reuben Nathaniel was born there, May 30, 1814, and moved to Concord when the son was fifteen years of age. Here the father lived for several years, and in 1834 built a large four-story windmill on the summit of the New Burying-ground Hill, which was a sight if not a success. The son, who had been educated in the Boston schools of that day, became a clerk in the "Green Store," then kept by J. P. Hayward, who had married the sister of R. N. Rice, with whom the boy lived. He was a bright, handsome, clever youth, full of fun and active in both work and play. The post-office was then kept in the "Green Store," and as this brought many customers, the clerk soon became acquainted with every family in town, and was popular and liked by all who knew him. Here he saw and talked with all sorts of people, from the professional magnates of the village to the teamsters and loafers who came for their supplies of rum and molasses. To all he was accommodating, and interesting, and he soon became foremost in all that was going on in the town, either of pleasure or profit. Here was his real training and education for the success of his after life, and here he acquired the friends to whom he was ever dear and true.

At the death of Mr. Hayward, about ten years after his entering the store, Mr. Rice succeeded to the business, and though without capital, secured a silent partner in David Loring, who furnished the means to carry on the business. This was for a time successful, but in the end Mr. Loring became dissatisfied and withdrew, leaving Mr. Rice deeply involved in debt and out of employment, as the store was closed in 1843. R. N., as he was familiarly called, had married, July 1, 1840, Mary Harriet Hurd, the daughter of Col. Isaac Hurd, Jr., and granddaughter of Dr. Isaac Hurd, a leading physician for many years in Concord. Mrs. Rice had a pleasant manner, a happy temperament and a charming smile, that made their home an attractive resort for their numerous relatives and friends, and a centre for many pleasant gatherings. When the reverse of fortune came she bore

A. T. Moore

her share of the burden, and kept her husband's spirits from sinking into despair by her hopeful joviality.

The opening of the Fitchburg Railroad to Concord in June, 1844, gave Mr. Rice a position as station agent, and he very soon acquired the knowledge of the duties that made him a success in his new employment. His brother-in-law, Chas. Henry Hurd, had gone West to engage in railroading under John W. Brooks, then superintendent of the Rochester and Syracuse Railroad, in New York. After a year's trial of the station in Concord, Mr. Rice decided to join his brother-in-law, and, furnished with strong recommendations to Mr. Brooks, he left Concord in the spring of 1846. The change was the turn of the tide for him, readily securing from Mr. Brooks a situation in which he could show his ability and real worth, he was soon promoted to higher positions, till, on the completion of the Michigan Central Railroad, of which Mr. Brooks was superintendent, Mr. Rice and Mr. Hurd were assistant superintendents, the one of the passenger and the other of the freight traffic. Mr. Rice's headquarters were at Detroit, Michigan, and here he soon became as much at home as he had been in Concord, occupying a pleasant cottage on the best street of that city.

His acquaintance with all the Eastern men who had gathered in this growing place was, of course, intimate, and his good qualities were generally made known by his intercourse with the older residents. He took there the same interest in all that was going on, was as public-spirited and ready for work in every useful cause as he had been in Concord. His reverses had not embittered him, but had taught him charity and kindness, and he showed it in many benevolent ways. Many a New Englander going to or through Detroit enjoyed his hospitality and felt his grateful aid and assistance. To any one hailing from Concord there was no attention too great and no trouble too burdensome for him to undertake in their behalf.

These years of prosperity rolled on, the road increasing in its importance, his work for it improving in quality and quantity, until, when Mr. Brooks outgrew the limits of a single State and undertook the great Chicago, Burlington and Quincy Railroad, Mr. Rice became superintendent of the Michigan Central. In this capacity of chief manager he showed great tact, energy and ability. He had found his true vocation and the place for which he was fitted and he filled it with success. The Rebellion brought great labor and strain upon his road and his resources, but he was equal to the emergency and aided the Government in the transportation of troops and military stores efficiently.

He had frequent occasion to visit Washington on the business of the railroad, and he became well known to President Lincoln, Secretary Stanton, General Grant and other leaders in the nation's struggle.

He was intimate with Zach. Chandler, the Senator from Michigan, and was often relied on by the Senator for prompt and important services. Though not a politician, he had strong and patriotic convictions on public questions, and his loyalty to the nation and his friends was never questioned. He made few enemies, but nearly every one with whom he came in contact was impressed by his quick-witted, genial cleverness, and, if they saw him often, were sure to become his friends. An instance of this was the Prince of Wales, who, when traveling over the Michigan Central Railroad and its connections, was so much pleased with Mr. Rice's unfailing courtesies and accommodations, that, on parting, he presented Mr. Rice with a diamond pin forming the Prince's crest, which the receiver ever after wore with pride.

Another was that of Gen. Grant, who, when President Johnson was "awinging round the circle" at the West, was so annoyed by the calls for him to speak at the stations where the crowds met the President's party, that he accepted Mr. Rice's invitation to go to Detroit, and thus escaped a part of the circle. Gen. Grant never forgot this kindness and often spoke of Mr. Rice favorably afterwards.

In the opportunity he enjoyed for investments Mr. Rice had been fortunate, and in 1867, when he resigned the place on the railroad, he had become rich for his wants and for those of his family, consisting of his wife and an adopted daughter. He returned to Concord, and after a trip to Europe in 1867, and again in 1868, in which he went to Palestine and Egypt in the company of the Rev. Dr. Bellows, of New York, he took up his residence here in the town of his youth to pass the remainder of life in ease and comfort.

He had settled with all his old creditors and paid them in full. He purchased a fine estate on Main Street and built the best house in the village, taking great pride in perfecting every detail of its construction. He moved into it in January, 1872, and was happiest when he could welcome an old friend within its spacious rooms. In these many pleasant parties were held, notably the marriage of his daughter, Cora Belle Rice, to Richard Fay Barrett, of Concord, now secretary and treasurer of the Middlesex Mutual Fire Insurance Co. and colonel on the staffs of Governor Ames and Governor Brackett. The young couple made their home with Mr. Rice and cheered his declining years, especially after the death of Mrs. Rice in 1880, when Mrs. Barrett filled her place in the household.

Another instance was the centennial meeting of the Social Circle, which was held March, 1882, at Mr. Rice's house. He had been a member of this society before he left Concord, and was re-elected after his return here, in 1870. He took great pleasure in the meetings, and so much interest that the only instance of the presence of every one of the twenty-five members occurred at his house in 1880.

Though not a student Mr. Rice was a great reader

fond of books of travel and biography rather than works of fiction, except those of the great novelists. He possessed a fine library of hundreds of volumes of standard works, and he had read most of them. This taste for reading led him to accept the only town office he would consent to fill, that of chairman of the Library Committee when the "Free Public Library" was established in its new building, in front of his home. To this he gave great attention and much time and thought, and he continued to discharge its duties while he lived, and he left by his will a bequest of \$2000 to this library.

He took much interest in the historical matters connected with Concord, had a good memory of the traditions and events of its past annals, and gave the plan and paid the extra cost of rebuilding the bridge at the battle-ground in 1875, for a proper approach to the statue of the Minute-Man. He left also a bequest in his will of \$2000 to an Antiquarian Society, for the collection and preservation of relics of the past.

In his charities he was so considerate and thoughtful that many received his aid without others knowing from whom it came, but that it was large and generous to all deserving causes was well known by his intimate friends. His will provided for several who had been pensioners of his bounty while he lived, and also liberal bequests to the Silent Poor Fund, and to the Female Charitable Society.

In his religious views he was Unitarian, and both at Detroit and Concord a useful and active member of the societies of that denomination, ready and willing to help in their work. He gave in his life \$1000 towards the new Unitarian building in Boston, and at his death he devised his part of the estate adjoining the church of the First Parish in Concord to the Unitarian Society of the town.

In these pleasant lines he spent his last years, gratified by the birth of a grandson who was named for him, and the boy's paternal grandfather, "Richard" "Rice," and upon whom he lavished fondness and care without stint. After the death of his wife his own health failed, the asthma, which had troubled him for years, increased, and active exercise became impractical. But he was cheerful and hearty in his greeting of those who called while he was shut up, and enjoyed his games of whist, of which he was always very fond, even playing one on the top of the great pyramid of Egypt with his fellow-travelers. In the spring of 1885 he was confined to his house, and after a few weeks of illness he died June 25th, leaving a pleasant memory to all his friends and neighbors, and after a long, active and useful life.

His large estate, after providing for his dependent relatives and pensioners, and \$2000 for the protection and care of the shade-trees in Concord, and the other bequests named, became his daughter's and his grandson's.

Thus ended a truly fortunate life, for the only re-

verse he suffered served to make better and kindlier the many years that remained to him.

CHAPTER XLVII.

LINCOLN.

BY WILLIAM F. WHEELER.

Early History—Churches—Military History—French and Indian War—The Revolution—List of Soldiers—War of 1812—War of the Rebellion—Act of Incorporation—Town Officers, etc.

THE town of Lincoln was incorporated April 19, 1754.¹ It is bounded on the northwest by Concord, on the north by Bedford, on the east by Lexington and Waltham, south by Weston, and southwest by Wayland. Its greatest length is about five miles, from southwest to northeast, and greatest width three and one-half miles from east to west. The centre of the town is thirteen and one-half miles west-northwest from the State-House, and three and one-half miles southeast from the churches in Concord. The town contains upwards of 8000 acres of land. Sandy Pond, known in Colonial times as "Flint's Pond," a beautiful sheet of water, with an area of 200 acres, lies in the westerly part of the town, and if "water in the landscape is like the eye in the human countenance," no other town in the county has a fairer or clearer feature on its face. Beaver Pond, covering fifty acres, lies one mile south of Sandy Pond, with a high hill between them. Unlike Sandy Pond, its shores are muddy, and produce large quantities of white lilies. For more than a mile on its southwestern border the town is bounded by the peaceful waters of Concord River. Here the river expands into a pond or bay of upwards of seventy acres. The name of the bay, "Fairhaven," tersely describes it. On the Lincoln side of the bay Mr. William A. Burnham is building a costly mansion.

Hardly less attractive than its little lakelets are its lovely hills. They stand in the village and about the town "as the mountains are round about Jerusalem," and none, whether they come from the east or the west, the north or the south, can get into Lincoln without getting nearer to heaven. Brooks arise in and flow out of the town, but not a tubful of water comes into the town from any source save the rains and dews of heaven, and, whatever else may happen, its pure waters can never be polluted by the manufactories or sewage of other towns. From the hill near the centre of the town the prospect extends from the Bunker Hill monument to the New Hampshire hills, and from the Seminary buildings in Andover to the churches in Hopkinton, and a lovely panorama is spread around.

¹ This is the true date. April 23, 1754, is the date of the certification by the secretary.

The residence of Mr. George G. Tarbell and Mr. George Ropes, on the central hill, and that of Mr. Julian de Cordova, on a cliff overlooking the pond, have rural views of surpassing loveliness, and the historic mansion of Mr. Ogden Codman, in the southerly part of the town, built in the Colonial period, is surrounded by a princely domain.

Portions of the present town of Lincoln were at different periods of Colonial history parts of the towns of Watertown, Cambridge, Concord, Lexington and Weston. The grant of the General Court, April, 1635, to Watertown of a tract of land extending eight miles from Fresh Pond west-northwest into the country, and the grant to Concord of September 3d of the same year "of six myles square of land" overlapped each other about two miles, and included about one-half of the present town of Lincoln. This gave rise to a controversy between Concord and Watertown, and on the 8th of June, 1638, the General Court ordered, for the final end of all differences between Watertown and Concord, that Watertown eight miles shall extend on Cambridge line as far as Concord bounds give leave. This action gave the principal part of the territory in dispute to Concord.

The first meeting-house, built in 1747, occupied the site of the present meeting-house of the First Parish, while farther up and near the summit of the hill three years afterwards a house was built for Rev. Mr. Lawrence. Beautiful indeed for situation was the house of the Lord, and the residence of its first minister, "on the sides of the north." In the meeting-house all the people of the town gathered for worship on Sunday, and held its town-meetings and transacted its secular business for more than ninety years.

In the early days of the town the whole population usually attended the Sunday services. Well they might—they had nothing else to do—no books to read, nowhere else to go. The Colonial laws imposed equal penalties for labor and recreation on the Sabbath, and required all adult persons to attend meeting at least once in three months; and in one case the law was enforced, and a man was fined for non-attendance. He satisfied the offended majesty of the law by coming to meeting quarterly afterwards, usually coming in during the delivery of the sermon and sitting down and looking around, then marching out, not caring to step lightly or to shut the door gently after him. The ubiquitous tithingman, with his long crook, was always on hand, and woe to the urchin who was caught playing or napping!

Punctuality, too, marked the day, and people were usually in their pews before the minister entered the pulpit, and the services began with a cry from the town clerk, heralding the approaching weddings. Then the minister arose and announced that worship would commence with singing one of the Psalms of David, which he read from the version of Sternhold and Hopkins. Then the chorister set the tune, and

one of the deacons, standing in front of the pulpit, read the first line of the psalm, which was immediately sung; then another line was deaconed and sung.

After the singing came the long prayer, prefaced by the reading of notes,—i.e., the particular requests of persons for divine favor or consolation. Next came the sermon, the hour-glass,—that inexorable determiner of the length of sermons,—being set on the pulpit at the left hand of the speaker, not on the right, lest some erratic gesture should upset the simple chronometer on the deacon's head below. After the sermon a short prayer was made, and the benediction pronounced. Two services were generally held; the order of the afternoon services being the same as the morning, with the addition of a third psalm. No evening services were held, the house not being furnished with appliances for heating or lighting.

In 1763 the reading of the Scriptures was introduced as a part of the exercises of public worship. In 1768 a short prayer was made before this reading. In 1767 "Dr. Brady's and Mr. Tate's version of the Psalms of David, with some of the hymns of Dr. Watts which are now bound up with them," were substituted for the version of Sternhold and Hopkins. In 1795 a bass viol was allowed to be used on trial to assist the singers in divine service; after two more seasons it was allowed to be used until further order.

The old sexton of the church, who cultivated a few flowers beside his cottage, brought every year, in its season, a large red peony to meeting, which was conspicuously displayed from his seat in the gallery. Strange, that stern worshipers of "ye olden time," did not catch an inspiration from the crimson flower, and, instead of smiling at the simplicity of the old man, inaugurate the custom of bringing flowers to grace the house of the Lord—an offering so emblematic of innocence and purity, so sweetly in accordance with the teachings of the Master, so peculiarly appropriate to the worship of Him who hath robed the earth in beauty, and the heavens in glory, and caused the lilies of the field to grow and the rose of Sharon to bloom,—not to feed the perishing body, but to heal the wounded spirit, and soothe the sorrowing soul.

The first movement for the incorporation of the town was made in 1734. On the 7th of June of that year Joseph Brooks and others, inhabitants of the easterly part of Concord, northerly part of Weston and westerly part of Lexington, presented a petition to the General Court setting forth their difficulties and inconveniences by reason of their distances from the usual places of public worship in said towns, and praying to be erected into a separate township. This petition obtained no favor and was summarily dismissed.

The next year, 1735, John Flint and others, inhabitants of the same locality, again petitioned for a separate town. Upon this petition a viewing committee

was appointed to view the place proposed for a new townshp, to hear the parties in relation thereto, and make report to the Court what they judge proper to be done on this petition. After various delays the committee reported that "They have carefully performed the service and are of the opinion that the prayer of the petition be not granted," which report was accepted.

The next movement was for the incorporation of a precinct. On the 18th of August, 1744, Joshua Brooka and others, inhabitants of the same locality, petitioned to be incorporated as a precinct. This petition was favorably received, and a committee appointed to view the location, hear the parties and report what action should be taken thereon. This committee reported April 24, 1746, that the petition ought to be granted, which report was accepted, and it was "Ordered, the petitioners, together with the persons living within the bounds mentioned in the petition (except such persons and estates as are excepted by the report) be and are hereby erected into a distinct and separate precinct, and vested with all such powers and privileges as other precincts within this province have, or by law ought to enjoy, and that such of the aforesaid exempted persons as shall within one year signify to the secretary, under their hands, their willingness to join with the petitioners, be, together with their, estates incorporated with them, to do and receive alike duty and privilege as the petitioners." It was also "Ordered that Benjamin Brown, one of the principal inhabitants of the parish, this day set off from Concord, Lexington and Weston, be and hereby is enabled to call the first precinct meeting in said parish, to choose parish officers, and to act and do all other things according to law." The first precinct meeting was held at the house of Mr. Edward Flint, May 26, 1746, and the following officers were chosen: Benjamin Brown, moderator; Ephraim Flint, precinct clerk; Chambers Russell, Esq., Benjamin Brown, Josiah Parks, John Headley and John Hoar, precinct committee; Samuel Dakin and Jonathan Wellington, collectors; Stephen Wesson, treasurer; Ebenezer Cutler, Daniel Adama and Ephraim Flint, assessors.

Before the incorporation of the precinct, meetings had been held and children baptized at the house of Mr. Edward Flint. Measures had also been taken to build a meeting-house. This house, built and partly finished, was presented to the precinct, June 22, 1747, by Benjamin Brown, Edward Flint, Judah Clark, Joshua Brooks, Joseph Brooks, Samuel Bond, Jonathan Gove, Benjamin Monroe, John Headley, Samuel Dakin, Ebenezer Cutler, Jeremiah Clark, Amos Meriam, John Gove, Jonathan Wellington, Ephraim Flint, Thomas Wheeler, Joseph Pierce, Nathan Brown, Jonas Pierce, Timothy Wesson, George Peirce, builders.

On the 10th of August, 1747, twenty-five members of the churches in Concord, Weston and Lexington, having obtained leave of the churches in said towns,

met and mutually agreed to form themselves into a separate and distinct church. These were: From the church in Concord, Joshua Brooks, Nathan Brown, Edward Flint, Ephraim Flint, Josiah Parks, Stephen Wesson, Timothy Wesson, Thomas Wheeler; from the church in Weston, Samuel Bond, Joseph Brooks, Benjamin Brown, Benjamin Brown, Jr., Joseph Brown, Thomas Garfield, Thomas Garfield, Jr., Jonathan Gove, John Gove, John Headley, Woodis Lee, Benjamin Munroe, George Pierce, Jonas Pierce, Joseph Pierce; from the church in Lexington, Judah Clark. The organization of the church took place two days afterwards—Rev. John Hancock, of Lexington; Rev. William Williams, of Weston; Rev. Warham Williams, of Waltham, and Rev. Israel Loring, of Sudbury, participating in the public services of the occasion.

On the 18th of May, 1748, the church and precinct united in extending a call to Rev. William Lawrence to settle in the ministry. The invitation was accompanied by an offer of £800 as a settlement, an annual salary of £400, and thirty cords of wood. Subsequently a committee was appointed to treat with Mr. Lawrence in reference to his settlement, and it was mutually agreed that his salary should be regulated by these prices of the following articles, viz.: Indian corn, 15s. per bushel; rye, 20s. per bushel; pork, 1s. 8d. per pound, and beef, 1s. per pound; it was also agreed to give him ten cords of wood annually, in addition to the £400. Mr. Lawrence's ordination took place Dec. 7, 1748, the ordaining council consisting of the elders and messengers of the churches in Lexington and Weston, two churches in Cambridge, the first church in Groton, and the churches in Waltham and Littleton. Rev. Caleb Trowbridge, of Groton, preached the ordination sermon. "During his ministry his church, unlike many in the neighborhood, enjoyed great peace."

His funeral expenses, amounting to £366 currency, and £300 to purchase mourning for the family, were paid by the town. The town also placed a monument over his grave, bearing the following very modest and truthful inscription:

"In memory of Rev. William Lawrence, A.M., Pastor of the Church of Christ in Lincoln, who died April 11, 1780, in the 57th year of his age and 32^d of his ministry. He was a gentleman of good abilities, both natural and acquired, a judicious divine, a faithful minister and firm supporter of the order of the churches. In his last sickness, which was long and distressing, he exhibited a temper characteristic of the minister and Christian. 'Be thou faithful unto death and I will give thee a crown of life.'"

Rev. William Lawrence, son of Colonel William and Susanna (Prescott) Lawrence, was born in Groton May 7, 1723, and graduated at Harvard 1743, and married, February 7, 1750-51, Love Adams, daughter of John and Love (Minott) Adams. They had a family of three sons and six daughters. Mrs. Lawrence survived her husband nearly forty years, dying January 3, 1820; outliving all her children except her daughters Susanna and Sarah.

Mr. Lawrence's successor in the ministry was Rev. Charles Stearns, D.D. He was first employed to preach here in October, 1780. On the 15th of January following the church voted unanimously to invite him to become their pastor. On the 5th of February the town concurred in this vote, and voted to give him £220 hard money or its equivalent (to which £70 was subsequently added) as a settlement, and an annual salary of £80, and fifteen cords of wood. His ordination took place November 7, 1781, the council being composed of the ministers and delegates of the churches of Concord, Waltham, Weston, Reading, Leominster, Lunenburg, Sudbury, East Sudbury and Stow—Rev. Mr. Adams, of Lunenburg, preaching the sermon. Dr. Stearns continued in the ministry, counting from the time he was first employed as a candidate, upwards of forty-five years. He was at his post of duty the first Sabbath of July, 1826. During the following week he was stricken with disease which resulted in death.

The town buried him beside his children, who had gone before, and marked the spot with a marble tablet bearing the following inscription, prepared by Rev. Dr. Ripley, of Concord :

"Erected by the inhabitants of this town to the memory of Rev. Charles Stearns, D.D., who died July 26, 1826, in the seventy-fourth year of his age and forty-fifth year of his ministry

"He was distinguished for his high attainments in various branches of science; for strength and soundness of mind; for method and accuracy in reasoning and facility in communicating knowledge. By his piety, benevolence, and learning, he gained the affection and respect of his beloved people, the esteem and confidence of his numerous friends, and the well deserved honors of literary societies. His life was full of practical goodness, the genuine fruit of deep felt piety, and his death of religious hope and peace. By the habitual exercise of faith, humility, patience and charity, he exhibited Christianity in a strong and prominent light, and is gone it is believed, to enjoy the rewards of a good and faithful servant of Jesus Christ."

Senator Hoar in his admirable address at the dedication of the Lincoln Library, after speaking of the moulding influences which the ministers of former times exerted upon the characters of their congregations, pays a glowing tribute to the memory of Dr. Stearns :

"The memory of such a clergyman as I have described is still fresh in the traditions of Lincoln. Dr. Charles Stearns, a man trained in the best learning of his time, with his salary of eighty pounds and fifteen cords of wood a year, devoted for forty-five years abilities fit to adorn the highest stations in church or state to the service of this town. To him is due much of the high character which for a century it has maintained. I have often heard my father, who was his pupil, speak of him with reverence."

During the later years of Dr. Stearns' ministry dissensions arose in many of the churches of New England upon the subject of pulpit exchanges between ministers holding different views upon matters of faith and doctrine—but Dr. Stearns steadily refused to take any part in the controversy and continued to make exchanges with all the neighboring ministers until his death. His sermon before the convention of Congregational ministers in 1815 is an earnest plea for union and harmony.

After the death of Dr. Stearns the flames of sectarian strife broke forth, and the work of division and disintegration has steadily gone on to the present time, and although the population of the town has not more than half doubled since its incorporation, Lincoln worshippers now gather weekly in seven congregations, and the percentage of non-church-goers is probably larger than ever before.

Rev. Charles Stearns, son of Thomas and Lydia (Mansfield) Stearns, was born in Lunenburg, July 19, 1753; graduated Harvard University 1773; Mr. Tutor 1780-81; D.D. 1810; married January 3, 1782, Susanna, daughter of Jonathan and Rachel (Green) Cowdry, of Reading. They had six sons and five daughters.

Dr. Stearns' successor in the ministry was Rev. Elijah Demond, born in Rutland, March 1, 1790; Dartmouth College, 1816, and the Theological Seminary in Andover, 1821, and ordained at West Newbury, March 7, 1821, and was installed at Lincoln, November 7, 1827. After a ministry of nearly five years he was dismissed at his own request, and was installed at Holliston, 1833, and Princeton in 1836.

Mr. Demond was a gentleman of good abilities, of dignified and courteous manners, and great firmness and decision of character—as thoroughly furnished unto knightly service in the church militant as in the church triumphant. His call was not without opposition, and he was installed in a violent snow-storm—emblematic, if not prophetic, of his ministry.

During his ministry the First Parish was organized, and ecclesiastical affairs ceased to be managed by the town.

Mr. Demond married, March 29, 1821, Lucy, daughter of Aaron Brown, Esq., of Groton, and died in Westboro', July 20, 1877.

Mr. Demond was succeeded by Rev. Ebenezer Newhall. He was born in New Ipswich, N. H., August 5, 1789; graduated at Harvard in 1818, and at the Andover Theological Seminary in 1820, and was ordained at Oxford, December, 1823, and installed at Lincoln, January 16, 1833, and was dismissed, April 22, 1847, to accept a call at Willsboro', N. Y., and was subsequently pastor of the churches in Chesterfield, N. H., and Litchfield, N. H. He was a man of very methodical habits, of discreet life and conversation, and diligent and faithful in all things pertaining to pastoral duties.

He married, Sept. 16, 1824, Miss Sarah Burr Clark, daughter of Stodard Adams Clark, of New York, and died in Cambridge, August 15, 1878.

Rev. William C. Jackson, the fifth pastor of the church, was born in Madison, N. H., February 17, 1808, and graduated, D. C., 1831, and was ordained a missionary at Lancaster, N. H., October 14, 1835, and soon afterwards sailed, under appointment of the A. B. C. F. M., for Turkey, where he successfully labored for about ten years, returning to this country in December, 1845.

He was installed at Lincoln, April 15, 1848, having

supplied the pulpit from July, 1847. He remained pastor of the church until October 13, 1858. His next field of labor was at Dunstable, where he remained about nine years, and was subsequently, for eleven years, pastor of the church in Brentwood, N. H., where he still resides.

"Mr. Jackson, in all his ministerial labor, has been recognized as an able, judicious, and devout minister of the gospel. His work was, for many years, prosecuted under peculiar difficulties, owing to ill-health in his family; yet in addition to his pastoral work while in Lincoln, he wrote for many months regularly for the *Congregationalist*."

Mr. Jackson married, September 9, 1835, Miss Mary A. Sawyer, of Westminster. One of his sons, Edward Payson Jackson, born Erzerom, Turkey, March 15, 1840, was for a time a member of the class of 1863 in Amherst College. He enlisted in the fall of 1862 in the Forty-fifth Regiment of Massachusetts Volunteers, and in 1864 was commissioned second lieutenant in the Fifth Regiment. He subsequently received the degree A.M. from Amherst College. After the war he engaged in teaching, and for the last ten or twelve years has been engaged as master in the Boston Latin School. He has also been engaged in literary work, and is successful as an author.

Another son of Rev. Mr. Jackson, George W., born in Lincoln, November 10, 1853, has been for several years a clerk in Hollis' apothecary store in Boston.

Rev. Henry J. Richardson, the present pastor of the Congregational Church, was born in Middleton, June 23, 1829; graduated at Amherst College in 1855, and at the Theological Seminary in Andover in 1860, and was ordained in Lincoln, September 6, 1860, the present church edifice being dedicated at the same time. He is now in the thirtieth year of his ministry, and the oldest clergyman, in point of service, in the association to which he belongs.

He married, June 26, 1864, Mrs. Harriet Amelia (Colburn) French, of St. Paul, Minn., a daughter of Deacon William Colburn, of Lincoln.

In 1798 a Methodist Episcopal Society was formed in Weston, and a small house for worship was built in the northerly part of that town, near the Lincoln line, some Lincoln families joining in the movement. The society grew and prospered, and in 1828 a new church edifice was built on the North road, as it is called in Weston, or South county road, as it is called in Lincoln. From 1830 to 1850 a large percentage of those worshipping there were from Lincoln. Since 1850 the number of Lincoln families belonging to the society has materially decreased.

In 1841 a Unitarian Society was formed in Lincoln, and a house of worship built and dedicated November 2, 1842. The following persons have been its ministers or preachers: Rev. Samuel Ripley, five years; Rev. Seth Alden, five years; Rev. Chas. C. Sewall, seven years; Rev. Edward F. Stone, one year; Rev. Washington Gilbert, four years; Rev. James C. Parsons,

five years; Rev. Joseph H. Allen, five years; Rev. Francis B. Hornbroke, three years; Rev. Henry Westcott, one year; Rev. Edward J. Young, eight years. Since 1877 the services have been held in the afternoon, and discontinued during the winter months.

In 1873 a church was built by the Episcopalians, but the legal organization of the society appears not to have taken place until April 6, 1874, when a meeting was held under a warrant issued by Frank W. Bigelow, Esq., of Weston, to Mr. Howard Snelling, directing him "To notify the qualified voters of the Episcopal Society worshipping in Lincoln to meet at the church for the choice of officers and parish organization." At this meeting Ogden Codman, Esq., was chosen moderator, and F. W. Bigelow, Esq., clerk. A constitution and code of by-laws was adopted, and a name—St. Anne's—selected for the church. Messrs. Howard Snelling and George G. Cheney were chosen wardens. Ogden Codman, James Farrar, John Tasker, Albert Griffiths, James E. Baker, Charles E. Smith and George H. Smith, vestrymen, and Howard Snelling, treasurer and collector.

The church was consecrated by Bishop Paddock, June 3, 1874. Rev. William M. Groton was rector from July, 1876, to November, 1878. Rev. Dr. P. H. Steinstra was for several years minister in charge. Rev. James S. Bush, D.D., and others, have also officiated as minister in charge.

In 1882 the society received the gift of a bell from Mr. John H. Hubbell, and a tower was erected wherein to place it.

After detailing the incidents attending the incorporation and organization of the town, Mr. Shattuck goes on to say, "The proceedings of the town were conducted with great harmony, and no occurrence worthy of notice marks its history until the great question of opposition to England was agitated." Within a year after its incorporation the town was engaged in active preparations for war. The year 1755 is memorable for the defeat and death of General Braddock, the battles of Lake George, the devastation of Acadia, and the deportation of its inhabitants, and the great earthquake. In this year Massachusetts alone raised an army of nearly seven thousand nine hundred men "For the defence of His Majesty's dominions in North America," being nearly one-fifth part of the able-bodied men of the Province. To this force Lincoln contributed fifteen or sixteen men, being the town's full proportion.

The central expedition was designed for the capture of the forts at Ticonderoga and Crown Point, and incidentally to prevent the French sending any reinforcements to Forts Duquesne and Niagara. Capt. William Pierce, of Stow, commanded a company in Col. Ephraim Williams' regiment, and Judah Clark, who had removed from that part of Lexington which became a part of Lincoln at its incorporation, was his lieutenant, and Robert Munroe, said in the muster-roll to be of Lincoln, was the ensign. In this

company were also Robert Wilson, sergeant, Simon Pierce, corporal; Jonathan Barnard, Patrick Disney and Nathan Willington were privates. Elisha Cutler, Silas Fay and Gershom Flagg were in Captain Samuel Dakin's company; Jonas Cutler, of Lincoln, was clerk of Captain Timothy Houghton's company; Robert Angier, Cornelius Melony, Jonas Jones, Charles Lee and Nathaniel Stearns were in the eastern expedition; Joseph Blanchard was also in the service. All the above, except Jonas Cutler, had their poll-taxes in the country rate for the year 1755 abated, "they being in His Majesty's service."

Of the soldiers of Captain Pierce's company, Simon Pierce and Jonathan Barnard were killed in battle at Lake George, September 8, 1755. Joseph Bulkley, of Littleton and Robin Raymond, of Lexington, were killed in the same battle, and Lieutenant Clark was severely wounded.

The eastern expedition was designed for the conquest of Acadia. The provincial troops had for their commander Lieutenant-Colonel John Winslow, who was a major-general in the militia of the Province, and Lieutenant-Colonel Monckton commanded the regulars or British troops, and as the British officers outranked the provincial, Monckton was in command of the expedition.

The expedition left Boston on the 22d of May, and reached Chignecto on the 2d of June. The reduction of Forts Beau-Sejour and Gaspereaux took but fifteen days, and cost the English but twenty men killed and as many more wounded, and the Acadians were at the mercy of the English. No one can read the story of the devastation of that beautiful country without recalling the declaration of the wise man: "The tender mercies of the wicked are cruel." The French had landed on the shores of Cape Breton and effected settlements there before the arrival of the Pilgrims at Plymouth. By the treaty of Utrecht in 1713, Nova Scotia and Newfoundland had been ceded to England, and in 1730 the French inhabitants of the Province, who composed more than nine-tenths of the population, had taken an oath of fidelity and submission to England, and had been promised indulgence in the exercise of their religion and exemption from bearing arms against the French or Indians. Hence they were known as "French Neutrals."

From 1730 to 1755 they had increased and prospered. They were at peace among themselves, and were not the enemies or a menace to any people or nation. But the English ministry had resolved upon their destruction. Upon flimsy pretexts and false accusations, without any regard to law or equity, justice or humanity, they were hunted from their homes and driven at the point of the bayonet on board crowded transports and cast abandoned on the shores of the Colonies from New Hampshire to Georgia, the object being to scatter them as far or as wide apart as possible. Of these, one thousand were landed on the shores of Massachusetts, and an equal

or greater number in South Carolina. In this crime of the centuries a Massachusetts general led, and some Lincoln men assisted. Of those landed in Boston, Joseph Hibert, aged twenty-nine years, Nanny, his wife, aged twenty-four years, Mary and Modlin, their children, were quartered on the town of Lincoln and supported at the expense of the Province. From the official documents we learn that "This family is of a healthy constitution. Joseph can do some kinds of work, can reap, chop wood, &c. Nanny can sew, spin, weave, and do housework." The town paid for building an oven in the Southwest School-house, for a coffin and for digging a grave for the French family.

History shudders over the cruel fate of the Acadians. The lament of the Jews, "who wept by the rivers of Babylon," which has come down through the centuries, is not sadder than the Lay of Longfellow. The number of the Jews in the Babylonish captivity was not so great or their captivity more hopeless than that of the Acadians. The horrors of the Libby and Andersonville Prisons were lesser afflictions compared with those of the French exiles. Hoary men and aged women, separated from their children, mothers and maidens, innocent children and little babes, were not the victims of rebel barbarity. The children of Bethlehem and its lovely coasts, which the soldiers of Herod went forth and slew, were not subjected to hunger and cold and lingering deaths. "I know not if the annals of the human race keep the records of sorrows so wantonly inflicted, so bitter and so perennial as fell upon the French inhabitants of Acadia."¹

Although war had raged on the Canadian frontier for more than two years, no formal declaration of war between England and France was made until May 17, 1756,—the forces before that time being raised "For the defence of His Majesty's dominions in North America" and after that date, for "The Reduction of Canada," and Lincoln contributed men for that purpose every year from 1756 to 1763. In 1757 a new impulse was given to the zeal of the Colonies, and Massachusetts alone raised an army of nearly ten thousand men, of which Lincoln contributed seventeen, viz.: W. Bond, sergeant, and J. Adams, J. Billings, A. Darby, Saml. Farrar, Jonas Whitaker and Joseph Wiukley, privates in Capt. Thomas Adams' company; John Thorning, Samuel Whitaker and Israel Underwood, in Capt. William Angier's company; William Hartwell, Francis Arpin, Isaac Billings, Joshua Pierce, Eliakim Robinson and Jonathan Wellington, in Capt. Salmon Whitney's company; and David Hagar and Ephraim Parks, in Capt. Henry Spring's company.

The events which led to the Revolutionary War belong to the history of the whole country. The part performed by the people of the town collectively in its municipal capacity, and by its men individually,

¹ Bancroft's "History of U. S.," Vol. V. p. 206.

is what we have to record, and is highly creditable to its citizens.

March 15, 1770, the town "Voted, That we will not purchase any one article of any person that imports goods contrary to the agreement of the merchants of Boston." And in answer to a circular dated February 8, 1773, they say, "We will not be wanting in our assistance according to our ability, in the prosecuting of all such lawful and constitutional measures as shall be thought proper for the continuance of all our rights, privileges and liberties, both civil and religious; being of opinion that a steady, united, persevering conduct in a constitutional way, is the best means, under God, for obtaining the redress of all our grievances."

November 2, 1773, Dea. Samuel Farrar, Capt. Eleazar Brooks and Capt. Abijah Pierce were chosen a Committee of Correspondence. The first letter emanating from this committee is dated December 20, 1773, and was in answer to a letter from the Committee of Correspondence of Boston. It is as follows:

"GENTLEMEN:—We have read your letter enclosing the proceedings of the town of Boston at their late meeting; as also another letter enclosing the proceedings of a collective body of people, not only of Boston, but of the adjacent towns; in which, after some very pertinent observations on the alarming situation of our public affairs, you desire our advice and to be acquainted with the sense of this town respecting the present gloomy situation of our public affairs. We rejoice at every appearance of public virtue, and resolution in the cause of liberty, inasmuch as upon our own virtue and resolution, under Divine Providence, depends the preservation of all our rights and privileges.

"We apprehend that we in America have rights, privileges and property of our own as well as the rest of mankind, and that we have the right of self-preservation as well as all other beings. And we are constrained to say that after the most careful and mature deliberation, according to our capacities, weighing the arguments on both sides, we apprehend our rights and privileges have been infringed in many glaring instances, which we mean not to enumerate, among which the late ministerial plan, mentioned in your letter, is not the least.

"The act imposing a duty on tea is alarming, because in procuring the same our enemies are dealing by us like the great enemy of mankind, viz., endeavouring to enslave us by those things to which we are not necessitated but by our own contracted evil habits; although if tea were properly used it might be of some advantage. When we speak of our enemies, as above, we mean those persons on either side of the water, who, by many ways, either secret or open, are sowing the seeds of strife and discord between Britain and her colonies; or are in any way the active instruments of our distress.

"Now, since it must be granted that our rights and privileges are infringed, and that we have the right of self-defence, the important question is by what means to make such defence. Doubtless, in all cases the means of defence ought to quadrate with the nature of the attack; and since the present plan seems to be to enslave us, we need only (had we virtue enough for that) to shun the bait, as we would shun the most deadly poison. Notwithstanding considering so many are so habituated to the use of tea, as perhaps inadvertently to ruin themselves and their country thereby; and others so abandoned to vice, expecting to share in the profits arising from the ruin of their country, as to use all means in their power to encourage the use of tea; we cannot, therefore, but commend the spirited behaviour of the town of Boston in endeavouring to prevent the sale of the East India Company's tea, by endeavouring to persuade the consignees to resign their office, or any other lawful means, and we judge the consignees, by refusing to comply with the just desire of their fellow citizens have betrayed a greater regard to their private interest than the public good and safety of their country, and ought to be treated accordingly.

"The situation of our public affairs growing more alarming and having heretofore tried the force of petitions and remonstrances and finding no redress, we, the inhabitants of this town, have now come into a full

determination and settled resolution not to purchase nor use any tea, nor suffer it to be purchased or used in our families, so long as there is a duty laid on such tea by an Act of the British Parliament. And will hold and esteem such as do use such tea enemies to their country; and will treat them with the greatest neglect. And we beg leave to recommend it to the several towns within this province, who have not done it, to go and do likewise.

"How easy the means! How sure the event! But he the event what it may, suppose this method should not obtain a repeal of the Act which we judge to be unrighteous, but the event should be a total disuse of that destructive article, we might then (if we may so express ourselves) bless God that he ever permitted that act to pass the British Parliament.

"We trust we have courage and resolution sufficient to encounter all the horrors of war in defence of those rights and privileges, civil and religious, which we esteem more valuable than our lives. And we do hereby assure, not only the town of Boston, but the world, that whenever we shall have a clear call from Heaven, we are ready to join with our brethren to face the formidable force, rather than tamely to surrender up our rights and privileges into the hands of any of our own species, not distinguished from ourselves except it be in a disposition to enslave us. At the same time we have the highest esteem for all lawful authority, and rejoice in our connexion with Great Britain so long as we can enjoy our charter rights and privileges."

At the annual town-meeting, March 6, 1775, it was *Voted*, That £52 4s. be granted to provide for those persons who have enlisted as minute-men, each one a bayonet, belt, cartridge-box, steel rammer, gunstock and knapsack, and that they attend military exercises four hours in a day, twice a week, till the 1st of May next. In case any one refuses to attend, 2s. for each four hours, and in proportion for a less time, shall be deducted from their wages.

These votes show that the men had already enlisted as minute-men, and that many of them were destitute of proper accoutrements, and the payments from the treasury of the town show that sums varying from 3s. 10d. to 18s. were paid to forty-five men for furnishing themselves with equipments, and £12 14s. 10d. paid the committee to provide equipments for the soldiers, the whole amount paid being £48 5s. 5d. At what time the minute-men of Lincoln were enlisted or their officers chosen, cannot be ascertained. Mr. Shattuck says, "There was at this time in this vicinity, under rather imperfect organization, a regiment of militia and a regiment of minute-men. The officers of the militia were: James Barrett, col.; Ezekiel How, of Sudbury, lt.-col.; Samuel Farrar was captain, and Samuel Hoar was lieutenant of the Lincoln company. The officers of the minute-men were: Abijah Peirce, of Lincoln, colonel; Thomas Nixon, of Framingham, lieutenant-colonel; John Buttrick, of Concord, major." William Smith was the captain of the minute-men of Lincoln, and Samuel Farrar and Samuel Hoar were lieutenants. The officers of the minute-men had no commissions and derived their authority from the suffrages of their companies.

Such was the condition of things in the spring of 1775. The Provincial Congress had collected a quantity of military stores at Concord, and an attempt to seize them was not unexpected, and measures had been taken to give a general alarm in case an expedition should be sent out for that purpose.

The main road from Charlestown, through Lexington, to Concord and Groton, passes through the north-

erly part of Lincoln, the distance from Lexington line to the point where the road becomes the dividing line between Lincoln and Concord being about two miles. In the northeasterly part of Lincoln, within a few rods of Lexington line, dwelt Mr. Josiah Nelson. He was an ardent patriot, and the men of Bedford had arranged with him to give them warning in case an expedition should be sent out. Awakened in the night by the noise of horsemen riding along the road, he rushed out half-dressed to ascertain the cause of the riding, and on asking what it meant he was struck with a sword, gashing his head, and told he was a prisoner. At the same moment he was surrounded by several men, some of whom were British scouts, and the others, evidently Tories, acting as guides. After detaining him awhile the scouts left him in charge of the Tories, who soon released him, telling him to go into his house, and threatening, if he gave any alarm or showed any light, to burn his house over his head. Nevertheless, after dressing himself and his wound, he started to give the alarm at Bedford. He had not two miles to go to reach some of the Bedford patriots. About the same time and near the same place Paul Revere was captured on his midnight ride—immortalized in song.

On the same road, about midway between the boundaries of Lexington and Concord, lived Capt. William Smith. He must have received very early the intelligence that the British troops were in motion. Mounting his horse, he assisted in alarming his company, and then rode to Concord. He, with a part of his men, reached Concord about seven o'clock in the morning. Being directed by a field officer to parade his men on the hill, he left his horse at the tavern and obeyed the order. When the British troops left Concord his horse was taken to carry off one of their wounded, and he lost his horse and his equipments. When the British troops approached the town the provincials retreated over the North Bridge. When Major Buttrick sent a request to Capt. Brown to dislodge the British troops who were guarding the bridge, Capt. Smith offered to lead with his company in the attack.¹

The British soldiers passed up the road between the hours of six and seven in the morning. The retreating column re-entered the town soon after noon. From the foot of Hardy's Hill, the first considerable

ascent on the returning march, to the foot of the next hill the road is the dividing line between Concord and Lincoln. At the southwest corner of the tan-yard the line of the town leaves the road and turns northward. Eastward from the tan-yard the road ascends a steep acclivity and bends northward also. To reduce the grade of the hill and get material for the repairs of the road an excavation had been made in the brow of the hill. Through this excavation the road passed, and on the easterly side of the road was a dense forest which afforded a covert for the provincials, while the curves of the road exposed the British to a raking fire from front and rear. It was here that the retreat first became a rout—here that the trained warriors of England's haughty King first paled in wild dismay and then fled in dire confusion before an impromptu army of enraged and embattled farmers.

The hardest fighting of the day was done in Lincoln.² Within a short half-mile from the excavation at the brow of the hill eight British soldiers were killed. Capt. Jonathan Wilson, of Bedford, Daniel Thompson, of Woburn, and Nathaniel Wyman, of Billerica, were slain here. Two more British soldiers were killed before the fugitives re-crossed the dividing line between Lincoln and Lexington.

The bodies of five of the British soldiers were gathered up and buried in the old burying-ground in Lincoln, three more were buried by the side of the road and two in a field near Lexington line.

Mr. Shattuck says: "About the same time (*i. e.* that Capt. Brown paraded his company on the Common) a part of the minute company from Lincoln, who had been alarmed by Dr. Prescott, came into town and paraded in like manner. The number of armed men who had now assembled was about one hundred. The morning had advanced to about seven o'clock, and the British army were soon seen approaching the town on the Lexington Road. The sun shone with peculiar splendor. The glittering arms of eight hundred soldiers, the flower of the British army, were in full view. It was a novel, imposing, alarming sight. What was to be done? At first it was thought best they should face the enemy, as few as they were, and abide the consequences. Of this opinion was the Rev. William Emerson, the clergyman of the town, who had turned out amongst the first in the morning to animate and encourage his people by his counsel and patriotic example. 'Let us stand our ground,' said he, 'if we die, let us die here!' Eleazer Brooks, of Lincoln, was then on the hill. 'Let us go and meet them,' said one to him. 'No,' he answered, 'it will not do for us to begin the war.' They did not then know what had happened at Lexington."

And Eleazer Brooks was *right*. It would not have been well or wise for the Provincials to begin the war; better, far better, to wait until the British soldiers

¹ "Lincoln, November, 1676.—This may certify that Captain William Smith, of Lincoln, in the county of Middlesex, appeared on Concord parade early in the morning of the 19th of April, 1775, with his company of minute men; was ordered to leave his horse, by a field officer, and take his post on an adjacent hill—the British troops possessing the North Bridge. He voluntarily offered, with his company, to endeavor to dislodge them, leaving his horse at the tavern; by which means on their retreat the horse, &c., were carried off with one of their wounded men.

"JOHN BUTTRICK, Major."

See also petition and account of William Smith, "Massachusetts Archives," vol. 182, pp. 299-300. Hudson's "History of Lexington," p. 189.

² Drake's "History of Middlesex County," vol. 1, p. 125. Hudson's "History of Lexington," p. 195.

had fully manifested their purpose to kill and plunder, burn and destroy. The colonists stood better in their own estimation and in the eyes of their countrymen, and stand better in the light of history than if they had rushed madly or inconsiderately into the fight. And not only did the British soldiers kill armed men and destroy public property that day, but they burnt the houses of private and unoffending people, butchered old and unarmed men and drove a woman with a babe three days old from her house and set fire to it,—atrocities unparalleled except in savage warfare.

And no sequel to the events of the morning can be conceived of, more animating or encouraging to the Colonies, or one which would better unite them in a common cause against the common enemy, or one which could be more mortifying or discouraging to the English people and ministry.

Suppose the Provincials had captured the whole force sent to Concord. The capture would have cost the Americans the lives of many brave men, whom they could not well spare, and the captives would have been an elephant on their hands which they had no use for or place to keep. Or, suppose the British troops had halted in some open field or on some hill and engaged the Americans in mortal combat. If they had fought well and died bravely, the English nation might have been filled with admiration at their valor, and aroused to gigantic efforts to avenge their deaths. Far better they should ignominiously run away, giving courage and hope to the Colonists, grief and shame to the English people.

LIST OF REVOLUTIONARY SOLDIERS.—To compile this record has required a large amount of time and patience. The records of the town give some reliable information as to the amount of money raised for the war, but very little information as to whom it was paid. From 1775 to 1784, £17,784 16s. 7d. was paid to individuals, mostly citizens of the town, "For money loaned to the town's committee for hiring men for the war, while but about £4538 was paid directly to the soldiers." The difficulty is further enhanced by the constantly depreciating value of the currency, the amount paid each soldier furnishing little information as to the length of his service.

Various attempts have been made by different writers to explain this depreciation, and to determine the comparative value of specie and currency at different dates during the war. A few items, transcribed from the payments from the treasury, may give as correct an idea of it as can be obtained in any other way:

March 27, 1775, Hannah Munroe was paid £3 19s. 6d. for teaching school seventeen weeks.

December 5, 1775, Lucy Eveleth was paid £1 17s. 4d. for teaching school two months.

In 1780 Elizabeth Hoar, Molly Brooks, Polly Bond and Ruth Flint were paid £255 each for teaching school ten weeks.

In 1777 twenty-nine men were paid a bounty of

£30 each for enlisting into the Continental Army for three years.

In 1780 Daniel Child was paid £180, in part, and Isaac Munroe was paid £150, in part, for three months' service at Rhode Island, and Micah Munroe and John Wheeler were paid £720 each for service at Rhode Island.

In 1781 twelve men were paid an average of £73 10s. each, "Hard money," for engaging in the Continental service for three years.

And these sums were not paid for articles of food or clothing, which, by reason of famine or scarcity, sometimes command exorbitant prices, but for the personal services, which have a less changeable value.

It is not claimed that the following list contains the names of all the men of Lincoln who served in the Revolutionary War. Much less is it claimed that the record contains an account of all the service each one performed. In many cases it is believed, and in some instances known to be imperfect. It is certain that the men of Lincoln were at Trenton and Camden, at Monmouth and White Plains, and traditions of their sufferings in the winter of 1776 were common in the early life of the writer. The soldiers who served in later years of the war are said, in the records of the town, to have been in service "at the Southward," the term being used to designate all the country west and south of New York.

I have not been able to find any of the company-rolls of Colonel Eleazar Brooks' regiment, which was in service at New York in 1776 and 1777, except "A Bounty Roll of a company commanded by Capt. Samuel Farrar in Col. Jonathan Reed's regiment, detached from Col. Eleazar Brooks' regiment and sent to re-inforce the Northern army under Gen. Gates," and was at the capitulation of General Burgoyne's army.

Mr. Shattuck says, under date of "Nov. 28, 1777, Capt. Simon Hunt, of Acton, commanded a company, to which most of the Concord men were attached under Col. Eleazar Brooks and Gen. Heath. Nine companies guarding Burgoyne's troops down, five companies marching before and four behind."

In the town treasurer's books are entries of sums paid to citizens of the town for a "Three years' campaign," and for one-half and one-third of a three years' campaign in the Continental Army. In 1777 the town was called upon to furnish twenty-six men to serve three years in the Continental Army, and these were paid a bounty of £30. Most of these bounties were paid to citizens of the town who performed the service, but some of them were paid to persons who singly, or in connection with others, procured recruits. Those who were not citizens or residents of the town were Samuel Bailey, Benjamin Cleaveland, John Gordon, William Gilbert, Zedith Henderson, John Langtry, John Lunt, John Porter and Adonijah Rice.

A list of a company of minute-men, under the

command of Captain William Smith, in Colonel Abijah Peirce's regiment of minute-men, who entered the service April 19, 1775 :

WILLIAM SMITH,
Captain.

" COLONY OF MASSACHUSETTS BAY,
" January 25, 1776.

" William Smith made solemn oath that this roll, by him subscribed, is true in all its parts according to the best of his knowledge.

" Before me MOSES GILL,
" Justice of Peace thro' t y e Colony."

" A list of a company of militia commanded by Captain John Hartwell in Colonel Eleazar Brooks' regiment, called down for the fortifying the Dorchester hills March y e 4, 1776 :

" John Hartwell, Capt.; Samuel Farrar, Lieut.; Samuel Hoar, Lieut.; Jonas Mason, Sergt.; Nathan Weston, Sergt.; Isaac Hartwell, Sergt.; Joseph Abbott, Sergt.; Joshua Brooks, Corp.; Nathan Brown, Corp.; Abijah Munroe, Corp.; Nehemiah Abbott, Edward Adams, Abel Adams, James Adams, Bulkley Adams, Ephraim Brooks, Noah Brooks, Ephraim Brooks, Jr., Stephen Brooks, Timothy Brooks, Daniel Billings, Timothy Billings, Joseph Billings, Daniel Brown, Ephraim Brown, Samuel Bond, Nathaniel Baker, Amos Baker, Edmund Bowman, Noah Bacon, Joshua Child, Amos Child, Abel Child, Elisha Child, Samuel Dakin, Jacob Foster, Jonathan Foster, Ephraim Flint, Humphrey Farrar, Samuel Hartwell, Isaac Munroe, Salem Middlesex, Isaac Pierce, Joseph Pierce, Joseph Pierce, Jr.; James Miles, Willard Parks, Isaac Parks, Josiah Parks, Benjamin Perks, Eleazar Parks, Joshua Stone, Timothy Stone, Gregory Stone, Jube Savage, Enos Wheeler, Joseph Wheat, Elisha Willington, Nathan Tidd, John Lander, 60 men, 6 days' service—travel 40 miles."

Joseph Abbott (Lieut.) was in the service at Cambridge in 1775 and at Dorchester in 1776 and 1777. He was at Lexington on the morning of April 19, 1775, and his deposition was one of those that was taken and sent to England to prove that the British soldiers commenced the war by firing upon the provincials on the morning of the 19th of April, 1775. He was a son of Nehemiah and Sarah (Foster) Abbott, born in that part of Lexington which became a part of Lincoln upon the incorporation of the town in 1754; married Hannah White and died in Lincoln June 29, 1794. They were the parents of Joseph, Nehemiah and Abel Abbott.

Joseph Abbott, Jr., was in service at Cambridge in 1775 and at Ticonderoga in 1776; born in the Precinct July 10, 1752; married, 1778, Ruth Bucknam, and died in Sidney, Maine.

Nehemiah Abbott, born in Lincoln, September 27, 1764, married, February 17, 1791, Sarah Hoar, and died in Lincoln October 28, 1839. He was in the service at Cambridge eight months in 1775, and enlisted in 1777 for three years in the Continental Army. He was a Revolutionary pensioner and received a bounty of two hundred acres of land. He had the reputation of being a good soldier. Any one who remembers the imperturbable old gentleman can readily believe that nothing less than an army with banners would terrify him.

Abiel Abbott, born in Lincoln, September 16, 1769, married, December 16, 1788, Polly Merriam and died, in Lincoln, in 1817. He was in the service at Dorchester in 1776, at Rhode Island in 1779 and 1781.

Abel Adams, born in Lincoln, February 20, 1757, was in service at Dorchester in 1776 and at Saratoga in 1777. He died in Mason, N. H., April 25, 1826.

Edward Adams, born in the precinct March 27, 1763, was in service at Dorchester in 1776 and at the surrender of Burgoyne in 1777.

Bulkley Adams was in service at Dorchester in 1776, at Point Judith in 1777 and at Rhode Island in 1779 and 1780; born March 14, 1759; died June 29, 1827.

Abel, Bulkley and Edward were sons of John and Lucy (Hubbard) Adams.

Amos Adams, born in Lincoln, January 12, 1750, enlisted under a resolve of December 2, 1780, and was paid a bounty of £61, hard money.

Asa Adams, born in Lincoln, November 7, 1759, was a fifer in Captain Edmund Bemis' company, of Westminster, in 1775; enlisted in 1777 to serve during the war; served thirty-seven months and deserted.

Amos and Asa were sons of John and Elizabeth (Shaw) Adams.

James Adams was in service at New York in 1776 and in the expedition to Canada, and at Cambridge in 1777 and 1778, and was paid for one half of a three years' campaign in the Continental Army.

James Adams, Jr., served in Captain Joseph Griffith's company one year from January 1, 1778, and was in service at Rhode Island 1779 and 1780.

Joel Adams was in service at Cambridge in 1775, at Rhode Island in 1779 and 1780, and enlisted for three years March y e 6, 1781, having received security of the class to which I belong for the sum of three hundred silver dollars, being engaged in the Continental Army for the term of three years."

Joel Adams was a son of Josiah and Grace Adams, who came from Mendon to Lincoln in 1754.

Captain Joseph Adams was paid for service at Ticonderoga in 1776 and for one-half of a three years' campaign in the Continental Army.

Phineas Allen was in service at Boston in 1776 and at Cambridge in 1778; born in Weston (now Lincoln), April 6, 1745.

Samuel Avery enlisted under a Resolve of the General Court of December 2, 1780, and received a bounty of £60, hard money.

Joseph Bacon was in service at New York in 1776 and 1777.

Noah Bacon was in service at Cambridge in 1778.
 Samuel Bacon was in service at New York in 1776 and at Rhode Island in 1777-78.

Joseph, Noah and Samuel were sons of Captain Samuel Bacon, who died in Lincoln in 1786.

Amos Baker was in service at Dorchester in 1776 and 1777 and at Cambridge 1777 and 1778, and was a Revolutionary pensioner; born in Lincoln, April 8, 1756, and died July 16, 1850.

Samuel Baker was in service at Cambridge and Dorchester in 1776 and at Saratoga in 1777; born in the precinct February 22, 1752, and died at Enosburg, Vt., March 25, 1828.

Abel Billings was in service at Rhode Island in 1780. Born in Lincoln Feb. 14, 1757; died in Sedgwick, Me., Oct. 27, 1833.

Daniel Billings was in service at Ticonderoga in 1776, and at the surrender of Burgoyne's army in 1777, and was paid for one-third part of a three years' campaign in the Continental army. About the year 1798 he removed to Livermore, Me., and afterwards to Bangor, where he died.

Israel Billings was in service at Winter Hill in 1778, and at Rhode Island in 1780. Baptized in Lincoln May 13, 1759; died, unmarried, Aug. 13, 1828.

Joseph Billings was in service at New York in 1776 and 1777, and five months at Winter Hill in 1778, and at Rhode Island in 1780. He died in Lincoln April 30, 1810, aged 77 years.

Joseph Billings, Jr., was in service at Cambridge in 1778, to guard the Convention, and served in two campaigns at Rhode Island in 1779 and 1780. Born Jan. 21, 1762; died Jan. 17, 1825.

Nathan Billings was in service at New York in 1776, at Rhode Island in 1777, and enlisted for six months under a resolve of the General Court of June 5, 1780, and served six months and ten days. He died in Lincoln Dec. 27, 1809.

Timothy Billings was paid for services at Ticonderoga in 1776, at Saratoga in 1777, and for a three years' campaign in the Continental Army. Born in the precinct Oct. 14, 1748; died in Lincoln Nov. 26, 1812.

Samuel Bond was in service at Cambridge in 1775, at New York in 1776, at the surrender of Burgoyne in 1777, and in the expedition to Rhode Island in 1778. In 1779 he sailed for France in a letter-of-marque ship, which was taken by the British and carried into St. Lucia, where he died of fever. Born Nov. 2, 1757.

Jonas Bond enlisted under a resolve of the General Court for filling up and completing fifteen battalions, April 21, 1778; was a Revolutionary pensioner. Born in Lincoln March 7, 1760; died in Robbinston, Me., Sept. 15, 1843.

William Bond was paid £52 10s. for service at Rhode Island in 1780. Born July 12, 1761; died in Whittingham, Vt., Sept. 22, 1837. Samuel, Jonas and William were sons of William and Lydia (Farrar) Bond; all born in Lincoln.

Aaron Brooks was in service at Cambridge in 1775, at Ticonderoga in 1776, and Saratoga in 1777. Born in Concord, now Lincoln; died Feb. 23, 1811, aged 84 years.

Abner Brooks was in service at Rhode Island in 1777, and was discharged from service Nov. 30, 1777, and died four days afterwards, Dec. 4, 1777. Born in Lincoln Feb. 29, 1760.

Benjamin Brooks was in Capt. William Smith's company at Concord Fight, April 19, and died Aug. 29, 1775, in his twentieth year.

Ephraim Brooks, Jr., was in Capt. Hartwell's company in 1776, and Ephraim Brooks was at Ticonderoga in 1776, and at Saratoga in 1777. Baptized in the precinct April 29, 1753.

Levi Brooks was in Capt. Minott's company from Aug. 14 to Nov. 30, 1777. Born in Lincoln Oct. 23, 1762, and died Sept. 20, 1833.

Ephraim, Jr., Benjamin, Abner and Levi were sons of Ephraim and Sarah (Heywood) Brooks.

Joshua Brooks (Dea.) was at Ticonderoga in 1776, and at Saratoga in 1777.

Joshua Brooks, Jr., was in Capt. Farrar's company before New York in 1777, and was a sergeant in a company detached from Col. Ebenezer Brooks' regiment, and sent, under the command of Capt. Samuel Farrar, in Col. Jonathan Reed's regiment, to reinforce the Northern army under Gen. Gates, and was at the surrender of Burgoyne's army. He was also a sergeant in Capt. Francis Brown's company in the expedition to Rhode Island in 1778. Born in Lincoln Feb. 11, 1755; died Nov. 8, 1825.

Noah Brooks was in service at Ticonderoga in 1777. Died in Lincoln Feb. 18, 1791, aged 57 years.

Stephen Brooks was in service at Dorchester in 1776, in Capt. Hartwell's company, in Col. Dyke's regiment, in 1777, and at Klaverick, on the Hudson River, in 1780. Son of Aaron and Mary (Stone) Brooks, born March 22, 1759; died in Blindge, N. H., Jan. 29, 1848.

Timothy Brooks was in service in Cambridge in 1775, and at New York in 1777, and was paid £30 for three years' service in the Continental army. Died in Lincoln June 18, 1803.

Benjamin Brown was in service at Cambridge in 1775, and was paid for one-half of a three years' campaign in the Continental army.

Ebenezer Brown was in Captain Smith's company at Concord, April 19, 1775, and died Dec. 5, 1776.

Joseph Brown was in service at Boston in 1775, and at New York in 1776, and was paid for one-half of a three years' man in the Continental army.

Nathan Brown was in service at New York in 1776, and at Saratoga in 1777; son of Nathan, Jr., and Rebecca (Adams) Brown; born in Lincoln April 18, 1755; died December 12, 1814.

Timothy Brown was in service at New York in 1776, and at Saratoga in 1777; born in the precinct December 12, 1750; died in Lincoln September 5, 1796.

Edward Cabot was in service at Cambridge in 1775 and in 1778. He married in Lincoln, December 4, 1772, Beulah Monroe, and lived in Lincoln about eight years.

Abel Child was in service at Ticonderoga in 1776, eight months at Cambridge in 1778, and at Rhode Island 1780; son of Isaac and Hannah Child; born in Lincoln April 10, 1757.

Daniel Child was in service at Cambridge in 1775, in the expedition to Canada in 1776, and was in service at Rhode Island in 1779.

Joshua Child was in service at Saratoga in 1777; born March 26, 1749; died January 5, 1822.

Joseph Colborn was in Captain Murrett's company of artillery in 1777, and in Captain Harrington's company in 1778, and was a Revolutionary pensioner. Born in Leominster, and died February 16, 1841, aged eighty-three.

Nathaniel Colburn was in service at Boston in 1776, and at Saratoga in 1777.

John Conant was in service at Rhode Island in 1778.

Samuel Dakin, Jr., was in service at Roxbury in 1776, and at Saratoga 1777.

Daniel Farrar was in service at Cambridge in 1775; born in Lincoln March 23, 1755, and died in Lincoln in 1810.

Humphrey Farrar was in service at Cambridge in 1775, and at the Southward in 1776.

John Farrar "residence stated in Lincoln, and credited with thirty-six months' service in the Continental Army."

Nehemiah Farrar was in service to guard the convention at Cambridge in 1778, and at Rhode Island in 1778; born in Lincoln November 23, 1761, and died in 1809.

Zebediah Farrar was in Captain Asaheel Wheeler's company at Cambridge in 1776; born May 9, 1751; died in Lincoln August 3, 1826.

Ephraim Flint was in service at New York in 1776-77; born in Concord (now Lincoln) May 13, 1745; died September 1, 1824.

John Flint was in service at Cambridge 1775, and at Canada in 1776; born in Lincoln October 6, 1755; died in Walpole, New Hampshire, September 6, 1810.

Isaac Gage was a sergeant in Captain Nathan Fuller's company eight months at Cambridge in 1775; was a lieutenant; and was a captain in a company at West Point, New York in 1780; son of Robert and Mary Gage; baptized in Lincoln September 23, 1753.

Jonathan Gage was in service eight months at Cambridge in 1775; enlisted for three years in 1777 and served forty-six months in the Continental Army; son of Jonathan and Ruth (Underwood) Gage; born in Lincoln, October 6, 1755.

Abraham Garfield was in Captain William Smith's company at Concord Fight April 19, 1775, and his deposition, taken four days afterwards, was one of those sent to England to prove that the British troops began the war by first firing upon the provincials. He died August 15, 1775. The name of Abraham Garfield does not appear upon the pay-roll of Captain Smith's company, probably because the roll was not made until the following January.

John Garfield was in service at Roxbury in 1776, and was paid £8 for going to Worthington with a team.

John Gove was paid £11 for service at New York in 1776, and £10 for one-third part of a three years' man with the Continental Army. He was a soldier in the French and Indian War.

John Hagar and John Moore served a three years' campaign in the Continental Army. John Hagar serving about twenty and John Moore about sixteen months.

Captain Daniel Harrington was at service at Ticonderoga in 1778, and at Cambridge in 1778; was a captain in Lincoln; born in Waltham, July 12, 1750; married, April 9, 1772, Anna Coolidge; died in Lincoln August

6, 1818. (Captain Daniel Harrington with his company started from Lincoln January 2, 1787, for Northampton, to aid in the suppression of Shays' Rebellion. When the company reached Marlborough they received intelligence that the insurgents had dispersed, and they returned home.)

Isaac Hartwell was a sergeant in Captain Smith's company in 1775, was in service at Ticonderoga in 1776, and was a lieutenant in Captain John Griffith's company in Colonel John Jacobs' regiment, one year from January 1, 1778; born July 8, 1752; married, July 9, 1785, Eunice Myrick; died in Princeton January 8, 1822.

John Hartwell was a lieutenant in Captain William Smith's company in Colonel John Nixon's regiment in 1775, and a captain in Colonel Eleazer Brooks' regiment in 1776, and in Colonel Dyke's regiment in 1777. He was born in Concord (now Lincoln) August 21, 1747; married, December 18, 1783, Hepzibah Brooks, and died November 2, 1820.

Samuel Hartwell was quartermaster in Colonel Eleazer Brooks' regiment in 1776, and was in service at Cambridge in 1778, and Rhode Island in 1779 and '80; was a Revolutionary pensioner. Born in Concord (now Lincoln), June 25, 1742; married September 12, 1769, and died August 12, 1829.

Samuel, John and Isaac were sons of Ephraim and Elizabeth (Heywood) Hartwell.

Samuel Hoar was an ensign in Captain William Smith's company of minute-men in 1775, a lieutenant in Captain John Hartwell's company in 1775, and in Captain Samuel Farrar's company at the surrender of Burgoyne in 1777. Son of John and Elizabeth (Coolidge) Hoar; born in Lexington (now Lincoln), August 23, 1743; married, July 8, 1773, Susanna Pierce, and died May 22, 1832.

Leonard Hoar was in Captain John Hartwell's company in 1776, and was at the surrender of Burgoyne's army in 1777, and in service at Rhode Island in 1779 and 1780, and was a Revolutionary pensioner. Son of John and Elizabeth (Coolidge) Hoar; born June 29, 1755; died December 12, 1842.

Brieter Hoar (Scipio Brieter) was in Captain Hartwell's company at Cambridge in 1776, and in Captain Micoat's company in 1777. He was born in Boston in 1756; was a slave until 1780, and died November 1, 1820.

Jeremiah Knowlton was a sergeant in Captain Simon Hunt's company at New York in 1776, and at Saratoga in 1777, and in Captain Francis Brown's company at Rhode Island in 1778.

William Lawrence, Jr., was paid £30 for a three years' campaign in the Continental Army.

Jonas Mason was a sergeant in Captain William Smith's company in 1775.

Joseph Mason was in service nine months at Cambridge in 1775; was in service at New York in 1776, and at Rhode Island in 1779, and was drafted for nine months' service after arrival at Fishkill.

Joseph Mason, Jr., was in service at Cambridge in 1775, at New York in 1776, at Saratoga in 1777, and at Rhode Island in 1778.

Joseph Mason is credited with three years' service in the Continental Army. (Probably Joseph Mason, Jr.) Born in Lincoln, March 6, 1751; married, April 23, 1786, Lucy Flint; died in Walpole, N. H., February 18, 1834.

Elijah Mason was a fifer at the battle of Bunker Hill, and was in service at New York in 1776, and enlisted for completing and filling up fifteen battalions under a resolve of April 20, 1778. Born in Lincoln, October 29, 1757; died, unmarried, in West Woodstock, Conn., February 16, 1849. Jonas, Joseph and Elijah were sons of Jonas and Grace (Bond) Mason. Eight British soldiers were killed, April 19, 1775, within half a mile of their house.

Abijah Mead was a sergeant in Captain Asabel Wheeler's company in 1776, and enlisted in 1777 for three years, and was a Revolutionary pensioner; baptized in the precinct March 4, 1749, and died in Lincoln May 1, 1837.

Tilly Mead was in Captain Francis Brown's company at Rhode Island, in 1778, and enlisted for three years, and was a Revolutionary pensioner; born in Lincoln July 21, 1747; died unmarried in Barre March 1, 1848.

Jonathan Mead was in service at Rhode Island in 1778; he enlisted for three years November 12, 1779, and served the full term; born in Lincoln March 12, 1761, and died in Hardwick March 24, 1814.

Abijah, Tilly and Jonathan were sons of David and Mary (Bond) Mead. Abner Mathais was at the surrender of Burgoyne in 1777, and in the expedition to Rhode Island in 1778. He was the son of Barabas and Anna (Munroe) Mathais. He was a captain in Lincoln; married Lydia Smith and removed to Billerica in 1807.

James Meriam was in service at New York in 1776, at Saratoga in

1775 and at Rhode Island in 1778; born in Lexington; married in Lincoln, February 16, 1764, Mary Cutler, and died in Lincoln February 21, 1816.

James Miles was in service at Rhode Island in 1777.

Abijah Munroe was in service at Cambridge in 1775, and at Boston in 1776, at New York in 1776-77; born June 10, 1755; married, January 9, 1786, Sally Wheeler; removed in 1795 to Livermore, Me., where he died.

Isaac Munroe was in service at Rhode Island in 1779. He enlisted for three years and served thirty-four months and ten days. He received a bounty of fifty dollars and was a pensioner; born in Lincoln March 10, 1758, and died August 5, 1840.

Micah Munroe was paid £720 for service at Rhode Island in 1781; born in Lincoln April 23, 1762, and died unmarried in Livermore, Me.

Abijah, Isaac and Micah were sons of Benjamin and Mary (Mariam) Munroe.

Josiah Nelson was in the service at Cambridge in 1775, at Ticonderoga in 1776, and at Saratoga in 1777.

Jonathan Page was in service in a campaign in Rhode Island in 1779, enlisted for six months under a resolve of June 5, 1780, and re-enlisted for three years June 1, 1781, receiving a bounty of three hundred and fifty silver dollars. He married, January 18, 1783, Lydia Munroe, of Lexington.

Aaron Parke was in service at Winter Hill in 1775, and in the expedition to Canada in 1776. He enlisted March 28, 1781, to serve during the war, having "Received of the class whereof Lt. Benjamin Roe and others are members, security for two hundred and forty dollars, silver money," and was a Revolutionary pensioner. He was a son of Joseph, Jr., and Lydia (Garfield) Parke, and married, December 23, 1783, Anna Jennison, and had two children baptized in Lincoln.

Benjamin Parks was in service eight months at Cambridge in 1775; about the year 1800 he removed to Livermore, Maine, and died there in 1825, aged ninety-two years.

Eleazer Parks was in Capt. Nathan Fuller's company eight months at Cambridge in 1775, and was in service at Point Judith in 1777. Born in Lincoln, Nov. 20, 1754; married Elizabeth Whitney, and removed to Winchendon.

David Parks in service at Cambridge in 1775, in the expedition to Canada in 1776, and at Cambridge in 1778, and was paid for one-fourth part of a three years' campaign in the Continental Army.

Isaac Parks was in service at New York in 1776.

James Parks was a lieutenant in Capt. Samuel Farrar's company in 1776, and at Cambridge in 1777 and 1778; son of Josiah and Thankful (Coolidge) Parke; baptized March 1, 1740; married Dec. 5, 1771, Hannah Wesson, and died in Lincoln.

John Parks was in service eight months at Cambridge in 1775, and was paid £8 for going to Worthington with a team.

Josiah Parks, in service at Dorchester in 1776, and Saratoga in 1777, and was a Revolutionary pensioner; son of Ephraim and Mary (Hobbs) Parks; born August 9, 1747, and died June 13, 1841.

Jonas Parks was in service eight months at Cambridge in 1775, and in the expedition to Canada in 1776, and was a Revolutionary pensioner; son of David and Sarah (Gibbs) Parks; born Oct. 10, 1755; married, Jan. 30, 1783, Eunice Tower.

Leonard Parks was a fifer in Capt. Fuller's company at the age of sixteen years; eight months at Cambridge in 1775, and was a fifer in Capt. Samuel Farrar's company at the surrender of Burgoyne's army in 1777, and was paid £40 for his service at Boston in 1778. Born in Lincoln, Oct. 25, 1760; died in Cambridge, June 8, 1838. Aaron, Eleazer, Jonas, John and Leonard Parks were in Capt. Nathan Fuller's company, in the regiment commanded by Col. Thomas Gardner, who was killed at Bunker Hill.

Willard Parks was in service eight months at Cambridge in 1775; son of Stephen and Abigail (Garfield) Parks; baptized in the precinct, Jan. 21, 1753, and died March 2, 1816.

Abraham Pierce was in service at Cambridge in 1775, in Capt. Marrett's company of artillery in 1777, and enlisted in 1777 for three years in the Continental Army; son of Jonas and Mary (Adams) Pierce, born Sept. 2, 1755, and died in Rindge, N. H., Sept. 12, 1802.

"Col. Abijah Pierce was chosen colonel of the regiment of minutemen in 1775, and was at Concord on the 19th of April, 1775, and in service at Cambridge in the summer of 1775. Born in Waltham, May 23, 1727; married, Sept. 23, 1751, Thankful Brown; died in Lincoln, Sept. 18, 1800."

Joseph Parker enlisted at the age of 16 years, under a resolve of Dec. 2, 1780, for three years in the Continental Army; son of Joseph and Eunice (Hobbs) Parker; born in Lincoln, Dec. 5, 1765.

Keen Robinson was in Capt. John Watson's company in Col. Eleazar Brooks' regiment at New York in 1776, and in service at Cambridge in 1778.

Peter Sharon (colored) was in service at Rhode Island in 1780, and enlisted at the age of 18 years under resolve of Dec. 2, 1780, for three years in the Continental Army, and was paid a bounty of three hundred and fifty silver dollars. He died in Lincoln in the winter of 1792-93.

Isaac Pierce was in service in Captain Marrett's company of artillery in 1777, and in Captain Harrington's company in 1778, and in Captain John Minott's company in the expedition to Rhode Island in 1778; born November 17, 1757; married, March 20, 1786, Anna Sanderson.

Jonas Pierce was in service at Dorchester in 1778, at Cambridge in 1778, and at Rhode Island in 1779 and 1780; born September 19, 1750; died in Wardsboro', Vt., December 24, 1840.

Joseph Pierce served in Captain Marrett's and Captain Swan's companies of artillery. He enlisted for three years in the Continental Army and served the full term. Born March 13, 1750; died in Lincoln December 25, 1825.

Artemus Reed was in service at Cambridge in 1775, and in New York in 1776, and enlisted in 1777, for three years, in the Continental Army, and served thirty-six months.

Ahner Richardson, aged sixteen years, enlisted for three years under a Resolve of the General Court, of December 2, 1780, receiving from the class whereof Deacon Joshua Brooks and others are members a bounty of £73 10s., hard money. He married Anna Moore, and had a family of thirteen children; was a Revolutionary pensioner, and died in Luzerne, Warren County, N. Y., February 2, 1855, aged ninety-four years, two months and thirteen days, the last of the Lincoln soldiers in the Revolutionary War.

Captain William Smith commanded a company in Colonel Nixon's regiment at Cambridge in 1775, and in Colonel Brooks' regiment in 1776; son of Rev. William Smith, of Weymouth; born December 1, 1746.

Jesse Smith was in service at Cambridge in 1775, and was paid a bounty of £30 for enlisting in the Continental Army for three years, and served thirty-five months and thirteen days.

Jonathan Smith was in service at Cambridge in 1775, at New York in 1776, and at Cambridge in 1777 and 1778. He married, February 7, 1772, Lucy Billings, and died in Lincoln July 19, 1833.

Gregory Stone was in service at Cambridge in 1776, and was paid £20 for two-thirds of a three years' man in the Continental Army. He was a son of Gregory and Hephzibah (Brooks) Stone; born February 5, 1764; married, February 21, 1788, Lucy Jones, and died April 12, 1807.

Joshua Stone was in Captain Samuel Farrar's company, in Colonel Brooks' regiment, at New York, in 1776; at the surrender of Burgoyne in 1777; baptized in the precinct in 1752, and died in Concord March 10, 1822.

John Thorning was in service at Cambridge in 1775, at Dorchester in 1776, and at Saratoga in 1777; born in Lincoln June 7, 1756, and removed to Lexington in 1781.

William Thorning was in Captain Asabel Wheeler's company at Cambridge in 1776, was drafted to serve nine months after arrival at Fish-kill, was at the surrender of Burgoyne in 1777, and enlisted under a resolve of April 28, 1778, for completing and filling up fifteen battalions of troops, and was a Revolutionary pensioner. He was born in Lincoln January 20, 1758, married Eunice Phillips, and died in Lexington March 23, 1829.

Jonathan Tower, Jr., enlisted April 2, 1781, for three years, in the Continental Army, and was a pensioner; son Jonathan and Eunice (Allen) Tower; born in Lincoln October 16, 1764, and died here January 26, 1835.

Nathan Tidd was in service at Cambridge in 1775, in Captain Swan's company of artillery in 1777. He enlisted for three years in the Continental Army in 1777. He served sixteen months, and died in the service.

Abraham Weston was in service in 1777 and 1778, and enlisted, April 2, 1782, for three years, receiving a bounty of £70. He was born in Concord (now Lincoln), Oct. 29, 1738, and died near Livermore Falls, Me., June 29, 1801.

Zechariah Weston was in service at Dorchester in 1776 and 1777, at Cambridge in 1778, at Roxbury in 1779, and Rhode Island in 1780, and was paid for one-third part of a three years' campaign in the Continental Army. Baptized in the precinct March 15, 1752; died in Lincoln Aug. 13, 1833.

Nathan Weston was quartermaster's sergeant in the regiment commanded by Col. Thomas Gardner, who was mortally wounded in the battle of Bunker Hill, and was quartermaster in the same regiment,

afterwards known as Lieut. Col. William Bond's regiment, and was paid £10 for one-third part of a three years' campaign in the Continental Army. Born in Lincoln Nov. 8, 1753, and died here Dec. 8, 1825.

Daniel Weston was in service in Capt. John Minott's company, in Capt. John Hartwell's company in 1777, in service at Rhode Island in 1779, and at Klaverick, on the Hudson, in 1780. Baptized June 11, 1758, and died Sept., 1823.

John Weston was in service at Point Judith in 1777, and at Rhode Island in 1779, and was paid for one-third part of a three years' campaign in the Continental Army.

Jonathan Weston was in service at Roxbury in 1778, and was in Capt. Isaac Gage's company, near West Point, N. Y., in 1781.

Zechariah, Nathan, Daniel, John and Jonathan Weston were sons of Zachariah and Mary (Hoar) Weston, all born in Lincoln.

Edmund Wheeler was in service at Cambridge in 1775, and at Ticonderoga in 1776, and was paid for one-third part of a three years' campaign in the Continental Army. Son of Thomas and Mary (Manroe) Wheeler, born March 4, 1731, died June 1, 1805.

Enos Wheeler was in service at New York in 1776 and 1777, and at Cambridge in 1778. Son of Joseph and Ruth (Fox) Wheeler, born in Acton Sept. 17, 1738; married, in Lincoln, Oct. 22, 1765, Mary Garfield, and removed to Weston in 1782.

John Wheeler was in service at the surrender of Burgoyne in 1777, and in Capt. Simon Hunt's company in 1778, and was a Revolutionary pensioner. Son of John and Lydia (Allen) Wheeler, born March 23, 1761, and died in Walpole, N. H., Jan. 28, 1845.

Jonas Whittaker was in Capt. Simon Hunt's company at Winter Hill in 1778, and in service at Rhode Island in 1780. He was a soldier in the French and Indian Wars, serving in Capt. Thomas Adams' company in 1758, and in Capt. William Barron's company in 1762.

Solomon Whitney was at the surrender of Burgoyne's army at Saratoga 1777, and in service at Rhode Island in 1779, and was in the service nearly all the time during the Revolutionary War. He served several campaigns in the French and Indian Wars, and enlisted in 1780, at the age of 47, for three years in the Continental Army. Son of Solomon and Martha (Fletcher) Whitney, born in Weston (now Lincoln) in 1735, married, June 14, 1771, Mary Fay, and removed in 1794 to Canterbury, N. H.

Elijah Willington was a sergeant in Captain William Smith's company in Colonel Nixon's regiment at Cambridge in 1775, and was in the service in 1776; baptized in Lincoln March 25, 1750, removed to Livermore, Maine, about 1810, and died there December 15, 1828.

Elisha Willington was in service in Canada in 1776, and enlisted in 1777 for three years in the Continental Army and served thirty-four months; born in Lincoln July 20, 1758; died in Concord January 12, 1799. Elijah and Elisha were sons of Jonathan, Jr., and Lydia (Fiske) Willington.

WAR OF 1812.—The part performed by this town in the War of 1812 was very small compared with its services in the War of the Revolution. In the spring of that year a regiment was raised in Middlesex County, "To be armed, equipped and stand ready to march at a moment's warning," and to this force the following persons volunteered, viz.: Gabriel Weston, corporal; Jonas Wheeler, William Hoar, John Brownell, Rufus Babcock, William Jones, Stephen Esty and David A. Davis, privates; but it does not appear that they were called into service. June 28, 1814, John Billings and Daniel Weston were detached from the company "Roll by lot," to strengthen the forts in Boston Harbor, and September 20, 1814, Eliphalet Weston, sergeant, and Artemas Hayden and John Nelson were drafted for the same purpose.

In 1812, Colonel Daniel Brooks and Major Ephraim Flint resigned their commissions in the militia of the State, and applied for commissions in the National Army, but were unsuccessful.

Colonel James Miller, the hero of Lundy's Lane, married a sister of Major Flint, and his family re-

sided in Lincoln about ten years, covering the periods of his service in the army and as Governor of Arkansas Territory, and three of his children were born in Lincoln.

Jonas W. Colburn was taken prisoner and confined several months on board a British prison-ship, where he suffered great hardships.

Leonard Hoar, Jr., was aid-de-camp to Colonel Miller. He was taken sick at Buffalo, and attempted to return home, but died at Canandaigua, N. Y., September 21, 1814, aged twenty-one years and two months. He was a young man of winning personal appearance and gentlemanly and military manners and bearing.

"None knew him but to love him,
Or named him but to praise."

The people of Lincoln were as earnest and patriotic in the War of the Rebellion as the War of the Revolution, but the relative condition of the town had greatly changed. The city of Lowell had sprung into existence where there was, in the Revolutionary period, nothing but forests and pastures and unrestrained water-power running to waste, and Waltham and other towns having manufacturing facilities had increased in wealth and population from two to tenfold, while Lincoln, being entirely an agricultural town, remained nearly stationary.

The first town-meeting called to act on matters pertaining to the war was on May 13, 1861, and it was "Voted, That two thousand dollars be appropriated to provide bounty, arms, ammunition, clothing, provisions and extra pay for such of the inhabitants of the town as have enlisted or may hereafter enlist into the military service of the United States, and for aid to their families."

July 28, 1862, the town "Voted, That eighteen hundred dollars be raised to pay nine men who may enlist as our quota of soldiers in the service of the United States, and that said eighteen hundred dollars be forthwith assessed upon the taxable property of the town, and so much of it as may be necessary be expended by the committee appointed at a citizens' meeting for securing said recruits; and that all persons be requested to pay the same to the collector on the presentations of their tax-bills, on or before the first day of September next." This vote was passed in a full town-meeting without a dissenting voice or vote; and although it was known that the town could not enforce the payment of this tax, it was immediately assessed and more than nine-tenths of it was paid upon the presentation of the bills.

August, 1862, the town "Voted, To pay each volunteer who shall enlist for nine months and be mustered in and credited to the quota of the town, a bounty of two hundred dollars," and the same committee which recruited the three years' men was requested to recruit the nine months' men.

At the annual meeting in March, 1863, six hundred dollars were appropriated for the payment of aid to soldiers' families. In the spring of this year town-

officers were forbidden to pay bounties, and the government resorted to drafts.

April 25, 1864, the town voted to raise fourteen hundred dollars to refund the money raised by subscription and paid for recruiting ten volunteers in December and January last, and seven hundred dollars to pay the veteran volunteers belonging to Lincoln.

And on the 13th of June following, a committee was appointed to recruit eight men to serve the town as volunteers, and the treasurer was authorized to borrow twenty-five hundred dollars for the purpose, and in October following, the town "Voted, To refund to the citizens the money subscribed and paid by them last spring for procuring recruits to fill the quota of the town." Various other sums were paid by the town during those years for expenses incidental to the war, and for bringing home and burying their dead.

Lincoln furnished seventy-nine men for the war, which was a surplus of four over and above all demands. Five of them were commissioned officers. The amount raised by taxation and expended by the town, on account of the war, was \$10,385.50, all of which was paid before the close of the year 1865. The town also paid \$3915 for aid to soldiers' families, of which sum \$3205 was reimbursed by the State.

Of those who rendered gallant service in the Civil War were the following: First Lieutenant Thomas J. Parker enlisted as a private at the breaking out of the war, and continued in active service until his death. He was twice promoted for meritorious conduct, and was mortally wounded before Petersburg, March 25, 1865.

Elijah H. Wellington enlisted in the Forty-fourth Regiment, September 12, 1862, and died of disease at Newbern, N. C., January 13, 1863. He was a young man of excellent character, universally beloved and respected.

Frederick D. Wellington enlisted June 29, 1861, in Co. H, Sixteenth Regiment Massachusetts Infantry, and was wounded at Fredericksburg, Va., Dec. 17, 1862, and remained in hospital until his discharge, March 12, 1863. He is a pensioner.

Edward L. Deering, of Lincoln, enlisted in a Maine regiment, and was killed in the assault on Fort Wagner.

Among those who volunteered and served with honor to themselves and the town, the following deserve especial commendation. They are named in the order of their enlistment, so far as it is known: Albert Johnson, George E. Sherman, Eugene M. Deering, James Hill, Francis C. Brown, John Tasker, Franklin Jones, Edward N. Haynes, James E. Hayden, Thomas W. Hayden, John Atkins, Edward Stone, James A. Walker, John W. Hoar, James E. West, B. Franklin Hoar, Cassius M. Flagg, William H. Flagg, William Messer, Cornelius Stone.

An act for erecting a new town within the county

of Middlesex, by the name of Lincoln, April 23, Anno Domini, 1754:¹

"Whereas, the inhabitants of the easterly part of Concord, the south-westerly part of Lexington, and the northerly part of Weston, have addressed this court, setting forth the many difficulties they now labor under, which might be effectually remedied if they were constituted a township;

"Be it therefore enacted by the Governor, Council and House of Representatives, That the easterly part of said town of Concord, the south-westerly part of said town of Lexington and the northerly part of said town of Weston, as hereafter set forth and described, be and hereby are set off, constituted and erected to a separate and distinct township by the name of Lincoln; the bounds of said township to be as follows, viz. To begin at Concord River where the line goes over said river between Concord and Sudbury, and runs down said river to a brook that runs out of Well meadow (so called); from thence to the southeasterly side of Walden Pond (so called); from thence to the northwesterly corner of a lot of land lately belonging to Daniel Brooks, on the southerly side of the country road; thence running easterly with the country road (one-half whereof to belong to and be maintained by each town) until it comes to Joshua Brooks' tan-house, and from the northwest corner of said tan-house to the northwest corner of John Wheat's land adjoining Benjamin Wheeler's land; thence by said Wheeler's land to Bedford line, and by Bedford line to Concord corner adjoining to Lexington; and from thence in a straight line to a little bridge in the country road a little westerly of Thomas Nelson's house; thence to the top of a little hill eastward of Nebunah Abbott's house; thence to Waltham northwest corner, including Elisha's Cutler's land; from thence on Waltham line to the southwest corner of John Benis' land; thence running south to the southeast corner of Benjamin Brown's land; thence turning and running westerly by said Brown's land to a stake and heap of stones being the northwest corner of Braddl Smith's land; thence to a rock in the quadron line, a little northwest of the school-house; thence to the corner of the wall on the north side of Concord road (so called), being upon the division line between Theoph. Mansfield and Josiah Parks; thence turning south, upon the division line between said Mansfield and said Parks to the quadron line; thence in the same course to the division line between Nathaniel Allen and Ephraim Parks; thence westerly by the division line between said Allen and said Parks till it comes to a townway; thence westerly in a straight line across a corner of said Parks' land, to a heap of stones, being a corner between said Allen and said Parks; thence westerly between said Allen and said Parks till it comes to Abbott's meadow; thence in the same course to Sudbury line, and by said line to the place first mentioned, and that the inhabitants of said lands as before bounded and described, be and hereby are vested and endowed with the powers, privileges and immunities that the inhabitants of any of the towns within the province are, or ought by law, to be endowed with.

"Provided, That the inhabitants of the said town of Lincoln shall pay their proportion (agreeable to what the inhabitants taken off by the said town of Lincoln from the town of Concord, paid in the last tax), of the charges that may hereafter arise in building or repairing of a bridge or bridges over the great river in the town of Concord, and the said town of Lincoln. And also their proportion of the charges of maintaining any poor person or persons that are now out of the town of Concord, but by reason of their former residence there, may become a charge to the town of Concord.

"Provided also, and be it further enacted, that the said several inhabitants taken off from the towns of Concord, Lexington and Weston by this act, shall pay their proportion of all the town, county, precinct and province taxes already assessed on said town or precinct, as if this act had not been made.

"And be it further enacted, That James Minot, Esq., be and hereby is directed and empowered to issue his Warrant to some principal inhabitant of said town of Lincoln, requiring him to notify and warn the inhabitants of the said town of Lincoln, qualified to vote in town affairs, to meet at such time and place as shall therein be set forth, to choose all such officers as towns choose in the month of March annually, and said officers shall be enjoined to take the oaths now required to be taken by town officers.

"Examined by Tho^s Clarke, Depty Secry."

SELECTMEN FROM 1754 TO 1890.

In the following list the number of years of service are given; also the first and the last year of service:

Ephraim Flint, 3 years, 1754-57; Ephraim Hartwell, 12 years, 1754-74; Ebenezer Cutler, 6 years, 1754-74; Samuel Farrar, 20 years, 1754-78; John Hoar, 5 years, 1754-71; Nathan Brown, 6 years, 1755-72; Josias Brooks, 5 years, 1756-63; John Gove, 7 years, 1756-65; Samuel Dakin, 1 year, 1756; Timothy Billings, 4 years, 1756-71; John Headley, 1 year, 1757; Benjamin Munroe, 3 years, 1757-79; Timothy Weston, 5 years, 1758-63; Thomas Garfield, 1 year, 1759; Amos Heald, 6 years, 1760-65; John Adams, 8 years, 1764-77; Joseph Adams, 4 years, 1760-74; Abijah Pierce, 12 years, 1760-81; Eleazar Brooks, 9 years, 1764-78; Charles Russell, 1 year, 1770; Joseph Abbott, 2 years, 1770-72; Jacob Fox, 1 year, 1770; Edmund Wheeler, 11 years, 1773-91; Aaron Brooks, 1 year, 1774; William Brown, 1 year, 1775; James Adams, 2 years, 1776-77; Jacob Baker, 1 year, 1778; Samuel Farrar, 13 years, 1779-96; Ephraim Brooks, 1 year, 1779; Samuel Hoar, 17 years, 1780-1809; John Hartwell, 7 years, 1780-1801; David Fiske, 3 years, 1781-83; Timothy Brooks, 1 year, 1780; Humphrey Farrar, 3 years, 1781-86; James Parks, 4 years, 1782-85; Daniel Harrington, 3 years, 1783-85; Daniel Farrar, 1 year; Eleazar Melvin, 1 year, 1786; Elijah Wellington, 1 year, 1786; Richard Russell, 1 year, 1786; Samuel Hartwell, 1 year, 1787; Timothy Brown, 1787; Joshua Brooks, 13 years, 1788-1800; John Perry, 1788; Nathan Weston, 7 years, 1789-96; William Lawrence, 4 years, 1792-96; Bulkley Adams, 1 year, 1793; Gregory Stone, 1 year, 1793; Ephraim Flint, 1797; Ephraim Brown, 9 years, 1792-1809; Leonard Hoar, 8 years, 1800-15; Elijah Fiske, 18 years, 1804-33; Thomas Wheeler, 5 years, 1805-12; Daniel Brooks, 5 years, 1805-15; Charles Wheeler, 4 years, 1816-30; Solomon Foster, 2 years, 1816-17; Ephraim Flint, 1 year, 1817; Charles A. Wheeler, 6 years, 1818-24; Stephen Patch, 9 years, 1819-27; Abel Hartwell, 1 year, 1819; Gregory Stone, 6 years, 1822-27; John W. Warren, 1 year, 1825; Daniel Haynes, 2 years, 1826-27; Calvin Weston, 2 years, 1828-29; James Baker, 6 years, 1828-33; Emery Benis, 1 year, 1830; Amos Hagar, 7 years, 1831-43; George Russell, 5 years, 1834-38; Jonas Smith, 2 years, 1834-35; Samuel Hartwell, 2 years, 1834-35; Leonard Hoar, Jr., 4 years, 1836-39; Daniel Weston, 4 years, 1836-39; Abel Wheeler, 9 years, 1839-47; Aaron Davis, 4 years, 1840-43; Charles L. Tarbell, 9 years, 1844-64; William Foster, 11 years, 1844-59; Henry C. Chapin, 1 year, 1848; Amos Hagar, Jr., 13 years, 1848-70; Francis D. Wheeler, 1 year, 1848; John W. Farrar, 3 years, 1849-52; William F. Wheeler, 26 years, 1849-82; James L. Chapin, 16 years, 1852-75; William Mackintosh, 1 year, 1859; J. Dexter Sherman, 1 year, 1859; George Flint, 3 years, 1865-67; George Hartwell, 3 years, 1868-74; Francis Smith, 2 years, 1868-69; Samuel H. Pierce, 2 years, 1871-72; George H. Smith, 2 years, 1871-72; Andrew J. Drake, 1 year, 1873; John W. Gray, 3 years, 1874-76; William L. G. Peirce, 1 year, 1875; Samuel Hartwell, 15 years, present incumbent; Albion N. Brown, 1 year, 1877; Amos P. Sherman, 5 years, 1878-82; Thomas F. Harrington, 1 year, 1882; Edward C. Foster, 8 years, 1883, present incumbent; George F. Harrington, 8 years, 1883, present incumbent.

TOWN CLERKS.

Ephraim Flint, 3 years, 1754-57; Ebenezer Cutler, 2 years, 1755-59; Samuel Farrar, 8 years, 1758-66; John Adams, 11 years, 1767-77; Abijah Pierce, 3 years, 1778-81; Samuel Hoar, 17 years, 1780-1809; Richard Russell, 4 years, 1783-88; Grovesnor Tarbell, 5 years, 1799-1803; Thomas Wheeler, 3 years, 1804-06; Elijah Fiske, 15 years, 1810-33; Stephen Patch, 6 years, 1822-27; Charles Wheeler, 3 years, 1828-30; George Russell, 5 years, 1834-36; Abel Wheeler, 5 years, 1839-43; Henry C. Chapin, 34 years, 1844-77; James L. Chapin, 13 years, present incumbent, 1878.

TOWN TREASURERS.

Ephraim Flint, 2 years, 1754-56; Samuel Bond, 1 year, 1755; Timothy Wessou, 1 year, 1757; Nathan Brown, 1 year, 1758; John Garfield, 2 years, 1759-60; John Adams, 3 years, 1761-63; Samuel Farrar, 1 year, 1764; Eleazar Brooks, 3 years, 1765-67; Abijah Pierce, 2 years, 1768-69; Thomas Garfield, 1 year, 1770; Jacob Fox, 1 year, 1771; Edmund Wheeler, 14 years, 1772-98; Joseph Parker, 2 years, 1775-76; Ephraim Brooks, 2 years, 1777-78; Samuel Hoar, 6 years, 1779-92; Samuel Hartwell, 1 year, 1780; Bulkley Adams, 3 years, 1797-99; Thomas Wheeler, 17 years, 1829; Leonard Hoar, 7 years, 1804-11; Charles Wheeler, 15 years, 1816-47; Elijah Fiske, 3 years, 1812-14; Joel Smith, 1 year, 1815; Henry Rice, 2 years, 1830-31; Frederick A. Hayden, 1 year, 1832; Charles L. Tarbell, 1 year, 1841; Francis D. Wheeler, 1 year, 1848; William F. Wheeler, 28 years, 1849-84; James L. Chapin, 8 years, 1868-75; Charles S. Wheeler, 6 years, 1885, present incumbent.

¹ This is the date given in the town records. The true date is April 19, 1754.

REPRESENTATIVES.

Chambers Bussell, 11 years, 1754-65; Samuel Farrar, 3 years, 1766-68; Eleazar Brooks, 1774; Chambers Russell, 1 year, 1788; Samuel Hoar, 10 years, 1792-1818; Joshua Brooks, 3 years, 1809-11; Leonard Hoar, 2 years, 1812-14; Wm. Hayden, 2 years, 1815-16; Elijah Fiske, 2 years, 1823-24; Joel Smith, 3 years, 1823-25; Silas P. Tarbell, 3 years, 1827-30; George Russell, 1 year, 1832; Solomon Foster, 2 years, 1833-34; Charles Wheeler, 1 year, 1835; Abel Hartwell, 1 year, 1837; Elisha Hagar, 2 years, 1838-39; Daniel M. Stearns, 2 years, 1841-42; Leonard Hoar, 2 years, 1845-46; William Foster, 1 year, 1850; Daniel Weston, 1 year, 1851; William F. Wheeler, 1 year, 1853; Samuel H. Pierce, 1854. *Under the District System.*—Charles L. Tarbell, 10th Middlesex District, 1861; James L. Chapin, 10th Middlesex District, 1865; Samuel H. Pierce, 10th Middlesex District, 1870; George M. Baker, 20th Middlesex District, 1878; Charles S. Wheeler, 19th Middlesex District, 1890.

COUNCILORS.

Chambers Russell, 5 years; Eleazar Brooks, 11 years.

SENATORS.

Hon. Eleazar Brooks, 9 years; Hon. Samuel Hoar, 3 years, 1813-16.

DELEGATES.

Delegate to the Convention to Frame State Convention.—1779, Hon. Eleazar Brooks.

Delegate to the Convention to Ratify the Constitution of the United States in 1786.—Hon. Eleazar Brooks.

Delegates to the Conventions to Revise the Constitution of the States.—1820, Hon. Samuel Hoar; 1853, William F. Wheeler.

JUSTICES OF THE PEACE.

Chambers Bussell, James Russell, Charles Russell, Eleazar Brooks, Joseph Adams, Chambers Russell, Samuel Hoar, Eleazar Brooks, Jr., Joshua Brooks, Groevoor Tarbell, William Hayden, Charles Wheeler, Elijah Fiske, Stephen Patch, Abel Wheeler, Constant F. Minns, William Foster, James L. Chapin, Geo. H. Smith, Charles S. Wheeler.

CHAPTER XLVIII.

LINCOLN—(Continued).

College Graduates—Physicians—Educational—Burial—Places.

COLLEGE GRADUATES.¹—Stephen Farrar, son of Dea. Samuel and Lydia (Barrett) Farrar, born Sept. 8, 1735; graduated in 1755, and was ordained first minister of New Ipswich, N. H., Oct. 22, 1760, and continued the only minister of that town until his death, June 23, 1809. He married, Nov. 29, 1764, Eunice Brown, daughter of Isaac and Mary (Balch) Brown, of Waltham. They had a family of thirteen children, twelve of whom survived him, married and had families of their own. Mrs. Eunice Brown Farrar died Sept. 9, 1818. His pastorate was a long and an eminently successful one.

Timothy Farrar (Hon.), brother of the preceding, born June 28, 1747, graduated in 1767, studied law and settled in New Ipswich, New Hampshire, and became eminent in his profession. For more than forty years he was a judge in the Supreme and Common Pleas Courts of the State of New Hampshire. He was four times chosen an elector of President and Vice-President of the United States, and was

for many years a trustee of Dartmouth College. He married, Oct. 14, 1779, Anna Bancroft, daughter of Capt. Edmund and Mrs. Rachel H. (Young) Bancroft, of Peppereli. They had a family of one son and three daughters. Mrs. Anna (Bancroft) Farrar died May 1, 1817. Judge Timothy Farrar died Feb. 21, 1849, aged 101 years, seven months and twelve days.

"Long did his golden lamp in splendor burn:
Sero in Caelum / late to heaven return."

Rev. Joseph Farrar, son of George and Mary (Barrett) Farrar, born June 30, 1744; graduated at Harvard, 1767, and was ordained at Dublin, N. H., when the church was organized, June 10, 1772. He was dismissed June 7, 1776, and installed at Dummerston, Vt., in 1779; dismissed, 1783, and settled at Eden, Vt., where he remained three years. He married, July 28, 1779, Mary Brooks, of Grafton, Mass., and died in Petersham April 5, 1816.

Jonathan Gove, M.D., son of John and Tabitha (Livermore) Gove, born August 22, 1746; graduated, 1768; studied medicine, and settled in Groton, where he married and two of his children were born. He removed to New Boston, N. H., and in 1794 moved to Goffstown, N. H. He married, in Groton, Mary Hubbard, and in Goffstown Polly Dow, and died in Goffstown March 24, 1818.

Moses Brown, son of Isaac and Mary (Balch) Brown, was born in Waltham, April 6, 1748. His father died in 1759, and his mother married, May 22, 1760, Nathan Brown, of Lincoln, and brought her children to her new home. Hence he is said to be of Lincoln. He graduated in 1768; taught school in Framingham, Lexington and Lincoln. In 1772 he engaged in trade in Beverly. On the breaking out of the Revolutionary War he raised a company which was attached to Col. Glover's regiment, and was engaged in the battle of Trenton. After the term of the enlistment of this company had expired he returned to Beverly and engaged in trade, and acquired an ample fortune. He married—first, Elizabeth Traak, and second, Mary Bridge, and died in Beverly June 15, 1820.

Jonas Hartwell, son of Ephraim and Elizabeth (Heywood) Hartwell, born June 26, 1754; graduated in 1779. He engaged in mercantile pursuits; went to Bilboa, in Spain, was arrested and confined in prison by order of the Holy Inquisition. After several months' imprisonment he was released upon the request of the President of Congress. He died soon after his release, as was supposed, from prison.

Nathaniel Pierce, son of Col. Abijah and Thankful (Brown) Pierce, was born Sept. 27, 1754, and graduated in 1775. He engaged in trade in Boston, and died in Watertown Dec. 30, 1783. He married—first, Polly Fiske, and second, Elizabeth Cheever.

Abel Flint, son of Ephraim and Ruth (Wheeler) Flint, was born June 22, 1758, and graduated in 1780. He taught in Lincoln and Haverhill, and died in Lincoln Jan. 25, 1789.

¹Where no other college is mentioned they were graduates of Harvard.

William Brooks, son of Joshua, Jr., and Hannah (Simonds) Brooks, was born March 13, 1757, and graduated 1780. He was a successful merchant in Augusta, Me. He married, June, 1780, Mrs. Susanna Howard, and died May 12, 1824.

Daniel Stone, son of Gregory and Hepzibath (Brooks) Stone, baptized in Lincoln June 7, 1767; graduated in 1791, and was ordained at Hallowell, Maine, October 21, 1795, and was dismissed by mutual consent in 1809. He afterwards held the offices of justice of the peace and treasurer of the county of Kennebeck. He married, August 27, 1800, Susanna Williams, of Easton, Mass., and died May, 1834.

Samuel Farrar, eldest son of Samuel and Mercy (Hoar) Farrar, born December 12, 1773; graduated 1797; was tutor in Harvard, 1800; studied law and settled in Andover. He was treasurer of the Theological Institution and president of the bank for many years. He married, October 30, 1814, Mrs. Phœbe (Edwards) Hooker, and died in Andover in 1864.

John Farrar, a brother of the preceding, born May 1, 1779; Harvard University, 1803; LL.D. Bowdoin, 1833; tutor in Harvard two years, 1805-07, and was appointed Professor of Mathematics and Natural Philosophy in 1807, the duties of which position he discharged with ability and success for twenty-nine years. During those years he published several valuable scientific treatises, and was a frequent contributor to the *North American Review* and the *Memoirs of the American Academy of Arts and Sciences*, of which he was secretary and vice-president. Professor Farrar married, 1st, Lucy, daughter of Rev. Dr. Buckminster, of Portland, and 2d, Miss Eliza Rotch, an English lady, and died in Cambridge May 8, 1853, leaving no children.

Hon. Samuel Hoar, son of Hon. Samuel and Susanna (Pierce) Hoar, born in Lincoln, May 18, 1778, graduated in 1802, LL.D., Harvard University, 1838. He studied law with Hon. Artemas Ward, and was admitted to the bar in 1805, and commenced his professional career in Concord the same year, and was a leading member of the Massachusetts bar for more than forty years. He was a member of the convention for revising the Constitution of the State in 1820, Senator 1825 and 1832, and member of the Executive Council, 1845 and 1846, and was a member of the Legislature in 1850.

"In 1844 he was appointed by Governor Briggs, in accordance with a resolve of the Legislature of Massachusetts, a commissioner to proceed to Charleston, South Carolina, to test in the Court of the United States the constitutionality of an act passed by the Legislature of South Carolina of the 20th of December, 1835, legalizing the imprisonment of colored persons who should enter their boundaries. Mr. Hoar accepted this new duty and left home accordingly in November, 1844, for Charleston, reaching that city on the 28th of that month. So utterly unsuspecting

was he of giving offence that his young daughter accompanied him. On his arrival at Charleston, and making known the object of his visit, such was the excitement against him, on account of the object of his mission being deemed by the people of the place an unwarrantable interference with their State rights, that he was obliged to leave the city, and he returned to Massachusetts without fulfilling the object of his mission."

One of Mr. Hoar's biographers has said: "The mission was attended with no other result than to disgrace the people of Charleston, and aggravate the increasing hatred between the two sections of the country." But this seems to be an inadequate conception of the results which flowed from Mr. Hoar's mission to South Carolina. Up to 1844 it had been claimed by the slaveholders and pro-slavery men that the Constitution and laws of the United States sanctioned slavery, and that the abolitionists were seeking to overthrow the government. But when Mr. Hoar, a most learned and courteous gentleman of sixty-five years, went to South Carolina on an errand as peaceful as the mission of Jesus, with no other escort or attendant than his own daughter—an amiable and intelligent young lady—only to be told by the "Respectable gentlemen of Charleston" that he could not be secure from the insults and violence of a mob, even in the citadel of Southern chivalry—the tables were turned, and the sober and self-respecting men of the North were able to see at a glance who the law-abiding, and who the law and gospel-defying people were, and the result of his mission was to arouse the people of the North to gigantic efforts for the overthrow of slavery—or, in the expressive language of the time: "It drove a whole cask full of nails into the coffin of slavery."

He married, October 13, 1812, Sarah Sherman, daughter of Hon. Roger and Rebecca (Prescott) Sherman, of New Haven, Connecticut, and died in Concord, November 2, 1856. They had the following children: Elizabeth, born July 14, 1814. Ebenezer Rockwood, born February 21, 1816; Harvard University, 1835; LL.B., 1839; a distinguished counselor and judge; married, November 26, 1849, Caroline Downs Brooks, daughter of Hon. Nathan Brooks, of Concord. Sarah, born November 9, 1817; married Robert Boyd Storer, a merchant of Boston. Edward Sherman, born December 22, 1823; Harvard University 1844. George Frisbie, born August 9, 1826; Harvard University, 1846; LL.B., 1849; settled in Worcester and is a Senator in Congress.

Hon. Nathan Brooks, son of Joshua and Martha (Barrett) Brooks, born in Lincoln, October 18, 1785; graduated in 1809; studied law and settled in Concord. He was a member of the Massachusetts House of Representatives from Concord for the years 1823, 1824 and 1825; was a Senator for the county of Middlesex for the years 1831 and 1835, and a member of the Governor's Council from May, 1829, to May, 1831.

In 1838 he was nominated by the Whigs to represent the Middlesex District in Congress, but was defeated by the Hon. William Parmenter.

Upon the incorporation of the Middlesex Mutual Fire Insurance Company, in 1826, he was chosen its secretary and treasurer, and discharged the duties of those offices with distinguished ability and fidelity until his death. He was for many years largely engaged in settling the estates of deceased persons.

He married, first, Caroline Downs, and second, Mary Merrick, and died in Concord, December 11, 1863.

He had a daughter, Caroline Downs Brooks, now the wife of Hon. E. Rockwood Hoar, and a son, Hon. George Merrick Brooks, Judge of Probate for the county of Middlesex.

Nathaniel Pierce Hoar, son of Hon. Samuel and Susanna (Pierce) Hoar, born Sept. 2, 1784; Harvard University, 1810; studied law with his brother in Concord and commenced practice in Portsmouth, N. H., in 1813. He died of consumption in Lincoln, May 24, 1820.

Thomas Fiske, son of Elijah and Anna (Harrington) Fiske, born October 26, 1800; Harvard University, 1819; studied law and began his professional business in Charleston, S. C., 1826, and died at Pineville, S. C., August 30, 1831.

William Lawrence Stearns, son of Rev. Dr. Stearns, born October 13, 1793; Harvard University, 1820; studied divinity and was ordained at Stoughton, November 21, 1827. He subsequently sustained pastorates in Rowe and Pembroke. He married, June 5, 1828, Mary Munroe, daughter of Isaac and Grace (Bigelow) Munroe, and died in Chicopee, May 28, 1857. Mrs. Mary (Munroe) Stearns died in Cambridge, March 2, 1890. Hon. George M. Stearns, of Chicopee, and Albert B. Stearns, appraisers' office, Boston Custom-house, are his sons.

Daniel Mansfield Stearns, twin brother of the above; Brown University, 1825; studied divinity and was ordained at Dennis, May 21, 1828, and continued in the ministry eleven years, and returned to his native town in 1839. He married, in 1825, Betsey Munroe, sister of his brother William's wife, and died in Lincoln, October 19, 1847. He had a family of three sons and one daughter. One of his sons, Edwin M. Stearns, is a clerk in the custom-house, Boston. The other children died young.

Joseph Green Cole, son of Capt. Abraham and Martha (Green) Cole, born in Lincoln, March 16, 1801, and graduated at Harvard University, 1822. He studied law one year with Gov. Lincoln, in Worcester, and finished his studies with Gov. Enoch Lincoln, in Maine, and was admitted to the bar in 1826, and immediately opened an office in Paris, Me. He was secretary of the State Senate, member of the Legislature, clerk of the courts, and register of deeds for Oxford County, and judge of the District Court, which latter office he held at the time of his death. "He was a man of distinguished ability,

great industry and exalted character, and no death in Oxford County was ever more generally regretted." He married, February 12, 1834, Mehitable M. Marble, and died November 12, 1851.

George Fiske, son of Elijah Fiske, Esq., born August 22, 1804; Brown University, 1825, and was an Episcopal minister at Oriskany and Rome, N. Y., and Richmond, Ind., where he died February, 1860. He married Sophia Northrop and had a daughter, Theresa, born 1842, and married in 1864 to Col. W. W. Dudley, of the Union Army.

Humphrey Farrar, son of Humphrey and Lucy (Farrar), born September 15, 1773; graduated Dartmouth College 1794, and died July, 1840.

Joseph Farrar, brother of the preceding, born February 24, 1775; graduated as classmate of his brother, and settled as a lawyer in Chelsea, Vt., afterwards removed to Wolfborough, N. H. He married Mehitable Dana, and died in New York February, 1851.

George Farrar, brother of the preceding, born October 16, 1778; graduated at Dartmouth College in 1800, and settled as a physician in Derry, N. H., where he obtained an extensive practice and was eminently successful in his profession. He married, 1st, Sarah Prentice and 2d, Hannah Crocker.

William Farrar, another brother, born September, 13, 1780; graduated at Dartmouth College 1801, and settled in Lancaster, N. H., as a lawyer. He married, 1st, Margaret Kibbe and 2d, Tryphena Burgio, and died in Lancaster, N. H., March 3, 1851.

Charles Stearns Wheeler, son of Charles and Julia (Stearns) Wheeler, born December 19, 1816; Harvard University, 1837. After his graduation he taught a classical school in Cambridge one year and was four years tutor in Greek in the university. During these years he studied for the ministry and was licensed to preach by the Cambridge Association and preached at Brookline, Medford, Concord and Lincoln. He published a Greek Reader in 1840, and an edition of Herodotus with English notes in 1842.

On the 1st of August, 1842, he sailed from New York for Havre, intending to spend a year in study and travel in Europe. He spent the following winter in Heidelberg, and early in the spring visited Göttingen and reached Leipsic early in April, where he was arrested by disease and died. During his sickness he was tenderly cared for by his friend, Mr. John Francis Heath.

The following inscription, prepared by President Felton, appears on his monument in the college lot in Mount Auburn:

"CHARLES STEARNS WHEELER,
a graduate of the class of 1837.
Born in Lincoln, Mass., December 19, 1816.
Died in Leipsic, Saxony, June 13, 1843.

He was four years an able and faithful instructor in Harvard University. To the learning of the scholar he added the piety of the Christian. Ardent and indefatigable, in a short life he did the work of many years. Simple in manners, pure in heart, affectionate in disposition, he was beloved by all who knew him. While pursuing his studies in a foreign

country he was attacked by the disease which ended his life. His remains, restored to his native land, rest here."

George Farrar, son of Deacon James and Dorcas (Chapin) Farrar, born July 9, 1818; Amherst College, 1839; Harvard Law School, 1844, and settled in Charlestown. He married, 1848, Julia Carlton, and died of consumption at Aiken, South Carolina, January, 1852, and was buried in Mount Auburn. He was a man of large frame, fine physical development, and universally esteemed for his genial nature and social qualities.

Rev. Charles Hartwell, son of Samuel, Jr., and Mary (Hagar) Hartwell, born December 19, 1825; Amherst College, 1849; studied theology in East Windsor (Connecticut) Theological Seminary, and was ordained as an evangelist at Lincoln, October 13, 1852. He married, September 6, 1852, Lucy Estabrooks Stearns, and in November following sailed under appointment of the A. B. C. F. M. for Foo Chow, China, where he has successfully labored for more than thirty-six years, revisiting his native land only once. Mrs. Lucy E. (Stearns) Hartwell died July 10, 1883.

One of their sons, Charles S. Hartwell, born September 3, 1885, graduated at Amherst College, 1877. Their daughter, Emily S., born April 7, 1859, was educated at Wheaton Seminary, and is assistant missionary to her father, especially for the instruction of women and girls.

Rev. John Hartwell, brother of the preceding, born December 20, 1827; Amherst College, 1855; studied in the East Windsor Seminary and was ordained pastor of the church in Leverett, in 1859, where he remained about five years. He was pastor of the church in Becket six years, and pastor in Southbury, Conn., seven years. He married, June 20, 1860, Sarah W. Southmayd, of Middletown, Conn., and died in Southbury, December 13, 1878.

Rev. Ephraim Flint, D.D., son of Major Ephraim and Susan (Bemis) Flint, born November 29, 1828; took a preparatory course of study at Phillips Academy, Andover, and Lawrence Academy, Groton, and graduated at Williams College in 1851. He taught the academy in Orleans and the high schools of Lynn and Lee, and obtained an excellent reputation as a teacher. After teaching nearly fourteen years, he pursued a theological course in the seminary at Andover, and was ordained pastor of the Congregational Church in Hinsdale in the autumn of 1867, where he remained until his death.

He married, April 7, 1857, Miss Orilla J. Hagar, of Lincoln, and died suddenly, in the evening of November 28, 1882—the day that completed the fifty-fourth year of his life.

Dr. Flint was a man of great industry and of singular beauty and purity of life and character. Possessing a large share of sound common sense and a sweet disposition—gifted with the talents and graces which adorn the ministry—he was one who might well inscribe on his banner

"I am a soldier of the Cross,
A follower of the Lamb,"

and engrave on his shield the legend of Sir Hildebrand,

"My strength is as the strength of ten,
Because my heart is pure."

Cornelius Fiske, son of Esq. Elijah and Mrs. Bathsheba (Brooks) Fiske, born March 24, 1830; A.B. Harvard University, 1853; studied law in the offices of Hon. F. B. Hayes and Messrs. Hutchins and Wheeler in Boston, and was admitted to the Suffolk bar in 1855. Immediately after his admission to the bar in Boston he went to New York and entered the office of Messrs. Benedict, Burr & Benedict, and six months later was admitted to practice in all the courts of New York and the District and Circuit Courts of the United States, and opened an office at 37 Wall Street, May 1, 1856.

He married, August 25, 1858, Mary Amanda, daughter of Henry B. and Mary E. Greenwood, and has two sons and four daughters.

Lewis Everett Smith, son of Cyrus and Tryphena (Brooks) Smith, born Jan. 2, 1831; graduated Brown University, 1853. He taught the high school in Portsmouth, N. H., and subsequently established Smith's Academy and Commercial College there, of which he is principal. He married, June 17, 1856, Eliza Abbott, of Charlestown.

Dr. George Grosvenor Tarbell, son of Charles L. and Martha E. (Fiske) Tarbell, born September 9, 1841; A.B., Harvard University, 1862; M.D., 1865. He served as assistant surgeon in the Union Army in 1865, and has since been a practicing physician in Boston and a member of the staff of the Massachusetts General Hospital, 1868 to 1889.

Dr. Leonard Wheeler, son of Abel and Charlotte (Bemis) Wheeler, born August 31, 1845; fitted for college at Exeter, N. H., and graduated A.B., 1866, M.D., 1867; was in the Massachusetts General Hospital one year, 1869-70. Since 1870 he has been a successful practitioner in Worcester.

Charles Francis Tarbell, son of Charles L. and Martha E. (Fiske) Tarbell, born May 6, 1853; Harvard University, 1873. Since his graduation he has been engaged in manufacturing and mercantile pursuits. He married, June 6, 1883, Ida Adams, daughter of C. C. Adams, of Brooklyn. They have two children—Sarah Adams and George Grosvenor (3d).

Frank Webster Smith, son of Francis and Abigail E. (Baker) Smith, born June 27, 1854; fitted for college in the public schools of Lincoln and Phillips Academy, and graduated in 1877. He taught classics and mathematics four years in Atlanta University, Georgia; pursued a post-graduate course at Harvard two years, and since 1883 has been a teacher in the State Normal School at Westfield.

Edward Irving Smith, son of Cyrus G. and Emily (Huddleston) Smith, born October 20, 1862; fitted for college in the public schools of Lincoln, and grad-

uated Harvard University, 1885. He was a private tutor one year, and graduated at the Law School in 1889. He attained a high rank, both in the academic and professional departments of the University.

Edward Francis Hodges, son of Edward Fuller and Anne Frances (Hammatt) Hodges, born August, 1851; Harvard University, 1871; M.D., 1876; settled in Indianapolis, Ind., where he is a successful practitioner.

George Clarendon Hodges, brother of the preceding, born October 14, 1857; Harvard University, 1877; studied law and entered on his professional career in Boston in 1880.

George Henry Flint, son of George and Caroline A. (Rice) Flint, born January 25, 1835; graduated at Williams College, 1886. After his graduation he taught in the academy at Peekskill, N. Y., and is now an instructor in Williams College.

PHYSICIANS.—Dr. John Binney lived in that part of Weston which became a part of Lincoln upon incorporation of the town in 1754. He was son of Deacon John and Hannah (Paine) Binney, and was born in Hull April 23, 1705. He married, October 21, 1726, Hannah Jones, and settled in Mendon as a physician, and afterwards removed to Weston. He died in Lincoln August 14, 1760. His widow married, October 30, 1765, Captain Daniel Adams, and died June 11, 1776.

Dr. Charles Russell, son of Hon. James and Catharine (Graves) Russell, was born in Charlestown, December 27, 1738. He graduated at Harvard, 1757, and received a medical degree at Aberdeen. After the death of his uncle, Hon. Chambers Russell, in 1767, he came to reside and practice in Lincoln. He was a Loyalist, and left Lincoln on the 19th of April, 1775. He subsequently went to the West Indies, and died at Antigua May 27, 1780. He married, February 15, 1768, Elizabeth Vassal, daughter of Henry and Penelope (Royal) Vassal, of Cambridge. They had four daughters born in Lincoln: Penelope, born March 17, 1769; married, November 7, 1808, Hon. Theodore Sedgwick; died May 18, 1827. Elizabeth Vassal, born January 10, 1771; married, June 12, 1797, Charles Furlong Degen; died in Marion County, Miss., August 28, 1824. Catharine Graves, born January 9, 1772; died unmarried in Roxbury September 5, 1847. Rebecca, born February 20, 1773; married, first, November, 1793, David Pierce; married, second, Joseph Ruggles, and died in Philadelphia December 15, 1825. Mrs. Elizabeth (Vassal) Russell died in Plymouth February 23, 1802.

Dr. Oliver Mann, son of Ebenezer and Mary (Gould) Mann, was born in Wrentham June 5, 1756. He practiced in Lincoln between 1777 and 1783. He was a surgeon in the Revolutionary Army, and, after the close of the war, removed to Castine, Me. He represented Castine in the Massachusetts Legislature in 1798, 1802, 1803 and 1807, and died in Castine July 4, 1832. He married Lucy, daughter of John and Lucy (Hubbard) Adams. They had several children,

two of whom were born in Lincoln: Nancy, born April 25, 1780; Lucy, born September 1, 1781.

Dr. Richard Russell, son of Richard and Mary (Cary) Russell, was baptized in Charlestown February 24, 1750. He served an apprenticeship at the tanner's trade with Deacon Joshua Brooks in Lincoln. On the morning of the day he became of age he rose early, washed his hands thoroughly, and made a vow never to put them into the tanyard again. He immediately commenced the study of medicine, and subsequently commenced practice in Lincoln. He married, July 28, 1777, Elizabeth, daughter of Nathan and Rebecca (Adams) Brown, of Lincoln. He was drowned by the upsetting of a boat in Beaver Pond, August 12, 1796. His widow died May 18, 1838. They had a family of six sons and three daughters. Of the sons, James was a dry-goods merchant in Boston, and George was a physician. The other children died young or unmarried.

Dr. Grosvenor Tarbell, son of Lieutenant John, Jr., and Susanna (Hobbs) Tarbell, was born in Sturbridge February 3, 1768, and graduated at Yale College, 1793. He studied for his profession in Boston, and came to reside and practice in Lincoln in 1796. He received a degree, A.M., Yale, 1806, and an honorary degree, A.M., Harvard University, 1810. He married, August 25, 1801, Thankful, daughter of Hon. Samuel and Susanna (Pierce) Hoar. He was eminently skillful and successful in his profession, an excellent town officer and an enterprising and useful citizen. He died, universally lamented, March 19, 1822. His widow died February 7, 1861. They had the following children: Louisa, born May 23, 1802; died July 17, 1825. Sarah (name changed by Legislature to Sarah Harding), born September 16, 1803; died, unmarried, October 19, 1866. Lucia, born July 27, 1805; married, June 10, 1830, Stephen Swift. George Grosvenor, born June 10, 1807; died December 23, 1889. Jane, born January 24, 1810; died December 22, 1888. Charles Lee, born January 22, 1812; married, on December 25, 1838, M. E. Fiake; died December 24, 1889. Mary Elizabeth, born August 27, 1814; died August 30, 1818.

Dr. George Russell, son of Dr. Richard and Mrs. Elizabeth (Brown) Russell, born Sept. 23, 1795; graduated at the Harvard Medical School in 1820, and commenced practice in Lincoln in 1822. He removed to Waltham in 1838 and soon after to Boston, where he obtained an extensive practice. He bequeathed his library (except the medical books) to the town of Lincoln; also \$1000, the annual income of which is to be expended for the purchase of books for the public library. He married, December 5, 1826, Miss Hannah Green Cole, daughter of Capt. Abraham Cole, of Lincoln, and died in Boston, February 18, 1883. Mrs. Hannah Green Cole Russell died in Boston in 1882. They had one daughter, Ellen Louisa, born in Lincoln, September 11, 1828, and died in Boston, November 11, 1854.

Dr. Henry C. Chapin, son of James and Apuma (Parsons) Chapin, was born in Greenwich, N. Y., December 25, 1815. He was educated at the academies of Monson and Amherst, and graduated at the Berkshire Medical College, Pittsfield, in 1840. Immediately after graduating he came to reside and practice in Lincoln, and still continues in the active duties of his profession. He married in Southbridge, December 30, 1840, Lydia Bacon. They had a family of three sons and two daughters.

SCHOOLS AND SCHOOL-HOUSES.—At the time of the incorporation of the town there were within its limits three school-houses, one near what is now the Snelling place, one near the railroad crossing on the South Road and one on the Common near the old chestnut tree, now standing. Soon after the incorporation of the town school-houses were built in the north and east parts of the town seemingly partly at the expense of the town, and partly by contributions of labor and materials from persons living in those localities. The first recorded action in relation to schools was taken September 2, 1754, when it was "Voted, that there shall be a moving-school kept in said town, and to remove to three several places, and that the selectmen provide a schoolmaster;" but the payments do not seem to be in accordance with this vote, Samuel Farrar and Amos Heald being paid, February 14, 1755, £1 2s. 8d. each for teaching school, and Timothy Wesson, Jr., and Ephraim Flint were paid, March, 1754, £2 13s. 4d. each for teaching school two months. In the following years a movable school was usually kept, the teachers going from one house to another, according to the directions of the selectmen.

Mr. Joseph Brooks, who died September 17, 1759, after giving legacies to the church in Lincoln, to Rev. William Lawrence and various relatives, devised the remainder of his estate to the town of Lincoln, "the income therefrom to be applied to the support of a grammar-school in said town forever." The amount received was £388. As there were no books on English grammar then in existence, the words "grammar-school" were construed to mean a Latin school, and for more than sixty years the income of the legacy was paid only to such teachers as were qualified to give instructions in Latin and Greek. This led to a more general employment of graduates and undergraduates of colleges, and tended to elevate the character of the schools. Among the teachers in the last century were Stephen Farrar, Timothy Farrar, Jacob Bigelow, Micah Lawrence, Joseph Willard, Abel Flint and Fisher Amea, all graduates of Harvard, and in later times Rev. Drs. Lamson, Hosmer and Hill.

The Liberal School, an institution differing in no respect from the academies of the time, was established in 1792, and Mr. Stearns became its first preceptor. The origin of the school was on this wise: During the middle and latter part of the last century many

families from Middlesex County removed to the border towns of New Hampshire and Vermont. Amongst the first settlers of New Ipswich, Stephen Farrar, its first minister, and Timothy Farrar, its first lawyer, were from Lincoln. The wife of Dr. John Preston, its first distinguished physician, was a sister of the Farrars. Other men and families from Lincoln emigrated to the same place. After the close of the Revolutionary War the people of New Ipswich, feeling the need of better facilities for the education of their children, projected and established the New Ipswich Academy, which afterwards became one of the best educational institutions of the State. The articles of the associate founders were signed in 1787, and the school was opened the same year. Five of the thirty-two original members of the association were natives of Lincoln. During the three following years several young ladies of Lincoln, who had relatives in New Ipswich, attended the academy there. The fame of the academy, and the superior advantages enjoyed there, led the people of Lincoln to wish for a similar school here, and in 1792 articles of association, similar to those of the founders of the New Ipswich Academy, and probably drawn by the same hand, were signed by twenty-one of the leading men of Lincoln, under the name of "The proprietors of the Liberal School in Lincoln." The names of the proprietors, in the order in which they first appear, were Abijah Peirce, Edmond Wheeler, Eleazer Brooks, Joseph Adams, John Codman, Samuel Hoar, Samuel Farrar, Daniel Brooks, Joshua Brooks, William Lawrence, Bulkley Adams, Leonard Hoar, Abner Mathies, John Adams, Zechariah Smith, Ephraim Flint, Ephraim Weston, Andrew Adams, Isaac Monroe, Elijah Fiske.

A house was built and the school opened in the spring of 1793. Instruction was given in rhetoric, astronomy, the higher branches of mathematics, and in the principles of religion and morality, text-books being prepared by Dr. Stearns and transcribed by the pupils. Instruction was also given in Latin and Greek, and particular attention paid to manners and morals of the pupils. This school gave a new impulse to the cause of education and tended to elevate the character of the town. The first exhibition was given September 27, 1793, Misses Anna Harrington, Hannah Fiske and Susannah Hoar being assigned the highest parts. The innovation of allowing young ladies to speak in public caused considerable discussion and some censure, but Dr. Stearns was able to sustain himself and his school. If any other town in Middlesex County led the way of allowing young ladies to speak in public on the stage, let it be proclaimed. If any one knows of any evils arising from the custom inaugurated here, let him cry out.

The school continued in successful operation about fifteen years. In it, under the tuition of Dr. Stearns, Samuel Farrar, Esq., Prof. John Farrar, Hon. Samuel Hoar, Hon. Nathan Brooks, Nathaniel Bemis, Francis Jackson, Dr. Winslow Lewis, and Rev. Cyrus Peirce,

better known as "Father Peirce"—the first principal of the first Normal school established in the United States—were prepared for admission to Harvard. Prof. Farrar and Father Peirce were known throughout the land for their great attainments in knowledge and eminent abilities as teachers. How much they were indebted to their early preceptor for their success in after life the muse of history saith not. It is presumable that they got a good start.

In 1810 the building was sold to the town, and was used for a school-house until 1872, when the present high school building was erected at a cost of \$8000. In 1852 a high school was established and the lower room of the town hall fitted for a school-room. After the removal of the high school to the new building the room was used for the public library until the erection of the present library, the munificent gift of Mr. George G. Tarbell, in 1884.

The town was never divided into school districts, and the difficulties which attend the abolition of the district system were unknown here. Seventy years ago the examinations of the schools were usually attended by as many as could find sitting-room, and sometimes by more than could find standing-room, and jealousies were engendered if one school or teacher was praised or censured more than another.

Sixty years ago Mr. Shattuck wrote: "Lincoln has always given liberal support to her common schools and has been rewarded in the distinguished character of its educated sons." As it was in the beginning so is it now, and so may it be forever.

BURIAL-PLACES.—Soon after the incorporation of the precinct, Mr. Ephraim Flint gave an acre of land for a burial-place, and Mr. Jonathan Gove, who died in 1747, was the first person buried in it. Soon after the incorporation of the town, Deacon Samuel Farrar purchased and presented to the town an acre of land near the meeting-house for a burying-ground.

In 1832 the town bought of the heirs of Abraham Cole about an acre of land for a third burying-ground. This place was not well or wisely chosen, being a triangular piece of ground bounded on all sides by highways. In 1882 Mr. George F. Bemis gave upwards of ten acres of ground to enlarge the oldest cemetery. Mr. Bemis' gift had an intrinsic value far beyond the cost of the land. The town had struggled for two years over the question of a new cemetery, and had several meetings without being able to agree upon a location. Mr. Bemis settled the matter quietly and in the best way. No other spot possesses such peculiar attractions and associations. There the spring comes early and the summer stays long, and nature has done her part to make it a beautiful resting-place for the dead. There 'neath grass-grown graves and moss-covered stones repose the founders of the church and town. There too, victors and victims of the first battle of the Revolution sleep in kindred dust and have memorial stones.

BIOGRAPHICAL.

HON. ELEAZER BROOKS.

In the early history of the town and the subsequent years of the Revolutionary War no man rose higher in the esteem of his fellow-citizens, or exerted a more commanding influence in the affairs of the town and councils of the State, than Gen. Eleazer Brooks. In the discussions and contests about the Stamp Act, the Writs of Assistance and the declaration of the English Ministry, "That the Parliament had, and of right ought to have, power to bind the Colonies in all cases whatsoever," he came early to the front, and maintained his position there to the close of the war and the century. He was commissioned by Gov. Barnard, May 11, 1768, a lieutenant in the company in Lincoln commanded by Captain Abijah Pierce, and a captain by Gov. Hutchinson, July 13, 1773. When a collision between the Colonies and the British Parliament became inevitable, he returned his commission to the Royal Governor, and was present at Concord on the 19th of April following as a private citizen. From the breaking out of the war in 1775, to the adoption of the State Constitution in 1780, the Colony of Massachusetts Bay, in New England, had no executive officer styled Governor, the executive powers being exercised by "The Major part of the Council." By the Council he was appointed colonel of the Third Regiment of the Middlesex troops, February 14, 1776, and a brigadier-general October 15, 1778, and re-appointed to the same office under the new Constitution, August 22, 1780.

The laborious duties which his military offices imposed upon him were performed with marked ability and precision. He was cautious and considerate in the formation of his plans, prompt, diligent and persistent in the execution of them—elements essential to success in all the great enterprises of life. To him, to resolve was to do, and seldom, if ever, did he fail to accomplish his purpose.

Once, and only once, as far as can be ascertained, was he ever accused of any neglect of public duty. On the 10th of November, 1779, the Council sent him a letter, censuring him for not forwarding to General Washington "certain recruits enlisted at Medford, within the limits of your brigade, who are greatly needed for the public service, and are said to be loitering about in idleness, instead of being at the place of rendezvous." Gen. Brooks promptly asked for a committee of investigation, and his request was as promptly complied with. Nine days after the committee reported as follows:

"The committee appointed by this board on the Hon^{ble} Brigadier Brooks' memorial of the 11th inst., have attended that service, heard the Hon^{ble} Gentleman on the subject matter thereof, inspected the public orders which the said Brigadier issued in conse-

quence of an order of the General Assembly of the ninth of October last, and are unanimously of the opinion that said Brigadier has in this instance acted up to his duty as a General officer, and fully complied with the order aforesaid, and should be exonerated from all blame," which report was unanimously accepted.

He was elected a representative to the Colonial Legislature in 1774, and continued by successive elections either a member of the House of Representatives, the Senate or the Executive Council, for twenty-seven years. In 1801 he declined a re-election, and retired to private life. The journals of the House of Representatives and Senate, and the records of the Council, show that he was an active and influential member, seldom absent from the sessions, except when engaged on his military expeditions. He was appointed a justice of the peace in 1777, and special justice of the Court of Common Pleas March 27, 1786. He was a delegate to the convention to form a Constitution for the State at Cambridge in 1779, and a delegate to the convention at Boston in 1788 to ratify the Constitution of the United States. He was often appointed on committees for laying out and constructing roads, and many times engaged in settling the estates of deceased persons.

In reviewing the life and services of Gen. Brooks it is not easy to find a standard by which to measure him, or a man among the natives of the town to compare him with, unless it be Judge Timothy Farrar. Both typical men—typical Puritan gentlemen—both were eminently soldiers of the cross, and followers of the Prince of Peace. Both were conservatives of the strongest kind in matters of faith and doctrine; both progressive and aggressive in asserting the rights of man, and advocating the independence of the nation; both gave many years of their lives to the public service, and enjoyed the confidence and respect, the love and esteem of their fellow-citizens, from the beginning to the end of their careers.

In other respects they greatly differed. Judge Farrar was educated in the best schools and highest institutions of learning in the land, enjoying the counsels and assistance of an elder brother, who had graduated at Harvard and was settled in the ministry in the town and State of their adoption, while Gen. Brooks had no other opportunities for education than those afforded by the common schools of the time, and, for some unexplained reason, we read that his opportunities there were not equal to those of other boys of his age and time. Little owed he to school or college, or the teachings of other men—all to the brightness of his own genius, his unquenchable thirst for knowledge, and his indomitable pursuit of it under difficulties. How he acquired his knowledge let his pastor tell: "He was necessitated to be his own preceptor. He was accustomed to read the best books, and then, as opportunities offered, to converse with intelligent men concerning them. With this

judicious project ever in view, notwithstanding all the disadvantages under which he labored, he acquired a valuable fund of knowledge. To classical knowledge, indeed, he made no pretensions, having never learned any other language than the English. In the art of reasoning he was expert, and deeply read in the philosophy of the mind; he appeared to possess those branches of science systematically, and to meet any man on equal grounds of dispute. He never suffered himself to dispute with heat or acrimony. His object was to state points fairly, and analyze them accurately, with the single view of discovering truth. Those who at any time complained of his manner of treating subjects used generally to say he was too attentive to the niceties of logic and metaphysics; *i. e.*, he examined his subject too minutely and accurately. If this be a fault, it must be confessed it is one in which disputants are not accustomed to err. In one instance, then, it may be excused. Or, rather, should it not be commended as a virtue? He had a competent share of mathematical knowledge. This he must have obtained without any living preceptor, his own genius excepted. In theology he was not merely conversant, but deeply versed in the science. He not only knew his duty as a Christian, but was acquainted with the different schools—knew their characteristic opinions, their modes of defending them, and their points of controversy one with another. Few men could more ably defend their own sentiments, or treat with more candor the arguments and opinions of others. He held truth without persecuting error. He strenuously maintained his own faith, yet discovered no animosity towards those who opposed him."

"It was truly astonishing that without a regular institution he could comprehend, so far as he did, the principles of natural philosophy. He attained to the great, leading principles of the Newtonian system, and looked through Nature to the great God and Father of all."

Eleazer Brooks, born September 10, 1726, was the son of Job and Elizabeth (Flagg) Brooks, and a descendant of the fourth generation from Captain Thomas Brooks, one of the first settlers of Concord. He married, August 4, 1763, Mary Taylor, of Concord. She died July 4, 1769, and he married, second, May 27, 1777, Elizabeth, daughter of Thomas and Sarah (Stoddard) Greenough, of Boston.

General Brooks died November 9, 1806, and was buried on the 11th with military honors. Mrs. Elizabeth (Greenough) Brooks died December 25, 1825. They had two children,—Eleazer (Dea.), born July 10, 1778, died, unmarried, in Burton, Ill., October 11, 1860; Elizabeth, born December 26, 1780, married, November 20, 1800, Edmund Wheeler, Jr., and died in Lincoln December 12, 1860.

And the writer knows of no fitter time or place to record the virtues of this worthy daughter of a distinguished sire, or one more worthy of a grateful trib-

ute to her memory—a woman who did a large amount of gratuitous watching and nursing; wise to advise and atrong to help,—

“Both in the natal and the mortal hour,”

putting the first and the last dreas on more new-breathing and breathless forms than any other person in the town ever did; always a grateful presence in the sick-room, most of all when friends gathered round—

“In trembling hope and surging fear,
The white-winged angels hovering near.”

And she was but a specimen of those sainted mothers and grandmothers of departed days who were help-meets for their husbands—who nourished and brought up large families of children, their sons being their jewels and their daughters their crowns of glory,—who carded and spun, wove and knit, from the wool and flax grown on the farm, garments for themselves and their families,—who had no *servants* and but little *help*, except that of their own or their neighbors' daughters,—who had no vacations or outings, except to get up a little earlier in the morning and work a little later at night in the hottest season, to alleviate the labors of their husbands and sons in the haying and harvest time,—who toiled patiently six days in the week, prepared their Sunday dinners on Saturday and went to meeting twice on the Sabbath—not to exhibit new bonnets and artistic dresses, but to worship the Lord in the beauty of holiness.

GEORGE F. WESTON.

George Fiske Weston, son of Colonel Calvin and Eliza Ann (Fiske) Weston, born October 27, 1839, fitted for college in the High School in Lincoln and Phillips Academy, and graduated as A.B. at Harvard University in 1860. Immediately after graduating he commenced the study of law, a profession to which his tastes had strongly inclined him from boyhood, and had nearly completed his professional studies when he enlisted in the Forty-fourth Regiment Massachusetts Volunteers, and was mustered into service September 12, 1862, and went with his regiment—then commanded by Colonel Francis L. Lee—to Newbern, N. C., and was in the expeditions to Tarborough and Goldsborough in November and December following. He was commissioned by Governor Andrew, March 4, 1863, second lieutenant in the Eighteenth Regiment of Massachusetts Volunteers, and, after a brief visit to his home, joined his regiment in Virginia.

The history of his military career is modestly and truthfully told by a comrade and classmate: “Lieutenant Weston was one of the many who left a home and loving friends to serve his country. But the circumstances which attended his enlistment were not of an ordinary character. Devoted for many years to academic studies, he graduated at Harvard in 1860, and immediately entered upon the study of law, a pro-

fession in which his peculiarly quick, shrewd and penetrating intellect promised him undoubted success. It was whilst he was in the midst of his legal studies that the call for our nine months' volunteers was made. With hardly a moment's hesitation he decided to enlist, abandoning the professional work in which he had become deeply interested, and in which he had made great progress, to serve in the ranks of the Forty-fourth Massachusetts.

“There were probably very few in the regiment to whom the unavoidable discomforts and annoyances of a private's life were more thoroughly distasteful than to Lieutenant Weston; and yet through them all his disposition remained unchanged. He was always the light of the company,—genial, bright and kind,—making the barracka ring with laughter at the brilliant sallies of his wit, and enlivening the march with his ever-ready and delightful humor. And all this with a bearing habitually respectful to his officers and a conscientious discharge of all his duties as a soldier. Ever kind and considerate as well as cheerful, he gained at once both the affection and admiration of his comrades, and his name was the constant theme for the liveliest expressions of affection and regret after he had left the Forty-fourth Regiment for the Eighteenth.

“Physically delicate, he was exposed, on the expeditions of the army corps, to the greatest suffering and fatigue, all of which he bore with a fortitude truly wonderful,—his mind, by the sheer force of his energy and courage, sustaining him when his body had become quite disabled.

“In March he decided to accept the offer of a commission in the Eighteenth Massachusetts Volunteers, deliberately entering upon a longer term of service, and again postponing his entrance upon his favorite pursuits. He was with his regiment at Chancellorsville and Gettysburg, and was in command of a company at the battle of Rappahannock Station, where he was wounded. The same qualities that had distinguished him as a private soldier marked his career as an officer. He was always thoroughly kind, cool and brave, patient in suffering and hold before danger.

“In mind, Lieutenant Weston was as we have described him,—quick, penetrating and shrewd. In his disposition he was thoroughly modest and adverse to display, preferring rather to be underrated than over-rated, even by his most intimate friends. It would, indeed, be impossible to do justice to so noble and beautiful a nature by any enumeration or description of the fine traits of his character; but one quality certainly gave the key-note of his disposition, and was especially associated with him by his friends: his rare geniality of soul, which sprung from a sunny, warm and loving heart, and which brightened the lives of all who lived with him. His memory will be cherished tenderly by all who loved, and they are all who knew him, and his heroic death is at once their grief and their glory.”

Lieutenant Weston inherited the instincts of virtue, valor and patriotism. His grandfather, Nathan Weston, was a soldier in the regiment commanded by Colonel Thomas Gardner, who was killed in the battle of Bunker Hill, and was quartermaster in the same regiment, afterwards under the command of Lieutenant-Colonel William Bond, who died at Mount Independence, August 31, 1776. His grandmother, Mrs. Anna (Fox) Weston, was a descendant of the martyrologist. His father was a colonel in the militia in the piping times of peace, and his mother a great-granddaughter of Thomas and Rebecca (Johnson) Garfield, the ancestors of the President. "Who," said General Garfield, in his eulogy on General Thomas, "shall estimate the effect of these latent forces, enfolded in the spirit of a new-born child,—forces that may date back centuries and find their origin in the life and thought and deeds of remote ancestors,—forces the germs of which, enveloped in the awful mystery of life, have been transmitted silently from generation to generation."

HON. CHAMBERS RUSSELL.

Hon. Chambers Russell, son of Hon. Daniel and Rebecca (Chambers) Russell, was born in Charlestown July 4, 1713, and graduated in Harvard College in 1731. His maternal grandfather, Hon. Charles Chambers, by his will devised to his grandson, Chambers Russell, his farm in Concord (now Lincoln), and he came into possession of it and came to reside here before 1740.

He was appointed in 1747 a judge of the Court of Admiralty and a judge of the Superior Court in 1752. He represented the town of Concord in the Colonial Legislature three years. But failing of a re-election in 1753, he turned his influence and that of his wealthy friends to secure the incorporation of the town of Lincoln and was successful. According to tradition the town was named by him for the home of his ancestors in England. After the incorporation of the town he was elected representative several times; in 1759 he was chosen to the Council and was a member of that body several years. When he declined serving as representative, the town voted not to send. He seems to have been the pride of the town, and the town his pet. He not only paid the highest tax in the precinct and town, but was distinguished for generous acts of public and private benevolence. Some glimpses of the man may be seen in the following extracts from the town records:

May 5, 1765, "To act on the article referred from the last town-meeting to the next meeting, which was To see what the town will give Timothy Weston and Samuel Farrar, a committee chosen by the town to petition the Great and General Court for relief under the heavy burden of an additional tax levied on the town in the year 1762. Dismissed on Judge Russell's promising to pay said Committee."

"July 10, 1766, Paid Mr. Joseph Willard three pounds for his boarding while he kept the School in the Southwest part of the town. Judge Russell being please to give him his board."

Hon. Chambers Russell married Mary Wainwright, and died in England November 24, 1767. Mrs. Mary (Wainwright) Russell died in Lincoln, August 13, 1762.

GEORGE G. TARBELL.

George Grosvenor Tarbell was a son of Dr. Grosvenor and Mrs. Thankful (Hoar) Tarbell, born in Lincoln, June 10, 1807. His father was a physician of good repute and his mother a lady of more than ordinary refinement and intelligence. In addition to his professional business, his father owned and carried on a fine farm. There is no better place to train the young to habits of industry and virtue, or where they can be so securely kept from the temptations of idleness and dissipation, or where the physical, intellectual and moral capacities can better be developed than on a farm. He attended the district schools of Lincoln until he was sixteen years old, and was a pupil in the Concord Academy two or three terms in 1823.

In his school-boy days he was distinguished for his manly and correct deportment, his attention to his studies, and "his politeness," as a lady schoolmate testifies,—traits of character which he carried with him all through his long and useful life. At the age of seventeen he entered the store of his uncle, Mr. Abijah H. Pierce, then a grocer in Cambridgeport, where he remained until he attained his majority, learning all the details of the business from store-sweep to head clerk, and acquiring what is of more consequence to success in life, a correct knowledge of human nature.

After attaining his majority he entered into partnership with Mr. Francis Dana Kidder and was successful in business for several years. In 1842 he went to Lexington, Kentucky, and entered into partnership with his brother-in-law, Mr. Stephen Swift. But the atmosphere of slavery was not congenial to his tastes, and in 1847 he returned to Boston, and established the commercial house of Tarbell & Dana, of which he remained the senior member until his retirement from business in 1865.

All through life he was the same polite, sociable, companionable, considerate and agreeable man, never aspiring to lead the multitude or lord it over men, but always—

"Nobly ambitious well to rule
The empire of his soul."

His eye might flash with fire, or his face turn white with indignation, without his losing for a moment the control of his temper or tongue. He was as honest and upright in dealing with the assessors of taxes as with his brother or bosom friend. One anecdote may reveal the man. One May day, in conversation

George G. Torrell

Geo. J. Bennett

with the assessors, he stated that he owned certain property which he thought was not taxable in Lincoln. "Oh, yes," said the assessor, "that property is taxable in Lincoln." "Do you think so?" queried Mr. Tarbell. "Yes, I am confident I am right." "I'll see and let you know," said Mr. T. A week afterwards he came and said smilingly to the assessor, "You were right and I was wrong, and I want you to tax me for that property. I wish to be taxed for everything I have that is taxable."

If any one wants to know human nature from its serene heights to its grovelings, let him be an assessor of taxes for a quarter of a century.

In what estimation Mr. Tarbell was held by the merchants and business men of Boston may be learned from the following note from Rev. Dr. Hale, in whose church Mr. Tarbell was a constant worshiper:

"BOSTON, April 28, 1890.

"My dear Mr. Wheeler,—What you know of Mr. Tarbell gives you a perfect key to what, I suppose, you do not know so much—his life in Boston.

"There has been none of the merchants of the city who was more thoroughly respected, and I might fairly say loved, among those who knew him. And this makes a large circle, for he was a public-spirited man, ready to take his share in anything that was going forward. He was an interested member of our congregation for I do not know how many years—always after I knew the church until he removed to Lincoln. And, indeed, after that time I used to receive the most kindly notes of remembrance from him. As you know, he was a man of profound religious sentiments, although not perhaps much given to what is called religious conversation. His heart was open to every one in distress, and his judgment so good that the impulses of his heart could be relied upon. I am very glad to hear that you are preparing some permanent record of the life of such a man. I am sure that his example has not been without its fruit among the young men who grew up knowing how he discharged his daily duty.

"I am always truly yours,

"EDW. E. HALE."

What Mr. Tarbell was as a neighbor and friend no one knows better than the writer. From his schoolboy's days for nearly sixty years he had business transactions with Mr. Tarbell, and knows him to have been an upright and reliable man, and after he retired from business and came to reside in Lincoln Mr. Tarbell was his near neighbor and obliging friend, and he never went to him for any favor, whether it was for the loan of a dollar or a thousand, or suretyship for twice ten thousand, or for a contribution for any charitable, political or religious purpose, and was met with a refusal or put off to a more convenient season. He never sounded his trumpet before men, or let his left hand know what his right hand gave in charity. Yet it is believed his benevolence was large and well considered, and doubtless many pounds of sugar and tea and barrels of flour went to the homes of the needy of which no record was ever made, save in the hearts of the grateful recipients and the Book of Life. And all his works and deeds of charity were done unostentatiously, noiselessly, "as the fragrance of flowers ascends on the wings of the morning, or the moonbeams descend on the mantle of night."

But the crowning grace and glory of Mr. Tarbell's

life was the erection of the Lincoln Public Library. At first he decided to leave the town a sum of money to build a library, but afterwards concluded to erect the edifice himself, thus avoiding all contention about the location or construction of the building. He purchased a site for and began the construction of the library in the summer of 1883. The building was finished in the spring and summer of the following year, and dedicated August 5, 1884. The principal address was delivered by a cousin of Mr. Tarbell, Hon. George F. Hoar, of Worcester, a Senator in Congress, whose father was a native of Lincoln. Interesting letters from Hon. George Bancroft and Dr. Andrew P. Peabody were incorporated into the address, and suitable mention was made of Mrs. Eliza (Rotch) Farrar, who bequeathed her books to the town to form a nucleus for a library.

And long may it remain an ornament to our village, a blessing to all the people of the town, an ever-increasing inheritance of wisdom and knowledge, a lasting monument to the wisdom and worth of the founder, more enduring than marble, most glorious among the monuments of the land, save those that rise on the fields where tyranny and slavery were slain, or hallow the heights where independence was born.

Mr. George G. Tarbell died unmarried in Lincoln December 23, 1889, and his brother, Mr. Charles Lee Tarbell, died the following day. They had resided under the same roof, making one family, for twenty-four years, and were buried at one funeral service. "They were lovely and pleasant in their lives, and in their death they were not divided."

GEORGE F. BEMIS.

Mr. George F. Bemis, son of Amos and Susanna (Fiske) Bemis, was born in Lincoln, July 19, 1809, and learned the rudiments of knowledge in the public schools of his native town. He passed the dangerous periods of youth in the healthful and invigorating labors of a farm, and subsequently taught district schools two or three winters. When about 20 years old he went to Amherst, where he learned the trade of a printer.

In 1834 he went to Concord, Mass., where he printed and published *The Yeoman's Gazette* for eight or nine years, but the paper was not a financial success. About 1843 he went to Boston, and with the assistance of his brothers-in-law, Messrs. Oliver Hastings and Abel Wheeler, established a printing-office which did a large business for the times, printing the *Puritan Recorder*, *Christian Register*, *Massachusetts Ploughman*, and other weeklies, first leasing and afterwards owning the building on School Street, now occupied by Charles A. Smith & Co. About twenty years ago he gave up the printing business and engaged in real estate transactions, where he laid the foundations of his prosperity.

His last investment in real estate was erecting, in company with Mr. E. F. Waters, the *Boston Daily Advertiser* Building. Afterwards he purchased Mr. Waters' interest in the edifice, and later on sold it to a company. Since selling that estate he has invested his wealth chiefly in copper stocks.

In 1864 he returned to his native town and continued to reside here until his death, taking a lively interest in its churches and schools and in its young people, with whom he was a great favorite, mingling in their amusements and entertainments until he was more than eighty years old,—enjoying an abundance of wealth, and possessing a heart which found its own bliss in seeing others blest.

In 1883 he purchased upwards of ten acres of land adjoining the old Revolutionary burying-ground, and presented it to the town, thus providing a cemetery sufficient for the needs of the town for centuries.

By his last will and testament, executed two days before his death, he bequeathed to the town \$30,000, the income of which is to be used to provide an annual course of public lectures of an instructive and elevating character, and \$20,000 to build a new town-hall, in which shall be a room or hall of sufficient capacity and proper construction for public lectures, and for seating an audience of such size as would naturally attend such lectures in the town.

Mr. Bemis also bequeathed to the Congregational Church in Lincoln \$5000 towards building a new church edifice, to be used by the church for the purpose of a building fund whenever they see fit to rebuild.

All honor to the men who honor themselves by their deeds of generous and thoughtful benevolence; who build the libraries which hold the tomes containing the recorded wisdom of the bygone centuries, and provide the halls where the present and future generations may learn from living lips the ever-increasing unfoldings of wisdom and knowledge, of science and philosophy; and provide cemeteries where the forms of the loved and departed may be laid to rest amid the serene beauties of nature,—the sighing of the winds, the song of birds, and sweetness of flowers,—reposing till the trumpet of the archangel shall sound, and the earth and the heavens be no more.

WILLIAM FRANCIS WHEELER.¹

On the 11th of March, 1812, unto Charles and Julia (Stearns) Wheeler, the latter being a daughter of Rev. Charles Stearns, D.D., second minister of Lincoln, was born a son, the subject of this biographical sketch. If among the numerous and varied incarnations of the genius of industry, other manifestations have been circumstantially more conspicuous, few have been more perfect, permanent or persistent. At the proper time he was christened by his grandfather,

¹ By Edwin M. Stearns.

Rev. Dr. Stearns; consequently, in the fear and admonition of the Lord, he immediately commenced upon an industrious, honest and successful agricultural career. His education was principally obtained in the district school of his native village, supplemented by a few terms in the academies of Concord and Northfield, institutions similar to the high schools of our time. That he made commendable use of these limited advantages is evidenced in the fact that at the age of eighteen he began to teach. For thirteen winters, from 1830 to 1843, this was his vocation, viz.: two terms on Cape Cod, two in Concord, one in Acton, one in Charlestown, two in Sudbury and five in Lincoln. The summer vacations were devoted to recuperation by freely indulging in those wholesome recreations which unremitting labor on a farm so liberally supplies, and of which poets, snugly ensconced in upholstered chairs, so blithely sing. In those times rainy days, on which hired men were permitted to rest and boys to go a-fishing, were devoted by Mr. Wheeler to practical labor for the temperance cause; by working what in these latter days is becoming more and more a miracle, viz., the changing of cider into pure and unadulterated vinegar, which has latterly become the most profitable product of the farm. While he was engaged in teaching on the Cape he contracted a more agreeable and continuous engagement with Miss Hannah Crowell Paddock, daughter of Judah and Mary (Crowell) Paddock, which culminated in marriage October 4, 1838. This harmonious union, which lasted nearly twenty years, was severed by the death of Mrs. Wheeler April 21, 1858. She left one son, Charles Stearns Wheeler, who is treasurer of the town of Lincoln and a member of the State Legislature. He lives at the old homestead on the farm which belonged to his ancestors previous to 1680, since when it has been divided and sub-divided among their descendants many times, but has all been recovered and many acres added thereto during Mr. William F. Wheeler's time. On the 16th of October, 1864, Mr. Wheeler was married to his present wife, Martha Jane, daughter of Rev. Morrill and Hannah Dean Allen, of Pembroke. They removed from the farm to a cottage on the road to Concord and near the centre of the village, from which Mr. Wheeler, now seventy-eight years old, walks over a hill from which on a clear day over thirty towns are visible to the old farm, where he enjoys himself hugely at his old vacation pastimes, varied by the entertainment of his three grandchildren. The saying "If you want anything done, apply to a busy person," has always been amply verified by Mr. Wheeler. A very dear friend writes of him as follows: Perhaps no native of the town, living or dead, has been prompted to perform the last offices for and help lay away in their narrow beds so many of its inhabitants; and possibly there is not another to whom so many have entrusted their property and commended their wives and little ones at the hour of death. The demand upon an individual for

William J. Wheeler

public services may reasonably be considered as a fair estimate of his ability to perform them.

Mr. Wheeler has served twenty-six years as selectmen, twenty-eight years as town treasurer, eight years on the School Board, of which he was chairman. These duties he performed without prejudice or partiality. For a layman, he is well informed in legal matters, which has increased his efficiency as a town officer, and the value of his advice in town-meetings, which he seldom offered until a subject had been freely debated. He has been criticised as parsimonious in municipal expenditures of which his judgment did not approve, but he should be credited with carefulness for other pockets than his own.

Politically, he was a Whig until the formation of the Republican party, to which he still adheres. For forty years he has been treasurer of the Unitarian Society, as well as one of its active supporters. In his literary labors he is indefatigable. He prepared a historical sketch of Lincoln, which was incorporated in Drake's "History of Middlesex County," published in 1880. The time he has devoted to and the labor he has expended upon the requisite researches for the work, of which this is a portion, cannot be even approximately apprehended by those who have had no experience in such obscure and intricate delvings.

As a useful citizen, kind friend and neighbor, as a strictly honorable, yes, righteous man, Mr. Wheeler is esteemed and respected by all who know him well.

CHAPTER XLIX.

AYER.

BY GEORGE J. BURNS.

Introduction—Topography—Early Indian Tribes—Boundaries of the Town.

I AM met at the outset by a doubt as to whether, and to what extent, in an article of this character, an explanatory preface is admissible; but beg indulgence for just a word. If this article was to be an independent publication, I would not be doing justice to the reader, or to the subject, if I did not lay hold, with a sense of proprietorship, on the history of Groton down to the time of our separation from her; but as the history of both towns is to appear in the same publication, I would not be excused, if I did more or less than to refer with pride to the history of our parent town.

I desire, therefore, to acknowledge the indulgence of Groton's historian, in not limiting me to the dates that mark our corporate existence, and in permitting me to appropriate to my exclusive use all events that occurred within the territory over which our municipality now exercises jurisdiction. I also desire to acknowledge the valuable aid I have received, and

the liberal use I have made, of the results of his labors, published by him in "The Groton Series." I also desire to acknowledge the aid I have received from William A. Wright in the matter of fire statistics.

I regret that I am obliged to omit from this article a narration of many things I would be pleased to record, particularly such history as our village and its inhabitants made during the War of the Rebellion; but the accessible data is so meagre, and so blended with the history of Groton, that were I to attempt it, in the space and time allotted me, I feel that I would, by omission, be unintentionally doing injustice to many, as deserving of mention as those whom I should be able to notice. I trust that I may be able, in the near future, to do, in this respect, what I am not permitted to do at this time.

This is the second time that the history of this town has been published, the first being an article of six pages in Drake's "History of Middlesex County," published by Estes & Lauriat in 1880.

Ayer is the youngest of that group of towns in the northwestern part of Middlesex County, that might with great propriety be called the Groton family. It is bounded on the north by Groton, on the east by Littleton, on the south by Harvard, and on the west by Shirley.

The general form of the town is that of a parallelogram, being about four miles in length from east to west and about two miles in width from north to south. About three hundred acres of its area are covered by the waters of different ponds.

The town is situated near the southern apex of that triangular outcrop, composed principally of what is known as Chelmsford granite, whose northern shoulder turns the south-bound waters of the Merrimack almost back upon themselves. The greater part of this area, extending from near the Ridges northerly to the New Hampshire line, retains to this day the picturesque wildness of two centuries ago. No region in Eastern Massachusetts has been less subdued. It has been aptly suggested that it be called North Middlesex Highlands. We are situated so near the summit of the divide, between the waters of the Merrimack and the Nashua, that when Calvin Fletcher, while owning the mill on the site of our pumping station on Sandy Brook, raised the height of his dam, he found that it was necessary to erect another at the easterly end of Sandy Pond, to prevent the surplus water flowing off over the summit through the meadows into Spectacle Pond; thence through the Stony Brook into the Merrimack River at Chelmsford.

The nature and character of our soil and surface are varied. A range extends from the southwesterly corner of the town northeasterly to the Groton line, there uniting with what are known as the Indian Hills. In the deed from John Solendine to James Park in 1730 the most southerly of these elevations is called "Coiacus Hill." Snake Hill is the most north-

erly of this range, and upon it, within the memory of men now living, rattlesnakes have been killed. Its altitude is 497 feet, and it is the highest elevation in our town. About fifty years ago there lived on the easterly side of Snake Hill a woman named Prudence Shedd, who became celebrated as a rattlesnake killer, and pelts of these reptiles, killed by her, adorned the side of her barn in large numbers. In 1830, when the wood-choppers were clearing the hill near Levi S. Brigham's, many rattlesnakes were killed. Dr. Edwin Y. White, of Cambridge, tells me that his mother was present when a rattlesnake having thirteen rattles was killed a short distance easterly of Brigham's house.

I am not aware of there being any name for the two hills lying between Snake Hill and Coiacus Hill. The prominent elevation just southeast of Sandy Pond, near Pingry Village, is Brown Hill, sometimes erroneously called Brown Loaf Hill, the latter being an elevation about one mile east of Groton Centre. Just east of Brown Hill is Round Hill. The hill just north of George Pierce's is Flat Hill.

Around and between these hills are meadows bearing names almost as old as Groton herself. Just north of Flannigan's Pond and easterly of the old road to Groton is Pine Meadow. Through this meadow flows Pine Brook. Rock Meadow is north of Pine Meadow on both sides of Snake Hill road. South Meadow and South Meadow Brook, sometimes called Bennett's Brook, is in the southeasterly part of the town, near the Littleton line. Sandy Pond Meadow is just east of Sandy Pond, and Long Pond Meadow is north and east of Long Pond.

Sandy Brook Meadow is on both sides of Sandy Brook. It is now flowed by the dam at the pumping-station. Noniacoiacus Meadow is on both sides of Noniacoiacus Brook, which begins at the junction of the Mill Brook and Sandy Pond Brook, just westerly of the Harvard road and empties into the Nashua River, just north of Fitchburg Railroad. The easterly half of this meadow is flowed by the dam at Phelps' Mill. Davis Meadow is in the valley north of the poor farm, and on both sides of the Boston & Maine Railroad, so named from its first owner, John Davis, one of the original proprietors of Groton.

The region north of the Catholic cemetery was at one time known as the Nashua High Plains. The elevation of land on both sides of Sandy Brook Meadow was, in early days, called Sandy Brook Plain. Tobacco Pipe Plain is in the vicinity of Levi S. Brigham's. "The Plains" are the level land in the southerly part of the town on both sides of the Boston & Maine Railroad. These latter are nearly all pine plains, and the soil, being very light, produces most commonly the shrub oak and hard pine, and, where they are in the vicinity of the railroads, are periodically damaged (?) by fire, furnishing the proprietors a claim against the railroad companies more substantial than the natural income of the soil itself. There is

a deep deposit of peat bog in nearly all of our meadows, and the gathering and preparing of this promised, at one time, to be a considerable industry. The general character of our soil varies from too light to too hard, and as a rule is poorly adapted for agriculture.

There are two natural ponds in town: Sandy Pond, with an area of eighty acres, and Long Pond, with an area of forty-five acres. Both of these names were given shortly after the settlement of Groton. The other large ponds were formed by flowing the meadows to obtain water-power for the different mill-sites.

Noniacoiacus Brook, sometimes called Major Brook, from Major Simon Willard, through whose farm it flowed, and Sandy Brook, from Sandy Pond to Major's Brook, have already been mentioned. The old Mill Brook enters Ayer from Harvard and, joining with Sandy Brook, forms Major's or Noniacoiacus Brook. James Brook flows, for the last third of its course, within the limits of our town, and the junction of its thread with that of the Nashua River forms the northwesterly monument of our town's lines. From Beer's County Map, it would appear that the dividing line between Ayer and Groton passes through the centre of Long Pond. This is incorrect, as nearly, if not quite all of that pond is in our town.

The range of hills in Groton and Ayer was one of the last strongholds of the wolves in Eastern Massachusetts. These animals were killed there as late as 1746. Until within a few years there were abundant flocks of wild pigeons in this region and they were taken in large numbers by pigeon stands. Salmon and shad were formerly caught in the Nashua River.

The nearest Indian tribe was the Nashobas, who lived in what is now Littleton. This tribe was small in numbers and they were early Christianized. The next nearest tribes were the Nashuas, in Lancaster and Sterling, and the Pawtuckets, in the vicinity of Pawtucket Falls on the Merrimack River, at Lowell. These were once powerful tribes, and as between them our territory was debatable ground.

The find of Indian relics has been small in this vicinity. Stone implements and weapons have been found in considerable numbers upon the Holden farm upon the Nashua River. Quite a quantity have also been dug up on the farm now owned by George Little, between the main road from Sandy Pond to Forge Village and the Stony Brook Railroad. A few implements have come to light on what was formerly the Calvin Fletcher farm, while some have been discovered on Round Hill.

Of all Groton's offspring, Ayer is the only one not reaching, in any part, the limits of the Danforth Survey of 1667; and in this respect she is, as to Groton, an inland town. Except in her westerly boundary, the Nashua River, there seems to the casual observer to be no sense or reason in her particular limits. The original grant of the township of Groton was made by the

General Court May 25, 1655, and it gave the proprietors a tract of land eight miles square, but some modifications to the grant were subsequently made. It was stipulated in the grant that it should be laid out with all convenient speed, but it was twelve years before the survey was made. It appears that two copies of the plan of the survey were made, one for the proprietors and the other for the Colony, both of which have since disappeared, the latest trace of either being in June, 1826, when one was in the possession of Honorable James Prescott, of Groton, and from it a copy was transcribed by Caleb Butler, Esq., into one of the town record-books. From this copy, that survey seems to be exceedingly crude and indefinite, but by dint of perseverance and persistent investigation, Honorable Samuel Abbott Green has established what, without doubt, are the original bounds of the survey. For some reason, or possibly through neglect, the copy of the survey intended for the General Court was not returned, and the survey confirmed, until Feb. 10, 1717, sixty-two years after the original grant. In the mean time Nashoba (afterwards Littleton), embracing a portion of the territory included in the survey of the Groton plantation, had been incorporated. The southerly line of the Groton plantation crossed the Nashua River not far south of the mouth of the Cattaconaug River, now in Shirley, and extended easterly to the present Boxborough line, a short distance south of the northwest corner of that town; thence it ran northerly to a point not far from the present Littleton Station, on the Fitchburg Railroad; and thence it ran northeasterly to about the centre of Forge Pond. The original grant of the Nashoba Farms was made by the General Court to the Nashoba Indians in 1654, and, as in the case of the Groton grant, was to be defined as to its limits and location by survey, which was completed and returned in 1686. The plan of this survey shows the tract to be nearly rectangular, four miles square, and to include a portion embraced within the Groton survey. The controversy over this disputed territory remained unsettled until 1714, when it was decided by the Legislature in favor of Nashoba. This decree established the northwest corner of the Nashoba tract to be on the south side of Brown, or as it is now more generally known, Bruce's Hill. A reference to the map of Ayer plainly shows the right angle indenture at the southeast corner of our town, marking the northwest corner of the town of Littleton. From the north line of the original Nashoba survey to Spectacle Pond, the boundary between Ayer and Littleton follows the thread of Bennett's Brook. This change was made in the winter of 1838-39, by the General Court setting off from Groton to Littleton the farms of certain persons owning on the southeasterly side of said brook. The original petition on which this transfer was made

cannot be found, and consequently the names of the petitioners and purposes of the transfer can only be surmised. It is probable that the reason was one of personal convenience to the petitioners. In those days the Legislature, as the map of the State abundantly testifies, had no regard for the certainty, symmetry or permanency of town boundaries, and any person could get his lands transferred from one town to another, almost as readily as he can now transfer his national allegiance or move his furniture.

Shirley, as originally incorporated, January 5, 1753, is identical with the present limits of that town. By an act of the Legislature, passed February 6, 1793, the farms of Simon Daby, Moody Chase and Samuel Chase, lying on the easterly side of the Nashua River and between Nonaicoicus Brook and the Harvard line, were transferred from Groton to Shirley. This latter territory was made a part of the new town of Ayer in 1871.

The town of Harvard was incorporated June 29, 1732, from parts of the towns of Lancaster, Groton and Stow, and the northerly boundary thereof, which forms our southerly line, is described in the act of incorporation as follows: "running on said Littleton line, near the northwest corner thereof, viz.: as that a West-North West Line shall leave the dwelling-house of James Stone [now Charles Stone] in Groton, six perch to the Northward, and continuing the same course to Lancaster [Nashua] River aforesaid, excepting Coyacus farm or so much thereof as shall fall within the bounds above said." The Coyacus or Nonaicoicus Farm, of which more will be said hereafter, was the 500-acre grant made by the Legislature to Maj. Willard. It is the approximate, but not the correct boundaries of this farm that forms the projection on the westerly half of our southerly boundary line. Our northern boundary line, which is the line of separation between Ayer and her parent town, was agreed upon by the committee representing the petitioners, and the committee appointed by the town of Groton. It runs in a straight line from the mouth of James Brook to a point where the southerly line of the County road, leading from Groton by Ridge Hill Tavern to Littleton Old Common, intersects the town line between Groton and Littleton. This line was surveyed by Horace C. Hovey shortly after the incorporation of the new town.

The boundary line between Groton and Shirley, prior to the incorporation of Ayer, began at Nonaicoicus Brook, between the house formerly owned by Dennis Coughlan and the house now owned by Michael D. McGrail, on the northerly side of West Main Street, and ran southerly to the Harvard line in a somewhat irregular course, crossing the Fitchburg Railroad between the house of Daniel Scully and the house of Michael Shea. Most of the monuments marking this line are still standing.

CHAPTER L.

AYER—(Continued.)

Early Settlers.

THE first settlement of the Groton plantation was where the centre village now is. The ever-threatening depredations of the Indians made it necessary to centralize, so far as possible, for mutual protection, and in most cases the original proprietors of Groton simply did us the honor to own, as part of the outlying farms, the territory now embraced within the limits of the town of Ayer. The descriptions of these farms are so indefinite that it is difficult, if not impossible, to locate most of them, more than approximately.

The earliest settler, whom I am able to locate as living within our limits, was Daniel Peirce, the name being at that time spelled upon the records "Pearse." His farm was situated between Sandy Pond and what is now known as Ridge Hill, embracing nearly all of the territory lately owned by Oliver Peirce, deceased; and the original house-lot must have been in the immediate vicinity of the homestead buildings now standing a short distance westerly from those of Levi S. Brigham. It is remarkable as well as interesting that this farm should continue in the same family until a few years ago. Daniel Peirce was the son of John Peirce, who settled in Watertown about 1636, and was one of the proprietors of Groton, being the owner of a ten-acre right, and was living here about 1662. His lands are recorded with the proprietor's records May 6, 1666. (Early Records of Groton, page 167.) He appears as a member of Lieutenant Jonas Prescott's garrison, in 1691-92.

Among the early settlers of this country was John Page, who emigrated here with his family from Dedham, England, and settled in Watertown. He was the first constable of that town, being appointed in 1630 by the Court. He died December 18, 1676, and his widow, Phebe, died September 25, 1677. His children settled in various parts of the country, John, Jr., coming to Groton, and from him has descended nearly all of that name in this vicinity. The original settler was one of the original proprietors of Groton and the owner of an extensive grant. It is, however, probable that he never resided in Groton. His estate is settled as of Watertown, and the grants to his son John, of nearly all of the Groton land, described him as of Watertown.

John Page, Jr., was born in 1630. He removed to Groton about 1662. He married Faith Dunster, who is supposed to have been a niece of the president of Harvard College of that name. She died April 3, 1699. He returned to Watertown at the time of the destruction of the town by the Indians, and died there about 1711. Francis M. Boutwell, Esq., states the location of his dwelling-house to be on the west

side of Farmers' Row, where the buildings of the Groton School now stand. He owned an extensive tract of land in the southerly part of the town, and, next to Simon Willard, was the largest land-owner in this vicinity. His land comprised what was subsequently Calvin Fletcher's farm, and a very large tract to the east of it. The description of the land shows that it bordered on the Nonaicoicus Farm. The pumping station is upon what was originally his land, and under his proprietorship the first mill-dam at that place was built.

Among his children was Samuel Page, who was born at Groton June 4, 1772. He removed to Lunenburg and was the first settler of that town, and for a time his was the only family within its limits. He received the title of "Governor" since he was presumed to control the whole of the town.

Peleg Lawrence, one of the early proprietors of Groton, at one time lived near the outlet to Spectacle Pond. In the Indian wars of 1691-92 he was a member of the garrison of John Davis.

Cornelius Church owned and probably lived where George Little now does, on the northerly side of the Stony Brook Railroad, between Sandy Pond and North Littleton station. His name is given among those who occupied the garrison-house with John Davis in 1691-92. It is said that one of the garrison-houses of Groton stood upon this farm.

Farwell was formerly a very common name in the southern part of Groton. William Farwell and John Solendine purchased of Jonathan Tyng in 1713 the Nonaicoicus farm. Henry Farwell, a son of William, was born July 21, 1724. He married Lydia Tarbell, daughter of Samuel and Lydia (Farnsworth) Tarbell, on December 6, 1749, and subsequently Sarah Taylor, of Westford, June 3, 1761. He was a soldier in the French Wars and was captain of one of the companies of minute-men of Groton at the commencement of the Revolutionary War. He marched with his company on the 19th of April, 1775, to Cambridge; was at the battle of Bunker Hill and was severely wounded. A musket-ball passed through his body, lodging in the spine, from whence it was extracted. He engraved upon the ball the figures 1775 and kept it as a precious relic. He was a man of small stature, but very strong and athletic and of undaunted courage. He died in 1803. He was at one time the owner of a larger part of the land on which our village stands, and resided in the vicinity of Phelps' mill, where he owned and operated a saw and grist-mill. His dwelling-house was quite commodious, and after he sold to George Peirce in 1758, the place was used as a tavern. It is said that he lived upon the George Little place at the time he marched to the battle of Bunker Hill.

Joseph Farwell at one time owned the Levi S. Brigham place. He was a deacon in the church and served in the French Wars. A note-book kept by him, and now in the possession of one of his descendants, Deacon Joseph Farwell, of Hyde Park, Mass.,

contains many interesting memoranda of his observations, and was published in the "New England Historical and Genealogical Register" (xxv. 275, 276), for July, 1881, and also in the "Groton Series," Volume i. No. 14.

The Stone family settled in the southerly part of Groton at a very early day. Simon Stone, one of the original proprietors, owned extensive tracts of land in this vicinity, and the families of that name living here are his direct lineal descendants. Several members of that family have been prominent citizens of the town of Groton. Simon was a soldier in King Philip's War; was garrisoned at Exeter, New Hampshire, in King William's War, and during an assault upon that place July 4, 1690, was severely wounded. March 17, 1691-92, he was in the Farnsworth garrison-house at Groton. He was one of the selectmen of Groton in 1697.

Joseph Stone for years owned the Calvin Fletcher farm and is supposed to have built the mill at the pumping station and the red farm-house opposite, which was burned in 1880. He was a prominent citizen of Groton and was one of the bayonet-men in Captain James Prescott's company in the French and Indian War. He married Mary Prescott, a cousin of Colonel William Prescott, on May 9, 1728. His daughter Thankful married Joseph Harwood, of Littleton, grandfather of Hon. Joseph A. Harwood, of that town, on October 21, 1773.

The first physician of whom we have any knowledge as residing within Ayer territory was Doctor Benjamin Morse, who was a son of Doctor Benjamin and Abigail (Dudley) Morse, and born at Sutton March 20, 1740. He was married, on November 27, 1760, to Mary, daughter of Isaac and Sarah Barnard, who was also born at Sutton Sept. 13, 1741; and they had a family of six children born in that town. Dr. Morse came to Groton, probably, during the Revolutionary period, and was a representative of the town to the General Court during the session of 1784 and in several succeeding years; he was also a delegate to the Convention for adopting the Constitution of the United States in the year 1788, where he opposed the adoption. He lived on the westerly side of Park Street, where the small cottage house, for a long time occupied by Joseph St. Catrina, now stands. He owned an extensive tract of land in this vicinity, including the present mill-site of Levi W. Phelps. He died on May 31, 1833, aged ninety-three years; and his widow, on December 16, 1835, aged ninety-four years.

His son, Isaac Morse, succeeded him in the ownership of the mill property, and was residing here at the time the railroads were built. He lived on the southerly side of Shirley Street, where Alfred Page's tenement-house now stands. The well at this place is known as the old Morse well, and is a monument mentioned in many deeds of land in that vicinity.

There are few names in colonial history more worthy of an enduring fame than that of Simon Wil-

lard. In him were combined the qualities of mind and body calculated to foist the civilization of Europe upon the unbroken wilderness, against the prejudice of the savage. We cannot claim Simon Willard as all our own. We must share the honors of his residence and labors with Cambridge, Concord and Lancaster. The histories of these towns are not complete without more than a passing mention of this distinguished man. While his residence here was brief, being but little more than five years, it was during the most stirring and critical days of the Colony's history, and was the last and most eventful of our hero's life.

Simon Willard was born at Horsmonden, in the County of Kent, England, in the early days of 1605. He came to New England in 1634, and settled in Cambridge, where he continued to reside about six years.

He was early rated as a merchant, probably on account of his dealings with the Indians, which, while it gave him a valuable knowledge of the interior of the country, and the advantages that the different localities afforded for settlements, also gave him an acquaintance with the individualities of the most prominent chiefs and leaders among the Indians, and the strength and peculiarities of the different tribes—a knowledge that proved of great advantage in the stormy days of his residence in our vicinity.

September 2, 1639, the General Court of the Colony granted to Rev. Peter Bulkeley, Simon Willard, merchant, and twelve other families authority "to begin a town at Musquetaquid to be called Concord." This little colony pushed out into the wilderness, on to the then frontier, and, until his removal to Lancaster, in 1659, Simon Willard was the foremost man of the new colony. A stone tablet set into the wall on the northerly side of Elm Street, in Concord, a short distance westerly of the Sudbury River, indicates the farm upon which he lived. It would not be permitted, in an article of this character, to dwell to any extent upon his public acts that are a part of the history of Concord, further than to speak of some of the positions he filled. While he resided there he was chosen "Clerk of the Writs," not unlike that of justice of the peace, an office he held for nineteen years. In 1636 he was made "surveyor of arms," which was the beginning of that military record, on account of which he is often spoken of as "a Kentish soldier." In December, 1636, he was chosen representative to the General Court, and with the exception of three years was re-elected for fifteen years. During these terms of service he was identified with many of the most important acts of the Colony. In 1653 he was a member of a commission appointed to establish the northerly line of Massachusetts, thus being prominently identified with a controversy that the present generation witnesses as still unsettled. The northerly line of the Colony was then claimed to be much farther north than to-day, and the grant to the Colony was presumed or claimed to extend to the

head-waters of the Merrimack. At the southerly extremity of Lake Winnipiseogee there was discovered, some years since, a large rock upon the face of which is the following inscription :

EI SW
WP IOHN
 ENDICVT
 GOV

which being interpreted, reads (EI) Edward Johnson, (SW) Simon Willard, (WP) Worshiptful John Endicott, Governor. It is said that this is the earliest sculptured inscription of Massachusetts Colony. It was made by Edward Johnson and Simon Willard, joint commissioners, and establishes what was at that time claimed to be the northern limits of the patent of the Colony. In 1653 Simon Willard was elected sergeant-major, the chief military office of the county, and next in rank to sergeant-major-general, who had command of the military forces of the Colony. In 1654 he was chosen assistant, a homogeneous office, combining the honors and burdens sustained by State Senator, Councilor and justice of the Superior Court.

On October 3, 1654, Major Willard was placed in command of an expedition set on foot by the commissioners of the United Colonies against the Niantics—a tribe of the Narragansetts—whose sachem was Ninigret. Their chief seat was what is now embraced in the towns of Westerly and Charlestown, in the State of Rhode Island. The expedition was an important one and Major Willard's appointment to the command provoked some feelings of jealousy among the military men of the day. While the expedition cannot be considered as a great military success, the government of Massachusetts considered that the main design of it was accomplished.

In the discharge of his official duties Major Willard was called to Lancaster from time to time to advise the inhabitants and superintend the management of the concerns of that plantation. The inhabitants finding it difficult to conduct the business of the town, and needing assistance from without, sent a letter of invitation to Major Willard "to come and inhabit amongst" them, "with such measures concerning accommodations as have been formerly propounded." It would appear from the records that these "accommodations" were certain gifts of land in the second and every subsequent division of the common lands. He accepted the invitation, sold his mansion-house, homestead and a part of his other land in Concord, and in the course of the year 1659 removed to Lancaster. His residence in Lancaster was near the opening of the present "Centre road," so called, in the middle of the town, and his estate was bounded on two sides by the Nashua River. His house was one of the principal garrisons in King Philip's War. Major Willard resided in Lancaster not far from twelve years, removing to Groton probably some time in 1671. The precise time of his removal cannot now

be determined. The proprietors' records of Lancaster establish the fact that the selectmen met at his house January 30, 1670. The first mention made of him in the Groton Records is the following vote :

"At a Generall towne meeting held Janevary 13 1672 Thisday agreed vpon and by vot declared that their shall be a commit chosen for to seat the persons in the meeting house according to their best discretion and at the sam time a committee chosen and their names are thea

" Major Willard
Sergent Parker and sergent Lakin
James ffiske John Lakin."

(Early records of Groton, p. 42.)

At the session of the General Court beginning May 6, 1657, on account of his public service, Major Willard had granted to him five hundred acres of unappropriated land wherever he could find it. One year later, at the session beginning May 19, 1658, after the tract had been selected by him, a definite grant was made which appears to have been in satisfaction, in part, at least, of debt due Major Willard through John Sagamore, an Indian living at Pawtucket, in the present city of Lowell, though he is sometimes mentioned as of Groton. The debt was recovered in the County Court in Middlesex, June, 1657, but the grant was made directly by the General Court.

The entry in the General Court was recorded as follows :

"In Answer to the petition of Major Symon Willard the Court Judgeth it meete to graunt his Request viz a farme of five hundred acres on the south side of the Riuer that Runneth from Courts Graunt to Nashaway [Lancaster] to Merremck betweene Major Sy Lancaster & Groten & is In satisfaction of a debt of forty fower pounds Due Sagamore of Patuckett doth owe to him Provided he make over all his Right title & Interest in the execution. obtayned vnt the said Sagamore to the countrje wch was done."

At the adjournment of the October session, 1659, Thomas Noyes returned his survey of the tract, which was duly approved by the Court as follows :

"In Obedience to the act or Graunt of the Honnored Generall Court of the Massachusetts, in New England laid out & exactly measured major Symon willards farme . conteyning five hundred acres scittuate lying and being for the most part, on the East side of Groaten Riuer—betwixt the plantation . graunted to the Inhabitants of Lancaster and the now Inhabitants of Groten at the place wch is Called by the Indians nanajcoijicus . beginning at the great riuer side . about one hundred roids to the Northward of nanajcoijicus brooke begining wee say at the riuers side rning a due east lne ninety fower rodde there making an angle varying forty five degrees . to the southward then Runing one mile and a half and forty Rods . vpon a southeast point there making an Angle varying twenty degrees from the old Ljne . Runing on that point sixty Rodds . there making an Acute Angle of sixty degrees. Runing on a west & by South point half a mile there making an angle varying two & twenty degrees . to the Northward Runing on a west & by North point one mile . there making an Aogle . varying thirty-three degrees from the old Ljne . Runing on a northwect point to the Riuer It being seven Score Rods . and from thence vpon a streight lne to the place . where wee beganu . which last lne doth Crosse Groten Riuer twice. this by me

"THOMAS NOYES."

"The Court Allowes and Approves of this Returne provided the thirtje acres laid out ouer the North East side of the Riuer be left out & taken on some other part of the lynes & that there be not aloue one hundred acres of meadow laid out in this farme."

The territory embraced within this grant comprised the larger part of that at present occupied by our village, and, consequently, it was a part of the territory claimed by the proprietors of Groton under their previous grant from the General Court in 1655. But as the Groton proprietors had not, in accordance with the terms of their grant, returned a description of the land taken by them, the Court had no means of knowing that Major Willard's farm embraced the same territory. There consequently arose conflicting claims regarding the territory embraced within the Nonaicoicus farm, which were not settled until 1681, when the territory was conceded to Hezekiah Usher and Samuel Nowell, assigns from Major Willard's heirs. This territory, being principally meadows, was particularly valuable on account of their natural yield of grass. It was upon this farm that the major erected his mansion-house, destined to become one of the most important garrisons of Groton.

In the summer of 1674 Major Willard conveyed one-fourth part of the Nonaicoicus' grant to his son Heory, and in the following year another quarter to his son Simon. Both of these sons afterwards reconveyed their respective interests to the mother, then a widow, and administratrix of her husband's estate. The original deed of Major Simon Willard to his son Henry is now in the possession of Hon. Samuel A. Green, of Boston.

At time of his death Major Willard owed the estate of Hezekiah Usher, a merchant of Boston, the sum of £272. 2s. 3d., and on June 20, 1679, the widow Willard, in payment of the debt sold the farm to the Usher heirs—three-quarters to Hezekiah Usher, Jr., and one-quarter to Samuel Nowell, who had married the widow of the elder Usher. Both of these parcels of land were afterwards conveyed, on May 11, 1687, to Jonathan Tyng, of Dunstable, in trust for his son John, a nephew of Hezekiah. On December 3, 1713, Tyng in his own name transferred the farm to William Farwell (supposed to be the father of Henry Farwell, of Revolutionary fame) and John Sollendine, both of Dunstable. From that time the chain of title can be readily traced.

As has been before stated, the controversy between the owners of the farm and the proprietors of Groton, respecting the title to this farm, was not settled until 1681, and at that time a survey of the farm was taken and a plan made by Jonathan Danforth, of Cambridge a noted surveyor, who ran the lines of the Groton plantation. This map of Nonaicoicus farm is drawn upon parchment, and is now in the possession of Mrs. Sarah J. S. (Nutting) Bennett, wife of Charles Curtis Bennett, of this town, having come into her hands through the owners since Hezekiah Usher's time. Upon the face of it, in the handwriting of Mr. Danforth, is the following memorandum :

"Major Willard's farme at Groaton. The bounds of it renewed & a plat-forme of taken at the request of ye worshipfull Sam^{ll} Nowell, Esq., & Mr. Hezekiah Usher, owners. the bounds of ye a holl were shewed by Sorj.

James Knapp and James Prescott appointed by ye selectmen of that towne. Also Capt. James Parker and Mr. Henre Willard shew ye bounde who knew them of old. & it was agreed of all hands that these were the exact bounde known & owned in ye Majars days. a record of ye wholl was drawn up & subscribed by bothe parties & agreed ye same should be entered in groaton towne booke & in ye County Records. 8. 4m 1681. Jonath Danforth, Suver.

"this is commonly called ye 400 acres."

Upon this map is shown the location of the major's mansion-house, as it stood at the time of its destruction by the Indians, March, 1676. It stood about one-eighth of a mile almost directly north from the westerly end of Robbins' Pond, and consequently must have been very near the Harvard line. It probably stood upon the ridge or elevation just east of the brook that flows from Robbins' Pond to the Nashua River. As the westerly half of our southerly boundary is presumed to follow the southerly boundary of the farm, and it is bordered on the west by the Nashua River, and on the east by what has since been known as the Calvin Fletcher farm, we are thus able to locate three sides of this farm with tolerable accuracy. The northerly line began at the river on the Holden farm, a short distance northerly of the dwelling-house now occupied by Asa S. Burgess, and ran southeasterly in a somewhat irregular course to a point not far from the easterly end of Spaulding's Pond, between the Fitchburg Railroad and Main Street. On account of purchases and sales along the northerly line of the farm by subsequent owners, the location of that line has become lost.

It is to be regretted that the translation of the word Nonaicoicus cannot be had, as a knowledge of its meaning would add a renewed interest to our history, by enabling us to appreciate whatever geographical or perhaps religious significance the aboriginal predecessor upon this soil attached to what he saw about him. The word has come to us from its connection with Major Willard's farm. To what extent we have it in its original Indian pronunciation cannot now be determined, as in its transition from the unwritten Indian to the written English it has been subjected, not only to the discrepancies found existing between the tongue of one language and the ear of another, and the unconscious liability of perversion, by likening it to sounds with which the bearer is familiar, but, in this instance, to the additional and not inconsiderable risk of distortion through the abominable spelling of those hardy frontiersmen of two hundred years ago. Our connection with the word, while it lacks a variety of original spellers that might, by a system of general average, assist us to arrive at a general result, comes to us from a reliable source. Major Willard was a scholar for his day, and possessed more reverence for orthography than the average of his cotemporaries in America.

The high position of trust and importance he occupied in the Colony shows him to have been a man of learning, while his extensive acquaintaintance and dealings with the Indians gave him a knowledge of

their language and an ability to correctly understand and render it. The earliest use I can find of the name is in the original grant to Major Willard of his Groton farm, and the word "Nanajcoijcus" indicated about how well the Colony officials were able to translate its sound into writing. It is there spoken of as a place, "the place which is called by the Indians Nanajcoijcus." At one time the locality now known as the old mill district, in the northerly part of Harvard, was included as Nonaicoicus. It was there that Jonas Prescott built his first corn-mill. John Prescott, of Lancaster, in his will dated October 8, 1673, and now on the files of the Middlesex County Probate at East Cambridge says, in reference to his third son Jonas: "he has received a full child's portion at nonecoicuin, a corn-mill and other goods."

In the conveyance of Major Willard to his son Henry of the one-quarter of his Groton farm, hereinbefore referred to, which is in the handwriting of Rev. Samuel Willard, the name of the farm is spelled "Nonaicoiacus," thus adding another syllable, and in this instrument it is still spoken of as a place. In the conveyance by Major Willard's widow to the Usher heirs, it is spelled Nonaicoicus, which spelling has since been retained. The will of Hezekiah Usher, Jr., is dated "Nonaicoicus, August 17, 1689." In the original grant of the farm to Major Willard, above referred to, the name of the locality is also given to the brook. Danforth, in his survey of the farm, in 1682, spells them both "Nanaicoicus." Since that time the word has been variously spelled and distorted. As good an authority as Caleb Butler ought to have been, spelled it "Nanicanicus." The same error appears in the Atlas of Middlesex County, published by Beers & Company (New York), 1875, it being undoubtedly copied from Caleb Butler's map of Groton of 1829. The word is sometimes contracted to Coicus, Coycus, Coiacus and Coyacus.

In the deed of John Sollendine to James Park, dated on May 18, 1738, the farm conveyed is spoken of as "at Nonaicoicus," and the hill in the south-west part of the town is called "Coicus Hill," speaking of it as if the name was at that time a well-known one for that eminence.

In the description of the land of John Farnsworth, recorded December 9, 1680, the bridge across James Brook, near the house of George H. Brown, is mentioned as "the bridge that goes to Nonaicoicus."

These Indian names are in link, connecting us with those pre-historic days, and there is about them a euphony that is more pleasing as time wears on; and it is to be hoped that Nonaicoicus, the only Indian name that is exclusively our own, may be attached to some landmark of pleasing importance.

One of the reasons that induced Major Willard to remove to his Groton farm was undoubtedly that he might be nearer his son, the Rev. Samuel Willard, then minister of that place. Samuel Willard, whose portrait, a gift of Hon. Samuel A. Green, of Boston,

is hung in our public library, was the minister of Groton from 1663 to 1676. He removed to Boston at the time of the abandonment of the town, in the latter year, and never returned. He was subsequently pastor of the South Church, and as such baptized Benjamin Franklin, who was born on Milk Street, nearly opposite the church edifice, the rite being administered when Franklin was but a few days old. Subsequently Samuel Willard was president of Harvard College. He died on September 12, 1707.

For nearly forty years immediately following the Pequot War the Colonies remained substantially at peace with the various Indian tribes among them and on their frontier. It was the policy of the English to encourage the petty jealousies between the different tribes, and thus prevent a coalition of any serious magnitude. In the mean time the Colonies were rapidly increasing in wealth and population.

Philip, the Sachem, commonly known as King Philip, was the ruler of the Wompanoags, an inconsiderable people numbering scarcely 300 warriors. The amount of territory possessed by this tribe was small, as Philip's father, Massasoit, had conveyed nearly, if not all, their territory to the Colonies. Philip was a man of remarkable sagacity and judgment both as a statesman and warrior. He perceived with alarm the rapid increase of the English, and appreciated the existence and cause of the jealousies that prevented the union of the Indians against what he considered to be their common enemy. He foresaw that a conflict of race was inevitable, and determined to strike the blow before his people became hopelessly in the minority. Had his plans been perfected, the calamity known as King Philip's War would have been far more serious than it was; but by a *coup d'etat*, the murder of Sassamon, he precipitated the conflict. The execution of the murderers revealed the rising cloud of the conspiracy, and forced Philip to take the field with unperfected plans. The first attack was made at Swanzey, June 24, 1675, and the second at Mendon, July 14th. August 2d, Captains Hutchinson and Wheeler, with their party of horse, and accompanied by several of the principal inhabitants of Quabaog (now Brookfield) were attacked about four miles from that place and eleven of the party killed. The rest retreated and barely succeeded in reaching the town; the Indians following closely, and burned all the dwelling-houses and most of the other buildings in the place, except the one in which the soldiers and inhabitants had taken refuge. The alarm in which these calamities placed the unprotected towns on the frontier may well be imagined. Every one naturally expected that their home would be the next place of attack, and immediate measures were taken to organize the best forces that their limited means and distance from each other would permit. Military regiments and companies were organized, and moved from place to place, according as they apprehended

danger of attack. At this time Major Willard had been in command of the Middlesex regiment for more than twenty-one years, and, being second in command in the Colonies, his services were immediately demanded, and although well advanced in years, he immediately responded.

One of his first acts was to march to the relief of Brookfield, accompanied by Captain Parker, of Grouton, with forty-six dragoons and five Indians, the latter being employed as guides. They reached the besieged town shortly before light on the morning of August 4th, and after a stormy fight relieved the garrison, who had been closely pressed, the house having been set on fire several times. I here append the earliest account of this rescue—that written by Capt. Thomas Wheeler, of Concord, who was in command of the besieged town at the time. After narrating the preceding events, and the dangers to which they were exposed, he proceeds :

"Our danger would have been very great that night (Aug. 4) had not the only wise God (blessed for ever) been pleased to send to us, about an hour within night, the worshipful Major Willard, with Captain Parker, of Grouton, and forty-six men more, with five Indians, to relieve us in the low estate into which we were brought. . . . And God, who comforteth the afflicted, as he comforted the holy Apostle Paul by the coming of Titus to him,—so he greatly comforted us, his distressed servants, both soldiers and town inhabitants, by the coming of the said honoured Major and those with him. His coming to us so soon was thus occasioned: He had a commission from the Honoured Council (of which himself was one) to look after some Indians to the westward of Lancaster and Grouton (where he himself lived), and to secure them, and was upon his march towards them on the aforesaid Wednesday, in the morning, August 4th, when tidings coming to Marlborough by those that returned hither, as they were going to Connecticut, concerning what they saw at Brookfield, as aforesaid, some of Marlborough, knowing of the said Major's march from Lancaster that morning, presently sent a post to acquaint him with the information they had received. The Major was gone before the post came to Lancaster; but there was one speedily sent after him, who overtook him about five or six miles from the said town. He being acquainted that it was feared that Brookfield (a small town of about fifteen or sixteen families) was either destroyed or in great danger thereof, and conceiving it to require more speed to succour them (if they were not past help) than to proceed at present, as he before intended, and being also very desirous (if it were possible) to afford relief to them (the being then not above thirty miles from them), he immediately altered his course, and marched with his company towards us, and came to us about an hour after it was dark, as aforesaid; though he knew not then either of our being there nor of what had befallen us at the swamps and in the house two days before.

"The merciful providence of God also appeared in preventing the danger that the honoured Major and his company might have been in when they came near us. . . . Our enemies, skillful to destroy, endeavored to prevent any help from coming to our relief, and therefore sent down sentinels, . . . the farthest about two miles from us, who, if they saw any coming from the Bay, they might give notice by an alarm. And there were about an hundred of them, who, for the most part, kept at an house some little distance from us, by which, if any help came from the said Bay, they must pass; and so they intended (as we conceive), having notice, by their sentinels, of their approach, to waylay them, and, if they could, to cut them off, before they came to the house where we kept.

"But, as we probably guess, they were so intent and busy in preparing their instruments for our destruction by fire, that they were not at the house where they used to keep for the purpose aforesaid, and that they heard not their sentinels when they shot; and so the Major's way was clear from danger till he came to our house. And that it was their purpose so to have fallen upon him . . . is the more probable in that (as we have since had intelligence from some of the Indians themselves) there were a party of them at another place, who let him pass

by them without the least hurt or opposition, waiting for a blow to be given him at the said house, and then they themselves to fall upon them in the rear. The Major and company were no sooner come to the house, and understood (though at first they knew not they were English who were in the house, but thought that they might be Indians, and therefore were ready to have shot at us,—till, we discerning they were English by the Major's speaking, I caused the trumpet to be sounded), that the said Captain Hutchinson, myself and company, with the town's inhabitants, were there, but the Indians also discerned that there were some come to our assistance; whereupon they spared not their shot, but poured it out on them. But through the Lord's goodness, though they stood not far asunder one from another, they killed not one man, wounded only two of his company, and killed the Major's son's horse. After that, we within the house perceived the Indians shooting so at them, we hastened the Major and all his company into the house as fast as we could, and their horses into a little yard before the house, where they wounded five other horses that night."

"The Honoured Major Willard stayed at Brookfield some weeks after our coming here, there being several companies of soldiers sent up thither and to Hadley and the towns thereabouts, which are about thirty miles from Brookfield; whither also the Major went for a time, upon the service in the present warr, and from whence, there being need of his presence for the ordering of matters concerning his own regiment and all the safety of the towns belonging to it, he, through God's goodness, returned in safety and health to his house and dear relations in Grouton."

The cotemporaneous authorities give abundant evidence of the valuable and timely aid rendered by Major Willard in the relief of Brookfield. It is certain that had he not acted with promptness, that the entire town would have been destroyed, and the inhabitants massacred. After leaving Brookfield Major Willard went with the larger part of his forces to the town of Hadley, where he left Captains Lathrop and Beers with their companies. He then returned to Brookfield and shortly after to Boston.

While Major Willard was upon this journey he wrote several letters to the Council, but unfortunately they are not on file in the archives of the Commonwealth. That they were in relation to the expedition in which he was engaged, seems clear from the following answer by Secretary Rawson in behalf of the Council, written August 24th :

"Major Willard. Sr., we rec'd. 2 or 3 letters from you, where in we understood that our forces cannot meet the enemy. The Lord humble us under his afflictive hand. Touching the ordering and disposing the forces under your command, we cannot particularly direct what to do; only, in general, we hope you will endeavour to your utmost to distress your enemy. Also we think it incumbent upon you to employ your garrison to fortify your garrison at Quabogue what you may. And also we propose, whether it be not advisable to send a party of soldiers to ye Nipmuck towns of Wabquisite and Manexit (?), where there is good store of corn. Possibly some Indians may be about those places to get food; and if you can engage any person, English or Indians, by promise of reward, to scout abroad, to discover where the enemy lurket, and to bring you tidings before a great body march to them, and if they do march upon any discovery, will it not be best to march in the night as secretly as you can, and, when you come near the enemy, to leave an ambushment(s), and by a retreat, after a little charge, to draw the enemy into the ambushment? And, further more, we advise, if you send to the towns where the corn grows, not to cut it up, but rather preserve it; for, it being near ripe, cutting up will not destroy it: and though at a distance, yet we conceive the scarcity among divers English is like to be such that necessity will find some to fetch it from thence. We have inclosed a letter to Major Pincheon, which we desire you to peruse and seal; whereby you may perceive our apprehensions touching sending forces to secure those towns. But yet we advise, if you think fit, to ride up with a guard to Springfield, and give Major Pincheon a visit, and encourage him and the people in those parts. Touching sup-

ply of those small particulars you send for, order is given to the committee to send them. So, committing you to the Lord, desiring his presence with you and guidance of you, with our love and respects to yourself and rest of your officers, we remain,

"E. R. S.

"Past 24 August.

"Pray do the best endeavour to send the wounded men home as soon as possible."

Upon his return from Brookfield and Hadley, Major Willard resumed his duties as commander of the Middlesex Regiment, his time being expended in making provisions for the defences for the frontier towns, establishing garrisons, issuing orders and directing the movement of the troops and performing such further duties as the exigency of the times required. During all this time his residence was at Nonaicoicua. Here was the rendezvous of the troops, and, without doubt, it was one of the most important military posts upon the frontier.

About this time the Council, being undoubtedly informed of the situation, gave orders to detach eighty men from Major Willard's regiment, to take part in an expedition to Pennecook. Major Willard immediately communicated to the Council his views, which were contained in the following letter, and succeeded in convincing that body that his position was the correct one for the hour, for the withdrawal of the troops was countermanded:

"Honourable Gentlemen, the Governour and Council:

"This afternoon, we had, according to your order, discourse with Captain Hinckman in reference to his actings in his way as to the commission he received from you. He is to take eighty men from our garrisons—that is all we have—or more: and we stand in need of more but we dare not be so bold. Our corn, that little we have, its time it were gathered; but, if our scouts be taken off, here is little to be gathered, and many will hardly be kept with us, but will run away from all our towns. You haply may think we are afraid. We will not boast there about; but we dare say our lives are not dear unto us in any way that God shall call us to. Our thoughts are that it is not advisable to marche up to Pennecook, where they are many Indians at the present, yet many abroad about all our towns, as appears daily period. But our present thoughts are that it might be, for the present safety for the country that a garrison was settled over Merrimack River about Dunstable, that there may be intercourse between our towns and that garrison.

"We have appointed (?) Captain Parker and Lieutenant Hinckman, who will relate things to give you real light much further than it's meet now to do, or than time will permit. We are not willing to trouble you any further, but rest your humble servants.

"SIMON WILLARD,
"SAMUEL ADAMS,
"JAMES PARKER,
"JAMES KROGER.

"Groton, this 25th, 7, '75."

"2. Captain Henckman, in his letter to the Governour, dated Chelmsford, Sept. 21th, 1675, says that, in pursuance of his instructions, he and his Lieutenant met at Major Willard's the last day of the week, with the captains of the several towns directed to, as well for the drawing-off of the soldiers as to advise with them. For the first, they promised that they should be sent to Chelmsford at any hour's warning, and so will be ready here by that time. . . . The Major and the rest of the officers will advise no other motion than about this and other towns, but I understand the intent of the Honourable Council to be that I should march to Penny-Cook, although not named in my instructions, etc."

So active was Major Willard in the guarding of that part of the frontier under his charge that the Indians made no disturbances, and the settlers began

to have such a feeling of security that the inhabitants of Groton expressed themselves as entirely satisfied at the charge of supporting the soldiers detailed for their protection. During all this time it became frequently necessary to discharge some of the soldiers and secure forces in their places. We find memoirs here and there which show the continued employment of the commander in this business in the months of November and December.

Early in February, 1676, Major Willard received orders from the Council to raise a body of troops and dragoons to range the country between Groton, Lancaster and Marlborough. The forces placed under Major Willard's command at this time were entirely inadequate for the performance of the duties thus devolving upon him. The principal security consisted in garrison-houses in the frontier towns, constructed in such a manner as to hold out until the arrival of assistance, and the business of the troops was to go from point to point to protect or relieve the besieged inhabitants. With such means as were at his disposal Major Willard was constantly employed to protect the inland towns. His duties were such that he was unable to take a seat at the Council board.

About Feb. 16, 1676, John Parker and his son were fired upon after leaving Major Willard's house at Nonaicoicus, but both, being in the saddle, managed to make good their escape, although the son was badly wounded.

The incursions of the enemy, which had been drawing nearer and nearer, and the fear of which had become intense among the inhabitants of Groton, were now to be realized at that place. In the mean time the major, with an insufficient force at his command, had been ranging the country back and forth to ward off, if possible, the threatening calamity. He, however, found it to be necessary to abandon the house at Nonaicoicus, and removed his family to the centre of the town. His house lay upon the outskirts, and was the first to be destroyed. There are several cotemporary accounts of the destruction of Groton, in which the burning of the major's house is mentioned. They differ from each other somewhat in the details as well as in the dates. I here quote a few as showing the esteem in which the major was held, and the importance with which his house was regarded:

"The 14th of March the savage enemy set upon a considerable town called Groughton and burned Major Willard's house first (who with his family removed to Charlestown), and afterwards destroyed sixty-five dwelling houses more there; leaving but six houses standing in the whole town, which they likewise furiously attempted to set on fire; but, being fortified with arms and men as garrisons, they with their shot killed several of the enemy, and prevented so much of their design. Nor do we hear that any person on our side was here either slain or taken captive."

"The seventh of March following, these bloody Indians march to a considerable town called Groton where first they set fire to Major Willard's house and afterwards burnt sixty-five more; there being seaventy two houses at first; so that there was left standing but six houses of the whole town."

"The Indians laid siege to the Groton houses in which the inhabitants

had taken refuge. These they were unable to subdue, and the inhabitants held out until Major Willard arrived with seventy troops. About the same time there came forty foot from Watertown to their relief. The Indians fled upon their approach and the inhabitants abandoned the town and took refuge in other places."

It is supposed that Major Willard remained in Groton with the Essex and Norfolk troops until March 21st. A short statement in Major Willard's handwriting shows how he was employed from March 21st and 29th. It shows that he was constantly upon the move every moment of his time, devoting it to the protection of the defenceless people of the frontier. His last public appearance was the term of County Court in Cambridge, on Tuesday, April 4, 1676, where he resided. He died at Charlestown in April, 1676.

James Patterson, who moved into this vicinity from Dunstable in 1715, and purchased of John Sollendine one-fourth part of the Nonaicoicus farm, was a son of James Patterson, a soldier in the army opposed to Cromwell and the Commonwealth. He was taken prisoner at the battle of Dunbar Sept. 3, 1650, and transported to America by the order of the Protector, and settled in Billerica. His house was a garrison in King Philip's War, and for his services in this war, he was granted a tract of land in Narragansett Number 6, which is now Templeton. James Patterson, the son, resided here until his death, in 1738. His dwelling-house was in the westerly part of the town, in the vicinity of what is now the Lewis Blood place.

Hezekiah Usher, Jr., who was a part owner of the Nonaicoicus farm from June 20, 1679, to May 11, 1687, was the son of Hezekiah Usher, a prominent merchant of Boston, whose tomb and that of his son, Lieut.-Gov. John Usher, may be seen in the north-easterly corner of the King's Chapel burying-ground, resided upon the Nonaicoicus farm. The farm continued to be called the Usher farm for several years after Usher had conveyed it to Jno. Tyng, of Dunstable, in trust for his son John, a grandson of Usher, Senior. Hezekiah Usher, Jr., married Bridget Hoar, the widow of President Leonard Hoar, of Harvard College, who was the daughter of John Lisle, one of the commissioners of the Great Seal under Cromwell; but the marriage was not a happy one. She left him and went to England in 1687, and did not return until after his death, which took place at Lynn, on July 11, 1697. Usher's will is dated Nonaicoicus, August 17, 1689, and in it he refers very plainly to his domestic troubles, and bitterly blames his absent wife. Usher was a man of morbid temperament and hardly responsible for what he wrote. He says himself that some people may attribute his will "to melancholy or distractedness," which is probably the correct way of judging him. The document which is long and quaint is published in full in *The Historical Magazine* (Morrisania, N. Y.) for September, 1868 (pages 120-122).

It was upon the Usher farm that one of the garrison-houses of Groton was stationed in the year 1692,

being occupied at that time by Samuel Bennett,—— Bennett and three soldiers—in all five men. Mr. Butler, in his "History of Groton" (page 91), gives it as his opinion that this garrison was in the southeasterly part of Groton, now included in Littleton, basing his conclusions on the fact that there is a brook in that vicinity named Bennett's Brook. It is, however, clear that the Usher farm was none other than the Nonaicoicus farm. From an examination of the conveyances, I am of the opinion that this garrison-house was situated in the vicinity of the Lewis Blood place, so called, between our village and Mitchellville, as the deeds immediately subsequent to that show clearly that the dwelling-house was in that locality. In fact, the first hamlet in the southerly part of Groton was there.

John Sollendine, who, with William Farwell, was at one time a part owner in the Nonaicoicus farm, was a resident of the town of Dunstable and one of its most prominent early citizens. It is probable that he never resided here.

Moody Chase was a grandson of Aquilla Chase, of Newbury, Mass., and one of the first settlers in the colony. He was born at Sutton on September 23, 1723, and married Elizabeth Hale, of that town, on January 17, 1748. On June 30, 1777, he purchased of Oliver Farwell several parcels of land, being the westerly part of Nonaicoicus farm, and moved there shortly after, where he continued to reside until his death, which occurred April 7, 1815. In his early life he took a great interest in the education of the Indians, and he was the leader of the company who cleared the lands in Hanover, N. H., where the venerable Doctor Wheelock established an Indian school, from which Dartmouth College took its rise. He was one of the petitioners for the set-off to Shirley of a portion of land on the easterly side of the Nashua River, that, upon the incorporation of the town of Ayer, was annexed to this town. His house stood not far from the Lewis Blood house.

Moses Willard, a grandson of Major Simon Willard, was born at Lancaster about 1702, and married at Groton, on September 28, 1727, to Susanna Hastings. Between 1723 and 1733 he resided near the Lewis Blood place, in the westerly part of our town, on a part of the Nonaicoicus farm territory. About 1733 he removed to Lunenburg, and there joined Captain (afterwards Colonel) Josiah Willard in obtaining from the Province of Massachusetts the grant of the town of Winchester, and became one of the grantees. A new charter was obtained from the Province of New Hampshire in 1753, it having been ascertained to be within the limits of the latter Province. Much of his time seems to have been passed within the new township and guarding the frontier of Fort Dummer and Ashuelot. He was an early inhabitant of Charlestown, New Hampshire, then known as Charlestown No. 4. August 30, 1754, two daughters of Mr. Willard—Mrs. Susanna Johnson, wife of James Johnson,

and her sister Miriam, fourteen years of age, afterward the wife of Rev. Phineas Whitney, of Shirley—were taken captives by the Indians and carried to Montreal. A full account of the affair is given in "The Narrative of the Captivity of Mrs. Johnson," published at Walpole, New Hampshire in 1796. June 18, 1756, when Moses Willard and his son of the same name, were at work upon his farm within sight of the fort, the Indians made a sudden attack upon them. The father was killed and the son was severely wounded, but managed to make his escape into the fort.

Two families by the name of Park settled in this vicinity in the last century. It is probable that they were related to each other, although I am unable to verify that supposition. In 1738 James Park purchased what was formerly the James Patterson farm, in the southwesterly part of our town near the Nashua river. Wm. Park came to this country from Scotland in 1756 and lived here until his death, June 17, 1788. It is supposed that he resided in a stone house built into the bank northwest of the brick house on Park Street, about where Groton Street now is. This stone house contained but one room about sixteen feet square. There was a rude fire-place in the northeast corner, the door and window being on the south side. He was a stone-mason by trade. His wife Anna and his three sons, John, Thomas and James, came to this country in June, 1767. James died in 1778. John, the oldest of William's children, was thirty-six years of age when he came to this country. He purchased of Henry Farwell two lots of land of about one hundred acres each, one on each side of the present Park Street. Like his father he was a stone-mason, and, before coming to this country, he was for seven years in the employ of the Duke of Argyle in building his castle and laying out his grounds. After coming to this country he received repeated letters and liberal offers from the Duke to induce him to return to Scotland. He finally concluded to go, and went to Boston to engage his passage, but upon arriving there he found that the harbor had just been blockaded by the British fleet; consequently he never returned to Scotland. He was the first person to introduce into this country the practice of splitting stones with flat steel wedges. A short time before the Revolution he began building the jail at Worcester, but the war interrupted the progress of the work. It was, however, resumed in 1787 and completed the next year. In 1789 he built the jail at Concord, Mass. In 1791 he built the brick house on Park Street, which was the first brick house erected in Groton. Upon the southwest corner, about fifteen feet from the ground, is a stone sun-dial on which is the following inscription:

○○○○○○○○○○○
 J. P.
 1791.
 ○○○○○○○○○○○

In 1793 he began building the jail at Amherst, N. H., and died August 15th of the same year, in conse-

quence of an accident in the course of the construction of the jail.

Stuart James Park, son of John, was born Feb. 7, 1773, in the dwelling-house formerly standing on the site of the cottage house on the westerly side of Park St., and just north of the old Park House, now occupied by Douglas C. Smith. Like his ancestors he was a stone-mason. He built the jail at Portland about 1798, the jail at North Hampton about 1801. In 1803 he, with his brother John, contracted to build the Massachusetts State's Prison at Charlestown and completed the same in 1806. In 1808 he contracted to build the Vermont State's Prison at Windsor, and completed it in 1810. In 1811-12 he built the New Hampshire State's Prison at Concord. In 1816 he was employed by the State of New Hampshire to superintend the construction of the State House at Concord. Between 1820 and 1822 he was superintendent in the construction of the mill-dam, now the lower end of Beacon Street, in Boston. After that he built the jail at Dover, N. H., and in 1824 was employed by the County of Middlesex to superintend the construction of the County buildings, at Newburyport, Mass. In 1827 he was employed by the Navy Department to superintend the construction of the dry dock at Charlestown Navy Yard.

In Drake's "History of Middlesex County," it is stated that Colonel William Prescott, who commanded the Colonial forces at the battle of Bunker Hill, was born on Park Street, near the brick house. However gratifying to our local pride such a belief might be, it is but justice to truth to state that there is no foundation for such tradition. Colonel Prescott was undoubtedly born at the Centre. The owners of what is now the Nathaniel Stone and John Mills farms can be readily traced from the grant to Major Willard to the present owners, and it is certain that the land was never owned by the Prescott family, who always resided at the middle of the town.

CHAPTER LI.

A Y E R—(Continued).

Highways—Fords—Bridges—Taverns—Maps and Plans.

THE early highways were naturally very imperfect, being in many instances but rude paths through the forests, following in some cases the Indian trails and in others the paths made by the farmers' cows.

The population was much scattered, and good roads were a luxury they could ill afford. Very little labor was expended in the construction of highways, and distance was sacrificed to the selection of the route most feasible for immediate use, with the least possible expenditure of labor to render it passable. Consequently many of the ancient ways were subse-

quently abandoned for routes that, by a little outlay, would be more direct and more readily passable at all seasons of the year. As the farmers naturally settled along these highways, their location serves as landmarks that enable us to know where our ancestors upon the soil lived.

Groton was settled upon the frontier. Her nearest neighbor, Lancaster, was fourteen miles to the southwest and there was naturally between the two settlements a community of interest and dependence, and consequently a necessity for interchange of products and protection. The first communication was doubtless had immediately after the settlement of Groton, and when the intervening territory was to the settlers a trackless and unknown wilderness. Naturally they took the most favorable portion of the year for their journey and selected the most accessible and legible route. The settlements being on opposite banks of the Nashua River, that stream served as a more than compass and guide to wayfarers through the forest. The intervals along the river, being generally unwooded, afforded at certain seasons a ready progress. Consequently, as we would naturally expect, the first highway between Lancaster and Groton was in the vicinity of the Nashua River, and it was undoubtedly the first highway ever constructed or used through the territory now within the limits of Ayer. It was at its best but a very rude cart-path, and but little labor was expended upon it. It is probable that for the first few years this road was used, each traveler was forced to pick his way the best he could, and that wherever possible the streams were forded. The first record of the expenditure of any money upon this way was in the month of December, 1663, when the following vote was passed at a meeting of the proprietors of Groton :

"(2.) Due to Ric Blud & Joh. Lakin for laying out the hie-way to Lankester twenty shillings when they have perfeted the work we they Engage to doe soone."—"Early Records of Groton," p. 10.

Judging from the meagre appropriation, the inhabitants were either expecting a poor highway or were relying upon a public spirit on the part of their committee, to which the present generation is a stranger. If the highway was built along the river, as we have supposed, it would naturally be unstable, and at certain seasons of the year impassable, and the labor of maintaining it greater than a route upon higher and firmer ground. Such we find to have been the fact, as appears by the following votes by the proprietors of Groton :

"At a meeting of sselect men may 28, 73 Sergent Parker and corperall knop wer chussen a comitte to meet with lancaester man for the altering the high way to lancaester."—"Early Records of Groton," p. 46.

"Wednesday 5 of June 1673 forasmuch as the countrey hie way as it was formerly layd out by Lancaester and groaton vpon seuerall yeares triall, proued to be very insufficient and very difucult to be made passable in regard it was for the most part lyeing to the (Intervalles wheirin there are seuerall soft places and litle brookes vpon which bridges and other mater for making the same passable is apt to be raised and torne vp by flood-) and vpon experiance of the same Lancaester made aplication to groateu for Remouing of the said way to Run more vpon the vplaud

which was Readily attended and John Prescott seir and Roger Sumner for Lancaester and sergent Perker and corperall Knop for groateu wer chose committe by both to towne to lay out the said hie way as aforesaid which was atended the day aforesaid as followeth (viz) first within the bounds of groateu they toke their begining at their meeting-house to the mille of Jonas Prescott by Matthias farnsworths his house six Rods wide turning of out of the common mill-way near twenty Rod aboue the mille and then it Rone 4 Rode wid through the land of the aforesaid Jonas Prescott acording as it is described by trees marked by the men aforesaid and from the said Jonas Prescotts land to penicooke Riuer in Lancaester through ewan swamp 6 Rod wide as it is already marked out by the comitte aforesaid and from the way aforesaid butting vpon Penicook near to the night pasture wading place, they tak the way as it is left in width through the Intervayls and ouer nashaway bridge and soe to the meeting-house and as it is to be vnderstood that the way within lancaester bounds Runes neare the midway betweana the brook meadow and pluntrees meadowes ouer a hill called Mahaneknits hill and soe along on the vplaud to the pond path as it Runes near to the Still Riuer meadow and Josiah Whits meadow vntill it come to the Swan Swamp path as afores id and to the confirmation herof of the comitte aforesaid haue here vnto put their hands the day and year aboue said.

"JOHN PRESCOTT
ROGER SUMNER
JAMES PARKEE
JAMES KNOP."

("Early Records of Groton," p. 46.)

No portion of the first Lancaster highway is now in use as a public road in this town; but from its known location in Groton, and the few traces of it that can be seen in our limits, its site can be determined with considerable accuracy. Farmers' Row Road in Groton is known to be a part of it. From the description given in a deed from John Sollendine to Nathaniel Smith, October 23, 1727, the location of the bridge over which the highway crossed Nonaicoicos Brook is given, and traces of this bridge may still be seen on the farm of Asa S. Burgess. Between this brook and Farmers' Row the geography of the country would seem to indicate that the location of the road was not far from, and more than likely follows, the old road through the woods from the junction of the highway near Page's Bridge to the house of Asa S. Burgess. On the northerly side of the road to Shirley Village, a short distance easterly from the house of Nelson Root, can be seen the cut in the bank by which this road ascended from the meadow, and if, for the purpose of still further confirming the above, we would be permitted to deal with the history of Harvard, we will find that the highway now in use from the junction of the roads, a short distance southerly from Mitchelville to house of Henry Mead in Harvard, is in line with the location of the Lancaster highway above given and is probably the original highway itself. Upon Mr. Mead's farm are to be seen the remains of abutments of a very old bridge that at one time crossed the Nashua River into Lancaster, a few rods southerly of Lancaster's northerly line. As this latter bridge is in almost a direct line between Lancaster and Groton, and about midway between the two towns, and between it and Lancaster there is an ancient road now in use to within a few rods of this bridge, and the second highway to Lancaster would appear to converge toward it on the easterly side, there seems to be good evidence from which to believe that the Groton and Lancaster

highway crossed the river at this point at a very early day.

The "Intervales wheirin their are seuerall soft places and litle brookes vpon which bridges and other mater for making the same passable is apt to be raised and torne vp by floods," undoubtedly refers largely to meadows in this town upon Nonaicoicus and James Brooks. From our knowledge of these meadows and brooks, we can readily appreciate the difficulty they presented to these early highways.

At a meeting of the selectmen of Groton, February 16, 1670, the description of the location of the then existing highways in the town was made and recorded. These descriptions are as a rule very meagre and indefinite, but the location of some of them can be determined at the present day. The following appear to be either wholly or partly in this town:

"1 Lanchester hye way from our meeting house to James his brook six poll wide as the Rood now lye ouer James his brook Bridge and soe to continue 6 po [11] wide to nashaway meeting house according to the committees order."—*Early Records of Groton*, p. 32.

This is the first Lancaster highway, the location of which I have attempted to give.

"4 A high way going out of Lanchester Rood near John pages of four poll wid so going into the way that goe to mill near Benjamin crisps which high way was ptly purchased of Samuell danis Richard holden Daniell peirce and James Knop butting vpon William Longley John Morse vpon the west and Thomas Tarball James Knop on the east and the rest of the way going through thos mens lots for mentioned and satisfaction giuen them to their content by the towae committee."—*Early Records of Groton*, p. 33.

This is probably the highway that leaves Farmers' Row near the Groton School, passes to the east of the brick school-house near the John M. E. Gilson place, and crossing the Boston and Maine Railroad joins our main road to Groton near the stone quarry north-east of the poor farm.

"A high way going out of Lanchester roode of four polle wide going to the south end of the generall field lots next to James his Brook bounded south with Richard holdens swamp and medow and John Morse north with the land of John Sawtell and Richard holden from which their goe a high way along the generall field till we com to the common land by Samnell Danis the said way beeing four poll wid running between Richard holden and the general feild."

Probably the highway crossing James Brook near James F. Culver's and running westerly toward Page's bridge.

"And near about the midle of that way their goeth a high way of four pole wide downe the generall feild to the neck vpon the riuer."¹

Probably not now in use.

"And for the mill Road between James ffisk and Samuel Woods Run a way to the mill of sixe poll wide excepting by the house of Richard Sawtell from James ffiskes stake to Richard Sawtells house soe running of six poll wid till we come to Matthias farnworths land continuing 6 poll wid to the mill leadlog to the mill."²

As this highway is, excepting a very small part, now in use as a public way in this town, and its entire location can be accurately determined, it deserves more than a passing notice. The successive efforts

that were made by the inhabitants to procure the erection of the mill at which their corn could be ground, is treated more at length in another chapter. It finally resulted, in 1665, in a contract with John Prescott, of Lancaster, who erected a corn-mill, the site of which is now within the limits of Harvard. To reach the mill a new highway became necessary, and it was laid out with a prodigality due, perhaps, to a great abundance of land or from a sense of the importance of the enterprise. This highway enters Ayer from Groton, near the dwelling-house of Henry A. Gilson, from which point to near the dwelling-house of Edgar A. Hastings its location is the same as now traveled. From this point to the dwelling-house of Charles Livingston the highway passed at the foot of the ridge a short distance north of the present Main Street; the latter portion was in use up to about twenty years ago.

From this latter point to Harvard line the highway is now traveled substantially as laid out, though it probably originally passed to the west and south of what was subsequently the Calvin Fletcher farmhouse. The mill highway became the new Lancaster highway in 1673; part of it was re-located as Lunenburg and Littleton highway in 1762, and the whole was subsequently the stage line between Groton and Worcester.

"and out of that way Run a way to Rock medow near to Matthias farnsworth end the wayes runing thowp pt of his hund oe [ar] the place wheir the wayes are now improved."³

The northerly end of this way is now known as Snake Hill road. It leaves the Mill highway between A. W. Lewis's and the Gaut places, passes along the westerly side of Sandy Pond, easterly of the dwelling-house now occupied by William Hendricks, and enters Harvard southeast of Rural Home. It was discontinued between the Mill highway and dwelling-house recently occupied by John B. Bagin, Nov. 2, 1869.

Major Simon Willard, of whom more is said in another chapter, lived in Groton from some time in 1671 to the spring of 1676. The location of his mansion-house on Danforth's map, made in 1682, shows it to have been near our southerly line and almost directly north from Robbins Pond. He was a man of great prominence. He commanded, and his house was the rendezvous of, the Provincial troops assigned for the protection of the frontier between Groton, Lancaster and Marlboro' during King Philip's War. His house was not built upon any then existing highway, and to its presence and necessities are doubtless due the considerable number of highways radiating from its site. When Major Willard removed to Groton the first Lancaster highway was in use, and the two roads, one running northwesterly to near the Lewis Blood place, and the other southwestly to the Shabokin road, were doubtless built between 1671

¹ Early Records of Groton, p. 33.

² Early Records of Groton, p. 34.

³ Early Records of Groton, p. 34.

and 1673 to connect with it. The Sculley road, so called, was probably built about 1673, as a way from Major Willard's house to Groton, and very likely crossed Nonaicoicus Brook west of the mouth of Waste Brook, and joined with what is now Park Street near the dwelling-house of Bridget Touhey; thence to Groton past Charles C. Wood's, and over James Brook near George H. Brown's. In the location of the land of John Farnsworth, recorded December 9, 1680 (Early Records of Groton, page 182), part of his land is described as "lyeing betwixt the pond at John Page's saw-mill and the bridg that goe to Nonaicoicus." John Page's saw-mill was on James Brook, nearly opposite Mr. Brown's dwelling-house. The present highway from Phelps Mill through Shirley Street and old road to Shirley, crossing the Fitchburg Railroad near John Shea's house, following the base of the hill southerly of the present highway, was built by the towns of Groton and Shirley in 1798, and re-located by the county of Middlesex in 1800.

The Lunenburg and Littleton highway, then so called, was located by the county of Middlesex in 1762. It entered Ayer from Littleton at Pingry Village, passing southerly of Sandy Pond, following the Mill or new Lancaster highway from just east of the bridge over Sandy Brook to near the house of Edgar A. Hasting; thence to near the site of John H. Whitcomb's house; thence through our Main and Park Streets and old road to Shirley and over the Nashua River at Page's Bridge. The straight section between Charles W. Livingstone's and John H. Whitcomb's was located by the county in 1793.

The highway from Sandy Pond School-house to the Ridges was laid out by the selectmen of Groton about 1720, though it had been traveled as a private way for many years prior to that time.

Prior to 1830 there was a road sometimes called Shaker's Lane, from the Lunenburg and Littleton highway on the southerly side of land of Leonard J. Spaulding to Snake Hill road, southeast of Rural Home. It can be readily traced at the present day, and from the Rural Home road to Snake Hill road is now in use as a public way.

The old road to Groton, now known as Groton Street, has been in use for over a century. Formerly it passed to the east of the brick house and south of the Mills house, and united with what is now Park Street between the Mills and Frye houses. It was re-located east of Washington Street in 1856. The present Littleton road, from near the dwelling-house of Oscar A. Balch, easterly past the dwelling-house of James Gilson to the Littleton line at Pingry Village, was located by the county in 1833. West Main Street, from Park Street westerly to the Lewis Blood place and Washington Street, were both located by the county commissioners in 1856. At a meeting held April, 1885, the town appointed a committee, consisting of James R. Gray, Alfred Page and George

J. Burns, with instructions to have all the streets and roads between the junction of the roads north of the poor farm on the north to the Harvard line on the south, and from the Lewis Blood place on the west to the Rural Home on the east, re-located and bounds defined. In accordance with the suggestions of this committee, accurate surveys were made, and the streets as thus located were laid out and established by the selectmen and county commissioners, and adopted by the town. An accurate map of the whole was made, and permanent stone monuments marked "A" erected at all the termini and angles.

FORDWAYS.—As a wet substitute for bridges, fordways are practically unknown in Eastern Massachusetts at the present day. About the middle of the last century there was a well-known fordway over the Nashua River near the dwelling-house of Aas S. Burgess on the Holden farm. It was at one time called the Pierce Fordway, probably from a family of that name who lived on the west side of the river not far from the site of the fordway. Prior to that time mention is made of a Rye Fordway in this vicinity (see Boundary Lines of Groton, p. 83), the exact location of which I am unable to learn. It is more than likely that it is what was subsequently called Pierce's Fordway. Before the meadows were permanently flowed there was a well-known fordway over Nonaicoicus Brook, a short distance southwesterly from the dwelling-house of N. A. Spencer, and another, known as Shaker's Fordway, over Sandy Brook at the Narrows, so called, near the dwelling-house of Frank Mitchell.

December 27, 1669 (Early Records of Groton, p. 28), the selectmen voted to make "a sufficient cart bridge over Sandy Brook." This is undoubtedly the bridge over the Harvard, then the Mill road, a short distance southerly of the pumping station.

In a petition dated January 26, 1747, for the set off of the territory now principally comprised in the town of Shirley, mention is made of a bridge over "Wast brook in Coicors farm whear people Generally pass ouer" (Boundary Lines of Groton, p. 85). From the description given in this petition I am of the opinion that Nonaicoicus Brook and not Waste Brook is intended. In Prescott's map of Groton, Pepperell and Shirley, made in the latter part of the last century, there is shown a bridge over the Nashua river a short distance southerly from the present site of the Fitchburgh Railroad bridge, and it is probably what was subsequently known as Kelsey's Bridge, from Captain Kelsey, who lived on the farm now owned by John Gardmer in Shirley. From the following vote of the town of Groton, passed April 1, 1793, it would appear that this bridge was carried away by a freshet about that time:

"Art. 6. To see if the town will make any grant to Mr. Moody Chase in money, or any other way, to enable him to rebuild the bridge across the Nashua River near his land, lately carried away by the freshet.

"Voted, to give £5 to Mr. Moody Chase for to enable him to rebuild the bridge over the river near his land."

Moody Chase, at that time, owned and lived upon what is now commonly called the Lewis Blood place, and the bridge was upon his farm. Traces of its abutments may be seen to this day.

In 1790 Joshua Longley erected mills at Mitchellville, and induced the town of Shirley to locate near them a new bridge, probably in place of the Kelsey Bridge above mentioned, and another which had recently been washed away near Lovering's in Harvard. In consideration that the town of Shirley would appropriate \$250 towards the building of the bridge, Longley agreed to be at the entire expense of the erection beyond that sum. It would appear by the Shirley records that Longley's Bridge was very imperfectly constructed, and repairs upon it were necessary within three years. In 1842 a covered truss bridge was erected in this place, the work being done by Stillman D. Benjamin. The present structure was built in 1871, the work being done by Benjamin F. Hartwell, of Groton. In 1886 new abutments to this bridge were built by the order of the county commissioners.

The first structure over the Nashua River on the site of Page's Bridge, on the road to Wood's Village, was erected about 1726. The present bridge at that place was built about 1873.

There was a bridge over James Brook, near the dwelling-house now owned by George H. Brown, as early as December 9, 1680. ("Early Records of Groton," p. 182.) The present bridge at this place was built about 1834.

There was a bridge over Nonaicoicus Brook, near its mouth, in 1727. This was probably where the first Lancaster highway crossed that brook.

About 1863 Calvin Fletcher built a bridge across Nonaicoicus Brook at Pulpit Rock, as means of access to his land on the south side of the mill ponds. This structure broke down April 16, 1870, as J. Hartwell Priest was crossing it with a load of wood, and has not been rebuilt.

TAVERNS.—There is something of the old-fashioned hospitality and comfortable leisure associated with the tavern of the days before the railroad superseded the stage-coach that we do not attach to the more mercantile modern hostelry. While we cannot endure the thought of returning to our ancestors' mode of transportation, there is to us a pleasing glamor about the recollections and traditions of the entertainment at the wayside inn. The iron horse seems to have revolutionized everything. The screech of his whistle has dissipated the country tavern. He has made traveling a principle to which all other necessities of life are incidental, while we are indulging in it. We read, eat, sleep and are entertained while being whirled across the country at forty miles per hour. There is now no occasion for those diversions that the tavern found to be necessary to relieve the tedious over-night halts by the way. The travelers are not thrown together now, as they were then, and we do

not feel it to be a duty we owe our fellow-traveler to entertain him, nor do we exact of him a similar duty. The hospitality of the tavern was a business. Before the telegraph and the associated press, we were not called upon to assume that every one knew just as much of the world's doings as ourselves, and consequently we did not deem an apology to be necessary before retailing home or foreign gossip. In the winter evenings the tavern guests would gather around the blazing fire in the public room and exchange experiences, and rumors, and news, or, as a cynical writer has styled it, "swap lies." Thus, the tavern, while satisfying the outer and inner man, furnished the entertainment that his surroundings demanded.

The number of places within the limits of Ayer where the farmer found a convenient home market for his products, by furnishing, for a consideration, a more or less occasional entertainment for man and beast, cannot, of course, be now known. The farmhouse where such an entertainment could not be had was probably the exception. Aside from a license, I am unable to say just what is the criterion that determines when the farm-house ceased to be such and became the tavern.

The earliest records that we can obtain of any taverns being kept in the southerly part of Groton was in 1717, when James Patterson, who resided in the vicinity of the Lewis Blood place on the road from Ayer to Shirley Village, was licensed as a retailer. Abraham Moors, who resided in the vicinity of the Reuben Hartwell place, now owned by George H. Brown, and probably in the identical dwelling-house now standing on the premises, was for many years licensed as an inn-keeper, and the inventory of his estate, as returned to the Probate Court shortly after his death, would seem to indicate that his occupation was that of a tavern-keeper. The most famous tavern kept within the limits of Ayer during the last century was that of George Pierce. Its location has until quite recently been much in dispute. In Drake's "History of Middlesex County" it is given as that of the Calvin Fletcher red house, so called, in the vicinity of the pumping station, and the same statement is made in the history of the Peirce family, published in 1880. There can, however, be no doubt but that this tavern was in the immediate vicinity of the present site of the Phelps Mill, which Mr. Pierce at that time owned, having purchased it of Henry Farwell, April 11, 1758. The mill at that time was located farther to the southeast, near the site of the wood-shed of the Fitchburg Railroad Company, and the tavern probably stood on the westerly side of the brook and northerly side of the old road, on the site of Alfred Page's tenement-house, and was subsequently owned and occupied by Abel Morse. November 21, 1764, George Pierce purchased of Nathaniel Smith the following tract of land, the location of which is too definite to admit of any doubt:

"About 2 acres of land in Groton aforesaid and lies easterly from said George's now dwelling house and east of the brook called Coicus Brook and bounded westerly by said Brook. Northerly by my own land and easterly by the new County road leading to Luosburg and southerly by or near the path that leads to said Pierce's mills and by said house, and is to be understood as to include the barn the said Pierce has lately built on said premises and yards before the same as the fence now stands."

Pierce's farm and tavern were advertised for sale according to the following advertisement in *Boston Gazette*, September 27, 1773 :

"To be Sold at Public Vendue, to the highest Bidder, on Wednesday the 3d day of November next, at four o'Clock in the Afternoon (if not Sold before at Private Sale) by me the Subscriber, A valuable FARM in Groton, in the County of Middlesex, pleasant situated on the great County Road, leading from Crown Point and No. 4 to Boston : Said Farm contains 172 Acres of Upland and Meadow, with the bigger Part under improvement, with a large Dwelling House and Barn, and Out Houses, together with a good Grist Mill and Saw Mill, the latter new last Year, both in good Repair, and on a good Stream, and within a few Rods of the House. Said Farm would make two good Livings, and would sell it in two Divisions, or together, as it would best suit the Purchaser. Said House is situated very conveniently for a Tavern, and has been improved as such for Ten Years past, with a Number of other Conveniences, too many to enumerate. And the Purchaser may depend upon having a good warrantee Deed of the same, and the bigger Part of the Pay made very easy, on good Security. The whole of the Farming Tools, and Part of the Stock, will be sold as above mentioned, at the Subscriber's House on said Farm.

"Groton Aug. 30, 1773.

GEORGE PIERCE."

It would appear that the tavern was not sold according to the above advertisement, for in the *Gazette* of November 15, 1773, the following notice appears :

"The Publick are hereby Notified that the Sale of the Farm in Groton which was to have been the 3d Instant on the Premises, at the House of Mr George Pierce, is adjourn'd to the house of Mr. Joseph Moulton, Inn-holder in Boston, where it will certainly be Sold to the highest Bidder, on Wednesday the 1st Day of December, at 4 o'Clock, P. M."

It would seem that during the period of the adjournment Pierce had made a sale of a part, at least, of the property to Abraham Amsden, the deed of which is dated November 23, 1773, though his name is continued as an inn-keeper in the series of almanacs until 1784.

In the early part of the present century Jesse Stone kept a tavern on the site of the house now occupied by James Gilson, at the junction of the Sandy Pond Road with the highway from Ayer to Littleton. The following advertisement appeared in *The Independent Chronicle* (Boston), September 19, 1808 .

"A FARM—FOR SALE,

"CONTAINING 140 acres of Land, situated in the South part of Groton, (Mass) with a new and well-finished House, Barn & Out-Houses, and Aqueduct, pleasantly situated, where a Tavern has been kept for the last seven years.—a part or the whole will be sold, as best suits the purchaser. For further particulars, inquire of THOS B. RAND, of Charlestown or the Subscriber, living on the Premises.

"Sept. 12.

JESSE STONE."

The property was sold by Jesse Stone to Moses Day about 1812, and by him kept as a tavern until it was destroyed by fire in the spring of 1836.

PLANS AND MAPS.—Like all villages of rapid growth, resulting from suddenly becoming a commercial centre, we existed for several years largely upon paper. Tracts of land were purchased by speculators,

streets laid out and house-lots staked out, having regard solely for the immediate profits to the speculator, regardless entirely of the future relations to the community.

In 1845 the principal farms within our village limits were Calvin Fletcher's, Silas Nutting's, William Stuart Nutting's, John Mills', Nathaniel Stone's and Abel Morse's. The first extended as far west as John Henry Whitcomb's, on Main Street. Silas Nutting's extended from Calvin Fletcher's as far west as the vicinity of Main Street crossing. William Stuart Nutting's was the next and was bounded on the west by Abel Morse's and John Mills', who owned to near the Boston and Maine Railroad. Nathaniel Stone's was north and west of these.

July 31, 1849, William S. Nutting conveyed to William H. Hovey and John M. Merriam a tract of fourteen acres, which subsequently became known as the Hovey & Merriam purchase. It was bounded easterly by Silas Nutting's land, northerly by Nathaniel Stone's farm, westerly by a line about midway between Washington and Pleasant Streets, and southerly by a line not far from the present Newton Street. Walter M. Wilson, of Cambridge, civil engineer, was employed to make a survey of this tract, and his plan which was lithographed and circulated as an advertisement, is known as the Walter M. Wilson plan for Hovey & Merriam. A copy of this plan, now in my possession, shows the railroad tracks and buildings then in our village. On it is the following inscription : "Grand Junction Railroad at So. Groton, Massachusetts. Besides freight and other trains, six passenger trains meet and depart from this place three times a day. This land, which is for sale in lots, as here represented, is within 150 yards of the depot." The purchase was divided into sixty-nine lots, the lines of which, as established by this survey, are, with a few exceptions, existing and recognized to-day. On this plan are also established Washington Street, Newton Street, Cambridge Street, Columbia Street, Williams Street and Nashua Street, and the recent survey of the streets made under the direction of the town was, with the exception of Washington Street, in conformity with this plan. In it is shown a solution of what, to the residents of to-day, appears to be not only inconvenient but meaningless, namely : the sudden termination of Columbia Street and William Street at their junction. The clear purpose of the owners of this tract was to avoid coming in contact with the land of Silas Nutting, and thus opening it to the market, with an advantage equal to that of the land owned by the parties making the survey. By this arrangement, some of the most valuable and sightly land in our village has been, for years, entirely shut out, and until the recent extension of Williams Street has been entirely inaccessible to the public. Had not the obstacles created by this survey existed, Newton Street would probably have long since been extended to the old

road near John Flannigan's, and the town would have received the benefit accruing from a material enhancement to the value of our taxable property.

This is not the only instance in our village that illustrates the necessity for highways being located by a public authority, having in view the general welfare of the community, and not solely the particular gain to the private investor. An interesting feature of the Hovey & Merriam plan is that it shows the location and approximate size of all the buildings then standing in our village; also the location and number of railroad tracks, and is really a photograph of the village in 1849. The buildings then consisted of the present blacksmith-shop, on the easterly side of Columbia Street. The site of the three brick buildings of the Stony Brook Railroad Company was then occupied by three wooden structures, the engine-house nearly on the site of the present one, and just west of, and connected with it, was a wooden shed, that was subsequently extended nearly to Columbia Street. Nearly on the site of the present car-house was a wooden structure of about the same size, then used for a similar purpose. A wooden freight-house stood nearly where the present brick one now is. These three buildings were sold at auction in 1869, the first two purchased by Samuel Reed, and from them was constructed what is now known as the Adams house. The wooden freight-house was purchased by John B. Alley & Company, and is now used for a store-house at the tannery. Besides these was the brick school-house then standing on Fillebrown's lot, a dwelling-house subsequently known as the Park house, occupied the lot where the present Spaulding Block stands. At the corner of Newton and Washington Streets was the house of Andrew J. Gardner. On the corner of Washington and Main Streets was a small wooden building, for years occupied by George W. Stuart as a dwelling-house and country store. Near the corner of Washington and Pleasant Streets was a dwelling-house owned by William S. Nutting, who, at that time, resided where William U. Sherwin now lives, his barn then being in the centre of what is now Pleasant Street, and faced south. Between Main Street and the railroad was the old engine and freight-house, torn down but a few years since.

January 11, 1849, William S. Nutting sold to Winthrop E. Faulkner twelve acres, describing it as meadow, pond and upland. It bounded easterly about as far as the centre of Forest Street, southerly by Nonaicoicus Brook, and westerly and northerly by the railroads. Faulkner sold to Stephen Dow the land since known as the tannery property. The remainder of the land purchased of Nutting was divided into house-lots, the survey being made and the plan drawn by Parker, Stearns & Sanborn, civil engineers of Charlestown. Mr. Stearns, the second

member of the firm, was William S. Stearns, afterwards superintendent and president of the Fitchburg Railroad. This plan was known as the Winthrop Faulkner plan. It is laid out into twenty-one house-lots, the boundaries of which, as shown in that survey, prevail substantially to-day. The engineering firm of Parker, Stearns & Sanborn also made for the firm of Thayer & Lackey a survey and plan of a large part of the land between Union Street and Nonaicoicus Brook, locating the streets now on that tract.

The easterly half of the southerly portion of Forest Street was on the land of Silas Nutting, the street being a joint contribution of Nutting and Faulkner. Rufus Brooks, who at that time owned the Wheeler place, was unwilling to contribute anything for the maintenance of a street, and a strip of land one foot wide was left between him and the street.

John Bligh purchased of Mr. Faulkner four lots, and located what has since been known as Bligh Street. That portion of William S. Nutting's farm west of the Hovey & Merriam tract was surveyed and lotted by Cyrus A. Latham, civil engineer. Nearly all these lots were sold by Mr. Nutting in his life-time. The balance of William S. Nutting's farm, lying on the northerly side of Main Street, was sold at auction by him at different times. Prior to 1860 nearly the whole of the original farm of William S. Nutting had been sold and built upon. It thus coming readily into market, materially assisted the growth of our village, and if the owners of other farms had manifested a like disposition to have disposed of their land, rather than hold it to wait a fabulous rise, that they believed would result from a land famine, the size and prosperity of our town would have been greatly enhanced, and they would have received their share of the benefit thus resulting.

The remainder of the Phineas Nutting farm, namely, that part held by Silas Nutting, was, so far as sold by him, disposed of in small lots. It was surveyed in three sections, the principal survey being that of Parker, Stearns & Sanborn in 1852, of which Grove, Prospect, Elm and part of School Streets are a part. Other surveys were made by Cyrus Latham and Horace C. Hovey, a larger part, however, in area of the farm is now owned by Mr. Nutting's heirs.

The principal part of the John Mills farm was purchased by Harvey A. Woods, and in accordance with the survey made by Josiah K. Bennett, Esq., has all been sold in house-lots.

But a small part of the Nathaniel Stone farm, lying north of the railroads, has yet been sold. That part however, lying west of Nonaicoicus Brook, known as the Acre, has all been disposed of and built upon.

The Park farm remains to-day practically as it was fifty years ago, since which time there has been but one house built upon it.

CHAPTER LII.

AYER—(Continued).

Canal—Railroads—Post-Office—Telegraph—Telephone.

HAD railroads never been conceived of, it is probable that the site of our village would have long since been upon the line of a great through canal. The advantages that the Erie Canal gave to New York City by connecting it with the rapidly developing grain fields of the West, did not escape the attention of those interested in sustaining Boston's commercial pre-eminence. About 1835 Loammi Baldwin, a noted civil engineer of that period, made a survey for a canal from Boston to the Connecticut River, and proposed an extension from its western terminus to the Hudson River, with a tunnel under Hoosac Mountain. There was an engraved plan of the survey made by Annin & Smith, of Boston, which showed its exact route. It is to be found at the end of a "Report of the Commissioners of the State of Massachusetts, on the routes of canals from Boston Harbour to Connecticut and Hudson Rivers."

The plan is entitled "Plan of a Survey for a Canal from Boston to Connecticut River, with a sketch of a proposed Route to the Hudson, made under the direction of the Commissioners by L. Baldwin, engineer."

It is interesting to note the fact that this canal followed substantially the present line of the Hoosac Tunnel route. Beginning with Charles River, it passed through Cambridge, Watertown, Waltham, Lincoln, Concord, Acton, Littleton, Groton, Shirley, Lunenburg and Fitchburg, and from this place it went through Ashburnham and Winchendon, and then, as the Fitchburg now does, down Miller's River to the Connecticut, then up the Deerfield River to the mountain; thence under the mountain by tunnel; then down the Hoosac River to the Hudson.

Mr. Baldwin was at one time a law student in the office of Hon. Timothy Bigelow, of Groton, and while so engaged he made, in 1802, the fire-engine that is now stationed at West Groton. This machine, after eighty-eight years of service, continues to do good work.

The canal commissioners, in their report (page 57), say,—

"The route from the Nashua continues over plains, on quite level land, without any very great impediments, through the southern part of Groton to the Cutteconemugkeag, the outlet of Sandy Pond; thence along the southern side of that pond to Spectacle Pond, situated between Groton and Littleton. These ponds can be used as reservoirs."

The commissioners evidently confounded the outlet of Sandy Pond with the river in Shirley of a similar name. Mr. Baldwin in his report, (page 112), says,—

"From Sandy Pond in Groton near the school-house No. 11, the water may be turned with great ease to Spectacle Pond, into which falls

Shaker's brook. The stream from Spectacle Pond passes through Forge Pond in Westford, from which it is called Stony Brook until it drops into the Merrimack River in Chelmsford. From information derived from intelligent gentlemen, and from my own observation of part of this section of the country, it will be quite easy to open a communication through the valleys of these ponds and brooks to the Middlesex Canal in Chelmsford. Whether it would be expedient to carry the main line of the proposed canal in that direction, or whether a branch only should be taken off from it that way, are questions which it may be important to have the means of settling. It will therefore add much to the valuable hydrographic information which these surveys will furnish to cause a level and examination to be made between the Nashua at Staples' mills and the Middlesex canal."

The heights of certain points along the proposed route of the canal are given in the report, and are counted from low-water mark in Boston harbor. The following are in Ayer :

Shaker's Brook, on line between Littleton and Groton,	220.28
Spectacle Pond, in Littleton and Groton,	212.64
Sandy Pond, Groton,	226.90
Top of under-pinning of school-house No. 11, Groton,	237.64
Stone's Saw-mill Pond, on Sandy Pond Brook, "	223.89
Sandy Pond and Bear Hill Brook, "	213.03
Stone at Corner of Nutting's barn, "	224.95

From the above data we have no difficulty in tracing the line of this canal through our town. Staples' Mills was the saw and grist-mill at Mitchellville. They were then owned by Thomas Staples. Nutting's barn was just westerly from where Charles C. Bennett's dwelling-house now is. Stone's saw-mill pond on Sandy Pond Brook is what we now know as the Mill Pond or Flannigan's Pond. School-house No. 11 is our Sandy Pond School. Shaker's Brook is the same as now known as Bennett's Brook.

The rapid development of railroads gave a forever quietus to canal-building in New England. However beneficial such a water-highway may have been to the public, it certainly could not have developed South Groton into a separate municipality. We are, in the truest sense, a railroad town; not simply a railroad centre, but an offspring of the iron-horse itself. It was the magic touch of its wand that conjured our promising and thrifty village from an unpromising and almost stagnant country. At the advent of the railroads the limits of our present village comprised about a dozen farms of doubtful prosperity. The dwelling-house occupied now by James Gilson had but recently been erected, and was owned and occupied by one Joseph Waugh. Just south of it, in the triangle formed by the three highways, were the three dwelling-houses now standing there. To the south and nearer the Harvard line was the house of Abel Stone, now owned by his son, Charles H. Stone. At the pumping station was the saw-mill of Calvin Fletcher, and across the road the old red house, so called, since burned, and the house now owned by Newell A. Spencer. The next dwelling-house was that occupied by Joseph Barden, on the southerly side of Main Street, opposite F. G. Lufkin's, and now owned by Henry C. Sherwin. Silas Nutting's house, on the northerly side of Main Street, opposite Elm Street, was standing substantially as it now is. On

the Wheeler lot on Tannery Street was the house of Abijah Nutting. A little, square, hip-roof, brick school-house stood on the Fillebrown lot. In the fork of the roads stood the one-story dwelling-house, formerly school-house, then occupied by Abigail Chapin. A small mill, owned by Abel Morse, then occupied the site of Levi W. Phelps' present extensive establishment. Across the brook, on the northerly side of Shirley Street, was the dwelling-house of Benjamin Morse. The next buildings to the west were near the Lewis Blood place, nearly a mile distant, and at that time they consisted of four dwelling-houses, three of which have since been torn down.

There was then quite a little hamlet around the factories at Mitchellville. On Park Street stood the John Mills house, and just north of it the brick dwelling-house of Nathaniel Stone. Across the street and farther north was the Park house, all of which are now standing. Oliver Blood lived where Charles G. Woods' dwelling-house now stands. There was a small dwelling-house where John M. Haggett now lives. Our present Main Street, from the Littleton line to the corner of Shirley and Park Streets, was the principal highway. It was joined at Joseph Waugh's by the Sandy Pond Road, and near Fletcher's saw-mill by the Harvard Road. The old road to Groton, *via* Flannigan's Crossing, was traveled substantially as now. Shirley Street was the only highway west of Nonaicoicus Brook. Park Street was the road to Shirley and to Groton, by the way of Farmers' Row. What was later known as the old road to Groton joined Park Street just south of the John Mills place; thence to Groton *via* Groton Street and what is now Washington Street.

The Fitchburg Railroad was chartered in 1843 and is our oldest steam highway. The first, or what is now the north track, was built to Shirley Village in the fall of 1844, and extended to Fitchburg the following year. The second, or south track, was built in 1847.

Before the Fitchburg Railroad had been built the question of the location of the station was considered by the citizens of Groton. In town-meeting February 13, 1843, the following vote was passed:

"Chose Elijah Whitton, James Farnsworth, Artemas Wood, John Boynton and Nathaniel P. Smith a committee to confer with the authorities of the Boston & Fitchburg Co., in relation to the location of a depot at the south part of the town, also to select the location of a road thereto, from the centre of the town; also to make such surveys thereto as they may deem necessary."

August 23, 1844, the town voted and chose the selectmen a committee to confer with the directors of the Fitchburg Railroad; also instruct a committee to advocate the location of a depot at the lower part of the town, near the mill of Calvin Fletcher.

"Voted: To direct the selectmen to repair the road as they may think proper."

In accordance with the request in the last vote, the first Groton depot of the Fitchburg Railroad was located at what is now known as Flannigan's Crossing. The passenger station was built on the south side of the railroad, and west side of the highway. The freight-house was located just west of the passenger station. On the north side of the track a large wood-shed was built.

The location thus selected for the depot was occupied as such until the completion of the present Union Station in 1848.

The old passenger station was purchased by John Pingry and moved to the lot at the corner of Main and Church Streets, where, with the exception of a change in color from a yellowish brown, and the addition of two ells, it presents to-day practically the same external appearance as it did when it served railroad purposes.

The wood-shed was torn down and the freight-house moved on to what is now known as the Milk Stand Lot, just east of the Main Street crossing, where, with the addition of an extra story, added a few years since, it now stands. While the present Union Station was being built, a partially completed building that the Woods Brothers had moved from Woods Village was leased by the Fitchburg Railroad Company for a passenger depot. It stood between Main Street and the railroad, nearly opposite Stone's Block. It was subsequently purchased by Andrew J. Gardner, who moved it on to the lot at the corner of Washington and Newton Streets, now occupied by the Unitarian Church, and finished it as a dwelling house; and at the time it was burned in the great fire of 1872, was owned and occupied by George H. Champney. It was in this building, while owned by Mr. Gardner, that the first religious society (Baptist) in South Groton was organized.

After the Fitchburg Railroad was incorporated, but before it was built, the Groton Branch Railroad Company was chartered to build a railroad from some point on the Fitchburg Railroad in Groton to a point on the highway from Pepperell to Dunstable, but nothing was ever done toward its construction.

The Worcester and Nashua Railroad, as built, is a consolidation of two railroad companies—the Groton and Nashua Company, chartered by the New Hampshire Legislature, December 24, 1844, to build a railroad from the New Hampshire and Massachusetts State line to Nashua, N. H., and the Worcester and Nashua Railroad Company, chartered by the Massachusetts Legislature, March 5, 1844, to build a railroad from Worcester to Massachusetts and New Hampshire State line. The consolidation of these two roads as the Worcester and Nashua Railroad Company was authorized by the Legislatures of both States. By a subsequent act of the Massachusetts Legislature, this company consolidated with the Nashua and Rochester Railroad Company, thus becoming the Worcester, Nashua and Rochester Rail-

road Company, and in 1886 was leased to the Boston and Maine Company. The construction of the road was begun December 1, 1846. The section between Ayer and Clinton was opened for travel July 3, 1848; between Worcester and Clinton, November 22, 1848, and between Ayer and Nashua, December, 18, 1848.

The Peterborough and Shirley Railroad Company, as its name would indicate, was chartered to build a railroad from Shirley, Massachusetts, to Peterborough, New Hampshire. Before the construction was begun, the Worcester and Nashua route had been surveyed, and the location of the new road was changed, from a proposed terminus on the Fitchburg Railroad in Shirley, to meet the other two roads at the future railroad centre of Groton Junction. It is believed that the road was made to run through a corner of Shirley to avoid a forfeiture of its charter. The road was opened to West Townsend in February, 1848, and to Greenville in 1851. The promises of traffic have never been such as to warrant the investment necessary to extend the road to Peterborough; consequently the road bears two towns as its apparent termini, to neither of which it runs. Soon after the road was opened to travel it was leased to the Fitchburg Railroad Company for the term of twelve years, and purchased by the latter company in 1860 for \$132,666, realizing to the original stockholders fifty-six per cent. of their investment. From the opening of the road in December, 1848, until the abandonment of the depot at Flanagan's Crossing, that station was their termini,—the new company running over the Fitchburg track from Main Street to that point.

The Peterborough and Shirley road originally crossed the Worcester and Nashua road by switching on and off; and what is now the side-track past Spencer's stone-yard was the original main-track of the Peterborough and Shirley road. An inspection of it is interesting, as it shows the great improvement in railroad iron since 1869. The Stony Brook road was built by the corporation of that name in 1848, from North Chelmsford to Groton Junction. It was soon leased to the Nashua and Lowell for a term of years, and was absorbed in the Boston and Maine system in 1887. The main building of our present Union Station was erected in 1848. The arch on the south of the Fitchburg tracks was designed for the Stony Brook trains that at first crossed over the Fitchburg road by switches, and the arch on the north side was intended for the Peterborough and Shirley trains, but this arrangement was, upon a short trial, demonstrated to be inconvenient, and was abandoned for the arrangement now in use. Originally the ticket-office and waiting-room was in the northwest corner of the main building, where the small waiting-room and the telegraph offices now are. Where is now the general freight office was a side-track. A waiting-room and restaurant, the latter enclosed by sashes, to be raised and lowered similar to the restaurant in

the Causeway Street Station, Boston, was in the southwest corner of the main building; while the telegraph and freight office, baggage-room and a waiting-room were in an ell, now used as Kelleran's junk-shop, on Groton Street. The new ell and covered walk between the Boston and Maine tracks was built in 1871, and that road straightened to the north by taking out a large part of the hill on which Dr. Willis' and E. H. Hayward's houses now are.

The iron pillars that, in a row each side of the Fitchburg track, once assisted in sustaining the roof of the station were replaced by the trusses in 1871, and are now the roof supports of the upper story of Spaulding's Block, at the corner of Main and Washington Streets. The main building of the station is upon the land of the Fitchburg Company, while the ell is upon the land of the Boston and Maine Company. The Worcester and Nashua freight-house was built about 1848, and the color, a light slate, suggested to President Swift, of the Fitchburg road, the like color so long used on its local freight cars.

The centralizing here of these great railroad systems has thus afforded direct and through service with the four points of the compass. Distance to be traveled is now measured in hours and minutes and not in miles. We are less than an hour from Boston on the through expresses, and have over fifteen trains per day each way. Being on the Hoosac Tunnel Route, we are, as a shipping point to all places west, unsurpassed. The equipment of both railroads is unequalled; and we are afforded every railroad advantage which the age can boast.

If we may be permitted to indulge in geometrical figures we can say that we are at a common apex of three practically equilateral triangles—Ayer, Fitchburg, Nashua; Ayer, Nashua, Lowell; Ayer, Boston, Worcester.

The first station agent of the Fitchburg Railroad was Andrew J. Gardner, who served in that capacity until January 22, 1849, when David Chambers was appointed to that place. When the Union Station was first opened Andrew Garduer, a son of Andrew J. Gardner, was the agent of the Worcester and Nashua Road. He was succeeded in 1851 by Mr. Snow. Mr. Chambers was agent until August, 1854, when he resigned to accept a position on the Philadelphia, Wilmington and Baltimore Railroad, under S. N. Fenton, the former superintendent of the Fitchburg Railroad. Mr. Gardner was one of the most prominent and active citizens of our village, and during his short residence here was always actively interested in everything of a public nature. In 1851 he built a small store at the corner of Main and Washington Streets, which for two years was the only store in the village. He also kept the restaurant in the depot. About the time of his arrival here was the first accident at this station of any considerable magnitude. Through a misplaced switch, several car-loads of iron were sent in on the side-track in the arch on the southerly side of

the station, and their momentum was so great that they passed completely through the building, including the restaurant, to the Worcester and Nashua track.

There is probably no man living to-day whose connections with the railroads of Massachusetts, particularly of the Fitchburg, are so interesting as those of David Chambers. He came to Boston from Wilmington, Delaware, early in the forties, with the engine "Bunker Hill," for the Charlestown Branch Railroad Company. This road, the location of which from Block Island to Charlestown, is now the Fitchburg Railroad, was built exclusively for the transportation of ice from Fresh and Spy Ponds to Tudor's Wharf. He superintended the setting up of the "Bunker Hill," which was the second engine owned by the above company and afterwards ran her. May 5, 1843, he was conducting the train that, with the engine "Tudor," ran off Long Bridge, between Somerville and Charlestown, into the river, and received serious, and what for a long time were thought to be fatal injuries. He, however, recovered, and September 1, 1843, entered the employ of the Fitchburg Railroad, which at that time had been built from Block Island to Hill's Crossing, and was the first engineer ever employed by the Fitchburg Company. He ran as engineer until January, 1849, when he assumed the duties of station agent at Groton Junction. He was the first engineer to run a passenger train over every mile of the Fitchburg Railroad from Block Island to Miller's Falls, then known as Grout's Corner.

July 4, 1846, with the engine "Fitchburg" and a baggage-car, he left Charlestown at 10 A.M. and reached Fitchburg fifty-two minutes later. This run was made in opposition to the Boston and Lowell Railroad for Montreal mails, and is one of the most remarkable railroad runs on record. On one portion of the road the train ran eleven miles in nine minutes, Mr. Bigelow, afterwards superintendent of the Fitchburg Railroad, holding the watch. The mails *via* the Fitchburg reached Montreal at that time about eight hours earlier than those that left *via* Boston and Lowell, both trains leaving Boston at the same time.

Upon leaving here in 1854 he became the yard-master, under Mr. Fenton, at Philadelphia, a position that he still holds.

Mr. Snow succeeded Mr. Chambers as station agent at Groton Junction, and became the agent for the three roads. He continued to discharge the duties of that position until the spring of 1858, when his place was taken by a Mr. Harris, who was killed in July of that year in the yard while shacking cars.

Edmund Dana Bancroft was the next agent at this place. Mr. Bancroft's railroad experience began as clerk for Norman C. Munson while the latter was constructing the Stony Brook Railroad. October 16, 1848, Mr. Bancroft was appointed station agent in

Shirley, where he remained until his removal to Groton Junction, where he served as station agent until October 1, 1869.

Mr. Bancroft's successor was Charles E. Morrison, who was formerly a clerk in Mr. Bancroft's employ. Mr. Morrison was succeeded by Samuel Anderson, who came here from Lancaster, assuming charge in June, 1878. February 19, 1884, Mr. Anderson was appointed agent at Fitchburg, and James M. Flemming, of this town, became his successor. February 1, 1885, Mr. Flemming resigned to accept a more lucrative position in the employ of the Fitchburg Company, and Clarence H. Kinney, the present incumbent, formerly of Nashua, was appointed to his place.

POST-OFFICE.—June 1, 1849, a post-office at South Groton was established, and Andrew Boynton Gardner was appointed postmaster. The office was at first in a small building on the northerly side of Main Street, between West Street and the Boston and Maine Railroad. Mr. Gardner subsequently moved the office to the corner of Main and Washington Sts., in the store afterwards owned by George W. Stuart. Mr. Gardner served as postmaster until August 11, 1853, when he was succeeded by Harvey Alpheus Woods, who moved the office into his new block, now known as Cushing's Building, when completed, where it was kept by him until December 30, 1861. George Henry Brown was appointed his successor. By Mr. Brown the office was removed to his drug-store, in the northerly store of Union Hall Building, on Merchant's Row. Mr. Brown retained the office less than a year, being succeeded, December 5, 1862, by William Holmes Harlow. Mr. Harlow kept the office in Harvey A. Woods' store. Mr. Brown became postmaster again in 1863, retaining the office until July 18, 1868, when he was again succeeded by Mr. Harlow, who moved it into Harlow's building, between West Street and Boston and Maine Railroad.

After the great fire of April, 1872, Mr. Harlow reopened the office in Newell & Balck's building, between Main Street and the railroad, east of the Milk-Stand. Leonard A. Buck became postmaster March 31, 1873. He moved the office to the middle store of Harvey A. Woods' building, on what is now the Fillebrown lot, and subsequently to the easterly store of Mead's Block, and finally to the westerly store of the same block, where it now is. Mr. Buck, becoming financially involved, changed his residence to Florida, and during the balance of his unexpired term the office was conducted by Rector T. Bartlett, one of his bondsmen.

Edmund Dana Bancroft was appointed Mr. Buck's successor, March 2, 1883. By him the office was reconstructed, and, for the first time since its establishment, was conducted in a room used exclusively for post-office purposes. With a method and system characteristic of him, Mr. Bancroft made a model postmaster. For political reasons he was succeeded, March 3, 1887, by the present incumbent, Patrick

Doulon, Jr., by whom the high standard and efficiency established by Mr. Bancroft has been maintained, and his conduct of the office has given eminent satisfaction to all its patrons.

The post-office was established as South Groton. March 1, 1862, the name was changed to Groton Junction. Mr. Woods, the former postmaster, informed me that the reason of the change was that the name was frequently confounded by the postal clerks with South Gardner, which resulted in annoying mis-sending of the mails. March 21, 1871, the name was changed to that which it now bears.

TELEGRAPH AND TELEPHONE.—The first line of electric telegraph built to this village was from Lowell, and was owned by Jonathan Johnson. The office was in the old restaurant on the south side of the depot, Benjamin Franklin Felch being the operator. The first message transmitted over the line was June 19, 1852, announcing the nomination of Winfield Scott for President, by the Whig party.

Joseph W. Peck and Leonard A. Buck were the first parties to whom the American Bell Telephone Company granted a license to conduct telephone business in this town under their patents. The first line was built from Lowell to Fitchburg *via* Ayer, and an office was established in the rear of the post-office. This was in the summer of 1880.

Nellie Frances Kittridge was appointed manager in February, 1881, an office she has held to the present time. The uniform courtesy and the obliging disposition she has ever manifested has made the exchange most pleasant and useful to the patrons and public. Shortly after her appointment the office was moved to its present quarters, in Spaulding's Block.

Mr. Buck conveyed his interest to George G. Day in 1882. In August, of the same year, Day conveyed his one-half to Mr. Peck, by whom the corporation known as the Ayer Telephone Exchange Company was formed. The new corporation, however, managed the business but a short time, selling out to the New England Telegraph and Telephone Company, by whom the business has since been conducted.

CHAPTER LIII.

AYER—(Continued).

Schools—Library—Water-works.

SCHOOLS AND SCHOOL-HOUSES.—Until some time subsequent to 1734 it is supposed that the only school in Groton was at the middle of the town. In 1741 the inhabitants voted to have the school kept in five places, six weeks in each place. In 1742 the number of places was increased to seven, one of which is supposed to be in our vicinity, though its location cannot now be defined with any certainty. This public

extravagance, however, did not long continue, for, in 1745, a committee chosen to consider and report concerning the schools, recommended that "all such as live more than two miles, or thereabout [from the middle of the town], shall be so far eased as to embody amongst themselves, and upon their employing either a master or school-dame, shall draw the whole of what they pay to the school rate in said town."

As this report was accepted and ordered to be recorded, it would seem that our vicinity was thus deprived of the benefit of the public school. Whether they did "embody amongst themselves" and employ "either a master or a school-dame" cannot now be ascertained. For several years, beginning 1758, the grammar school was some time kept in the south part of the town. In 1760 the school-house in this vicinity was burned, and I am unable to learn when its successor was built, and whether it was upon the site of the former building. It, however, seems certain that the new school-house was erected upon the northerly side of Main Street, on the site of the present Fillebrown building. It was a one-story wooden building and was used as a school until about 1820, when a brick building was erected, of which more is said hereafter. The old building was sold and moved to near the present site of the hose-house of the Alfred Page Hose Company, at the corner of West Main and Park Streets, and just prior to the advent of the railroads was occupied by Abigail, better known as "Nabby," Chapin. It was subsequently purchased by James Coughlin, who moved it on to a lot back of Merchant's Row. It was the only building left standing on the row in the big fire of 1870. It was subsequently moved on to the Acre and is now standing on the southerly side of Shirley Street, just easterly of the dwelling-house of Michael Murphy. It is undoubtedly one of the oldest buildings in our town.

A committee appointed by the inhabitants of Groton, April 2, 1792, "To consider how many districts are necessary to be made and to ascertain the boundaries and see where the several houses shall be set," reported at the town-meeting held September 17th, of the same year, that there ought to be twelve districts. District No. 5, which included the limits of our village, was as follows: "5. Mr. Jonas Stone's District begins at the widow Sibil Stone's and includes Thos. Woods, David Dwinell and all the Families to Harvard line and that the school-house be and remain where it now stands." Jonas Stone owned what was later the Calvin Fletcher farm and lived in the red house, formerly standing opposite the site of the pumping station. Sibil Stone lived on the farm now owned by Asa S. Burgess, known as the Holden farm. I am unable to say where Dwinell or Woods lived. Two years previous to the last vote a census of the children—males under twenty-one and females under eighteen years of age—reported that there were thirty-nine in Jonas Stone's district.

A new and what proved to be a permanent division of the town into districts was made in 1805, of which Nos. 11 and 12 appear to be in our town :

"No. XI. Beginning at Snake Hill, so called, thence running southeasterly as the road goes, by Sandy pond, till it comes to the County road near Aaron Bigelow's, thence running westerly, as said County road goes, to a small house, where Oliver Blood (3d) now lives, including the land which he now occupies, and running from said Bigelow's easterly, as the County road goes, to Littleton line, and running northerly from the school-house at said County road, near where Caleb Symmes now lives, as the town way goes by Elisha Young's to Rocky hill, so called, near Tobacco pipe plain ; including all the inhabitants on both sides of said roads and within said limits ; and also including the occupants of the farm lying easterly thereof, formerly owned by Daniel Farwell ; and also including all the inhabitants living southerly of the County road aforesaid to Harvard line."

The road by Sandy Pond is what is now known as the Snake Hill Road. The County Road is the road from Ayer to Pingryville *via* Sandy Pond. Aaron Bigelow lived on "the road by Sandy Pond," between the County Road and the railroads. Oliver Blood (3d) lived on the southerly side of the County Road, about one-half way from Waugh's crossing to Sandy Pond. Caleb Symmes lived near Sandy Pond Station. Elisha Young's was the Levi S. Brigham place. Rocky Hill and Tobacco Pipe Plain are just beyond there. Daniel Farwell lived where George Little now lives,

"No. XII. Beginning at the crotch of the roads near Morgan place so called, thence running southeasterly, as the County road goes, by Stone's saw-mill, so called, to the small house, where Oliver Blood (3d) now lives ; and from said saw-mill southerly, as the County road goes, to Harvard line ; including all the inhabitants on both sides of said roads, and living southerly and westerly thereof to the lines of Harvard and Shirley ; and also including all the inhabitants living on the road leading from the crotch of the roads south of John Fisk's house to Stone's mill, and on the road leading from the crotch of the roads aforesaid to John Park's house, and all within the limits aforesaid."

The Morgan place was near where Charles Woods lives. John Fisk lived on what is now the Asa S. Graves place.

The limits of the districts as thus established continued until the incorporation of the town of Ayer. The brick school-house that stood on the northerly side of Main Street was built in the early part of this century to replace the wooden one before mentioned. It was a square, one-story, hipped-roofed building, whose prototype may be seen in the Prescott School, between Groton and Ridge Hill. It was the only school building in District No. 12, till 1852, when the town erected on the present school-house lot, on Main Street, a one-story wooden building, later known as the Grammar or White School. This building was moved, in 1865, to the town-lot, on the northerly side of Main Street, near the Milk Stand, and raised to the second story, the fire-engine and hook-and-ladder apparatus occupying the first floor, with the lock-up in the basement. Here the overflow from the grammar school in Harmony Hall formed the nucleus of our first high school.

The old brick school-house was sold at auction in 1855, and purchased by Major Hiram P. Ross, who used the bricks in the construction of the basement

of his soap factory, which was then being built on Tannery Street. About 1858 a building on the easterly side of Columbia Street was used for a school-room for a short time. The brick school-house on Washington Street was built about 1859, and, until it was destroyed in the great fire of 1872, was occupied by a primary and intermediato school. A wooden building of two rooms was built immediately after the fire, and the capacity doubled by an extension to the east in 1883. The present brick school building on Main Street was built in 1867. During the summer and fall of 1871 a school was kept in part of the old Catholic Church. The Shirley Street building was erected in 1872. For a short time after the big fire a room in Woods' Block, on Main Street, was occupied by the primary school. In 1871 there was considerable agitation about a new school-house, and the committee chosen to select a site decided upon the lot of land at the easterly side of Pearl and southerly side of Groton Streets, but no further steps were taken than this. Main Street brick school was built in 1867.

The first school building in District No. 11 was erected in the latter part of the last century. It was sold at auction in 1806. A new one was built in 1810 (size twenty-four by eighteen feet) and as it cost only \$198, it could not have been a very elaborate structure. It, however, served the purposes of the district until about 1820, when it was replaced by a brick structure, erected by John Pingry. This latter was destroyed by fire about 1850, and, while being rebuilt, the school was kept at what is now the Brigham place. The present building was erected by Levi S. Brigham in 1870. The records of this district from 1806 to 1869 are now in the possession of the Massachusetts Historical Society, and are among the most complete in the Commonwealth, and I regret that this article will not permit a more extended quotation than that of the first meeting :

"At a School Meeting at the School-house in District No. 11 in the Southerly part of Groton legally warned & assembled this 25th day of March 1806. The following Votes were passed. *Viz.*

"1st. Voted & Chose M^r Sam^l Farnsworth Moderator.

"2^d. Voted & Chose Caleb Symmes Clerk.

"3^d. Voted & Chose Capt Samson Farnsworth a committee to hire a School Mistress.

"4th. Voted that the Mistress' board be put up to the lowest bidder—M^r Sam^l Peirce being the lowest bidder the Mistress board was struck off to him at Ninety Nine Cents a Week.

"5th. Voted that the school begin the first Monday in May next.

"6th. Voted that Capt. Samson Farnsworth be a Committee to warn the next School meeting.

"7th. Voted that four days at least shall be a legal warning : for next School meeting.

"8th. Voted that the meeting be dissolved & it is dissolved accordingly.

Attest,

CALEB SYMMES, Clerk."

I have in my possession the records of District No. 12 from March 1, 1838, to March 1, 1869. Bound up with them are printed extracts from Chapter XXIII. of the Revised Statutes, "together with the By-laws of the town of Groton in relation to schools." The town was at that time divided into four-

teen districts, of which No. 11 and 12 retained the limits established in 1808.

At a meeting of District No. 12, held March 3, 1857, it was voted to divide the district into two parts: all that portion southerly of the Fitchburg Railroad and easterly of the Worcester and Nashua Railroad to constitute one district and the balance to constitute the other part.

From 1860 to 1871 there was seldom a town-meeting at Groton in which there was not some kind of an appeal for better school accommodations at Groton Junction. The first effort to obtain a high school here was an appeal made to the parent town, at a meeting of School District No. 12, held March 2, 1863. November 6, 1866, the town voted to indefinitely postpone an article in the warrant "to see if the town will vote to have the Town High School kept at Groton Junction a part of the year." A similar article was indefinitely postponed April 1, 1867. April 6, 1868, a motion to appropriate five hundred dollars for the support of a High School at Groton Junction was lost. March 2, 1868, at a meeting of School District No. 12, another appeal for a high school was made, which likewise proved unavailing. In the meantime a high grammar, sometimes incorrectly spoken of as a high school, was begun in the engine hall on the town-lot on Main Street, and, on the completion of the brick school-house on Main Street, was transferred to the room now occupied by the high school.

It remained, however, for the new town to establish a high school, and the success they have attained in this direction is due chiefly to James Powell, its first principal. Mr. Powell came here from Danvers, Mass. He was a graduate of the State Normal School at Bridgewater, and entered upon his duties here August 28, 1871. When he assumed the management of the school everything was in a chaotic state; and that he was able to establish a graded school and graduate the first class in four years, laboring against the conservatism, not to say prejudice, of many of the citizens, testify to the ability and unselfishness of the devotion that he brought to his work. The High School is truly a monument to him, for he gave to it the best years of his life. He came here fresh from his *alma mater*, and when he left us to assume the position of principal of the High School at Keene, N. H., his health had become so shattered that he survived but two years. Since its establishment our High School has graduated one hundred and eleven. The growth of our public school is interesting. In 1792 the number of children in Jonas Stone's district, (males under twenty-one and females under eighteen) was thirty-nine. In 1830 the number in the same district was eighty-five. The railroads found us in 1845 with one small school-house. In 1859 there were over 300 scholars. Today three school buildings and ten schools are barely adequate to accommodate the 527 scholars who attended school in 1889, in what was formerly "Jonas

Stone's District." We must further bear in mind that the census, taken under the district system, embraced all children, while the number now reported by the School Committee, includes only those actually attending the schools. The growth in District No. 11 has not been so marked. In 1806 the census of children (males under twenty-one and females under eighteen) in District No. 11 was forty-two. The average number of children now attending school there is about twenty.

The cause of education in the village owes a debt of gratitude to Doctor Benjamin H. Hartwell, who has served upon the School Board almost continuously since the incorporation of the town. In the days of its infancy the cause of the High School always found in him a faithful and fearless champion, and he has the satisfaction, oft denied to others, of living to see his views supersede the conservative opposition of his opponents.

THE PUBLIC LIBRARY.—The Groton Public Library, while free to the citizens of this village, was located at too great a distance to be of any practical advantage to them. There were various measures looking toward the establishment of libraries in connection with the district schools. In 1843 a committee of five was appointed by the citizens of Groton, at their March meeting, to take into consideration the feasibility of establishing libraries of ten volumes each in the various school districts; but the idea was too far in advance of the time, and nothing further came of it. At a town-meeting held March 7th, 1864, under an article "to see if the town will allow a portion of the town library to be kept at Groton Junction, or act in any way in relation to the same," the subject of the matter was referred to the following committee: Abel Prescott, George W. Bancroft and Rev. David Fosdick, Jr. This committee reported at the adjourned April meeting, but as their report is not on file, and the object sought did not come to use, it is probable either that the report was unfavorable or its results suppressed.

April 2, 1866, the town voted to indefinitely postpone the article asking if the town would adopt any measure to make the town library more available to the citizens of Groton Junction and vicinity. At the last town-meeting held while we were a part of the parent town, it was voted "that the books of the town library be divided, giving to the proposed new town of Ayer their proportion according to valuation, and that the selectmen be a committee to act with the selectmen of the said new town to make said division."

The action of this meeting never resulted in any benefit to this town, as the subject of the matter of the division of the town property was subsequently arranged on a different basis.

We were, however, not entirely without a library all these years. About 1852 there was established, largely through private contributions, a library free

to all the inhabitants of School District No. 12. The books were at one time kept in the White School-house; afterwards, while George W. Stuart was librarian, they were kept at his store, and subsequently at the dwelling-house of Samuel K. Merrill.

The great difficulty in perpetuating this library was that it was altogether *too* free, so much so that the takers of books felt under no obligations to return them, and, for want of proper care, they all disappeared within fifteen years from the foundation of the library.

In 1869 an association known as the Musical and Literary Club was formed in this village. They gave a series of entertainments and sustained a course of lectures, the proceeds of which were devoted to the purchase of a library. About one hundred dollars was raised and expended in books, the selection being made by the following committee, chosen by the club Feb. 7, 1870: Miss Lottie E. Hartwell, Mrs. G. C. Brock, Mrs. E. H. Hayward, Mrs. Martha E. Cooper and Miss Hattie Fletcher, to which was afterward added Mr. P. C. Lathrop and Benjamin H. Hartwell. The committee thus chosen reported to the club, March 28th, that they had performed the duty assigned to them. March 28, 1871, the library committee of the club advised "that the club would, at the town-meeting to be held on the first Monday in April, present all the books now in its library to the town, on condition that they would appropriate a certain sum of money for the purpose of starting a town library, and furnish a suitable room and necessary appurtenances for the same."

At a town-meeting held April 3, 1871, it was "voted that the selectmen be a committee to receive books that may be presented to the town, and also to appropriate one hundred dollars for books to meet the proposal of the Literary Club, who have agreed to give their library to the town of Ayer, it consisting of about one hundred dollars' worth of books, on condition that the said town appropriate the said sum of one hundred dollars for the addition of books to said library." Also, "voted that the following trustees be chosen: Ebenezer C. Willard, three years; Lewis Blood, two years; Oliver K. Pierce, one year." At the same time Benjamin H. Hartwell gave to the town for the benefit of the library the sum of \$50, to be expended in the purchase of books.

The first librarian of the town was Levi Sherwin, and the books were kept in his store. In the great fire of April, 1872, the entire library, with the exception of such books as were then in circulation (being about seventy-five in number), was destroyed. After the fire 135 volumes were added, and the library was re-opened in G. C. Brock's store, then on Merchant's Row. April 10, 1873, the number of volumes in the library was 554. Mr. Brock acted as librarian for about a year. He was succeeded by Edwin H. Hayward, and the library was moved to his store in Page's new brick block, where it was opened in April, 1873.

He made to the town, in 1874, the first report of the library, which is as follows:

"The whole number of books in the library, 555, of which 200 volumes were added one year ago, just previous of my receiving the books; 10,444 applications for books have been made during ten and one-half months, and those chiefly from a list of less than 100 books, subjecting the books to much wear and tear; 89 volumes have not been called for, and 181 less than three times; have paid for repairing, re-binding and material for covering, \$10.87; have collected as fines, \$2.40; from outside parties, \$2; balance, \$6.49; received from Lyceum Committee, \$40, to be appropriated for the purchase of books."

Sept. 23, 1874, Henry C. Rolf and George H. Allen were appointed trustees. Feb. 20, 1875, the number of volumes in the library was 681. March, 1875, Benjamin H. Hartwell was appointed a trustee of the library, an office that he has held continuously to the present time. In 1880 the number of volumes in the library was 1361. Leonard A. Buck was the next librarian, and by him the library was moved to the post-office in Mead Block, where they remained until the summer of 1882, when they were transferred to the town-house. Aug. 28, 1884, Flora Lucy Bigelow was appointed trustee and librarian. April 1, 1890, the number of books in the library was 2769. The Ayer Lyceum has made contributions to the library fund at different times.

The necessity which the library trustees have always felt for the necessary funds to equip it with standard books has been generously met by Frederick Fanning Ayer, Esq., of New York City, son of the late Dr. James Cook Ayer. April 23, 1890, the selectmen received from Mr. Ayer the following letter:

"NEW YORK, April 21, 1890.

"To the Selectmen of the Town of Ayer, Mass.:

"GENTLEMEN:—I desire to communicate with some one who may represent you or your town with reference to your Public Library. I would like in some way to contribute to the Library, or Library Fund, remembering when I was in Ayer that you were not very well supplied with books. If you will send some one to New York (at my expense) who will represent the interests of the Town in the matter, it will afford me much gratification to confer with him.

"I have the honor to remain, Gentlemen,

"Respectfully Yours,

"F. F. AYER."

In response to the request contained in the foregoing, Dr. Benjamin H. Hartwell, acting under the authority of the selectmen and trustees, visited New York City, and as the result of the conference with Mr. Ayer, the following letter was forwarded to the selectmen:

"NEW YORK, April 30, 1890.

"To the Selectmen of the town of Ayer, Ayer, Massachusetts:

"GENTLEMEN:—You are hereby authorized to draw on me for an amount not exceeding five thousand dollars for the purchase of books for the Public Library of the Town of Ayer, a list, or lists of said books having been first submitted to and approved by me in writing; all of said books to become and remain the sole and exclusive property of the Town of Ayer.

"Respectfully yours,

"F. F. AYER."

In pursuance of these negotiations, the town voted to transfer the library from the room in the south-west corner of the Town-House to the east side, taking for a book-room what had formerly been the pantry, and building another room of equal size, from the store-room, to be used as a public room for the patrons of the library; and at the date of writing the trustees have in preparation a list of books to be submitted to Mr. Ayer for his approval.

This offer by Mr. Ayer, coming unexpected as it did, very properly filled our citizens with gratitude toward the generous donor. In pursuance of a call issued by the selectmen, a mass-meeting was held in the Town Hall, at which the following resolutions were unanimously adopted:

"WHEREAS, Frederick F. Ayer, Esq., of New York City, has given to our town the sum of \$5,000 to be expended in the purchase of books for the Public Library, a sum that will place it upon a par with that of any other town of our size in the Commonwealth; therefore be it

"Resolved: that we, the inhabitants of the town of Ayer, in public meeting assembled, extend to Mr. Ayer the expression of our full appreciation and heartfelt thanks for his handsome and timely remembrance.

"Resolved: that for no other purpose could there be expended a like sum that would entail so enduring and widespread benefits to our people, and so enhance the future well-being and good name of our town.

"Resolved: that this is a munificent act, and a noble and loving tribute to the memory of him whose name our town bears

"Resolved: that it is the sense of this meeting that these resolutions be spread upon the town records, and that a copy with the proceedings of this meeting be sent to Mr. Ayer."

WATER WORKS.—For a score of years the question of a system of water works had been under discussion by this town, but until the summer of 1886 failed to attract any considerable share of public attention. In 1877 there was a movement on the part of a committee of citizens to utilize the pond hole on the town farm, and September 5, 1877, the town appropriated the sum of \$250 for the purpose of testing its capacity and purity. In 1880 another move was made; this time a competent engineer was employed to make surveys and report on the practicability, cost, etc., of a water system. This move, however, resulted in nothing more than the payment by the town of bills incurred by the committee. In the summer of 1886 a firm of contractors by the name of Turner, Dillaway & Rawson made to the town a proposition to construct a system of water works in the town, the same to be managed by them as a private corporation. The subject of their proposal was brought before the town at a public meeting held August 26, 1886, and a committee, composed of James R. Gray, Andrew Atwood, George J. Burns, Leonard J. Spaulding, Edwin H. Hayward, Charles C. Bennett and Henry C. Sherwin, was chosen, who reported at a subsequent meeting, recommending that the town construct for itself a system of water works, and the same committee were authorized to petition the Legislature of 1887 for authority to build the works, and the act authorizing said building was passed, and approved April 5, 1887. The act is interesting as being the third passed in this Commonwealth, in which authority was granted to

take the water of a great pond without being liable to pay any damages resulting therefrom, "other than the Commonwealth itself would be legally liable to pay." The town promptly accepted the provisions of the act, and elected James R. Gray, Andrew Atwood and Leonard J. Spaulding water commissioners, under whose direction the construction of the works was immediately begun.

In the fall preceding, anticipating the action of the town, and fearing that there might be a disposition of property, the gentlemen composing the town committee purchased, on their own responsibility, the Balch mill site, which they subsequently conveyed to the town at the price they paid for it. It was at first proposed to conduct water from Sandy Pond to the vicinity of this mill, by gravity, and from thence to pump it on to the hill near the poor farm, where the reservoir was to be constructed; but these plans were changed, and a large well dug on the Balch meadow lot. The works were completed and water was started in the early fall of 1887, since which time the town has ever congratulated itself on the happy move it has made; and the works are rapidly being placed on a paying basis. The water-power owned by the town furnishes, except in an extraordinary dry season, sufficient power to operate the pumps; an auxiliary steam plant has, however, been added. The water is of remarkable purity and the natural head amply sufficient for fire purposes. Since its introduction the use of the hand fire-engine has been abandoned, and two elegant hose carriages purchased, and two hose companies organized, the "Benjamin H. Hartwell Hose Company," stationed at the town-house, and the "Alfred Page Hose Company," stationed at what was formerly the Hook-and-Ladder Company house, at the corner of West Main and Park Streets.

CHAPTER LIV.

AYER—(Continued).

Industries—Ancient Mills—Manufactories—Newspapers.

As the early settlers of Groton were largely agricultural, and their remoteness from the older settlements so great, that the interchange of their raw products for wrought or manufactured articles was practically impossible, a public mill at which their corn could be ground became indispensable. The advantages afforded by the falls of the three brooks, now within the limits of Ayer, were early appreciated, and it is probable that mills were erected upon them at an early day.

The following vote, partly illegible, passed at a meeting of the proprietors of Groton, on July 21, 1665, clearly refers to these sites:

"& by votte d . . . Consent of the town yt noe . . . haue liberty . . . to take vp any laod by way of exchange or other way vpon Sandey

pond brooke, and between y^t and the magors brooke and South brooke till such tim as the milles acomodations be layed out."

The pumping station is on Sandy Pond Brook, Phelps' Mill upon Major's Brook, and the Shakers' Mill and the sites of the old mills at Pingry Village are upon South Brook.

It is probable that this vote is a reservation of these lands for the mill purposes. After several attempts to secure a corn-mill, the proprietors of Groton made an agreement with John Prescott, of Lancaster, on September 29, 1667, which resulted in the erection of a mill in the southerly part of the town, now within the limits of Harvard, on what, from that mill, has since been known as Mill Brook. The site of the original mill has until recently been occupied by J. W. Bacon's glue factory. The contract made with Prescott was clearly to his advantage, and the provision, that his should be the only public corn-mill within the limits of Groton for twenty years, was not calculated to stimulate a healthy competition in that line of business.

The reason for building the mill at such a distance from the centre of the town, and thus rejecting other equally good if not superior sites nearer that settlement, was undoubtedly to enable Prescott to have the advantage of the patronage of both Groton and Lancaster.

The mill being had, a highway to it became necessary, and this, from its destination, was known as the "Mill Highway." It subsequently (1673) became the new Lancaster highway, and is more particularly mentioned in another chapter. As the highway passed near the falls upon Sandy Pond Brook, this site was made eligible. When a mill was first erected here I am unable to say. In the inventory of the estate of John Page, who was the original proprietor of the land on which the mill, until recently, stood, it appears that the dam for flowing the meadow, probably for the purpose of power, was in existence in 1712.

The first was a saw-mill and continued as such until sold by Harvey A. Woods to Joseph and Mehetable Thompson, on February 25, 1864. The mill and site were purchased in 1887 by the town of Ayer to afford power for water-works. A brick pumping-station was erected and the old mill-building torn down. In the deed of James Patterson to John Sollendine, dated January 28, 1733, mention is made of a saw-mill on Coycus Brook. This is the site now occupied by Phelps' mill. In the deed of Henry Farwell to George Pierce, dated April 11, 1758, of this property, two mills are mentioned, and in the advertisement of sale of Pierce's property, September 27, 1773 (see "Taverns") one of these mills is described as a saw-mill "new last year."

On the southeasterly side of the highway to Groton *via* Park Street, and near the Groton line, may clearly be seen the remains of a dam that once converted the waters of James Brook into power. In the description of the lands of John Farnsworth (Early Records

of Groton, page 182) is "a piece of swamp land lying betwixt the pond at John Page's saw-mill and the bridg that goes to Nonicoycus, bounded round by the towns common land." This entry was made December 9, 1680, and furnishes undisputable evidence of the existence of this mill at that early date. In a description of the same lands in a deed from John Farnsworth to Abraham Moore, February 5, 1716, mention is made of Mill Pond, "with three quarters part of an old saw-mill thereon now standing." It will be observed that it is here called "an old saw-mill." This is the earliest unmistakable evidence of a mill-site in this town. Upon Pine Meadow Brook are to be seen the remains of an old dam, and William Sawteil, who died at Groton a few years since, has told me that he could remember traces of the mill itself. I can, however, find no mention of it in the early deeds.

About the middle of the last century there was a grist-mill at Pingry Village, the dam of which may be seen on the south side of the present highway *via* Rural Home. The mill itself stood on the north side of South Brook, at the foot of Brown Hill, a short distance west of the road to Sandy Pond School-house. Very little is known of its history. It had been abandoned and was in ruins at the beginning of this century. About 1820 Joseph Hartwell built a fulling and coloring mill on South Brook at Pingry Village, and ran it as such about fourteen years, and sold the mill to Lyman Whitcomb, who changed it into a wood-working establishment, manufacturing lumber and shingles, and did some cabinet work. About five years later Whitcomb sold the establishment to John Pingry and Nathaniel Whitmore, who converted it into a regular saw-mill. In 1852 they sold it to Charles Snow, who manufactured pencils here until about 1869, when Mr. Whitmore again became the owner and subsequently sold it to Levi S. Brigham, whose property it was when destroyed by fire July 15, 1872. When owned by Hartwell there was an ell attached, which he occupied as a dwelling-house. This was subsequently purchased by Phineas Nutting, who moved it to a lot between there and the Shakers' saw-mill, where it stood until destroyed by fire a few years since.

All traces of mill-sites have now disappeared from Pingry Village. The dams have been broken down, and the meadows, once covered by the waters of the mill-pond, have been drained, and the land reclaimed for agriculture.

The Shakers' saw-mill, also on South Brook, was built by the United Society in 1808, and it is the only mill-site in town still performing under the original proprietors the work for which it was originally built.

The water-power of the Nashua River at Mitchellville, was first utilized by Joshua Longley, of Shirley, who built a dam here and erected a grist-mill in 1790. The mill was near the highway and directly opposite

the dwelling-house now owned by John and William Chisholm. The canal above and below the mill was constructed by plowing and flowing water over it. Subsequently Longley built a saw-mill in connection with the grist-mill. The original buildings were destroyed by the fire at the time the Mitchell Shoddy-mill was burned on August 4, 1873. It was through the influence of Joshua Longley that the first bridge was erected over the Nashua River at this point. What is now the chief mill-site and water-power at Mitchellville was first utilized by Whitcomb, Edgarton, Priest & Co., who built here a four-engine paper-mill in the early part of this century. This mill was burned on June 15, 1837. Eli Page, the father of Thomas H. and Alfred Page, bought the farm and entire privilege in November, 1839. He rebuilt the paper-mill in 1841 and 1842, and leased it to Carter & Wilder, of Lancaster, for the term of twenty years. Carter, just before he failed, sold the lease to Hollingsworth, who sold to Stephen Roberts, by whom it was run until the expiration of the lease, at which time the mill had so far gone to decay that it had practically tumbled down. Mr. Page rebuilt the mill in 1862 and shortly after sold it, and the power connected therewith, to John Roberts, by whom it was operated until it was destroyed by fire on January 5, 1866. Roberts then sold it to a syndicate who had conceived of the project of bringing the power up hill into our village. For philosophical reasons the scheme did not work. In 1871 the privilege was sold to William Mitchell, who built a handsome, three-story, brick mill, and engaged in the manufacture of wool-shoddies. The plant was destroyed by fire on August 4, 1873. Since that time the privilege has been idle. Had it not been for innumerable and narrow-minded "ifs," the valuable power that for seventeen years has run to waste, would have been utilized for industries that would have added materially to our prosperity. The mill is now being constructed by a firm who propose to manufacture rubber goods.

The grist and saw-mill was sold by Longley to Thomas Staples, a noted stage-driver of this section, who operated there but a short time, and sold to Whitcomb, Edgarton, Priest & Co. They leased the power at the grist and saw-mill to Henry P. Howe, who erected there a machine-shop and manufactured paper fire-dryers, employing about thirty hands. Mr. Howe's machine was considered as a great invention, until superseded by steam drying. Howe remained here about three years, going from here to Worcester. The first dam was built by Longley. This was rebuilt by Eli Page in 1840, and by the Chisholms a few years since.

About 1848 Levi Woods purchased the lot of land now bounded easterly by Union Street, northerly by West Main and southerly by Shirley Street and built a bulkhead, preparatory to erecting a mill on Waste Brook, but the mill was never constructed.

As before stated, the power on Nonaiscoicus Brook was utilized at an early day. Until, however, it was purchased by the Woods Brothers, the right to flow the meadows extended only from September to April. The site was originally used for a saw-mill; subsequently a grist-mill was added. About fifty years ago it was known as Morse Mill. William W. Edgarton at one time manufactured cotton batting here. But its career was somewhat erratic until purchased by Woods Brothers. It was then a small building standing on Shirley Street. In about 1863 a horse-shoe nail factory was built in connection with this mill. This enterprise did not, however, prove a success and was soon abandoned. About 1870 Phelps and Woods erected two large mills extending from Shirley to Main Streets. The mills soon after passed into the hands of Alfred Page. The northerly mill was destroyed by fire December 20, 1880, and the southerly half was consumed by the same element February 25, 1881. The present structure was erected soon after.

The Stevens Brothers (George and Josiah G.) had invented what was considered valuable improvements in turbine water-wheels and barrel and atave machinery, and in 1867 a corporation known as the Stevens Machine Company was formed here, the stock being principally taken by local capital. The company purchased of Harvey A. Woods the lot of land bounded by Worcester and Nashua Railroad, Groton and Park Streets, and the land of the Park heirs, and erected the brick building now a part of the Union Furniture Company shop. The company, however, never manufactured, legal objections and controversies arose and after a few years the establishment was leased to Washington Whitney, who manufactured chairs here for several years, but finally succumbed to financial embarrassment. He was succeeded by John Batchelder, who operated the establishment a short time longer. It was finally closed as a chair factory in 1871, the machinery and balance of stock being removed by Phelps & Woods to their mill. It then remained unoccupied until 1877, when the establishment was leased to William Smithfield Moses, who manufactured chamber furniture there. It finally passed into the hands of Elijah B. Dolloff, by whom it was organized as the Union Furniture Company, which was formed with a capital of \$20,000, and by this company it is operated at the present time.

PLOW SHOP.—I am indebted to Benjamin F. Taft for the complete record of this establishment, which I regret to say has passed into history. It was the first large manufacturing establishment of our town. It brought here the most of the first citizens, the men who shaped whatever destiny we were fortunate enough to receive. The idea which culminated in this factory was conceived by Benjamin Martin, who was born in the village called Quabbin, in the town of Sutton, where, as a young man, he engaged in the

manufacture of plow-handles for Ruggles, Nourse & Mason, of Worcester. These handles were made by hand, and after the Blanchards, of Warren, Mass., had invented a machine for turning irregular forms, they were able to manufacture plow-handles at a much lower price than Mr. Martin. Mr. Martin was thus compelled to give up the business in which he had been engaged, and purchasing of Nourse, of Worcester, and Mason, of Boston, a few plow patterns, he engaged in the manufacture of plows in Quabbin. He soon outgrew his facilities in that place and moved to Blackstone, Mass., where Mr. Farnum, a large woolen manufacturer, built for him a shop, and here Martin engaged in the general manufacture of agricultural implements. Here, as at Quabbin, the business outgrew the facilities, and looking about for a place of settlement, he fixed upon Groton Junction as possessing the desirable facilities for his business. About that time he associated with Walter Lackey, of Northbridge. Isaac N. Stone, of Harvard, and the Fitchburg Railroad Company gave to them a deed of about ten acres of land, and they employed Morey Lapham, who designed and built their first shop, which was 200 feet by 70 feet and two stories high, with an engine-house, boiler-house, and a forge-shop 100 feet by 50 feet. These buildings were a lasting monument to the good judgment and workmanship of Mr. Lapham, while they stood. This was in 1850.

After about four years' struggle against the heavy debts contracted in the construction of their shop, the general depression of business, and the refusal of the assistance which Mr. Martin had been promised when induced to leave Blackstone and locate here, they suspended, and the property was purchased by Mr. H. O. Bean.

Personally, Mr. Martin was a very large man, weighing from 250 to 300 pounds; always kind, obliging and seldom without a smile and a kind word for every one. He and his family were members of the Baptist Church.

He was a very rapid penman, and his ability in that direction was only equaled by the utter illegibility of his correspondence when completed. A story is told that he wrote to a firm in South Carolina, who subsequently became large customers of his, soliciting their trade. In due course of mail, his letter was returned with the statement that, judging from the printed heading of Mr. Martin's letter, they had no doubt but what they would be able to make arrangements with him for selling his goods, but they were compelled to depend entirely upon the printed heading, as the letter itself was to them entirely unintelligible.

Bean ran the factory until the latter part of 1855, and made money, but sold to Nourse, Mason & Company. This firm, who manufactured plows principally under the patents of Joel Nourse, who was the pioneer in the manufacture of cast-iron plows, failed, and in 1864 the property was sold to Oliver Ames

and son, who formed a corporation known as the Ames Plow Company, by whom the business was conducted until the removal of the works to Worcester, where it is now being conducted. Nourse, Mason & Company enlarged the plant by the erection of a store-house, which was burned in 1871, and what was subsequently known as the foundry, a building between the original shop of Thayer & Lackey and the pond. As its name indicated, this building was constructed to be used as a foundry, and was so used for several years, but this department did not prove financially successful, and the foundry business was, after a few years of trial, abandoned. The building was subsequently occupied by A. H. Caryl, of Groton, during 1859 and 1860, who here manufactured caloric engines under Erickson's patents.

In 1874 and 1875, to the great loss of our town, the company resolved to move their plant to Worcester, and consolidate it with their shop then in operation at that place. The first superintendent of the Ames Plow Company was Aaron Howe, who was succeeded by Benjamin F. Taft, who remained in charge until 1867, and was succeeded by Joel Garfield.

The business conducted by the company here was very extensive, a larger part of their manufactured goods being exported to foreign countries, principally to Africa. The goods they manufactured were of a superior order, and the workmen engaged in the factories were good citizens and skilled mechanics.

In 1863, while under Mr. Taft's management, the company constructed for the Government the twenty-three buildings known as Camp Stevens. These were built ready for occupancy in twelve days from receiving the order from the government for their construction—a feat which reflected to the credit of the management and resources of the company. From the time that the works were moved to Worcester until the latter part of 1885 this extensive plant remained idle; at the latter date it was hired by the William A. Beader Glue Company, who equipped it with machinery and apparatus for the manufacture of bone glue. The factory, however, did not prove a mechanical success and the business proved a decided nuisance to the citizens of the village.

But there came a lamentable conclusion on the night of Dec. 2, 1886, when the entire plant, with the exception of two buildings, was destroyed by fire. The property has recently been purchased by Levi W. Phelps, and from him we have reason to believe that it has a future before it, both of advantage to the purchaser and to the town.

TANNERY.—March 26, 1854, Stephen Dow, of Woburn, purchased of Winthrop E. Faulkner about eight and one-half acres of land bounded southerly by Nonaicoicus Brook, easterly by land of Silas Nutting, westerly by the land of the Worcester & Nashua Railroad Company, and erected thereupon a small two-story tannery building at the westerly end of what is now the yard, and with Nathan W. Frye en-

gaged in business under the style of Dow & Frye. For the first two years the firm did tanning only. At the end of that time Charles N. Lund became a partner, and the second floor of the building was occupied as a currying and finishing shop. About a year later the new currying shop, 110 feet by 40, with an ell 30 by 40 feet, three stories high, was erected just north of the original building. About 1859 Stephen Dow sold his interest in the business and property to John B. Alley, who has been identified with the business ever since. Mr. Frye conveyed his interest in the business to his partners in the fall of 1863. April 20, 1867, the currying shop, with the principal part of its contents, and the westerly end of the yard building, was destroyed by fire. It was immediately rebuilt, and in 1882 its capacity and size nearly doubled. A few years ago Mr. Lund sold his interest in the business to Griffin Place. It is the oldest and best established industry in our town, employing at the present time upwards of one hundred men. Its career has been so uniformly upward and prosperous that there is little that can be written about it.

The foundry business was first conducted in this town by Mr. Nichols, of the firm of Cole & Nichols, of Lowell, in the building now occupied by Doherty Brothers, on the easterly side of Tannery Street. The business not proving successful, operations were suspended in a few years, and the building remained unoccupied until it was purchased by David Henius, who conveyed it to W. R. Hanks, April 3, 1867. Mr. Hanks operated the business for a short time on a small scale, the property being conveyed to Calvin D. Reed in the latter part of 1869. In the fall of 1870 the firm of Briggs & Kelley took possession, and operated it as partners until their death. While owned by Briggs & Kelley the capacity of the plant was more than doubled. Doherty Brothers purchased the property and business of Mr. Kelley in 1867, just before his decease, and in their hands it has been put upon a paying basis, that it never before occupied, and it is now one of the best established as well as best paying industries of our town.

One of our best factories is that of the Ayer Furniture Co., who occupy the northerly half of Phelps' Mill. It is a corporation, the stock being principally owned by the workmen, who are nearly all skilled cabinet-makers. Most of their goods are from their own designs. They make a specialty of chamber furniture, but do considerable general store and office furniture work.

PRINTING OFFICES AND NEWSPAPERS.—In the year 1842 George Henry Brown moved to Groton Centre from East Bridgewater, Massachusetts, and opened a printing office in the building occupied on the first floor by Walter Shattuck, grocery store, and for awhile was associated in business with Mr. Shattuck. In the fall of 1853 Mr. Brown removed his printing office to the Junction, and occupied the room in the northeast corner of the second floor of what is now Cushing's Block. A short time after-

wards he moved his establishment to Bartlett's Building, at the south end of Merchant's Row. While in Groton Mr. Brown began, in June, 1851, the publication of a monthly paper known as the *Groton Mercury*. After coming to the Junction the name was changed to the *Railroad Mercury*, and subsequently to *Brown's Railroad Mercury*, the first publication of that paper in this village being number 9, volume 3, and is dated June 2, 1854. The last number of this publication appeared on June 27, 1857. During the Fremont campaign, in 1856, Mr. Brown published three numbers of a campaign paper entitled, *Give 'em Jessie*. General Fremont's wife's name was Jessie, and the name of the paper and the expression of its title, which, by the way, is not an uncommon expletive at the present day, took its name from the first Republican candidate's wife. From September 15, 1859, to September 26, 1861, Mr. Brown published here the *Railroad Mercury*, a weekly journal. It is to be regretted that it gave so little space to local events. Its columns were generally filled with clippings and reading matter of the magazine order. Its editorials, however were spicy, fearless and patriotic. Published, as it was, during the stormy and trying scenes of 1860 and 1861, its voice was always on the side of the Union and supported the good cause. Its advertising columns were exceedingly interesting, giving us, as they did, a picture of the business of the village as then carried on.

April 6, 1867, was issued the first number of *The Middlesex Worker*, a weekly paper, 34 by 24 inches. It was edited by Lewis H. Hildreth, whose editorial rooms were in the northwest corner of the second floor of Cushing's Block. Like its predecessor, it devoted but little space to items of local interest, the columns being filled with general reading matter. The paper was printed by Stone & Hewes, in Lowell, and not proving a financial success it was disposed of to its printers, and by them merged into the *Lowell Journal*, which publication was sent to the subscribers for the last half of the subscription year.

On May 13, 1869, John Henry Turner, son-in-law and successor, in the printing business, to Mr. Brown, began the publication of the *Public Spirit*. It was but 11 by 16 inches in size, and contained 12 columns of reading and advertising matter. It was at first published for free distribution. After the fifth number it was called the *Weekly Public Spirit*, and its size was increased to 13½ by 20 inches, with 16 columns. With the first number of volume 3 the size was increased to 19 by 27 inches, with 20 columns, and it was called *Groton Public Spirit*. Volume 6 saw its size again increased, this time to 24 columns, with the title, *Turner's Public Spirit*, which it still bears. With volume 11 it became a 28 column paper, and has lately been enlarged to 32 columns. On August 23, 1884, Mr. Turner began to issue a series of papers, bearing the names of different towns in the northwestern part of Middlesex and the eastern part of

Worcester Counties, made up of the same matter as his *Public Spirit*, but with different headings. Mr. Turner's paper has rapidly increased in circulation.

The publication of the *Public Spirit* began in a room in the rear on the first floor of Union Hall Building. In July, 1871, Mr. Turner purchased of Baker his present building, which at that time was standing on what is now the vacant lot between the Hildreth Block and the American House Building, on Merchant's Row. In April, 1878, the building was moved on to its present lot, on Main Street. With the exception of two interruptions by fire, Mr. Turner's paper has appeared regularly since its birth.

In 1879 William M. Sargent began the publication of *The Ayer Sentinel*. He at that time occupied the second floor of Prescott's Building, then standing in Railroad Square, just west of the brick freight-house. This paper was published about three years. In 1880 Mr. Sargent removed his printing office to Fitchburg, and from that time until its publication was discontinued *The Ayer Sentinel* was printed in that place. Mr. Sargent subsequently purchased the book-binding business of W. B. Lewis, of this town, and is now engaged in an extensive business here.

In 1885 we were honored, if honor it be, by the presence of another editor's sanctum, this time the *Junction Journal*, published by Clough & Shepard, whose office was at first on the third floor of Spaulding's Block, subsequently in Stone's Block. The life of this journal, however, was brief, and it expired before reaching its first birthday.

Several publications of local papers have given us the credit of issuing a special edition of their publications bearing our name, the most prominent of which is the *Ayer Express*, published by Pratt Brothers, of Marlborough. It is still in existence and devotes considerable space to the discussion of Ayer local events.

CHAPTER LV.

AYER—(Continued).

Religious Societies—Baptist—Unitarian—Catholic—Congregationalist—Methodist.

THE first organized religious meetings in South Groton of which we have any knowledge were those of the Advents, who, under the leadership of a somewhat erratic character, held semi-occasional meetings in the little brick school-house on Main Street. At the outset they gave promise of great as well as disastrous things in the future, among which was to be the publication of a periodical devoted to the advocacy of that particular creed. Several numbers of this paper were printed at Brattleboro', Vt., and distributed from this village. The successes of the

organization did not materialize. Its last meetings were held about 1850. There were several attempted revivals since that time. In the summer of 1871 a tent was pitched on the circus grounds on Main Street, where preaching was had for two weeks. In the fall of the same year there was occasional preaching in Jenkins and Wright's Hall, on West Street.

Of the existing religious societies, the Baptists are entitled to the credit of being the first to organize. Until recently it has been the general belief that the South Groton Christian Union, subsequently the Unitarian Society, was the pioneer in that field.

September 13, 1863, Rev. George H. Allen, then pastor of the Baptist Church, in an address before the Wachusett Baptist Association in South Gardner, gave a historical sketch of his church, that is so complete that I have here made liberal abstracts from it.

The following is the preface to the church records:

"South Groton, June 10, 1851. God, in his Providence, having opened a door for Baptist preaching in South Groton, the meetings have been well attended, a good degree of interest manifested and the prospect of future usefulness under the divine blessing, encouraging: the brethren and sisters desiring to see the standard of the cross permanently erected, met at the house of brother Andrew Gardner, on Tuesday, June 10th, to take into consideration the forming of a church in this place."
